AUTHENTICATION OF RULES AND REGULATIONS

THIS IS TO CERTIFY That we, Derek Schmidt, Attorney General of and for the State of Kansas, and Scott Schwab, Secretary of State of and for the State of Kansas, pursuant to K.S.A. 77-429 have examined and compared this 2022 Volume 1 of the Kansas Administrative Regulations; and do hereby certify that this publication of rules and regulations contains all rules and regulations for agencies 1 through 27 approved for printing by the State Rules and Regulations Board and otherwise complies with K.S.A. 77-415 *et seq.* and acts amendatory thereof.

Done at Topeka, Kansas, this 15th day of September, 2022.

DEREK SCHMIDT,
Attorney General

SCOTT SCHWAB,
Secretary of State

[SEAL]

EXPLANATORY PREFACE

This volume has been compiled and published in accordance with K.S.A. 77-430a and other applicable laws.

ARRANGEMENT OF RULES AND REGULATIONS

Administrative rules and regulations of the various state agencies are arranged in accordance with a three-part system of numbers divided by hyphens. The first number indicates the agency; the second number indicates the article (a group of regulations of such agency upon the same subject); the last number indicates the specific section or regulation within the article. For example, "1-4-11" refers to agency No. 1, article No. 4 and section No. 11.

The law requires that agencies cite the statutory authority for the regulation and the section(s) of the statutes which the regulation implements. This is published at the end of the text of the regulation. In addition, the Secretary of State includes a history of the regulation which indicates the original effective date of the regulation and each subsequent amendment.

SALES

Volumes of the Kansas Administrative Regulations are sold by the Publications Division of the Office of the Secretary of State, First Floor, Memorial Hall, 120 SW 10th Ave., Topeka, KS 66612-1594, 785-296-4557.

SCOTT SCHWAB, *Secretary of State*

COMMENTARY

This volume has been compiled and published in accordance with K.S.A. 77-430a and other applicable laws.

The 2022 Volumes contain rules and regulations filed before January 1, 2022. The volumes replace the 2009 Volumes and 2021 Supplement. Regulations filed on and after January 1, 2022, may be located by checking the Kansas Register, Kansas' official state newspaper. An index appears at the back of each Kansas Register and lists the volume and page number of the Register issue that contains the most recent version of the regulations filed after December 31, 2021.

To find the most recent version of a regulation:

First, check the table of contents in the most current issue of the Kansas Register

Then, check the Index to Regulations in the most current Kansas Register

Next, check the current K.A.R. Supplement

Finally, check the current K.A.R. Volume

If the regulation is found at any of these steps, stop. Consider that version the most recent. The most current regulations, proposed regulations open for public comment, and published regulations with a future effective date may also be found in the online K.A.R. at https://sos.ks.gov/publications/pubs_kar.aspx.

To determine the authorizing and implementing statute(s), the effective date, or to see when a regulation was amended or revoked, check the history found at the end of each regulation. The authorizing and implementing statute(s) are listed first followed by any subsequent action. For example, in "amended, T-7-12-11-90, Dec. 31, 1990" the "T" means temporary, the "7" is the number assigned to the agency in the K.A.R. Volumes, and 12-11-90 is the date that the regulation was filed. Following the last comma is the effective date. Therefore, the amendment was filed as a temporary regulation on December 11, 1990, and the amendment became effective on December 31, 1990. A temporary regulation becomes effective upon approval by the State Rules and Regulations Board and filing in the Secretary of State's Office or at a later date when specified in the body of the regulation. A temporary regulation lasts 120 days unless it is amended or revoked within 120 days. If the "T number" is not included in an action on a regulation, the regulation was filed as a permanent regulation. A permanent regulation is effective 15 days following publication in the Kansas Register or at a later date specified in the body of the regulation. Prior to July 1, 1995, a permanent regulation became effective 45 days following publication in the Kansas Register or at a later date specified in the body of the regulation. The regulation remains in effect until amended or revoked.

Any questions regarding the publication or use of the K.A.R. Volumes or questions regarding the regulation filing procedure may be directed to the Kansas Administrative Regulations Editor at 785-296-0082. For purchasing inquiries call 785-296-4557. Questions concerning the subject matter of a regulation should be directed to the agency administering the regulation.

Issues of the Kansas Register may be viewed and downloaded at <https://sos.ks.gov/publications/kansas-register.html>.

Article 1.—PURPOSE, ADOPTION AND AMENDMENT OF REGULATIONS; PERSONNEL POLICIES

1-1-1. State human resource program, responsibilities, regulations, and guidelines.

(a) The Kansas civil service act shall be administered by the director to establish a complete human resource program that provides an effective, diverse, responsible, and quality workforce. The regulations in articles 1 through 14 and any associated guidelines shall apply only to classified employees unless otherwise specifically stated.

(b) The central personnel office for the state as one employer shall be the division of personnel services.

(c) The statewide human resource program shall be managed by the director in partnership with the human resource directors and staff of other state agencies. Agencies shall be provided with opportunities to share in the responsibility of developing regulations and implementing the resulting programs. Each human resource duty that is delegated to an appointing authority by the di-

rector shall be the responsibility of the appointing authority. The appointing authority shall comply with statewide personnel regulations and statutes.

(d) The human resource regulations and bulletins shall be made available to each agency by the director.

(e) Each agency shall make available for inspection all human resource regulations and bulletins to all employees in a manner that is both known to employees and available at all times.

(f) Standards of health and safety in state agencies and a comprehensive health and safety program for the state service shall be established by the director, in cooperation with appropriate agency administrators.

(g) This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 75-3707 and 75-3746; effective May 1, 1979; amended May 31, 1996; amended June 5, 2005.)

1-1-2 and 1-1-3. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked May 31, 1996.)

1-1-4. (Authorized by K.S.A. 75-3747; implementing K.S.A. 1982 Supp. 75-3746; effective May 1, 1983; revoked May 31, 1996.)

1-1-5. Pilot projects. (a) Plans for pilot projects within the state employee workforce may be developed by the director for the purpose of determining whether a specified change in human resource management policies or procedures or a new human resources program would result in improved statewide human resource management. The plan shall specifically delineate any provisions of one or more personnel regulations relating to state agencies and state employees that are to be suspended with respect to participants in the pilot project and shall include findings that each proposed suspension of a regulation meets all of the following criteria:

(1) Suspension of the regulation is necessary to implement a pilot project that is expected to accomplish one or more of the following purposes:

(A) To provide a means to recruit, select, develop, or maintain an effective and responsible workforce;

(B) to provide personnel administration practices that meet the social, economic, and program needs of the people of the state of Kansas;

(C) to facilitate the administration of personnel actions based on merit principles and fitness to perform the work required;

(D) to provide fair and equal opportunity for public service; or

(E) to provide improvements and economies in the organization and operation of state agencies.

(2) Suspension of the regulation will not be in conflict with the civil service act or any other statute of the state of Kansas.

(3) Suspension of the regulation will not be in conflict with any applicable federal statutes or regulations.

(4) Suspension of the regulation will not result in any personnel administration actions made on the basis of race, national origin or ancestry, religion, political affiliation, or other nonmerit factors.

(b) The plan for a pilot project shall be subject to review by the secretary of administration. The pilot project may be approved, modified and approved, or rejected by the secretary. Each plan that is either approved or modified and approved by the secretary shall be submitted to the governor.

(c) Implementation of the pilot project may be authorized by the governor in the form of an executive directive, which may place additional limitations or conditions on implementation of

the pilot project as the governor deems advisable. The executive directive shall stipulate any provisions of one or more personnel regulations relating to state agencies and state employees that are suspended for participants in the pilot project. Such a suspension of provisions of one or more regulations shall be effective only for pilot project participants and only for the duration of the pilot project. (Authorized by K.S.A. 75-3706 and 75-3747; implementing K.S.A. 75-2925, 75-3707, and 75-3746; effective Oct. 1, 1999.)

Article 2.—DEFINITIONS

1-2-1. This regulation shall be revoked on and after December 17, 1995. (Authorized by K.S.A. 1988 Supp. 75-3747; implementing K.S.A. 75-2938; effective May 1, 1979; amended May 1, 1981; revoked, T-1-7-27-89, July 27, 1989; amended Nov. 20, 1989; revoked Dec. 17, 1995.)

1-2-3. Act. Act means the Kansas civil service act. (Authorized by K.S.A. 75-3747; effective May 1, 1979.)

1-2-4. Agency. “Agency” means a unit of state government assigned a unique department identification number by the division of accounts and reports, except that for the purpose of the civil service act and these regulations, the university of Kansas at Lawrence and the university of Kansas medical center at Kansas City and Wichita, shall be considered as separate agencies. This regulation shall be effective on and after December 17, 1995. (Authorized by K.S.A. 1994 Supp. 75-3747; implementing K.S.A. 75-3746; effective May 1, 1981; amended Dec. 17, 1995.)

1-2-5. This regulation shall be revoked on and after December 17, 1995. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked Dec. 17, 1995.)

1-2-7. Allocation. Allocation means the assignment of an individual position to an appropriate class. (Authorized by K.S.A. 75-3747; effective May 1, 1979.)

1-2-8. Applicant. “Applicant” means a person who registers personal information and qualifications with the state and who applies for a specific vacancy. (Authorized by K.S.A. 75-3706 and K.S.A. 1996 Supp. 75-3747; implementing K.S.A. 1996 Supp. 75-2939 and K.S.A. 75-3746; effective Dec. 17, 1995; amended Aug. 1, 1997.)

1-2-9. Appointing authority. (a) “Appointing authority” means a person or group of persons empowered by the constitution, by statute, or by lawfully delegated authority to make human resource decisions that affect state service, including designees of the appointing authority as provided in subsection (b).

(b) Any appointing authority may select an employee or group of employees to act as the designee of the appointing authority to make specified human resource decisions that affect state service.

(c) This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 75-3746; effective May 1, 1979; amended Dec. 17, 1995; amended June 5, 2005.)

1-2-11. This regulation shall be revoked on and after December 17, 1995. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked Dec. 17, 1995.)

1-2-13. Budgeted position. Budgeted position means a position in the agency budget as approved by the legislature, which shall not be filled until the duties and responsibilities to be assigned to the position are actually decided upon by the employing agency and the position has been allocated to the proper class. (Authorized by K.S.A. 75-3747; effective May 1, 1979.)

1-2-14. Candidate. “Candidate” means an applicant who has been certified to the pool as eligible by the appointing authority or by the director, by virtue of meeting both the required selection criteria for a class of positions and the required selection criteria for a specific position. (Authorized by K.S.A. 75-3706 and K.S.A. 1996 Supp. 75-3747; implementing K.S.A. 1996 Supp. 75-2939, 75-2942, and 75-2943; effective Dec. 17, 1995; amended Aug. 1, 1997.)

1-2-15. Career path. A career path identifies optimum alternative paths of employee progression to positions requiring successively higher levels of skill and the consequent promotional opportunities. (Authorized by K.S.A. 75-3747; effective May 1, 1979.)

1-2-17. Class. “Class” means one or more positions sufficiently similar with respect to duties and responsibilities that the same descriptive title may be used with clarity to designate each position allocated to the class, that the same required selection criteria are needed for per-

formance of the duties of positions in the class, that the same assessments may be used to select employees for positions in the class, and that the same schedule of pay can be applied with equity to all positions in the class under the same or substantially the same employment conditions. This regulation shall be effective on and after December 17, 1995. (Authorized by K.S.A. 1994 Supp. 75-3747; implementing K.S.A. 75-2938, as amended by 1995 SB 175, § 4; effective May 1, 1979; amended Dec. 17, 1995.)

1-2-19. Classified service. Classified service means all positions in the state service, except those which are specifically placed in the unclassified service by K.S.A. 75-2935, as amended, or other sections of the statutes. (Authorized by K.S.A. 75-3747; effective May 1, 1979.)

1-2-20. Commercial driver position. “Commercial driver position” means any position which is subject to the State of Kansas alcohol and controlled substances testing program established under the federal omnibus transportation employees testing act of 1991, 49 U.S.C. Appx. § 2717. Commercial driver positions shall be limited to those positions which require:

(a) a commercial driver’s license as defined in the Kansas uniform commercial drivers’ license act, K.S.A. 8-2,125 *et seq.*, as amended; and

(b) operation of a commercial motor vehicle:

(1) with a gross vehicle weight of over 26,000 pounds; or

(2) designed to carry 16 or more passengers, including the driver. (Authorized by K.S.A. 1994 Supp. 75-3747, implementing K.S.A. 75-3746, 75-2940 and 75-3707; effective, T-1-1-26-95, Jan. 26, 1995; effective May 30, 1995.)

1-2-23. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked, T-86-17, June 17, 1985; revoked May 1, 1986.)

1-2-24. (Authorized by and implementing K.S.A. 75-3747; effective May 1, 1979; revoked, T-86-17, June 17, 1985; revoked May 1, 1986.)

1-2-25. Compensatory time. “Compensatory time” means time off, in lieu of monetary payment for overtime worked, given pursuant to K.A.R. 1-5-24. This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 75-3707 and 75-3746; effective May 1, 1979; amended, T-86-17, June 17, 1985; amended, T-86-36,

Dec. 11, 1985; amended May 1, 1986; amended, T-87-11, May 1, 1986; amended May 1, 1987; amended, T-89-1, May 1, 1988; amended Oct. 1, 1988; amended June 5, 2005.)

1-2-25a. Holiday compensatory time. “Holiday compensatory time” means leave given in accordance with K.A.R. 1-9-2 to employees who work on holidays and who are compensated for this holiday work by receiving time off at a later date, at the rate of one and a half hours off for one hour worked. This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 75-3707 and 75-3746; effective June 5, 2005.)

1-2-26. This regulation shall be revoked on and after December 17, 1995. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked Dec. 17, 1995.)

1-2-27. This regulation shall be revoked on and after December 17, 1995. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked Dec. 17, 1995.)

1-2-29. This regulation shall be revoked on and after December 17, 1995. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked Dec. 17, 1995.)

1-2-30. This regulation shall be revoked on and after June 5, 2005. (Authorized by and implementing K.S.A. 1998 Supp. 75-4362 and K.S.A. 75-4363; effective April 13, 1992; amended July 26, 1993; amended Oct. 1, 1999; revoked June 5, 2005.)

1-2-31. Demotion. “Demotion” means the movement of an employee from a position in one class to a position in another class having a lower pay grade, either on an involuntary basis for disciplinary purposes or on a voluntary basis. This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 2004 Supp. 75-2949, K.S.A. 75-2949d, 75-3707, and 75-3746; effective May 1, 1979; amended Dec. 17, 1995; amended June 7, 2002; amended June 5, 2005.)

1-2-32. Director. Director means the director of personnel services. (Authorized by K.S.A. 75-3747; effective May 1, 1979.)

1-2-33. Division. Division means the state division of personnel services, including the di-

rector and the employees thereof. (Authorized by K.S.A. 75-3747; effective May 1, 1979.)

1-2-34. Disability. Disability means, with respect to an individual: (a) a physical or mental impairment that substantially limits one or more major life activities;

(b) a record of such an impairment; or

(c) being regarded as having such an impairment. (Authorized by K.S.A. 75-3747; implementing K.S.A. 75-3746; effective Aug. 3, 1992.)

1-2-35. Candidate pool. “Candidate pool” means a pool of candidates certified as eligible for a vacancy by the appointing authority or by the director, and from which the appointing authority must hire an individual to fill that vacancy. (Authorized by K.S.A. 1996 Supp. 75-3747; implementing K.S.A. 1996 Supp. 75-2939, 75-2942, and 75-2943; effective May 1, 1979; amended Dec. 17, 1995; amended Aug. 1, 1997.)

1-2-37. This regulation shall be revoked on and after December 17, 1995. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked Dec. 17, 1995.)

1-2-39. This regulation shall be revoked on and after December 17, 1995. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked Dec. 17, 1995.)

1-2-41. Established position. Established position means a position which is in the budget as approved by the legislature, and which has been allocated. (Authorized by K.S.A. 75-3747; effective May 1, 1979.)

1-2-42. Exempt employee. “Exempt employee” means an employee who is in a position that is determined by the director, or by an appointing authority with delegated authority under K.S.A. 75-2938, and amendments thereto, not to be eligible for overtime pay under 29 U.S.C. § 213, as amended on October 31, 1998 and hereby adopted by reference. (Authorized by K.S.A. 2001 Supp. 75-3747; implementing K.S.A. 75-3746; effective Dec. 17, 1995; amended June 7, 2002.)

1-2-42a. Non-exempt employee. “Non-exempt employee” means an employee who is in a position that is determined by the director, or by an appointing authority with delegated authority under K.S.A. 75-2938, and amendments thereto, to be eligible for overtime pay under 29 U.S.C. §

213, as amended on October 31, 1998 and hereby adopted by reference. (Authorized by K.S.A. 2001 Supp. 75-3747; implementing K.S.A. 75-3746; effective Dec. 17, 1995; amended June 7, 2002.)

1-2-43. This regulation shall be revoked on and after December 17, 1995. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked Dec. 17, 1995.)

1-2-43a. Incumbent. “Incumbent” means the employee occupying a particular position. This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 75-3706 and K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 75-3707 and 75-3746; effective June 5, 2005.)

1-2-44. In pay status. “In pay status” means time worked, and time off work for which the employee is compensated because of a holiday, the use of any kind of leave with pay, or the use of compensatory time or holiday compensatory time. This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 75-3707, 75-3746, and 75-5507; effective Dec. 17, 1995; amended June 5, 2005.)

1-2-45. Intern program. Intern program means an entrance level career development program which applies scholastic achievement or potential to guided participation in utilizing professional and managerial techniques within a specific occupational field. (Authorized by K.S.A. 75-3747; effective May 1, 1979.)

1-2-46. Length of service. (a) “Length of service” shall mean total time worked in the classified service or unclassified service, including time spent on an appointment to a position pursuant to K.S.A. 75-2935(1)(i), and amendments thereto. Length of service shall exclude the following:

(1) Time worked as a temporary employee in accordance with the provisions of K.A.R. 1-6-25;

(2) time worked as a student employed by any board of regents institution;

(3) time worked as a resident worker in an institution of mental health as defined in K.S.A. 76-12a01 and amendments thereto or in a state veteran’s home operated by the Kansas commission on veteran’s affairs; and

(4) time worked as an inmate.

(b) Time spent on military leave and time off while receiving workers compensation wage replacement for loss of work time shall be con-

sidered to be time worked in the classified or unclassified service. Time on leave while receiving workers compensation wage replacement for a disability attributable to state employment before May 1, 1983, shall not be credited.

(c) Within educational institutions under the control and supervision of the state board of regents or the state board of education, time spent on leave of absence, if imposed by the educational institution based on employment customs arising from an academic or school calendar requiring less than a full calendar year of service, shall be considered to be time worked in the classified service. However, length of service based on this leave of absence shall not be transferable to other state agencies. For the purposes of layoff, employees of these institutions shall be credited only for actual time worked.

(d)(1) Length of service for computing vacation leave accrual rates and for layoff or compensation purposes shall not be recalculated using prior versions of this regulation for employees who have no break in service.

(2) Length of service for determining vacation leave accrual rates and for layoff or compensation purposes for an individual returning to state service shall be the amount of length of service on record on December 17, 1995, or on the date the individual left state service, whichever date is later.

(e) Authorized leave without pay over 30 consecutive days shall not count toward length of service. However, authorized leave without pay for 30 consecutive days or less shall not be considered a break in service.

(f) Increased rates of vacation leave earnings based on length of service shall not be retroactive.

(g) For purposes of vacation leave accrual, layoff, and longevity bonus pay, the length of service of any person who has retired from state service shall be reduced to zero, and if the person later returns to state service, the length of service shall be calculated on the same basis as that for a new hire. (Authorized by K.S.A. 75-3706 and K.S.A. 2005 Supp. 75-3747; implementing K.S.A. 75-3707 and 75-3746; effective May 1, 1983; amended May 1, 1984; amended May 1, 1985; amended, T-87-52, Dec. 19, 1986; amended May 1, 1987; amended Dec. 27, 1993; amended Dec. 17, 1995; amended Sept. 18, 1998; amended June 5, 2005; amended Jan. 12, 2007.)

1-2-47. This regulation shall be revoked on and after December 17, 1995. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked Dec. 17, 1995.)

1-2-48. (Authorized by K.S.A. 1994 Supp. 75-3747; implementing K.S.A. 75-3746 and K.S.A. 75-2948, as amended by 1995 SB 175, § 12; effective May 1, 1984; amended Dec. 17, 1995; revoked June 7, 2002.)

1-2-49. This regulation shall be revoked on and after December 17, 1995. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked Dec. 17, 1995.)

1-2-50. New hire. “New hire” means any person hired by a state agency who has not been previously employed by the state. This regulation shall be effective on and after December 17, 1995. (Authorized by K.S.A. 1994 Supp. 75-3747; implementing K.S.A. 75-2942; effective May 1, 1981; amended Dec. 17, 1995.)

1-2-51. Pay increase date. “Pay increase date” means the date on which an employee is eligible for a step increase based on the time-on-step requirements of K.A.R. 1-5-19b. This regulation shall be effective on and after December 17, 1995. (Authorized by K.S.A. 1994 Supp. 75-3747; implementing K.S.A. 75-2938, as amended by 1995 SB 175, § 4; effective May 1, 1979; amended May 1, 1983; amended, T-86-17, June 17, 1985; amended May 1, 1986; amended May 1, 1987; amended Dec. 17, 1995.)

1-2-53. (Authorized by K.S.A. 1980 Supp. 75-3747; implementing K.S.A. 75-2946; effective May 1, 1979; amended May 1, 1981; revoked May 31, 1996.)

1-2-54. Pay grade. “Pay grade” means a salary and wage range in the pay plan prepared by the director as required by K.S.A. 75-2938. This regulation shall be effective on and after December 17, 1995. (Authorized by K.S.A. 1994 Supp. 75-3747; implementing K.S.A. 75-2938, as amended by 1995 SB 175, § 4; effective Dec. 17, 1995.)

1-2-55. This regulation shall be revoked on and after December 17, 1995. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked Dec. 17, 1995.)

1-2-57. Permanent status. Permanent status means the status of an employee who has successfully completed a probationary period, in accordance with K.A.R. 1-7-3, 1-7-4, and 1-7-6. (Authorized by K.S.A. 1995 Supp. 75-3747; implementing

K.S.A. 75-2946; effective May 1, 1979; amended May 1, 1981; amended May 31, 1996.)

1-2-59. Position. Position means a group of duties and responsibilities, assigned or delegated by an appointing authority, requiring the services of an employee on a full-time basis or, in some cases, on a less than full-time basis. (Authorized by K.S.A. 75-3747; effective May 1, 1979.)

1-2-61. Position review. Position review means the official study by the agency personnel officer or the division of personnel services of the current or proposed duties and responsibilities of a position. (Authorized by K.S.A. 1983 Supp. 75-3747; implementing K.S.A. 1983 Supp. 75-2938; effective May 1, 1979; amended May 1, 1984.)

1-2-63. Position description. Position description means a description of the duties and responsibilities of a position, and the education, experience, knowledge, skills, and abilities necessary to perform the duties and responsibilities of the position in a satisfactory manner. (Authorized by K.S.A. 75-3747; effective May 1, 1979.)

1-2-64. Probationary employee. “Probationary employee” means any individual serving a probationary period pursuant to K.A.R. 1-7-4 (a) or (d). (Authorized by K.S.A. 75-3706 and K.S.A. 2008 Supp. 75-3747; implementing K.S.A. 75-2943, 75-2946, 75-3707, and 75-3746; effective Sept. 25, 2009.)

1-2-65. Probationary status. “Probationary status” means the status of an employee serving a probationary period pursuant to K.A.R. 1-7-4 (a) or (d). (Authorized by K.S.A. 75-3706 and K.S.A. 2008 Supp. 75-3747; implementing K.S.A. 75-2938, 75-2943, 75-2946, 75-3707, and 75-3746; effective May 1, 1979; amended Sept. 25, 2009.)

1-2-67. Promotion. “Promotion” means a change of an employee from a position in one class to a position in another class having a higher pay grade, by an employee who meets the required selection criteria for promotion. This regulation shall be effective on and after December 17, 1995. (Authorized by K.S.A. 1994 Supp. 75-3747; implementing K.S.A. 75-2944, as amended by 1995 SB 175, § 9, and K.S.A. 75-3746; effective May 1, 1979; amended Dec. 17, 1995.)

1-2-68. (Authorized by K.S.A. 75-3747; implementing K.S.A. 75-2939, as amended by 1995

SB 175, § 5 and K.S.A. 75-3746; effective Dec. 17, 1995; revoked Aug. 1, 1997.)

1-2-69. Reallocation. Reallocation means a change in allocation of an existing position within an agency from one (1) class to another, at the same or a different level, on the basis of significant changes in the kind, difficulty, or responsibility of the work performed in such position. (Authorized by K.S.A. 75-3747; effective May 1, 1979.)

1-2-70. Regular position. “Regular position” means any position other than a temporary position. This regulation shall be effective on and after December 17, 1995. (Authorized by K.S.A. 75-3747; implementing K.S.A. 75-3746; effective Dec. 17, 1995.)

1-2-71. Reemployment pool. “Reemployment pool” means a pool of persons who:

- (a) were laid off;
- (b) in lieu of a layoff, accepted a demotion or transfer to a position in another county, agency, program or shift, or to a position with fewer hours; or
- (c) voluntarily requested to be laid off. This regulation shall be effective on and after December 17, 1995. (Authorized by K.S.A. 1994 Supp. 75-3747; implementing K.S.A. 75-2948, as amended by 1995 SB 175, § 12, and K.S.A. 75-3746; effective May 1, 1979; amended May 1, 1984; amended Dec. 17, 1995.)

1-2-72. Rehire. “Rehire” means any person hired by the state who was previously employed by the state. (Authorized by K.S.A. 1995 Supp. 75-3747; implementing K.S.A. 75-3746; effective Dec. 17, 1995; amended May 31, 1996.)

1-2-73. Reinstatement. “Reinstatement” means rehiring a former permanent state employee within one year of a voluntary termination from the state into a position for which the individual meets the required selection criteria and which is in the same or similar class as the class in which the individual had permanent status prior to the termination. This regulation shall be effective on and after December 17, 1995. (Authorized by K.S.A. 1994 Supp. 75-3747; implementing K.S.A. 75-3746; effective May 1, 1979; amended Dec. 17, 1995.)

1-2-74. Administrative leave. “Administrative leave” shall mean leave with pay that is approved by the appointing authority for an employee pending the outcome of an investigation of that em-

ployee under K.A.R. 1-9-19 or for other situations in which the appointing authority determines that administrative leave is in the best interests of the state. (Authorized by K.S.A. 2014 Supp. 75-2949 and 75-3747; implementing K.S.A. 2014 Supp. 75-2949, K.S.A. 75-3707, and K.S.A. 75-3746; effective Oct. 1, 1999; amended June 5, 2005; amended Jan. 6, 2017.)

1-2-75. This regulation shall be revoked on and after December 17, 1995. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked Dec. 17, 1995.)

1-2-77. (Authorized by K.S.A. 75-3706; implementing K.S.A. 20-2608, K.S.A. 1997 Supp. 74-4914 and K.S.A. 75-5517; effective Sept. 18, 1998; revoked Jan. 12, 2007.)

1-2-78. Resignation. Resignation means the voluntary termination of employment by an employee. (Authorized by K.S.A. 75-3747; effective May 1, 1979.)

1-2-79. Roster, official. “Official roster” means the employment history and employment status of all individuals in state service. This regulation shall be effective on and after December 17, 1995. (Authorized by K.S.A. 75-3747; implementing K.S.A. 75-3746; effective May 1, 1985; amended Dec. 17, 1995.)

1-2-80. (Authorized by K.S.A. 1980 Supp. 75-3747; implementing K.S.A. 1980 Supp. 75-2938; effective May 1, 1979; amended May 1, 1981; revoked, T-86-17, June 17, 1985; revoked May 1, 1986.)

1-2-81. (Authorized by and implementing L. 1988, Chap. 325, Sec. 1; effective, T-1-10-28-88, Oct. 31, 1988; effective Dec. 18, 1988; revoked April 13, 1992.)

1-2-83. This regulation shall be revoked on and after December 17, 1995. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked Dec. 17, 1995.)

1-2-84. Supervisor. “Supervisor” means an employee in a position that meets all of the following criteria: (a) Performs a majority of work that is different from that of the employee’s subordinates; and

(b) has the responsibility to authorize or recommend in the interest of the employer a majority of the following actions:

(1) To hire, transfer, suspend, promote, demote, dismiss, and discipline employees under that individual's supervision and to address employee grievances; and

(2) to assign, direct, and conduct performance reviews of the work.

The exercise of this authority and responsibility shall not be of a merely routine or clerical nature but shall require the use of independent judgment. (Authorized by K.S.A. 75-3747; implementing K.S.A. 75-3746; effective May 1, 1985; amended Dec. 17, 1995; amended Oct. 1, 1999.)

1-2-84a. This regulation shall be revoked on and after June 5, 2005. (Authorized by K.S.A. 75-3747; implementing K.S.A. 75-3746; effective Oct. 1, 1999; revoked June 5, 2005.)

1-2-84b. This regulation shall be revoked on and after June 5, 2005. (Authorized by K.S.A. 75-3747; implementing K.S.A. 75-3746; effective Oct. 1, 1999; revoked June 5, 2005.)

1-2-85. Temporary position. "Temporary position" means a classified position which is limited to not more than 999 hours of employment in a 12-month period. A temporary position shall not affect the position limitation of an agency. This regulation shall be effective on and after December 17, 1995. (Authorized by K.S.A. 1994 Supp. 75-3747; implementing K.S.A. 75-2945, as amended by 1995 SB 175, § 10; effective May 1, 1979; amended, T-86-17, June 17, 1985; amended May 1, 1986; amended May 1, 1987; amended Dec. 17, 1995.)

1-2-86. Time-on-step. "Time-on-step" means the amount of time an employee must serve on a particular step of the pay grade to be eligible for a step increase. This regulation shall be effective on and after December 17, 1995. (Authorized by K.S.A. 1994 Supp. 75-3747; implementing K.S.A. 75-2938, as amended by 1995 SB 175, § 4, and K.S.A. 75-3746; effective Dec. 17, 1995.)

1-2-88. Transfer. "Transfer" means a change by an employee from one position to another position with a close similarity of duties, essentially the same basic qualifications, and the same pay grade. (Authorized by K.S.A. 1995 Supp. 75-3747; implementing K.S.A. 1995 Supp. 75-2944 and K.S.A. 75-3746; effective May 1, 1979; amended May 1, 1983; amended Dec. 17, 1995; amended May 31, 1996.)

1-2-91. This regulation shall be revoked on and after December 17, 1995. (Authorized by K.S.A. 1982 Supp. 75-3747; implementing K.S.A. 75-2947, K.S.A. 1982 Supp. 75-2944; effective May 1, 1979; amended May 1, 1981; amended May 1, 1983; revoked Dec. 17, 1995.)

1-2-95. This regulation shall be revoked on and after December 17, 1995. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked Dec. 17, 1995.)

1-2-97. Unclassified service. "Unclassified service" means those positions specifically designated by law as unclassified. This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 75-3706 and K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 2004 Supp. 75-2935, as amended by 2005 SB 74, § 3, and K.S.A. 75-3746; effective May 1, 1979; amended June 5, 2005.)

Article 3.—EQUAL EMPLOYMENT OPPORTUNITY AND AFFIRMATIVE ACTION

1-3-1. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked May 31, 1996.)

1-3-2. This regulation shall be revoked on and after June 5, 2005. (Authorized by K.S.A. 1994 Supp. 75-3747; implementing K.S.A. 75-2956a; effective May 1, 1979; amended Dec. 17, 1995; revoked June 5, 2005.)

1-3-3 and 1-3-4. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked May 31, 1996.)

1-3-5. Definitions. (a) "Affirmative action" means a deliberate and sustained effort to identify and eliminate barriers to the employment and advancement of females and minorities. The purpose of affirmative action initiatives shall be to achieve, at all levels, a state government workforce whose composition with respect to female and minority employees approximates the composition of the available, qualified state resident workforce.

(b) "Affirmative action plan" means a written, results-oriented plan detailing the steps that an appointing authority will take to achieve a workforce whose composition with respect to female and minority employees approximates the composition of the available, qualified state resident workforce.

(c) “Equal employment opportunity” means the administration of the civil service personnel system in a manner that promotes the right of all persons to work and to advance on the basis of merit and ability without regard to race, religion, color, sex, national origin or ancestry, age, disability, military or veteran status, or political affiliation, except as otherwise provided by law.

(d) “Minority,” means a group differing in race or ethnic background from the majority of the available, qualified state workforce, or a member of such a group.

(e) “Underutilization,” with respect to a workforce, means a condition in which the percentage of female or minority employees is less than the percentage of females or minorities in the available, qualified state workforce. (Authorized by K.S.A. 75-3706 and K.S.A. 2005 Supp. 75-3747; implementing K.S.A. 75-2925, 75-2941, 75-3707, and 75-3746; effective Jan. 12, 2007.)

1-3-6. Equal employment opportunity; affirmative action. In a manner that is consistent with K.S.A. 75-2925 and amendments thereto, each appointing authority shall take the following steps: (a) Each appointing authority shall implement programs and policies designed to promote equal employment opportunity and shall implement an affirmative action plan to identify whether areas of underutilization exist. If areas of underutilization are identified, the appointing authority shall initiate programs designed to address the underutilization.

(b) Each appointing authority shall establish any goals and target dates necessary to effectuate agency-level and statewide affirmative action plans.

(c) Each appointing authority shall ensure that complete and accurate applicant and employment records and statistics are maintained that provide information for the evaluation and analysis of current and past employment practices with respect to affirmative action. Each appointing authority shall provide this data to the director in the manner and on the forms required by the secretary. (Authorized by K.S.A. 75-3706 and K.S.A. 2005 Supp. 75-3747; implementing K.S.A. 75-2925, 75-2941, 75-3707, and 75-3746; effective Jan. 12, 2007.)

Article 4.—CLASSIFICATION

1-4-1. Preparation of classification plan.

(a) A classification plan shall be prepared by the director after determining, in cooperation with

appointing authorities and principal supervisory officials, the duties and responsibilities of all positions in the classified service.

(1) The classification plan shall establish an appropriate title for each class, describe the typical duties and responsibilities of the positions in the class, and indicate the required selection criteria for performance of the duties of the class.

(2) The classification plan shall be developed and maintained in such a manner that:

(A) all positions substantially similar with respect to the kind, difficulty, and responsibility of work are included in the same class;

(B) there are required selection criteria which are applicable to all positions in a class, in addition to any selection criteria which may be applied to individual positions in a class to fulfill specific job requirements; and

(C) the same pay grade may be applied with equity to all positions in the class.

(b) The classification plan, and any amendments or revisions thereto, shall be in effect after approval by the governor, on an effective date specified by the governor.

(c) The classification plan shall be revised or amended whenever there are significant changes in organization, creation or abolition of one or more classifications, or changes in the duties or responsibilities of a classification that make revision or amendment necessary. This regulation shall be effective on and after December 17, 1995. (Authorized by K.S.A. 1994 Supp. 75-3747; implementing K.S.A. 75-2938, as amended by 1995 SB 175, § 4; effective May 1, 1979; amended May 1, 1981; amended Dec. 17, 1995.)

1-4-2. Position management. (a) Each supervisor shall structure each position to promote efficient use of the workforce and to fulfill current and future requirements, and shall accurately describe in writing the duties of the position. The supervisor shall review each subordinate position when the responsibilities of the position change, each time the position becomes vacant, and when other pertinent circumstances indicate a review is appropriate.

(b) Each appointing authority shall maintain a system of position identification and control, indicating the organizational unit, location, duties, and work hours and shifts of each established position, which shall be made available to the director upon request.

(c) This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 75-2950

and K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 75-2938, 75-2950, and 75-3746; effective May 1, 1979; amended May 1, 1981; amended May 31, 1996; amended June 5, 2005.)

1-4-3. Position description. Each appointing authority shall ensure that a current position description is prepared and maintained for each position in the agency and that each position description accurately describes the duties and responsibilities of the position. The position description shall be signed by the supervisor, the employee, and the agency's human resource director or other human resource official. The appointing authority shall make the position description available to the division of personnel services upon request. This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 75-2950 and K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 75-2938, 75-2950, and 75-3746; effective May 1, 1979; amended June 5, 2005.)

1-4-4. Position analysis. Position descriptions shall be reviewed by managers, supervisors, and personnel officers or other personnel officials to determine the duties and responsibilities assigned to a particular position, its location in the organization, and the education, experience, knowledge, abilities, and skills necessary to perform successfully those duties and responsibilities. (Authorized by K.S.A. 75-3747; effective May 1, 1979.)

1-4-5. Position allocation; delegation to appointing authority. (a) The appointing authority shall notify the director when a new position is created in the classified service. The notice shall include a statement of the duties and responsibilities that are to be assigned to the position. The position shall then be allocated by the director. Except as otherwise provided in the act or in these regulations, no person shall be appointed to, or employed in, a classified position until the position has been allocated to an established class or until the classification plan has been amended to provide for the new position.

(b) The authority to allocate positions in an agency may be delegated by the secretary of administration to the appointing authority of that agency. The delegation shall specify the classes, or group of classes, for which the authority is granted and the conditions under which the delegation is made. Any delegation of allocation authority may be modified or withdrawn by the secretary to the

extent provided by K.S.A. 75-2938(c), and amendments thereto.

(c) This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 75-2938 and 75-3746; effective May 1, 1979; amended May 1, 1981; amended June 5, 2005.)

1-4-6. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked May 31, 1996.)

1-4-7. Position reallocation. (a)(1) Upon the initiative of the director or the request of an incumbent or appointing authority, a position shall be reviewed whenever either of the following conditions is met:

(A) The organizational structure of an agency or the duties of a position are significantly changed.

(B) For any reason other than those specified in paragraph (a)(1)(A), a position appears to be allocated incorrectly.

(2) After conferring with the appointing authority, the position under review may be reallocated by the director to a different class, or the existing allocation may be retained. During the review, other positions may be reviewed and reallocated as required.

(b) Reallocation shall not be used for either of the following purposes:

(1) To avoid the provisions of the regulations pertaining to layoffs, demotions, promotions, and dismissals; or

(2) to increase or decrease the pay of an employee in circumvention of the regulations pertaining to pay.

(c) Unless otherwise prescribed by the secretary of administration, an appointing authority who has been granted authority to allocate positions shall have authority to reallocate the same positions.

(d) This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 75-2938 and 75-3746; effective May 1, 1979; amended May 1, 1981; amended Dec. 17, 1995; amended June 5, 2005.)

1-4-8. Effect of position reallocation on incumbent. (a)(1) If a position that is reallocated is filled on the date of reallocation by an employee with permanent or probationary status and if the incumbent wishes to remain in the position, the appointing authority shall, within the current pay period, appoint the incumbent to the class to which the position was reallocated.

(2) If the class specification for the reallocated position requires that the person appointed to any position in that class possess a special license or certificate and the incumbent does not possess such a license or certificate, the incumbent shall not be appointed to the class to which the position was reallocated. If the reallocation of any position to a class requires that the employee possess a special license or certificate and if the incumbent does not possess that license or certificate, the reallocation may be made only after the reallocation has been approved in writing by the director.

(b) Except as provided in paragraph (a)(2), if the incumbent had permanent status at the time the position is reallocated, the appointing authority shall appoint the incumbent to the class to which the position was reallocated with permanent status, but may require the incumbent to serve a probationary period in accordance with the provisions of K.A.R. 1-7-4(b). Notice of the probationary period shall be given to the employee in writing.

(c) If the reallocation of a position occupied by an employee with permanent status is to a lower class, the appointing authority shall give the employee a written statement of the reason the position is being reallocated to a lower class.

(d) A reallocation shall not be retroactive unless authorized by the director, in writing, based on the director's determination that failure to do so would create a manifest injustice or undue hardship on the employee whose position is being reallocated. Each determination to authorize a retroactive reallocation shall be made by the director on a case-by-case basis. The length of time for which the reallocation will be retroactive shall be determined by the director.

(e) If the incumbent was serving a probationary period in the former class, the time served on probation in the former class shall apply towards the probationary period in the new class. However, if the incumbent had permanent status, but was serving a probationary period as a result of a promotional appointment to the former class, the appointing authority may start the employee on a new probationary period. The new probationary period shall begin on the date of the appointment to the new class, and the length of the probationary period shall be the same as that provided for promotional appointments in K.A.R. 1-7-4(b).

(f)(1) If the incumbent does not wish to remain in the position upon its reallocation, the incumbent shall submit a written notice to the appoint-

ing authority within 14 calendar days of the date on which the incumbent is given a written notice of the pending reallocation. If the incumbent does not submit a written notice within that 14-day period, the incumbent shall be presumed to desire to remain in the position as reallocated.

(2) If the incumbent has submitted the written notice as provided under paragraph (f)(1) or does not qualify for the position under paragraph (a)(2), the appointing authority shall take one of the following actions in accordance with these regulations:

(A) Lay off the incumbent if the incumbent has permanent status;

(B) terminate the incumbent if the incumbent has probationary status; or

(C) appoint the incumbent to a different position on the basis of a promotion, transfer, or voluntary demotion.

(g) Different qualifications may be established by the director for those positions in a class that are subject to federal laws and regulations.

(h) This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 75-2946 and K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 75-2938, 75-2946, 75-3707, and 75-3746; effective May 1, 1979; amended May 1, 1981; amended May 1, 1983; amended May 1, 1984; amended Oct. 1, 1999; amended June 5, 2005.)

1-4-9. Use of class titles. The class titles included in the classification plan, or code symbols of these titles, shall be used in all personnel, accounting, budget, appropriation, and financial records of all state agencies. No person shall be appointed to or employed in a position in the classified service under a title not included in the classification plan. (Authorized by K.S.A. 75-3747; effective May 1, 1979.)

Article 5.—COMPENSATION

1-5-1. Preparation, installation, and revision of the pay plan or plans. (a) After conferring with appointing authorities, the secretary of administration and the director of the budget, a pay plan or plans for the classified service shall be recommended to the governor by the director. Except as otherwise provided, the pay plan or plans shall provide a minimum and maximum rate of pay for each class of positions in the classified service. In establishing these rates, the following factors shall be taken into consideration by the director:

(1) the condition of the labor market;

- (2) prevailing rates for comparable positions in other public employment and in private business;
- (3) difficulty and responsibility of work;
- (4) the usual education and experience required;
- (5) the current cost of living;
- (6) turnover rates in the state service; and
- (7) maintenance or other benefits received.

Revisions to the pay plan or plans shall be prepared, adopted, and made effective in accordance with other provisions of article 5 of these regulations.

(b) When a pay plan or plans are to be installed or revised, instructions for installing or revising the plan or plans shall be prepared by the director, including instructions for handling circumstances where an employee's pay is above the pay grade, below the pay grade, or not on a step of the pay grade for the class in which the employee is employed. The instructions shall not be required if these circumstances can be handled by application of appropriate regulations. (Authorized by K.S.A. 1995 Supp. 75-3747; implementing K.S.A. 1995 Supp. 75-2938; effective May 1, 1979; amended May 31, 1996.)

1-5-2. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked May 31, 1996.)

1-5-3. (Authorized by K.S.A. 75-3747; effective May 1, 1979; amended Dec. 17, 1995; revoked May 31, 1996.)

1-5-4. Assignment of classes to pay grades.

After conferring with appointing authorities, the secretary of administration, and the director of the budget, the assignment of each class of positions to one of the pay grades shall be recommended to the governor by the director, and schedules showing the pay grades approved by the governor for each class of positions shall be prepared by the director. Separate schedules of pay grades and steps showing full time biweekly salaries and hourly rates shall be developed and the appropriate schedule shall be used for each position in the classified service. This regulation shall be effective on and after December 17, 1995. (Authorized by K.S.A. 1994 Supp. 75-3747; implementing K.S.A. 75-2938, as amended by 1995 SB 175, § 4; effective May 1, 1979; amended Dec. 17, 1995.)

1-5-5. This regulation shall be revoked on and after December 17, 1995. (Authorized by K.S.A. 1985 Supp. 75-3747; implementing K.S.A. 75-2938; effective May 1, 1979; amended May 1,

1981; amended, T-86-17, June 17, 1985; amended, T-86-36, Dec. 11, 1985; amended May 1, 1986; amended, T-87-11, May 1, 1986; amended May 1, 1987; revoked Dec. 17, 1995.)

1-5-6. (Authorized by K.S.A. 75-3747; effective May 1, 1979; amended Dec. 17, 1995; revoked May 31, 1996.)

1-5-7. Employees to be paid within the pay grade, approval of employee pay changes; effective date; retroactive increases. (a) Except as provided otherwise in these regulations, each employee shall be paid within the pay grade adopted for the class of positions and at the step within the pay grade as prescribed by these regulations.

(b) All employee pay changes shall be determined by the appointing authority in a manner prescribed by the director and shall comply with all applicable personnel regulations and directives approved by the governor.

(c) Each employee pay step increase shall be effective on the date that the employee completes the time-on-step requirements as stated in K.A.R. 1-5-19b. All other pay changes shall take effect on the day of the transaction.

(d) Employee pay changes may be retroactive as approved by the appointing authority or the director to correct documented errors or as otherwise approved by the governor. Each retroactive pay increase shall be limited to no more than six payroll periods, except as otherwise approved by the director.

(e) In a manner prescribed by the director, the appointing authority shall report to the director all pay changes made by the appointing authority pursuant to this regulation. (Authorized by K.S.A. 1996 Supp. 75-3747; implementing K.S.A. 1996 Supp. 75-2938; effective May 1, 1979; amended, E-81-23, Aug. 27, 1980; amended May 1, 1981; amended May 1, 1983; amended May 1, 1984; amended, T-86-17, June 17, 1985; amended May 1, 1986; amended Dec. 17, 1995; amended May 31, 1996; amended Oct. 24, 1997.)

1-5-8. Beginning pay. (a) Except as specified in subsection (b), each new hire and each rehire not based on a reemployment or reinstatement shall be paid at the minimum step of the pay grade for the class.

(b) New hires and rehires not based on a reemployment or a reinstatement may be paid at higher steps in the pay grade only under the following circumstances:

(1) If an agency has an eligible candidate with exceptional qualifications directly related to the vacant position and the agency cannot employ the person at the minimum step, the appointing authority may approve beginning pay for the individual at a higher step in the pay grade. Exceptional qualifications shall be based on the candidate's education, training, experience, skills, and other job-related qualifications.

(2) If there is a lack of candidates for a class of positions available for employment at the minimum step, one or more appointing authorities may request that the director establish some higher step in the pay grade as the beginning pay in the class for new hires and for rehires not based on a reemployment or a reinstatement. Authorization for the higher beginning pay may be given to a designated agency or agencies, to all agencies, or for a particular geographical area. This authorization shall remain in place until canceled by the director. If the authorization has remained in place for three years for reasons other than a geographic basis, a compensation study shall be conducted by the director.

(A) If the director authorizes higher beginning pay under paragraph (b)(2), each appointing authority whose agency has positions in the class or geographical area that is authorized for a higher beginning pay shall be notified of the authorization by the director. Except as provided below, the appointing authority of each agency to which the authority has been granted shall then raise the pay of each incumbent in the class who is being paid at a lower step to the higher beginning pay. These pay increases shall take effect on the first day of the first pay period following the date of the director's authorization. The length of time that the incumbent has spent on the previous step of the pay grade shall count toward the time-on-step requirement for the new step.

(B) If the authorization granted under paragraph (b)(2) is only for a particular geographical area, the appointing authority shall not raise the pay of incumbents in other geographical areas.

(3) Any appointing authority may pay a temporary employee at a higher step in the pay grade if the candidate has exceptional qualifications directly related to the position or has former permanent status in the same class or another class at the same or higher pay grade.

(c) In a manner prescribed by the director, the appointing authority shall report to the director each hire above the minimum step made by the appointing authority as provided in this regulation.

(d) The beginning pay for any unclassified employee hired into a position in the classified service shall be determined in accordance with the provisions of this regulation. (Authorized by K.S.A. 75-2950 and K.S.A. 2005 Supp. 75-3747; implementing K.S.A. 75-2938, 75-2938a, 75-2950, 75-3707, and 75-3746; effective May 1, 1979; amended, E-81-14, June 12, 1980; amended May 1, 1981; amended, T-86-17, June 17, 1985; amended May 1, 1986; amended May 1, 1987; amended Dec. 17, 1995; amended Oct. 24, 1997; amended, T-1-1-30-01, Feb. 4, 2001; amended May 25, 2001; amended June 5, 2005; amended Sept. 29, 2006.)

1-5-9. Pay of temporary employee. (a) Except as provided in subsection (b), the pay of each temporary employee shall be the minimum step of the pay grade to which the classification is assigned.

(b) At the option of the appointing authority, any temporary employee may be hired at a step higher than the minimum step as provided in K.A.R. 1-5-8.

(c) No person hired on a temporary basis shall be eligible for any step increase during the period of temporary employment.

(d) This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 75-2945 and K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 75-2938, 75-2945, and 75-3707; effective May 1, 1979; amended, E-81-14, June 12, 1980; amended May 1, 1981; amended, T-86-17, June 17, 1985; amended May 1, 1986; amended, T-1-7-27-89, July 27, 1989; amended Nov. 20, 1989; amended Dec. 17, 1995; amended Sept. 18, 1998; amended, T-1-1-30-01, Feb. 4, 2001; amended May 25, 2001; amended June 5, 2005.)

1-5-10. Pay of employee rehired by reinstatement or reemployment. (a) Any person hired by reinstatement may be paid at the same step of the pay grade for the class to which the employee is reinstated as the step on which the employee was previously paid for the class that serves as the basis for the employee's eligibility for reinstatement. When an employee to be reinstated has exceptional qualifications and the agency cannot hire the person at the previous step, the agency's appointing authority may approve beginning pay at a higher step in the pay grade. Exceptional qualifications shall be based on the former employee's education, training, experience, skills, and other qualifications directly related to the vacant position.

(1) When a higher step in the pay grade has been established as the beginning pay for new hires to the class pursuant to K.A.R. 1-5-8 due to lack of candidates, the agency shall hire the employee at the higher beginning pay.

(2) Nothing in this subsection shall prevent a person from accepting reinstatement at a step lower than that on which the person was being paid in the class that serves as the basis for the employee's eligibility for reinstatement.

(b) The pay increase date for any person who is reinstated shall be governed by the time-on-step requirement of the step to which reinstated. Time-on-step in a previous position shall not count towards the time-on-step requirement.

(c)(1) Any person who is reemployed to the same class from which the person was laid off, or to a class with the same pay grade as that class, shall be paid at the same step of the pay grade as the step on which the person was being paid on the date the person was laid off, or any lower step of the pay grade.

(2) Any person who is reemployed to a class with a pay grade lower than the class from which the person was laid off shall be paid at one of the following rates:

(A) the same pay rate (dollar amount) as the rate the person was being paid immediately before being laid off, if the rate is on a step in the lower pay grade. If that rate is within the pay grade for the class but not on a step, the person may be paid at the next lower step or the next higher step. However, in no case shall the person be paid above the maximum step of the lower pay grade; or

(B) a lower pay rate (dollar amount) than the person was being paid immediately before being laid off.

(d) In determining the pay increase date for any person who is reemployed to the class from which the person was laid off, to a class with the same pay grade as that class, or to a class with a pay grade lower than that class, the length of time the employee had spent on the last pay step immediately before the date the person was laid off shall count toward the time-on-step requirement. If the pay increase date for this person is less than six months after the date of reemployment, the agency may use the person's last performance review rating before layoff or may give a new performance review rating in determining the person's eligibility for a pay step increase, as provided in K.A.R. 1-5-19b. (Authorized by K.S.A. 75-3747; implementing K.S.A. 75-2938, 75-2948 and

K.S.A. 75-3746; effective May 1, 1979; amended, E-81-14, June 12, 1980; amended May 1, 1981; amended May 1, 1984; amended, T-86-17, June 17, 1985; amended May 1, 1986; amended May 1, 1987; amended, T-1-7-27-89, July 27, 1989; amended Nov. 20, 1989; amended Dec. 17, 1995; amended Sept. 18, 1998.)

1-5-11. Pay of employee returned from military leave. (a) Except as provided in subsection (b) of this regulation, any employee who returns from military leave to a position in the same class in which the employee was employed when the leave was granted, or to a position in the same pay grade, shall be paid at the same step in the pay grade at which the employee was being paid when the leave began. In determining the employee's new pay increase date, credit shall be given for the time served in the armed forces.

(b) The appointing authority shall grant one or more pay step increases to an eligible employee upon the employee's return from military leave if the authority is reasonably certain the employee would have received the increase had the employee been continuously employed and state service not interrupted by military leave. This regulation shall be effective on and after December 17, 1995. (Authorized by K.S.A. 1994 Supp. 75-3747; implementing K.S.A. 75-2947, as amended by 1995 SB 175, § 11; effective May 1, 1979; amended, E-81-14, June 12, 1980; amended May 1, 1981; amended May 1, 1985; amended, T-86-17, June 17, 1985; amended May 1, 1986; amended May 1, 1987; amended March 20, 1989; amended, T-1-7-27-89, July 27, 1989; amended Nov. 20, 1989; amended Dec. 17, 1995.)

1-5-12. (Authorized by K.S.A. 1995 Supp. 75-3747; implementing K.S.A. 1995 Supp. 75-2938 and K.S.A. 75-3746; effective May 1, 1979; amended, E-81-14, June 12, 1980; amended May 1, 1981; amended May 1, 1984; amended May 1, 1987; amended Dec. 17, 1995; amended May 31, 1996; revoked Oct. 24, 1997.)

1-5-13. Pay of employee promoted to a higher class. (a) When an employee in the classified service is promoted or the employee's position is reallocated to a higher class, the appointing authority shall pay the employee on one of the following steps:

(1) the same step of the pay grade for the new class as the step on which the employee was being paid in the lower class;

(2) any lower step of the pay grade for the new class that gives the employee an increase in pay;

(3) the step for new hires in the class when a higher step in the pay grade has been established as the starting pay pursuant to K.A.R. 1-5-8; or

(4) a higher step in the pay grade, if the employee to be promoted has exceptional qualifications. Exceptional qualifications shall be based on the employee's education, training, experience, skills, and other qualifications directly related to the duties of the position to which promoted.

(b) Nothing in this regulation shall authorize pay above the maximum step of the pay grade.

(c) Each employee who is promoted or whose position is reallocated to a higher class shall receive step increases in accordance with the following provisions.

(1) A pay step increase shall be given on the same date, if eligible for such an increase.

(2) The pay increase date shall be governed by the time-on-step requirement of the step to which promoted.

(d) In a manner prescribed by the director, the appointing authority shall report to the director all hires made by the appointing authority pursuant to paragraph (a)(4) of this regulation. (Authorized by K.S.A. 1996 Supp. 75-3747; implementing K.S.A. 1996 Supp. 75-2938, K.S.A. 1996 Supp. 75-2938a, and K.S.A. 75-3746; effective May 1, 1979; amended, E-81-14, June 12, 1980; amended May 1, 1981; amended May 1, 1983; amended, T-86-17, June 17, 1985; amended May 1, 1986; amended May 1, 1987; amended, T-89-1, May 1, 1988; amended Oct. 1, 1988; amended March 20, 1989; amended Dec. 17, 1995; amended Oct. 24, 1997.)

1-5-14. Pay of employee upon transfer.

(a)(1) Any employee who is transferred may be paid on the same step as the step on which the employee was paid before the transfer.

(2) Any employee may transfer to a lower step within the pay grade, if this transfer is agreed upon by the employee and the appointing authority.

(3) If an employee is transferred to a trainee class with an abbreviated pay grade in lieu of lay-off, the employee may be paid at the employee's present rate of pay if the rate of pay does not exceed the maximum pay rate for the pay grade to which the trainee class is assigned.

(b) For each employee whose pay is determined under subsection (a), the length of time that the employee has spent on the previous step shall

count toward the time-on-step requirement for computing the employee's pay increase date.

(c) If an employee transfers from one position to another within the same agency, the appointing authority may pay the employee at a higher step on the pay grade than the step on which the employee was paid before the transfer if the appointing authority determines that the increase is in the best interests of the state. Nothing in this regulation shall authorize pay above the maximum step of the pay grade. The employee's pay increase date shall be governed by the time-on-step requirement of the new step.

(d) This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 75-2938 and 75-3746; effective May 1, 1979; amended, E-81-14, June 12, 1980; amended May 1, 1981; amended May 1, 1987; amended Dec. 17, 1995; amended Sept. 18, 1998; amended June 5, 2005.)

1-5-15. Pay of employee upon demotion.

(a) Each employee who is demoted, in accordance with applicable regulations, whether voluntarily or for disciplinary reasons, shall be paid at the same step of the pay grade for the lower class as the step on which the employee was being paid in the higher class, or at any higher step that results in a decrease in the rate of compensation, except as specified in subsection (b).

(b) Any employee accepting a voluntary demotion may be paid at a step of the new pay grade that does not result in a decrease in rate if the action is in the best interest of the state service, except that the employee's rate of pay shall not exceed the maximum pay rate for the new pay grade.

(c) Nothing in this regulation shall prevent a demotion being made to a step in the pay grade lower than permitted by this regulation, if agreed upon in writing by the employee and appointing authority. However, if an employee with permanent status is promoted and, subsequently, is demoted pursuant to K.S.A. 75-2944, and amendments thereto, the employee shall be paid on a step that is no lower than the same step of the pay grade for the lower class as the step that the employee was on immediately before the promotion.

(d) An employee who takes a voluntary demotion may also receive a pay step increase on the same date if the employee is eligible for this increase.

(e) The pay increase date for any employee demoted for disciplinary reasons shall be governed by the time-on-step requirement of the step to

which demoted. The pay increase date for any employee who takes a voluntary demotion shall be unchanged if the employee did not receive a pay step increase on the date of the demotion.

(f) The provisions of K.A.R. 1-5-10, rather than this regulation, shall apply when a former permanent employee who was separated from the service for more than 30 days is reinstated to a class with a lower pay grade.

(g) This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 75-3707 and 75-3746; effective May 1, 1979; amended, E-81-14, June 12, 1980; amended May 1, 1981; amended May 1, 1983; amended, T-86-17, June 17, 1985; amended May 1, 1986; amended May 1, 1987; amended March 20, 1989; amended Jan. 6, 1992; amended Dec. 27, 1993; amended Nov. 21, 1994; amended Dec. 17, 1995; amended May 31, 1996; amended Sept. 18, 1998; amended June 5, 2005.)

1-5-16. Pay of employee in position reallocated to a lower class. (a) An employee whose position is reallocated to a class with a lower pay grade, and who is placed in the reallocated position as provided in K.A.R. 1-4-8, may continue to be paid by the appointing authority at the current pay rate (dollar amount) if that rate is on a step in the lower pay grade. In no case shall an employee be paid above the maximum step of the lower pay grade.

(b) The appointing authority may set the pay at a lower step than permitted by this regulation, except that the employee shall not be paid at less than the same step of the pay grade for the lower class as the step that the employee was on immediately prior to the reallocation.

(c) The length of time the incumbent has spent on the step of the previous pay grade shall count toward the time-on-step requirement for computing the pay increase date. This regulation shall be effective on and after December 17, 1995. (Authorized by K.S.A. 1994 Supp. 75-3747; implementing K.S.A. 75-2938, as amended by 1995 SB 175, § 4, K.S.A. 1994 Supp. 75-2938a, and K.S.A. 75-3746; effective May 1, 1979; amended, E-81-14, June 12, 1980; amended May 1, 1981; amended, T-86-17, June 17, 1985; amended May 1, 1986; amended May 1, 1987; amended Dec. 17, 1995.)

1-5-18. This regulation shall be revoked on and after December 17, 1995. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked Dec. 17, 1995.)

1-5-19. (Authorized by K.S.A. 1980 Supp. 75-3747; implementing K.S.A. 1980 Supp. 75-2938; effective May 1, 1979; amended, E-81-14, June 12, 1980; amended May 1, 1981; revoked May 1, 1983.)

1-5-19a. (Authorized by K.S.A. 1981 Supp. 75-3747; implementing K.S.A. 1981 Supp. 75-2938; effective May 1, 1983; revoked, T-86-17, June 17, 1985; revoked May 1, 1986.)

1-5-19b. Individual pay step increases. (a) Each employee whose latest performance review rating in the preceding 12-month period is at least satisfactory shall receive a pay step increase as provided by subsections (b) and (c) of this regulation, except as otherwise ordered by the governor.

(b) Each employee who is on the minimum step or the second step of a pay grade shall receive a one-step pay increase after six full months on that step of the pay grade.

(c) Each employee who is on the third step of a pay grade or any higher step, except the maximum step, shall receive a one-step pay increase after 12 full months on that step of the pay grade. (Authorized by K.S.A. 75-3747; implementing K.S.A. 75-2938; effective May 1, 1983; amended, T-86-17, June 17, 1985; amended May 1, 1986; amended May 1, 1987; amended, T-1-7-27-89, July 27, 1989; amended Nov. 20, 1989; amended Dec. 17, 1995; amended, T-1-1-30-01, Feb. 4, 2001; amended May 25, 2001.)

1-5-19c. Effect of pay grade changes on pay. (a) If the governor has assigned a class of positions to a higher pay grade, the appointing authority shall pay each employee in the class on one of the following steps:

(1) The same step of the pay grade for the new class as the step on which the employee was being paid in the lower class;

(2) any lower step of the pay grade for the new class that gives the employee an increase in pay; or

(3) the step on the pay grade of the new class that provides the same rate, in dollar amount, as the current rate paid to the employee.

(b) If the governor has assigned a class of positions to a lower pay grade, each employee in the class shall continue to be paid at the same rate, in dollar amount, as the rate paid to the employee immediately before the assignment to the new pay grade.

(c)(1) For those employees who receive an increase in pay under either paragraph (a)(1) or (a)

(2), the pay increase date shall be governed by the time-on-step requirement of the new step.

(2) For those employees who did not receive an increase in pay under either paragraph (a)(3) or subsection (b), the length of time that the employee has spent on the step of the previous pay grade shall count toward the time-on-step requirement for computing the pay increase date. If the employee's current salary is above the new pay grade, the employee shall not receive a salary increase until the employee's rate of pay is less than the highest step of the new pay grade.

(d) This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 75-2938, 75-2938a, and 75-3707; effective May 1, 1983; amended, T-86-17, June 17, 1985; amended May 1, 1986; amended May 1, 1987; amended, T-1-7-27-89, July 27, 1989; amended Nov. 20, 1989; amended Dec. 17, 1995; amended Oct. 24, 1997; amended, T-1-1-30-01, Feb. 4, 2001; amended May 25, 2001; amended June 5, 2005.)

1-5-20. Individual pay decreases. (a) The appointing authority may reduce the pay of any employee one step because of a less than satisfactory rating according to the employee's current performance review. Such a decrease shall not result in a pay rate below the minimum step of the pay grade. Approval of the director shall be required for more than one of these reductions in any 12-month period.

(b) Following a pay decrease, the employee's pay increase date shall be governed by the time-on-step requirement of the new step, except that the pay may be increased to the step from which it was reduced in any later payroll period, if the employee's subsequent rating is satisfactory.

(c) This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 75-3707 and 75-3746; effective May 1, 1979; amended, E-81-14, June 12, 1980; amended May 1, 1981; amended May 1, 1982; amended, T-86-17, June 17, 1985; amended May 1, 1986; amended May 1, 1987; amended Dec. 17, 1995; amended, T-1-1-30-01, Feb. 4, 2001; amended May 25, 2001; amended June 5, 2005.)

1-5-21. Biweekly salary or hourly rates. Each exempt employee shall be paid a biweekly salary. Each non-exempt employee shall be paid an hourly rate as determined under K.S.A. 1994

Supp. 75-5515, and amendments thereto. This regulation shall be effective on and after December 17, 1995. (Authorized by K.S.A. 1994 Supp. 75-3747 and K.S.A. 75-5514; implementing K.S.A. 75-5506 and K.S.A. 1994 Supp. 75-5515; effective May 1, 1979; amended Dec. 17, 1995.)

1-5-22. Payment for two or more positions. (a) Each employee who is employed in two or more regular, part-time positions shall receive separate pay for the duties performed in each position. Except as provided in subsection (c), the percentage of time worked on all positions shall not exceed 100 percent.

(b) Each employee in multiple regular, part-time positions shall receive benefits commensurate with the total time worked on all regular, part-time positions.

(c) Any classified exempt employee may hold one or more additional unclassified exempt positions teaching or conducting research in a state educational institution without limit on total pay, if the appointing authority in the classified service certifies that the position does not detract from the time for which the employee is being paid as a classified exempt employee. (Authorized by K.S.A. 2001 Supp. 75-3747; implementing K.S.A. 75-3746; effective May 1, 1979; amended May 1, 1983; amended Dec. 17, 1995; amended May 31, 1996; amended Oct. 1, 1999; amended June 7, 2002.)

1-5-23. This regulation shall be revoked on and after December 17, 1995. (Authorized by K.S.A. 1982 Supp. 75-3747; implementing K.S.A. 1982 Supp. 75-2938; effective May 1, 1979; amended May 1, 1983; revoked Dec. 17, 1995.)

1-5-24. Overtime. (a) Except as otherwise provided by statute or these regulations, employees of the state who are eligible to receive overtime compensation under the fair labor standards act of 1938 (FLSA), as amended, shall be compensated for overtime as provided in that act. State employees in agricultural positions shall also be eligible for overtime compensation. The final determination of eligibility to receive overtime as specified in this subsection shall be made by the director for all classified employees and all unclassified employees whose pay is subject to approval by the governor under K.S.A. 75-2935b and amendments thereto.

(b)(1) The rate at which any eligible employee is to be compensated for overtime worked shall be

one and a half times the employee's regular rate of pay. This rate shall not include premium pay for holidays worked or any call-in and callback compensation paid for hours not actually worked.

(2) All employees who are eligible for overtime compensation and who were paid for overtime during the 12 months preceding the receipt of a longevity bonus payment or a quality award bonus payment shall receive an additional overtime payment, which shall be calculated as follows:

(A) Divide the bonus pay by total hours worked in the preceding 12 months to obtain the increase in the regular rate; and

(B) multiply the increase in the regular rate by the number of overtime hours paid in the preceding 12 months; then, multiply that product by one-half. The result shall be the employee's additional overtime pay.

No additional overtime pay shall be due for any overtime hours worked during the preceding 12 months for which compensatory time was given under subsection (e).

(c) Each appointing authority shall be responsible for control of overtime in the agency. Overtime, to the extent possible, shall be authorized in advance by the responsible supervisor.

(d)(1) Except as provided in paragraph (d)(3), in determining whether an employee in a position or class determined to be eligible for overtime pay has worked any overtime in a given workweek or work period, only time actually worked shall be considered.

(2) The number of hours of paid leave used in an employee's workweek or work period that, when added to the number of hours actually worked in that employee's workweek or work period, exceeds the applicable overtime threshold shall be compensated in the following manner:

(A) Given as equivalent time off as specified in subsection (f); or

(B) paid at the hourly rate of pay.

(3) If all of the following conditions are met, an official state holiday may be counted as time worked for employees in positions that have been determined to be eligible for overtime compensation:

(A) The employee is asked to report to work in order to respond to a building, highway, public safety, or other emergency, as determined by the appointing authority.

(B) This work is performed outside the employee's normal work schedule for the workweek or work period that includes the official state holiday.

(C) The appointing authority authorizes inclusion of that official state holiday in calculating time worked by the employee.

The appointing authority shall report to the director the name and position number of each employee for whom the state holiday will be counted as time worked.

(e)(1)(A) In lieu of paying an eligible employee at the time-and-a-half rate for overtime worked, an appointing authority may elect to compensate an employee for overtime worked by granting compensatory time off, at the rate of one and a half hours off for each hour of overtime worked, at some time after the workweek or work period in which the overtime was worked if the conditions of paragraph (e)(1)(B) are met.

(B) Any appointing authority may elect to compensate an employee for overtime worked by granting compensatory time off only if an agreement or understanding has been reached before the performance of the work. Except as provided in 29 C.F.R. 553.23(b), the agreement or understanding concerning compensatory time off shall be between the appointing authority and the individual employee, and a record of its existence shall be maintained for each employee. The agreement or understanding to provide compensatory time off may take the form of an express condition of employment if the employee knowingly and voluntarily agrees to it as a condition of employment and if the employee is informed that the compensatory time earned may be preserved, used, or cashed out in a manner consistent with the provisions of this regulation. The appointing authority of any agency that had a regular practice of awarding compensatory time off in lieu of overtime pay before April 15, 1986 shall be deemed to have reached an agreement or understanding with any employee who has been continuously employed by that agency in one or more positions that are eligible for overtime from a date before April 15, 1986.

(2) An eligible employee shall not accrue more than 240 hours of compensatory time for overtime hours worked. Each eligible employee who has accrued 240 hours of compensatory time off shall, for any additional overtime hours of work, be compensated with overtime pay. However, an appointing authority may establish a lower maximum accumulation for employees in that agency.

(3) If an eligible employee is paid for accrued compensatory time off, this compensation shall be paid at the regular rate earned by the employee at the time the employee receives the payment.

(4)(A) Except as provided in K.A.R. 1-9-14 (a), each eligible employee who has accrued compensatory time off authorized under this subsection shall, upon termination of employment or upon promotion, demotion, or transfer to another state agency, be paid for the unused compensatory time at a rate of compensation not less than the higher of either of the following rates:

(i) The average regular rate received by the eligible employee during the last three years of the employee's employment; or

(ii) the final regular rate received by the eligible employee.

(B) Any longevity or quality award bonus payments received during the last three years of employment shall be included in determining the average regular rate and the final regular rate specified in paragraph (e)(4)(A).

(5)(A) Each eligible employee who has accrued compensatory time off authorized under this subsection and who has requested the use of compensatory time shall be permitted by the appointing authority to use this time within a reasonable period after making the request if the use of the compensatory time does not unduly disrupt the operations of the agency.

(B) Each employee who has accrued compensatory time and whose FLSA status is changed to exempt shall be granted the compensatory time off, paid for the entire amount, or provided a combination of both compensatory time off and pay, so that there is no remaining compensatory time balance before the employee's status changes to exempt.

(C) Each employee who has accrued compensatory time off under this subsection may be required by the appointing authority to use the compensatory time within a reasonable period after receiving notice of this requirement. The notice shall state the length of time in which a specified number of hours of compensatory time are to be used.

(f) When an employee who is eligible for overtime works additional time that could result in overtime hours, that employee's appointing authority may give the employee equivalent time off, on an hour-for-hour basis, in the workweek or work period in which the additional time is worked if any of the following conditions is met:

(1) The appointing authority notifies the employee of the change in the employee's normal work schedule for that workweek or work period at least five calendar days in advance of the day

in which the employee's normal work schedule is first changed.

(2) The appointing authority has established a written policy stating that the employee may be required to take equivalent time off, on an hour-for-hour basis, in the workweek or work period in which additional time is worked.

(3) The employee requests or agrees to take equivalent time off during the workweek or work period in which additional time was worked, and the appointing authority determines that this arrangement is not detrimental to the operations of the agency.

In any case, the equivalent time off shall be taken at a time agreeable to the appointing authority during the workweek or work period in which the additional time is worked.

(g) This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 75-3706, K.S.A. 2004 Supp. 75-3747, K.S.A. 75-5507, and 75-5514; implementing K.S.A. 75-2938, 75-3707, 75-3746, 75-5508, K.S.A. 2004 Supp. 75-5537, and K.S.A. 75-5541; effective May 1, 1979; amended May 1, 1981; amended May 1, 1982; amended May 1, 1983; amended, T-86-17, June 17, 1985; amended, T-86-36, Dec. 11, 1985; amended May 1, 1986; amended, T-87-11, May 1, 1986; amended May 1, 1987; amended, T-1-7-27-89, July 27, 1989; amended Nov. 20, 1989; amended Dec. 27, 1994; amended Dec. 17, 1995; amended May 31, 1996; amended Sept. 1, 2000; amended June 5, 2005.)

1-5-25. Call-in and call-back pay. (a) An appointing authority may call an employee in to work on a regular day off or may call an employee back to work after a regular work schedule. Except as provided in subsection (b), employees of the state who are eligible to receive overtime pursuant to K.A.R. 1-5-24, and who are called in to work on a regular day off or are called back to work after a regular work schedule, shall be paid at the appropriate rate of pay for the hours worked. Except as noted below, such employees shall be paid for a minimum of two hours. The minimum of two hours shall not apply if the employee was on stand-by when called in or called back, nor shall it apply if the employee was called in or called back during the two hour period immediately prior to the beginning of the employee's next regularly scheduled work shift. Only the hours actually worked shall be credited in determining eligibility for overtime compensation.

(b) The head of each agency with employees engaged in law enforcement and firefighting activities as defined in 29 C.F.R. 553, shall determine whether such employees will be eligible for call-in and call-back pay as provided in this regulation and shall submit a written statement regarding such determination to the director. The determination as to eligibility for call-in and call-back may be modified by the secretary upon recommendation of the director. (Authorized by K.S.A. 75-3747, as amended by 1985 HB 2125; effective May 1, 1979; amended, T-86-17, June 17, 1985; amended May 1, 1986.)

1-5-26. Stand-by compensation. (a) Any appointing authority may require a non-exempt employee to be on stand-by. "Stand-by time" means a period of time outside a non-exempt employee's regularly scheduled work hours, during which the non-exempt employee is required, at agency direction, to remain available to the agency within a specified response time. Each non-exempt employee on stand-by shall be available at agency direction for recall to perform necessary work. Stand-by assignments shall be limited to work situations where a probability of emergency recall of a non-exempt employee or employees exists. When an employer is able to contact employees by means of a paging device, the employer shall establish a policy stating whether such employees are eligible for stand-by compensation.

(b) Except as provided in subsection (f), each non-exempt employee shall be compensated at the rate of one dollar per hour for each hour the employee serves on stand-by status.

(c) Each non-exempt employee on stand-by who is called in to work shall be compensated for the actual hours worked at the appropriate rate of pay, but shall not be paid stand-by compensation for the hours actually worked. Only the hours actually worked by the non-exempt employee shall be credited in determining eligibility for overtime compensation.

(d) Time during which a non-exempt employee is restricted to a particular telephone number at a location designated by the employer, or to the employer's premises, in order to remain personally available to the employer shall be considered hours worked and the employee shall be compensated at the employee's regular rate of pay instead of receiving stand-by compensation.

(e) Any non-exempt employee on stand-by, or who is subject to the provisions of subsection (d),

who is not available when called, and who does not present reasonable justification for failure to report when called, shall lose compensation for that stand-by period and may be subject to disciplinary action.

(f) The head of each agency with employees engaged in law enforcement and firefighting activities as defined in 29 C.F.R. 553, as in effect on July 1, 1994, shall determine whether those employees will be eligible for stand-by compensation as provided in this regulation and shall submit a written statement regarding that determination to the director. The determination as to eligibility for stand-by compensation may be modified by the secretary upon recommendation of the director. (Authorized by K.S.A. 1995 Supp. 75-3747; implementing K.S.A. 75-3746; effective May 1, 1979; amended May 1, 1985; amended, T-86-17, June 17, 1985; amended May 1, 1986; amended May 31, 1996.)

1-5-27. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked Jan. 6, 1992.)

1-5-28. Shift differential. (a) Each agency having multi-shift operations shall designate one or more shifts as a normal day shift. Each agency shall specify no more than 12 consecutive hours in the day from which normal day shifts may be designated. Each normal day shift shall fall entirely within those designated hours.

(b) Except as provided in subsection (e), a shift differential shall be paid to classified employees in positions eligible to receive overtime pursuant to K.A.R. 1-5-24 for hours worked on regularly established shifts other than the normal day shift or shifts. The shift differential shall not be paid to an employee for any time the employee is on any type of leave or holiday or when the employee works unscheduled hours before or after a normal day shift.

(c) Upon recommendation of the secretary, the amount of the shift differential shall be that amount set by executive directive of the governor. The amount shall be recommended by the secretary after consideration of pay survey data and other appropriate and relevant factors, which shall be reviewed at least annually.

(d) With regard to particular classes of employees, or particular agencies, or employees located in particular geographic areas of the state, a recommendation to extend or deny the shift differential authorized by this regulation may be submitted by the director of personnel services

to the secretary. This extension or denial shall be effective when approved by executive directive of the governor.

(e) The head of each agency with employees engaged in law enforcement and fire fighting activities, as defined in 29 C.F.R. 553, as in effect on July 1, 1994, shall determine whether such employees will be eligible for shift differential as provided in this regulation and shall submit a written statement regarding such determination to the director. The determination as to eligibility for shift differential may be modified by executive directive of the governor. This regulation shall be effective on and after December 17, 1995. (Authorized by K.S.A. 1994 Supp. 75-3747; implementing K.S.A. 75-3746, and K.S.A. 75-2938, as amended by 1995 SB 175, § 4; effective, E-81-14, June 12, 1980; effective May 1, 1981; amended May 1, 1982; amended May 1, 1983; amended May 1, 1985; amended, T-86-17, June 17, 1985; amended May 1, 1986; amended Jan. 6, 1992; amended July 26, 1993; amended Dec. 17, 1995.)

1-5-29. Longevity bonus pay. (a) Upon completion of 10 years of length of service, each classified employee in a regular position shall be eligible for longevity bonus pay.

(b) The longevity bonus payment for each eligible employee shall be computed by multiplying \$40 by the number of full years of state service, not to exceed 25 years.

(c) Longevity bonus pay shall increase the regular rate applying to overtime pay for hours worked during the 12 months preceding the date the longevity bonus is paid to the employee and shall be considered in calculating the payment of compensatory time to an employee upon termination as provided in K.A.R. 1-5-24. (Authorized by K.S.A. 75-5541; implementing K.S.A. 75-5541 and K.S.A. 75-2943; effective, T-1-7-27-89, July 27, 1989; effective Nov. 20, 1989; amended, T-1-9-19-94, Sept. 19, 1994; amended Nov. 21, 1994; amended Dec. 17, 1995; amended June 7, 2002.)

1-5-30. Benefits for employees activated to military duty. (a) Each employee who is ordered to report for active military service upon the activation of the National Guard and reserve units by presidential order, or who volunteers for this active duty, shall be eligible for the following benefits:

(1) The employee shall continue to accrue length of service, but shall not accrue vacation or sick leave. Upon return to work, the employee's

vacation leave accrual rate shall be increased to the appropriate level if the length of service the employee accrued while on military leave qualifies the employee for a higher accrual rate.

(2) A death benefit shall be payable if the employee dies while on active military duty. The death benefit shall be in an amount equal to the amount provided by the group term life insurance through the Kansas public employees retirement system that the employee would have received at the time of death if the employee had not been on active duty. The employing state agency at the time the employee entered active duty shall pay the death benefit. The death benefit shall be paid to the employee's beneficiary or beneficiaries, as designated on forms approved by the director of personnel services. If no beneficiary has been designated, the death benefit shall be paid to the estate of the employee. The provisions of this paragraph shall be applicable to each state employee who meets the following conditions:

(A) Immediately before entering active duty, was eligible for the insured death benefit provided under K.S.A. 74-4901 *et seq.*, and amendments thereto, and funded by the employing agency; and

(B) would not, at the time of death, be eligible for the death benefit described under paragraph (a)(2)(A).

(b) This regulation shall not apply to federal active duty for training purposes.

(c) This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 75-3706 and K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 75-3707 and 75-3746; effective, T-1-9-10-90, Sept. 10, 1990; effective Jan. 7, 1991; amended Jan. 6, 1992; amended Dec. 17, 1995; amended June 5, 2005.)

Article 6.—RECRUITING AND STAFFING

1-6-1. Registration for employment. Each person seeking employment with the state shall register on forms prescribed by the director, and these forms may be submitted or updated at any time. Registering with the state shall not constitute applying for a vacancy. This regulation shall be effective on and after December 17, 1995. (Authorized by 1994 Supp. 75-3747; implementing K.S.A. 75-2944, as amended by 1995 SB 175, § 9, K.S.A. 75-2939, as amended by 1995 SB 175, § 5, and K.S.A. 75-2942, as amended by 1995 SB 175, § 7; effective May 1, 1979; amended May 1, 1981; amended Dec. 17, 1995.)

1-6-2. Recruitment. (a)(1) For each classified vacancy to be filled, the appointing authority shall post a job requisition on the central notice of vacancy report administered by the director, except as provided in subsection (b).

(A) Each job requisition posted on the central notice of vacancy report shall be open to applications from the following individuals:

(i) Employees within the agency that is posting the job requisition;

(ii) persons in the reemployment pool; and

(iii) persons who separate from state service due to a permanent disability for which the employee receives disability benefits from either the Kansas public employee retirement system or the United States social security administration.

(B) The appointing authority may then determine whether recruitment will also be conducted among the following additional groups of individuals:

(i) All state employees and persons eligible for reinstatement; or

(ii) all state employees, persons eligible for reinstatement, and the general public.

(2) Notices of the vacancy shall be made available to all agency personnel offices. Appropriate and reasonable distribution within each agency shall be the responsibility of the appointing authority.

(3) The appointing authority, within guidelines established by the director, shall establish a period of time in which applications will be accepted for each vacancy.

(b) Notices of a vacancy shall not be required under any of the following conditions:

(1) A temporary position is to be filled.

(2) A position is to be filled by demotion or transfer.

(3) A position is to be reallocated.

(4) A governor's trainee position is to be filled.

(5) The director determines that, for good cause, a notice is not in the best interests of the state.

(c) All job postings, announcements, and advertisements for vacancies in safety-sensitive positions as defined in K.S.A. 75-4362, and amendments thereto, or in commercial driver positions as defined in K.A.R. 1-2-20 shall include a statement regarding the drug testing requirements set forth in K.A.R. 1-6-32, K.A.R. 1-6-33, K.A.R. 1-9-19a, and K.A.R. 1-9-25. (Authorized by K.S.A. 75-3706, K.S.A. 2005 Supp. 75-3747, and 75-4362; implementing K.S.A. 75-2939, 75-2942, 75-2943, 75-2944, 75-2945, 75-3707, 75-3746, and K.S.A. 2005 Supp. 75-4362; effective May 1, 1979; amended May 1, 1981; amended May 1, 1983; amended,

T-1-10-28-88, Oct. 31, 1988; amended Dec. 18, 1988; amended April 13, 1992; amended Dec. 17, 1995; amended Aug. 1, 1997; amended June 5, 2005; amended Sept. 29, 2006.)

1-6-3. Filling vacancies. (a) For each classification, required selection criteria shall be established by the director concerning education, experience, age, physical requirements, character, and other factors that are related to ability to perform satisfactorily the duties of positions in the class. Each required selection criterion shall relate directly to the duties of positions in the class. Optional selection criteria may be established by the director for one or more classes, which may be designated by the appointing authority as preferred or required for particular positions in the classes.

(b) Each applicant certified to the pool of eligible candidates shall meet the required selection criteria for that class and position at the time of hire. If the required selection criteria for a class or position includes a degree requirement, any applicant who is expected to complete the degree requirement by the end of the current academic term may be certified to the pool of eligible candidates for that class or position and extended a conditional offer of employment. The applicant shall meet the degree requirement at the time of hire.

(c) Any agency may establish preferred selection criteria, in addition to those provided under subsection (a), in order to determine the capacity and fitness of each eligible candidate in the pool to perform the position's specific duties. (Authorized by K.S.A. 2001 Supp. 75-3747; implementing K.S.A. 75-2939, K.S.A. 75-2943, and K.S.A. 75-2944; effective May 1, 1979; amended Dec. 17, 1995; amended June 7, 2002.)

1-6-4 to 1-6-5. These regulations shall be revoked on and after December 17, 1995. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked Dec. 17, 1995.)

1-6-6. This regulation shall be revoked on and after December 17, 1995. (Authorized by K.S.A. 1982 Supp. 75-3747; implementing K.S.A. 1982 Supp. 75-2944; effective May 1, 1979; amended May 1, 1983; revoked Dec. 17, 1995.)

1-6-7. Disqualification of applicants and candidates. (a) Any applicant or candidate may be disqualified by the director in the following circumstances. The director may refuse to assess an applicant or a candidate, or may refuse

to place a candidate in the eligible pool, or may remove a candidate from the eligible pool when the applicant or candidate has been dismissed from employment with the state for delinquency or misconduct, or fails to furnish a complete application or any information requested by the director, or for any of the reasons stated in K.S.A. 75-2940.

(b) Whenever the director disqualifies an applicant or candidate from any part of the employment process, a statement of the reasons for the disqualification shall be provided by the director. The applicant or candidate shall be provided an opportunity to respond in writing or to appear before the director within 14 calendar days to provide cause why the action should not be taken.

(c) The applicant or candidate may request in writing, within 30 days from the date of the disqualification, a hearing before the civil service board to determine the reasonableness of the action. The board shall, within a reasonable period, grant the applicant or candidate a hearing. This regulation shall be effective on and after December 17, 1995. (Authorized by K.S.A. 1994 Supp. 75-3747; implementing K.S.A. 75-2940, as amended by 1995 SB 175, § 6; effective May 1, 1979; amended May 1, 1981; amended May 1, 1983; amended Dec. 17, 1995.)

1-6-8. Selection instruments. (a) Each appointing authority shall develop selection instruments to fairly assess the capacity and fitness of applicants to perform the duties of the position in which employment is sought. Selection instruments may include ratings of training, experience, and other qualifications, written tests, performance tests, interviews, physical fitness tests, assessment center evaluations, medical examinations, or other selection procedures. In accordance with these regulations, the appointing authority shall be responsible for developing, maintaining, and validating selection instruments and shall make all selection instruments, procedures, records, or other selection materials available to the director upon request. Any agency, upon request, may be assisted by the director in developing, maintaining, and validating selection instruments. Selection instruments may also be developed, maintained, and validated by the director.

(b) Promotional selection instruments shall include, in addition to any or all of the selection instruments identified above, consideration of the applicant's performance and length of service.

(c) Subject to policies established by the appointing authority to protect the confidentiality of information obtained by using the selection instruments, the document or records containing this information may be inspected by the applicant.

(d) This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 75-2939, 75-2942, 75-2943, and 75-3746; effective May 1, 1979; amended Dec. 17, 1995; amended Aug. 1, 1997; amended June 5, 2005.)

1-6-9 to 1-6-15. These regulations shall be revoked on and after December 17, 1995. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked Dec. 17, 1995.)

1-6-16. This regulation shall be revoked on and after December 17, 1995. (Authorized by K.S.A. 75-3747 as amended by L. 1985, Ch. 276, Sec. 10; implementing K.S.A. 75-2942 as amended by L. 1985, Ch. 276, Sec. 4; effective May 1, 1979; amended, E-82-14, July 1, 1981; amended May 1, 1982; amended May 1, 1983; amended May 1, 1986; revoked Dec. 17, 1995.)

1-6-17. This regulation shall be revoked on and after December 17, 1995. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked Dec. 17, 1995.)

1-6-18. This regulation shall be revoked on and after December 17, 1995. (Authorized by K.S.A. 1983 Supp. 75-3747; implementing K.S.A. 1983 Supp. 75-2942, 75-2943, 75-3746, 75-2948; effective May 1, 1979; amended May 1, 1984; revoked Dec. 17, 1995.)

1-6-19 to 1-6-20. These regulations shall be revoked on and after December 17, 1995. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked Dec. 17, 1995.)

1-6-21. Candidates for regular positions. (a) For each vacancy in a regular position that is to be filled, the appointing authority shall hire from among those persons certified as eligible. The pool of candidates certified as eligible to fill a vacant position may be used to fill one or more other vacancies in the same classification within 60 days of the last date on which applications are accepted for the first vacant position.

(b) The selection criteria shall be job-related. Each agency shall provide the candidates with equal consideration when applying the selection criteria.

(c) Each veteran who meets the minimum requirements for a vacant position shall be offered an interview for that vacancy when all of the following conditions are met:

(1) The vacancy is a regular position.

(2) A notice of vacancy, including a notice of an internal vacancy, has been posted for that position in accordance with the provisions of K.A.R. 1-6-2.

(3) No individuals who are eligible for the Kansas employee preference program have applied for that vacancy.

(d) The veterans' preference policy set out in subsection (c) shall not apply to any veteran who was dismissed or did not resign in good standing from state service.

(e) For the purposes of this regulation, "veteran" means any individual who is eligible for the veterans' preference under the provisions of K.S.A. 75-2955, and amendments thereto. (Authorized by K.S.A. 2002 Supp. 75-3747 and K.S.A. 75-2955; implementing K.S.A. 75-2943 and 75-2955; effective May 1, 1979; amended May 1, 1983; amended May 1, 1985; amended, T-1-9-19-94, Sept. 19, 1994; amended Nov. 21, 1994; amended Dec. 17, 1995; amended Aug. 1, 1997; amended June 7, 2002; amended Dec. 1, 2003.)

1-6-22. (Authorized by K.S.A. 1994 Supp. 75-3747; implementing K.S.A. 1994 Supp. 75-2935; effective May 1, 1979; amended May 1, 1983; amended Dec. 17, 1995; revoked Aug. 1, 1997.)

1-6-22a. Training classes. (a) Certain classes of positions may be designated by the director as training classes. Each person employed in a training class shall be in training status and not in probationary or permanent status. The training period served for each training class established as provided by this regulation shall be specified by written agreement between the director and the appointing authority of the agency in which the training class is used. If a specific training class is used by more than one agency, the duration of the training period served for that class shall be established by the director after consultation with all agencies that use the class.

(b) The appointing authority may dismiss a trainee at any time, except as follows.

(1) If a trainee was promoted from a classified position in which an employee held permanent status, the provisions in K.S.A. 75-2944, and amendments thereto, shall apply.

(2) If an employee who was demoted or transferred to a trainee position is terminated for reasons other than personal conduct, the employee shall be accorded the right to a position in the class in which the employee held permanent status immediately before the trainee position.

(c) The period served by an employee in a training class shall not be counted as part of the probationary period if the employee is subsequently employed in a regular position.

(d) Upon meeting the minimum qualifications for the applicable class and satisfactorily performing the job duties, responsibilities, and training requirements of the trainee position, each employee in a training class shall be placed in the applicable class as a probationary employee and serve a probationary period as established by K.A.R. 1-7-4. (Authorized by K.S.A. 75-3706 and K.S.A. 2005 Supp. 75-3747; implementing K.S.A. 75-3707 and 75-3746; effective Dec. 27, 1993; amended Nov. 21, 1994; amended Dec. 17, 1995; amended May 31, 1996; amended Sept. 18, 1998; amended Sept. 29, 2006.)

1-6-23. Reemployment. (a)(1) Except as provided in subsection (b), each employee who is laid off, or demoted or transferred in lieu of layoff, shall be placed in a reemployment pool by the director, unless the employee requests in writing to not be placed in the reemployment pool. Each employee in the reemployment pool shall be eligible to apply for any vacancy to be filled, including any internal vacancy, until the date the employee is reemployed or for three years from the date of the layoff, whichever occurs first.

(2) Each employee who is eligible for reemployment and who is also a veteran shall be offered an interview for any vacancy that meets all of the following conditions:

(A) The vacancy is for a regular position in the classified service.

(B) The vacant position is at the same pay grade or a lower pay grade than the pay grade at which the individual was paid at the time the individual received the notice of layoff.

(C) The employee meets the minimum requirements for the position.

(b)(1) Each individual who meets all of the following conditions shall be eligible for the Kansas employee preference program, as provided in this subsection:

(A) The individual received a written layoff notice in accordance with K.A.R. 1-14-9.

(B) The individual's most recent performance rating before receiving the layoff notice was "meets expectations" or better.

(C) The individual was not suspended, demoted, or terminated pursuant to K.S.A. 75-2949, and amendments thereto, in the 12 months preceding the date on which the individual received the layoff notice.

(2) Each individual who qualifies under paragraph (b)(1) shall remain eligible for the Kansas employee preference program until any of the following events occurs:

(A) The individual is appointed to a classified or unclassified position that is eligible for benefits.

(B) An eligible individual who was laid off or is scheduled to be laid off from a regular position that was not eligible for benefits chooses to use the Kansas employee preference for any position, whether that position is eligible for benefits, and the individual then is appointed to that position.

(C) A period of 12 consecutive months has passed since the effective date of the layoff. Each individual who is eligible for the Kansas employee preference program but has not been reemployed under any of the circumstances identified in paragraph (b)(2)(A) or (b)(2)(B) at the end of that 12-month period shall remain eligible for reemployment as provided in subsection (a).

(D) The individual is suspended, demoted, or terminated pursuant to K.S.A. 75-2949, and amendments thereto, at any time after the individual becomes eligible for the Kansas employee preference program, but before the date on which the individual is actually laid off.

(3) Each individual who is qualified to receive a Kansas employee preference shall be eligible to apply for any vacancy that meets all of the following conditions:

(A) The vacancy is for a classified position that is eligible for benefits, except that when the individual who is eligible for the Kansas employee preference program was laid off from or has received a layoff notice for a regular position that is not eligible for benefits, the vacancy may be for any regular position in the classified service, whether the vacant position is eligible for benefits.

(B) The vacant position is at the same pay grade or a lower pay grade than the pay grade at which the individual was paid at the time the individual received the layoff notice.

(C) The vacant position to be filled is one for which a notice of vacancy will be posted in accordance with K.A.R. 1-6-2, including an internal vacancy.

(4) Upon receiving an application for the vacant position from an individual who is eligible for a Kansas employee preference, the appointing authority shall offer the position to the individual if the individual meets the minimum requirements for the position, subject to the following requirements:

(A)(i) If only one individual who is eligible for a Kansas employee preference applies for the position and is determined to meet the minimum requirements for the position, the appointing authority shall schedule an interview with the individual to provide the appointing authority with an opportunity to assess the employee's ability to successfully perform the duties and responsibilities of the position and to provide the individual with an opportunity to determine whether the position is of interest to the individual.

(ii) Following the interview, the appointing authority shall offer the position to the individual, unless the director determines that the individual cannot successfully perform the duties and responsibilities of the position under paragraph (b)(4)(C).

(iii) The individual who is offered the position as provided in paragraph (b)(4)(A) shall inform the appointing authority whether the individual accepts or rejects the offer within two business days of the date on which the position is offered.

(B) If more than one individual who is eligible for a Kansas employee preference applies for the position and meets the minimum requirements for the position, the appointing authority shall apply additional, job-related selection criteria in accordance with K.A.R. 1-6-21 in considering the application of each of these individuals, subject to the following requirements:

(i) The appointing authority shall not be required to interview more than seven individuals, except that each individual who is a veteran shall be offered an opportunity for an interview.

(ii) After considering the additional, job-related selection criteria, the appointing authority shall offer the position to one of these individuals, except that the appointing authority shall not be required to offer the position to any individual who the director determines cannot successfully perform the duties and responsibilities of the position under paragraph (b)(4)(C).

(iii) Each individual who is a veteran shall be offered the position if that individual is determined to be equally qualified after applying the additional, job-related selection criteria.

(iv) The individual who is offered the position as provided in paragraph (b)(4)(B) shall inform the appointing authority whether the individual accepts or rejects the offer within two business days of the date on which the position is offered.

(C) If the appointing authority submits written documentation to the director and, based on the documentation, the director determines in writing that an individual who is eligible for the Kansas employee preference could not successfully perform the duties and responsibilities of the position, the appointing authority shall not be required to offer the position to that individual.

(c) For purposes of this regulation, “veteran” shall mean any individual who is eligible for a veteran’s preference pursuant to K.S.A. 73-201, and amendments thereto. (Authorized by K.S.A. 75-2948 and K.S.A. 2014 Supp. 75-3747; implementing K.S.A. 75-2948; effective May 1, 1979; amended May 1, 1984; amended, T-86-17, June 17, 1985; amended May 1, 1986; amended Dec. 27, 1993; amended Dec. 17, 1995; amended May 31, 1996; amended, T-1-4-1-03, April 1, 2003; amended July 25, 2003; amended Jan. 6, 2017.)

1-6-24. Transfer. (a) Any appointing authority may transfer any employee with permanent status in accordance with the following regulations.

(1) An employee with permanent status may be transferred from a duty station in one county to a duty station in another county with the consent of the secretary of administration or the written consent of the employee.

(2) Any appointing authority may accept, by transfer, any employee with permanent status employed in another agency.

(3) Any employee with permanent status, or any employee serving a probationary period because of a promotion, may be transferred from a position in one class to a position in a different class if both positions are allocated to classes which are assigned to the same pay grade, have a close similarity of duties, and have essentially the same qualifications, and if the employee meets the qualifications for the new class.

(4) Each employee with permanent status who is transferred from one position to another position shall retain permanent status in the new position.

(b) Any appointing authority may transfer an employee on probationary status from one position in a class to another position in the same class in the agency. An appointing authority may ac-

cept, by transfer, an employee with probationary status employed in another agency, if the transfer is to a position in the same class. The probationary period of an employee transferred pursuant to this regulation shall be determined in accordance with K.A.R. 1-7-4.

(c) Approval of the employee shall not be required when a transfer within an agency, or between agencies, is made pursuant to this regulation.

(d) Each employee who is transferred from the unclassified service to a position in the classified service pursuant to the provisions of this subsection shall serve a probationary period in accordance with K.A.R. 1-7-4. (Authorized by K.S.A. 1995 Supp. 75-3747; implementing K.S.A. 1995 Supp. 75-2947, K.S.A. 75-3746; effective May 1, 1979; amended May 1, 1981; amended May 1, 1983; amended May 1, 1984; amended March 20, 1989; amended Dec. 17, 1995; amended May 31, 1996.)

1-6-25. Temporary positions. (a) Except as otherwise provided by law, any appointing authority may fill a temporary position with any person who meets the required selection criteria for the class and the position. Employment of a person in one or more temporary positions shall not exceed 999 total hours of employment in state service for a period of 12 consecutive months. If the duration of a temporary position is to be less than 999 hours, the maximum duration of the temporary position shall be indicated by the appointing authority. All time worked, including overtime, shall count towards the 999 hours. Each temporary appointment shall be ended no later than 12 months after its commencement, even if the appointee works fewer than 999 hours. Any person may occupy more than one temporary position in a period of 12 consecutive months, if the total number of hours of employment in state service does not exceed 999 hours.

(b) Time worked in one or more temporary positions shall not be counted as part of the probationary period if an individual is subsequently hired in a regular position. (Authorized by K.S.A. 75-3747; implementing K.S.A. 75-2945; effective May 1, 1979; amended May 1, 1981; amended, E-82-14, July 1, 1981; amended May 1, 1982; amended May 1, 1984; amended, T-86-17, June 17, 1985; amended May 1, 1986; amended Dec. 17, 1995; amended Oct. 1, 1999.)

1-6-26. This regulation shall be revoked on and after December 17, 1995. (Authorized by K.S.A. 1983 Supp. 75-3747; implementing K.S.A. 1983 Supp. 75-2945; effective May 1, 1979; amended, E-82-14, July 1, 1981; amended May 1, 1982; amended May 1, 1984; revoked Dec. 17, 1995.)

1-6-26a. Limited-term positions. (a) "Limited-term position" means a position in the classified service that is scheduled to terminate within a predetermined period of time, as stipulated in grant specifications or other contractual agreements.

(b) Each individual in a limited-term position shall be notified at the time of hiring of the expiration date of the grant or contractual agreement. No employee with permanent status may be transferred to a limited-term position without the written consent of that employee. The end date of the position shall be entered on the employee's personnel record at the time of hiring.

(c) Each individual in a limited-term position shall be terminated on the end date of that position, subject to any extensions of the limited-term position. The termination of any employee who serves the full length of a limited-term position shall not be considered a layoff of that employee, and the provisions of K.S.A. 75-2948, and amendments thereto, and any regulations adopted under that statute shall not apply to the employee. (Authorized by K.S.A. 2001 Supp. 75-3747; implementing K.S.A. 75-3746 and 75-2948; effective June 7, 2002.)

1-6-27. Demotion. (a) Any employee with permanent status may be demoted to a position in a lower class if that position is in the same series of classes, or if the appointing authority determines that the employee can reasonably be expected to perform satisfactorily the duties of the position in the lower class. Each employee with permanent status who is demoted pursuant to this regulation shall be granted permanent status in the class to which demoted, effective on the date of the demotion.

(b) Each request for a voluntary demotion shall be subject to approval of the appointing authority. The employee shall not be entitled to appeal the voluntary demotion to the civil service board.

(c) The demotion of an employee with permanent status for unsatisfactory performance of duties, for disciplinary reasons, or for other good cause shall be managed in accordance with the ap-

propriate procedures specified in K.S.A. 75-2944, K.S.A. 75-2949, K.S.A. 75-2949d, K.S.A. 75-2949e, and K.S.A. 75-2949f, and amendments thereto.

(d) An appointing authority may demote any new hire probationary employee or any probationary employee who was rehired on a basis other than reemployment or reinstatement to a class in a lower pay grade within the agency if the employee meets the qualifications for the lower class, if the employee can satisfactorily perform the duties of the lower class and if the employee has consented. Each employee with probationary status who is demoted under this subsection shall start a new probationary period that shall be no fewer than six months in length.

(e) Each unclassified employee who is voluntarily demoted to a regular classified position shall serve a probationary period in accordance with K.A.R. 1-7-4.

(f) This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 2004 Supp. 75-2949; effective May 1, 1979; amended May 1, 1983; amended May 1, 1984; amended Dec. 17, 1995; amended Aug. 1, 1997; amended June 5, 2005.)

1-6-28. Overlapping hires. (a) In filling a position that is not yet vacated by the incumbent, the agency may have the incumbent and the new employee on the position concurrently for a period not to exceed four weeks.

(b) When an employee is on extended leave, the appointing authority may fill the regular position. The agency shall notify the employee in writing at the time the employee is hired that the employee shall not obtain permanent status in the position, unless the employee on leave does not return or for some other reason it is possible and advisable to grant the new employee permanent status. The probationary period for the employee may be extended by the appointing authority without regard to limits on the duration of probationary periods established elsewhere in these regulations. This regulation shall be effective on and after December 17, 1995. (Authorized by K.S.A. 1994 Supp. 75-3747; implementing K.S.A. 75-3746; effective May 1, 1979; amended Dec. 17, 1995.)

1-6-29. Acting assignments. (a) Any appointing authority may temporarily assign an employee who has permanent status to perform the duties of another position on the basis of an acting assignment if all of the following conditions are met:

(1)(A) The other position is vacant; or
 (B) The incumbent in the other position is unable or unavailable to perform the duties of that position for 30 days or more.

(2) The appointing authority makes both of the following determinations:

(A) It is necessary to assign the duties of the other position to another employee until the vacancy is filled or the incumbent returns to work.

(B) There are no other viable alternatives to an acting assignment.

(3) The employee meets the qualifications of the other position.

(4) The acting assignment is made in accordance with the provisions of this regulation.

(b) The appointing authority shall initiate action to fill the position on a permanent basis, if the incumbent has permanently vacated the position. However, the appointing authority may delay filling the position because of a shortage of funds.

(c) Acting assignments shall not be used to generate a series of acting assignments for an employee.

(d) An acting assignment shall not exceed one year in length unless approved by the director. No acting assignments made pursuant to K.S.A. 75-4315a shall exceed 12 months in duration. Acting assignments shall not be retroactive. The acting assignment procedure shall not be used for a short duration, temporary assignment of an employee for fewer than 30 days.

(e) Documentation of the acting assignment shall be placed in the employee's permanent record.

(f)(1) If an employee is acting in a position assigned to a pay grade higher than that of the employee's normal position, the employee shall be paid at a step on the higher grade that gives the employee an increase in pay. Such an increase shall not exceed the highest step that would be possible if the employee was being promoted to the position.

(2) When the acting assignment is terminated and the employee is returned to the former class, the employee's pay shall revert to whatever rate it would have been had the employee not received the acting assignment.

(3) Neither the employee's pay increase date nor the employee's status in the normal position shall be affected by an acting assignment.

(g)(1) If an employee is acting in a position assigned to the same pay grade as that of the employee's normal position, the appointing authority may compensate the employee at a higher step of the pay grade than the step on which the employee is paid in the employee's normal position if the

appointing authority determines the pay increase is in the best interests of the state. Nothing in this regulation shall authorize pay above the maximum step of the pay grade. The employee's pay increase date shall be governed by the time-on-step requirement of the new step to which the employee is assigned under this subsection.

(2) When the acting assignment is terminated and the employee is returned to the former class, the employee's pay shall revert to whatever rate it would have been had the employee not received the acting assignment.

(h) If an employee is acting in a position assigned to a pay grade lower than that of the employee's normal position, the employee shall be paid at the employee's normal pay rate.

(i) For the duration of any acting assignment, the employee may receive pay step increases in accordance with applicable pay step increase regulations.

(j) If the employee is promoted to a position in which the employee has served in an acting assignment, any accumulated months shall count towards the next pay step increase. The time served in the acting assignment may be credited towards the probationary period required for promotions.

(k) In a manner prescribed by the director, the appointing authority shall report to the director all acting assignments made by the appointing authority pursuant to this regulation.

(l) This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 75-3706 and K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 75-2938, 75-3707, 75-3746, and 75-4315a; effective May 1, 1979; amended May 1, 1983; amended May 1, 1984; amended, T-86-17, June 17, 1985; amended May 1, 1986; amended May 1, 1987; amended Jan. 6, 1992; amended Dec. 17, 1995; amended Oct. 24, 1997; amended June 5, 2005.)

1-6-30. Reinstatement. Each employee with permanent status who separates from state service in good standing may for a period of one year from the date of separation apply for, and may be certified as a candidate for, any vacancies open to state employees only, and may be rehired as a reinstatement. (Authorized by K.S.A. 75-3747; implementing K.S.A. 75-3746; effective May 1, 1983; amended Dec. 17, 1995; amended Sept. 18, 1998.)

1-6-31. Governor's trainee program. (a) Any agency may fill an existing vacancy under the governor's trainee program according to the provisions of this regulation.

(1) "Governor's trainee program" means a program to attract and utilize females, minorities, and persons with disabilities as defined in K.A.R. 1-2-34 in order to provide career development opportunities.

(2) "Underutilization" means a lower representation in a class or EEO job category in an agency organizational unit's workforce or the agency's workforce of females, minorities or persons with disabilities as defined in K.A.R. 1-2-34 than would be expected by their availability.

(3) An agency shall not create additional positions as a result of using the governor's trainee program.

(4) Governor's trainee program positions shall be created only from the following:

- (A) vacancies arising out of attrition;
- (B) vacancies created by the legislature; or
- (C) vacancies created by actions taken pursuant to K.S.A. 75-2949.

(b) Each agency electing to fill a vacant position under the governor's trainee program shall first conduct an underutilization review to determine if underutilization exists in a class or EEO job category, or both, in the agency workforce or the agency organizational unit in which the vacancy exists.

(c) The agency shall submit information to the director regarding the vacant position and the data used in determining underutilization. When the director has verified underutilization, the agency shall be notified that the director has established a trainee classification and reallocated the position. The notice from the director shall include authorization for the agency to recruit persons who are members of the underutilized protected group or groups.

(d) After the close of the application period, the agency shall select, on a competitive basis, an applicant who:

(1) is a member of an underutilized protected group;

(2) will not, at the time of hiring, meet the required selection criteria for the regular class of the trainee position;

(3) will be able to meet the required selection criteria for the regular class within 24 months; and

(4) is deemed qualified to satisfactorily perform the duties of the trainee position.

(e) When the agency has selected a trainee for the position, the agency shall submit to the director:

(1) documentation that the trainee meets the requirements of subsection (d); and

(2) a copy of a proposed training and evaluation plan developed for the trainee that provides for regular assessments of the trainee's progress and communication of the assessments to the trainee.

(f) Each person hired as a governor's trainee shall be paid at two pay grades lower than the grade for the applicable regular class.

(g) The agency shall submit a progress report on each trainee to the director at least once each six months while the trainee is in training.

(h) When the trainee meets the required selection criteria for the applicable regular class, and receives a satisfactory performance rating for the job duties and responsibilities of the position, the trainee shall be promoted to the applicable regular class as a probationary employee. In no event shall the trainee be retained in a position under the governor's trainee program for less than six months or more than 24 months from the date of appointment.

(i) Each individual hired as a governor's trainee shall be eligible for the same rights and benefits as a person in a regular classified position who is on probationary status. If the governor's trainee was promoted or transferred from a classified position in which the employee held permanent status, rights normally associated with the promotion or transfer under K.S.A. 1995 Supp. 75-2944, as amended, and K.A.R. 1-6-24 shall apply. If the governor's trainee was demoted from a classified position in which the employee held permanent status, the trainee shall not be granted permanent status in the trainee position but shall be accorded the right to a position in the class in which the employee held permanent status. (Authorized by K.S.A. 1995 Supp. 75-3747; implementing K.S.A. 75-3746; effective March 20, 1989; amended Aug. 3, 1992; amended Dec. 17, 1995; amended May 31, 1996.)

1-6-32. Candidate drug screening test for safety-sensitive positions. (a) A drug test shall be administered to each candidate for a safety-sensitive position upon a conditional offer of employment for such a position.

(1) "Safety-sensitive position" shall be defined as provided in K.S.A. 75-4362(g), and amendments thereto.

(2) "Conditional offer of employment," for purposes of this regulation, means an offer that is contingent upon participating in the drug screening program established under K.S.A. 75-4362, and amendments thereto.

(b) If a candidate fails to participate in the required drug screening test or receives a confirmed positive result based upon a test sample obtained from the candidate, the following requirements shall apply:

(1) The conditional offer of employment shall be null and void.

(2) The candidate shall be disqualified from certification for safety-sensitive positions in accordance with K.S.A. 75-2940, and amendments thereto, and K.A.R. 1-6-7 for a period of one year from the effective date of the disqualification action.

(c) Each candidate who has been given a conditional offer of employment shall be informed of the provisions of subsection (b) in writing and shall sign a statement agreeing to participate in the test before the test is administered. Failure to accept this condition shall make the conditional offer of employment null and void.

(d) Each candidate required to submit to a drug screen shall be advised of all of the following aspects of the drug screening program:

(1) The methods of drug screening that may be used;

(2) the substances that may be identified;

(3) the consequences of a refusal to submit to a drug screening test or of a confirmed positive result; and

(4) the reasonable efforts to maintain the confidentiality of results and any medical information that are to be provided in accordance with subsection (j).

(e) Drug screening tests may screen for any substances listed in the Kansas controlled substances act.

(f) Any candidate who has reason to believe that technical standards were not followed in deriving a confirmed positive result may appeal the result in writing to the director within 14 calendar days of receiving written notice of the result.

(g) A retest by the original or a different laboratory on the same or a new specimen may be authorized only by the director, if the director determines that the technical standards established for test methods or chain-of-custody procedures were violated in deriving a confirmed positive result or if there is other appropriate cause to warrant a retest.

(h) If a candidate intentionally tampers with a sample provided for drug screening, violates the chain-of-custody or identification procedures, or falsifies test results, the conditional offer of employment shall be withdrawn. Any of these actions

by a candidate shall be grounds for disqualification for all positions in state service in accordance with K.S.A. 75-2940, and amendments thereto.

(i) If the result of a drug screening test warrants disqualification action, a candidate shall be afforded due process in accordance with K.S.A. 75-2940, and amendments thereto, and K.A.R. 1-6-7 before any final action is taken.

(j)(1) Individual test results and medical information shall be considered confidential and shall not be disclosed publicly in accordance with K.S.A. 75-4362, and amendments thereto. Each candidate shall be granted access to the candidate's information upon written request to the director.

(2) Drug screening test results shall not be required to be kept confidential in civil service board hearings regarding disciplinary action based on or relating to the results or consequences of a drug screen test.

(3) Each appointing authority shall be responsible for maintaining strict security and confidentiality of drug screening records in that agency. Access to these records shall be restricted to the agency's personnel officer or a designee, persons in the supervisory chain of command, the agency's legal counsel, the agency's appointing authority, the secretary of administration or a designee, the department of administration's legal counsel, and the director or a designee. Further access to these records shall not be authorized without the express consent of the director.

(k) This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 2004 Supp. 75-3747 and 75-4362; implementing K.S.A. 75-2940 and K.S.A. 2004 Supp. 75-4362; effective, T-1-10-28-88, Oct. 28, 1988; effective Dec. 19, 1988; amended Feb. 19, 1990; amended April 13, 1992; amended Dec. 17, 1995; amended October 1, 1999; amended June 5, 2005.)

1-6-33. Candidate alcohol and controlled substances test for commercial driver positions. (a) The provisions of 49 C.F.R., Part 382, as in effect on May 1, 1995, and 49 C.F.R., Part 40, as in effect on February 15, 1994, and amendments to Part 40, as published in 59 Fed. Reg. 42,996 (1994), are hereby adopted by reference.

(b) Each candidate who has been given a conditional offer of employment for a commercial driver position shall be administered a controlled substances test.

(c) For purposes of this regulation, a "conditional offer of employment" means an offer of

a commercial driver position that is contingent upon participating in the controlled substances testing program established under the federal omnibus transportation employee testing act of 1991, 49 U.S.C. Appx. § 2717.

(d) Each candidate who has been given a conditional offer of employment shall be informed of the provisions of subsections (c) and (g) of this regulation in writing and shall sign a statement agreeing to participate in the testing prior to administration of the tests. Failure to accept this condition shall make the conditional offer of employment null and void.

(e) The appointing authority shall advise each candidate required to submit to controlled substances testing of the following aspects of the testing program:

- (1) the methods of controlled substances testing that may be used;
- (2) the substances that may be identified;
- (3) the consequences of a refusal to submit to a controlled substances test or of a confirmed positive result; and
- (4) the reasonable efforts utilized by the state to maintain the confidentiality of results and any medical information that may be provided.

(f) Procedures and testing personnel used in collecting, analyzing, and evaluating test samples shall meet the standards established by the director in accordance with 49 C.F.R., Part 40.

(g) In the following instances, the conditional offer of employment shall be null and void, and the candidate shall be subject to disqualification from commercial driver positions in accordance with K.S.A. 75-2940 and K.A.R. 1-6-7 for a period of one year from the effective date of the disqualification action:

- (1) the candidate fails to participate in the required controlled substances test;
- (2) the candidate receives a confirmed positive controlled substances test result;
- (3) the candidate refuses to provide written authorization to obtain information from prior employers as required by 49 C.F.R., 382.413; or
- (4) the information obtained from a prior employer under 49 C.F.R., 382.413 indicates that, within the preceding two years, the following has occurred:

(A) the candidate violated any of the provisions of 49 C.F.R., Part 382, Subpart B; and

(B) the candidate failed to complete the requirements for returning to work under 49 C.F.R., 382.605, including an evaluation by a substance

abuse professional, a return-to-duty alcohol test, controlled substances test or both, and completion of any rehabilitation or treatment program.

(h) In accordance with 49 C.F.R., 40.25(f)(10)(ii)(E), any candidate who receives a confirmed positive result on a controlled substances test may request a retest by the original or a different laboratory on the second half of the original specimen within 72 hours of being notified of the positive test result.

(i) Any candidate who intentionally tampers with a sample provided for controlled substances testing, violates chain-of-custody or identification procedures, or falsifies a test result shall have the conditional offer of employment withdrawn and shall be subject to disqualification for all positions in state service in accordance with K.S.A. 75-2940.

(j) If disqualification of a candidate is warranted under subsection (g) of this regulation, the appointing authority shall afford the candidate due process in accordance with K.S.A. 75-2940 and K.A.R. 1-6-7.

(k)(1) Individual results and medical information shall be considered confidential and shall not be disclosed publicly. Each candidate shall be granted access to the candidate's information upon written request to the director, in accordance with 49 C.F.R., 382.405.

(2)(A) Each agency shall be responsible for maintaining strict security and confidentiality of the alcohol and controlled substance testing records in that agency. Access to these records shall be restricted to the following individuals:

- (i) the agency personnel officer, the agency appointing authority, the secretary of administration, the director, or any of their respective designees;
- (ii) persons in the supervisory chain of command;
- (iii) the agency legal counsel; or
- (iv) the department of administration legal counsel.

(B) Further access to these records shall not be authorized without the express consent of the director. (Authorized by K.S.A. 1996 Supp. 75-3747; implementing K.S.A. 75-3746, K.S.A. 1996 Supp. 75-2940, and K.S.A. 75-3707; effective, T-1-1-26-95, Jan. 26, 1995; effective May 30, 1995; amended Dec. 17, 1995; amended June 20, 1997.)

Article 7.—PROBATIONARY PERIOD AND EMPLOYEE EVALUATION

1-7-1. (Authorized by K.S.A. 1981 Supp. 75-3747; implementing K.S.A. 1981 Supp. 75-2946;

effective May 1, 1979; amended, E-82-14, July 1, 1981; amended May 1, 1982; revoked May 1, 1983.)

1-7-2. (Authorized by and implementing K.S.A. 1980 Supp. 75-2943; effective May 1, 1979; amended May 1, 1981; revoked May 1, 1983.)

1-7-3. Probationary period required. (a) The probationary period shall be considered as a working test of the employee's ability to perform adequately in the position to which the employee was hired. In order to aid the agency in developing efficient employees, the supervisor shall give reasonable instruction and training that may be required throughout the probationary period. Each appointing authority shall establish procedures so that any problems with probationary employees will be brought to the attention of the agency management for appropriate action before the end of the probationary period.

(b) Before the end of the probationary period, the appointing authority shall provide the director with results of a performance review for the employee. If the overall performance review rating given to a probationary employee before the end of the employee's probationary period is unsatisfactory, the employee shall not be granted permanent status. The performance review ratings required by this subsection shall not be required to occur within the time period established in K.A.R. 1-7-10 (a)(3).

(c) Except as provided in K.A.R. 1-7-4, all new hires, promotions, and rehires shall be tentative and subject to a probationary period as authorized by K.A.R. 1-7-4. If the probationary period of an employee is to be extended as authorized by K.A.R. 1-7-4, the appointing authority, before the end of the probationary period, shall furnish the employee with a copy of the performance review stating that the probationary period is extended. Results of the performance review shall be provided to the director.

(d) Any probationary employee, other than an employee on probation due to a promotion from a position in which the employee had permanent status, may be dismissed by the appointing authority at any time during the probationary period.

(e) This regulation shall be effective on and after October 1, 2009. (Authorized by K.S.A. 75-3706 and K.S.A. 2008 Supp. 75-3747; implementing K.S.A. 75-2943, 75-2946, 75-3707, and 75-3746; effective May 1, 1983; amended May 1, 1984; amended, T-86-17, June 17, 1985; amended

May 1, 1986; amended Dec. 17, 1995; amended June 5, 2005; amended Oct. 1, 2009.)

1-7-4. Duration of probationary period. (a) Each new hire and each rehire made on a basis other than reemployment or reinstatement who is employed in a regular position shall be subject to a probationary period of six months. This probationary period may be extended by the appointing authority for not more than six additional months if action to extend the probationary period is taken before the end of the original six-month probationary period. A probationary period of not more than 12 months may be established by the appointing authority if specific training or certification requirements for a position cannot be completed within six months.

(b) Each employee who is promoted shall be subject to a probationary period of not less than three months and not more than six months as determined by the appointing authority. However, a probationary period of not more than 12 months may be established by the appointing authority if specific training or certification requirements for a position cannot be completed within six months. Each employee with permanent status who serves a probationary period in accordance with this subsection shall retain permanent status throughout the probationary period.

(c) Each person rehired on the basis of reemployment shall have permanent status effective on the date of rehire.

(d) Each person rehired on the basis of reinstatement shall be subject to a probationary period of not less than three months and not more than six months as determined by the appointing authority.

(e) Time on leave with or without pay of more than 30 consecutive calendar days shall not count towards total time served on probation. The employee's probationary period shall be continued effective with the employee's return from leave until the total probation time served equals the time required for the position.

(f) Each employee with permanent status who is transferred from one agency to another, or transferred within the same agency, shall continue to have permanent status.

(g) If a probationary employee is transferred from one position in a class to another position in the same class or another class in the same pay grade, the transfer shall have no effect on the employee's probationary period. The probationary period may be extended by the appointing au-

thority for not more than six additional months by giving written notice of the extension to the employee and director before the expiration of the original six-month probationary period.

(h) Each employee who is transferred, demoted, or promoted from any position in the unclassified service to a regular position in the classified service shall serve a probationary period of six months.

(i) Persons serving in temporary positions shall not be subject to a probationary period.

(j) Each employee in a governor's trainee position or a position in a training classification shall be placed on probation for six months when promoted to the regular class at the end of the training period.

(k) This regulation shall be effective on and after October 1, 2009. (Authorized by K.S.A. 75-3706 and K.S.A. 2008 Supp. 75-3747; implementing K.S.A. 75-2943, 75-2946, 75-3707, and 75-3746; effective May 1, 1983; amended May 1, 1985; amended Dec. 27, 1993; amended Dec. 17, 1995; amended Oct. 1, 2009.)

1-7-5. This regulation shall be revoked on and after December 17, 1995. (Authorized by K.S.A. 75-3747, as amended by 1985 HB 2125; implementing K.S.A. 75-2946 and 1985 HB 2133; effective May 1, 1983; amended, T-86-17, June 17, 1985; amended May 1, 1986; revoked Dec. 17, 1995.)

1-7-6. Notices relating to probationary periods and extensions. (a) Before the expiration of each employee's probationary period, a performance review shall be completed and a rating shall be assigned, and the appointing authority shall notify the employee and the director in writing of one of the following:

- (1) The employee has been dismissed or demoted.
- (2) The probationary period is being extended, if extension is permissible under the provisions of K.A.R. 1-7-4.
- (3) The employee is being given permanent status.

(b) If a probationary employee has not been notified in accordance with subsection (a) by the end of any probationary period, the employee shall be deemed to have been given permanent status. In case of dispute as to whether the employee was notified, a determination shall be made by the director. (Authorized by K.S.A. 75-3706 and K.S.A. 2008 Supp. 75-3747; implementing K.S.A. 75-2943, 75-2946, 75-3707,

and 75-3746; effective May 1, 1983; amended, T-86-17, June 17, 1985; amended May 1, 1986; amended May 1, 1987; amended Dec. 17, 1995; amended Sept. 25, 2009.)

1-7-7. Dismissal of probationary employee by director. The director may dismiss a probationary employee at any time during the employee's probationary period, after giving the employee notice and an opportunity to be heard, if the director finds that the employee was appointed as a result of a violation of the provisions of the act or these regulations. (Authorized by K.S.A. 75-3706 and K.S.A. 2008 Supp. 75-3747; implementing K.S.A. 75-2943, 75-2946, 75-3707, and 75-3746; effective May 1, 1983; amended Sept. 25, 2009.)

1-7-10. Performance reviews. (a) Each agency's appointing authority shall implement the state performance management process that was developed in accordance with L. 2008, Ch. 159, Sec. 1 and shall ensure that performance reviews are conducted in accordance with this process for each employee in the classified service. The performance review shall be used to inform employees of their expected performance outcomes and to assess the effectiveness of each employee.

(1) The performance review of each employee shall be completed by the employee's immediate supervisor or, if the employee's immediate supervisor has not supervised the employee for at least 90 days, by another qualified person designated by the appointing authority. "Qualified person" shall mean a person who is familiar with the duties and responsibilities of the employee's position and has significant knowledge of the job performance of the employee.

(2) A performance review shall be completed and a rating assigned at least annually in the manner required and on the forms prescribed by the director. An agency may add additional, job-related performance criteria and measures to the forms prescribed by the director, as determined by the appointing authority.

(3) Performance ratings for all permanent employees shall be assigned on an annual basis within the period beginning October 1 and ending December 31.

(4) Midyear reviews for all permanent employees shall be conducted on an annual basis within the period beginning April 1 and ending June 30.

(5) The appointing authority may conduct a special performance review rating for any employee

at any time, unless prohibited under K.A.R. 1-14-8 due to pending layoffs.

(6) Each employee who receives an unsatisfactory rating on either of the essential requirements set out on the form prescribed by the director shall have an overall performance review rating of unsatisfactory.

(7) Each employee shall be given the opportunity to sign the employee's performance review as evidence that the employee has been informed of the performance review rating. The employee's signature shall not abridge the employee's right of appeal if the employee disagrees with the rating. The failure of the employee to sign the performance review shall not invalidate the rating.

(b)(1) Any employee entitled to appeal a rating under K.A.R. 1-7-11 may do so within seven calendar days after being informed of the rating. After the period of seven calendar days for filing appeals has expired and if no appeal has been filed, the appointing authority or the authority's designee shall review the rating, make any changes deemed necessary, sign the performance review, place the entire original performance review in the employee's official personnel file, and provide a copy of the review to the employee. In addition, the appointing authority may provide copies to each reviewer if the appointing authority deems necessary.

(2) If the appointing authority makes any change in the rating or adds any comment on the performance review, the review shall be returned to the employee to be signed again, and the employee, if eligible to appeal the rating, shall again have seven calendar days to file an appeal to the appointing authority. The final results of the performance review shall be reported to the director.

(c) Subject to the provisions of K.S.A. 75-2949e and amendments thereto, two performance review ratings of less than meets expectations that are conducted within 180 days may be utilized as a basis for demotion, suspension, or dismissal of the employee.

(d) If the overall performance review rating assigned to a probationary employee at the end of the employee's probationary period is unsatisfactory, the employee shall not be granted permanent status.

(e) This regulation shall be effective on and after October 1, 2009. (Authorized by K.S.A. 75-2943, K.S.A. 75-3706, and K.S.A. 2008 Supp. 75-3747; implementing K.S.A. 75-2943, 75-2949e, 75-3706, and 75-3746; effective May 1, 1983;

amended May 1, 1984; amended, T-86-17, June 17, 1985; amended May 1, 1986; amended, T-1-7-27-89, July 27, 1989; amended Nov. 20, 1989; amended Dec. 17, 1995; amended June 5, 2005; amended Oct. 1, 2009.)

1-7-11. Employees entitled to appeal performance reviews. (a) Any employee who receives a performance rating that is lower than the highest possible rating may appeal that rating if the employee meets either of the following conditions:

(1) The employee has permanent status, including an employee with permanent status who is serving a probationary period due to a promotion.

(2) The employee is serving a probationary period due to a rehire on the basis of reinstatement.

(b)(1) If an action concerning the end of probationary status is dependent upon the performance review, the appeal committee may make a recommendation to the appointing authority concerning whether or not to grant permanent status to the employee. However, the appointing authority shall have the right to make the determination of whether or not to grant permanent status, subject to whatever limitations are imposed by the performance rating of the performance review prepared by the appeal committee.

(2) Notwithstanding the limits on the duration of probationary periods established elsewhere in these regulations, the appointing authority may extend the probationary period for a limited period of time as necessary to allow the appeal committee to prepare the final performance review. The total amount of time of this extension shall not exceed 60 calendar days.

(3) The appointing authority shall report to the director each extension of a probationary period made pursuant to this regulation.

(c) This regulation shall be effective on and after October 1, 2009. (Authorized by K.S.A. 75-2943, K.S.A. 75-3706, and K.S.A. 2008 Supp. 75-3747; implementing K.S.A. 75-2943, 75-2946, 75-3707, and 75-3746; effective May 1, 1983; amended, T-86-17, June 17, 1985; amended May 1, 1986; amended Dec. 17, 1995; amended Oct. 24, 1997; amended June 5, 2005; amended Oct. 1, 2009.)

1-7-12. Performance review appeal procedure. (a) (1) Each employee who is eligible to appeal a performance review under K.A.R. 1-7-11 may, within seven calendar days after the employee has been informed of the rating, submit an appeal in writing to the appointing authority.

(2) Within seven calendar days following receipt of the employee's written notice of appeal, the appointing authority shall have the option either to make any changes in the rating deemed appropriate or to appoint a committee of three or more persons to hear the appeal.

(3) If the appointing authority makes any change in the rating or adds any comments to the rating form, the rating form shall be returned to the employee to be signed again. The employee shall be informed that, if the employee disagrees with the revised performance review, the employee may, within seven calendar days, file an appeal in writing to the appointing authority. If the employee files an appeal of the revised review, the appointing authority shall, within seven calendar days following receipt of the employee's written notice of appeal, appoint a committee of three or more persons to hear the appeal.

(4) If an appeal committee is appointed to hear the appeal, persons shall be appointed who, in the appointing authority's judgment, will be fair and impartial in discharging their responsibilities. Before appointing the appeal committee, the appointing authority shall give the employee a reasonable opportunity for consultation on the matter of appointment of the appeal committee. The appeal committee shall not include the initial rater or raters. In general, the members of the appeal committee shall be officers or employees of the agency. However, the appointing authority may select one or more members of the committee from one or more other state agencies if the appointing authority determines that the objective of a fair and impartial hearing can best be served by doing so.

(b)(1) As soon as the committee has been appointed, the appointing authority shall notify the employee of the names of the members of the committee and the date, time, and place of the hearing.

(2)(A) Before the beginning of the hearing, the employee may object to any individual proposed to serve as a member of the committee in writing and shall include the reasons upon which the employee is basing the objection.

(B) The appointing authority shall make a determination either to deny the objection or to grant the objection and appoint another individual to the committee before the commencement of the hearing.

(C) The appointing authority shall inform the employee of the determination in writing.

(D) Each objection taken pursuant to this subsection and each determination regarding each

objection shall be included as part of the documentation of the appeal.

(3) The appeal committee shall consider any relevant evidence that may be offered by the employee and the rater and shall make available to the employee any evidence that the committee may secure on its own initiative. The employee and rater shall have an opportunity to question any person offering evidence to the appeal committee. The appeal committee may limit the offering of evidence that it deems to be repetitious or irrelevant.

(4) Within 14 calendar days of the date the members of the committee were appointed, the committee shall prepare and sign a rating for the employee. That rating shall be final and not subject to further appeal. The appeal committee shall give the rating to the appointing authority, who, within five calendar days, shall provide copies to the employee and each person who originally rated the employee. The appeal committee shall report the rating to the director.

(5) If the appointing authority cannot appoint an appeal committee within the prescribed seven calendar days, the employee requests an extension of the time limit, or the appeal committee cannot make its rating within 14 calendar days of the date of its appointment, the appointing authority may extend these time limits for a reasonable period of time.

(c) This regulation shall be effective on and after October 1, 2009. (Authorized by K.S.A. 75-2943, K.S.A. 75-3706, and K.S.A. 2008 Supp. 75-3747; implementing K.S.A. 75-2943, 75-3707, and 75-3746; effective May 1, 1983; amended, T-84-20, July 26, 1983; amended May 1, 1984; amended, T-86-17, June 17, 1985; amended May 1, 1986; amended Dec. 17, 1995; amended June 5, 2005; amended Oct. 1, 2009.)

1-7-13. This regulation shall be revoked on and after December 17, 1995. (Authorized by K.S.A. 75-3747, as amended by 1985 HB 2125; implementing K.S.A. 75-2943, 75-2944, and 75-2949e, as amended by 1985 HB 2133; effective May 1, 1983; amended May 1, 1984; amended, T-86-17, June 17, 1985; amended May 1, 1986; revoked Dec. 17, 1995.)

Article 8.—TRAINING AND CAREER DEVELOPMENT

1-8-1. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked May 31, 1996.)

1-8-2. Orientation. (a) Each appointing authority shall be responsible for establishing and maintaining a program of orientation for new employees.

(b) Each orientation shall be relevant to each of the following:

- (1) That agency's mission, vision, and goals;
- (2) the employee's job responsibilities;
- (3) employee benefits; and
- (4) other aspects of the workplace pertinent to successful performance in the position.

(c) Any agency may supplement the orientation information required above with specific agency materials.

(d) This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 75-2925 and 75-3746; effective May 1, 1979; amended, T-1-9-19-94, Sept. 19, 1994; amended, Nov. 21, 1994; amended June 5, 2005.)

1-8-3. Training standards. Each appointing authority shall periodically assess, identify, and provide that agency's employees with access to appropriate education and training to meet workforce development needs. This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 75-2925 and 75-3746; effective May 1, 1979; amended June 5, 2005.)

1-8-4. Agency training records. Each appointing authority shall maintain training records and provide these records to the director upon request. This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 75-2925, 75-2950, and 75-3746; effective May 1, 1979; amended June 5, 2005.)

1-8-5. This regulation shall be revoked on and after June 5, 2005. (Authorized by K.S.A. 1995 Supp. 75-3747 and K.S.A. 1995 Supp. 75-37,115; implementing K.S.A. 1995 Supp. 75-37,115; effective May 1, 1979; amended, T-1-9-19-94, Sept. 19, 1994; amended Nov. 21, 1994; amended May 31, 1996; revoked June 5, 2005.)

1-8-6. Leadership training programs. Each appointing authority shall develop and maintain a leadership program to provide supervisory training of an appropriate scope for each employee appointed to a supervisory position and for each employee currently working in a supervisory

position in the agency. Each appointing authority shall provide access to training and opportunities for continuing education and development for each employee in a supervisory position. This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 2004 Supp. 75-3747 and 75-37,115; implementing K.S.A. 75-3746 and K.S.A. 2004 Supp. 75-37,115; effective May 1, 1979; amended May 1, 1983; amended May 1, 1984; amended May 1, 1985; amended, T-1-9-19-94, Sept. 19, 1994; amended Nov. 21, 1994; amended Dec. 17, 1995; amended Oct. 1, 1999; amended June 5, 2005.)

1-8-7. (Authorized by K.S.A. 75-3747; implementing K.S.A. 75-3746; effective May 1, 1979; amended May 1, 1983; amended Aug. 3, 1992; revoked May 31, 1996.)

Article 9.—HOURS; LEAVES; EMPLOYEE-MANAGEMENT RELATIONS

1-9-1. Hours of work. (a) The standard workweek for each full-time employee shall be 40 hours during a given seven-day workweek.

(b)(1) Any agency head may submit a request for a deviation from the standard workweek in subsection (a) for particular classes of employees in writing to the director. Any such deviation shall be subject to approval by the secretary upon recommendation of the director.

(2) Appointing authorities shall not be required to designate a deviation from the standard workweek established in paragraph (1) of this subsection for exempt positions.

(c) It shall be a condition of employment with the state that each employee is required to work the number of hours per day and the number of days per workweek or work period specified for the employee's position, except when on authorized leave.

(d) Each exempt employee shall be paid on a salary basis in which the salary of the exempt employee is established to cover the hours required to complete the job. Each exempt employee shall be considered to be in pay status except for the following periods of time:

- (1) Full days of leave without pay;
- (2) full workweeks of leave without pay due to a suspension; or
- (3) one or more full days of leave without pay due to a suspension imposed in good faith for violation of workplace conduct rules or for an infraction of a safety rule of major significance.

Exempt employees may be required to use available vacation or sick leave or other paid leave, as appropriate, and shall be required to obtain authorization for absences in the form and at the time prescribed by the employee's appointing authority. Leave for employees in exempt positions shall be administered in accordance with the provisions of K.A.R. 1-9-20.

(e) The appointing authority may require each employee to work those hours that are necessary for the efficient conduct of the business of the state.

(f) This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 75-3746, 75-5505, and 75-5515; effective May 1, 1979; amended, T-86-17, June 17, 1985; amended May 1, 1986; amended Dec. 17, 1995; amended June 5, 2005.)

1-9-2. Holidays. (a) The following days shall be legal holidays for the state service: New Year's Day, Memorial Day, Independence Day, Labor Day, Veterans' Day, Thanksgiving Day, and Christmas Day. When one of these legal holidays falls on a Saturday, the preceding Friday shall be the officially observed holiday for state employees. When one of these legal holidays falls on a Sunday, the following Monday shall be the officially observed holiday for state employees.

(b)(1) The governor may designate, in a particular year, additional days on which state offices are to be closed in observance of a holiday or a holiday season. For the purpose of this regulation, such a day shall be deemed a legal holiday.

(2) Each full-time employee who works a non-standard workweek shall receive the same number of holidays in a calendar year as employees whose regular work schedule is Monday through Friday.

(3) The governor may designate a discretionary holiday for observance of a holiday or other special day without closing state services. Each eligible employee shall receive the number of hours equal to the number of hours that employee is regularly scheduled to work, for a discretionary holiday. All hours for a discretionary holiday shall be taken on the same day.

(c)(1) For each holiday, each full-time employee shall receive holiday credit equal to the number of hours regularly scheduled to work, subject to the provisions of paragraph (b)(2). "Holiday credit" means pay or credit for paid time off at a straight-time rate.

(2) Each full-time employee who is required to work on a legal holiday or on an officially observed

holiday shall be awarded holiday credit in addition to any holiday compensation available under subsection (d). The appointing authority shall determine whether the holiday credit will be in the form of pay or paid time off to be used at a later time.

(d) Any appointing authority may require some or all employees to work on a legal holiday, an officially observed holiday, or both.

(1) Each full-time, nonexempt employee who is required to work on a legal holiday or on an officially observed holiday shall receive holiday compensation in addition to the employee's regular pay for the pay period. "Holiday compensation" means either pay or holiday compensatory time at a time-and-a-half rate for those hours worked on a holiday. The appointing authority shall determine whether the compensation for this holiday work will be in the form of pay or holiday compensatory time.

(2) The appointing authority shall make the following determinations for each exempt employee required to work on a holiday:

(A) Under what conditions the employee will be required to work;

(B) whether or not the employee will receive holiday pay or holiday compensatory time in addition to the employee's regular salary; and

(C) the rate at which any holiday pay or holiday compensatory time will be paid.

(3) Exempt employees shall take holiday compensatory time only in either half-day or full-day increments.

(e) Hours worked on a holiday by a nonexempt employee that result in overtime hours during that workweek or work period shall be compensated pursuant to K.A.R. 1-5-24 for those holiday hours worked on the holiday and at an additional half-time rate for the resulting overtime hours.

(f) If a legal holiday is preceded or followed by an officially observed holiday, each employee shall receive holiday credit for only one of the two days. Each full-time employee who is required to work on both the legal holiday and the officially observed holiday shall receive holiday compensation for only one of the two days. If the number of hours worked on the two days is not the same, the employee shall receive holiday compensation for the day on which the employee worked the greater number of hours.

(g) Each nonexempt employee who works less than full-time on a regular schedule shall receive, for each holiday that falls on a day included in the employee's regular work schedule, holiday credit equal to the time the employee is regularly sched-

uled to work on that day. If the employee works on the holiday, the employee shall receive, in addition, holiday compensation for the hours worked on the holiday.

(h) Each nonexempt employee who works less than full-time on an irregular schedule, as determined by the appointing authority, shall not receive holiday credit but shall be paid at the time-and-a-half rate for those hours worked on the holiday.

(i) An employee who is on leave without pay for any amount of time either on the last working day before a holiday or the first working day following a holiday shall not receive holiday credit, unless approved by the appointing authority.

(j) Any employee whose last day at work before separating from state service is the day before a regularly scheduled holiday shall not receive holiday credit for the holiday.

(k) This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 75-3706 and K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 75-3707 and 75-3746; effective May 1, 1979; amended May 1, 1985; amended Dec. 17, 1995; amended June 20, 1997; amended Oct. 1, 1999; amended June 5, 2005.)

1-9-3. Request and approval of leave; authorized leave; unauthorized leave. (a) Requests for leave shall be made to the appointing authority in such form and at such time as prescribed by the appointing authority. Leave that is requested as above, and approved, shall be termed authorized leave. Leave that is not requested as above, or not approved, shall be termed unauthorized leave, unless the employee furnishes the appointing authority evidence satisfactory to the appointing authority that circumstances made it impossible to request leave in the form and at such time as prescribed by the appointing authority.

(b) Use of unauthorized leave shall be entered into the employee's official personnel file in the agency. Habitual or flagrant use of unauthorized leave shall be grounds for disciplinary action, including dismissal.

(c) When an employee takes unauthorized leave, the appointing authority shall determine whether use of accumulated leave or accumulated compensatory time shall be allowed, whether leave without pay shall be granted, or in a case of habitual or flagrant use of unauthorized leave, whether a pay decrease, suspension, demotion, dismissal, or other disciplinary action shall be proposed or taken. This

regulation shall be effective on and after December 17, 1995. (Authorized by K.S.A. 1994 Supp. 75-3747; implementing K.S.A. 75-3746; effective May 1, 1979; amended Dec. 17, 1995.)

1-9-4. Vacation leave. (a)(1) Each classified employee in a regular position shall be entitled to vacation with pay, which shall be earned and accumulated in accordance with this regulation. Vacation leave earned each payroll period, the maximum amount of vacation leave that may be accumulated, and the increments in which vacation leave may be used shall be determined as follows.

(A) Each nonexempt employee shall accrue vacation leave in accordance with the following table.

**Vacation Leave Table for
Nonexempt Employees
Hours Earned Per Pay Period
Based on Length of Service**

Hours in Pay Status Per Pay Period	Less Than 5 Years	5 Years & Less Than 10 Years	10 Years & Less than 15 Years	15 Years & Over
0-7	0.0	0.0	0.0	0.0
8-15	0.4	0.5	0.6	0.7
16-23	0.8	1.0	1.2	1.4
24-31	1.2	1.5	1.8	2.1
32-39	1.6	2.0	2.4	2.8
40-47	2.0	2.5	3.0	3.5
48-55	2.4	3.0	3.6	4.2
56-63	2.8	3.5	4.2	4.9
64-71	3.2	4.0	4.8	5.6
72-79	3.6	4.5	5.4	6.3
80-	3.7	4.7	5.6	6.5
Maximum Accumulation of Hours	144.0	176.0	208.0	240.0

(i) Nonexempt employees shall use vacation leave only in increments of a quarter of an hour.

(ii) For purposes of this regulation, hours in pay status shall include time off while receiving workers compensation wage replacement for loss of work time.

(B) Each exempt employee in a position that is eligible for benefits shall accrue vacation leave in accordance with the following table.

**Vacation Leave Table for
Exempt Employees
Hours Earned Per Pay Period
Based on Length of Service**

Time in Pay Status Per Pay Period	Less Than 5 Years	5 Years & Less Than 10 Years	10 Years & Less than 15 Years	15 Years & Over
0	0.0	0.0	0.0	0.0
> 0	3.7	4.7	5.6	6.5
Maximum Accumulation of Hours	144.0	176.0	208.0	240.0

(i) Exempt employees, including part-time, exempt employees, shall use vacation leave only in either half-day or full-day increments.

(ii) For purposes of this regulation, hours in pay status shall include time off while receiving workers compensation wage replacement for loss of work time.

(C) Each exempt employee in a position that is not eligible for benefits shall earn one-half the amount of leave set out in paragraph (a)(1)(B), based on the employee's length of service.

(2) At the end of the last payroll period paid in each fiscal year, up to 40 hours of any accrued vacation leave that exceeds an employee's maximum accumulation of hours established in paragraphs (a)(1)(A) and (B) shall be converted to sick leave. After this conversion, all remaining vacation leave over the maximum accumulation of hours shall be forfeited at the end of the last payroll period paid in that fiscal year.

(3) If an employee terminates from the service, and if at the time of termination, the employee has more than the maximum accumulation of vacation leave permitted in paragraphs (a)(1)(A) and (B), the employee shall not be paid for any vacation leave in excess of the maximum accumulation to which that employee is entitled.

(b) Increased rates of vacation leave earnings based on length of service shall be calculated in accordance with K.A.R. 1-2-46.

(c) The appointing authority shall not be arbitrary in approving or rejecting vacation leave requests. The appointing authority shall not unreasonably defer the taking of vacations so that for all practical purposes the employee is deprived of vacation rights.

(d) Vacation leave earned by an employee during a pay period shall be available for use on the first day of the following pay period. Subject to the restrictions established in paragraph (a)(3), if the employee resigns or is otherwise separated from the service, any vacation leave earned in the pay period in which the separation occurs shall be credited to the employee, and payment for that leave shall be made to the employee as provided in K.A.R. 1-9-13.

(e) If a holiday on which state offices are closed occurs during an employee's vacation, the holiday hours shall not be charged against the employee's vacation leave.

(f) If an employee, or a member of the employee's family as defined in K.A.R. 1-9-5(e)(2), becomes ill while the employee is taking vacation

leave and, for all intents and purposes, the employee is deprived of all or a significant portion of the vacation due to the illness, the appointing authority, upon request of the employee, may charge to sick leave some or all of the time the employee or family member was ill during the vacation. For purposes of this subsection, "illness" shall include any of the reasons for sick leave identified in K.A.R. 1-9-5(e)(1).

(g) Vacation leave for school employees. Any classified employee in a school institution having scheduled vacation periods at stated times when school is not in session, including Thanksgiving and Christmas, who does not work during the scheduled vacation periods because the employee's services are not required may be granted leave without pay or vacation leave for those periods. Vacation leave taken for this purpose may be charged against accrued vacation leave or against vacation leave that will be accrued during the school term for which the employee is employed. Any classified employee at a school institution that is separated from the service before the end of the school term for which the employee is employed shall be charged on the final pay voucher for any vacation leave used in excess of accrued vacation leave. (Authorized by K.S.A. 2003 Supp. 75-3747; implementing K.S.A. 75-3746; effective May 1, 1979; amended, E-81-23, Aug. 27, 1980; amended May 1, 1981; amended May 1, 1983; amended May 1, 1984; amended May 1, 1985; amended Jan. 6, 1992; amended Aug. 3, 1992; amended Dec. 17, 1995; amended June 7, 2002; amended June 4, 2004.)

1-9-5. Sick leave. (a) Each classified employee in a regular position shall be credited and accumulate sick leave as provided in this regulation.

(b) The maximum sick leave credit an employee may accrue in any payroll period shall be 3.7 hours. The amount of sick leave hours earned each payroll period and the increments in which sick leave may be used shall be determined as follows.

(1) Each non-exempt employee shall accrue sick leave in accordance with the following table.

Sick Leave Table for Non-Exempt Employees

Hours in Pay Status Per Pay Period	Hours Earned Per Pay Period
0-7	0.0
8-15	0.4
16-23	0.8
24-31	1.2

Hours in Pay Status Per Pay Period	Hours Earned Per Pay Period
32-39	1.6
40-47	2.0
48-55	2.4
56-63	2.8
64-71	3.2
72-79	3.6
80-	3.7

(A) Non-exempt employees shall use sick leave only in increments of a quarter of an hour.

(B) For purposes of this regulation, hours in pay status shall include time off while receiving workers compensation wage replacement for loss of work time.

(2) Each exempt employee in a position that is eligible for benefits shall accrue sick leave in accordance with the following table.

Sick Leave Table for Exempt Employees

Time in Pay Status Per Pay Period	Hours Earned Per Pay Period
0	0.0
> 0	3.7

(A) Exempt employees, including part-time exempt employees, shall use sick leave only in half-day or full-day increments.

(B) For purposes of this regulation, hours in pay status shall include time off while receiving workers compensation wage replacement for loss of work time.

(3) Each exempt employee in a position that is not eligible for benefits shall earn one-half the amount of leave set out in paragraph (b) (2).

(c) Sick leave earned by an employee during a pay period shall be available for use on the first day of the following pay period.

(d) Any employee may be required by the appointing authority or the director of personnel services to provide evidence necessary to establish that the employee is entitled to use sick leave under the circumstances of the request. If the employee fails to provide this evidence, the requested use of sick leave may be denied by the appointing authority or director. The appointing authority, with the director's approval, may require an examination of an employee by a licensed health care or mental health care professional ultimately responsible for patients' health care, as designated by the agency and at the agency's expense. An appointing authority with delegated authority under K.S.A. 75-2938, and amendments thereto, shall

not be required to obtain the director's approval before requiring an examination of an employee.

(e)(1) Sick leave with pay shall be granted only for the following reasons:

(A) Illness or disability of the employee, including pregnancy, childbirth, miscarriage, abortion, and recovery therefrom, and personal appointments with a physician, dentist, or other recognized health practitioner;

(B) illness or disability, including pregnancy, childbirth, miscarriage, abortion, and recovery therefrom, of a family member, and a family member's personal appointments with a physician, dentist, or other recognized health practitioner, when the illness, disability, or appointment reasonably requires the employee to be absent from work;

(C) legal quarantine of the employee; or

(D) the adoption of a child by an employee or initial placement of a foster child in the home of an employee, when the adoption or initial placement reasonably requires the employee to be absent from work.

(2) For purposes of this regulation, "family member" means the following:

(A) Any person related to the employee by blood, marriage, or adoption; and

(B) any minor residing in the employee's residence as a result of court proceedings pursuant to the Kansas code for care of children or the Kansas juvenile offenders code.

(f) If an appointing authority has evidence that an employee cannot perform the employee's duties because of illness or disability, if the employee has accumulated sick leave, and if the employee refuses or fails to apply for sick leave, the appointing authority may require the employee to use sick leave. Upon exhaustion of this employee's sick leave, the appointing authority may require the employee to use any accumulated vacation leave. An appointing authority may request a written release by a licensed health care or mental health care professional ultimately responsible for patients' health care before the employee is allowed to return to work. If the employee has exhausted all sick leave or accumulated vacation leave, the appointing authority may grant the employee leave without pay as provided in K.A.R. 1-9-6(c).

(g) Each employee who is injured on the job and awarded workers compensation shall be granted use of accumulated leave upon the employee's request. The compensation for accumulated leave used each payroll period shall be that amount which, together with workers compen-

sation, equals the regular pay for the employee. Unless the employee requests otherwise, vacation leave and compensatory time credits shall be used only after sick leave credits have been exhausted. The appointing authority shall not require the use of accumulated compensatory time credits in conjunction with workers compensation.

(h) Each former employee who had unused sick leave at the time of separation and who returns to state service in a regular position within a year shall have the unused sick leave returned to the employee's credit. This provision shall not apply to a person who has retired from state service.

(i) Payments for sick leave accumulated by the date of retirement, in accordance with K.S.A. 75-5517, and amendments thereto, shall be calculated using the hourly or salary rates set forth in K.A.R. 1-5-21. (Authorized by K.S.A. 2001 Supp. 75-3747; implementing K.S.A. 75-3707 and 75-3746; effective May 1, 1979; amended, E-81-23, Aug. 27, 1980; amended May 1, 1981; amended May 1, 1983; amended May 1, 1984; amended May 1, 1985; amended Sept. 26, 1988; amended July 16, 1990; amended Jan. 6, 1992; amended Aug. 3, 1992; amended July 26, 1993; amended Dec. 17, 1995; amended June 7, 2002.)

1-9-5a. Limits on state leave payment reserve fund payouts. (a) The amount of payout from the state leave payment reserve fund for accumulated vacation leave for any employee separating from state service due to retirement shall be limited to the accumulated hour limits specified in K.A.R. 1-9-4.

(b) The amount of payout from the state leave payment reserve fund for accumulated sick leave upon any employee's retirement shall be limited to the accumulated hour limits specified in K.S.A. 75-5517, and amendments thereto. (Authorized by K.S.A. 75-5545; implementing K.S.A. 75-5517, K.S.A. 2010 Supp. 75-5543, and K.S.A. 75-5544; effective, T-1-6-30-11, June 30, 2011; effective Oct. 28, 2011.)

1-9-6. Leave without pay. (a) The appointing authority shall determine whether approval of each request for leave without pay is for the good of the service, and shall approve or disapprove the request. The appointing authority may require use of accumulated vacation leave and accumulated sick leave before approval of leave without pay.

(b) Any new hire in a regular position without permanent status may be granted leave without pay for a period not to exceed 60 calendar days:

(1) for illness or disability, including pregnancy, childbirth, miscarriage, abortion and recovery therefrom;

(2) for the adoption of a child by the employee;

(3) for the initial placement of a foster child in the home of the employee;

(4) in order to care for a family member who has a serious health condition; or

(5) for other good and sufficient reason, when the appointing authority deems leave to be in the best interest of the service.

When an appointing authority determines that granting a longer leave of absence without pay than prescribed in this subsection is in the best interest of the service, the appointing authority may approve a longer leave, or an extension of a leave. The total duration of the leave shall not exceed six months. Any leave granted under this subsection that exceeds 30 calendar days shall be reported to the director of personnel services.

(c) Any employee currently without permanent status as a result of a promotion or reinstatement may be granted leave without pay under the same conditions as an employee with permanent status, if the employee had permanent status in the class in which the employee was employed immediately prior to the promotion or reinstatement.

(d) Any employee with permanent status may be granted leave without pay for a reasonable period of time consistent with the effective fulfillment of the agency's duties, but not to exceed one year:

(1) for illness or disability, including pregnancy, childbirth, miscarriage, abortion and recovery therefrom;

(2) for the adoption of a child by the employee;

(3) for the initial placement of a foster child in the home of the employee;

(4) in order to care for a family member who has a serious health condition; or

(5) for other good and sufficient reason, when the appointing authority deems such leave to be in the best interest of the service. Any leave that exceeds 30 calendar days shall be reported to the director of personnel services.

(e) Any employee with permanent status may be granted leave of absence without pay from the employee's classified position to enable the employee to take a position in the unclassified service, if the granting of this leave is considered by the appointing authority to be in the best interest of the service. Leave for this purpose shall not exceed one year, but the appointing authority may grant one or more extensions of up to one year,

and the appointing authority may determine the number of extensions.

(f) Desire of an employee to accept employment not in the state service shall be considered by the appointing authority as insufficient reason for approval of a leave of absence without pay, except under unusual circumstances.

(g) If the interests of the service make it necessary, the appointing authority may terminate a leave of absence without pay by giving written notice to the employee at least two weeks prior to the termination date. With the approval of the appointing authority, an employee may return from leave on an earlier date than originally scheduled.

(h) When an employee returns at the expiration of an approved leave without pay or upon notice by the appointing authority that a leave without pay has been terminated, the employee shall be returned to a position in the same class as the position which the employee held at the time the leave was granted, or in another class in the same pay grade for which the employee meets the qualifications.

(i) Failure to return to work at the expiration of an authorized leave of absence, or upon notice by the appointing authority that a leave has been terminated, shall be deemed a resignation. Such resignation shall be reported by the appointing authority to the director of personnel services in the manner provided by the director. Before terminating an employee for failure to return from leave, the appointing authority shall make a reasonable effort to contact the employee, and a summary of the steps taken to try to contact the employee shall be submitted to the director of personnel services with the resignation.

(j) As used in this regulation, the term "family member" shall have the meaning set out in K.A.R. 1-9-5(e)(2). This regulation shall be effective on and after December 17, 1995. (Authorized by K.S.A. 1994 Supp. 75-3747; implementing K.S.A. 75-2947, as amended by 1995 SB 175, § 11; effective May 1, 1979; amended, E-81-14, June 12, 1980; amended May 1, 1981; amended May 1, 1983; amended, T-88-9, April 21, 1987; amended, T-89-1, May 1, 1988; amended Oct. 1, 1988; amended Dec. 27, 1993; amended Dec. 17, 1995.)

1-9-7. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked May 1, 1985.)

1-9-7a. Military leave; voluntary or involuntary service in the Armed Forces. (a) Subject to the additional requirements and limitations

of Title 38, U.S. Code, Chapter 43, each employee in a regular position, who enlists or is drafted into the armed forces of the United States, including reservists and members of the national guard who are activated to military duty, shall be granted military leave without pay upon the employee's notice to the appointing authority of a military order requiring active duty for other than training purposes. The appointing authority shall require the employee to provide, within a reasonable period of time, documentation to substantiate the military order for active duty.

Any person on military leave, as mentioned above, who applies to the appointing authority for permission to return to the classified service within 90 days after receiving a discharge from the military service under honorable conditions, or from hospitalization, shall:

(1) be restored to that position or to a similar position with like status and pay in the same geographic location, as determined pursuant to K.A.R. 1-5-11;

(2) if qualified to perform the duties of any other position, be offered employment in the same geographic location in a position comparable in status and pay to the former position; or

(3) appeal to the secretary of administration for appropriate placement.

(b) Military leave shall be counted as part of the employee's length of service as prescribed in K.A.R. 1-2-46. Sick leave, vacation leave, and holidays shall not be earned or accrued during a period of military leave without pay.

(c) Reenlistment or continuation of active duty beyond the time prescribed by Title 38, U.S. Code, Chapter 43, shall be considered a voluntary resignation from military leave status. This regulation shall be effective on and after December 17, 1995. (Authorized by K.S.A. 1994 Supp. 75-3747; implementing K.S.A. 77-3746; effective May 1, 1985; amended, T-1-3-14-91, March 14, 1991; amended July 8, 1991; amended Dec. 17, 1995.)

1-9-7b. Military leave; voluntary or involuntary service with reserve component of the armed forces. (a)(1) Each employee in a classified or unclassified position that is eligible for benefits who is a member of a reserve component of the military service of the United States shall be granted a maximum of 30 working days of military leave with pay for required military duty within each 12-month period beginning October 1 and ending September 30 of the following year.

(2) For the purpose of this regulation, “required military duty” shall mean any period of active duty, inactive duty, or full-time national guard duty, or any other appropriate duty status as determined by the director, that is required of the employee.

(b) Required military duty in excess of 30 working days within the 12-month period specified in subsection (a) shall be charged to military leave without pay or, at the employee’s request, to appropriate accrued leave.

(c) Each request for military leave shall be submitted to the appointing authority with as much notice as possible under the circumstances of the required military duty. Whenever possible, an appropriate military order or duty document shall be received by the appointing authority before military leave is authorized.

(d) Each employee in a classified or unclassified position that is eligible for benefits shall be granted military leave without pay or, at the employee’s request, appropriate accrued leave for the purpose of induction, entrance, or examination for entrance into a reserve component. Notice to the appointing authority shall be provided as prescribed by the appointing authority. Upon completion of the induction, entrance, or examination, the employee shall return to state employment as prescribed in subsection (f).

(e) Upon release from a period of service under subsection (a), (b), or (d) or upon discharge from hospitalization for or convalescence from an illness or injury incurred in or aggravated during the service, each employee shall be permitted to return to one of the following positions:

(1) The position in which the employee would have been employed if the employee had not been absent; or

(2) a position with status and pay similar to the status and pay that the employee would have had if the employee had not been absent for those purposes. If the employee is not qualified to perform the duties of the position by reason of disability sustained while absent in accordance with this regulation but is qualified to perform the duties of any other position, the employee shall be offered employment in a position comparable to the former position, in status and pay.

(f)(1) Except as provided in paragraph (f)(2), when returning from periods of required military duty or upon completion of the induction, entrance, or examination for entrance into a reserve component, the employee shall report for work as follows:

Period of Absence (in consecutive days)	Return to Work Following Release From a Period of Service
1-30	First full, regularly scheduled day after release
31-180	Within 14 days of release
181+	Within 90 days of release

(2) The time periods specified in paragraph (f)(1) may be extended to no more than two years from the date of release from a period of service to accommodate a period of hospitalization or convalescence resulting from a service-connected injury or illness. To the extent practicable, the employee shall inform the appointing authority of any change in the date on which the employee is anticipated to return to work. The appointing authority may request documentation from the employee’s commanding officer or the employee’s licensed health or mental health care provider of the date on which the employee is released from a period of service and of the reasons the employee will not be able to return to work following the employee’s release from a period of service.

(g) Military leave shall be counted as part of the employee’s length of service as prescribed in K.A.R. 1-2-46. Sick leave, vacation leave, and holiday credit shall not be earned or accrued during a period of required military duty when military leave without pay has been granted.

(h) For purposes of this regulation, each reference to the military reserve of the United States shall be considered to include members of the national guard. (Authorized by K.S.A. 75-3706 and K.S.A. 2016 Supp. 75-3747; implementing K.S.A. 75-3707 and 75-3746; effective May 1, 1985; amended Dec. 17, 1995; amended, T-1-10-1-97, Oct. 1, 1997; amended, T-1-11-5-99, Nov. 5, 1999; amended Dec. 27, 2002; amended Oct. 1, 2006; amended Oct. 6, 2017.)

1-9-7c. Military leave; state duty with Kansas national guard or state guard when organized.

(a) Each employee in a regular position who is a member of the state or Kansas national guard shall be granted military leave with pay for the duration of any official call to state emergency duty.

(b) The appointing authority may grant military leave without pay or, at the employee’s request, accrued vacation leave for the duration of any other type of state duty performed pursuant to K.S.A. 48-225.

(c) Each employee shall provide an appropriate state military order to the appointing authority before the processing of any pay reports or time and attendance reports, or both.

(d) In accordance with K.S.A. 1996 Supp. 48-517, each employee in a regular position who is called or ordered to active duty by the state of Kansas national guard shall be returned to a job that is comparable to the job that the employee held at the time the employee was called to duty. (Authorized by K.S.A. 1996 Supp. 75-3747; implementing K.S.A. 75-3746; effective May 1, 1985; amended Dec. 17, 1995; amended June 20, 1997.)

1-9-8. Jury duty; other required appearance before a court or other public body. (a)(1)

Each employee in a regular position, shall be granted leave with pay by their appointing authority:

(A) for required jury duty; or

(B) in order to comply with a subpoena as a witness before the civil service board, the Kansas commission on civil rights, the United States equal employment opportunity commission, or a court.

(2) An employee shall not be entitled to leave of absence with pay in circumstances where the employee is called as a witness on the employee's own behalf in an action in which the employee is a party.

(b) Leave with pay may be granted to any employee for an appearance before a court, a legislative committee or other public body, if the appointing authority considers the granting of leave with pay to be in the best interest of the state.

(c) When any employee travels in a state vehicle for a required appearance before a court, or a legislative committee, or other public body, the employee shall turn over to the state any mileage expense payments received.

(d) Each employee granted leave under this section who receives pay or fees for a required appearance, excluding jury duty, shall turn over to the state the pay or fees in excess of \$50.00. The employee may retain any amount paid to the employee for expenses in traveling to and from the place of the jury duty or required appearance, except as provided in subsection (c) of this regulation. This regulation shall be effective on and after December 17, 1995. (Authorized by K.S.A. 1994 Supp. 75-3747; implementing K.S.A. 75-3746; effective May 1, 1979; amended May 1, 1982; amended May 1, 1983; amended May 1, 1984; amended, T-86-17, June 17, 1985; effective May 1, 1986; amended, T-87-17, July 1, 1986; amend-

ed May 1, 1987; amended, T-89-1, May 1, 1988; amended Oct. 1, 1988; amended Dec. 17, 1995.)

1-9-9. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked May 31, 1996.)

1-9-10. (Authorized by K.S.A. 75-3747; implementing K.S.A. 75-3746; effective May 1, 1979; amended, E-82-14, July 1, 1981; amended May 1, 1982; revoked May 1, 1985.)

1-9-11. (Authorized by K.S.A. 75-3747; implementing K.S.A. 75-3746; effective May 1, 1979; amended, E-82-14, July 1, 1981; amended May 1, 1982; revoked May 1, 1985.)

1-9-12. Funeral or death leave. An appointing authority may grant leave with pay to an employee in a regular position upon the death of a close relative. Such leave shall in no case exceed six working days. The employee's relationship to the deceased and necessary travel time shall be among the factors considered in determining whether to grant funeral or death leave, and if so, the amount of leave to be granted. This regulation shall be effective on and after December 17, 1995. (Authorized by K.S.A. 1994 Supp. 75-3747; implementing K.S.A. 75-3746; effective May 1, 1979; amended May 1, 1981; amended Dec. 17, 1995.)

1-9-13. Payment for accumulated vacation leave, compensatory time, and holiday compensatory time upon separation. Each employee who separates from state service shall be paid for that employee's accumulated vacation leave, compensatory time, and holiday compensatory time. Pay for an employee's vacation leave, compensatory time, and holiday compensatory time shall be calculated using the appropriate hourly or salary rate set forth in K.A.R. 1-5-21 and, with respect to non-exempt employees, the provisions of K.A.R. 1-5-24(e)(4). Pay for the vacation leave, compensatory time, and holiday compensatory time shall be a lump sum addition to the employee's last paycheck. This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 75-3706, K.S.A. 2004 Supp. 75-3747, and K.S.A. 75-5514; implementing K.S.A. 75-3707, 75-3746, and 75-5508; effective May 1, 1979; amended May 1, 1984; amended May 1, 1985; amended, T-86-36, Dec. 11, 1985; amended, T-87-11, May 1, 1986; amended May 1, 1987; amended Feb. 1, 1993; amended Dec. 27, 1993; amended Dec. 17, 1995; amended June 20, 1997; amended June 5, 2005.)

1-9-14. Transfer of leave credits. When an employee is appointed to a position in a different state agency, all types of leave for which the employee has a balance at the time of the appointment, except for compensatory time credits and holiday compensatory time credits, shall be transferred with the employee. All accumulated compensatory time and holiday compensatory time shall be paid by the agency from which the employee is leaving at the time the employee leaves that agency. The accumulated compensatory time and holiday compensatory time shall be paid as a lump sum addition to the employee's last paycheck from that agency as provided in K.A.R. 1-9-13. However, upon request, an employee may transfer accumulated compensatory time and holiday compensatory time if approved by both the agency from which the employee is leaving and the agency to which the employee is going. This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 75-3706, K.S.A. 2004 Supp. 75-3747, and K.S.A. 75-5514; implementing K.S.A. 75-3707, K.S.A. 2004 Supp. 75-3747, and K.S.A. 75-5508; effective May 1, 1979; amended, T-1-9-13-99, Sept. 13, 1999; amended June 5, 2005.)

1-9-15. (Authorized by K.S.A. 75-3747; effective May 1, 1979; amended Dec. 17, 1995; revoked May 31, 1996.)

1-9-16. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked May 31, 1996.)

1-9-17. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked June 20, 1997.)

1-9-18. (Authorized by K.S.A. 1994 Supp. 75-3747; implementing K.S.A. 75-3746, K.S.A. 75-2925, as amended by 1995 SB 175, § 2, and K.S.A. 75-2938, as amended by 1995 SB 175, § 4; effective May 1, 1979; amended Aug. 3, 1992; amended Dec. 17, 1995; revoked Jan. 12, 2007.)

1-9-19. Relief from duty or change of duties of a permanent employee. (a) Under any of the circumstances identified in K.S.A. 75-2949(i), and amendments thereto, any appointing authority may relieve an employee from duty and place the employee on administrative leave or change the duties of the employee, pursuant to the provisions of subsections (b) and (c).

(b) If the duties of an employee are changed, the appointing authority shall notify the employee in writing of the date the duties are to be changed, the manner in which the duties are to be changed,

the reason for the change, and the expected date for resumption of regular duties or other disposition of the matter. The appointing authority shall report any change in duties that lasts more than 30 days to the director.

(c) If an employee is relieved of all duties and placed on administrative leave, the appointing authority shall notify the employee, in writing and within seven calendar days of the date the employee was relieved from duty with pay, of the reasons for that action and either of the following:

(1) The approximate length of time that the employee is to be relieved of duties and the date by which a determination in the matter is expected; or

(2) the date on which a determination in the matter was made and either the date on which the employee is to be returned to duty or the date on which any other disposition of the matter that has been decided upon by the appointing authority is to be implemented.

(d) This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 2004 Supp. 75-2949, K.S.A. 75-3706, and K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 2004 Supp. 75-2949, K.S.A. 75-3707, and 75-3746; effective May 1, 1979; amended June 5, 2005.)

1-9-19a. Drug screening test for certain employees. (a) Any employee holding one of the following positions may be required to submit to a drug screening test in accordance with K.S.A. 75-4362, and amendments thereto, based upon reasonable suspicion of illegal drug use by that employee:

(1) Any safety-sensitive position;

(2) any position in an institution of mental health, as defined in K.S.A. 76-12a01, and amendments thereto, that is not a safety-sensitive position;

(3) any position in the Kansas state school for the blind, as established under K.S.A. 76-1101 *et seq.*, and amendments thereto;

(4) any position in the Kansas state school for the deaf, as established under K.S.A. 76-1001 *et seq.*, and amendments thereto; and

(5) any employee of a state veteran's home operated by the Kansas commission on veteran's affairs, as described in K.S.A. 76-1901 *et seq.* and K.S.A. 76-1951 *et seq.*, and amendments thereto. (b)(1) "Safety-sensitive position" shall be defined as provided by K.S.A. 75-4362(g), and amendments thereto.

(2) "Reasonable suspicion" means a judgment, supported by specific, contemporaneous, artic-

unable facts or plausible inferences, that is made regarding the employee's behavior, appearance, or speech or supported by evidence found or reported that indicates drug use by the employee. Reasonable suspicion may be based on one or more of the following:

(A) An on-the-job accident or occurrence in which there is evidence to indicate any of the following:

(i) The accident or occurrence was in whole or in part the result of the employee's actions or inactions;

(ii) the employee exhibited behavior or in other ways demonstrated that the employee may have been using drugs or may have been under the influence of drugs; or

(iii) a combination of the factors specified in paragraphs (b)(2)(A)(i) and (ii) is present;

(B) an on-the-job incident that could be attributable to drug use by the employee, including a medical emergency;

(C) direct observation of behavior exhibited by the employee that could render the employee unable to perform the employee's job, in whole or part, or that could pose a threat to safety or health;

(D) information that has been verified by a person with the authority to determine reasonable suspicion and that indicates either of the following:

(i) The employee could be using drugs or is under the influence of drugs, and this circumstance is affecting on-the-job performance; or

(ii) the employee exhibits behavior that could render the employee unable to perform the employee's job or could pose a threat to safety or health;

(E) physical, on-the-job evidence of drug use by the employee or possession of drug paraphernalia;

(F) documented deterioration in the employee's job performance that could be attributable to drug use by the employee; and

(G) any other circumstance providing an articulable basis for reasonable suspicion.

(c) Any appointing authority may ask any employee in a position specified in subsection (a) to submit to a drug screening test under the circumstances of reasonable suspicion as a condition of employment. Refusal to comply with this requirement shall be considered the equivalent of receiving a confirmed positive result for referral or disciplinary purposes.

(d) Each employee required to submit to a drug screening test shall be notified of that requirement in writing and shall be advised of all of the following aspects of the drug screening program:

(1) The methods of drug screening that may be used;

(2) the substances that can be identified;

(3) the consequences of a refusal to submit to a drug screening test or a confirmed positive result; and

(4) the reasonable efforts to maintain the confidentiality of results and any medical information that are to be provided in accordance with subsection (k).

(e) Drug screening tests may screen for any substances listed in the Kansas controlled substances act.

(f) Any employee who has reason to believe that technical standards were not followed in deriving the employee's confirmed positive result may appeal the result in writing to the director within 14 calendar days of receiving written notice of the result.

(g) A retest by the original or a different laboratory on the same or a new specimen may be authorized by the director, if the director determines that the technical standards established for test methods or chain-of-custody procedures were violated in deriving a confirmed positive result or has other appropriate cause to warrant a retest.

(h) An employee who receives a confirmed positive drug screen result shall be subject to dismissal in accordance with K.S.A. 75-2949d and K.S.A. 75-4362, and amendments thereto as follows:

(1) Except as provided in paragraph (2) of this subsection, the employee shall not be subject to dismissal solely on the basis of the confirmed positive result if the employee has not previously had a confirmed positive result or the equivalent and the employee successfully completes an appropriate and approved drug assessment and recommended education or treatment program.

(2) The employee shall be subject to dismissal if the employee is a temporary employee, is in trainee status, or is on probationary status at the time the employee is given written notice of the drug screen requirement.

(3) The employee shall be subject to dismissal in accordance with K.S.A. 75-2949f, and amendments thereto, if the employee fails to successfully complete an appropriate and approved drug assessment and recommended education and treatment program.

(4) The employee shall be subject to dismissal, in accordance with K.S.A. 75-2949f, and amendments thereto, if the employee has previously had a confirmed positive result or the equivalent.

(5) This regulation shall not preclude the appointing authority from proposing disciplinary action in accordance with K.S.A. 75-2949d, and amendments thereto, for other circumstances that occur in addition to a confirmed positive result and that are normally grounds for discipline.

(i) Each employee who intentionally tampers with a sample provided for drug screening, violates the chain-of-custody or identification procedures, or falsifies a test result shall be subject to dismissal pursuant to K.S.A. 75-2949f, and amendments thereto.

(j) If the result of a drug screening test warrants disciplinary action, an employee with permanent status shall be afforded due process in accordance with K.S.A. 75-2949, and amendments thereto, before any final action is taken.

(k)(1) All individual results and medical information shall be considered confidential and, in accordance with K.S.A. 75-4362, and amendments thereto, shall not be disclosed publicly. Each employee shall be granted access to the employee's information upon written request to the director.

(2) Drug screening test results shall not be required to be kept confidential in civil service board hearings regarding disciplinary action based on or relating to the results or consequences of a drug screen test.

(3) Each appointing authority shall be responsible for maintaining strict security and confidentiality of drug screening records in that agency. Access to these records shall be restricted to the agency's personnel officer or a designee, persons in the supervisory chain of command, the agency's legal counsel, the agency's appointing authority, the secretary of administration or a designee, the department of administration's legal counsel, and the director or a designee. Further access to these records shall not be authorized without the express consent of the director.

(l) This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 75-3706, K.S.A. 2004 Supp. 75-3747, and K.S.A. 2004 Supp. 75-4362; implementing K.S.A. 2004 Supp. 75-2949, K.S.A. 75-2949f, 75-3707, and K.S.A. 2004 Supp. 75-4362; effective, T-1-10-28-88, Oct. 28, 1988; effective Dec. 19, 1988; amended Feb. 19, 1990; amended April 13, 1992; amended May 31, 1996; amended Oct. 1, 1999; amended June 5, 2005.)

1-9-20. Leave usage for exempt employees. (a) When using available sick or vacation leave or other paid leave, as appropriate, each

exempt employee shall obtain authorization for these absences in the manner prescribed by the employee's appointing authority.

(b) Each exempt employee shall follow the leave request procedures established by the employee's appointing authority for any time away from work. The employee shall obtain prior approval from the employee's supervisor for all time away from work, including periods of less than half of a day.

(c) Vacation, sick, and shared leave and holiday compensatory time shall be recorded as used only when employees in exempt positions use leave in half-day or full-day increments.

(d) Time away from work for less than half of a day shall not be accumulated over multiple days to total a half-day or full-day increment of vacation, sick, or shared leave or holiday compensatory time. However, time away from work of less than half of a day may be accumulated in the same day to total a half-day increment.

(e) A supervisor may deny the request of an exempt employee for time away from work of less than half of a day or may require the employee to use half of a day or a full day of an appropriate type of leave if the employee has abused the use of leave in less than half-day or full-day increments or if other similar circumstances exist. The employee shall not perform work before the allotted time of leave is used.

(f) Other types of leave used by employees in exempt positions, including jury duty, funeral, job injury, and disaster service leave, shall be reported in quarter-hour increments.

(g) An exempt employee shall not be suspended for a period that is less than the employee's workweek of seven consecutive 24-hour periods or multiples of this workweek, unless the suspension is imposed in good faith for either of the following conditions:

(1) for an infraction of a safety rule of major significance; or

(2) for violation of workplace conduct rules.

(h) This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 75-3706, K.S.A. 2004 Supp. 75-3747, and K.S.A. 75-5507; implementing K.S.A. 75-3707, 75-3746, and 75-5507; effective May 1, 1979; amended June 5, 2005.)

1-9-21. Nepotism. In accordance with K.S.A. 46-246a and K.A.R. 19-40-4, no state officer or employee shall advocate, participate in or cause the appointment, promotion, transfer, demotion or discipline of a member of the officer's or employ-

ee's household or a family member. (Authorized by K.S.A. 75-3747; implementing K.S.A. 75-3746, K.S.A. 1992 Supp. 46-246a; effective May 1, 1979; amended Jan. 6, 1992; amended July 26, 1993.)

1-9-22. Job injury leave. (a) Each classified or unclassified employee who sustains a qualifying job injury, as determined by the employee's appointing authority, shall be eligible for job injury leave in accordance with this regulation.

(b) "Qualifying job injury" shall mean an injury that meets the following conditions:

(1) Renders the employee unable to perform the employee's regular job duties;

(2) arose out of and in the course of employment with the state; and

(3)(A) Was sustained as a result of a shooting, stabbing, or aggravated battery as defined in K.S.A. 21-5413 and amendments thereto, by another against the employee;

(B) was sustained as a result of a confrontation with a patient or client in a facility or ward for mental health, intellectual disability, or developmental disability in which the patient or client inflicts great bodily harm, causes disfigurement, or causes bodily harm with a deadly weapon or in any manner by which great bodily harm, disfigurement, dismemberment, or death can be inflicted; or

(C) was sustained in any other situation in which the appointing authority determines that job injury leave is in the best interest of the state.

(c) Job injury leave shall not exceed six total months away from work. While an employee is on approved job injury leave, the employing state agency shall continue to pay the employee's regular compensation. If the employee is awarded worker's compensation, the state agency shall pay the employee compensation in an amount that, together with worker's compensation pay, equals the regular pay of the employee. The employee shall not be required to use accrued sick leave or vacation leave. The employee shall continue to accrue sick and vacation leave as long as the employee remains in pay status. Nothing in this regulation shall be construed as providing voluntary or gratuitous compensation payments in addition to temporary total disability compensation payments pursuant to the worker's compensation laws.

(d) The appointing authority may require an employee on approved job injury leave to return to full or limited duty if the employee is physically able to perform the duty as determined by a physician selected by the appointing authority

or selected by a representative of the state self-insurance fund. However, limited duty allowed shall not, in combination with time away from work on job injury leave, exceed the total six months allowed for job injury leave. If the employee remains unable to return to full duty, the appointing authority shall take any action deemed to be in the best interest of the state.

(e) While an employee is on approved job injury leave, the appointing authority may require the employee to be examined by a physician selected by the appointing authority to determine the capability of the employee to return to full or limited duty.

(f) Each employee on approved job injury leave shall be prohibited from being gainfully employed by any other employer.

(g) The requirements of this regulation may be waived or modified by the director upon written request of the appointing authority. Any waiver or modification may be granted only upon a finding by the director that both of the following conditions are met:

(1) Granting the requested waiver or modification would not be in conflict with any statutes pertaining to leave.

(2) Failure to grant the requested waiver or modification would create a manifest injustice or undue hardship on the employee requesting the job injury leave. (Authorized by K.S.A. 75-3706, K.S.A. 2013 Supp. 75-3747; implementing K.S.A. 75-3707 and 75-3746; effective, T-86-17, June 17, 1985; effective May 1, 1986; amended Nov. 21, 1994; amended Dec. 17, 1995; amended Sept. 12, 2014.)

1-9-23. Shared leave. (a)(1) Any employee in a classified, regular position or in an unclassified position that is eligible for benefits may be eligible to receive or donate shared leave as provided in this regulation.

(2) Except as provided in paragraph (d)(1)(D), shared leave may be granted to an employee if all of the following conditions are met and if the employee meets the criteria specified in paragraph (b)(1):

(A) The employee or a family member of the employee, as defined in K.A.R. 1-9-5 (e)(2), is experiencing a serious, extreme, or life-threatening illness, injury, impairment, or physical or mental condition.

(B) The illness, injury, impairment, or condition of the employee or the family member has caused or is likely to cause the employee to take leave without pay or terminate employment.

(C) The illness, injury, impairment, or condition of the employee or the family member keeps the employee from performing regular work duties.

(b)(1) Each employee who meets the requirements of paragraph (a)(2) shall be eligible to receive shared leave if both of these conditions are met:

(A) The employee has exhausted all paid leave available for use, including vacation leave, sick leave, compensatory time, holiday compensatory time, and the employee's discretionary holiday.

(B) The employee has at least six continuous months of service, pursuant to K.A.R. 1-2-46.

(2)(A) An employee shall be eligible to donate vacation leave or sick leave to another employee if these conditions are met:

(i) The donation of vacation leave does not cause the accumulated vacation leave balance of the donating employee to be less than 80 hours, unless the employee donates vacation leave at the time of separation from state service.

(ii) The donation of sick leave does not cause the accumulated sick leave balance of the donating employee to be less than 480 hours, unless the employee donates sick leave at the time of separation from state service.

(B) If the employee is retiring from state service and receiving compensation for sick leave upon retirement, the donated sick leave consists only of the accumulated sick leave in excess of the applicable minimum accumulation amount required for eligibility for a sick leave payout pursuant to K.S.A. 75-5517, and amendments thereto.

(c)(1)(A) When requesting shared leave, an employee shall be required to provide a statement from a licensed health care provider or other medical evidence necessary to adequately establish that the illness, injury, impairment, or physical or mental condition of the employee or family member is serious, extreme, or life-threatening and keeps the employee from performing regular work duties. If the employee fails to provide the required evidence, the use of shared leave shall be denied.

(B) At any time during the use of shared leave, the appointing authority may require the employee to provide a statement from a licensed health care provider or other medical evidence necessary to establish that the illness, injury, impairment, or physical or mental condition of the employee or family member continues to be serious, extreme, or life-threatening or to establish when the employee will be able to return to work. If the employee fails to provide the required evidence, the

use of shared leave may be terminated by the appointing authority.

(2)(A) The appointing authority shall determine whether an employee meets the initial eligibility requirements in paragraph (b)(1) and, if applicable, whether the employee would be caring for an individual who meets the definition of a family member.

(B) Shared leave may be denied if the appointing authority determines that the requesting employee has a history of leave abuse.

(C) An employee who currently is receiving workers compensation for the illness, injury, impairment, or physical or mental condition that is the basis of the shared leave request or has submitted an application to the division of workers compensation for this illness, injury, impairment, or condition shall not be eligible to receive shared leave.

(d)(1)(A) A shared leave committee shall be established and coordinated by the director. The shared leave committee shall consist of three current employees in the executive branch who, in the director's judgment, have experience in making determinations regarding leave and who will be fair and impartial in discharging their responsibilities.

(B) Except as provided by paragraph (d)(2), once the appointing authority determines that an employee meets the eligibility requirements specified in paragraph (c)(2), the shared leave committee shall determine whether the illness, injury, impairment, or physical or mental condition of the employee or the employee's family member meets the conditions established in paragraph (a)(2).

(C) If the shared leave committee determines that the illness, injury, impairment, or physical or mental condition meets the requirements of paragraph (a)(2), the appointing authority shall grant all or a portion of the time requested.

(D) An appointing authority may approve an employee's request for shared leave regardless of the determination of the shared leave committee if the appointing authority determines that such a decision would be in the best interests of the state. Before approving the request, the appointing authority shall consult with the director about the factors that the appointing authority is relying upon in making the determination that approval of the shared leave is in the best interests of the state.

(2) If the appointing authority is an elected official, the appointing authority may determine whether the illness, injury, impairment, or physical or mental condition of the employee or the employee's family member meets the conditions

established in paragraph (a)(2) or may submit the shared leave request to the shared leave committee for determination as provided in paragraph (d)(1).

(e) Employees shall not be notified of the need for shared leave donations until the request for shared leave has been approved as provided in subsection (d). No employee shall be coerced, threatened, or intimidated into donating leave or financially induced to donate leave for purposes of the shared leave program.

(f) The records of all shared leave donations shall remain confidential.

(g)(1) Shared leave may be used only for the duration of the serious, extreme, or life-threatening illness, injury, impairment, or physical or mental condition for which the shared leave donation was collected. The maximum number of hours of shared leave that may be used by an employee shall be the total number of hours that the employee would regularly be scheduled to work during a six-month period.

(2) No employee shall be eligible to use shared leave after meeting the eligibility requirements for disability benefits under the Kansas public employees retirement system.

(3) Employees shall use shared leave in accordance with their regular work schedules.

(4) Exempt employees shall use shared leave only in half-day or full-day increments.

(h)(1) Shared leave may be applied retroactively for a maximum of two pay periods preceding the date the employee signed the shared leave request form.

(2) The employee shall no longer be eligible to receive shared leave for a particular occurrence if any of these conditions is met:

(A) The illness, injury, impairment, or condition of the employee or the employee's family member improves so that it is no longer serious, extreme, or life-threatening, and the employee is no longer prevented from performing regular work duties.

(B) The employee terminates or retires.

(C) The employee returns to work and works the employee's regular work schedule for at least 20 continuous working days.

(3) Any unused portion of the shared leave shall be prorated among all donating employees based on the original amount and type of donated leave and returned to those employees within two pay periods of the date on which it is determined that the employee receiving the donated leave is no longer eligible for shared leave. Shared leave shall not be returned to donating employees in incre-

ments of less than one full hour or to any person who has left state service.

(i)(1) Shared leave shall be paid according to the receiving employee's regular rate of pay by the receiving employee's agency. The rate of pay of the donating employee shall not be used in figuring the amount of shared leave that the requesting employee receives.

(2) Shared leave shall be donated in full-hour increments.

(j) Each decision to approve or deny a request for shared leave and any other determination regarding the extension or termination of shared leave shall be final and shall not be subject to appeal to the civil service board. (Authorized by K.S.A. 75-3706, K.S.A. 2016 Supp. 75-3747, and K.S.A. 75-5549; implementing K.S.A. 75-3707, 75-3746, and 75-5549; effective, T-1-7-23-92, July 23, 1992; effective Sept. 14, 1992; amended July 26, 1993; amended, T-1-9-19-94, Sept. 19, 1994; amended Nov. 21, 1994; amended Dec. 17, 1995; amended May 31, 1996; amended Sept. 18, 1998; amended, T-1-2-17-00, Feb. 17, 2000; amended June 16, 2000; amended June 5, 2005; amended Jan. 6, 2017.)

1-9-24. Disaster service volunteer leave.

(a) An appointing authority may authorize leave with pay to any employee in the classified or unclassified service who is a certified disaster service volunteer of the American red cross.

(1) Such leave may only be granted when:

(A) the employee is requested by the American red cross to provide disaster services;

(B) the disaster is designated as a Level II disaster or above by the American red cross; and

(C) the disaster occurs in Kansas or in states contiguous to Kansas.

(2) Request for disaster service volunteer leave shall be made in accordance with K.A.R. 1-9-3(a) and shall include written verification of the provisions of paragraph (a)(1) from the American red cross.

(3) Disaster volunteer leave shall not exceed 20 working days in the 12-month period that starts the first day the leave was used.

(b) The employee shall not be considered to be an employee of the state for the purposes of workers' compensation or the Kansas tort claims act while on disaster service leave. (Authorized by K.S.A. 75-3747; implementing L. 1993, ch. 33, § 3; effective, T-1-11-16-93, Nov. 16, 1993; effective Dec. 27, 1993.)

1-9-25. Alcohol and controlled substances tests for employees in commercial driver positions. (a)(1) For purposes of this regulation, “the act” means the provisions of 49 U.S.C. app. § 2717, as amended, that apply to the alcohol and controlled substance testing of employees in commercial driver positions.

(2) This regulation shall apply to any employee in a commercial driver position who may be required to submit to an alcohol or controlled substances test in accordance with the act.

(b) Any appointing authority may ask any current employee in a commercial driver position within that agency to submit to alcohol and controlled substances tests under the provisions of the act as a condition of employment. Refusal to comply with this requirement shall be considered the equivalent of receiving a confirmed “positive” test result for referral or disciplinary actions.

(c)(1) Each employee required to submit to alcohol or controlled substances tests shall be notified of that requirement in writing. Each appointing authority shall provide to each current employee in a commercial driver position within that agency detailed materials containing the information identified in paragraph (c)(2). These materials shall be provided to each current employee before the start of alcohol and controlled substances testing by the agency and to each employee subsequently hired or transferred into a commercial driver position.

(2) The information provided to each employee in a commercial driver position shall include the following:

(A) The identity of the person designated by the appointing authority to answer drivers’ questions about the materials;

(B) the categories of drivers who are subject to the provisions of the act;

(C) sufficient information about the safety-sensitive functions performed by those drivers to specify during which periods of the workday the driver is required to be in compliance with the act;

(D) specific information concerning driver conduct that is prohibited by the act;

(E) the circumstances under which a driver will be tested for alcohol or controlled substances under the act;

(F) the procedures that will be used to test for the presence of alcohol and controlled substances, protect the driver and the integrity of the testing processes, safeguard the validity of the test re-

sults, and ensure that those results are attributed to the correct driver;

(G) the requirement that each driver submit to alcohol and controlled substances tests administered in accordance with the act;

(H) an explanation of what constitutes a refusal to submit to an alcohol or controlled substances test and the attendant consequences;

(I) the consequences for drivers found to have violated the act, including the requirement that the driver be removed immediately from safety-sensitive functions, and the referral, evaluation, and treatment procedures under the act;

(J) the consequences for drivers found to have an alcohol concentration exceeding permissible levels established under the act;

(K) information regarding postaccident procedures and the instructions necessary for the employee to be able to comply with the postaccident testing requirements; and

(L) information concerning the following:

(i) The effects of the use of alcohol and controlled substances on an individual’s health, work, and personal life;

(ii) the signs or symptoms of an alcohol or a controlled substances problem, whether the driver’s own problem or that of a coworker; and

(iii) the available methods of intervening when an alcohol or a controlled substances problem is suspected, including confrontation, referral to the state employee assistance program, referral to management, or a combination of these methods.

(d) This subsection shall apply only to employees with permanent status, including employees with permanent status who are serving a probationary period due to a promotion.

(1) Except as provided by paragraph (d)(2), an employee shall not be subject to dismissal solely on the basis of a confirmed “positive” test result or the equivalent or a violation of any other provision of the act if the employee has not previously had a confirmed “positive” test result or the equivalent or any other violation of the act and the employee successfully completes an appropriate and approved alcohol and controlled substance assessment and any recommended education or treatment program. However, the employee shall be subject to dismissal in accordance with K.S.A. 75-2949f, and amendments thereto, if the employee has previously had a confirmed “positive” test result or the equivalent or any other violation of the act or if the employee fails to successfully complete an appropriate and approved alco-

hol and controlled substance assessment and any recommended education and treatment program prescribed by the substance abuse professional. This regulation shall not preclude the appointing authority from proposing disciplinary action in accordance with K.S.A. 75-2949d, and amendments thereto, for other circumstances that occur in addition to a confirmed “positive” test result or another violation of the act and that are normally grounds for discipline.

(2) Each employee who takes any of the following actions shall be subject to dismissal pursuant to K.S.A. 75-2949f, and amendments thereto:

(A) Intentionally adulterates, tampers with, or substitutes a sample provided for alcohol or controlled substances testing;

(B) violates the chain-of-custody or identification procedures; or

(C) falsifies a test result.

(3) If disciplinary action is warranted under the provisions of this regulation, the appointing authority shall afford the employee due process in accordance with K.S.A. 75-2949, and amendments thereto.

(e) An employee shall be subject to dismissal if both of the following conditions are met:

(1) At the time the employee is given written notice of an appointment for an alcohol or controlled substances test, the employee is a temporary employee, is in trainee status, or is serving a probationary period, other than an employee with permanent status who is serving a probationary period due to a promotion.

(2) The employee has a confirmed “positive” test result or the equivalent or takes any of the following actions:

(A) Adulterates, tampers with, or substitutes a sample provided for controlled substances testing;

(B) violates the chain-of-custody or identification procedures;

(C) falsifies a test result; or

(D) violates any other applicable provision of the act.

(f)(1) Each appointing authority shall be responsible for maintaining strict security and confidentiality of the alcohol and controlled substances records in that agency. Access to these records shall be restricted to the following personnel:

(A) The agency’s personnel officer, the agency’s appointing authority, the secretary of administration, the director, or any of their respective designees;

(B) persons in the supervisory chain of command;

(C) the agency’s legal counsel; or

(D) the department of administration’s legal counsel.

(2) Further access to these records shall not be authorized without the express consent of the director. (Authorized by K.S.A. 75-3706 and K.S.A. 2005 Supp. 75-3747; implementing K.S.A. 75-3746 and 75-3707; effective, T-1-1-26-95, Jan. 26, 1995; effective May 30, 1995; amended Sept. 18, 1998; amended October 1, 1999; amended Jan. 12, 2007.)

1-9-26. Preduty controlled substances testing for employees in positions assigned commercial driver functions. (a)(1) For purposes of this regulation, “the act” means the provisions of 49 U.S.C. app. § 2717, as amended, that apply to the preduty controlled substances testing of employees in positions assigned commercial driver functions.

(2) This regulation shall apply to any existing, filled position to which the appointing authority assigns duties that result in the position becoming a commercial driver position, thereby subjecting the incumbent employee to the requirements of the act, including its controlled substances testing requirements and the provisions of the act regarding release of alcohol and controlled substances test information by previous employers.

(b) Each employee who is an incumbent in a position to which commercial driver functions are assigned shall be informed of the provisions of the act and this regulation in writing and shall sign a statement agreeing to participate in the controlled substances testing before administration of the test. The appointing authority shall advise each employee required to submit to controlled substances testing under the act of the following aspects of the testing program:

(1) The methods of controlled substances testing that may be used;

(2) the substances that may be identified;

(3) the consequences of a refusal to submit to a controlled substances test or of a confirmed “positive” test result; and

(4) the reasonable efforts utilized by the state to maintain the confidentiality of results and any medical information that may be provided.

(c) If an incumbent employee fails to participate in the required controlled substances test, refuses to sign the written authorization required under subsection (b) of this regulation, or refuses to provide written authorization for release of alcohol and controlled substances test information

by previous employers, the employee shall not begin performing the safety-sensitive functions. A subsequent refusal to participate in the required testing or to sign the written authorization shall be grounds for the following consequences:

(1) Discipline under K.S.A. 75-2949f, and amendments thereto, for any employee with permanent status, including an employee serving a probationary period due to a promotion from a position in which the employee had permanent status; or

(2) termination, for any temporary employee, any employee in trainee status, or any employee serving a probationary period, other than an employee with permanent status who is serving a probationary period due to a promotion.

(d) This subsection shall apply only to employees with permanent status, including employees with permanent status who are serving a probationary period due to a promotion.

(1) Except as provided by paragraph (d)(3), an incumbent employee in a position to which commercial driver functions are assigned shall not be subject to dismissal solely on the basis of a confirmed “positive” test result if the employee successfully completes an appropriate and approved alcohol and controlled substance assessment and any recommended education or treatment program, as provided by the act. However, the employee shall be subject to dismissal in accordance with K.S.A. 75-2949f, and amendments thereto, if the employee has previously had a confirmed “positive” test result or the equivalent, if the employee committed some other violation of the act, or if the employee fails to successfully complete an appropriate and approved alcohol and controlled substance assessment and any recommended education and treatment program prescribed by the substance abuse professional. This regulation shall not preclude the appointing authority from proposing disciplinary action in accordance with K.S.A. 75-2949d, and amendments thereto, for other circumstances that occur in addition to a confirmed “positive” test result or another violation of the act and that are normally grounds for discipline.

(2) The provisions of (d)(1) relating to a confirmed “positive” test shall apply if the information obtained from a prior employer under the act indicates that, within the preceding two years, both of the following have occurred:

(A) The employee violated any of the provisions of the act.

(B) The employee failed to complete the requirements for returning to work under the act, including an evaluation by a substance abuse professional, a return-to-duty alcohol test, controlled substances test, or both, and completion of any rehabilitation or treatment program prescribed by the substance abuse professional.

(3) Each employee who takes any of the following actions shall be subject to dismissal pursuant to K.S.A. 75-2949f, and amendments thereto:

(A) Intentionally adulterates, tampers with, or substitutes a sample provided for alcohol or controlled substances testing;

(B) violates the chain-of-custody or identification procedures; or

(C) falsifies a test result.

(4) If disciplinary action is warranted based on the provisions of this regulation, the appointing authority shall afford the employee due process in accordance with K.S.A. 75-2949, and amendments thereto.

(e) An employee shall be subject to termination if both of the following conditions are met:

(1) At the time the employee is given notice of the assignment of commercial driver functions to the employee’s position, the employee is a temporary employee, is in trainee status, or is serving a probationary period, other than an employee with permanent status who is serving a probationary period due to a promotion.

(2) One or more of the following has occurred:

(A) The employee has a confirmed “positive” test result or the equivalent.

(B) The information obtained from a prior employer under the act indicates that, within the preceding two years, both of the following occurred:

(i) The employee violated any of the provisions of the act.

(ii) The employee failed to complete the requirements for returning to work under the act, including an evaluation by a substance abuse professional, a return-to-duty alcohol test, controlled substances test, or both, and completion of any rehabilitation or treatment program prescribed by the substance abuse professional.

(C) The employee takes any of the following actions:

(i) Intentionally adulterates, tampers with, or substitutes a sample provided for controlled substances testing;

(ii) violates the chain-of-custody or identification procedures;

(iii) falsifies a test result; or

(iv) violates any other applicable provision of the act.

(f)(1) Each appointing authority shall be responsible for maintaining strict security and confidentiality of the alcohol and controlled substance testing records in that agency. Access to these records shall be restricted to the following individuals:

(A) The agency's personnel officer, the agency's appointing authority, the secretary of administration, the director, or any of their respective designees;

(B) persons in the supervisory chain of command;

(C) the agency's legal counsel; or

(D) the department of administration's legal counsel.

(2) Further access to these records shall not be authorized without the express consent of the director. (Authorized by K.S.A. 75-3706 and K.S.A. 2005 Supp. 75-3747; implementing K.S.A. 75-3746 and 75-3707; effective, T-1-1-26-95, Jan. 26, 1995; effective May 30, 1995; amended June 20, 1997; amended Sept. 18, 1998; amended Jan. 12, 2007.)

1-9-27. This regulation shall be revoked on and after June 5, 2005. (Authorized by K.S.A. 75-3706 and K.S.A. 1996 Supp. 75-3747; implementing K.S.A. 75-3707 and 75-3746; effective May 31, 1996; amended June 20, 1997; revoked June 5, 2005.)

Article 10.—GUIDANCE AND DISCIPLINE

1-10-1 to 1-10-5. (Authorized by K.S.A. 1980 Supp. 75-3747; effective May 1, 1979; revoked, E-82-14, July 1, 1981; revoked May 1, 1982.)

1-10-6. This regulation shall be revoked on and after June 5, 2005. (Authorized by K.S.A. 75-3747; implementing K.S.A. 75-2949d and 75-2944; effective, E-82-14, July 1, 1981; effective May 1, 1982; amended Dec. 27, 1993; amended May 31, 1996; amended Sept. 18, 1998; revoked June 5, 2005.)

1-10-7. This regulation shall be revoked on and after June 5, 2005. (Authorized by K.S.A. 1996 Supp. 75-3747; implementing K.S.A. 75-2949; effective, E-82-14, July 1, 1981; effective May 1, 1982; amended Oct. 24, 1997; revoked June 5, 2005.)

1-10-8. (Authorized by K.S.A. 1983 Supp. 75-3747; implementing K.S.A. 1983 Supp. 75-2944 and 75-2946; effective, E-82-14, July 1, 1981;

effective May 1, 1982; amended May 1, 1983; amended May 1, 1984; amended Dec. 17, 1995; revoked May 31, 1996.)

1-10-9. (Authorized by K.S.A. 1981 Supp. 75-3747; implementing K.S.A. 75-2946; effective, E-82-14, July 1, 1981; effective May 1, 1982; amended Dec. 17, 1995; revoked May 31, 1996.)

1-10-10. This regulation shall be revoked on and after June 5, 2005. (Authorized by K.S.A. 75-3706 and 75-3747; implementing K.S.A. 75-2925, 75-2949, 75-2952, 75-2957, 75-3707, and 75-3746; effective Oct. 1, 1999; revoked June 5, 2005.)

1-10-11. This regulation shall be revoked on and after June 5, 2005. (Authorized by K.S.A. 75-3706 and 75-3747; implementing K.S.A. 75-2925, 75-2949, 75-2952, 75-2957, 75-3707, and 75-3746; effective Oct. 1, 1999; revoked June 5, 2005.)

Article 11.—NONDISCIPLINARY TERMINATION

1-11-1. Resignation. (a) Each employee wishing to resign in good standing shall file with the appointing authority, at least two weeks before the employee's last day at work, a written resignation stating the date it will become effective and the reasons for leaving. If the employee fails to give the required written notice of resignation as specified in this subsection, the appointing authority may have a statement concerning this failure inserted in the employee's official personnel record. Any appointing authority may consider the fact that a person did not give the required notice when the person resigned from earlier employment with the state to be grounds for refusal to employ that person.

(b) With the approval of the appointing authority, an employee may withdraw a resignation.

(c) An appointing authority may consider any unauthorized absence from work for a period of five consecutive working days for which the employee does not provide a satisfactory explanation to be abandonment of the job and a presumed resignation. Before terminating an employee for a presumed resignation, the appointing authority shall make a reasonable effort to obtain a satisfactory explanation from the employee.

(d) This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 75-3706

and K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 75-3707 and 75-3746; effective May 1, 1979; amended May 1, 1985; amended May 31, 1996; amended June 7, 2002; amended June 5, 2005.)

1-11-2. (Authorized by K.S.A. 1981 Supp. 75-3747; implementing K.S.A. 1981 Supp. 75-2948; effective May 1, 1979; amended, E-82-14, July 1, 1981; amended May 1, 1982; revoked May 1, 1984.)

1-11-3. This regulation shall be revoked on and after June 5, 2005. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked June 5, 2005.)

Article 12.—GRIEVANCES AND APPEALS

1-12-1. Grievance procedure. Each appointing authority shall establish in writing a grievance procedure for its employees. The availability to, or the use of, a grievance procedure by an employee shall not preclude the employee's use of appropriate appeal procedures that are available to the employee in the civil service act or these regulations. This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 75-3746; effective May 1, 1979; amended June 5, 2005.)

1-12-2. Agency appeals. Any appointing authority may appeal any final decision of the director of personnel services to the secretary of administration by filing a written notice of appeal with the secretary, signed by the appointing authority, with a copy to the director. Each notice of appeal shall state in clear and concise language the final decision of the director that is the subject of the appeal and the grounds upon which the appeal is based. The notice of appeal shall be delivered to the secretary's office or mailed to the secretary within 10 working days of the date on which the final decision becomes effective. The day and hour for hearing the appeal shall then be set by the secretary. The appeal shall be conducted informally. Both the appellant and the director may be present in person or by counsel, and both may present evidence and argument. A timely disposition of the appeal shall be made by the secretary. A copy of the secretary's decision shall be provided to the appointing authority and the director by the secretary. The filing of a notice of appeal or the pendency of an appeal shall not suspend the final decision from which the appeal is taken. This

regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 75-3746; effective May 1, 1979; amended June 5, 2005.)

Article 13.—RECORDS, REPORTS, RESEARCH AND EVALUATION OF PERSONNEL SYSTEM

1-13-1. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked May 1, 1983.)

1-13-1a. Content of employees' official personnel records. (a) The official personnel record of each state employee shall include the following information:

(1) Records showing the employee's hires, transfers, promotions, demotions, separations, changes of pay rates, leaves of absence, and any other changes in employment status;

(2) performance reviews, letters of reprimand and letters of rebuttal, and letters of commendation;

(3) the application for each position for which the employee was hired;

(4) letters of disciplinary action; and

(5) any other information related to state service that the appointing authority deems appropriate.

(b) The records specified in subsection (a) may be maintained in paper or electronic form or by using other appropriate media.

(c) The official personnel record of each state employee shall be transferred with the employee if the employee is appointed to a position in another agency.

(d) This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 75-2950, and K.S.A. 75-3746; effective May 1, 1983; amended Dec. 27, 1993; amended Dec. 17, 1995; amended May 31, 1996; amended June 20, 1997; amended June 5, 2005.)

1-13-1b. Disclosure of employee information. (a) Except as otherwise provided in this regulation and the Kansas open records act, K.S.A. 45-215 *et seq.* and amendments thereto, the information contained in each state employee's official personnel record shall not be open to public inspection.

(b) Upon any inquiry, the appointing authority shall disclose the following information concerning any current or former employee:

(1) The name of the employee;

(2) the employee's current job title;

(3) the employee's current or prior pay;
 (4) the employee's length of employment with the state;

(5) the name of the employing agency; and

(6) the length of time the employee has served in the employee's current position.

(c) When appropriate personnel from one of the following agencies, in carrying forth their official duties, establish a need for information contained in an employee's official personnel record, the appropriate personnel from these agencies shall be permitted to access the other employee's personnel record:

(1) The Kansas department of administration;

(2) the Kansas attorney general's office, including the Kansas bureau of investigation;

(3) the federal equal employment opportunity commission and the Kansas human rights commission;

(4) the Kansas civil service board;

(5) legislative post audit;

(6) the agency employing that employee; and

(7) employees of the Kansas department of social and rehabilitation services responsible for that agency's child support enforcement activities.

(d) Any current or former employee, or any other individual or an organization if authorized in writing by the current or former employee, may review that employee's official personnel record upon written request to the appointing authority. The appointing authority shall place in the employee's personnel record a copy of the written request and the written authorization from the employee. The review shall be consistent with the conditions established by the appointing authority and at a time and place mutually convenient to the parties.

(e)(1) Any appointing authority with an established need to review the personnel record of an employee in another state agency may, upon request to the appointing authority of the employing agency, review the employee's official personnel record, including applications for employment and performance reviews.

(2) Each appointing authority responding to job-related reference and performance questions from another state agency shall answer the questions in good faith.

(3) If a prospective employer, other than another state agency, requests information about a current or former state employee as part of a reference check, the response of the appointing authority shall be consistent with the requirements of K.S.A. 44-119a, and amendments thereto.

(f) The official personnel record of any specifically named employee shall be made available for inspection in connection with litigation, pursuant to the terms of an order entered by a judge of any federal, state, or municipal court having proper jurisdiction over the litigation.

(g) This regulation shall be effective on and after June 5, 2005. (Authorized by K.S.A. 2004 Supp. 75-3747; implementing K.S.A. 75-2950 and 75-3746; effective June 5, 2005.)

1-13-2 to 1-13-4. (Authorized by K.S.A. 75-3747; effective May 1, 1979; revoked May 31, 1996.)

Article 14.—LAYOFF PROCEDURES AND ALTERNATIVES TO LAYOFF

1-14-1 to 1-14-5. (Authorized by K.S.A. 75-2965, 75-2966, 75-2968; effective Jan. 1, 1967; revoked May 1, 1979.)

1-14-6. (Authorized by K.S.A. 75-3747; implementing K.S.A. 75-2948; effective May 1, 1984; amended January 18, 1994; revoked May 31, 1996.)

1-14-7. Agency submission of layoff notice to director. (a) When submitting a layoff notice to the director, the appointing authority shall list the reason for the proposed layoff. As established by K.S.A. 75-2948, as amended, the reasons for proposing a layoff shall be limited to:

(1) a shortage of work or funds;

(2) the reinstatement of an employee returning from authorized leave; or

(3) the abolition of a position or other material change in duties or organization.

(b) Any appointing authority proposing a layoff shall give written notice of the proposed layoff to the director, and a copy of the notice to the secretary of administration, at least 45 calendar days before the proposed effective date of the layoff. In cases of extenuating circumstances, the 45-day notice requirement may be waived by the director. However, in no case shall notice of layoff to the director be less than 30 days prior to the proposed effective date of the layoff.

(c) In the notice, the appointing authority shall specify:

(1) the reason or reasons for the layoff;

(2) the class, classes, or class series in which the layoff is to occur;

(3) the estimated number of employees to be laid off;

(4) the proposed effective date of each layoff;
 (5) the position or positions to be vacated by layoff; and

(6) the layoff scores of employees identified in subsection (a) of K.A.R. 1-14-9.

(d) In addition to the information required under subsection (c), the notice shall include the following information:

- (1) a list of the agency's organizational units;
- (2) a description of any geographic areas to which the layoffs will be limited; and
- (3) any other information requested by the director.

If the agency chooses to permit employees to bump into lower classes in a class series in addition to any lower class in which an employee had permanent status, the notice shall also indicate the class series to be used for bumping.

(e)(1) The appointing authority may designate a geographic area or an organizational unit within which the layoff is to occur and within which the employees are to be subject to layoff. If one or more geographic areas or organizational units are designated by the appointing authority, they shall be indicated in the layoff notice. If no area or unit is designated, the layoff shall be agency-wide. The appointing authority also may limit the layoff to full-time employees or to employees employed on less than a full-time basis.

(2) If an area or unit is used, the layoff and bumping rights shall be applied only to employees within the designated area or unit. When the layoff is limited to full-time employees or less than full-time employees, any employee with permanent status may exercise bumping rights into a position filled by any employee with probationary status only within the group of employees having the same full-time or less than full-time status. Otherwise, any employee with permanent status may exercise bumping rights into any position filled by an employee with probationary status anywhere within the agency, if the employee with permanent status meets the required selection criteria for the class.

(f) The appointing authority may also allow employees to bump into lower classes in a class series in addition to any lower class in which the employee had permanent status. The class series bumping option shall be limited to class series that are designated in the layoff notice.

(g) Within 10 working days of the receipt of a proposed layoff notice, the agency shall be contacted by the director with any questions the

director may have regarding the layoff, and the proposed layoff shall be reviewed with the secretary of administration. The proposed layoff shall be approved, modified and approved as modified, or rejected by the secretary within 15 working days of the receipt of the proposed layoff notice. The agency shall be notified in writing of the secretary's determination. (Authorized by K.S.A. 1995 Supp. 75-3747; implementing K.S.A. 1995 Supp. 75-2948; effective May 1, 1984; amended Jan. 18, 1994; amended Dec. 17, 1995; amended May 31, 1996.)

1-14-8. Computation of layoff scores. (a)

A layoff score shall be computed by the appointing authority for each employee in the agency who has permanent status and who either is in a class of positions identified for layoff or could be affected by the exercise of bumping rights.

(b) Layoff scores shall be computed according to the formula $A \times L$, where A and L have the following values:

(1) A = the average performance review rating of the employee, as described in subsection (d); and

(2) L = the length of service, as defined in K.A.R. 1-2-46 (a), expressed in years, with three months of service equivalent to .25.

Length of service for a retired employee who has returned to work shall be calculated in accordance with K.A.R. 1-2-46 (g). The layoff scores shall be prepared in accordance with a uniform score sheet prescribed by the director.

(c) Layoff scores computed by the appointing authority shall be made available for inspection by each employee upon request at the time the agency gives written notice of a proposed layoff to the director and the secretary pursuant to K.A.R. 1-14-7. Upon request of any employee, the appointing authority shall review the manner in which the employee's score was calculated. Each dispute as to the proper calculation of a layoff score of any employee shall be resolved by the director.

(d) Except as otherwise authorized by this subsection, the performance review ratings used in computing the layoff score of an employee shall be the employee's five most recent ratings if the employee has as many as five ratings. However, a rating resulting from a special performance review that is given for a rating period ending within 90 calendar days of any notice of the layoff to the director shall not be counted. Performance reviews completed for rating periods ending on or

after the date the appointing authority notifies the director in writing that a layoff is to occur shall not be considered in computing layoff scores; however, the appointing authority may designate a uniform earlier cutoff date to identify which performance review ratings are to be used in computing layoff scores.

(1) For the purposes of calculating layoff scores in accordance with the formula established in subsection (b), a rating of “exceptional” shall have a value of seven, a rating of “exceeds expectations” shall have a value of five, a rating of “meets expectations” shall have a value of three, a rating of “needs improvement” shall have a value of one, and a rating of “unsatisfactory” shall have a value of zero.

(2) If an employee does not have a total of five performance review ratings for use in computation of a layoff score, the layoff score shall be an average of the ratings that the employee has actually received.

(3) If an employee has no performance review ratings that may be used to compute a layoff score, the employee shall be deemed to have been given a single performance review rating of “meets expectations,” and the value of that rating shall be used to compute a layoff score. New hires and rehires employed on a basis other than reinstatement who are serving a probationary period and employees in training classes shall be subject to subsections (e), (f), and (g).

(4) If any layoff scores are identical and some, but not all, of the persons with the same score must be laid off, preference among these persons shall be given to any veteran, as defined in K.S.A. 73-201 and amendments thereto, and any orphan, as defined in this paragraph, in that order. For the purpose of this regulation, “orphan” shall mean a minor who is the child of a veteran who died while, and as a result of, serving in the armed forces.

If further ties remain, a method of breaking the ties that is consistent with agency affirmative action goals and timetables for addressing underutilization of persons in protected groups shall be established by the secretary. If further ties remain, preference in retention shall be given to the person with the higher average performance review rating as used in calculating layoff scores in accordance with subsection (b). If a tie still exists, the next preference shall be given to the person with the greatest length of service, as defined in K.A.R. 1-2-46, within that agency. If a tie still ex-

ists, the appointing authority shall determine an equitable tie-breaking system.

(e) New hires and rehires with probationary status shall not be granted permanent status on or after the date the appointing authority has notified the director of a proposed layoff. However, any new hire or rehire with probationary status in a position for which no employee subject to layoff meets the required selection criteria may be given permanent status. New hires and rehires with probationary status shall have their probationary period extended until it is certain that no employee with permanent status whose position is to be vacated by layoff or who otherwise would be laid off through the exercise of bumping rights is claiming the position held by the employee with probationary status.

(f) Each employee serving a probationary period as a result of one of the following shall be considered to have permanent status for layoff purposes:

(1) Promotion of an employee who has permanent status;

(2) reallocation of a position if the incumbent has permanent status; or

(3) promotion from a classified position with at least six months of continuous classified service.

(g) Each employee who is in training status in a governor’s trainee position, or in any identified training position, and who has at least six months of continuous service shall be considered to have permanent status for layoff purposes only.

(h) The layoff list shall be based on the order of the layoff scores. The person with the lowest layoff score shall be laid off first. If more than one person is to be laid off, the persons to be laid off shall be selected on the basis of the lowest layoff scores. (Authorized by K.S.A. 75-2943, K.S.A. 75-3706, and K.S.A. 2014 Supp. 75-3747; implementing K.S.A. 75-2943, 75-2948, 75-3707, and 75-3746; effective May 1, 1984; amended, T-86-17, June 17, 1985; amended May 1, 1986; amended Dec. 27, 1993; amended Dec. 17, 1995; amended June 5, 2005; amended Oct. 1, 2009; amended Jan. 6, 2017.)

1-14-9. Layoff notice to employee. (a) Any appointing authority proposing a layoff shall give written notice of the proposed layoff to:

(1) Each employee in a position identified for layoff or who may be affected by layoff;

(2) each employee that may be laid off through the exercise of layoff bumping rights; and

(3) the director of personnel services.

(b) The notice required under subsection (a) shall be given at least 30 calendar days before the effective date of the proposed layoff.

(c) Written notice of layoff shall be deemed to have been properly given if, at least 30 days prior to the date of layoff:

(1) the notice is personally delivered to the employee by two or more persons or if it is personally delivered to the employee by one person and a written acknowledgment of receipt is obtained from the employee; or

(2) the notice is sent by certified mail, restricted delivery, to the residential address of the employee as shown on the agency's records. (Authorized by K.S.A. 1983 Supp. 75-3747; implementing K.S.A. 1983 Supp. 75-2948; effective May 1, 1984.)

1-14-10. Procedures for bumping and layoff conferences. (a) Bumping shall occur within the layoff group identified in the agency's layoff notice, or agencywide if the agency has not designated a layoff group. If the requirements in paragraphs (a)(1) and (2) have been met, any employee with permanent status, or any employee considered permanent for layoff purposes only, who is scheduled for layoff shall bump only into a lower class in which the employee previously had permanent status, unless the employee's position is in a class that is part of a class series designated by the appointing authority in the agency's layoff notice. If such a class series is designated in the agency's layoff notice, then the employee shall be permitted to bump into a lower class in the class series. Except as authorized by subsection (b), in order for an employee with permanent status to exercise bumping rights, the following requirements shall be met:

(1) The employee to be bumped shall have a lower layoff score than the person exercising the bumping right.

(2) The employee to be bumped shall have the lowest layoff score in that employee's job class of anyone in a position not scheduled for layoff.

(b) No employee with permanent status shall be laid off if all of the following conditions are met:

(1) There is a position filled by a probationary employee anywhere in the agency.

(2) The employee with permanent status scheduled to be laid off is interested in the position.

(3) The employee with permanent status is eligible for transfer or demotion to the position pursuant to K.A.R. 1-6-24 and 1-6-27.

(c) If an agency's layoff notice permits bumping only into lower classes in which an employee had previous permanent status and the class or classes in which the employee had previous permanent status have been abolished, the employee shall be afforded bumping rights to a similar job class in a lower pay grade if a similar job class exists as determined by the director.

(d) Regardless of subsections (a), (b), and (c), subject to the approval of the director, any appointing authority may prevent any classified employee from being laid off if the appointing authority finds that the loss of the employee, due to the employee's particular knowledge, skills, abilities, certification, licensure, or combination thereof, would substantially impair the agency's ability to perform its essential operations.

(e)(1) Bumping procedures shall begin as soon as possible after layoff notices have been given pursuant to K.A.R. 1-14-9. The appointing authority or designee shall develop a schedule for an individual conference with each affected employee, starting with the employee having the highest layoff score. The schedule of conferences shall continue in this order until each affected employee has had such a conference.

(2) During the layoff conference, the employee shall be informed of the bumping options available to the employee and of the opportunity to select one such option. The employee may defer the selection no longer than one full working day, unless a longer period of time is authorized by the appointing authority. If an employee is unavailable on the day the employee is scheduled for a layoff conference, the appointing authority shall reschedule the layoff conference. If the employee fails to appear at the rescheduled conference, the appointing agency shall not be required to hold a layoff conference with the employee and the employee shall forfeit bumping rights.

(3) In extenuating circumstances and when deemed to be in the best interest of the state service, group layoff conference sessions may be authorized by the appointing authority.

(f) At the layoff conference, each employee shall be informed of the employee's right to seek reemployment opportunities with the state, including placement assistance provided by the division. Placement assistance shall be available to the affected employee for up to three years after the effective date of the layoff, unless the affected employee requests in writing that the employee does not want placement assistance.

(g) Any employee who is not scheduled for layoff, but whose position will be vacated during the layoff and bumping process, and who refuses to accept a transfer or demotion to another position may request to be laid off voluntarily. Any employee who has been granted a voluntary layoff shall have reemployment rights.

(h) All disputes resulting from the forfeiture of bumping rights shall be resolved by the director. (Authorized by K.S.A. 2014 Supp. 75-3747; implementing K.S.A. 75-2948; effective May 1, 1984; amended Jan. 18, 1994; amended Dec. 17, 1995; amended May 31, 1996; amended Jan. 6, 2017.)

1-14-11. Furlough. (a) For purposes of this regulation, “furlough” shall mean mandatory leave without pay for a preset number of hours during each pay period covered by the furlough. There are two types of furloughs.

(1) An administrative furlough is a planned action by an agency that is designed to address budget reductions necessitated by reasons other than a lapse in appropriations. A furlough plan shall be required for each administrative furlough.

(2) An emergency furlough occurs if there is an immediate or imminent lack of funding to continue agency operations or any emergency that results in an unanticipated interruption of funding to the agency. In an emergency furlough, an affected agency could have to cease activities that are not excepted by law, typically with very little lead time. A furlough plan shall not be required for any emergency furlough.

(b) In accordance with this regulation, if an appointing authority deems it necessary, the appointing authority may implement an administrative furlough or an emergency furlough for all employees in the classified or unclassified service in designated classes, positions, organizational units, geographical areas, or any combination of those groups unless specific funding sources necessitate exceptions. An employee’s social security and retirement contributions shall be affected under a furlough, but all other benefits, including the accrual of vacation and sick leave, shall continue, despite any other regulations to the contrary. A furlough shall not affect the employee’s continuous service, length of service, pay increase anniversary date, or eligibility for authorized holiday leave or pay.

(c)(1) For each administrative furlough, at least 30 calendar days before the date the administrative furlough is to be implemented, the appointing

authority shall prepare a furlough plan specifying the following information:

(A) The cause of the funding shortage;
(B) the effective date of the furlough and the date on which the furlough is to end;

(C) the methods for notifying the affected employees;

(D) the amount of advance notice that will be given to affected employees, which shall not be less than 10 calendar days;

(E) the estimated cost savings;

(F) each class, organizational unit, or geographical area to be affected;

(G) the criteria used to select each class, position, organizational unit, or geographical area to be included in the furlough;

(H) any exceptions to the furlough plan based on funding sources; and

(I) the number of hours by which the workweek will be reduced, including separate categories detailing the proposed reduction in hours by standardized increments for exempt and nonexempt employees.

(2) A copy of each furlough plan prepared in accordance with this subsection shall be submitted to the director at least 30 days before the date the administrative furlough is to be implemented.

(d) For each emergency furlough, the affected employees and the director shall be notified by the appointing authority as soon as it is practical to do so.

(e) This regulation shall not be used as a disciplinary action against any employee. (Authorized by K.S.A. 75-3706, K.S.A. 2013 Supp. 75-3747, and K.S.A. 75-5514; implementing K.S.A. 75-3707, 75-3746, and 75-5505; effective, T-88-5, Feb. 11, 1987; effective, T-89-1, May 1, 1988; effective Oct. 1, 1988; amended May 31, 1996; amended June 5, 2005; amended Sept. 12, 2014.)

1-14-12. Layoff procedures for an abolished agency. With the approval of the secretary of administration, alternative procedures to the layoff provisions specified in the regulations may be established by the director if an entire agency is abolished. (Authorized by K.S.A. 75-3747; implementing K.S.A. 75-2948; effective Dec. 27, 1993.)

1-14-12a. (Authorized by K.S.A. 75-3706, and K.S.A. 1996 Supp. 75-4370, 75-4371 and 75-4377; implementing K.S.A. 1996 Supp. 75-4370, 75-4371, 75-4372, 75-4373, 75-4374, 75-4375 and 75-4376; effective, T-1-11-21-96, Nov. 21, 1996; effective Feb. 21, 1997; revoked June 7, 2002.)

Article 15.—DISCRIMINATION

1-15-1 and 1-15-2. (Authorized by K.S.A. 75-2939, K.S.A. 1975 Supp. 75-2929, 75-2940, 75-2949, 75-3706, 75-3746; effective, E-74-41, Aug. 16, 1974; effective, E-76-17, March 27, 1975; effective May 1, 1976; revoked May 1, 1979.)

Article 16.—TRAVEL REIMBURSEMENT

1-16-1. Personal funds to be supplied. Except as otherwise provided in K.A.R. 1-16-1a, employees shall provide themselves with sufficient funds for all current expenses. Blanket advances from the state treasury or other special funds to cover the prospective expenses of travel are not allowed except as authorized by K.S.A. 75-3072. (Authorized by K.S.A. 75-3207; effective Jan. 1, 1966; amended May 1, 1979.)

1-16-1a. Travel; advance from imprest fund. In exceptional circumstances and in hardship cases, an agency head may authorize travel subsistence advances through the authorized imprest funds and the proper disbursing official to an employee entitled to subsistence of mileage allowances under these regulations, a sum considered advisable with regard to the character and probable duration of the travel expenses is recoverable from the employee or the employee's estate by: (a) setoff against accrued pay, or other amount due the employee; and

(b) such other methods as provided by law. (Authorized by K.S.A. 75-3207; effective May 1, 1979.)

1-16-1b. Advisory personnel; subsistence and mileage payment. For purposes of payment of subsistence, transportation, mileage and other allowances for official travel, an employee shall include an individual employed intermittently by or under an agency as an advisor or advisory committee member, irrespective of whether compensation is paid to such individual or the amount thereof. (Authorized by K.S.A. 1979 Supp. 75-3207; effective May 1, 1979; amended May 1, 1980.)

1-16-2. Official station; expense-related matters. (a) Office employee. The official station of an officer or employee assigned to an office shall be the city or town where such office is located. Transportation costs between the employee's domicile and the office and subsistence within the limits of an employee's official station shall not be reimbursable.

(b) Field employees. The official station of each field employee shall be designated by the administrative head of the state agency. Subsistence within the limits of the employee's official station or domicile shall not be allowed. No transportation costs shall be allowed between any such employee's place of residence and the office to which such employee is assigned.

(2) Nonreimbursable travel. When additional expense is incurred by reason of an employee residing in a city or town other than the official station, or additional expense is otherwise caused by an employee's choice of residence, such an expense is not reimbursable except as provided in K.A.R. 1-16-2a. (Authorized by and implementing K.S.A. 75-3207; effective Jan. 1, 1966; amended, E-69-18, Aug. 14, 1969; amended Jan. 1, 1970; amended May 1, 1979; amended, T-1-4-26-93, April 26, 1993; amended July 12, 1993.)

1-16-2a. Relocation assistance. (a) The provisions of this regulation shall apply only to employees who are transferred to a new official station that is more than 25 miles from the old station and to new employees who are recruited under the provisions of 1997 SB 104, § 1. However, no subsistence allowance shall be paid under this regulation for expenses incurred within 30 miles of the official station at the time of travel.

(b) For purposes of searching for a new residence, in the 30-day period preceding an employee's transfer or the employee's original appointment date, the employee may be allowed subsistence reimbursement for not more than 15 calendar days at the current prevailing subsistence rates and private car mileage reimbursement for not more than one round trip from the employee's domicile.

(c) To the extent considered necessary and appropriate by the appointing agency head, the agency may pay all or part of the following relocation expenses:

(1) Subsistence expenses for the employee while en route between the old and new official station or, for an employee recruited under 1997 SB 104, § 1, while en route between the old domicile and new domicile; and

(2) a mileage allowance at the rate provided to reimburse state employees for the use of a privately owned conveyance for transporting the employee's immediate family from the old domicile to the new official station. However, such expenses may be allowed for only one one-way trip in connection with each change of official station

and domicile of the employee, and for transfers, only in cases in which the new station is over 25 miles from the old station.

(d) On and after the date of the employee's transfer or original appointment, subsistence expenses of the employee may be paid for a period of 30 days while the employee is occupying temporary quarters and trying to locate or waiting to enter a permanent residence. Subsistence expense payments to the employee may be extended for additional 30-day periods when deemed necessary by the agency head, with approval of the secretary of administration, while the employee's residence is in temporary quarters. (Authorized by and implementing K.S.A. 75-3203, 75-3207, and 1997 SB 104, § 1; effective May 1, 1979; amended, T-1-4-26-93, April 26, 1993; amended July 12, 1993; amended, T-1-7-1-97, July 1, 1997; amended Aug. 8, 1997.)

1-16-2b. Moving expenses. (a) The provisions of this regulation shall apply only when a permanent employee transfers within a state agency or from one agency to another for the convenience or benefit of the employing agency and the official station is more than 25 miles from the old official station, or when an employee has been recruited under the provisions of 1997 SB 104, § 1.

(b) The head of the employing agency may pay reasonable moving expenses to a commercial carrier or may reimburse the employee as authorized by this regulation, in an amount not to exceed the actual expenses.

(1) The employee may be reimbursed or a commercial carrier may be paid for the expenses of transporting, packing, crating, temporarily storing, draying, unpacking, and obtaining transit insurance for up to 12,000 pounds net weight of household goods and personal effects, excluding any cost for disassembling yard toys, patio equipment, window air conditioners, and shelving.

(2) When an employee transports a house trailer or mobile dwelling for use as a residence and the employee otherwise would be entitled to transportation of household goods and personal effects under paragraph (1) of this subsection, the head of the employment agency may pay for the following expenses:

(A) A mileage allowance at the rate provided to reimburse state employees for the use of a privately owned conveyance, including the payment of necessary tolls, charges, and permit fees, if the trailer or dwelling is transported by the employee; or

(B) commercial transportation of the house trailer or mobile dwelling, at agency expense or through reimbursement to the employee, including the payment of necessary tolls, charges, and permit fees, if the trailer or dwelling is not transported by the employee. (Authorized by and implementing K.S.A. 75-3706 and 1997 SB 104, § 1; effective May 1, 1979; amended May 1, 1981; amended, T-1-4-26-93, April 26, 1993; amended July 12, 1993; amended, T-1-7-1-97, July 1, 1997; amended Aug. 8, 1997.)

1-16-2c. Non-reimbursable transfer expenses. When a transfer is made primarily for the convenience or benefit of the employee or at the employee's request, the expense of travel and transportation, expense of transporting, packing, crating, temporary storage, drayage, unpacking of household goods and personal effects, and transit insurance shall not be allowed or paid from agency funds. (Authorized by K.S.A. 75-3207; effective May 1, 1979.)

1-16-2d. (Authorized by and implementing K.S.A. 75-3207, 75-3219 and 75-3224; effective May 1, 1979; amended, T-1-4-26-93, April 26, 1993; amended July 12, 1993; revoked, T-1-7-1-97, July 1, 1997; revoked Aug. 8, 1997.)

1-16-2e. Bidding required. (a) Moving expenses that may be paid pursuant to K.A.R. 1-16-2b(a) shall not exceed the total cost of moving a comparable household of 12,000 pounds of household furnishings and personal effects by commercial carrier at the tariff rates filed with and approved by the state corporation commission.

(b) Each employee who is eligible for moving expenses shall attempt to obtain three firm rate bids from commercial carriers and shall be responsible for selection of the lowest responsible carrier. Any contractual arrangement shall be between the state employee and the commercial carrier.

(c) The firm rate bid shall include costs of the following services:

- (1) transportation;
- (2) material and labor for packing and unpacking barrels, drums and cartons;
- (3) appliance service;
- (4) piano pick-up and delivery; and
- (5) transit insurance. (Authorized by and implementing 1997 SB 104, § 1; effective May 1, 1979; amended, T-85-46, Dec. 19, 1984; amended May 1, 1985; amended, T-1-7-1-97, July 1, 1997; amended Aug. 8, 1997.)

1-16-2f. (Authorized by K.S.A. 75-3207; effective May 1, 1979; revoked, T-1-4-26-93, April 26, 1993; revoked July 12, 1993.)

1-16-2g. (Authorized by and implementing K.S.A. 75-3224; effective May 1, 1979; amended May 1, 1981; revoked, T-85-46, Dec. 19, 1984; revoked May 1, 1985.)

1-16-2h. (Authorized by K.S.A. 75-3207; effective May 1, 1979; revoked, T-85-46, Dec. 19, 1984; revoked May 1, 1985.)

1-16-2i. Self-move. Authorized costs for a self-move may be paid when deemed desirable by the agency head and may include: (a) rental costs, plus insurance, of a van or trailer; or

(b) private car mileage one (1) way for a personally owned conveyance at the mileage rate prescribed by K.A.R. 1-18-1a. When a move of this type is undertaken by an employee, the time required to complete the move is chargeable as normal working time. When the estimated time of move and costs appear unreasonable, a commercial carrier bid may be required to establish the allowable maximum cost. (Authorized by K.S.A. 75-3207; effective May 1, 1979.)

1-16-2j. Limitations, employee's responsibility. (a) An agency head may authorize combination mobile home and self moves. However, the cost of such a move shall not exceed the comparable cost for commercial carrier moves.

(b) Employees shall be responsible upon completion of commercial carrier moves to inspect their belongings, note damages on the shipper's bill of lading, and sign the bill of lading. (Authorized by and implementing K.S.A. 75-3224; effective May 1, 1979; amended, T-85-46, Dec. 19, 1984; amended May 1, 1985.)

1-16-2k. Sale of residence, expenses not allowed. Expenses of the sale of the employee's residence, losses on the sale of an employee's residence or the settlement of an employee's residence or the settlement of an unexpired lease by the employee at the old residence and the purchase of a home at the new official station required to be paid by the employee shall not be allowable expenses of the agency. (Authorized by and implementing K.S.A. 75-3207, 75-3219 and 75-3224; effective May 1, 1979; amended, T-1-4-26-93, April 26, 1993; amended July 12, 1993.)

1-16-2l. Separation from service. A former employee separated by reason of reduction in force or transfer of function who within one (1) year after separation is re-employed by a non-temporary appointment at a different geographical location from that which separation occurred, may be allowed and paid authorized expenses in the same manner and to the same extent as though the employee had been transferred in the interest of the state agency without a break in service to the location of re-employment from the location where separated. (Authorized by K.S.A. 75-3207; effective May 1, 1979.)

1-16-3. Official station; three months. If an employee has been continuously stationed at one place for three months, or travels to a place of work where more than one-half of the work time is spent for three or more months, that place shall be immediately designated as the official station and no further allowance shall be made for subsistence expenses incurred there. Upon written application to and approval of the secretary of administration, a maximum of two extensions may be requested and approved. Each extension shall not exceed three months but in no event shall the total duration of such extensions exceed six additional months. (Authorized by and implementing K.S.A. 75-3207 and 75-3207a; effective Jan. 1, 1966; amended, E-69-18, Aug. 14, 1969; amended Jan. 1, 1970; amended May 1, 1979; amended, T-87-17, July 1, 1986; amended May 1, 1987.)

1-16-3a. Incapacitated employee on intrastate travel; subsistence and transportation. An employee who, while traveling on official intrastate business and away from the employee's designated official station or domicile, becomes incapacitated by illness or injury not due to the employee's misconduct, is entitled at the discretion of the agency head to subsistence allowance for a period not to exceed five (5) workdays and appropriate mileage reimbursement for returning the employee's privately owned conveyance to the employee's designated official station or domicile as the case may be. (Authorized by K.S.A. 75-3207; effective May 1, 1979.)

1-16-3b. Incapacitated employee on interstate travel; subsistence and transportation. An employee who, while traveling on official interstate business away from the employee's designated official station or domicile, becomes incapacitated by illness or injury not due to the em-

ployee's misconduct, is entitled at the discretion of the agency head to subsistence allowance for a period not to exceed five (5) workdays and appropriate transportation expenses to the employee's designated official station or domicile as the case may be. (Authorized by K.S.A. 75-3207; effective May 1, 1979.)

1-16-3c. Official station; employee residing outside the designated official station. When an employee residing in an area other than the city designated as the employee's official station, travels on official state business from his or her residence to a destination which is outside the city designated as the employee's official station, the employee shall be paid either mileage between the official station and the destination, or mileage between the employee's residence and the destination, whichever is lesser. In returning to the employee's residence from the last point where official state business was conducted, the employee shall be paid mileage from that point to either his or her official station or his or her residence, whichever is lesser. For purposes of determining the time of departure from or arrival at the employee's residence for computing subsistence allowances, an adjustment to the actual time at which the employee commenced travel or at which travel terminated shall be made by dividing the unreimbursed mileage traveled by forty-five (45) miles per hour. The result shall be added to the time of actual departure from, or subtracted from the time of actual arrival at the employee's residence, to determine the allowable time to be used for computing the subsistence allowance. (Authorized by and implementing K.S.A. 1980 Supp. 75-3203, 75-3207; effective May 1, 1981.)

1-16-4. Date and hour of departure and return. If an employee is granted leave of absence while on official travel, including Saturdays, Sundays, and holidays, the employee's subsistence allowance claim shall be adjusted accordingly for the date and hour of departure from, and the return to, the field duty station or to the official station. (Authorized by and implementing K.S.A. 2015 Supp. 75-3207; effective Jan. 1, 1966; amended Feb. 5, 2016.)

1-16-5. After leave of absence. Subsistence shall be allowed after leave of absence from the time of return to field duty station until travel assignment is completed by return to official station or, in the event of transfer to a new official station,

until arrival at such new station. (Authorized by K.S.A. 1965 Supp. 75-3207; effective Jan. 1, 1966.)

1-16-6. Railroad accommodations. When employees travel by railroad, first class day coach seating accommodations may be authorized. No railroad sleeping accommodations will be reimbursed inasmuch as K.S.A. 1968 Supp. 75-3207 as amended provides for payment on a quarter day basis of a subsistence allowance which includes charges for lodging expenses. (Authorized by K.S.A. 75-3207; effective Jan. 1, 1966; amended, E-69-18, Aug. 14, 1969; amended Jan. 1, 1970.)

1-16-7. Airline travel accommodations. When the administrative head of the agency determines that airline travel is the most economical or advantageous to the state, the use of airline travel may be authorized. The most economical mode of airline travel is considered to be tourist or economy class. If tourist or economy class accommodations are not available, a statement from the airline or travel agency must be submitted on or with the voucher. (Authorized by K.S.A. 1965 Supp. 75-3207; effective Jan. 1, 1966.)

1-16-8. Use of privately owned or operated conveyance, limitations; reimbursement for transportation and subsistence expenses. (a) In-state travel. If the use of a privately owned or operated conveyance on official state business is authorized by the agency head or the agency head's designee, reimbursement shall be on a mileage basis at the rate specified and under the limitations prescribed by K.A.R. 1-18-1a. Mileage shall be calculated in accordance with K.A.R. 1-17-11, except that storage or parking charges for a privately owned conveyance at any commercial transportation terminal, while the traveler is on an extended trip, and turnpike tolls, may be allowed in addition to this mileage allowance.

(b) Out-of-state travel.

(1) If the use of a privately owned or operated conveyance on official state business, instead of common carrier, is authorized by the agency head or the agency head's designee, the traveler shall be allowed private conveyance mileage as prescribed by K.A.R. 1-18-1a to the destination, turnpike tolls, and parking charges, or an amount equal to economy class air fare to the air terminal nearest the destination, whichever is lesser. Out-of-state subsistence allowance shall be allowed only for the number of quarter days that would have been necessary had the traveler used the fastest public

transportation available to the destination instead of a private conveyance. No taxi or air terminal expenses shall be allowed at the destination. Air terminal shall mean the principal air terminal in that general geographic area.

(2) If two or more travelers on official business travel in one privately owned conveyance instead of common carrier, the use of one conveyance may be authorized on a mileage basis. In such cases, the subsistence allowed shall be for the number of days the trip would take by car using the usually traveled route to the point of destination as provided in K.A.R. 1-17-11.

(3) Upon written, prior approval of the agency head, exceptions to this subsection may be granted in unusual circumstances if deemed to be in the best interest of the state.

(c) Exception. Nothing in this regulation shall apply to any person to whom K.S.A. 75-3212 and K.S.A. 75-3216, and amendments thereto, apply. (Authorized by and implementing K.S.A. 2015 Supp. 75-3207; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979; amended May 1, 1981; amended April 30, 1990; amended July 1, 2010; amended Feb. 5, 2016.)

1-16-9 and 1-16-10. (Authorized by K.S.A. 1974 Supp. 75-3207; effective Jan. 1, 1966; revoked, E-74-4, Nov. 2, 1973; revoked May 1, 1975.)

1-16-11. Taxicabs. Taxicab charges shall be allowed, except when limousine services are available between any of the following points: Only from regular domicile or place of business to station or other terminal; from station or terminal at origin or destination of trip to hotel, domicile or place of business; or between bus, rail or plane stations or terminals or other points of official duty. Taxicab charges from a hotel to a restaurant or from a restaurant to a hotel are not reimbursable. (Authorized by K.S.A. 1965 Supp. 75-3207; effective Jan. 1, 1966.)

1-16-12. Home—travel from and to. Actual taxi or common carrier fares shall be allowed for transportation directly from home of traveler to railroad, bus or airport terminals at the beginning of official travel status and for transportation directly from railroad, bus or airport terminals to home of traveler at conclusion of official travel status. (Authorized by K.S.A. 1965 Supp. 75-3207; effective Jan. 1, 1966.)

1-16-13. Rental or charter of special conveyances. The rental or charter of aircraft, automobiles, boats, busses, or other special conveyances shall be held to a minimum but may be authorized in those cases when no public or ordinary means of transportation are available, or when such public or ordinary means of transportation cannot be used advantageously in the best interests of the state. Specific justification shall accompany the voucher in each instance where the use of a special conveyance is authorized. Mere convenience for the traveler is not justification for the rental or charter of a special conveyance.

When public or ordinary means of transportation were not available, the justification for the use of a special conveyance shall show the location where travel by special conveyance commenced and the points visited. The justification shall also state that public or ordinary means of transportation were not available.

When public or ordinary means of transportation are available but cannot be used advantageously in the best interest of the state, the justification for the use of a special conveyance shall show the location where travel by special conveyance commenced and the points visited. The director of accounts and reports may require comparison of the cost of public or ordinary means of transportation to the cost of the special conveyance. Other factors should also be included in the justification when applicable. (Authorized by K.S.A. 75-3207; effective Jan. 1, 1966; amended May 1, 1979.)

1-16-14. No allowance for subsistence furnished by public agency. No allowance for subsistence shall be claimed where meals or lodging are furnished without cost to the traveler by any agency supported by public funds. (Authorized by K.S.A. 75-3207; effective Jan. 1, 1966; amended, E-69-18, Aug. 14, 1969; amended Jan. 1, 1970.)

1-16-15. Reduced allowances. (a) Except as provided in K.A.R. 1-16-18, the agency head, or the agency head's designee, may approve paying a reduced meals allowance or lodging expense. However, the following shall apply:

(1) If the cost of meals is included within the cost of a registration fee or other fees and charges paid by the agency, the agency shall pay the applicable reduced subsistence allowance specified in K.A.R. 1-16-18.

(2) If both meals and lodging will be provided at no cost to an agency's traveling employee, the agency shall be authorized to not pay any subsistence for this travel.

(b) The approval of reduced subsistence allowances by the agency head or the agency head's designee shall be based on reducing quarter-day meals allowances and lodging expenses, and this reduced subsistence shall in all other respects be paid in accordance with applicable regulations and accounting procedures. (Authorized by and implementing K.S.A. 2015 Supp. 75-3207; effective Jan. 1, 1966; amended, E-69-18, Aug. 14, 1969; amended Jan. 1, 1970; amended May 1, 1979; amended May 1, 1982; amended, T-84-20, July 26, 1983; amended May 1, 1984; amended, T-87-26, Oct. 1, 1986; amended May 1, 1987; amended, T-89-1, Jan. 7, 1988; amended Oct. 1, 1988; amended July 1, 2010; amended Feb. 5, 2016.)

1-16-16 and 1-16-17. (Authorized by K.S.A. 75-3207; effective Jan. 1, 1966; revoked, E-69-18, Aug. 14, 1969; revoked Jan. 1, 1970.)

1-16-18. Subsistence allowance. (a) General provisions. Except as otherwise specifically provided by law, subsistence allowances for in-state and out-of-state travel shall be paid on the basis of a meals allowance and the actual cost of lodging expenses incurred, within the limits specified in this regulation.

Meals allowance rates and lodging reimbursement limitation rates established pursuant to K.S.A. 75-3207a, and amendments thereto, shall be issued through informational circulars of the department of administration. Rates shall be established for the following geographic areas or categories of travel:

- (1) Travel to in-state destinations;
- (2) travel to out-of-state destinations;
- (3) international travel. As used in this regulation, "international travel" shall mean travel outside the 50 states, the District of Columbia, and U.S. territories and possessions;
- (4) travel involving conference lodging that qualifies under K.A.R. 1-16-18a; and
- (5) other categories as the secretary of administration deems appropriate.

(b) Meals allowance; general provisions. Except as provided in subsection (c), the meals allowance shall be paid in an amount not to exceed rates established pursuant to K.S.A. 75-3207a, and amendments thereto.

(c) Meals allowance; exceptions.

(1) If the cost of meals is included within the cost of registration fees or other fees and charges paid by the agency or is supplied without cost by another party, the meal allowance shall be reduced by the appropriate per-meal allowance established pursuant to K.S.A. 75-3207a, and amendments thereto.

(2)(A) Except as prohibited by paragraph (c)(2)(B), the agency head or the agency head's designee may authorize any employee who does not incur lodging expenses to be reimbursed for one meal on any day on which either of the following circumstances occurs:

(i) The employee is required to travel on official state business, and the employee's workday, including travel time, is extended three hours or more beyond the employee's regularly scheduled workday.

(ii) The employee is required to attend a conference or a meeting as an official guest or participant, and a meal is served during the required attendance time.

(B) No meals shall be reimbursed if the location at which the official business is conducted is within 30 miles of the employee's official station or if a meal is provided at no cost to the employee.

(C) Each request for reimbursement of a meal under paragraph (c)(2) shall identify the date, purpose, destination, and time of the travel, conference, or meeting, and the meal requested for reimbursement.

(D) Each employee who receives reimbursement for a meal under paragraph (c)(2) shall be paid at the applicable per-meal allowance rate established pursuant to K.S.A. 75-3207a, and amendments thereto.

(d) Lodging expense limitations; general provisions.

(1) Reimbursement for lodging, or direct payment of lodging expenses to the lodging establishment, shall be made on the basis of actual, single-rate lodging expenses incurred and shall be supported by the original official receipt of the lodging place or other suitable documentation. Subject to applicable lodging expense limitations established pursuant to K.S.A. 75-3207a and amendments thereto, reimbursement for lodging expenses, or direct payment of lodging expenses to the lodging establishment, shall be limited to the lodging establishment's lowest available rate for normal single occupancy on the day or days the lodging expense was incurred.

(2) Taxes associated with lodging expenses shall not be included in the applicable lodging expense limitation rates established pursuant to K.S.A. 75-3207a, and amendments thereto, and shall be paid as an additional reimbursement.

(e) Lodging expense limitations; exception. Specific exceptions to the applicable dollar limitation on lodging expenses may be made pursuant to K.S.A. 75-3207a, and amendments thereto. (Authorized by and implementing K.S.A. 2015 Supp. 75-3207 and 75-3207a; effective, E-80-10, July 11, 1979; effective May 1, 1980; amended, E-81-14, June 12, 1980; amended May 1, 1981; amended, E-82-14, July 1, 1981; amended May 1, 1982; amended, T-84-20, July 26, 1983; amended May 1, 1984; amended May 1, 1985; amended, T-87-26, Oct. 1, 1986; amended May 1, 1987; amended, T-89-1, Jan. 7, 1988; amended Oct. 1, 1988; amended July 1, 1990; amended, T-1-8-14-90, May 1, 1990; amended Oct. 8, 1990; amended, T-1-9-26-91, Oct. 1, 1991; amended Nov. 18, 1991; amended, T-1-1-1-93, Jan. 1, 1993; amended Feb. 22, 1993; amended, T-1-6-28-95, July 1, 1995; amended Oct. 27, 1995; amended, T-1-7-1-97, July 1, 1997; amended Aug. 8, 1997; amended July 1, 1998; amended July 1, 1999; amended Feb. 15, 2002; amended July 1, 2010; amended Feb. 5, 2016.)

1-16-18a. Designated high-cost geographic areas; exceptions; conference lodging.

(a) For official travel to and from, or within, any designated high-cost geographic area in which the traveler is required to sleep away from home, the applicable subsistence allowance rate for that designated high-cost geographic area may be paid. However, reimbursement on this basis shall not be allowable if the area is only an intermediate stopover at which no official duty is performed or if the subsistence expenses incurred relate to relocation, to travel to seek residence quarters, or to travel to report to a new permanent duty station or to temporary quarters.

(b) Reimbursement for travel in designated high-cost geographic areas shall be at the prescribed designated high-cost geographic area rate, unless the agency establishes a reduced rate as provided in K.A.R. 1-16-15. If an out-of-state trip is to two or more destination cities with different subsistence allowance rates, the subsistence allowance rate shall change subject to and on application of the appropriate meals allowance as determined by the time of arrival at the second destination city.

(c)(1) If an employee is required or authorized to attend a conference, the agency head or the agency head's designee may approve reimbursement or direct payment of actual lodging expenses. Before the date of travel, the employee shall submit to the agency head or the agency head's designee conference materials indicating that the conference will be held at or in connection with a lodging establishment with rates exceeding both the applicable lodging expense limitation established under K.A.R. 1-16-18 and the exception provided in K.S.A. 75-3207a, and amendments thereto.

(2) The reimbursement or direct payment of actual lodging expenses shall be effective for the approved conference and for official state business related to the conference and shall be applicable only to the state employee attending the conference.

(3) For purposes of this regulation, the term "conference" shall mean any seminar, association meeting, clinic, colloquium, convention, symposium, or similar gathering that is attended by a state employee in pursuit of a goal, obligation, function, or duty imposed upon a state agency or performed on behalf of a state agency. (Authorized by and implementing K.S.A. 2015 Supp. 75-3207a; effective, E-80-10, July 11, 1979; effective May 1, 1980; amended May 1, 1981; amended, E-82-14, July 1, 1981; amended May 1, 1982; amended, T-84-20, July 26, 1983; amended May 1, 1984; amended May 1, 1985; amended, T-87-26, Oct. 1, 1986; amended May 1, 1987; amended, T-89-1, Jan. 7, 1988; amended Oct. 1, 1988; amended July 1, 1990; amended, T-1-1-1-93, Jan. 1, 1993; amended Feb. 22, 1993; amended April 1, 1996; amended July 1, 1998; amended July 1, 1999; amended July 1, 2010; amended Feb. 5, 2016.)

1-16-18b. Sharing of lodging or travel expense reimbursement. State employees or officials who are eligible to receive reimbursement for lodging expenses incurred in connection with in-state travel shall not be required to share lodging accommodations with other state employees. (Authorized by and implementing K.S.A. 75-3207; effective, T-87-26, Oct. 1, 1986; amended May 1, 1987.)

1-16-19. (Authorized by K.S.A. 75-3207; effective Jan. 1, 1966; revoked, E-69-18, Aug. 14, 1969; revoked Jan. 1, 1970.)

1-16-20. Miscellaneous expense definition. Miscellaneous expense shall mean any expense deemed necessary in the conduct of the official business of the state that is not included in the categories of subsistence allowance, mileage, or fares in lieu of mileage and state-owned vehicle operation. All miscellaneous expenses shall be claimed as “miscellaneous nonsubsistence expense” on the travel reimbursement form as prescribed by the director of accounts and reports and shall include items listed under subsections (b) through (g).

(a) Receipts. A receipt evidencing a payment shall be obtained for each transaction involving miscellaneous expenditures, except taxi fares, telephone calls, telegrams, and intracity streetcar, bus fares, and limousine service.

(b) Baggage. Charges for baggage in excess of the weight or size carried free by transportation companies shall be allowed if the excess baggage is used for official business. Charges for the storage of baggage may also be allowed if it is shown that the storage was due to official business. Specific justification shall be submitted with the travel reimbursement form, as prescribed by the director of accounts and reports.

(c) Telephone and facsimile messages. Expenses for official telephone and facsimile messages that must be paid for by the traveler shall be allowed. Toll and local calls and facsimiles shall be supported by documentation submitted with the travel reimbursement form as prescribed by the director of accounts and reports, showing the date, the city or town called or faxed, the name of the person or firm called or the place to which the fax was sent, and the cost of each call or fax.

(d) Stenographic services. Charges for official stenographic services shall be allowed while on official travel.

(e) Purchase of supplies. The purchase of stationery and all other similar supplies shall be allowed in emergencies warranting the use for handling official business while on official travel.

(f) Transportation by common carrier or special conveyance. The cost of common or special conveyance transportation tickets shall be considered a miscellaneous expense.

(g) Taxicabs. Taxicab charges shall be claimed for reimbursement as miscellaneous expenses. Both points of origin and destination for each such fare shall be shown on a travel reimbursement form, as prescribed by the director of accounts and reports.

This regulation shall be effective on and after July 1, 2010. (Authorized by and implementing K.S.A. 2008 Supp. 75-3207; effective Jan. 1, 1966; amended, E-69-18, Aug. 14, 1969; amended Jan. 1, 1970; amended July 1, 2010.)

1-16-21. Registration fees. The payment of registration fees which are required as admittance or attendance fees for participation in meetings shall be allowed. (a) Advance payment of registration fees shall be made upon application when supported by an announcement of the meeting indicating the cost of such registration fees.

(b) Reimbursement of registration fees shall be made when such request is supported by the official receipt of the meeting, when available, or upon declaration of the employee that he or she attended the meeting and paid the registration fee.

(c) Expenditures for the payment of registration fees for obtaining the privileges of membership or other personal benefits from an organization are not reimbursable. Memberships in organizations must be in the name of the state agency. (Authorized by K.S.A. 75-3207; effective Jan. 1, 1966; amended, E-69-18, Aug. 14, 1969; amended Jan. 1, 1970; amended May 1, 1978.)

1-16-22. Subsistence and lodging expenses; students, inmates, prisoners and patients. When the employee finds it necessary to expend funds for meals or lodgings of students, inmates, prisoners or patients while on official travel, a claim for those expenses shall be made on a reimbursement basis supported by receipts or by the appropriate subsistence rate. The amount reimbursable for students shall not exceed the established limitations for state officials or employees. (Authorized by and implementing K.S.A. 75-3207; effective Jan. 1, 1966; amended, E-69-18, Aug. 14, 1969; amended Jan. 1, 1970; amended July 12, 1993.)

1-16-23 to 1-16-27. (Authorized by K.S.A. 1974 Supp. 75-3207; effective Jan. 1, 1966; revoked, E-74-4, Nov. 2, 1973; revoked May 1, 1975.)

Article 17.—USE OF STATE-OWNED OR -OPERATED MOTOR VEHICLES ON OFFICIAL STATE BUSINESS

1-17-1. Use of state-owned or operated motor vehicles on official state business; applicability; definitions. (a) The rules and regulations in this article shall apply, except as may be expressly indicated, to the use, charges for use, or reimburse-

ment for use, of all motor vehicles owned, leased or operated by an agency, officer, or employee of the state when on official state business.

(b) For the purpose of these rules and regulations, the following terms shall have the meanings described.

(1) "State-owned or operated motor vehicles" means all motor vehicles, including privately-owned motor vehicles, authorized for use on official state business.

(2) "State-owned or leased motor vehicles" means only those motor vehicles owned or directly leased by the state or its agencies and specifically excludes privately-owned motor vehicles.

(3) "Official state business" means the pursuit of a goal, obligation, function, or duty imposed upon a state agency or performed on behalf of a state agency.

(4) "Secretary" means the secretary of administration.

(5) "Motor pool" means the central motor pool or any branch thereof established pursuant to K.S.A. 75-4602 *et seq.* and any amendments thereto. (Authorized by K.S.A. 75-4608; implementing K.S.A. 75-4604; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979; amended Nov. 18, 1991.)

1-17-2. Same; use of state-owned or leased motor vehicles. (a) State-owned or leased motor vehicles shall only be used for official state business and shall only be operated by a person who has a valid driver's license and who is:

(1) an officer or employee of the state of Kansas; or

(2) any other person who has been approved by the secretary or the secretary's designee to operate a state-owned or leased motor vehicle while engaged in official state business.

(b) Only employees of the state or a person or persons reasonably engaged in and accompanying a state employee or other person approved under subsection (a) on official state business shall be allowed to ride in a state-owned or leased motor vehicle. (Authorized by and implementing K.S.A. 75-4608; effective, E-74-4, Nov. 2, 1973; effective, E-76-17, March 27, 1975; effective May 1, 1975; amended May 1, 1976; amended Nov. 18, 1991.)

1-17-2a. State-owned or leased vehicles; travel from employee's residence to his or her official work station. (a) (1) State-owned or leased motor vehicles shall not be used to com-

mute between the employee's residence and the employee's official work station, except:

(A) when parking the vehicle at the official work station overnight subjects the vehicle to a high risk of vandalism;

(B) when the vehicle is used by an official or employee who is regularly called to duty after normal work hours in connection with law enforcement activities or dealing with emergencies which result from an act of God; or

(C) for trip vehicles assigned to the traveler, on the evening of the work day immediately preceding the date of travel or the evening of the workday in which travel is completed.

(2) When the state-owned or leased motor vehicle is authorized to be used for travel to an employee's place of residence under paragraphs (1)(A) and (1)(B), the "reasonable distance" one-way between the employee's official work station and residence shall not exceed 10 miles unless the 10-mile limitation is specifically exempted by the secretary or the secretary's designee. For trip vehicles assigned to a traveler under paragraph (1)(C), "reasonable distance" shall be based on a determination that driving the vehicle home will not increase the total one-way trip mileage between the official work station and the destination by more than 10 miles.

(b) This regulation shall not apply to:

(1) an employee whose residence has been designated as the official work station because over 50% of the employee's work time involves direct travel from his or her residence; or

(2) state-owned or leased motor vehicles acquired or assigned for use in the state vanpool program. (Authorized by and implementing K.S.A. 75-4608; effective May 1, 1981; amended, T-87-17, July 1, 1986; amended May 1, 1987, amended Nov. 18, 1991.)

1-17-3. Same; use of state-owned or operated motor vehicles; responsibility of operator.

The operator of a state-owned or operated motor vehicle shall be responsible for operating the vehicle in a safe and prudent manner and in accordance with all applicable county, township, city ordinances and state laws pertaining to the operation of motor vehicles. Any fines or penalties arising from the operation of a state-owned or operated motor vehicle in an unlawful manner shall be and are the responsibility and obligation of the operator. (Authorized by K.S.A. 1974 Supp. 75-3706, 75-4608; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975.)

1-17-4. Same; use of state-owned or operated motor vehicles; compliance with regulations; condition precedent. Compliance with the provisions of these rules and regulations shall be a condition precedent to the right to operate or continue to operate a state-owned or operated motor vehicle on official state business or to be reimbursed for any expense that may, by law, or hereinafter in these rules and regulations, be allowed. (Authorized by K.S.A. 1974 Supp. 75-3706, 75-4608; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975.)

1-17-5. (Authorized by K.S.A. 75-3706, 75-4601 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979; revoked May 1, 1984.)

1-17-5a. Permanently-assigned vehicles.

(a) Any agency desiring to have a permanently-assigned motor pool vehicle may apply to the director of the central motor pool. The director shall approve the assignment if:

(1) the vehicle is driven no less than 18,000 miles per year when the driver or agency is located in Topeka and Shawnee County;

(2) the vehicle is driven no less than 15,000 miles per year when the driver or agency is located outside Topeka and Shawnee County;

(3) the employee to whom the vehicle is to be permanently assigned is required by the employee's official duties to travel at least 50% of the time;

(4) the vehicle is required for special service and equipped with two-way radio or other apparatus rendering the vehicle unusable for normal travel; or

(5) the vehicle is used for a special purpose, such as hauling special tools or equipment, transporting handicapped people or other special needs.

(b) If special equipment must be added to a central motor pool vehicle, the agency to whom the vehicle is assigned shall be responsible for the expense of installing that equipment.

(c) Upon exchange or retirement of any permanently-assigned vehicle, the agency shall remove any special equipment placed on or in the vehicle and repair all holes or other damage before return to central motor pool. (Authorized by K.S.A. 75-4608; implementing K.S.A. 75-4604; effective May 1, 1984.)

1-17-6. Requests for state-owned or leased motor vehicles on a daily or trip basis. Requests for motor pool vehicles shall be made

of the motor pool's administrative officer by the requesting operator submitting a requisition form to the motor pool at the time the vehicle is needed, or as the secretary may otherwise allow. The following information shall be required on the requisition form: (a) Name of driver and driver's license number;

(b) Agency;

(c) Date and hour the vehicle is needed;

(d) Type of vehicle (sedan, station wagon, van, pickup, etc.); and

(e) Destination and time of return.

If it is later determined that the vehicle is not needed, the motor pool shall be notified promptly. If the agency requesting the vehicles does not give prompt notice of cancellation, the motor pool may charge the minimum daily rate. A requisition form shall be completed by the agency and signed by the agency head or a designee. The form, in duplicate, shall be presented to the motor pool. One copy shall be retained by the operator as authority to use the vehicle. Upon completion of the trip, the vehicle shall be returned to the motor pool and the operator shall indicate operation of the vehicle and list defects, if any, on the requisition form. The form shall be completed by the motor pool. The operator shall take one (1) copy for the agency and one (1) copy will be used for billing.

Procedures for the assignment on a daily or trip basis of state-owned or leased motor vehicles not within the central motor pool or a branch thereof, shall be approved by the secretary. (Authorized by K.S.A. 75-3706, 75-4601 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979.)

1-17-7. (Authorized by K.S.A. 75-3706, 75-4601 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; revoked May 1, 1979.)

1-17-7a. Agency responsibility for vehicles rented to the agency for official duties.

At the time of employment, personnel of the state whose duties require operation of motor vehicles shall qualify for operating motor vehicles by having and maintaining in effect a valid driver's license. Each agency shall be responsible for proper care and maintenance of each permanently assigned vehicle and for adherence to maintenance and service schedules established by the secretary. Any damage or loss to the rented or permanently assigned vehicle or loss of equipment and costs related thereto on the vehicle may be chargeable

to the agency to which the vehicle is rented or permanently assigned. Such recoveries of costs to repair damages or to replace losses of vehicle equipment, excluding ordinary wear and tear, is authorized and may be pursued from available funds of the agency to whom the vehicle is rented or permanently assigned. In the event a vehicle is completely destroyed, the amount of such loss shall be the undepreciated book value of the vehicle. (Authorized by K.S.A. 75-4608; implementing K.S.A. 75-4607; effective May 1, 1979; amended May 1, 1981.)

1-17-7b. Written accident reports required. The following forms shall be completed and filed by the employee driver or someone designated by the employee's immediate supervisor: (a) Employee report of accident form shall be filed with the secretary or employee designated at the central motor pool.

(b) Accident investigating officer's report shall be filed with the secretary or employee designated at the central motor pool.

(c) Insurance company report form as required shall be submitted to the insurance company.

(d) Letter of the employee's immediate supervisor shall be submitted stating all facts obtained from the supervisor's investigation, and the supervisor's opinion concerning the accident. The letter report shall state the supervisor's recommendations concerning the establishment of negligence as it might apply to agency personnel.

(e) Copies of such reports and letters shall be filed in the individual employee's personnel files. (Authorized by K.S.A. 75-3706, 75-4601 *et seq.*; effective May 1, 1979.)

1-17-7c. Accident repairs. Employees are prohibited from making personal payments for repairs to motor pool vehicles as a result of accidents. Regular state purchasing and accounting procedures shall apply for payment of vehicle accident repairs. In cases where the liability is with the other party involved, checks for settlement and repair costs by liable party or insurance company shall be remitted directly to the department of administration, central motor pool. Any agency employee involved shall initiate any claim against any other party involved and assist in the collection of payment for vehicle repairs or replacement, if liability is with the non-state party. Notice of problems or delays in repairs to damaged vehicles and date of payment to repair shop shall be furnished

to the central motor pool. (Authorized by K.S.A. 75-3706, 75-4601 *et seq.*; effective May 1, 1979.)

1-17-8. Same; use rates and charges for motor pool vehicles. Motor pool vehicle use rates will be charges based on the actual cost of operating the motor pool, including reasonable overhead costs, vehicle depreciation, public liability insurance, and all operating, servicing, repair and replacement costs of all state-owned or leased vehicles assigned to the motor pool. An agency shall reimburse the motor pool within thirty days of date of billing. The basis for billing on passenger cars and station wagons shall be on miles operated with a minimum of 50 miles per day or 1,000 miles per month. A standard schedule of rates shall be promulgated and furnished each agency. (Authorized by K.S.A. 1974 Supp. 75-4601 *et seq.* and 75-3706; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975.)

1-17-9. (Authorized by K.S.A. 75-3706, 75-4601 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979; revoked May 1, 1981.)

1-17-10. State-owned or leased motor vehicles; travel records. (a) Each state agency shall ensure that travel records are maintained for each state-owned or leased motor vehicle assigned to the agency.

(b) For daily and trip assignments, each operator shall maintain an accurate record of mileage for the vehicle on forms prescribed by the secretary. The beginning and ending mileage shall be shown. Each driver shall sign the form certifying the daily or trip mileage, list all expenditures incurred, and attach all receipts to the form at the time of returning the vehicle.

(c) For each permanently assigned vehicle, the operator shall maintain a daily log of mileage, use, and expenses incurred in the operation of the vehicle on forms prescribed by the secretary. Each agency head or a designee shall submit the daily logs for each central motor pool vehicle to the secretary or the secretary's designee not later than five working days following the end of each month.

(d) The head of any state agency may request that the secretary approve an exemption from some or all of the record-keeping requirements of this regulation for the entire agency or some of the agency's employees. Such an exemption may be approved upon a finding by the secretary that the exemption is necessary or desirable in order to meet

the reasonable operational needs of the agency. The exemption may be revoked by the secretary at any time. (Authorized by and implementing K.S.A. 75-4608; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979; amended May 1, 1981; amended Nov. 22, 1996.)

1-17-11. State-owned or operated motor vehicles; verification of mileage; point of duty in interstate travel. For the purpose of computing mileage reimbursement, travel shall be deemed to be by way of the usually traveled, most direct route. Information and maps of the department of transportation shall be used in verifying mileage as reported or claimed by the traveler. Out-of-state mileage shall be based on mileage figures published by the American automobile association. In official interstate travel, the employee's hotel may be considered as a point of official duty. (Authorized by K.S.A. 75-3706, 75-4601 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979.)

1-17-12. Supplies, service, maintenance, repair, and storage of state-owned or leased motor vehicles. Supplies for, service, maintenance, repair, and storage of state-owned or leased motor vehicles shall be performed or arranged for under the supervision of the secretary or a designee and pursuant to contracts for such supplies, service, maintenance, repair, and storage and the facilities therefor entered into by the director of purchases or the secretary pursuant to K.S.A. 75-4605. The cost of such supplies, services, maintenance, repair, storage, and the facilities therefor, for state-owned or leased motor vehicle in a motor pool shall be included as part of the mileage charge made to user agencies. For state-owned or leased motor vehicles not assigned to the motor pool, the actual cost of such supplies, services, maintenance, repair, and storage, shall be borne by the agency incurring the same. (Authorized by K.S.A. 75-3706, 75-4601 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979.)

1-17-13. Expenses incurred in the operation of state-owned or leased motor vehicles.

(a) While on official state business, any operator may purchase operating or maintenance items or services, including gasoline, oil, tire repairs, and lubrication, for a state-owned or leased motor vehicle.

(b) (1) Except as authorized by the agency head, each operator shall purchase all gasoline for state-

owned or leased vehicles from self-service gasoline pumps.

(2) If open-end contracts for discount purchase of gasoline, oil or services are entered into by the director of purchases, those contracts shall be used wherever possible.

(3) Except in emergencies, tires shall be purchased under any applicable contract established by the director of purchases for state vehicle tires.

(4) If a special credit card is issued to secure operating or maintenance items or services, the card shall be used whenever possible.

(c) Other expenses, including charges for ferries, bridges, parking or toll roads, if paid by the operator, shall be submitted for reimbursement as permitted and in the manner required by the rules and regulations governing travel expenses. (Authorized by K.S.A. 75-3706, 75-4608; implementing K.S.A. 75-4608; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979; amended June 27, 1994.)

1-17-14. Repairs or purchases for central motor pool vehicles. Except as authorized by K.A.R. 1-17-15, no obligation for repairs or purchases in excess of \$75 shall be incurred without the prior approval of the central motor pool director. (Authorized by K.S.A. 75-3706, 75-4604; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979; amended May 1, 1986.)

1-17-15. Emergency repairs or purchases for central motor pool vehicles. Repairs or purchases necessary to safely drive a central motor pool vehicle to the immediate destination may be reimbursed upon justification and approval by the director of the central motor pool. No obligation for repairs or purchases in excess of \$200 shall be incurred without the prior approval of the central motor pool director. (Authorized by K.S.A. 75-3706, 75-4604; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979; amended May 1, 1986.)

1-17-16. Parking for and return of state-owned or leased motor vehicles.

A state-owned or leased motor vehicle assigned on a trip or daily basis shall be returned to the proper motor pool as soon as the state business for which the vehicle was used is completed. If use of the vehicle is required after motor pool hours, it shall be returned to the motor pool by 8:00 a.m. the following morning. Persons desiring to park their personal car while using a state car on a trip basis may leave their car

in the space occupied by the state car. Any state car parked at a driver's domicile shall be kept in a garage or driveway, if available. No expense for parking a state-owned or leased motor vehicle at an employee's domicile shall be allowed or paid. Expenses for parking a motor vehicle at the employee's official station or at a duty post shall be reimbursed to the employee by the agency in accordance with established procedures governing reporting and claiming reimbursement for such travel expenses. On official travel, a state vehicle shall be kept in a hotel or motel parking lot, if available; however, parking on streets will be permitted when not in violation of a local ordinance. Any vehicle assigned to an individual or agency shall have parking fees, if required, at the official station, paid by that person or agency. (Authorized by K.S.A. 75-3706, 75-4601 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979.)

1-17-17. State-owned or leased motor vehicles; towing charges. Towing charges resulting from failure of a motor pool vehicle shall be paid by the motor pool. When towing service is required within approximately twenty-five (25) miles of Topeka, the operator shall call the motor pool and request towing services; in all other instances, the driver shall call the nearest garage. Towing charges for other state-owned or leased motor vehicles shall be the responsibility of the agency to whom the motor vehicle is permanently assigned. Towing and service charges incurred through improper parking of the motor vehicle by the operator shall be charged to the operator. Towing due to driver negligence may be charged to the agency. (Authorized by K.S.A. 75-3706, 75-4601 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979.)

1-17-18. State-owned or operated motor vehicles; accident reporting requirements. If an accident should occur involving any state-owned or operated motor vehicle, the accident should be immediately reported by the operator or some reliable person to the highway patrol or other law enforcement agency. Statements should not be made to anyone except law enforcement officers, or representatives of the state's insurance company, or motor pool or agency officials. Information should be secured about the other party so a complete report can be made on the report form provided. In the event of an accident in which there are serious injuries or death, tele-

phone collect the claim department of the state's insurance company, or the employing state agency. The employee's immediate supervisor shall be notified at once by an employee involved in an accident. If the employee is unable to notify the employee's supervisor, then the first employee having knowledge of the accident shall do so. In case of a severe accident, the employee involved or the employee's immediate supervisor shall immediately contact the secretary or employee designated at the motor pool office and report the accident. A complete written report of all accidents shall be made to the secretary or a designee within twenty-four (24) hours of details concerning each accident. It shall be the responsibility of the employee involved in an accident to protect state property from theft or further damage. If the employee is not able to do so, then the employee's immediate supervisor or first employee having knowledge of the accident shall do so. The location of any damaged vehicle shall be reported to the secretary or employee designated at the motor pool as soon as such information is available. Damaged vehicles shall be towed to state property to avoid storage charges. Other reports to the highway patrol, or other law enforcement officials, shall be made where required. (Authorized by K.S.A. 75-3706, 75-4601 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979.)

1-17-19. State-owned or leased motor vehicles; signs, decals, and bumper stickers prohibited. No agency or operator shall permit any sign, decal, or bumper sticker to be affixed to or remain on any state-owned or leased motor vehicle unless it has been placed there under the written authority of the secretary. (Authorized by K.S.A. 75-3706, 75-4601 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979.)

Article 18.—MAXIMUM ALLOWANCE FOR MILEAGE FOR USE OF A PRIVATELY OWNED CONVEYANCE FOR PUBLIC PURPOSES

1-18-1. (Authorized by K.S.A. 75-3706, K.S.A. 1978 Supp. 75-3203; effective, E-74-18, April 5, 1974; effective, E-76-5, Jan. 1, 1975; effective, E-76-17, March 27, 1975; effective May 1, 1976; revoked May 1, 1979.)

1-18-1a. Mileage rates. Any agency designee may approve travel reimbursement to an em-

ployee or public official who has been authorized to use a privately owned conveyance to engage in official business for an agency according to any of the following:

(a) The mileage rate published in the current informational circular by the division of accounts and reports;

(b) the lower cost of another mode of transportation that is available, if the agency designee has informed the employee or public official of the lower specified rate in advance of the travel; or

(c) the mileage rate specified in subsection (a), if the agency designee determines that the use of the other mode of transportation that is less costly would not be advantageous or the employee or public official has a disability that requires the use of a privately owned vehicle that is specially equipped. (Authorized by K.S.A. 75-3201 and 75-3203; implementing K.S.A. 75-3201, 75-3203, and 75-3203a; effective May 1, 1979; amended, E-80-10, July 11, 1979; amended May 1, 1980; amended, E-81-14, June 12, 1980; amended May 1, 1981; amended, T-83-19, July 1, 1982; amended May 1, 1983; amended, T-84-20, July 26, 1983; amended May 1, 1984; amended, T-85-46, Dec. 19, 1984; amended, T-86-7, April 1, 1985; amended May 1, 1985; amended, T-86-7, May 1, 1985; amended, T-86-17, June 17, 1985; amended May 1, 1986; amended, T-89-1, Jan. 7, 1988; amended Oct. 1, 1988; amended, T-1-2-28-90, March 1, 1990; amended April 23, 1990; amended, T-1-11-14-90, Nov. 14, 1990; amended Jan. 7, 1991; amended July 12, 1993; amended, T-1-6-28-95, June 28, 1995; amended Aug. 4, 1995; amended, T-1-7-1-96, July 1, 1996; amended Oct. 18, 1996; amended, T-1-7-1-97, July 1, 1997; amended Aug. 8, 1997; amended July 1, 1998; amended, T-1-3-18-99, April 1, 1999; amended June 24, 1999; amended, T-1-7-7-00, July 15, 2000; amended Nov. 3, 2000; amended, T-1-7-2-01, July 2, 2001; amended Oct. 26, 2001; amended Nov. 5, 2021.)

1-18-2. (Authorized by K.S.A. 1975 Supp. 75-3203, 75-3706, 75-4608; effective, E-74-18, April 5, 1974; effective, E-76-5, Jan. 1, 1975; effective, E-76-17, March 27, 1975; effective May 1, 1976; revoked Nov. 5, 2021.)

Article 19.—HOUSING, FOOD SERVICE AND OTHER EMPLOYEE MAINTENANCE

1-19-1. Applicability. (a) This regulation is applicable to all housing, food service and other

employee maintenance furnished by a state agency, and to all officers or employees who receive such housing, food service, or other employee maintenance as these terms are defined herein. (Authorized by K.S.A. 1974 Supp. 75-2961a, 75-3706; effective, E-74-46, Aug. 28, 1974; effective May 1, 1975.)

1-19-2. Definitions. For purposes of this regulation, the following definitions will apply: (A) Housing—shall include all sleeping places, place of abode, rooms or residences, place of habitation, quarters or facilities owned or leased by the state and used by state employees and others for dwelling purposes.

(B) Food service—shall mean any article used as food or drink by a state officer or employee and furnished as raw substance to be prepared for use for human consumption, including meat, fish, eggs, vegetables, bread, condiments, ice cream, soft drinks, beverages, confections or as prepared meals provided by a food service business, an agency kitchen or dining facility, but excluding meal subsistence allowances paid to state officers or employees in travel status. Food service may be provided to qualified officers or employees in the following manner.

(1) By a cash allowance representing an adjustment to the salary for the position held in lieu of furnishing actual raw commodities, labor and other components necessary for providing a finished food service product.

(2) By allowing officers or employees access to agency dining facilities which offer, for any given meal period, the same meal, with a limited choice in beverage, to every person utilizing the dining facilities.

(3) By allowing officers or employees access to agency dining facilities which offer, for any given meal period, a choice in both meal and beverage items for which unit prices are established.

(C) Other employee maintenance—shall include certain pecuniary or material benefits which a state officer or employee might receive with or without charge by virtue of his office or position for the purpose of being maintained or supported.

(D) Wage or salary for the purpose of these regulations shall include the regular cash salary plus any remuneration provided in a medium other than cash, which shall be computed on the basis of the fair and prevailing value or cost of such items in the locality at the time of payment or as provided herein. (Authorized by K.S.A. 1974 Supp. 75-

2961a, 75-3706; effective, E-74-46, Aug. 28, 1974; effective May 1, 1975.)

1-19-3. Policy. It shall be the state policy that where agency's facilities or services are available for providing housing, food service or other employee maintenance, they may be furnished to employees with adjustments to the cash wages or salaries of the position involved as provided herein.

No officer or employee shall accrue any type of housing, food service or other employee maintenance benefit, by virtue of his position, unless such benefit is authorized by statute or regulation as provided herein.

Charges for the value of housing, food service or other employee maintenance which are deemed to be primarily for the benefit of the employee will be deducted from the employee's cash salary or collected in cash from the employee, as provided herein.

The value of housing, food service or other employee maintenance which are deemed to be for the benefit of the employer shall be provided without charge to the employee as provided in regulation 1-19-4 (A) 4 and 1-19-4 (B) 4. (Authorized by K.S.A. 1974 Supp. 75-2961a, 75-3706; effective, E-74-46, Aug. 28, 1974; effective May 1, 1975.)

1-19-4. Benefits which may be provided to employees. (a) Food service. (1) Agencies operating dining facilities for patients, inmates, and students may provide food service or meals to employees subject to the conditions contained in this regulation.

(2) When an agency operates its dining facility on the basis of a single standard menu, the agency shall establish rates for meals based upon a recovery to the state of cost as provided in K.A.R. 1-19-9. Employees desiring to take advantage of such food service may purchase meal tickets or booklets containing individual meal accountability or pay the flat monthly rate established for food service, without individual meal accountability according to the practice established in the agency. Where meals are provided for the benefit of the employer as set out in this regulation, meal tickets, booklets or the monthly rate established for such benefits shall be recorded in the payroll records to comply with reporting requirements for social security, Kansas public employees retirement system, unemployment compensation, and workers compensation. Single meal tickets may be sold by the agency for

cash at the unit meal rate established, if such practice is established by the agency.

(3) Where an agency operates its dining facility on the basis of the selection of individual food items, the agency shall establish rates for each item based upon a recovery to the state of cost. Employees desiring to take advantage of such facility shall pay the established unit price for each item purchased. Payment shall be made by the custom established in the agency, *i.e.*, by tendering cash to a cashier or by tendering a meal ticket for cancellation of the amount(s) due. If meal tickets are used, the employee shall purchase meal tickets, at a cost fixed by the agency. Where meals are provided for the benefit of the employer as set out in this regulation, meal tickets, booklets, or the monthly rate established for such benefit shall be recorded in the payroll records to comply with reporting requirements for social security, Kansas public employees retirement system, unemployment compensation, and workers compensation.

(4) The value of meals furnished to an employee shall be excluded from wages and salaries for income and withholding tax purposes under internal revenue code section 119, if the meals are furnished on the agency premises, for the convenience of the employer during the employee's working hours in order to have the employee available, (A) for emergency call during the meal period, or (B) when the employee is regularly engaged in a function in which the peak workload occurs during the normal lunch hours, and the employee must be restricted to a short meal period and could not be expected to otherwise secure proper meals off the premises within the meal period allowed. In order to demonstrate that the value of such meals are deductible it must be shown that emergencies requiring duty assignments have actually occurred, or can reasonably be expected to occur and which have resulted or will result, in the agency head or a designee calling on the employee to perform job duties during the meal period.

(5) Agencies shall procure their supplies of meal tickets or booklets through the director of printing or the local agency printing service according to the specifications prepared by the agency and approved by the director of accounts and reports.

(6) The charge for meals provided for the benefit of employees shall be deducted from the employee's pay by a maintenance charge payroll deduction at the rates established, on the payroll, or by cash purchase from the agency.

(7) Agencies shall maintain an accounting sys-

tem and records for all meal transactions. Such system and records proposed to be maintained by the agency shall be submitted to the director of accounts and reports for approval.

(b) Housing. (1) Where state-owned or leased housing facilities are available, agencies, departments, and institutions may provide housing to employees. Such housing may also be occupied by spouses and other members of the immediate family of a state employee when an apartment, dwelling, or residence is available.

(2) The value and rental charges established for housing are: (A) The value and rental charge shall be determined as provided in the approved rate schedule adopted under K.A.R. 1-19-9 (b).

(3) Every occupant of a house, duplex, or house trailer which has separate utility meters or separate heating fuel sources shall pay for such services directly to the vendor. (A) Agencies shall begin the installation of separate utility meters and heating fuel sources for those houses, house trailers, and duplexes where it is feasible to make such installations. Where it is not practical to install meters the state agency shall designate a rate to be charged to the employee to cover the cost to the agency of providing such services.

(B) Employees living in their own house trailers which are parked on state property shall pay to the state the sum determined by the state agency to cover the costs to the agency for lot rental, heat, and utilities if they do not have separate utility meters and heating fuel sources.

(4) A full deduction of the value established for housing, lot rent, utility meters or heating fuel sources which are provided by the employer as a part of the rental value shall be allowed from wages and salaries to comply with internal revenue code section 119, for income and withholding tax purposes if the occupant is required by the agency to be available at the duty location twenty-four (24) hours per day, every day—except for authorized time off—to meet job requirements. In order to qualify for this reduction: (A) The lodging must be furnished on the agency premises and at the place of employment with the state agency.

(B) The lodging must be furnished because the employee is required to be available for duty at all times or because the employee could not perform the services required unless such lodging is furnished.

(C) The employee is required to accept such lodging as a condition of employment in order to properly perform the job duties.

(D) The head of each agency shall certify on the form prescribed those positions and employees on such positions who are required to live in the housing provided.

(5) Each agency is responsible for the collection of the charges prescribed through payroll deductions or cash collections, or both, and for the recordkeeping in connection with such collections.

(6) Agencies shall notify the director of accounts and reports of the following types of changes in housing on forms prescribed.

(A) Square footage added to an existing dwelling.

(B) Number of occupants in a dwelling.

(C) Type of fuel used to heat a dwelling.

(D) Source of water supply.

(E) Separate utility meters or heating fuel sources installed.

(F) New dwelling constructed or purchased.

(G) Existing dwelling converted into living quarters.

(H) Existing dwelling abandoned or converted to other use.

(I) Condition of a dwelling changed through remodeling, interior decorating, or repair.

(7) The identification number assigned to every house, duplex, apartment, room, and house trailer in the approved rate schedule shall be affixed to the entrance way of each individual housing unit in numbers not less than one (1) inch high by each agency.

(8) Employees visiting the agency on official business who stay overnight in a room provided by the state shall pay the nightly rate prescribed by the agency. Records shall be maintained, showing the name of each such persons, the date(s) of stay, and the sum collected.

(9) Every occupant of state-owned or controlled housing who has telephone service for the occupant's convenience shall pay for such service directly to the vendor, and in all cases shall pay personal long distance telephone charges.

(c) Drugs, medical, or dental services. (1) Agency heads may authorize the use of agency drug supplies and medical or dental services, for employees, in cases of emergencies occurring during an employee's duty shift, or for the prevention of disease to which employees may be exposed while on the job.

(2) Drug supplies authorized for employee emergency or preventive disease treatment shall be prescribed by a medical doctor.

(3) Drug and medical services authorized in cases of emergencies as provided in this regula-

tion, or for preventive disease treatment may be given to the employee without charge.

(4) No drug supplies, or dental services, shall be continued beyond the initial emergency period authorized in this regulation, nor shall any such supplies or services be given or sold to, or purchased for, employees for non-emergency purposes, other than authorized preventive disease treatment.

(5) Agencies' accident records should include employee drug, medical and dental transactions.

(d) Laundry and cleaning services. (1) Agency heads may permit the laundering or cleaning in state operated facilities of uniforms for those employees required to wear uniforms on duty and household linen and drapes in state-owned housing. Such laundering or cleaning may be done without charge to the employee.

(2) Agency laundry and cleaning facilities shall not be used for the personal clothing of employees or members of their families.

(e) Benefits under rehabilitation or vocational training programs. (1) Student, patient, or inmate rehabilitation, or vocational training programs, where employees are authorized to take advantage of the services offered by the program may be provided subject to the limitations contained in this regulation.

(2) Where employees are taking advantage of such a program which involves the use of agency facilities or stocks, the employees shall be billed for the cost of any parts, materials, or supplies; plus a ten percent (10%) markup for administration; plus the cost of labor, if it is agency policy to pay students, patients, or inmates for their labor. These charges shall be paid to the agency in cash or may be deducted from the employee's salary at the discretion of the agency head.

(3) Where it is agency policy that students, patients, or inmates engaged in a rehabilitation or vocational training program shall be paid for their labor, the agency shall supervise all monetary transactions between the employee and the student, patient, or inmate, including arrangements for the labor, rates of pay, invoicing, and method of payment.

(4) Agencies shall keep records of all transactions involving student, patient, or inmate labor and, where applicable, agency stocks, furnished to employees. Records shall include the date, employee, student, patient, or inmate, program, supplies, break out of charges, and any other pertinent information as prescribed by the director of accounts and reports.

(f) Use of state-owned cars. The assignment and use of state-owned cars shall be in accordance with the provisions of applicable travel reimbursement and motor pool regulations.

(g) Awards for suggestion or work improvement proposals. Awards for suggestions by agency employees shall be considered as additional wages and be paid under the terms of the enabling legislation, regulation, or appropriation act on the agency payroll. (Authorized by K.S.A. 75-2961a, 75-3706; effective, E-74-46, Aug. 28, 1974; effective May 1, 1975; amended May 1, 1979.)

1-19-5. Benefits which may not be provided to employees. (A) Domestic help. No officer or employee of any agency will be furnished domestic help, except those working under authorized training programs as provided for in regulation 1-19-4 (E) and for classified domestic workers whose duty assignment is in state-owned or controlled housing.

(B) Motor pool supplies. No gasoline, oil, parts or other motor pool supplies will be furnished to an employee, from agency stocks or by direct purchase for a privately-owned vehicle, except as provided for in regulation 1-19-4 (E).

(C) Employee purchase discounts. Items purchased by the state shall not be resold to officers or employees, except for those convenience items regularly offered for sale through recognized canteens and then only at the price at which the item is regularly offered for sale.

(D) Commissary storeroom, warehouse or other privileges. No employees, or members of their families will charge purchases to the state or will draw food, rations, linens, household supplies, or any other expendables, from any agency storeroom, warehouse, kitchen, farm or other service, supply or production area, for their personal benefit or use.

(E) Monetary allowances. No monetary allowances will be given to employees in lieu of benefits.

(F) Charge accounts. No state-financed charge accounts or credit cards will be furnished or used for the personal benefit of employees or their families.

(G) Surplus institutional commodities. Commodities which are locally produced at an agency and which are surplus to the needs of the agency and its customer agencies may not be sold or furnished to employees or officers, except as authorized by statute, provided if such commodities are offered for sale to the general public, they

may be sold to employees at rates no lower than they are offered to the general public. (Authorized by K.S.A. 1974 Supp. 75-2961a, 75-3706; effective, E-74-46, Aug. 28, 1974; effective May 1, 1975.)

1-19-6. Visiting state employees. State employees visiting agencies on official business may use agencies' dining facilities and pay the amount required under the cost recovery system established by the agency. (Authorized by K.S.A. 1974 Supp. 75-2961a, 75-3706; effective, E-74-46, Aug. 28, 1974; effective May 1, 1975.)

1-19-7. Existing agreements and contracts. This regulation supersedes all existing rate schedules pertaining to employee benefits. (Authorized by K.S.A. 1974 Supp. 75-2961a, 75-3706; effective, E-74-46, Aug. 28, 1974; effective May 1, 1975.)

1-19-8. Administration. (A) Payroll deductions. Total charges for housing, food service or other employee maintenance provided for the convenience of the employee which is deducted from each employee's monthly salary will be shown in a maintenance charge column on the monthly payroll.

(B) Cash. Maintenance charges collected in cash will be accounted for and deposited in the appropriate fund of the agency and remitted as provided by K.S.A. 75-4215 to the state treasurer.

(C) Records. Agencies will maintain records required to properly administer the provisions of this regulation. (Authorized by K.S.A. 1974 Supp. 75-2961a, 75-3706; effective, E-74-46, Aug. 28, 1974; effective May 1, 1975.)

1-19-9. Rate schedule. Agencies shall immediately on the effective date of these regulations and annually thereafter, by June 1, adopt an accounting procedure and prepare a rate schedule for housing, food service, and other employee maintenance to be provided to employees for the following fiscal year and shall submit such schedule to the director of accounts and reports on forms provided for such purpose for approval. The approved rate schedule when submitted to the secretary of administration and approved by the governor shall become effective, provided that the secretary of administration may adopt interim rates pending approval of the governor which shall be in effect until adopted or amended by the governor.

The criteria used to develop the rate schedule are as follows: (a) Food service rates will be based on costs of direct raw food cost, additional direct labor cost incurred to serve employee's meals, and a surcharge for indirect cost of ten percent (10%) of the direct costs.

(b) Housing rates shall be determined by the fair rental value as recommended by the agency and determined by the director of accounts and reports or by a qualified appraiser employed by the agency to determine the prevailing fair market rental value of the housing in the immediate locality. The determinations of the fair rental value of housing shall include but not be limited to recognized cost factors for operating costs, annualized maintenance, repairs and replacement, amortized replacement cost of the fixed asset, and a management fee.

(c) Other maintenance charges shall be based on agency costs. (Authorized by K.S.A. 75-2961a, 75-3706; effective, E-74-46, Aug. 28, 1974; effective May 1, 1975; amended May 1, 1979.)

1-19-10. Permissive changes in rate schedule. Any agency may apply at any time to the secretary of administration for changes in the rate schedules provided for in these regulations, subject to the approval of the governor. (Authorized by K.S.A. 75-2961a, 75-3706; effective, E-74-46, Aug. 28, 1974; effective May 1, 1975; amended May 1, 1979.)

1-19-11. Food service and housing authorized by line item appropriation and provided primarily for public functions shall be exempt from the provisions of these regulations. (Authorized by K.S.A. 1974 Supp. 75-2961a, 75-3706; effective, E-74-46, Aug. 28, 1974; effective May 1, 1975.)

Article 20.—TRAVEL SUBSISTENCE ALLOWANCE

1-20-1 and 1-20-2. (Authorized by K.S.A. 1979 Supp. 75-3207, 75-3207a; effective May 1, 1976; amended, E-79-10, April 20, 1978; revoked, E-80-10, July 11, 1979; revoked May 1, 1980.)

Article 21.—UNITED STATES SAVINGS BOND DEDUCTION PROGRAM

1-21-1. Definitions. (a) "Director" means the director of accounts and reports.

(b) "Agency" means the agency employing the participating employee.

(c) "Payroll savings program" means the state of Kansas program for the purchase of United States savings bonds through state payroll deductions.

(d) "Participating employee" means an employee who has elected to participate in the payroll savings program.

(e) "Bond" means United States payroll savings bond.

(f) "Account" means the amount accumulated in the clearing fund toward the purchase of a specific bond on behalf of an employee.

(g) "Clearing fund" means the state of Kansas United States savings bond clearing fund.

This regulation shall take effect on and after December 17, 1995. (Authorized by K.S.A. 75-3706, 75-5530; implementing K.S.A. 79-5530; effective May 1, 1978; amended July 12, 1993; amended Dec. 17, 1995.)

1-21-2. Participation. (a) Any employee may elect to participate in the payroll savings program on an individual basis.

(b) Joint purchase of United States savings bonds by two or more employees shall not be permitted. However, any employee may establish multiple bond accounts in multiple denominations with a designated amount or percentage of the payroll deduction going to each account. Any employee may designate different owners, co-owners or beneficiaries for each bond purchased from that individual's account.

(c) Participation shall begin in the first payroll period following processing of the authorization form by the agency as prescribed by the director.

(d) Any participating employee may discontinue participation at any time, subject to the limitations set out in subsection (g).

(e) Any employee may elect to re-enroll at any time, subject to the limitations set out in subsection (g).

(f) Authorization changes shall be limited to:

(1) changes in the name, address or social security number of the owners, co-owners or beneficiaries;

(2) changes in the amount or the percentage of the payroll deduction designated for each account; and

(3) changes in the denomination of bond.

(g) All authorization changes shall take effect in the first payroll period following receipt of the prescribed authorization form by the agency.

This regulation shall take effect on and after December 17, 1995. (Authorized by K.S.A. 75-

3706, 75-5530; implementing K.S.A. 75-5530; effective May 1, 1978; amended July 12, 1993; amended Dec. 17, 1995.)

1-21-3. (Authorized by K.S.A. 75-3706, 75-5530; effective May 1, 1978; revoked July 12, 1993.)

1-21-4. Limitations. (a) Each participating employee shall designate a whole dollar amount to be deducted in each payroll period which shall:

(1) be at least \$5.00 per payroll period; and

(2) not exceed the amount of the employee's net pay after all other payroll deductions.

(b) Each participating employee may designate different owners, co-owners or beneficiaries of record.

(c) Each participating employee may have multiple active accounts in multiple denominations.

(d) The following denominations of bonds shall be offered:

	Face Value	Cost
(1)	\$100.00	\$50.00
(2)	\$200.00	\$100.00
(3)	\$500.00	\$250.00
(4)	\$1,000.00	\$500.00 (effective January 1, 1996)
(5)	\$5,000.00	\$2,500.00 (effective January 1, 1996)
(6)	\$10,000.00	\$5,000.00 (effective January 1, 1996)

(e) Employees may purchase multiple bonds in multiple denominations for issue in the same pay period.

This regulation shall take effect on and after December 17, 1995. (Authorized by K.S.A. 75-3706, 75-5530; implementing K.S.A. 75-5530; effective May 1, 1978; amended July 12, 1993; amended Dec. 17, 1995.)

1-21-5 and 1-21-6. (Authorized by K.S.A. 75-3706, 75-5530; effective May 1, 1978; revoked July 12, 1993.)

1-21-7. Custody of funds, disbursements, refunds and transfers. (a) Any payroll deduction in an amount insufficient to issue the denomination selected shall be accumulated and retained in the clearing fund, without interest, until:

(1) a sufficient amount is credited to the account to issue the denomination selected;

(2) the amount is refunded to the employee; or

(3) the amount is transferred to the state treasurer, as provided in subsection (d).

(b) Bonds in the denomination selected shall be purchased and issued by the director within a reasonable time following each regular payday.

(c) The amount in an account shall be refunded on request to:

- (1) an employee who discontinues participation;
- (2) an employee who terminates employment; or
- (3) an employee's estate or authorized representative.

(d) If an account has been inactive for three years and no request for a refund has been filed, the balance in the account may be transferred to the state treasurer as unclaimed property, pursuant to K.S.A. 1992 Supp. 58-3909, at the director's discretion.

(e) If a bond is issued and a subsequent payroll adjustment transaction is processed which creates an insufficient bond account for the employee, agency funds shall be charged for the amount of the adjustment included in the purchase price of the bond. The agency shall be responsible for the recovery of these funds from the employee. (Authorized by K.S.A. 75-3706, 75-5530; implementing K.S.A. 75-5530; effective May 1, 1978; amended July 12, 1993.)

1-21-8. (Authorized by K.S.A. 75-3706, 75-5530; effective May 1, 1978; revoked July 12, 1993.)

1-21-9. (Authorized by K.S.A. 75-3706; effective May 1, 1978; amended May 1, 1979; revoked July 12, 1993.)

1-21-10 and 1-21-11. (Authorized by K.S.A. 75-3706, 75-5530; effective May 1, 1978; revoked July 12, 1993.)

1-21-12. Adoption of federal regulations. The regulations in 31 C.F.R., Part 351, Section 351.0-351.13 prescribed by the savings bond division of the bureau of the public debt, United States department of the treasury, as in effect on July 1, 1991, are hereby adopted by reference. (Authorized by K.S.A. 75-3706, 75-5530; implementing K.S.A. 75-5530; effective May 1, 1978; amended July 12, 1993.)

Article 22.—MOVING ASSISTANCE

1-22-1, 1-22-2, 1-22-3, and 1-22-4. (Authorized by K.S.A. 75-3219; effective May 1, 1979; revoked, T-1-4-26-93, April 26, 1993; revoked July 12, 1993.)

1-22-5. (Authorized by K.S.A. 75-3219; effective May 1, 1979; amended May 1, 1986; revoked, T-1-4-26-93, April 26, 1993; revoked July 12, 1993.)

Article 23.—STATE VANPOOL PROGRAM

1-23-1. Use of state-owned vans in the vanpool program; applicability; definitions.

These rules and regulations shall apply except as expressly indicated in this regulation, to the use, charges for use or reimbursement for use of all vans assigned for use in the vanpool program by all passengers and officers or employees as drivers. For the purpose of these rules and regulations, the following terms shall have the meanings hereafter described. The term "director" shall mean the director of the central motor pool of the department of administration. The term "motor pool" shall refer to the central motor pool or any branch thereof established pursuant to K.S.A. 75-4602 *et seq.* and any amendments thereto. (Authorized by K.S.A. 1980 Supp. 75-46a08; implementing K.S.A. 1980 Supp. 75-46a02 to 75-46a08; effective, E-81-14, June 12, 1980; effective May 1, 1981.)

1-23-2. Program administration. (a) The secretary of administration shall be responsible for overall supervision and for decisions regarding expansion or contraction of the scope of the vanpool program. To assist the secretary in making such policy decisions, a program review committee composed of the secretary of administration, the director of the Kansas energy office, the secretary of the Kansas department of transportation, or their designees, may be convened at the discretion of the chairperson. The chairperson of the committee shall be the secretary of administration or his or her designee. The committee may review instances of mishap or misconduct relating to program operations and, if necessary, recommend remedial action.

(b) For purposes of the vanpool program, ridership participation shall consist of one (1) qualified driver and at least seven (7) passengers, of which at least six (6) must be state employees, selected from applications filed with the central motor pool director to best meet the program goals set out in K.S.A. 1980 Supp. 75-46a02.

(c) The day-to-day operation of the vanpool program shall be the responsibility of the central motor pool. (Authorized by K.S.A. 1980 Supp. 75-46a08; implementing K.S.A. 1980 Supp. 75-46a02 to 75-46a08; effective, E-81-14, June 12, 1980; effective May 1, 1981.)

1-23-3. Passenger requirements. (a)(1) Each person desiring to participate on a month-

to-month basis in the vanpool program shall complete a written application and agreement to participate. The signed agreement to participate shall be filed with the central motor pool by the driver of the appropriate vanpool.

(2) Each person desiring to terminate participation in a vanpool shall give the driver written notice of that intention not less than two weeks before the termination date. The driver shall, in turn, notify the central motor pool.

(b) (1) The fare for participating in the vanpool program shall be determined for each individual vanpool and shall be based upon the costs of operating the vans, including reasonable overhead costs, depreciation reserve requirements for vehicle replacement, public liability insurance, all operating, servicing, repair and replacement costs, and maintenance of a contingency reserve.

(2) Maximum individual passenger fares shall not exceed $\frac{1}{7}$ of the assessed monthly vanpool costs.

(3) All passengers' fares shall be proportionately reduced with the participation of each additional passenger. All passenger's fares shall be paid monthly and shall be collected by the driver on or before the fifth day of the month following the month in which the costs were incurred. Passengers who do not comply with this requirement may be prohibited from further participation in the vanpool program, and may be replaced by prospective passengers from the vanpool program waiting list. Passengers denied further participation in the vanpool program may apply for reinstatement to the waiting list. (Authorized by K.S.A. 75-46a08; implementing K.S.A. 75-46a03 through 75-46a08; effective, E-81-14, June 12, 1980; effective May 1, 1981; amended May 1, 1984; amended, T-87-4, Jan. 27, 1986; amended May 1, 1987.)

1-23-4. Primary driver requirements. (a) Each person desiring to be a driver in the vanpool program shall apply to the central motor pool on the prescribed form. Each driver applicant shall meet the following minimum requirements:

(1) Each applicant shall possess a Kansas driver's license which is valid for the type of vehicle driven.

(2) Each applicant shall be able to provide a safe parking place for the van. The van shall not be parked on the street overnight, unless approved by the Central Motor Pool.

(3) Each applicant's driving record shall be screened according to the criteria set out in K.S.A. 40-277.

(b) All persons selected to be drivers in the vanpool program shall assume the following responsibilities:

(1) Each primary driver shall be responsible for the safe and prudent operation of the assigned vanpool in accordance with all applicable county resolutions, city ordinances and state laws pertaining to the operation of motor vehicles. Any fines or penalties arising from operation in an unlawful manner shall be the responsibility of the driver. The state of Kansas reserves the right to prohibit from further participation in the vanpool program any driver who operates a van in a manner which:

(A) interferes with the prompt pick-up and delivery of passengers in the vanpool;

(B) threatens the safety of vanpool passengers or any member of the general public; or

(C) habitually violates terms of contracts or rules and regulations and laws governing the vanpool program.

(2) Each primary driver shall be responsible for the collection of fares from passengers. Such fares shall be paid to the central motor pool by the sixth day of each month. Failure to remit those fares shall result in appropriate collection action.

(3) Each primary driver shall maintain accurate mileage and service logs for the vanpool. The mileage and service logs shall indicate beginning and ending mileage traveled in the course of normal vanpool operations, beginning and ending mileage accumulated in the course of personal use of the van and a current passenger list. A copy of the signed log, along with a list of all expenditures incurred and receipts for purchases or expenditures incurred shall be filed each month by the sixth day of the month with the central motor pool.

(c) Each person selected to be a primary or alternate driver in the vanpool program shall be eligible for reimbursement of any enrollment fee for a red cross multi-media first aid course, or the equivalent, and a national defensive driver course, or the equivalent. These fees shall be paid by the central motor pool on receipt of evidence of enrollment and successful completion of these courses. Leave with pay to attend the courses shall be allowed as authorized by K.A.R. 1-9-9.

(d) All persons selected as primary drivers in the vanpool program shall:

(1) be required to pay 25% of the individual passenger fare established for that van pool. When not functioning as primary driver for a period of more than one week, the full passenger fare shall be charged.

(2) have personal use of the van when it is not required for travel to the work place or return. However, the driver shall be required to pay for the personal use of the van at the prevailing vanpool mileage rate. Payment for such personal use shall be made on the sixth day of each month. (Authorized by K.S.A. 75-46a08; implementing K.S.A. 75-46a02 through 75-46a08; effective, E-81-14, June 12, 1980; effective May 1, 1981; amended May 1, 1984; amended, T-87-4, Jan. 27, 1986; amended May 1, 1987.)

1-23-5. Alternate driver requirements. Each vanpool shall have at least one (1) passenger who is a qualified alternate driver, other than the primary driver. This passenger shall, in the absence of the primary vanpool driver, assume all responsibilities for vanpool operations. Alternate drivers shall meet the same requirements as those set forth for primary vanpool drivers. If an alternate driver serves as the primary operator for a period exceeding one (1) week, he or she shall receive the same benefits as those accorded primary vanpool drivers for the duration of such services. (Authorized by K.S.A. 1980 Supp. 75-46a08; implementing K.S.A. 1980 Supp. 75-46a02 to 75-46a08; effective, E-81-14, June 12, 1980; effective May 1, 1981.)

1-23-6. Supplies, service, maintenance, repair and expenses of operation of state-owned vans. Supplies for, service, maintenance and repair of state-owned vans shall be performed or arranged for under the supervision of the director and pursuant to contracts for such supplies, service, maintenance and repair and the facilities therefor entered into by the director of purchases or the secretary of administration pursuant to K.S.A. 75-4605. The cost of such supplies, service, maintenance and repair and the facilities therefor for state-owned vans in the vanpool program, shall be reflected and be a part of the mileage charge made to each individual vanpool. While the vanpool driver may make occasional purchases of operating or maintenance items for a state-owned van such as gasoline, oil, tire repairs, greasing, etc., the normal purchases shall be made from the motor pool facilities. Wherever open-end contracts for discount purchase of gasoline, oil or services are entered into by the director through the director of purchases, the special credit cards issued for such contracts shall be used wherever possible. Such items as tires and other items designated by the director, shall be purchased under

the contract established by the division of purchases, department of administration. Expenses such as charges for ferry, bridges or toll roads and receipts covering such items of expenditures except unattended toll bridges and parking meters, shall be paid by the driver. (Authorized by K.S.A. 1980 Supp. 75-46a08; implementing K.S.A. 1980 Supp. 75-46a02 to 75-46a08; effective, E-81-14, June 12, 1980; effective May 1, 1981.)

1-23-7. Major and emergency repairs or purchases. Obligation for repairs to or purchases of a major nature for a state-owned van shall not be made without the prior authorization of the director. A major repair or purchase is defined as one which exceeds seventy-five dollars (\$75).

Emergency purchases immediately necessary to keep a state-owned van operating safely to the immediate destination may be reimbursed upon justification and approval by the director, but not in excess of two hundred dollars (\$200) without the approval of such officials prior to incurring the obligation for such expenditure. Towing charges resulting from failure of a motor pool van shall be paid by the motor pool. When towing service is required within approximately twenty-five (25) miles of Topeka, the driver shall call the motor pool and request towing services; in all other instances, the driver shall call the nearest garage. Towing and service charges incurred through improper parking of the motor vehicle by the operator will be charged to the driver. (Authorized by K.S.A. 1980 Supp. 75-46a08; implementing K.S.A. 1980 Supp. 75-46a02 to 75-46a08; effective, E-81-14, June 12, 1980; effective May 1, 1981.)

1-23-8. Accident reporting requirements. If an accident should occur involving any state-owned van, the accident should be immediately reported by the driver or some reliable person to the highway patrol or other law enforcement agency. Statements should not be made to anyone except law enforcement officers, representatives of the state's insurance company or motor pool officials. Information should be secured about the other party so a complete report can be made on the report form provided. In serious injuries or death, telephone collect the claim department of the state's insurance company, or the motor pool. A complete written report of all accidents shall be made to the director. Other reports to the highway patrol or other law enforcement officials, shall be made where required. (Authorized by K.S.A.

1980 Supp. 75-46a08; implementing K.S.A. 1980 Supp. 75-46a02 to 75-46a08; effective, E-81-14, June 12, 1980; effective May 1, 1981.)

1-23-9. Signs, decals and bumper stickers prohibited. No van driver shall permit any sign, decal or bumper sticker to be affixed to or remain on any state-owned van unless it has been placed there under the written authority of the director. (Authorized by K.S.A. 1980 Supp. 75-46a08; implementing K.S.A. 1980 Supp. 75-46a02 to 75-46a08; effective, E-81-14, June 12, 1980; effective May 1, 1981.)

Article 24.—PAYROLL DEDUCTIONS FOR CHARITABLE CONTRIBUTIONS

1-24-1. Written authorization. (a) Each state employee who desires to participate in the payroll deduction plan authorized by K.S.A. 75-5531 *et seq.* for the purpose of making contributions to united way organizations shall enroll in the plan by completing a written authorization on the form prescribed or approved by the director of accounts and reports.

(b) The completed and signed authorization form shall be submitted to the united way organization solicitor or agent, who shall forward one copy to the agency for the agency records.

(c) For each employee who elects during the annual “united way” drive to contribute by payroll deduction, the employee’s agency shall process the authorization form prescribed by the director.

(d) Any employee not electing to participate during the annual calendar year “united way” drive may participate at any time thereafter, subject to the other provisions of this regulation and after processing of the authorization form prescribed by the director.

(e) Unless changed or canceled, the deductions shall continue through the calendar year. If a participating employee decides to cancel or change the united way contribution by payroll deduction, the employee shall file written notice of such authorization with the designated agency official. The change in payroll deduction shall be effective the first day of the payroll period that begins after the authorization form is received by the agency.

(f) This regulation shall take effect on and after December 17, 1995. (Authorized by K.S.A. 75-5534; implementing K.S.A. 1994 Supp. 75-5532; effective May 1, 1981; amended, T-89-1, Jan. 7, 1988; amended Oct. 1, 1988; amended Dec. 17, 1995.)

1-24-2. Cancellations or changes of contributions or payroll departments. This revocation shall take effect on and after October 1, 1988. (Authorized by K.S.A. 1980 Supp. 75-5534; implementing K.S.A. 1980 Supp. 75-5532; effective May 1, 1981; revoked, T-89-1, Jan. 7, 1988; revoked Oct. 1, 1988.)

1-24-3. Minimum and maximum amounts to be deducted. (a) The minimum united way deduction amount authorized shall be one dollar (\$1) per payroll period.

(b) The maximum united way deduction amount which may be deducted shall be limited only to the amount of compensation that is payable to the employee after subtracting all other lawful items of payroll withholdings and deductions. (Authorized by and implementing K.S.A. 1980 Supp. 75-5534; effective May 1, 1981.)

1-24-4. Coercion to contribute prohibited. The use of official action or threat of official action by a state officer or employee to coerce or attempt to coerce a subordinate state employee to contribute to a united way organization is prohibited. (Authorized by and implementing K.S.A. 1980 Supp. 75-5534; effective May 1, 1981.)

Article 25.—SET-OFF OF AMOUNTS OWED DEBTORS OF STATE

1-25-1 to 1-25-9. (Authorized by and implementing K.S.A. 1980 Supp. 75-3728k; effective May 1, 1981; revoked, E-82-14, July 1, 1981; revoked May 1, 1982.)

Article 26.—WRITE-OFF OF ACCOUNTS RECEIVABLE BY STATE AGENCIES

1-26-1. Write-off procedures. (a) Each state agency shall apply to the director of accounts and reports for authority to write off a receivable when the receivable is past due and the agency has complied with the minimum collection procedures set forth in K.A.R. 1-26-2 and has determined that the receivable is uncollectible.

(b) The request for write-offs shall include:

- (1) the number of accounts to be written off;
- (2) the total dollar amount of such accounts;
- (3) for each account list, the debtor’s name, social security number, amount and a brief statement as to the reason or basis for determining the account to be uncollectible;
- (4) a statement by the responsible individual that

in his or her opinion the accounts are uncollectible, and that this request is submitted in accordance with K.S.A. 75-3728b and these regulations; and

(5) the signature of the agency head which certifies his or her approval of the request.

(c) Each state agency shall retain receivables on its record until written notification of approval from the division of accounts and reports to write-off such receivable is received.

(d) The secretary of administration, at the request of a state agency, may authorize the director of accounts and reports to write off any account or tax receivable upon the secretary's determination that there is a reasonable basis to believe that the account should not have been listed as an account receivable or other information indicates that there is a legitimate dispute as to the amount owed. (Authorized by K.S.A. 1980 Supp. 75-3728c; implementing K.S.A. 75-3728b; effective May 1, 1981.)

1-26-2. Minimum collection procedures.

Unless the director of accounts and reports approves an agency's alternative collection procedure, each state agency shall perform the following minimum collection procedures: (a) A record shall be kept for each action taken to collect an account. This documentary evidence of collection efforts shall be available at the agency to support an account being classified as uncollectible.

(b) At least three (3) documented efforts should be made to demand payment and collect all delinquent accounts over twenty-five dollars (\$25.00). Accounts twenty-five dollars (\$25.00) and under require only one (1) documented attempt.

(c) All past due accounts over two hundred dollars (\$200.00) shall be referred to the agency attorney or attorney general for legal review.

(d) The state agency shall request the assistance of the division of accounts and reports in determining whether the debtor is subject to set-off procedures authorized by K.A.R. 1-25-1 *et seq.*

(e) In cases where the debtor is subject to the setoff procedures authorized by K.A.R. 1-25-1 *et seq.*, the state agency shall attempt to avail itself of such procedures.

(f) When there are legal remedies available to the state agency without the commencement of court proceedings, including but not limited to, suspension, revocation or cancellation of a license, permit, certificate or other grant of authority, the state agency shall attempt to avail itself of such remedies. (Authorized by K.S.A. 1980 Supp. 75-

3728c; implementing K.S.A. 75-3728b; effective May 1, 1981.)

Article 27.—CANTEENS AND BENEFIT FUNDS

1-27-1. Establishment of canteens, canteen funds and benefit funds. Requests for the establishment of canteens, canteen funds and benefit funds, as defined by K.S.A. 1980 Supp. 75-3728e, shall be made to the director of accounts and reports. The application shall be made upon the prescribed form and signed by the superintendent, president or other supervisory head of the state institution. (Authorized by K.S.A. 75-3728h; implementing K.S.A. 75-3728f; effective May 1, 1981.)

1-27-2. Custodian of funds. A custodian of the canteen fund and benefit fund shall be appointed by the supervisory head of the institution. Each custodian shall be responsible for establishing internal controls over the moneys of these funds and shall maintain the accounting records prescribed by the director of accounts and reports. (Authorized by K.S.A. 75-3728h; implementing K.S.A. 75-3728f; effective May 1, 1981.)

1-27-3. Accounting records and reporting. (a) Each canteen fund shall maintain the following accounting records:

- (1) sales journal;
- (2) purchases journal;
- (3) cash receipts journal;
- (4) cash disbursements journal;
- (5) general journal; and
- (6) general ledger.

Accounts included in the general ledger shall include, but not be limited to, cash on hand, cash in bank, accounts receivable, inventory, equipment, accumulated depreciation, accounts payable, unused coupon books, retained earnings, capital, sales, cost of sales, depreciation, miscellaneous, rent, repairs and maintenance, and supplies. Other accounts shall be added as required by generally accepted accounting principles. The accounting requirements of this regulation may be modified for a particular institution by written approval of the director of accounts and reports.

(b) The custodian of each canteen fund shall be responsible for the preparation of an income statement and balance sheet on each fund or operation for the periods ending March 31, June 30, September 30 and December 31 of each year. A copy

of these financial statements shall be forwarded to the director of accounts and reports within one (1) month after the end of each reporting period.

(c) Each benefit fund shall maintain the following accounting records: (1) cash receipts journal; and (2) cash disbursements journal.

(d) The custodian of each benefit fund shall be responsible for the preparation of a change in fund balance statement on each fund or operation for the periods ending March 31, June 30, September 30 and December 31 of each year. A copy of this financial statement shall be forwarded to the director of accounts and reports within one (1) month after the end of each reporting period. The first report due pursuant to this subsection shall be for the period ending September 30, 1983. (Authorized by K.S.A. 75-3728h; implementing K.S.A. 75-3728f; effective May 1, 1981; amended May 1, 1983.)

1-27-4. Deposits and expenditures. (a) All moneys received by a benefit fund or a canteen fund shall be deposited into the bank account designated by the pooled money investment board.

(b) All disbursements from benefit funds and canteen funds shall be made by check from the bank account for the fund. Petty cash funds, change funds and imprest funds may be established under procedures specified by the director of accounts and reports. The custodian or alternate custodian of each fund shall sign each check that is drawn upon the bank account. (Authorized by K.S.A. 75-3728h; implementing K.S.A. 75-3728f; effective May 1, 1981.)

1-27-5. Canteen coupon books. (a) Canteen coupon books may be sold by the custodian of the benefit fund. Such coupons shall be accepted on purchases at face value by the canteen cashier when presented by the registered owner. The custodian of the canteen fund, shall present the coupons to the custodian of the benefit fund for redemption at face value from the benefit fund at least monthly. The custodian of the benefit fund shall maintain a complete record of the sale and redemption of the coupons.

(b) All coupons redeemed by the custodian of the benefit fund shall be filed by denomination and retained until the completion of the next post audit of the institution or agency fund as performed by the division of post audit, and the approval thereof in writing in the audit report by the division of post audit. (Authorized by K.S.A.

75-3728h; implementing K.S.A. 75-3728f; effective May 1, 1981.)

Article 28.—SOCIAL SECURITY PROGRAM IN POLITICAL SUBDIVISIONS

1-28-1. (Authorized by K.S.A. 40-2308; implementing K.S.A. 40-2305; effective May 1, 1980; amended, E-81-23, Aug. 27, 1980; amended May 1, 1981; amended, T-84-20, July 26, 1983; amended May 1, 1984; revoked July 12, 1993.)

1-28-2. (Authorized by K.S.A. 40-2308, 75-3749, K.S.A. 1979 Supp. 40-2305; effective May 1, 1980; revoked July 12, 1993.)

Article 29.—EMPLOYEE AWARDS

1-29-1. (Authorized by and implementing K.S.A. 1980 Supp. 75-2956b; effective, E-81-14, June 12, 1980; effective May 1, 1981; revoked, T-87-26, Oct. 1, 1986; revoked May 1, 1987.)

1-29-2. (Authorized by and implementing K.S.A. 75-2956b; effective, E-81-14, June 12, 1980; effective May 1, 1981; amended May 1, 1986; revoked, T-87-26, Oct. 1, 1986; revoked May 1, 1987.)

1-29-3. (Authorized by and implementing K.S.A. 1982 Supp. 75-2956b; effective May 1, 1983; revoked, T-87-26, Oct. 1, 1986; revoked May 1, 1987.)

Article 30.—EMPLOYEE SUGGESTION SYSTEM

1-30-1. (Authorized by and implementing K.S.A. 75-2956b; effective, E-82-14, July 1, 1981; effective May 1, 1982; amended May 1, 1986; revoked, T-87-26, Oct. 1, 1986; revoked May 1, 1987.)

1-30-2. (Authorized by and implementing K.S.A. 1981 Supp. 75-2956b; effective, E-82-14, July 1, 1981; effective May 1, 1982; revoked May 1, 1986.)

1-30-3 to 1-30-5. (Authorized by and implementing K.S.A. 75-2956b; effective, E-82-14, July 1, 1981; effective May 1, 1982; amended May 1, 1986; revoked, T-87-26, Oct. 1, 1986; revoked May 1, 1987.)

1-30-6. (Authorized by and implementing K.S.A. 1980 Supp. 75-2956b; effective, E-82-14,

July 1, 1981; effective May 1, 1982; revoked May 1, 1986.)

1-30-7 and 1-30-8. (Authorized by and implementing K.S.A. 75-2956b; effective, E-82-14, July 1, 1981; effective May 1, 1982; amended May 1, 1986; revoked, T-87-26, Oct. 1, 1986; revoked May 1, 1987.)

1-30-9 and 1-30-10. (Authorized by and implementing K.S.A. 1981 Supp. 75-2956b; effective, E-82-14, July 1, 1981; effective May 1, 1982; revoked May 1, 1986.)

1-30-11. (Authorized by and implementing K.S.A. 75-2956b; effective, E-82-14, July 1, 1981; effective May 1, 1982; amended May 1, 1986; revoked, T-87-26, Oct. 1, 1986; revoked May 1, 1987.)

1-30-12 and 1-30-13. (Authorized by and implementing K.S.A. 1981 Supp. 75-2956b; effective, E-82-14, July 1, 1981; effective May 1, 1982; revoked May 1, 1986.)

1-30-14. (Authorized by and implementing K.S.A. 75-2956b; effective, E-82-14, July 1, 1981; effective May 1, 1982; amended May 1, 1986; revoked, T-87-26, Oct. 1, 1986; revoked May 1, 1987.)

1-30-15. (Authorized by and implementing K.S.A. 1981 Supp. 75-2956b; effective, E-82-14, July 1, 1981; effective May 1, 1982; revoked May 1, 1986.)

1-30-16. (Authorized by and implementing K.S.A. 75-2956b; effective, E-82-14, July 1, 1981; effective May 1, 1982; amended May 1, 1986; revoked, T-87-26, Oct. 1, 1986; revoked May 1, 1987.)

1-30-17. (Authorized by and implementing K.S.A. 1981 Supp. 75-2956b; effective, E-82-14, July 1, 1981; effective May 1, 1982; revoked May 1, 1986.)

1-30-18 and 1-30-19. (Authorized by and implementing K.S.A. 75-2956b; effective, E-82-14, July 1, 1981; effective May 1, 1982; amended May 1, 1986; revoked, T-87-26, Oct. 1, 1986; revoked May 1, 1987.)

1-30-20. (Authorized by and implementing K.S.A. 1981 Supp. 75-2956b; effective, E-82-14, July 1, 1981; effective May 1, 1982; revoked May 1, 1986.)

1-30-21. (Authorized by and implementing K.S.A. 75-2956b; effective, E-82-14, July 1, 1981;

effective May 1, 1982; revoked, T-87-26, Oct. 1, 1986; revoked May 1, 1987.)

1-30-22. (Authorized by and implementing K.S.A. 75-2956b; effective, E-82-14, July 1, 1981; effective May 1, 1982; amended May 1, 1986; revoked, T-87-26, Oct. 1, 1986; revoked May 1, 1987.)

1-30-23. (Authorized by and implementing K.S.A. 75-2956b; effective, E-82-14, July 1, 1981; effective May 1, 1982; revoked, T-87-26, Oct. 1, 1986; revoked May 1, 1987.)

1-30-24. (Authorized by and implementing K.S.A. 75-2956b; effective, E-82-14, July 1, 1981; effective May 1, 1982; amended May 1, 1986; revoked, T-87-26, Oct. 1, 1986; revoked May 1, 1987.)

Article 31.—COMPUTER SERVICES—GENERAL

1-31-1. (Authorized by K.S.A. 75-3706, 75-4703; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; revoked May 1, 1978.)

1-31-2. Applicability. (a) These rules and regulations shall apply to all state agencies as defined in K.S.A. 1976 Supp. 75-3701. The exclusion specified in K.S.A. 1976 Supp. 75-4705 for board of regents institutions relates only to central processing of data by computer. Provisions of these rules and regulations pertaining to the approval of automatic data processing machinery, lease, purchase or contracts specified in K.S.A. 1976 Supp. 75-4706, shall apply to such institutions.

(b) The provisions of K.S.A. 1976 Supp. 75-4705(b), as they apply to approval for control, possession, and operation of adjunct central processing units shall be implemented by memorandums of agreement between the department, division, or agency seeking approval and the director of the division of computer services. Such memorandums of agreement shall be explicit as to the term of the agreement and the conditions under which the director may terminate the agreement.

(c) The statement “no other division, department, or agency of the state shall perform central processing computer functions . . .” as it appears in K.S.A. 1976 Supp. 75-4705(a) shall apply equally to performance by contractual arrangement with any supplier of data processing or data entry services, or lease, purchase or contract for any data processing programs or programming systems, or any data processing systems design or computer programming services. In the interests

of economy and efficiency, the director, division of computer services may approve written requests submitted by departments, divisions and agencies of the state for the acquisition of such data processing services, programs or systems. Board of regents institutions are excluded from this requirement.

(d) The director of computer services may elect to call upon other agencies of the state, including board of regents institutions, to provide assistance in the central processing of data by computer. Such action may become necessary to (1) alleviate a shortage of data processing capability in the division of computer services, (2) make better use of state computer resources which may have reserve capacity, or (3) provide alternate capability in the event of disaster. When a request for assistance is made on behalf of an agency normally serviced by DCS, the director will assume responsibility for all negotiations, scheduling and billing for services. (Authorized by K.S.A. 75-3706, 75-4703; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1978.)

1-31-3. Definitions. When used in these administrative regulations, the following words and phrases shall have the meaning indicated: (a) "DCS" refers to and means the division of computer services of the department of administration.

(b) "Central processing of data by computer," "data processing services," and "central processing computer functions." These phrases refer to and mean performance or the capability to perform the complete range of data processing machine services normally provided by a data processing facility and include, in addition, systems design and programming services, furnishing of services to remote electronic terminals, data entry services, maintenance of tape and disk libraries, and maintenance of a library of computer programs for both generalized and special use.

(c) "Facility" or "data processing facility" means the resources available to the division of computer services and includes all the services specified in the preceding paragraph.

(d) "Data" and "data to be processed" as used in K.S.A. 1976 Supp. 75-4703(c) and (d) includes, in addition to data files and data transactions submitted either electronically or physically (*e.g.*, cards, tape, or disk packs), the following: (1) Computer programs submitted to the division of computer services for compilation, assembly, test, and implementation into the production schedule.

(2) Files maintained for user agencies within the data processing facility as well as the data used in updating, correcting, or otherwise manipulating such files.

(3) Files maintained for user agencies which are interrelated by the use of indexing schemes and which can be accessed, updated and otherwise manipulated by the use of a "data base management system," either from terminals ("on-line") or in a batch operation may be defined as "data base" files.

(e) The phrase "determination of priorities for such services performed" as used in K.S.A. 1976 Supp. 75-4703(b) shall include but not be limited to schedules and the scheduling of facility production.

(f) The phrase "including authority to decline new projects under specified conditions" as it appears in K.S.A. 1976 Supp. 75-4703(b) means and refers to conditions that may arise when the demand for new or expanded computer services exceeds the capacity of DCS to provide these services. During these periods, and for such length of time as is required to increase the productive capability of the DCS facilities, the director may request users to defer the development of new computer applications or major revisions to existing applications that require additional facility resources. Upon a showing by the user agency that such deferral would adversely affect the state's interest, the director may exercise the option described in 1-31-2(d) to utilize other state computer resources, or may authorize the user agency to obtain contractual data processing services as provided in 1-31-2(c).

(g) "Schedules" and "scheduling of facility production" refer to the planning for use of facility resources on a time of day, day of month, or other time-related basis to provide users with reports and output data at times specified by the user.

(h) Prior approval of the director of computer services for the lease, purchase, or contract for any automatic data processing machinery, specified in K.S.A. 1976 Supp. 75-4706, shall include prior consultation with the director or his or her authorized designee for the proposed lease, purchase or contract for any systems design or programming services. Prior approval of the director or his or her authorized designee is required for the proposed rental or lease/purchase of (1) any automatic data processing programs or programming systems, or, (2) any computer data processing services to be furnished by a commercial data

processing services bureau or a board of regents institution. (Ref. 1-31-2(c), above.)

(i) The phrase “central processing units of a computer” as used in K.S.A. 1976 Supp. 75-4705(b) shall be interpreted to refer to configurations of data processing equipment that provide a capability to meet the total data processing requirements of a state agency. The phrase does not include those devices variously identified as “intelligent terminals,” “mini” or “micro” computers whose function is limited to specialized activities ancillary to or supporting to a large scale computer facility.

(j) “Software” means and refers to computer programs. Software includes application programs (payroll, engineering calculations, etc.) generally written by user personnel to meet a specific user need; utility programs which perform functions commonly needed by all users (copying, printing, punching, etc.); operating system programs which control the internal activities of the computer; and proprietary programs which are purchased or leased and which perform certain specialized functions such as data base management, telecommunications management, program library management, or sorting. (Authorized by K.S.A. 75-3706 and 75-4703; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1978.)

Article 32.—POLICY AND PROCEDURES MEMORANDUM

1-32-1. Policy and procedures memorandum. The framework of policy established by these administrative regulations is designed to set the procedural boundaries within which the director of computer services will operate. In order that information concerning data processing services will be promptly made available to the agencies using DCS services, the use of policy and procedures memorandums (PPM) is authorized. Policy and procedures memorandums describe the procedures which agencies are to follow in obtaining computer services from the division of computer services. (Authorized by K.S.A. 75-3706, 75-4703; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1978.)

1-32-2. Same; usage. PPM’s issued over the signature of the director DCS or his or her designee, shall serve the following purposes: (a) A method for distributing information to users that

is transitory or subject to frequent change, such as the form in which data is to be submitted for processing, changes in instructions applicable to computer operations systems, etc.

(b) A method to notify user agencies of changes in rates, schedules, payment procedures, or standards as required for the efficient operation of the DCS data processing facility.

(c) A method to distribute findings, and recommendations, of the computer services board or the user advisory group. (Authorized by K.S.A. 75-3706 and 75-4703; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1978.)

Article 33.—RATES AND CHARGES FOR DATA PROCESSING SERVICES

1-33-1. Basis of charges. Charges for data processing services performed by the division of computer services shall be based upon the actual cost of usage of a particular data processing cost center plus distributed overhead costs. Such rates and charges shall be maintained by a cost system in accordance with generally accepted accounting principles. In determining cost rates for billing to agencies, overhead expenses shall include but not be limited to light, heat, power, insurance, labor, depreciation, etc. Billings shall include direct and indirect costs and shall be based on the foregoing cost accounting practices. (Authorized by K.S.A. 75-3706 and 75-4703; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1978.)

1-33-2. Usage cost. Data processing cost centers shall be established by breaking down the division’s activities in such a way that rates and charges will reflect equity when they are applied to the user of its services.

The actual cost of usage shall be determined by recording information that is indicative of the cost center’s resources necessary to provide the particular data processing service. When equipment or services are dedicated to the service and benefit of a single user, that user will bear the full cost of the equipment or service. (Authorized by K.S.A. 75-3706 and 75-4703; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1978.)

1-33-3. Distributed overhead costs. Distributed overhead costs shall be determined by summing the following fixed and variable costs and then developing average monthly costs on an annual basis:

(a) Rental of space, including power and air conditioning.

(b) Labor, to include computer operators, supervisors, and clerical personnel, directly assigned to operation and pro-rata share of DCS administrative costs.

(c) Supplies, to include standard forms, punched cards, specialized materials and equipment.

(d) Charges required to provide a lawful depreciation reserve fund pursuant to K.S.A. 1976 Supp. 75-4704(a).

(e) Software overhead is an item within distributed overhead costs. It applies to computer programs procured for generalized applications. Generalized applications are those used by all clients of the computer services division. Included in this category are software systems such as operating systems, compilers, assemblers, data base management systems, and general purpose utility programs. (Authorized by K.S.A. 75-3706 and 75-4703; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1978.)

1-33-4. Adjustments in factors. Certain adjustments in applicable factors of the cost formula will be made to distribute overhead costs equitably to remote terminal users; e.g., terminal operations directly supported by the user's own labor force and standard forms purchased by the user for terminal output will not result in duplicate charges. (Authorized by K.S.A. 75-3706 and 75-4703; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1978.)

1-33-5. Specific applications costs. Specific applications computer program (software) costs, if procured by the division of computer services, will be charged back to the customer as a separate cost item. Where usage of specific applications software procured by the division is extended to include additional users, the rates charged to any user for such software shall be in direct proportion to use. Software included in this category are programs such as those designed to manage telecommunications traffic. These costs will not be applied for user-owned commercial software systems. (Authorized by K.S.A. 75-3706 and 75-4703; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1978.)

1-33-6. Formulae for charges. The rates and charges to be made can be expressed in general terms by the following formula:

Where A = the budgeted annual expenditures allocated to a cost center
 B = the percentage of annual administrative overhead allocated to a cost center
 C = the percentage of annual general operations overhead allocated to a cost center
 D = annual depreciation of equipment or software allocated to a cost center
 E = total annual cost of operating a cost center
 F = total monthly cost of operating a cost center
 G = the average measured units of use per month of a cost center
 H = the rate per unit of use of a cost center
 $E = A + B + C + D$
 $F = E \div 12$
 $H = F \div 12$

A large cost center may be broken down into smaller sub-cost centers, if it is reasonable that only a part of its resources may be required by a user. When this is done the costs will be prorated to the sub-cost centers in proportion to their size within the cost center. (Authorized by K.S.A. 75-3706 and 75-4703; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1978.)

1-33-7. Publication and distribution of rates. The dollar rates charged for data processing services developed by the above formula will be published and distributed to all user agencies by policy and procedures memorandum issued by the director of computer services. Rate revisions will be made, when required, on a quarterly basis. Prior to the annual call for agency budget estimates, the director, DCS, will furnish rates and charges to be used for estimating the cost of data processing services. (Authorized by K.S.A. 75-3706 and 75-4703; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1978.)

1-33-8. Premium rates. Requests by agencies for rapid "turn-around" services that differ from the norm shall be processed at a premium rate. The rates for levels of service will be derived from the standard algorithm adjusted by a factor that recognizes the additional costs associated with special handling. (Authorized by K.S.A. 75-3706 and 75-4703; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1978.)

1-33-9. Discount rates. A discount for night time and weekend computer processing may be developed in order to encourage the use of resource at those times. In order to recover costs

it will be necessary to charge a premium during day time processing. The rates will therefore be adjusted in the following manner:

Where

H = rate per unit of use of a cost center
 I = adjusted day time rate for a cost center
 J = 100% less desired night time discount
 K = % of day time use of a cost center
 L = % of night time use of a cost center

$$H = IK + IJL$$

$$H = I(K + JL)$$

$$I = \frac{H}{K + JL}$$

(Authorized by K.S.A. 75-3706, 75-4703; effective May 1, 1978.)

1-33-10. Billing periods. Users of DCS data processing services shall be billed semi-monthly. When cash reserves are deemed adequate the director may elect to bill on a monthly basis. In the event extraordinary expenses are incurred the director is authorized, with the approval of the secretary, to request payment in advance based on the billing history of each user of services. (Authorized by K.S.A. 75-3706 and 75-4703; effective May 1, 1978.)

Article 34.—SYSTEMS DESIGN AND PROGRAMMING SERVICES RATES AND CHARGES

1-34-1. Requests for design and services. State agencies may request systems design and programming services from DCS on a limited basis. This service is designed for those agencies which do not maintain their own systems and programming staff. The rates for such services will be published and distributed by DCS in policy and procedures memoranda. Rates will be based on time and material costs such that the full expense of providing the service will be recovered from the requesting agency. (Authorized by K.S.A. 75-3706 and 75-4703; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1978.)

1-34-2. Same; format. Requests for services shall be addressed to the director, DCS, and should follow the format described below:

- Statement of the problem or application
- Date by which a solution or product is required
- A general indication that funds are available for the proposed development effort

(a) The director, DCS, will assign a computer systems analyst to work with the requesting agency to provide an accurate written evaluation of

the scope of the work, a cost estimate, and a time schedule. The evaluation will include an estimate of on-going costs by fiscal year.

(b) The evaluation will be transmitted to the requesting agency on forms provided by the director, DCS. (Authorized by K.S.A. 75-3706 and 75-4703; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1978.)

1-34-3. Same; options available when DCS cannot provide services. When the scope of work requested is beyond the capability of DCS staff, or when the date by which a solution or product is required cannot be met, the director will so inform the requesting agency. The director may recommend

- (a) That the agency defer development, or
- (b) That the agency consider using contractual services to meet their needs. (Authorized by K.S.A. 75-3706 and 75-4703; effective May 1, 1978.)

1-34-4. Contractual services. An agency desiring to use contractual services shall notify the director of its intention and furnish an estimate of the funds available for the work. The director, DCS, shall act in behalf of the requesting agency and shall prepare bid specifications to procure the desired services. In the event bids are not responsive in respect to funds available, the director shall notify the requesting agency before rejecting the bid. If the agency is unable to obtain additional funding the bid will be rejected. If the bid is responsive, the director will award the bid and issue a work order to the successful contractor. It shall be the responsibility of the director, DCS, to insure the contractor's commitments are met and that the final product is acceptable to the requesting agency. (Authorized by K.S.A. 75-3706 and 75-4703; effective May 1, 1978.)

Article 35.—PAYMENT OF RATES AND CHARGES

1-35-1. Charges. All data processing services performed by the division of computer services for other divisions, departments and agencies of the state shall be charged for in accordance with rate schedules established and published as set forth in these regulations. (Authorized by K.S.A. 75-3706 and 75-4703; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1978.)

1-35-2. Same; statements. DCS shall prepare monthly statements of charges on "interfund

order-transfer voucher" DA-102 for each user of DCS services. Payment of these charges shall be made to the computer services revolving fund established by K.S.A. 1976 Supp. 75-4704. (Authorized by K.S.A. 75-3706 and 75-4703; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1978.)

1-35-3. Same; separate cost centers. Because rates are based on the statutory requirement for cost recovery (K.S.A. 1976 Supp. 75-4703(a)), separate cost centers will use separate rates, and the algorithm for one cost center may generate different hourly rates than those of another cost center. Statements will identify the cost center which performed the service; rates charged will be in accordance with schedules published in PPM's issued by DCS. (Authorized by K.S.A. 75-3706 and 75-4703; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1978.)

1-35-4. Same; federally funded agencies. For those agencies which are wholly or partly federally funded, the division of computer services will provide supporting detail to the extent that requests for data processing services include precise identification of jobs and accounts to which jobs are to be charged. Claims for federal reimbursement shall be transactions between the user agency (state) and the federal department or agency providing funds. Grantees for federal funds are responsible for assuring that the funding federal agency is provided adequate audit data to support data processing expenditures. The division of computer services will provide supporting information as necessary when required for audit purposes. (Authorized by K.S.A. 75-3706 and 75-4703; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1978.)

Article 36.—DETERMINATION OF PRIORITIES AND SCHEDULES

1-36-1. Schedules for processing batch data specifications. The director of computer services, after consultation with agency heads or their designated representatives, will establish schedules for the central processing of batch data by computer. The schedules so established will be based on documented requirements furnished by user agencies. In the event a proposed computerized application or system will require facility resources in an amount that would jeopardize the ability of the division of computer ser-

vices to provide service to established users, the director, DCS, may decline to schedule or process the application. The head of the requesting agency will be informed in writing of the reasons for the refusal action. The internal facility priorities required to meet local agency batch processing schedules will be assigned and controlled by the director of DCS. Terminal users may assign priorities within the job classes assigned for their activities. User agency requirements will specify: (a) The time when data processing output documents or products are needed in agency operations;

(b) The method of delivery or pick-up;

(c) The time by which output data should be available at, or received at, a remote terminal location. (Authorized by K.S.A. 75-3706 and 75-4703; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1978.)

1-36-2. Same; adherence to standards. Data submitted for processing that does not conform to scheduling agreements, is improper as to form of submission, violates standards established for program or data submission may be

(a) Returned for correction,

(b) Deferred until resources are available for processing, or

(c) Cancelled unconditionally. (Authorized by K.S.A. 75-3706 and 75-4703; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1978.)

1-36-3. Variations in rates; priority or deferred processing. Within the limitations imposed by the operating software systems that control processing within DCS computer facilities users may, at their option, request either priority or deferred processing. Rate adjustments resulting from these requests will be in conformance with published rates and charges and will be detailed in billing statements. (Authorized by K.S.A. 75-3706 and 75-4703; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1978.)

Article 37.—STANDARDS FOR THE SUBMISSION OF DATA

1-37-1. Submission of data. "Data to be processed" (see "definitions," 1-31-1, above) in centralized data processing facilities can be submitted both physically and electronically. (a) Physical submission includes the delivery to the facility of punched cards, paper tape, magnetic tape cassette and reels, magnetic disks and disk packs.

This type of submission may also include handwritten or typed data on preprinted forms (vouchers, requisitions, purchase documents, program coding forms, etc.) to be processed by the department of administration data entry facility.

(b) Electronic submission includes all data transactions, data files or inquiries transmitted to the central facility for processing from terminals or other remote data entry or inquiry equipment. (Authorized by K.S.A. 75-3706 and 75-4703; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1978.)

1-37-2. Same; standards. Submission standards are used to specify the format and content allowable for data submitted for processing and represent the minimum requirements that must be met before an application can be accepted for processing within any DCS facility. The minimum standards apply to data and material submitted either physically or electronically. (Authorized by K.S.A. 75-3706 and 75-4703; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1978.)

1-37-3. Same; mandatory standards. The following submission standards are mandatory and apply to all work delivered or transmitted to a DCS facility: (a) Must meet job control language (JCL) requirements for the computer involved as published in PPM's covering facility standards.

(b) "Batch run" data should include sufficient information to enable the submitted work to be controlled through the processing cycle, i.e., number of transactions, output requirements, control totals, etc. Terminal users should provide their own controls.

(c) Programmed controls for electronic submission of data should be sufficient to provide clear audit trails so that "end-of-job" routines provide summaries of such essential information as the number of transactions read and processed, control totals, the number of exceptions to normal processes, the number of lines printed, cards read, records read to tape or disk and such other data that auditors or end users may require. The decision to include or ignore such controls is a user responsibility. Electronically submitted data must adhere to published requirements for identification of user, sign-on and sign-off conventions, and other security measures that may be implemented. (Authorized by K.S.A. 75-3706 and 75-4703; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1978.)

1-37-4. Control functions responsibility of division. The following control functions are the responsibility of the division of computer services (a) Verify that user submitted jobs: (1) comply with facility standards; (2) are successfully completed; (3) are properly accounted for if not successfully completed.

(b) Insure that internal operations, (i.e., time accounting, staffing, operating procedures, schedules, etc.) meet user requirements for service and efficiency.

(c) Insure that vital computer control programs (i.e., vendor operating systems, sorts, utilities, etc.) are properly maintained and knowledge of changes or improvements is made available to user agencies in advance of implementation.

(d) DCS shall perform the duplication or "back-up" function for all operating system and operating system support functions, and will restore these systems in the event of hardware, software or environment control failure. Where "back-up" responsibility is assigned to user agencies (see 1-37-5, below) DCS will schedule the jobs required to perform the "back-up" and report successful completion to user agencies. (Authorized by K.S.A. 75-3706 and 75-4703; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1978.)

1-37-5. Control functions responsibility of agencies. The following control functions are the responsibility of user agencies: (a) Insure that work submitted to a DCS facility is proper as to form and adherence as to standards.

(b) Users are responsible for designating back-up procedures on their own (single-user) data sets, data files or user-assigned disk packs, and are responsible for any reorganization, compression or other manipulation of such data. Operating procedures and program documentation shall be maintained by users, but should be made available to DCS operations personnel when required.

(c) When available DCS security storage is not used, user agencies must provide their own security storage of duplicate files of data, program libraries, systems and/or program documentation. Verification that work performed by the DCS facility meets user agency's schedules and standards for quality and completeness. (Authorized by K.S.A. 75-3706 and 75-4703; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1978.)

**Article 38.—STANDARDS FOR
SECURITY AND CONFIDENTIALITY**

1-38-1. General. Current and pending advances in the technology of data processing provide opportunities for acquiring, storing and inter-relating very large files of data. These inter-related files and the computer programming techniques which control them are referred to, respectively, as “data bases” and “data base management systems.” Although these data may be in the physical custody of the director of computer services the formal responsibility for the content, organization, and inter-relationships of agency data remains with the organizationally responsible agency officer. If agency data bases become a part of a larger “state data base,” formal responsibility for the content, organization and inter-relationships then rests jointly with the agencies concerned. The director of computer services provides safeguards for data files (tape, disk), data transaction (both electronic and physically submitted), and computer programs, program libraries and all operating system programs and proprietary systems. (Authorized by K.S.A. 75-3706 and 75-4703; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1978.)

1-38-2. Facility security. Access to the DCS computer facility shall be limited to those designated individuals who have clearance and who are indispensable to the facility’s production processes. Visitors and those persons who have an occasional legitimate need to enter the facility may enter the facility under escort after registering their name, organization and purpose. (Authorized by K.S.A. 75-3706 and 75-4703; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1978.)

1-38-3. Physical security of data files, program libraries, operating and proprietary systems. DCS shall provide a safe, secure and controlled environment within the facility for tape and disk libraries of data and programs in active use. DCS shall provide fireproof and tightly secured storage for duplicate (“back-up”) copies of program libraries, archival or confidential data, and operating or proprietary programming systems. All tape files in active use shall be under library control, either by a user agency tape librarian or by DCS tape librarians. The DCS library system controls the release of magnetic tape to users, preserves recorded tape

through its expiration date, and maintains the quality of tape through a tape cleaning and testing program. All magnetic disk files, both permanently mounted and mountable on call, are under the assignment control of the DCS systems programming group. The procedures required to “back-up” or duplicate files for security are implemented by the systems programming group for multiple user files, and by user agency data processing managers for single-user (agency) magnetic disk files. (Authorized by K.S.A. 75-3706 and 75-4703; effective May 1, 1978.)

1-38-4. Control of locally submitted production. “Local submission” refers to data processing jobs, programs and data physically submitted to the operations control group. Work for which operational responsibility has been transferred to operations control will be controlled through the production process in conformance to job requirements specified in documentation. This may include batch controls, quality controls, etc., as defined by the user. (Authorized by K.S.A. 75-3706 and 75-4703; effective May 1, 1978.)

1-38-5. Restoration of services in event of disaster; minimum plan. The director, DCS, after consultation with agency heads or their designees shall prescribe the actions to be taken to restore essential services in the event of natural disaster, civil disturbance, fire or water damage, or extensive and prolonged interruption to power. The plan for restoration of services must consider, as a minimum, the following: (a) Alternate computer processing sites. If an alternate state facility is to be used, plans must include preparation of duplicate files in the manner to make them usable at the alternate site. Operational requirements of the alternate site will be maintained and made available to DCS users.

(b) Periodic duplication of essential data files and retention of transaction files to allow reconstruction to current status.

(c) Duplication and maintenance of operating systems and applications programs in current status, as required.

(d) Duplication of program documentation and run books in current status, as required.

(e) Periodic duplication of computer systems accounting and performance data, as required. (Authorized by K.S.A. 75-3706 and 75-4703; effective May 1, 1978.)

Article 39.—OFFICE OF ADMINISTRATIVE HEARINGS

1-39-1, 1-39-2, 1-39-3, and 1-39-4.

(Authorized by and implementing K.S.A. 75-37,121; effective Nov. 20, 1998; revoked Jan. 20, 2017.)

Article 45.—MOTOR VEHICLE PARKING ON CERTAIN STATE-OWNED OR -OPERATED PROPERTY IN SHAWNEE COUNTY

1-45-1. (Authorized by and implementing K.S.A. 75-3706 and 75-4506; effective May 1, 1979; amended Oct. 26, 2001; revoked Feb. 28, 2003.)

1-45-2 and 1-45-3. (Authorized by K.S.A. 75-3706 and 75-4507; effective May 1, 1979; revoked Feb. 28, 2003.)

1-45-4. (Authorized by K.S.A. 75-3706, 75-4506, and 75-4507; implementing K.S.A. 75-4506; effective May 1, 1979; amended Nov. 22, 1996; revoked Feb. 28, 2003.)

1-45-5 and 1-45-6. (Authorized by K.S.A. 75-3706 and 75-4507; effective May 1, 1979; revoked Feb. 28, 2003.)

1-45-7. (Authorized by K.S.A. 75-3706 and 75-4506; implementing K.S.A. 75-4506; effective May 1, 1979; amended May 1, 1981; amended, T-87-17, July 1, 1986; amended May 1, 1987; amended Nov. 22, 1996; amended Oct. 26, 2001; revoked Feb. 28, 2003.)

1-45-7a. (Authorized by K.S.A. 75-3706, 75-4506, and 75-4507; implementing K.S.A. 75-4506; effective, T-1-7-2-01, July 2, 2001; effective Oct. 26, 2001; revoked Feb. 28, 2003.)

1-45-8. (Authorized by K.S.A. 75-3706, 75-4506, and 75-4507; implementing K.S.A. 75-4506; effective May 1, 1979; amended Nov. 22, 1996; revoked Feb. 28, 2003.)

1-45-9 through 1-45-13. (Authorized by K.S.A. 75-3706 and 75-4507; effective May 1, 1979; revoked Feb. 28, 2003.)

1-45-14. (Authorized by K.S.A. 75-3706 and 75-4507; implementing K.S.A. 75-4507; effective May 1, 1979; amended Sept. 14, 1992; revoked Feb. 28, 2003.)

1-45-15. (Authorized by K.S.A. 75-3706 and 75-4507; effective May 1, 1979; amended, T-1-11-12-02, Nov. 12, 2002; revoked Feb. 28, 2003.)

1-45-16. (Authorized by K.S.A. 75-3706; implementing K.S.A. 75-4507; effective May 1, 1979; amended Jan. 6, 1992; amended, T-1-11-12-02, Nov. 12, 2002; revoked Feb. 28, 2003.)

1-45-17. (Authorized by K.S.A. 75-3706 and 75-4507; effective May 1, 1979; revoked Feb. 28, 2003.)

1-45-18. Definitions and application of regulations. (a) The following definitions shall apply to these regulations:

(1) “Director” means the director of facilities management.

(2) “Motor vehicle” shall have the meaning prescribed by K.S.A. 8-126, and amendments thereto.

(3) “Parking permit” or “permit” means a decal, hang tag, electronic key card, or any other form of parking authorization specified and issued by the secretary, which shall be displayed in a manner determined by the secretary.

(4) “Person” means the individual, partnership, corporation, association, or governmental body to whom a motor vehicle is registered as provided in K.S.A. 8-127, and amendments thereto.

(5) “Secretary” means the secretary of administration or the secretary’s designee.

(6) “State agency” shall have the meaning prescribed by K.S.A. 75-4112, and amendments thereto.

(7) “Visitor” means a person who is not eligible to enter into a parking contract for the parking lot in which that person’s vehicle is parked.

(b) Each vehicle parked upon any state-owned or state-operated property in Shawnee County, Kansas shall be parked in compliance with these regulations. These regulations shall not apply to any of the following:

(1) State-owned or state-operated property in Shawnee County, Kansas, that is under the jurisdiction and control of any of the following:

- (A) The department of corrections;
- (B) the Kansas neurological institute;
- (C) the juvenile justice authority; or
- (D) the Kansas national guard;

(2) the facilities governed by article 46 of these regulations; or

(3) the state highway shops and laboratory. (Authorized by K.S.A. 75-3706, K.S.A. 2003 Supp. 75-4506, and K.S.A. 75-4507; implementing K.S.A.

2003 Supp. 75-4506; effective Feb. 28, 2003; amended, T-1-3-29-04, March 29, 2004; amended July 23, 2004.)

1-45-19. Application for a parking contract and issuance of a parking permit. (a)

Any state employee or state agency may request to enter into a parking contract for a parking location at which parking is restricted to vehicles that display a parking permit by submitting an application in the form and manner determined by the secretary, except that eligibility to enter into a parking contract for those parking locations may be limited to those state employees and state agencies with offices located in buildings and facilities specified by the secretary as associated with the requested parking location.

(b) These regulations shall be considered to be part of each parking contract, and each state employee or state agency entering into a parking contract shall agree to abide by all applicable regulations.

(c) A unique parking permit shall be issued for each parking contract that is executed by a state employee or state agency. The parking permit shall be issued only after the state employee or state agency has signed the written parking contract and, where required, paid the fee prescribed by K.A.R. 1-45-21 or K.A.R. 1-45-22.

(d) Each parking permit shall be in a form designated by the secretary. Each state employee or state agency to which a parking permit is issued shall display the permit in the manner specified by the secretary. Only one parking permit shall be issued per parking contract, except that, if the secretary determines that a parking permit is to be displayed by permanently affixing the permit to the vehicle, the parking permit may be issued to a state employee in a manner that permits display of the parking permit in a maximum of two vehicles. Any permit issued to a state agency may be restricted by time period or location, or both.

(e) When a parking contract is cancelled or terminated, the parking permit issued in connection with that parking contract shall be invalid and shall be returned to the secretary.

(f) A temporary parking permit authorizing parking in a stated location or locations for a specified period of time may be issued if the secretary determines that doing so would facilitate conduct of official state business, assist any individual who is visiting a facility located on property subject to these regulations, or otherwise be in the best interests of the state. Each application for a temporary

parking permit and for renewal or extension of a temporary parking permit shall be submitted in the form and manner designated by the secretary. Each temporary parking permit shall be in a form designated by the secretary, shall be displayed in the manner specified by the secretary, and may be subject to other reasonable conditions established by the secretary. (Authorized by K.S.A. 75-3706, K.S.A. 2003 Supp. 75-4506 and K.S.A. 75-4507; implementing K.S.A. 2003 Supp. 75-4506; effective Feb. 28, 2003; amended, T-1-3-29-04, March 29, 2004; amended July 23, 2004.)

1-45-20. Parking permit required. (a)

The provisions of this regulation shall apply only between the hours of 8:00 a.m. and 5:00 p.m., Monday through Friday, holidays excepted, and to those locations at which parking is restricted to vehicles displaying a parking permit.

(b) Except as otherwise expressly indicated in this regulation, a motor vehicle shall not be parked in any of the parking locations subject to this regulation, unless the motor vehicle plainly displays a parking permit that authorizes the motor vehicle to be parked in that parking location. A motor vehicle with a parking permit shall not be parked on the statehouse grounds, in a parking lot or garage other than the location for which the parking permit has been issued, or in stalls that are designated for visitors.

(c)(1) Any motor vehicle displaying the appropriate parking permit for that particular parking lot or garage may be parked in any parking stall that is not specifically marked as reserved, or that is not specifically designated or posted for the use and benefit of specified vehicles, state agencies, or state employees.

(2) Each motor vehicle displaying a temporary permit for parking shall be parked only in those locations specified by the temporary permit and only on those dates and for the length of time specified by the temporary permit.

(d) At no time shall more than one vehicle per parking contract use the parking permit for that contract to park at locations subject to this regulation.

(e) Each parking permit shall be used only by the employee or state agency to which that parking permit is issued. Parking contracts, parking permits, and temporary permits shall not be loaned, assigned, sublet, or in any other manner permitted to be used by any other individual. If a parking permit is designed to be permanently affixed to a specific vehicle, that parking permit shall not be

used for parking any motor vehicle other than that for which it was specifically issued, except with the prior permission of the secretary. (Authorized by K.S.A. 75-3706, K.S.A. 2003 Supp. 75-4506 and K.S.A. 75-4507; implementing K.S.A. 2003 Supp. 75-4506; effective Feb. 28, 2003; amended, T-1-3-29-04, March 29, 2004; amended July 23, 2004.)

1-45-21. Parking fees. (a)(1) Before January 1, 2007, the parking permit fee, where required, shall be as follows, except as provided in K.A.R. 1-45-21:

- (A) Reserved spaces.
 - (i) State agencies\$17.50 per month
 - (ii) state employees \$8.08 per biweekly fee period
- (B) Nonreserved spaces.
 - (i) State agencies\$15.00 per month
 - (ii) state employees \$6.92 per biweekly fee period

(2) Effective on and after January 1, 2007, the parking permit fee, where required, shall be as follows, except as provided in K.A.R. 1-45-22:

- (A) Reserved spaces.
 - (i) State agencies\$25.00 per month
 - (ii) state employees \$11.54 per biweekly fee period
- (B) Nonreserved spaces.
 - (i) State agencies\$20.00 per month
 - (ii) state employees \$9.24 per biweekly fee period

(3) The parking permit fee shall be waived for any vehicle in the state vanpool or for any carpool that has as passengers three or more state employees who have jointly signed a parking contract and who have been jointly issued a parking permit.

(b) Parking permit fees shall be paid in advance. Each state employee who enters into a parking contract shall pay the biweekly parking fee by payroll deduction, except for any fee periods or portion of a fee period before the payroll deduction application is processed.

(c) The parking fee shall not be prorated, and no refunds shall be made for any unused portions of a fee period. The payment of permit fees shall be a continuing obligation until terminated in writing by either party to a parking contract.

(d) Metered spaces in designated visitor parking areas shall be charged at the rate of \$.60 per

hour. (Authorized by K.S.A. 75-3706, K.S.A. 75-4506, as amended by L. 2002, Ch. 200, Sec. 1, and K.S.A. 75-4507; implementing K.S.A. 75-4506, as amended by L. 2002, Ch. 200, Sec. 1; effective Feb. 28, 2003.)

1-45-22. Parking fees for state parking garage. (a) “State parking garage” shall mean the parking garage located on Jackson avenue between 10th and 11th streets that is owned by the Topeka public building commission and operated by the state of Kansas.

(b)(1) Despite the provisions of K.A.R. 1-45-21, parking fees for the state parking garage shall be established on an annual contract basis for state employees and state agencies.

(2) Parking permit fees shall be paid in advance. Each state employee who enters into a parking contract for the state parking garage shall pay the parking fee by biweekly payroll deduction, except for any fee periods or portion of a fee period before the payroll deduction application is processed.

(c) If space in the state parking garage is made available to members of the public either for parking permits or for short-term parking, the following parking fees shall apply to members of the public:

(1) Members of the public with a parking permit shall pay a monthly rate established by the secretary.

(2) Members of the public without a parking permit shall be charged parking fees at the rate of \$1.00 per hour or \$10.00 per day.

(d) The parking fee shall not be prorated, and no refunds shall be made for any unused portions of a month or fee period. The payment of parking fees shall be a continuing obligation until terminated in writing by either party.

This regulation shall be effective on and after January 1, 2016. (Authorized by K.S.A. 75-3706, K.S.A. 2014 Supp. 75-4506 and K.S.A. 75-4507; implementing K.S.A. 2014 Supp. 75-4506; effective Feb. 28, 2003; amended Jan. 1, 2016.)

1-45-23. Parking restrictions. Unless otherwise authorized by the secretary or the secretary’s designee for reasons of business or emergency, a motor vehicle shall not be parked in any of the following locations:

- (a) A tunnel or archway;
- (b) a pedestrian walk;
- (c) a driveway;

(d) any location other than within a marked parking stall;

(e) any location in which the vehicle is double-parked; or

(f) in any location in which the vehicle is parked in a manner contrary to posted signs indicating “no parking” or any other parking restrictions. In lieu of posting “no parking” signs or signs indicating any other parking restrictions, any officer of the capitol area security patrol or any designee or agent of the director may lawfully prohibit or direct the parking of a motor vehicle upon any property subject to these regulations. The order of an officer of the capitol area security patrol or a designee or agent of the director shall take precedence over any parking permit or posted sign. (Authorized by K.S.A. 75-3706, K.S.A. 2003 Supp. 75-4506 and K.S.A. 75-4507; implementing K.S.A. 2003 Supp. 75-4506; effective Feb. 28, 2003; amended, T-1-3-29-04, March 29, 2004; amended July 23, 2004.)

I-45-24. Violations and enforcement. (a) Fines.

(1) Except as provided in paragraph (a)(2), in any parking lot or garage for which parking permits are issued, each person whose vehicle is parked in violation of any of these regulations shall be subject to the following administrative fines:

(A) First violation: \$3 fine;

(B) second violation: \$10 fine;

(C) third violation: \$25 fine; and

(D) each violation after the third violation: the person’s vehicle shall be subject to one of the following:

(i) being mechanically immobilized, subject to subsection (d); or

(ii) being removed, as specified in subsection (c).

A violation shall be deemed to have occurred each time that a motor vehicle is found to be parked in a manner prohibited by these regulations, except that a second or subsequent violation shall not be deemed to have occurred on the same day when that motor vehicle continues in the same violation at the same location.

(2) In metered visitor parking areas, each person whose vehicle is parked after the expiration of the paid meter time or otherwise in violation of these regulations shall be subject to the following fines:

(A) First violation: \$3 fine; and

(B) subsequent violations in the same day and at least two hours after the previous violation: \$10 fine for each violation.

The administrative fines specified in this paragraph (a)(2) shall apply only to vehicles not bearing a parking permit. Each person whose vehicle bears a parking permit and is parked in violation of this paragraph (a)(2) shall be subject to the fines specified in paragraph (a)(1).

(3) Persons paying the administrative fines specified in this regulation shall not be deemed guilty of violating these regulations under K.S.A. 75-4508, and amendments thereto, and shall not be subject to the criminal penalties prescribed by K.S.A. 75-4508, and amendments thereto. An administrative fee of \$25.00 shall be assessed to each person who does not pay the administrative fine specified in this regulation within 90 days of the date on which the citation was issued or, if the person submits an appeal as provided under subsection (b), within 90 days of the date on which the hearing officer affirms the fine.

(b) Appeal of administrative fines.

(1) Any person who is assessed an administrative fine under this regulation may submit a written appeal of the fine to the director within 10 days of the date on which the fine was assessed.

(2) A hearing officer shall be appointed by the director to consider each appeal. The fine may be affirmed, modified, or vacated by the hearing officer based on the written documentation submitted with the appeal. Before affirming, modifying, or vacating the fine, the person may be requested by the hearing officer to submit additional information in writing or in person.

(3) Written notice of the hearing officer’s decision to affirm, modify, or vacate the fine shall be given to the person within 30 days of the date on which the appeal is received by the director. The decision of the hearing officer shall be considered a final agency action, which may be appealed in accordance with K.S.A. 77-601 *et seq.*, and amendments thereto.

(c) Removal of vehicles. In addition to any criminal penalties imposed under K.S.A. 75-4501 *et seq.* and amendments thereto or any administrative fines assessed under this regulation, any motor vehicle, whether privately or publicly owned, that is parked in violation of any of these regulations may be deemed to be a common nuisance. Upon the direction of the secretary, the nuisance may be abated through removal and impoundment of the motor vehicle. The cost of the abatement by removal and impoundment shall be a lien against the motor vehicle until paid to the director or the director’s designee.

(d) Costs of immobilization. Each person whose vehicle is mechanically immobilized as provided in paragraph (a)(1)(D)(i) shall be assessed the costs incurred by the director for immobilizing the vehicle and removing the immobilization device.

(e) Termination of parking contract. Any parking contract may be terminated and any parking permit may be revoked by the secretary for any violation of the terms and conditions of the parking contract, these regulations, or any statute pertaining to parking. Each individual whose contract is terminated under this subsection shall be ineligible for a new parking contract until all other individuals eligible for parking contracts for whom space was not available at the time the individual's parking contract was terminated have been given an opportunity to enter into a parking contract. (Authorized by K.S.A. 75-3706, K.S.A. 2003 Supp. 75-4506, K.S.A. 75-4507, and K.S.A. 2003 Supp. 75-4508; implementing K.S.A. 75-3762, K.S.A. 2003 Supp. 75-4506 and K.S.A. 2003 Supp. 75-4508; effective Feb. 28, 2003; amended, T-1-3-29-04, March 29, 2004; amended July 23, 2004.)

Article 46.—PARKING FOR THE STATEHOUSE

1-46-1. Applicability. (a) The provisions of this article shall apply only to parking on the statehouse grounds unless expressly stated otherwise. Except as provided in K.A.R. 1-46-3, these regulations shall apply:

(1) between the hours of 8:00 a.m. and 5:00 p.m., Monday through Friday, holidays excepted;

(2) between 8:00 a.m. and noon on Saturday, holidays excepted; and

(3) during any other time that either chamber of the legislature is meeting in session.

(b) "Statehouse grounds" means the area bounded by 8th, 10th, Jackson, and Harrison streets in Topeka, Kansas.

(c) "Person" means:

(1) the individual, partnership, corporation, association, or governmental body to whom the motor vehicle is registered pursuant to K.S.A. 8-127, as amended; or

(2) a person who has lawful possession of a motor vehicle pursuant to a lease entered into for valuable consideration, including assignments of motor vehicles to individuals or state agencies in accordance with K.S.A. 75-4601 *et seq.*, and any

amendments thereto, and rules and regulations promulgated thereunder.

(d) The term "motor vehicle" shall have the meaning prescribed by K.S.A. 8-126 as amended. (Authorized by K.S.A. 75-3706 and 75-4507; implementing K.S.A. 75-4507; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979; amended Sept. 14, 1992.)

1-46-2. Parking restrictions. Unless the secretary of administration has specifically authorized otherwise, for reasons of business or emergency, no person shall: (a) Park a motor vehicle or permit his or her motor vehicle to be parked upon the statehouse grounds without a permit issued under the authority of this article.

(b) Park a motor vehicle or permit his or her motor vehicle to be parked, whether or not the motor vehicle displays an authorized parking permit, contrary to any sign posted by the capitol area security patrol, or contrary to any order of an officer of the capitol area security patrol upon the statehouse grounds. (Authorized by K.S.A. 75-3706, 75-4501 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979.)

1-46-3. Additional parking restrictions. Unless otherwise authorized by the secretary of administration for reasons of business or emergency, no person shall, at any time, park a motor vehicle or permit that person's motor vehicle to be parked so that it is: (a) double-parked in a tunnel or archway;

(b) on a pedestrian walk;

(c) in a driveway;

(d) backed into a parking stall; or

(e) not within a marked parking stall. (Authorized by K.S.A. 75-3706 and 75-4507; implementing K.S.A. 75-4507; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979; amended Sept. 14, 1992.)

1-46-4. Violations. Parking a motor vehicle in violation of any provision of this article shall constitute a misdemeanor under K.S.A. 75-4508, as amended, or under K.S.A. 75-4510a, as amended, or both. (Authorized by K.S.A. 75-3706, 75-4501 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979.)

1-46-5. Tow-away. Any motor vehicle parked in violation of K.S.A. 75-4510a, as amended, may be removed and impounded in accordance with

K.S.A. 75-4510, as amended. (Authorized by K.S.A. 75-3706, 75-4501 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979.)

1-46-6. Issuance of permits. The secretary of administration shall issue permits for parking on the statehouse grounds in accordance with this article of the rules and regulations of the department of administration. No fee or other charge shall be made for issuance of any permit to park on the statehouse grounds, and no contract for such parking shall be made. (Authorized by K.S.A. 75-3706, 75-4501 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979.)

1-46-7. Legislative department. In addition to permits issued to legislators under K.A.R. 1-46-18, the secretary of administration shall issue not more than sixty-five (65) permits for parking on the statehouse grounds to officers and employees of the legislative department. Not more than twenty-five (25) of such permits shall allow parking on the statehouse grounds throughout the year, and the remainder of such permits shall allow such parking except during the time when the legislature is in session. Permits authorized by this regulation shall be issued to persons designated by the director of legislative administrative services. (Authorized by K.S.A. 75-3706, 75-4501 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979.)

1-46-8. (Authorized by K.S.A. 75-3706, 75-4501 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; revoked May 1, 1979.)

1-46-9. Executive department. (a) The secretary of administration shall issue to officers and employees of the executive department not more than seventy-five (75) permits allowing parking on the statehouse grounds throughout the year. Included within such number of permits shall be the permits issued to members of the press pursuant to K.A.R. 1-46-13.

(b) The secretary of administration may issue to officers and employees of the executive department permits allowing parking on the statehouse grounds throughout the year, except during the time when the legislature is in session. The number of such permits so issued shall be determined by the secretary. (Authorized by K.S.A. 75-3706, 75-4501 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979.)

1-46-10 to 1-46-12. (Authorized by K.S.A. 75-3706, 75-4501 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; revoked May 1, 1979.)

1-46-13. Press permits. The secretary of administration may issue permits for parking on the statehouse grounds to regular members of the statehouse press. (Authorized by K.S.A. 75-3706, 75-4501 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979.)

1-46-14. Monument parking. The secretary of administration shall provide on the statehouse grounds not less than twenty-five (25) parking spaces that are appropriately designated by monuments for offices and positions within the executive and legislative departments. At least ten (10) of such monument parking spaces shall be for the executive department to be assigned by the secretary of administration, and at least fifteen (15) of such monument parking spaces shall be for the legislative department, to be assigned by the legislative coordinating council through the director of legislative administrative services.

The secretary of administration may establish additional monument parking spaces for the executive or the legislative department at his or her discretion. Monument parking spaces assigned to the legislative and executive departments shall be counted in the total number of permits authorized for each department by K.A.R. 1-46-7 and 1-46-9. Those persons holding titles for which monuments are provided shall be the only persons permitted to park in monument spaces, except that any other person may be permitted to use the monument space upon written authorization of the titleholder supplied to a member of the capitol area security patrol or to the secretary of administration. A monument shall not be provided for any officer or employee who does not work primarily in the capitol. (Authorized by K.S.A. 75-3706, 75-4501 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979.)

1-46-15. Transfer of a permit. No permit issued for the statehouse grounds may be used by any other person or used for the parking of any motor vehicle other than one (1) owned or leased by a permittee. Exceptions to this regulation may be granted, but only in advance, by the secretary of administration for a member of the executive department, or by the legislative coordinating council through the director of legislative administrative services for a member of the legislative

department. A maximum of two (2) decals shall be authorized for each parking permit holder. In the event a permittee operates a vehicle which does not bear a decal, notice of decal number and license tag of such substitute vehicle shall be provided to the security officers of the highway patrol stationed in the state office building. (Authorized by and implementing K.S.A. 75-4507; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979; amended May 1, 1981.)

1-46-16. Parking restricted by signs. The secretary of administration shall direct the capitol area security patrol to post signs in order to restrict parking on the statehouse grounds as follows: (a) At least thirty two (32) spaces in the southwest quadrant shall be signed for "visitor parking" while the legislature is both in and out of session.

(b) At least twelve (12) spaces not occupied by monuments in the northeast quadrant shall be signed for "legislators only" while the legislature is out of session.

(c) At least one hundred thirty (130) spaces shall be signed for "legislators only" while the legislature is in session.

(d) All spaces not occupied by monuments, and not specified by (a), (b), or (c) above, may be signed at the secretary's discretion as follows: "permit parking only," "legislators only," "visitor parking," or "construction parking." (Authorized by K.S.A. 75-3706, 75-4501 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979.)

1-46-17. Peak-load legislative parking. When all of the parking spaces signed for "legislators only" are occupied, any legislator may park in any space signed for "permit parking only," or in parking provided elsewhere by the secretary of administration. (Authorized by K.S.A. 75-3706, 75-4501 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979.)

1-46-18. Official parking for legislators. The secretary of administration shall issue through the director of legislative administrative services, one (1) parking permit to each legislator during the first three (3) weeks in January of each odd-numbered year. Each legislative permit shall be effective during the two-year period commencing with issuance. The secretary shall obtain official parking stickers from the state printer who shall not provide identical or similar stickers to any other person. The official parking stickers shall be evi-

dence of a permit issued under this regulation and shall be affixed on the motor vehicle of the legislator as follows: one (1) sticker on the lower left corner of the front windshield and one (1) in the lower left corner of the rear window. A permit issued under this regulation shall be the only permit required of a legislator to park on the statehouse grounds, if the motor vehicle so parked properly displays official parking stickers. Whenever a motor vehicle which has no official parking stickers affixed thereto is sold or the legislator to whom the stickers were issued is no longer a member of the Kansas legislature, such stickers shall be removed by the legislator or former legislator from the motor vehicle. Whenever a vacancy shall occur in the legislature and a new member is appointed to fill the vacancy, the secretary of administration shall issue a parking permit and official parking stickers to the new member for the same term as other original permits were issued. (Authorized by K.S.A. 75-3706, 75-4501 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979.)

1-46-19. Additional parking stickers for legislators. Additional sets of official parking stickers for any legislator shall be issued by the secretary of administration when application therefor is made to the director of legislative administrative services. Additional sets of stickers shall be affixed in the same manner as initial sets of stickers on the windshields of additional motor vehicles owned or leased by the legislator. Replacement of official parking stickers shall be issued by the secretary of administration upon appropriate showing of need. Notwithstanding the fact that a legislator may have more than one (1) set of official parking stickers, no legislator shall have parked upon the statehouse grounds at any one (1) time more than one (1) motor vehicle under the authority of either official parking stickers or a permit issued in accordance with these rules and regulations. (Authorized by K.S.A. 75-3706, 75-4501 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979.)

1-46-20. Remote parking south of 10th street and 8th and Harrison. The secretary of administration shall issue permits to employees and officers of the legislative branch for parking in the state lot located at 8th and Harrison Streets, Topeka, whether or not the legislature is in session. The permits shall be issued in accordance with lists provided to the secretary by the

director of legislative administrative services. The secretary shall provide when the legislature is in session two hundred (200) parking spaces south of 10th street, and issue permits therefor to employees of the legislative branch in accordance with lists furnished by the director of legislative administrative services. The secretary may also provide parking spaces south of 10th street and issue permits therefor to employees of the executive branch whose main duty assignments are in the state capitol building. The provisions of this article shall apply to parking authorized under this regulation to the same extent as to parking on the statehouse grounds. No fee or other charge shall be made for issuance of any permit to park under authority of this regulation and no contract for such parking shall be made. (Authorized by K.S.A. 75-3706, 75-4501 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979; amended, E-80-6, May 15, 1979; amended May 1, 1980.)

1-46-21. Additional parking in Topeka. The secretary of administration shall have the authority to negotiate with appropriate officials of the city of Topeka for parking privileges in the proximity of the statehouse grounds, particularly along the south curblin of 8th street and the north curblin of 10th street. This parking shall be used during legislative sessions for officers and employees of the legislative and executive branches working in the statehouse not accommodated with sufficient parking on the statehouse grounds proper. Such officers and employees shall be those officers and employees who hold permits for parking on the statehouse grounds, except during the time the legislature is in session, and such additional legislative officers and employees as are designated by the legislative coordinating council. Whenever a permittee to park on the statehouse grounds is unable to find an appropriate parking space on the statehouse grounds he or she may park in such additional areas designated by the secretary of administration. No fee or other charge shall be made for issuance of any permit to park under authority of this regulation and no contract for such parking shall be made. Parking provided under this regulation shall be in addition to all other parking provided under this article. (Authorized by K.S.A. 75-3706, 75-4501 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979; amended, E-80-6, May 15, 1979; amended May 1, 1980.)

1-46-22. Temporary permits. In addition to other permits authorized under these regulations, the secretary of administration may provide for temporary parking permits for display on motor vehicles of persons visiting the statehouse or for such other good and sufficient reason as the secretary may determine. Persons whose motor vehicles display a temporary permit for parking issued by the secretary may park within parking stalls marked or posted by the secretary as available for temporary parking on such date and for such length of time as the individual temporary permit issued and displayed shall state. The secretary shall not issue or authorize to be issued any temporary permit to park at any place on the statehouse grounds except in such area as is regularly designated as "visitor parking" or "guest parking" under K.A.R. 1-46-16 (a) or (d). Applications for temporary permits or a renewal or extension thereof shall be made upon such conditions as the secretary may establish. (Authorized by K.S.A. 75-3706, 75-4501 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979.)

1-46-23. Display of permits. Every motor vehicle authorized by these regulations to be parked upon state-owned or operated property subject to these regulations, except motor vehicles properly displaying official parking stickers of legislators, shall display the permit decal issued by the secretary. The permit decal shall be placed in the lower left corner of the windshield of the authorized motor vehicle by a member of the capitol area security patrol unless otherwise authorized by the secretary. (Authorized by K.S.A. 75-3706, 75-4501 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979.)

1-46-24. Kansas judicial center parking. The secretary of administration may issue contracts and permits for parking in the underground garage of the Kansas judicial center. Such permits shall be issued only for employees and officials working in the judicial center. Those motor vehicles displaying a permit valid for the underground garage of the judicial center shall not be allowed to park elsewhere upon the statehouse grounds. The permits shall be issued in accordance with lists provided to the secretary by the chief justice of the supreme court and by the attorney general. The provisions of this article shall apply to parking authorized under this

rule to the same extent as to parking on the state-house grounds. (Authorized by K.S.A. 75-3706, 75-4501 *et seq.*; effective May 1, 1979.)

Article 47.—VEHICLE TRAFFIC

1-47-1. Applicability. (a) Except as otherwise specified in these regulations, no person shall drive or otherwise operate any motor vehicle, bicycle, or any other vehicle intended to transport a person or persons, whether publicly or privately owned, upon any state-owned or state-operated property in Shawnee County, Kansas, in violation of these regulations or in contravention of the lawful directions of an officer of the capitol area security patrol. Exceptions to these regulations may be authorized by the secretary to allow for emergencies, public functions, deliveries of goods, repairs, or maintenance.

(b) These regulations shall not apply to any of the following:

(1) State-owned or state-operated property in Shawnee County, Kansas, that is under the jurisdiction and control of any of the following:

- (A) The secretary of corrections;
- (B) the Kansas neurological institute;
- (C) the juvenile justice authority; or
- (D) the Kansas national guard; or

(2) the state highway shops and laboratory. (Authorized by K.S.A. 75-3706 and 75-4505; implementing K.S.A. 75-3762 and 75-4505; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979; amended June 6, 2003.)

1-47-2. Speed limits. No person shall drive or otherwise operate a vehicle using any driveway or roadway designed for vehicle traffic on state-owned or operated property subject to these rules and regulations at a speed in excess of fifteen (15) miles per hour, except as otherwise posted by the secretary, or as otherwise provided in these rules and regulations. (Authorized by K.S.A. 75-3706, 75-4501 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979.)

1-47-3. Traffic flow. No person shall drive or otherwise operate a vehicle in the opposite direction on a driveway or roadway designed or posted for one-way traffic flow. (Authorized by K.S.A. 75-3706, 75-4501 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979.)

1-47-4. Stop signs. No person driving or otherwise operating a vehicle shall fail to bring that vehicle to a complete stop at any stop sign as may

be posted by the secretary. (Authorized by K.S.A. 75-3706, 75-4501 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979.)

1-47-5. Right-of-way. No person driving or otherwise operating a vehicle shall fail to yield the right of way to any pedestrian at any marked pedestrian crosswalk or sidewalk. No person shall fail to yield the right of way, in any circumstance to any pedestrian or vehicle in order to avoid a collision. (Authorized by K.S.A. 75-3706, 75-4501 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979.)

1-47-6. Travel only on drives or roads. No person shall drive or otherwise operate a vehicle on other than a driveway or roadway intended and designed for motor vehicle traffic unless the secretary has posted otherwise. (Authorized by K.S.A. 75-3706, 75-4501 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979.)

1-47-7. Penalties and enforcement. Any person who shall violate any of these rules and regulations shall be subject to arrest and prosecution and the penalties provided by law. (Authorized by K.S.A. 75-3706, 75-4501 *et seq.*; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979.)

Article 48.—PARKING VEHICLES; 801 HARRISON

1-48-1 to 1-48-5. (Authorized by K.S.A. 75-3706, K.S.A. 1965 Supp. 75-3622; effective Jan. 1, 1966; revoked May 1, 1975.)

Article 49.—PERSONAL CONDUCT; CERTAIN BUILDINGS AND GROUNDS

1-49-1. Personal conduct limitations and animal restrictions. (a) No person shall climb upon or hang over any rotunda, hall or portico, railing, or stair railing located in or upon any of the following properties:

- (1) The statehouse;
- (2) the Kansas judicial center;
- (3) Docking state office building, 915 SW Harrison;
- (4) Landon state office building, 900 SW Jackson;
- (5) the memorial building, 120 SW 10th;
- (6) Forbes office building #740;
- (7) the division of printing plant, 201 NW MacVicar;

(8) the state office building located at 3440 SE 10th Street;

(9) the Dillon house, 404 SW 9th Street;

(10) the Curtis state office building, 1000 SW Jackson;

(11) the state office building located at 700 SW Harrison; or

(12) any other building located in Shawnee County that is operated by the secretary of administration.

(b) No person shall run up or down the halls or stairways, or crowd, push, or shove any other person upon the stairways of any of the buildings listed in subsection (a).

(c) No person shall swim or wade in any fountain located on the grounds of any of the buildings listed in subsection (a), nor shall any person permit any animal under that person's care to enter the fountain.

(d) Except as provided in subsection (e), no person shall bring any animals into any of the buildings listed in subsection (a).

(e)(1) Guide dogs, hearing assistance dogs, and service dogs shall be permitted in the buildings identified in subsection (a) for the purpose of assisting disabled persons.

(2) Upon the request of a state agency, permission to bring animals into any of the buildings identified in subsection (a), or into a particular area within one of those buildings, may be granted by the secretary of administration if this action will assist a state agency in attaining an objective or goal that bears a valid relationship to the powers and functions of the state agency. (Authorized by K.S.A. 75-3706 and 75-4505; implementing K.S.A. 75-4505 and 75-3762; effective Jan. 1, 1966; amended May 1, 1978; amended May 1, 1979; amended Nov. 18, 1991; amended June 27, 1994; amended May 26, 2000; amended June 6, 2003.)

1-49-2. Trash. Bottles, cups, food containers, or other trash shall not be left upon the stairways, or anywhere in the hallways of any buildings or upon the grounds of buildings listed in K.A.R. 1-49-1, but shall be placed in containers provided for the purpose. (Authorized by K.S.A. 75-3706, K.S.A. 1978 Supp. 75-3762; effective Jan. 1, 1966; amended May 1, 1979.)

1-49-3. Eating on grounds. Lunches or picnics sponsored by private groups shall not be held upon any of the grounds, stairways, or hallways of any of the buildings listed in K.A.R. 1-49-

1, except upon prior approval by the secretary of administration. (Authorized by K.S.A. 75-3697, K.S.A. 1978 Supp. 75-3762; effective Jan. 1, 1966; amended May 1, 1979.)

1-49-4. Unnecessary noise. Persons in the halls or upon the stairways of any buildings listed in K.A.R. 1-49-1, shall refrain from boisterous, noisy conduct or shouting. Groups of five (5) or more children under the age of eighteen (18) years shall be in the charge of some adult person who shall be held responsible for the conduct of the children. (Authorized by K.S.A. 75-3706, K.S.A. 1978 Supp. 75-3762; effective Jan. 1, 1966; amended May 1, 1979.)

1-49-5. Damage to public property. No person shall write, scratch, cut or otherwise deface or damage any of the walls, floors, woodwork, doors, glass or other public property located in or on any of the buildings or grounds of buildings listed in K.A.R. 1-49-1. Any person violating this regulation shall be prosecuted as provided by law. (Authorized by K.S.A. 75-3706, K.S.A. 1978 Supp. 75-3762; effective Jan. 1, 1966; amended May 1, 1979.)

1-49-6. Dome visitors. (a) No person under eighteen (18) years of age shall be permitted to visit the dome of the capitol building unless accompanied by an adult. The adult shall be held responsible for any person or persons under the age of eighteen (18) years within the capital dome area under his or her supervision.

(b) Any child under eighteen (18) years of age within the dome area shall remain in the immediate company of the adult responsible for his or her supervision. No adult shall permit any child under his or her supervision to run ahead or lag behind, or otherwise leave the immediate area in which the adult may be located.

(c) No person shall leave the designated stairways or walkways within the dome area. No person shall climb upon any girders or supporting beams located within the dome area. No person shall go upon either the glass, girders or catwalks of the glass inner dome ceiling. (Authorized by K.S.A. 75-3706, K.S.A. 1978 Supp. 75-3762; effective Jan. 1, 1966; amended May 1, 1979.)

1-49-7. General dome provisions. (a) No person shall carry into the dome any bottle, cup or other trash. No person shall litter or drop any article whatsoever from any steps within the dome or from the observation tower outside the upper dome.

(b) All persons within the dome area shall carefully and promptly follow the directions of any official state guard or guide on duty therein. (Authorized by K.S.A. 75-3706, K.S.A. 1978 Supp. 75-3762; effective Jan. 1, 1966; amended May 1, 1979.)

1-49-8. State office building observation tower. The provisions of K.A.R. 1-49-7 shall be equally applicable to persons visiting the observation tower of the state office building. (Authorized by K.S.A. 75-3706, K.S.A. 1978 Supp. 75-3762; effective Jan. 1, 1966; amended May 1, 1979.)

1-49-9. Penalty and enforcement. Any person violating any of these regulations may be expelled and ejected from any of the buildings or grounds of buildings listed in K.A.R. 1-49-1. If any person is responsible for damage to or destruction of public property as the result of violation of these regulations he or she may be prosecuted as provided by law. (Authorized by K.S.A. 75-3706, K.S.A. 1978 Supp. 75-3762; effective Jan. 1, 1966; amended May 1, 1978; amended May 1, 1979.)

1-49-10. Prior approval of activities. No person shall post any notices or petitions upon any of the grounds or in any of the public areas of the buildings listed in K.A.R. 1-49-1, except on the bulletin board of an agency when the consent of the agency has been secured. No person shall conduct any meeting, demonstration or solicitation on any of the grounds or in any of the buildings listed in K.A.R. 1-49-1 without the prior permission of the secretary of administration or the secretary's designee. (Authorized by K.S.A. Supp. 75-3706, K.S.A. 1978 Supp. 75-3762; effective May 1, 1978; amended May 1, 1979.)

1-49-11. Possession of firearms prohibited. The provisions of K.S.A. 1992 Supp. 21-4218, as amended, with respect to possession of firearms shall apply to all state-owned or leased buildings in which the agency or agencies occupying the building have conspicuously placed signs clearly stating that firearms are prohibited within that building. (Authorized by 75-3706, 75-4505; implementing K.S.A. 1992 Supp. 21-4218, as amended by L. 1992, ch. 298, sec. 80; effective Dec. 27, 1993.)

1-49-12. Smoking prohibited. No person shall smoke in any of the following areas: (a) In any of the buildings identified in K.A.R. 1-49-1;

(b) in or near the exterior doorways of those buildings, except in any area designated as a smoking area by means of a posted sign; or

(c) in any area designated as a nonsmoking area by means of a posted sign, on the grounds of those buildings. (Authorized by K.S.A. 75-3706 and 75-4505; implementing K.S.A. 75-3762 and K.S.A. 75-4505; effective June 6, 2003.)

Article 50.—MUNICIPAL ACCOUNTING SECTION FEES

1-50-1. (Authorized by and implementing K.S.A. 1981 Supp. 75-3910; effective, E-82-14, July 1, 1981; effective May 1, 1982; revoked, T-83-19, July 1, 1982; revoked May 1, 1983.)

1-50-2. (Authorized by and implementing L. 1982, ch. 31, sec. 5; effective, T-83-19, July 1, 1982; effective May 1, 1983; revoked July 12, 1993.)

Article 51.—MOBILE HOMES AND RECREATIONAL VEHICLES—GENERAL

1-51-1 to 1-51-4. (Authorized by K.S.A. 75-3706, K.S.A. 1978 Supp. 75-1220; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979; revoked May 1, 1982.)

Article 52.—STANDARDS (Mobile Housing)

1-52-1. (Authorized by K.S.A. 75-3706, K.S.A. 1978 Supp. 75-1220; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979; revoked May 1, 1982.)

1-52-2. (Authorized by K.S.A. 75-3706, K.S.A. 1978 Supp. 75-1213, 75-1220; effective May 1, 1979; revoked May 1, 1982.)

Article 53.—PLAN APPROVAL (Mobile Housing)

1-53-1 and 1-53-2. (Authorized by K.S.A. 75-3706, K.S.A. 1978 Supp. 75-1220; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979; revoked May 1, 1982.)

Article 54.—INSPECTION PROGRAM (Mobile Housing)

1-54-1 to 1-54-3. (Authorized by K.S.A. 75-3706, K.S.A. 1978 Supp. 75-1220; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979; revoked May 1, 1982.)

1-54-4 and 1-54-5. (Authorized by K.S.A. 75-3706, K.S.A. 1978 Supp. 75-1220; effective,

E-74-4, Nov. 2, 1973; effective, E-76-17, March 27, 1975; effective May 1, 1975; amended May 1, 1976; amended May 1, 1979; revoked May 1, 1982.)

**Article 55.—SEALS
(Mobile Housing)**

1-55-1 to 1-55-6. (Authorized by K.S.A. 75-3706, K.S.A. 1978 Supp. 75-1220; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979; revoked May 1, 1982.)

**Article 56.—CONTRACT AGENTS
AND THIRD PARTIES
(Mobile Housing)**

1-56-1 to 1-56-3. (Authorized by K.S.A. 75-3706, K.S.A. 1978 Supp. 75-1220; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979; revoked May 1, 1982.)

**Article 57.—SERIAL NUMBER
(MOBILE HOUSING)**

1-57-1. (Authorized by K.S.A. 75-3706, K.S.A. 1978 Supp. 75-1220; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979; revoked May 1, 1982.)

**Article 58.—WARRANTIES
(MOBILE HOUSING)**

1-58-1. (Authorized by K.S.A. 75-3706, K.S.A. 1978 Supp. 75-1220; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979; revoked May 1, 1982.)

**Article 59.—NONCOMPLIANCE
(Mobile Housing)**

1-59-1 to 1-59-3. (Authorized by K.S.A. 75-3706, K.S.A. 1978 Supp. 75-1220; effective, E-74-4, Nov. 2, 1973; effective May 1, 1975; amended May 1, 1979; revoked May 1, 1982.)

**Article 60.—SPECIAL ASSESSMENTS
AGAINST THE STATE**

1-60-1. Definitions. As used in this article, “secretary” means the secretary of administration, “local unit of government” means any subordinate governmental agency of the state having statutory authority to levy special assessment taxes for any purpose; and “board” means the governing body

of any local unit of government. (Authorized by K.S.A. 12-3502, 75-3706; effective May 1, 1978.)

1-60-2. Initial notification. When any local unit of government initiates action designed to create public improvements to be financed, in part or whole, by adjacent property owners by way of special assessment taxes, and one or more of the pieces of property involved belongs to the state of Kansas, such local unit of government shall inform the secretary of such action by sending by registered mail a copy of the resolution, minute, motion or record of such action, within ten (10) days after adoption, to the secretary of administration, second floor, statehouse, Topeka, Kansas 66612. The board will provide the secretary the following information in its initial notification, either by including same in its resolution, minute, motion or record of initiating action, or by separate documentation:

- (a) General nature of proposed improvement.
 - (b) Estimated total cost.
 - (c) Legal description of proposed improvement district.
 - (d) Proposed method of assessment.
 - (e) Apportionment, if any, of cost between property to be improved and property of local unit of government at large.
 - (f) Map of proposed improvement district specifying location of state owned property.
 - (g) State agency having custody of affected land.
- (Authorized by K.S.A. 12-3504, 75-3706; effective May 1, 1978.)

1-60-3. Subsequent notifications. The board shall also provide to the secretary, and to such state agency heads as may be designated by the secretary, a copy of all subsequent formal actions taken by the board with respect to creation of the improvement district to include motions, resolutions, ordinances and notices of public hearings. (Authorized by K.S.A. 12-3504, 75-3706; effective May 1, 1978.)

Article 61.—ALLOTMENT SYSTEM

1-61-1. Required findings and notice of implementation of allotment system. (a) Findings. (1) Whenever the secretary of administration, on the advice of the director of the budget, finds that the resources of the state general fund or any special revenue fund are likely to be insufficient to finance appropriations against the state general fund or such special revenue fund, the secretary

of administration shall instruct the director of the budget to implement an allotment system.

(2) Whenever the secretary of administration, on the advice of the director of the budget, finds that the use of an allotment system for application to a particular executive branch state agency will be beneficial to the state in order to assure that the affected state agency will be able to operate for an entire fiscal year within the fiscal constraints of appropriations made to the affected state agency, the secretary of administration may instruct the director of the budget to implement an allotment system for the affected state agency.

The secretary of administration shall inform the director of the budget of the secretary's decisions as to the amount of money to be made available to each affected state agency to which the allotment system is to be applied and of any limitation thereon.

(b) Notice. After the director of the budget has received notice from the secretary of administration of the secretary's allotment decision or decisions, the director of the budget shall provide written notice of the allotment decision to each state agency that is affected by the allotment system. The notice shall be given to a state agency at least 30 days before the beginning of the time period in which that state agency is subject to the allotment system. The 30 day notice shall be deemed to have been timely given if the notice is personally delivered to the affected state agency or placed in the U.S. mail, addressed to the affected state agency, at least 30 days prior to the time period in which the state agency is subject to the allotment system. The notice shall:

(1) specify the amount of money that the secretary of administration has allotted to the state agency, and the limitations and time period or periods applicable to the allotment;

(2) specify the type and form of fiscal information that is to be submitted by the state agency to the director of the budget and time schedules therefor; and

(3) inform the agency of the right to seek review of the secretary's allotment decisions pursuant to K.A.R. 1-61-3. (Authorized by and implementing K.S.A. 75-3722; effective, T-83-42, Nov. 23, 1982; effective May 1, 1983.)

1-61-2. Monitoring and reporting on allotment system. (a) The director of the budget shall provide the director of accounts and reports information showing the allotment decisions of the secretary of administration and any modifi-

cation thereto which have been approved by the governor.

(b) The director of accounts and reports or the director of the budget may require agencies subject to the allotment system to submit specific or general information that either director deems necessary to assure that any agency is operating within the funds allotted and limitations applicable thereto.

(c) In cases where there is a dispute, the secretary of administration shall make determinations as to whether an agency is operating within the funds allotted to an agency and complying with limitations placed on those funds after first giving the agency an opportunity to supply relevant information. In cases where an agency head is aggrieved by the secretary's decision, the matter shall be referred to the Governor, whose decision shall be final. (Authorized by and implementing K.S.A. 75-3722; effective, T-83-42, Nov. 23, 1982; effective May 1, 1983.)

1-61-3. Review of allotment decisions. A state agency may request that the Governor review an allotment decision of the secretary of administration. The request shall be made in writing and delivered to the Governor within 10 days after the personal delivery or postmark date of the notice of the agency's allotment and shall include:

(a) any proposed alternative methods the agency recommends to reduce expenditures to the level that would be realized if the secretary of administration's allotment decision is not altered; and

(b) other information that the requesting state agency believes is necessary for the Governor to undertake an appropriate review of the allotment decision of the secretary of administration. (Authorized by and implementing K.S.A. 75-3722; effective, T-83-42, Nov. 23, 1982; effective May 1, 1983.)

Article 62.—HANDICAPPED ACCESSIBILITY STANDARDS

1-62-1. Handicapped accessibility standards. Subject to the additional provisions of K.S.A. 58-1301 *et seq.*, all public buildings and facilities in this state, and additions thereto, and all governmental buildings and facilities in this state, and additions thereto, shall conform to the American National Standards Institute, Inc. specifications, designated ANSI A-117.1-1986, for making buildings and facilities accessible to, and

usable by, the physically handicapped, which specifically were approved February 5, 1986, by the American National Standards Institute, Inc., 1430 Broadway, New York, New York 10018. Any public building or facility or any governmental building or facility, or any addition to any such building or facility, to which the provisions of K.S.A. 58-1301 were applicable prior to the effective date of this regulation, shall be governed by the provisions of that section which were in effect on the date the contract for design of such public building or facility or such governmental building or facility, or addition thereto, was entered into. (Authorized by and implementing K.S.A. 58-1301; effective Aug. 14, 1989.)

Article 63.—QUALITY MANAGEMENT

1-63-1. State quality management initiative. (a) The state quality management initiative shall focus on customer satisfaction, continuous improvement, and employee involvement.

(b) In order to continually strive towards achieving the highest quality in all aspects of state government, state agencies, employees, administrators, officers and quality teams shall adhere to the state quality program's guiding principles. The four guiding principles shall be:

- (1) identify customers and meet their needs and expectations;
- (2) involve employees at all levels in problem solving and decision making;
- (3) enable employees to change and succeed through appropriate education and training; and
- (4) improve processes and remove barriers to create and reinforce continuous improvement.

(c) Each state agency shall prepare an implementation strategy containing proposed activities and quality goals in accordance with the statewide quality management implementation strategy established by the secretary of administration. These strategies shall be submitted to the secretary of administration for approval. (Authorized by and implementing L. 1994, ch. 91, § 1; effective, T-1-9-19-94, Sept. 19, 1994; effective Nov. 21, 1994.)

1-63-2. Quality initiative leadership. (a) The state quality management initiative shall be led by the secretary of administration and shall include the elements listed below:

- (1) promoting and assisting the development of implementation strategies by each agency; and
- (2) developing and coordinating appropriate training programs for state officers and employees.

(b) The quality management advisory council shall consist of each state agency cabinet secretary and shall advise the secretary of administration on state quality management initiative policy issues.

(c) A state quality management initiative administrative and training office shall be staffed by the division of personnel services. Quality management materials and programs for the state quality program shall be developed and coordinated by the administrative and training office with the approval of the comprehensive management education and training strategy committee. (Authorized by and implementing K.S.A. 1996 Supp. 75-37,115; effective, T-1-9-19-94, Sept. 19, 1994; effective Nov. 21, 1994; amended June 20, 1997.)

Article 64.—ADMINISTRATION OF WIRELESS AND VOIP ENHANCED 911 SERVICES

1-64-1. (Authorized by K.S.A. 2006 Supp. 12-5325 and 12-5354; implementing K.S.A. 2006 Supp. 12-5325, 12-5331, 12-5354, and 12-5357; effective Sept. 21, 2007; revoked Feb. 17, 2012.)

Article 65.—ENERGY STAR PRODUCTS AND EQUIPMENT

1-65-1. Purchase of energy star products and equipment. (a) Subject to the provisions of K.S.A. 75-3737a through K.S.A. 75-3744, K.S.A. 75-37,102, and K.S.A. 75-4713 and amendments thereto, each state agency shall acquire products and equipment that bear the energy star label pursuant to K.S.A. 75-37,127, and amendments thereto.

(b) In order to determine the projected cost savings for the useful life of an energy star product, each state agency shall utilize the United States environmental protection agency's energy savings calculator for the energy star product.

(c) If the United States environmental protection agency has not produced an energy savings calculator for a specific energy star product, then the projected cost savings for the useful life of the energy star product shall be based on a comparison of the following:

- (1) The initial cost of the energy star product plus the estimated lifetime operating cost of the energy star product; and
- (2) the initial cost of a functionally equivalent product plus the estimated lifetime operating cost of the functionally equivalent product.

(d) This regulation shall apply only to the purchase of new, unused energy star products and equipment. (Authorized by and implementing K.S.A. 2009 Supp. 75-37,127; effective Feb. 4, 2011.)

**Article 66.—ENERGY AUDITS
FOR REAL PROPERTY**

1-66-1. Definitions. For purposes of this article, each of the following terms shall have the meaning specified in this regulation:

(a) “Agency head” means an individual or body of individuals in which the ultimate legal authority of a state agency is vested by any provision of law.

(b) “Division” means the division of facilities management within the Kansas department of administration.

(c) “Energy audit” means the utilization of a building energy-use benchmarking system, including the energy star portfolio manager, that generates a written report that details the conversion of a building’s energy consumption data into energy-intensity metrics for the purpose of comparing the energy use of a building to the national average energy use of similar buildings.

(d) “Energy consumption data” means the monthly amount of energy consumed in the preceding 12-month period as recorded by a utility distributing and selling energy or water services for a particular building.

(e) “Energy-intensity metrics” means the measurement of weather variations and changes in the physical and operating characteristics of each building.

(f) “Energy star portfolio manager” means an online energy management tool created by the United States environmental protection agency that uses an algorithmic formula for tracking and assessing energy and water consumption across a portfolio of buildings. The energy star portfolio manager can be accessed through the division’s web site.

(g)(1) “Excessive amount of energy,” when applied to a building subject to an energy audit, shall be determined by comparing the building’s site and source energy-intensity metrics, annualized to a 12-month period, to the national average site and source energy-intensity metrics of similar buildings.

(2) If the site and source energy-intensity metrics of the building subject to an energy audit are greater than the national average site and source

energy-intensity metrics, then the building shall be deemed to use an excessive amount of energy.

(h) “Secretary” means the secretary of the Kansas department of administration.

(i) “State agency” has the meaning specified in K.S.A. 75-3701, and amendments thereto. (Authorized by and implementing K.S.A. 2009 Supp. 75-37,128; effective Feb. 4, 2011.)

1-66-2. Energy audit required for each state-owned building. (a) If a state agency owns real property, the agency head, or that person’s designee, shall conduct an energy audit of each building on that real property and submit the written report to the division.

(b) An energy audit shall be conducted every five years for each building specified in subsection (a).

(c) If a state agency owns four buildings or less, the written reports for the first energy audits for all of the buildings shall be submitted no later than July 1, 2011.

(d) If a state agency owns five or more buildings, an energy audit for at least one-fifth of all of those buildings shall be conducted each year. The written reports for the first energy audits shall be submitted no later than July 1, 2011.

(e) Each state agency conducting an energy audit shall identify each state-owned building in which an excessive amount of energy is being used, pursuant to K.S.A. 75-37,128 and amendments thereto. (Authorized by and implementing K.S.A. 2009 Supp. 75-37,128; effective Feb. 4, 2011.)

1-66-3. Energy audit required for new lease, or lease renewal or extension, of non-state-owned real property. (a) Each new lease, or lease renewal or extension, for non-state-owned real property submitted by an agency head to the division for approval shall include the written report for an energy audit conducted by the owner or lessor of each building on that real property that is the subject of the new lease, or lease renewal or extension.

(b) Subject to the provisions of K.S.A. 75-3739 and amendments thereto, a new lease, or lease renewal or extension, may be approved if either of the following conditions is met:

(1) The written report for the energy audit indicates that the leased space does not use an excessive amount of energy.

(2) The written report for the energy audit indicates that the leased space uses an excessive amount of energy, and the new lease, or lease re-

new or extension, requires the owner or lessor to implement cost-effective energy conservation measures that are approved by the secretary to reduce or eliminate the excessive amount of energy. (Authorized by and implementing K.S.A. 2009 Supp. 75-37,128; effective Feb. 4, 2011.)

Article 67.—ENERGY EFFICIENCY PERFORMANCE STANDARDS FOR STATE-OWNED BUILDINGS

1-67-1. Definitions. For purposes of this article, each of the following terms shall have the meaning specified in this regulation:

(a) “Agency architect” has the meaning specified in K.S.A. 75-1254(a)(3), and amendments thereto.

(b) “Agency engineer” has the meaning specified in K.S.A. 75-1254(a)(3), and amendments thereto.

(c) “ASHRAE” has the meaning specified in K.S.A. 75-37,126, and amendments thereto.

(d) “Design development” means drawings and other documents that describe the size and character of a project’s architectural, structural, mechanical, and electrical systems.

(e) “IECC” has the meaning specified in K.S.A. 75-37,126, and amendments thereto.

(f) “New construction” has the meaning specified in K.S.A. 75-37,126, and amendments thereto.

(g) “Project architect” has the meaning specified in K.S.A. 75-1251, and amendments thereto.

(h) “Project engineer” has the meaning specified in K.S.A. 75-1251, and amendments thereto. (Authorized by and implementing K.S.A. 2009 Supp. 75-37,129a; effective Feb. 4, 2011.)

1-67-2. Energy efficiency performance standards for new construction. (a) Subject to the provisions of K.S.A. 75-1250 through K.S.A. 75-1267 and K.S.A. 75-3784 and amendments thereto, each agency architect, agency engineer, project architect, or project engineer shall comply with ASHRAE or IECC at the time of submission of the design development for new construction.

(b) If an agency architect, agency engineer, project architect, or project engineer seeks to comply with a functionally equivalent standard other than ASHRAE or IECC at the time of submission of the design development for new construction, the agency architect, agency engineer, project architect, or project engineer shall submit a report verifying life-cycle cost-effective compliance for the

new construction. The report shall be submitted to the department of administration, division of facilities management. (Authorized by and implementing K.S.A. 2009 Supp. 75-37,129a; effective Feb. 4, 2011.)

1-67-3. Energy efficiency performance standards for renovated, retrofitted, or repaired buildings. (a) Subject to the provisions of K.S.A. 75-1250 through K.S.A. 75-1267 and K.S.A. 75-3784 and amendments thereto, each agency architect, agency engineer, project architect, or project engineer shall, to the extent possible, comply with ASHRAE or IECC at the time of submission of the design development for the renovation, retrofit, or repair of each state-owned building.

(b) If an agency architect, agency engineer, project architect, or project engineer seeks to comply with a functionally equivalent standard other than ASHRAE or IECC at the time of submission of the design development for the renovation, retrofit, or repair of each state-owned building, the agency architect, agency engineer, project architect, or project engineer shall submit a report verifying life-cycle cost-effective compliance for the renovation, retrofit, or repair of each state-owned building. The report shall be submitted to the department of administration, division of facilities management. (Authorized by and implementing K.S.A. 2009 Supp. 75-37,129a; effective Feb. 4, 2011.)

Article 68.—AVERAGE FUEL ECONOMY STANDARDS FOR STATE-OWNED MOTOR VEHICLES

1-68-1. Definitions. For purposes of this article, each of the following terms shall have the meaning specified in this regulation:

(a) “Average fuel economy” shall have the meaning assigned to that term in 40 C.F.R. 600.002-85(a)(14), as in effect on July 1, 2007, which is hereby adopted by reference.

(b)(1) “Life-cycle cost-effective,” when used to describe a motor vehicle that is being compared to another motor vehicle, shall mean the motor vehicle with a lower life-cycle cost, as determined according to this subsection.

(2) To determine the life-cycle cost of each motor vehicle, the following formula shall be used: (Average annual fuel cost of the motor vehicle x 6.67) + purchase price of the motor vehicle. The

multiplier 6.67 reflects 100,000 miles divided by 15,000 miles per year.

(3) If the motor vehicles being compared have identical life-cycle costs as computed in accordance with this subsection, then these motor vehicles shall be deemed to be equally life-cycle cost-effective.

(c) "Motor vehicle" shall have the meaning assigned to "automobile" in 40 C.F.R. 600.002-85(a) (4), as in effect on July 1, 2007, which is hereby adopted by reference. As used in that federal regulation, "secretary" shall mean the U.S. secretary of transportation or that person's authorized representative.

(d) "State agency" has the meaning specified in K.S.A. 75-3701, and amendments thereto. (Authorized by and implementing K.S.A. 2009 Supp. 75-4618; effective Feb. 4, 2011.)

1-68-2. Purchase of a new motor vehicle during fiscal year 2011. (a) Each state agency that seeks to purchase a new motor vehicle during

fiscal year 2011 shall be subject to the provisions of K.S.A. 75-3739 through K.S.A. 75-3740a, K.S.A. 75-37,102, and K.S.A. 75-4618 and amendments thereto.

(b) Each state agency that seeks to purchase a new motor vehicle without complying with subsection (a) shall meet the following requirements before the purchase of the new motor vehicle:

(1) Submit a written motor vehicle purchase request to the department of administration, division of budget, on a form authorized by the division of budget; and

(2) obtain approval to purchase the new motor vehicle from the department of administration, division of budget.

(c) The director of the division of purchases in the department of administration shall obtain the average fuel economy for each motor vehicle on contract and ensure that each motor vehicle purchased as specified in subsection (a) is life-cycle cost-effective. (Authorized by and implementing K.S.A. 2009 Supp. 75-4618; effective Feb. 4, 2011.)

Agency 2

Municipal Accounting Board

Editor's Note:

For later regulations affecting licensed municipal accountants, see Agency 74, articles 4, 5 and 10.

Articles

- 2-1. *EXAMINATION AND LICENSURE OF MUNICIPAL PUBLIC ACCOUNTANTS. (Not in active use.)*
- 2-2. *ACCOUNTING AND FISCAL PROCEDURE FOR MUNICIPALITIES. (Not in active use.)*
- 2-3. *ACCOUNTING AND FISCAL PROCEDURE FOR MUNICIPALITIES.*
- 2-4. *SAME; APPLICABILITY TO OTHER UNITS. (Not in active use.)*
- 2-5. *CONTINUING EDUCATION REQUIREMENTS FOR LICENSED MUNICIPAL PUBLIC ACCOUNTANTS. (Not in active use.)*

Article 1.—EXAMINATION OF LICENSURE OF MUNICIPAL PUBLIC ACCOUNTANTS

2-1-1 to 2-1-16. (Authorized by K.S.A. 75-1119; effective May 1, 1978; revoked May 1, 1985.)

Article 2.—ACCOUNTING AND FISCAL PROCEDURE FOR MUNICIPALITIES

2-2-1. (Authorized by K.S.A. 75-1117, 75-1121 and 75-1123; effective May 1, 1978; revoked May 1, 1980.)

2-2-2. (Authorized by K.S.A. 75-1120, 75-1121 and 75-1123; effective May 1, 1978; revoked May 1, 1980.)

2-2-3 and 2-2-4. (Authorized by K.S.A. 75-1121 and 75-1123; effective May 1, 1978; revoked May 1, 1980.)

Article 3.—ACCOUNTING AND FISCAL PROCEDURE FOR MUNICIPALITIES

2-3-1 and 2-3-2. (Authorized by K.S.A. 75-1120, 75-1121, 75-1123; effective May 1, 1978; revoked May 1, 1980.)

2-3-3. (Authorized by K.S.A. 75-1121; effective May 1, 1978; revoked July 19, 1993.)

2-3-4. Audit reports. No municipality shall place a restriction upon the scope of the report without prior approval of the director. The audit report shall comply with the standards prescribed by regulations adopted by the director and the board.

The report shall either contain an expression of opinion regarding the financial statements, taken as a whole, or an assertion to the effect that an opinion cannot be expressed. When an overall opinion cannot be expressed, the reasons therefor should be stated. In all cases where an auditor's name is associated with financial statements, the report should contain a clear-cut indication of the character of the auditor's examination, if any, and the degree of responsibility he is taking. (Authorized by K.S.A. 75-1121 and 75-1124; effective May 1, 1978.)

2-3-5. Compliance reports. Upon the installation in any governmental unit of approved accounting procedures at the direction of, or with the assistance of, the director or his staff, copies of the monthly reports, as prepared for the governing body shall be filed with the office of the director for a period of one year or as determined by the director upon his written directive. These copies will indicate the financial condition of the governmental unit and establish its continued compliance with the prescribed accounting procedures. Failure to comply will be subject to penalties as prescribed in K.S.A. 75-1130. (Authorized by K.S.A. 75-1121; effective May 1, 1978.)

2-3-6. (Authorized by K.S.A. 75-1121, 75-1123; effective May 1, 1978; revoked May 1, 1980.)

Article 4.—SAME; APPLICABILITY TO OTHER UNITS

2-4-1. (Authorized by K.S.A. 75-1121; effective May 1, 1978; revoked May 1, 1980.)

**Article 5.—CONTINUING EDUCATION
REQUIREMENTS FOR LICENSED
MUNICIPAL PUBLIC ACCOUNTANTS**

2-5-1 to 2-5-5. (Authorized by K.S.A. 75-1119; effective May 1, 1979; revoked May 1, 1985.)

Articles

- 3-1. DISPOSITION OF UNCLAIMED PROPERTY.
- 3-2. KANSAS POSTSECONDARY EDUCATION SAVINGS PROGRAM.
- 3-3. LINKED DEPOSIT LOAN PROGRAMS.
- 3-4. LOW-INCOME FAMILY POSTSECONDARY SAVINGS ACCOUNTS INCENTIVE PROGRAM.

Article 1.—DISPOSITION OF UNCLAIMED PROPERTY

3-1-1. Time limits. Whenever limits of time are provided for in the act or in these rules and regulations the following shall govern: Whenever the time provided for is seven (7) days or more, Saturdays, Sundays and legal holidays shall be included in making the computation. Whenever the time so limited is less than seven (7) days, Saturdays, Sundays and legal holidays shall be excluded. Whenever the last day of any such period shall fall on a Saturday, Sunday or legal holiday, such day shall be omitted from the computation. (Authorized by K.S.A. 1979 Supp. 58-3927; effective May 1, 1980.)

3-1-2. Definitions. (a) "Demand deposit" means every deposit which is not a "time deposit" or "savings deposit".

(b) "Time deposit" means "time certificate of deposit" and "time deposit open account".

(c) "Time certificate of deposit" means a deposit evidenced by a negotiable or non-negotiable instrument which provides on its face that the amount of such deposit is payable:

(1) On a certain date, specified in the instrument, not less than thirty (30) days after the date of the deposit.

(2) At expiration of a specified period not less than thirty (30) days after the date of the instrument.

(3) Upon written notice to be given out less than thirty (30) days before the date of repayment.

(d) "Time deposit, open account" means a deposit, other than a "time certificate of deposit", with respect to which there is in force a written contract with the depositor that neither the whole nor any part of such deposit may be withdrawn, by check or otherwise, prior to the date of maturity, which shall not be less than thirty (30) days after the date of the deposit; or prior to the expiration

of a period of notice which must be given by the depositor in writing not less than thirty (30) days in advance of withdrawals.

(e) "Savings deposit" means a deposit with respect to which the depositor is not required by the deposit contract but may at any time be required by the financial institution to give notice in writing of an intended withdrawal not less than thirty (30) days before such withdrawal is made and which is not payable on a specified date or at the expiration of a specified time after the date of deposit.

(f) "Charges that may lawfully be withheld" means any type of deduction by a holder (including service charges, holding charges and administrative costs) from property presumed abandoned pursuant to the disposition of unclaimed property act, also deductions by a holder from property prior to the presumption of abandonment, which deductions were made by reason of the nonoccurrence of the events or acts that prevent the presumption of abandonment, or by reason of the inactivity, dormancy of unclaimed status of the property.

(g) "Memorandum on file" means a written notation prepared in the ordinary course of business of a financial organization reflecting an oral or written interest expressed by the owner relating to his or her funds of deposit. To be effective as a bar to the presumption of abandonment the memorandum must be prepared contemporaneously with the expression of interest by the owner and prepared and dated by a responsible representative of the financial organization.

(h) "Annual correspondence" means written correspondence mailed first class, postage prepaid, by the holder on an annual basis. (Authorized by K.S.A. 1979 Supp. 58-3927; effective May 1, 1980.)

3-1-3. Charges by holder. Charges deducted by any holder shall be included as a portion of the report filed pursuant to K.S.A. 1979 Supp.

58-3912 along with the citation of the authority or a copy of the form or contract authorizing such charges. The value or amount of each item of property before any such charges were deducted therefrom shall also be stated in the report along with the amount of the charges deducted from each item and the date or dates on which such charges were deducted. The fact that the total charges deducted from an item of property equals or exceeds the value of the item shall not relieve the holder from making the report or providing the information requested on the report form. The state treasurer may by special inquiry to holder require additional explanation of charges including documentation of correspondence between the holder and owner, passbook provisions, signature cards, rules and regulations, by-laws, and other documents concerning any agreement between the holder and the owner.

If payment of interest or dividends on property presumed abandoned pursuant to the disposition of unclaimed property act is discontinued, before or after the property is presumed abandoned, the holder shall include in the report filed pursuant to K.S.A. 1979 Supp. 58-3912 a statement explaining the discontinuance. The state treasurer, by special inquiry with the holder, may require documentation relative to the discontinuance. (Authorized by K.S.A. 1979 Supp. 58-3927; effective May 1, 1980.)

3-1-4. Action by holder. An act or occurrence delaying or terminating the presumption of abandonment cannot result from the unilateral act of the holder except in those instances where correspondence is mailed by the holder and not returned. (Authorized by K.S.A. 1979 Supp. 58-3927; effective May 1, 1980.)

Article 2.—KANSAS POSTSECONDARY EDUCATION SAVINGS PROGRAM

3-2-1. No guarantee of principal or earnings; required statement. Each account contract, account application, and account deposit slip, and all promotional materials for the Kansas postsecondary education savings program shall contain the following statement or an equivalent statement approved by the treasurer, in a typeface and a location that are readily visible: “**NOTICE:** Accounts established under the Kansas Postsecondary Education Savings Program and their earnings are neither insured nor

guaranteed by the State of Kansas.” (Authorized by K.S.A. 1999 Supp. 75-644 and 75-647; implementing K.S.A. 1999 Supp. 75-647; effective June 30, 2000.)

3-2-2. Excess contributions. (a)(1) “Excess contributions” means contributions on behalf of a designated beneficiary in excess of the maximum account balance.

(2) “Maximum account balance” means an amount equal to the average amount of the qualified higher education expenses that would be incurred by a designated beneficiary for five years of study at institutions of postsecondary education located in the midwest states, as determined annually by the state treasurer.

(b) The program manager shall establish adequate safeguards to prevent excess contributions. At a minimum, those safeguards shall include all of the following:

(1) The program manager shall identify all accounts with the same designated beneficiary.

(2) When a contribution is forwarded to the program manager, the program manager shall use the following calculation to determine whether that contribution would exceed the maximum account balance:

(A) Add the following amounts:

(i) The new contribution;

(ii) the aggregate balance of all accounts for that designated beneficiary at the end of the prior quarter; and

(iii) the sum of all other contributions made during the current quarter to any account for that designated beneficiary; and

(B) subtract the sum of all withdrawals made during the current quarter from any account for that designated beneficiary.

Any portion of the contribution that is determined in this manner to exceed the maximum account balance shall be an excess contribution.

(3) If the program manager determines that a contribution will result in excess contributions for that designated beneficiary, the program manager shall deposit only that portion of the contribution, if any, that will not result in an excess contribution. The program manager shall return the balance of the contribution to the contributor.

(c) The program manager shall continually monitor the contributions to and aggregate balance of all the accounts for each designated beneficiary, using the following calculation:

(A) Add the following amounts:

(i) The aggregate balance of all accounts for that designated beneficiary at the end of the prior quarter; and

(ii) the sum of all contributions made during the current quarter to any account for that designated beneficiary; and

(B) subtract the sum of all withdrawals made during the current quarter from any account for that designated beneficiary.

If at any time the result of this calculation exceeds the maximum account balance, the program manager shall determine whether any portion of the amount in excess of the maximum account balance is attributable to contributions made during the current quarter. The program manager shall not be required to take any further action if the amount that created the excess is not attributable to current-quarter contributions. If any portion of the excess is attributable to current-quarter contributions, the program manager shall notify the account owner of each account creating the excess that excess contributions have been made on behalf of the designated beneficiary and that the excess contributions attributable to that account must be eliminated through a withdrawal or a roll-over distribution.

(d) If, within 30 days of the date the notice is mailed to the account owner, the account owner does not submit a request for a withdrawal or roll-over distribution in an amount sufficient to eliminate the excess contributions for that designated beneficiary, the program manager shall process withdrawal of the excess contributions from the affected account and shall forward the proceeds to the account owner. (Authorized by K.S.A. 2001 Supp. 75-644 and 75-646, as amended by L. 2002, Ch. 104, Sec. 2; implementing K.S.A. 2001 Supp. 75-646, as amended by L. 2002, Ch. 104, Sec. 2; effective June 30, 2000; amended Dec. 6, 2002.)

3-2-3. Withdrawals. Any account owner may withdraw part or all of the balance from the owner's account at any time.

Each request for a withdrawal shall be made in the form prescribed by the treasurer. The request shall include an identification of the account from which the withdrawal is to be made and the amount.

Except as otherwise provided by the postsecondary education savings agreement, the program manager shall process each withdrawal upon receipt of a completed withdrawal request. (Authorized by K.S.A. 2001 Supp. 75-644 and 75-646, as

amended by L. 2002, Ch. 104, Sec. 2; implementing K.S.A. 2001 Supp. 75-646, as amended by L. 2002, Ch. 104, Sec. 2; effective June 30, 2000; amended Dec. 6, 2002.)

Article 3.—LINKED DEPOSIT LOAN PROGRAMS

3-3-1. Agricultural production loans. For each agricultural production loan authorized by K.S.A. 75-4270 et seq. and amendments thereto, the "eligible agricultural borrower" shall be a resident of the state of Kansas, and a majority of the farm for which the proceeds of the loan are expended shall be located within the state of Kansas. A limited liability agricultural company, limited agricultural partnership, or family farm corporation shall be considered a resident if it meets the requirements of K.S.A. 17-5903, and amendments thereto. (Authorized by K.S.A. 2007 Supp. 75-4270; implementing K.S.A. 2007 Supp. 75-4270, 75-4271, and 75-4272; effective, T-3-7-3-00, July 3, 2000; effective Oct. 27, 2000; amended, T-3-6-25-08, July 1, 2008; amended Oct. 24, 2008.)

3-3-2. Kansas housing loans. (a) The proceeds of all housing loans authorized by K.S.A. 75-4276 et seq., and amendments thereto, may be used for building newly constructed residential structures or rehabilitating existing residential structures.

(1) A "residential structure" shall mean an improvement to real property that is intended to be used or occupied as a single-family residential dwelling or a multifamily residential dwelling of four attached living units or less.

(2) A "newly constructed residential structure" shall mean a residential structure that has never been occupied for any purpose and initially sells or is appraised by an independent certified real estate appraiser or an independent licensed real estate appraiser for less than \$287,434 for a single-family residence, \$367,975 for a two-family residence, \$444,751 for a three-family residence, and \$552,757 for a four-family residence. The value of the property shall include the value of the land upon which the improvement is located only if the cost of the land is included in the housing loan.

(3) Each loan for rehabilitating a residential structure shall be at least \$15,000, and the value of the property upon completion of the project shall be estimated to be less than the amounts listed in paragraph (a)(2) using either an appraisal by an

independent certified real estate appraiser or an independent licensed real estate appraiser or the most recent county appraisal of the property plus the cost of the rehabilitation project.

(b) Loans to savings banks and savings and loan associations statewide may be made by the treasurer. (Authorized by K.S.A. 2009 Supp. 75-4278; implementing K.S.A. 2009 Supp. 75-4277(e), as amended by L. 2010, ch. 113, sec. 1(e), and K.S.A. 2009 Supp. 75-4279(g), as amended by L. 2010, ch. 113, sec. 2(g); effective, T-3-6-25-08, July 1, 2008; effective Oct. 24, 2008; amended, T-3-5-12-10, May 12, 2010; amended Jan. 21, 2011.)

Article 4.—LOW-INCOME FAMILY POSTSECONDARY SAVINGS ACCOUNTS INCENTIVE PROGRAM

3-4-1. Definitions. In addition to the terms and definitions in K.S.A. 75-643 and K.S.A. 75-650 and amendments thereto, the following terms shall have the meanings specified in this regulation:

(a) “Account owner” means the account owner or joint account owners of a participant account.

(b) “Contribution” means any deposit made by an account owner to that account owner’s participant account during a calendar year, except any deposit that is one of the following:

(1) A rollover from another account in the Kansas postsecondary education savings program;

(2) a rollover from another state’s qualified tuition program as defined in internal revenue code section 529;

(3) a transfer from a Coverdell education savings account as defined in internal revenue code section 530; or

(4) a transfer of proceeds from a qualified U.S. savings bond as described in internal revenue code section 135(c)(2)(C).

(c) “Household” means a group of individuals who are related by birth, marriage, or adoption and who share a residence.

(d) “Participant” has the meaning specified in K.S.A. 75-650, and amendments thereto. Each participant shall be a beneficiary of a Kansas postsecondary education savings program account, as defined in K.S.A. 75-643 and amendments thereto.

(e) “Participant account” means the Kansas postsecondary education savings program account established by an account owner for the benefit of a participant who is enrolled in the matching grant program.

This regulation shall be effective on and after January 1, 2010. (Authorized by and implementing K.S.A. 2008 Supp. 75-650, as amended by L. 2009, ch. 113, sec. 1; effective, T-3-6-29-06, June 29, 2006; effective Oct. 27, 2006; amended July 6, 2007; amended Jan. 1, 2010.)

3-4-2. Eligibility requirements. Each account owner shall meet the following requirements:

(a) Be a resident of the state of Kansas;

(b) reside in a household with a combined federal adjusted gross income for all individuals residing in the household that is not more than 200 percent of the current federal poverty level; and

(c) not be claimed as a dependent on someone else’s income tax return.

This regulation shall be effective on and after January 1, 2010. (Authorized by and implementing K.S.A. 2008 Supp. 75-650, as amended by 2009 SB 225, sec. 1; effective, T-3-6-29-06, June 29, 2006; effective Oct. 27, 2006; amended July 6, 2007; amended Jan. 1, 2010.)

3-4-3. Applications. Each application shall be processed in the order received for awarding the number of matching grants authorized by L. 2006, ch. 189, sec. 3, and amendments thereto. Each application shall be accompanied by a copy of the federal income tax return for the previous tax year for each individual residing in the household who is required to file an income tax return. (Authorized by and implementing L. 2006, ch. 189, sec. 3; effective, T-3-6-29-06, June 29, 2006; effective Oct. 27, 2006.)

3-4-4. Eligibility period. Each participant shall be entitled to a matching grant equal to the amount of the account owner’s contributions to the participant account for the program year in which the account owner’s application is approved. The program year shall coincide with the period designated for contributions that are eligible for the deduction pursuant to K.S.A. 79-32,117(c)(xv) and amendments thereto. Each account owner shall re-apply each program year to remain eligible for the program. A participant shall not be eligible during a program year in which a qualified or nonqualified withdrawal is taken from the participant account.

This regulation shall be effective on and after January 1, 2010. (Authorized by and implementing K.S.A. 2008 Supp. 75-650, as amended by L. 2009, ch. 113, sec. 1; effective, T-3-6-29-06, June 29, 2006; effective Oct. 27, 2006; amended July 6, 2007; amended Jan. 1, 2010.)

3-4-5. Matching grant accounts. The matching grant funds for each participant shall be deposited in a separate account in the account owner's name for the benefit of the participant, with the following restrictions:

(a) No change in ownership of the participant account or the corresponding matching grant account shall be allowed, except upon approval by the treasurer. A change in account ownership to another account owner who meets the eligibility requirements in K.A.R. 3-4-2 may be approved by the treasurer. A change in account ownership to any individual may be approved by the treasurer upon the account owner's death, divorce, or incapacity.

(b) For participant accounts that are not used to participate in the matching grant program after January 1, 2010, any change in the designated beneficiary for a participant account by the account owner shall cause the beneficiary for the corresponding matching grant account to be changed to the same new beneficiary.

(c) The investment portfolio for the corresponding matching grant account shall always be the same as the investment portfolio selected for each participant account.

(d) Each request for a withdrawal from the matching grant account shall be submitted to the treasurer's office for approval. If the treasurer determines that the request is for qualified higher education expenses, then the request shall be approved. Each approved withdrawal from the matching grant account shall be paid either directly to the educational institution or to the account owner or the designated beneficiary, upon presentation of documentation acceptable to the treasurer that the account owner or designated beneficiary has paid qualified higher education expenses at least equal to the amount of the requested withdrawal. Each approved withdrawal shall be equally funded from the participant account and the corresponding matching grant account.

This regulation shall be effective on and after January 1, 2010. (Authorized by and implementing K.S.A. 2008 Supp. 75-650, as amended by 2009 SB 225, sec. 1; effective, T-3-6-29-06, June 29, 2006; effective Oct. 27, 2006; amended July 6, 2007; amended Jan. 1, 2010.)

3-4-6. This regulation shall be revoked on January 1, 2010. (Authorized by and implementing K.S.A. 2006 Supp. 75-650; effective, T-3-6-29-06, June 29, 2006; effective Oct. 27, 2006; amended July 6, 2007; revoked Jan. 1, 2010.)

3-4-7. Forfeit of matching grant funds. (a)

(1) Except as specified in paragraphs (a)(2) and (a)(3), funds in a matching grant account shall be forfeited in an amount equal to either of the following:

(A) Any nonqualified withdrawal from the corresponding participant account; or

(B) any rollover distribution to another qualified tuition plan from the corresponding participant account.

(2) If any nonqualified withdrawal or rollover distribution closes a participant account, the corresponding matching grant account shall be closed and its entire balance shall be forfeited.

(3) Any account owner who contributes more than the maximum matching grant amount may make a nonqualified withdrawal or rollover distribution of the excess contribution without forfeiting funds from the matching grant account.

(b) If the treasurer determines that the account owner has made a material misrepresentation on the application, all matching grant funds resulting from the application shall be forfeited.

(c) If a participant account ever becomes reportable as unclaimed property under K.S.A. 58-3934 et seq. and amendments thereto or the unclaimed property laws of any other state, the remaining balance in the corresponding matching grant account shall be forfeited.

(d) For participants who are enrolled in the matching grant program on or after January 1, 2010, if the account owner changes the beneficiary of the participant account, all funds in the corresponding matching grant account shall be forfeited regardless of when the matching grant was provided by the state.

(e) All forfeited funds shall be returned to the Kansas postsecondary education savings trust fund.

This regulation shall be effective on and after January 1, 2010. (Authorized by and implementing K.S.A. 2008 Supp. 75-650, as amended by 2009 SB 225, sec. 1; effective, T-3-6-29-06, June 29, 2006; effective Oct. 27, 2006; amended Jan. 1, 2010.)

Article 1.—AGRICULTURAL CHEMICALS

4-1-1. (Authorized by K.S.A. 2-2205; effective Jan. 1, 1966; revoked May 1, 1982.)

4-1-2. Definitions. In addition to the terms defined in K.S.A. 2-2202 and amendments thereto, the following terms shall have the meanings specified in this regulation: (a) “Abstracted,” as used in K.S.A. 2-2202(x)(3) and amendments thereto, means omitted.

(b) “The act,” and “the agricultural chemical act” mean K.S.A. 2-2201 et seq., and amendments thereto.

(c) “Authorized representative” and “designee” mean any person authorized by the secretary to enforce the act.

(d) “Pesticide” shall include insecticides, fungicides, rodenticides, herbicides, nematocides, defoliants, desiccants, and antimicrobials.

(e) “Plant-incorporated protectant” means any pesticidal substance produced by any plant and the genetic material necessary for the plant to produce the substance.

(f) “Plant regulator” shall not include any substance labeled or otherwise represented solely for use as a plant nutrient, fertilizer, or soil amendment.

(g) “Product” means one or more pesticides formulated, packaged, and labeled for distribution or sale.

(h) “Valuable constituent” means any active ingredient or inert ingredient. (Authorized by K.S.A. 2009 Supp. 2-2205; implementing K.S.A. 2009 Supp. 2-2202; effective Jan. 1, 1966; amended May 1, 1982; amended June 10, 2011.)

4-1-3 and 4-1-4. (Authorized by K.S.A. 2-2205; effective Jan. 1, 1966; revoked May 1, 1982.)

4-1-5. Label. The label of each product shall show clearly and prominently the following items:

(a) The complete name of the product under which the product is registered under the act;

(b) the name and address of the manufacturer, registrant, or person for whom the product was manufactured. Unless otherwise stated, any name and address on the label shall be considered as the name and address of the manufacturer. If the registrant’s name appears on the label and the registrant is not the manufacturer or if the name of the person for whom the product was manufactured appears on the label, the name that appears on

the label shall be qualified by appropriate wording that may include “packed for,” “distributed by,” or “sold by,” to indicate that the name is not that of the manufacturer. If the product is manufactured in more than one location or at a location separate from the manufacturer’s principal office, then the product label shall state either one of the addresses where the product is manufactured or the address of the manufacturer’s principal office;

(c) the EPA registration number, if required under the provisions of FIFRA;

(d) the net contents;

(e) an ingredient statement, which shall meet the following requirements:

(1) The ingredient statement shall appear on the front panel of the label unless the secretary or designee determines that, due to the size or form of the container, a statement on that portion of the label is impractical and permits this statement to appear on another side or panel of the label. If so permitted, the ingredient statement shall be in larger type and more prominent than the surrounding text. The ingredient statement shall run parallel with other printed matter on the panel of the label on which the ingredient statement appears and shall be on a clear, contrasting background and not obscured or crowded;

(2) the acceptable common name of each active ingredient as specified in FIFRA shall appear on the ingredient statement or, if the active ingredient has no common name, the correct chemical name shall be stated. A trademark or trade name shall not be used as the name of an active ingredient unless the trademark or trade name has become a common name;

(3) active ingredients and inert ingredients shall be so designated. The term “inert ingredient” shall appear in the same size type and be as prominent as the term “active ingredient”; and

(4) the percentages of all ingredients shall be determined by weight, and the sum of the percentages of all ingredients shall be 100. Sliding-scale forms of ingredient statements shall not be used;

(f) a first aid statement; and

(g) a warning or caution statement. The warning or caution statement shall appear on the label in a place sufficiently prominent to warn the user and shall state clearly and in nontechnical language the particular hazards involved in the use of the product and the precautions to be taken to avoid accident, injury, or damage to humans and other nontarget organisms. (Authorized by K.S.A. 2010 Supp. 2-2205; implementing K.S.A. 2010 Supp.

2-2202; effective Jan. 1, 1966; amended May 1, 1982; amended June 10, 2011.)

4-1-6. (Authorized by K.S.A. 2-2205; implementing K.S.A. 2-2203; effective Jan. 1, 1966; amended May 1, 1982; revoked June 10, 2011.)

4-1-7. (Authorized by K.S.A. 2-2205; effective Jan. 1, 1966; revoked May 1, 1982.)

4-1-8. (Authorized by K.S.A. 2-2205; implementing K.S.A. 2-2203; effective Jan. 1, 1966; amended May 1, 1982; revoked June 10, 2011.)

4-1-9. Registration. (a) Pursuant to K.S.A. 2-2204 and amendments thereto, a product may be registered by one of the following: any manufacturer, authorized agent of the manufacturer, packer, seller, distributor, or shipper of that product.

(b) The registrant shall be responsible for the accuracy and completeness of all information submitted in connection with the application for registration of a product.

(c) Each registrant shall submit the product labeling to the secretary or designee when initially registering the product and whenever changing or modifying the labeling. When a registrant submits a product's labeling due to a change or modification in the labeling, the labeling shall be accompanied with a written statement that clearly and specifically describes the changes from the previous labeling and the proposed date of implementation of the new labeling. After the effective date of a change in labeling, the product shall be marketed only under the new labeling. Any registrant may request from the secretary or designee that a reasonable time be permitted to relabel or dispose of any products with the old labeling. After the initial registration of a product, any registrant may register that product no more than four consecutive years without the submission of the product label if there is no change to the product label.

(d) Claims or representations made for a product by the registrant or registrant's agent shall not differ from claims or representations made in connection with registration. These claims or representations shall include the following:

(1) Publications or advertising literature that accompanies the product or is distributed separately from the product;

(2) advertising by radio, television, internet sites, or other electronic media; and

(3) verbal and written communication.

(e) If the secretary requires additional information in support of the registration and the registrant believes that the requirement for additional data is unreasonable, the registrant may request a conference with the secretary or designee to discuss the requirement and consider alternatives. Each request for a conference shall be made no later than 20 days after the date on which the request for additional data is sent to the registrant.

(f) Each registration shall be valid through the last day of the calendar year in which the product was registered, unless the registration has been canceled or suspended before that day. (Authorized by K.S.A. 2010 Supp. 2-2205; implementing K.S.A. 2010 Supp. 2-2204; effective Jan. 1, 1966; amended May 1, 1982; amended June 10, 2011.)

4-1-9a. Registration for special local need. (a) Each person registering a product for additional uses and methods of application not stated on the product's labeling under section three of FIFRA, but not inconsistent with federal law, for the purpose of meeting a special local need shall submit an application for the special local need to the secretary or designee. Each application shall include the following:

(1) A statement explaining why a special local need registration is necessary;

(2) efficacy and residue data;

(3) a letter from a subject matter expert, as recognized by the secretary or designee, detailing support for the special local need registration;

(4) EPA form 8570-25, "application for/notification of state registration of a pesticide to meet a special local need"; and

(5) a proposed label for the product.

(b) A product shall not be eligible for special local need registration if at least one of the following conditions is met:

(1) There is insufficient evidence to support a special local need for the additional use or method of application within the state.

(2) The registrant and product do not meet all requirements under the act and the Kansas pesticide law.

(3) For a food or feed use, the additional use or method of application does not have an established residue tolerance, or an exemption from tolerance, under FIFRA.

(4) The same use or method of application has previously been denied, disapproved, suspended, or cancelled by EPA.

(5) The same use or method of application has been voluntarily cancelled by the registrant.

(c) A special local need registration shall be issued to the applicant upon referral of the application to EPA by the secretary.

(d) A special local need registration shall be immediately cancelled by the secretary or designee if the application is disapproved by EPA.

(e) Each special local need registration of a product shall be renewed annually, but may be renewed no more than four times without resubmission of a special local need request pursuant to K.A.R. 4-1-9a. (Authorized by K.S.A. 2009 Supp. 2-2205 and K.S.A. 2009 Supp. 2-2214; implementing K.S.A. 2009 Supp. 2-2207; effective June 10, 2011.)

4-1-9b. Emergency situation exemptions.

(a) Any person may submit a request for a registration exemption under section 18 of FIFRA to the secretary or designee if an emergency situation exists.

(b) "Emergency situation" shall include the following: a specific emergency, a public health emergency, a quarantine emergency, and a crisis emergency that is urgent and nonroutine.

(c) Each request for registration exemption under section 18 of FIFRA shall include documentation of each of the following:

(1) No effective registered products are available.

(2) No feasible alternative control practices are available.

(3) The emergency situation involves the introduction of a new pest, will present significant risks to human health or the environment, or will cause significant economic loss.

(d) Each person seeking an emergency situation exemption shall compile and present to the secretary or designee any additional information required by EPA to support the request.

(e) Each person distributing a product under the emergency situation exemption shall provide the end user with the product labeling that was approved for the emergency situation exemption.

(f) Each person distributing or using products under an emergency situation exemption shall meet the following requirements:

(1) Comply with all reporting requirements contained within the emergency situation exemption; and

(2) notify the secretary or designee of any adverse effects resulting from the use of the product. (Authorized by K.S.A. 2009 Supp. 2-2205;

implementing K.S.A. 2009 Supp. 2-2207; effective June 10, 2011.)

4-1-10. (Authorized by K.S.A. 2-2205; effective Jan. 1, 1966; revoked May 1, 1982.)

4-1-11. (Authorized by K.S.A. 2-2205; implementing K.S.A. 2-2202; effective Jan. 1, 1966; amended May 1, 1982; revoked June 10, 2011.)

4-1-12. (Authorized by K.S.A. 2-2205; effective Jan. 1, 1966; revoked May 1, 1982.)

4-1-13. Enforcement; product sampling.

Collection of samples of products for analysis shall be performed by the secretary or designee. A sample may be taken as either an unopened original package or a portion from the unopened original package. (Authorized by K.S.A. 2009 Supp. 2-2205; implementing K.S.A. 2009 Supp. 2-2206, as amended by L. 2010, ch. 17, §10; effective Jan. 1, 1966; amended May 1, 1982; amended June 10, 2011.)

4-1-14. Experimental use. (a) A product, including a plant or seed modified genetically to include a plant-incorporated protectant, may be distributed for experimental use without registration under K.S.A. 2-2204, and amendments thereto, if either of the following conditions is met:

(1) A permit for the product has been obtained from the secretary or designee.

(2) The experimental use of the product is limited to one of the following:

(A) Laboratory or greenhouse tests; or

(B) a small-scale test conducted on a cumulative total of no more than one acre of land per pest.

(b) An experimental use permit may be issued if the secretary or designee determines that the applicant needs the permit to accumulate information necessary to register a pesticide under K.S.A. 2-2204, and amendments thereto. Issuance of an experimental use permit may be denied by the secretary or designee if it is determined that the proposed use of the pesticide could cause unreasonable adverse effects on the environment. Terms, conditions, and a limited time period of the experimental use permit may be prescribed by the secretary or designee.

(c) Each application for experimental use shall include the following:

(1) The name and address of the applicant;

(2) the purpose or objectives of the experimental use and the experimental protocols to be followed;

(3) the name, address, and telephone number of all participants in the experimental use in Kansas;

(4) the amount of the product, including a plant or seed modified genetically to include a plant-incorporated protectant, to be shipped into or used in Kansas;

(5) the applicant's signature;

(6) documentation of EPA approval;

(7) a copy of the experimental use product labeling approved by EPA; and

(8) any other relevant information requested by the secretary or designee. If the secretary requires additional information in support of the application and the applicant believes that the requirement for additional data is unreasonable, the applicant may request a conference with the secretary or designee to discuss the requirement and consider alternatives. Each request for a conference shall be made no later than 20 days after the date the request for additional data is sent to the applicant.

(d) After the permit is issued, the permittee shall meet the following requirements:

(1) Coordinate the dates and locations of the proposed use of the product with the secretary or designee; and

(2) notify the secretary or designee of any adverse effects resulting from the experimental use within 24 hours of discovery.

(e) An experimental use permit may be modified, revoked, suspended, or modified by the secretary or designee at any time if either of the following conditions is met:

(1) The secretary or designee finds that the terms or conditions of the permit are being violated.

(2) The secretary or designee, after taking into account the economic, social, and environmental costs and benefits of the use of the product under the existing permit, determines the risk to the environment to be unacceptable.

(f) At the conclusion of the experimental use, the permittee shall submit a final report to the secretary or designee summarizing the results. (Authorized by K.S.A. 2009 Supp. 2-2205; implementing K.S.A. 2009 Supp. 2-2207; effective Jan. 1, 1966; amended May 1, 1982; amended June 10, 2011.)

4-1-15 and 4-1-16. (Authorized by K.S.A. 2-2205; effective Jan. 1, 1966; revoked May 1, 1982.)

4-1-17. Registration fee. The annual registration fee for each registered product shall be \$150.00. (Authorized by K.S.A. 2009 Supp. 2-2204 and K.S.A. 2009 Supp. 2-2205; imple-

menting K.S.A. 2009 Supp. 2-2204; effective, T-83-35, Nov. 10, 1982; effective May 1, 1983; amended, T-88-46, Nov. 10, 1987; amended May 1, 1988; amended, T-4-6-22-89, June 22, 1989; amended Aug. 14, 1989; amended, T-4-6-27-02, July 1, 2002; amended Oct. 25, 2002; amended June 10, 2011.)

Article 2.—AGRICULTURAL SEED

LABELING

4-2-1. Labeling prohibitions. Any agricultural seed shall be deemed mislabeled within the meaning of the act if there appears on the label, container, invoice, other accompanying literature, or any advertising media, any statement directly or indirectly implying that any agricultural seed is recommended or endorsed by the Kansas state board of agriculture or its state seed laboratory, or any of its other divisions. This regulation shall become effective on January 1, 1989. (Authorized by K.S.A. 2-1427; implementing K.S.A. 1987 Supp. 2-1417; effective Jan. 1, 1966; amended Jan. 1, 1989.)

4-2-2. Labeling treated seed. Treated seed must be labeled. If seed has been chemically treated, each bag or container must be labeled bearing a true statement as follows: The required information shall be in type no smaller than 8 point and may be on the tag bearing the analysis information or on a separate tag, or it may be printed in a conspicuous manner on a side or top of the container. (Authorized by K.S.A. 2-1427; effective Jan. 1, 1966.)

SAMPLING

4-2-3. Sampling procedure. (a) Each of the following terms, as used in this regulation, shall have the meaning specified in this subsection:

(1) "Free-flowing seed" means any agricultural seed that readily sheds the husks, hulls, awns, bran, and other plant parts while being conditioned, allowing the seeds to move freely and independently of each other.

(2) "Non-free-flowing seed" means any agricultural seed that, because of attached husks, hulls, awns, bran, and other plant parts that do not readily separate from the seed while being conditioned, tends to bind together, preventing the seeds from moving independently of each other.

(3) "Seed" means agricultural seed as defined in K.S.A. 2-1415, and amendments thereto.

(b) To obtain a representative sample, equal portions shall be taken from evenly distributed parts of the lot to be sampled based on the type of seed and number of containers, unless the seed is stored or piled in a manner that makes taking a representative sample impossible or impractical.

(c) For free-flowing seed in bags or bulk, a probe or trier long enough to sample all portions of the bag shall be used.

(d) All non-free-flowing seed, including uncleaned agricultural seed and chaffy range grasses that are difficult to sample with a probe or trier, shall be sampled by thrusting the hand into the bulk and withdrawing representative portions.

(e) The portions collected from a single lot shall be combined into one or more composite samples.

(f) As the seed is sampled, each portion shall be examined. If a lack of uniformity appears to exist, additional samples shall be taken to determine whether a lack of uniformity exists. (Authorized by K.S.A. 2016 Supp. 2-1427; implementing K.S.A. 2-1416 and K.S.A. 2016 Supp. 2-1423; effective Jan. 1, 1966; amended Oct. 6, 2017.)

4-2-4. (Authorized by K.S.A. 2-1427; effective Jan. 1, 1966; revoked Dec. 12, 1994.)

4-2-5. (Authorized by K.S.A. 2-1427; effective Jan. 1, 1966; revoked Dec. 12, 1994.)

4-2-6. (Authorized by K.S.A. 2-1427; effective Jan. 1, 1966; revoked Dec. 12, 1994.)

4-2-7. (Authorized by K.S.A. 2-1427; effective Jan. 1, 1966; revoked May 1, 1982.)

ANALYSES IN ADMINISTRATION OF THE ACT

4-2-8. Methods of analyses. (a) Subject to the provisions of subsections (f), (g), and (h) of this regulation, the methods of analysis shall be those published by the association of official seed analysts in the following sections of volume 1 of the "AOSA rules for testing seeds," titled "principles and procedures," including all tables and charts, dated October 1, 2016 and hereby adopted by reference:

(1) Section 2, preparation of working samples, except page 2-60;

(2) section 3, the purity analysis, except page 3-30;

(3) section 4, uniform classification of weed and crop seeds;

(4) section 5, examinations;

(5) section 6, germination tests;

(6) section 8, tetrazolium testing;

(7) section 12, mechanical seed counts; and

(8) section 14, tolerances, except subsection 14.10.

(b) Volume 2 of the association of official seed analysts' "AOSA rules for testing seeds," titled "uniform blowing procedure," revised 2015, is hereby adopted by reference, except page ii, section 1, and section 8.

(c) Volume 3 of the association of official seed analysts' "AOSA rules for testing seeds," titled "uniform classification of weed and crop seeds," revised 2016, is hereby adopted by reference, except pages i-iii and viii-xiv.

(d) Volume 4 of the association of official seed analysts' "AOSA rules for testing seeds," titled "seedling evaluation," including illustrations, dated 2016, is hereby adopted by reference, except pages i-vi; page 18; the "references" sections on pages 22, 41, 46, 58, 62, 67, 98, 109, and 115; and pages 135-139.

(e) The "AOSA/SCST tetrazolium testing handbook," prepared by the tetrazolium subcommittee of the association of official seed analysts and the society of commercial seed technologists, including tables and illustrations, 2010 edition, is hereby adopted by reference, except pages i-viii; in part 1, subsections 1, 3, 7, and 15.2; part 4; and part 5.

(f) For the purpose of this regulation, the term "noxious-weed seed" used in the material adopted by reference in this regulation shall mean "restricted weed seed" as defined in K.S.A. 2-1415 and amendments thereto.

(g) For the purpose of this regulation, the term "purity tolerances" used in the material adopted by reference in this regulation shall mean "the greatest non-significant difference between two values, which may be two estimates or a specification and an estimate."

All other terms used in the material adopted by reference in this regulation shall have the meanings specified in the adopted portions of the "AOSA rules for testing seeds," unless a term is defined by K.S.A. 2-1415 and amendments thereto, in which case the term shall have the meaning specified in that statute.

(h) The following restrictions shall apply in addition to tolerances for the testing of seed in section 14 adopted by reference in paragraph (a)(8) of this regulation:

(1) Restricted weed seed tolerances shall not

exceed the limitations specified in K.S.A. 2-1415 and amendments thereto.

(2) No tolerance shall be applied to any seed component that is guaranteed as “none” on the label. (Authorized by K.S.A. 2016 Supp. 2-1427; implementing K.S.A. 2016 Supp. 2-1423; effective Jan. 1, 1966; amended May 1, 1982; amended May 1, 1983; amended May 1, 1986; amended Jan. 1, 1989; amended Dec. 12, 1994; amended Jan. 18, 2008; amended Oct. 6, 2017.)

TOLERANCES

4-2-9. (Authorized by K.S.A. 2-1427; effective Jan. 1, 1966; revoked May 1, 1988.)

EXAMINATIONS IN THE ADMINISTRATION OF THE ACT

4-2-10. Indistinguishable seed. When the identification of the kind, variety, or type of seed is not possible by seed characteristics, identification may be based upon the seeding, growing plant, or mature plant characteristics according to such authentic information as is available. (Authorized by K.S.A. 2-1427; effective Jan. 1, 1966.)

4-2-11. Origin. The presence of incidental weed seeds, foreign matter, or any other existing circumstances shall be considered in determining the origin of seed. (Authorized by K.S.A. 2-1427; effective Jan. 1, 1966.)

GENERAL

4-2-12 and 4-2-13. (Authorized by K.S.A. 2-1427; effective Jan. 1, 1966; revoked May 1, 1982.)

4-2-14. Seed offered for sale. Agricultural seeds whether in bags, cartons, bins or other containers exposed in salesrooms, storerooms, warehouses, or other places where seeds are sold for sowing purposes, shall be considered as seed offered or exposed for sale for planting purposes and subject to the provisions of the act, unless clearly labeled otherwise. (Authorized by K.S.A. 2-1427; effective Jan. 1, 1966.)

4-2-15. (Authorized by K.S.A. 2-1425; effective Jan. 1, 1966; amended Jan. 1, 1972; amended, E-78-32, Dec. 7, 1977; amended May 1, 1978; revoked May 1, 1983.)

4-2-16. (Authorized by K.S.A. 2-1427; effective Jan. 1, 1966; revoked May 1, 1986.)

4-2-17. (Authorized by K.S.A. 2-1425; implementing K.S.A. 2-1425; effective May 1, 1983;

revoked, T-4-7-5-89, July 5, 1989; revoked Aug. 14, 1989.)

4-2-17a. (Authorized by K.S.A. 2-1427; implementing K.S.A. 2-1425 as amended by 1989 HB 2133; effective, T-4-7-5-89, July 5, 1989; effective Aug. 14, 1989; revoked Oct. 6, 2017.)

4-2-18. Label requirements for seed delivered to wholesalers. Seed delivered in bulk to a wholesaler after conditioning shall be completely labeled by an invoice or master label attached to the bulk container. Seed delivered to a wholesaler in bags or other containers may be labeled by an invoice or master label that bears a lot number and all other information required by law provided that each individual bag or other container is properly identified with the lot number shown on the invoice or master label clearly and readably stenciled on each individual bag or other container. Each bag or other container which does not bear a lot number that corresponds to an invoice or master label shall be completely labeled. This regulation shall become effective on January 1, 1989. (Authorized by K.S.A. 2-1427; implementing K.S.A. 1987 Supp. 2-1417; effective Jan. 1, 1989.)

4-2-20. Adoption by reference. The following sections of 7 C.F.R. part 201, as revised on January 1, 2007, are hereby adopted by reference:

- (a) 201.39;
- (b) 201.40;
- (c) 201.41;
- (d) 201.42; and
- (e) 201.43.

(Authorized by K.S.A. 2006 Supp. 2-1427; implementing K.S.A. 2-1423; effective Dec. 12, 1994; amended Jan. 18, 2008.)

4-2-21. Registration fees for wholesalers and retailers. (a) Each wholesaler shall pay a registration fee of \$250 for each location at which the wholesaler is doing business.

(b) Each retailer shall pay a registration fee of \$30 for each location at which the retailer is doing business.

(c) Each person registering as both a wholesaler and a retailer at the same location shall pay a registration fee of \$280 for each location at which the person is doing business. (Authorized by K.S.A. 2016 Supp. 2-1421a and 2-1427; implementing K.S.A. 2016 Supp. 2-1421a; effective Oct. 6, 2017.)

Article 3.—COMMERCIAL FEEDING STUFFS

DEFINITIONS

4-3-1. (Authorized by K.S.A. 2-1013; effective Jan. 1, 1966; revoked May 1, 1982.)

4-3-2. Definitions. (a) International chick unit of vitamin D is the activity produced by one unit of vitamin D in the U. S. pharmacopoeia “vitamin D reference standard” determined according to the method of the association of official agricultural chemists.

(b) “U.S.P.” means the United States pharmacopoeia, volume XIII.

(c) “Crude protein” and “protein” means the product of the amount of nitrogen times the factor 6.25.

(d) “Person” means individuals, partnerships, associations or persons, and corporations.

(e) Livestock. “Livestock” means and includes horses, mules, cattle, sheep, swine and goats.

(f) Poultry. “Poultry” means fowl raised for meat, eggs, or feathers, and includes chickens, ducks, guineas, geese, turkeys and pigeons. (Authorized by K.S.A. 2-1013; implementing K.S.A. 2-1001; effective Jan. 1, 1966; amended May 1, 1982; amended May 1, 1983.)

LABELING

4-3-3. Legibility and conspicuousness. (a) A word, statement, or other information required by or under the authority of the act or these regulations to appear on the label may lack that legibility and conspicuousness by reason of:

(1) The failure of this word, statement, or information to appear on the part or panel of the label which is presented or displayed under customary conditions of purchase;

(2) The insufficiency of label space for the prominent placing of this word, statement, or information resulting from the use of label space for any word, statement, design, or device which is not required by or under authority of the act to appear on the label; and

(3) Smallness of style or type in which this word, statement, or information appears, insufficient background contrast; obscuring designs or vignettes; or crowding with other written, printed, or graphic matter. (Authorized by K.S.A. 2-1013; implementing K.S.A. 2-1002; effective Jan. 1, 1966; amended May 1, 1982.)

4-3-4. (Authorized by K.S.A. 2-1013; effective Jan. 1, 1966; revoked May 1, 1982.)

4-3-5. The name. (a) The name shall not be misleading or deceptive, or tend to mislead or deceive as to the materials of which the commercial feeding stuffs is composed. The name of a non-medicated feed shall be considered misleading or deceptive if:

(1) It includes or suggests the name of one or more but not all of the ingredients, even though the names of all these ingredients are stated elsewhere on the label;

(2) It indicates or suggests that the commercial feeding stuffs is intended or adapted for a specific use, unless the character, quality and nutritive composition of the product is satisfactory for the purpose;

(3) It contains the word “vitamin” or a contraction of it, or any word suggesting vitamin, unless the product is represented solely as a vitamin supplement and is labeled with the minimum vitamin content guaranteed as specified in K.A.R. 4-3-8;

(4) The word “dehydrated” appears in the name of an alfalfa product or in connection with it, unless the product has been produced from the freshly cut alfalfa plant, having a moisture content of not less than fifty (50) percent and had been artificially dried at a temperature of at least one hundred (100) degrees centigrade or two hundred and fifteen (215) degrees fahrenheit for a period of not more than forty (40) minutes and containing no admixture of sun-cured products;

(5) The germ has been wholly or partially removed from the product, unless the word “degermed” precedes the name;

(6) The word “defluorinated” is used as a part of it, and the product contains more than one (1) part of fluorine (F) to forty (40) parts of phosphorus (P);

(7) Superlative, ambiguous, or doubtful terms are used as a part of it, such as “perfect” or “best,” unless followed by the word “brand”; and

(8) The word “iodized” is used as a part of it unless the product contains more than .007% iodine (I), uniformly distributed. (Authorized by K.S.A. 2-1013; implementing K.S.A. 2-1002; effective Jan. 1, 1966; amended May 1, 1982.)

4-3-6. Name and address of manufacturer. An unqualified name and address given on the label shall mean the name and address of the manufacturer. If the registrant’s name appears on the label and the registrant is not the manufactur-

er, or if the name of the person for whom manufactured appears on the label, it shall be qualified by appropriate wording such as "packed for . . .," "distributed by . . .," or "sold by . . .," to show that the name is not that of the manufacturer. When a person manufactures commercial feeding stuffs in two (2) or more places or in a place different from the manufacturer's principal office, the actual place of manufacture of each package need not be stated on the label except when the failure to name it may be misleading to the public. (Authorized by K.S.A. 2-1013; implementing K.S.A. 2-1002; effective Jan. 1, 1966; amended May 1, 1982.)

4-3-7. Ingredient statement. (a) The specific name of each ingredient or collective term or terms shall be shown on the label. When a collective term or terms for a group of ingredients is used on the label, individual ingredients within the group shall not be listed on the label. The manufacturer shall provide upon request a listing of individual ingredients within a defined group. The specific name or collective term or terms shall be those products for which a definition or standard has been adopted. If the ingredient is a product that has not been defined, the name shall be descriptive and as approved by the secretary.

(b) If screenings are used as an ingredient, the source and condition shall be indicated.

(c) A statement of quality or grade of an ingredient shall not appear on the ingredient statement.

(d) A statement of vitamin content of an ingredient shall not appear in the ingredient statement, or any other part of the label, unless this statement is a guarantee of minimum vitamin content of the entire product given in terms as specified in K.A.R. 4-3-8.

(e) Statements or words explaining or qualifying the name of an ingredient shall not be used. (Authorized by K.S.A. 2-1013; implementing K.S.A. 2-1002; effective Jan. 1, 1966; amended Jan. 1, 1972; amended May 1, 1982.)

4-3-8. Vitamin products, carriers and preparations. Vitamin products, carriers and preparations shall be labeled to show information or guaranties as to vitamin content in milligrams per pound, except that vitamin A shall be stated in United States pharmacopoeia (U.S.P.) units per pound, vitamin D in products offered for poultry feeding in international chick units per pound, vitamin D for other uses in U.S.P. units per pound. (Authorized by K.S.A. 2-1002; effective Jan. 1, 1966.)

4-3-9. Feeds containing drug ingredients.

Commercial feeding stuffs containing drug ingredients intended or represented for the cure, mitigation, treatment or prevention of any disease or ailment of livestock and/or poultry, and substances other than feeds intended to affect the structure or any function of the body of livestock and/or poultry, shall be labeled to show, in addition to the other information required by the act:

(a) The name of each therapeutically active ingredient or agent stated as such and listed separately from other ingredients.

(b) Adequate directions for use.

(c) Adequate warnings against use under those conditions in which its use may be dangerous to health.

Provided, however, That the terms "drug" and "substance" as used herein do not apply to vitamin, mineral, or other materials used solely for nutritional purposes, and not present in therapeutic amounts. (Authorized by K.S.A. 2-1002; effective Jan. 1, 1966.)

4-3-10. Urea. Urea and ammonium salts of carbonic and phosphoric acids are acceptable ingredients in proprietary cattle, sheep and goat feeds only; that these materials shall be considered adulterants in proprietary feeds for other animals and birds; and that the following statement of guaranty of crude protein for feeds containing these materials be used:

Crude Protein, not less than _____ percent. (This includes not more than _____ percent equivalent protein from non-protein nitrogen.)

If feed contains more than 3 percent of urea, or if the equivalent protein contributed by urea exceeds $\frac{1}{3}$ of the total crude protein, the label shall bear a statement of proper usage, and the following statement in type of such conspicuousness as to render it likely to be read and understood by ordinary individuals under customary conditions of purchase and use:

WARNING: This feed should be used only in accordance with directions furnished on the label.

(Authorized by K.S.A. 2-1002; effective Jan. 1, 1966.)

REGISTRATION

4-3-11. Registration. (a) After a commercial feeding stuffs is registered under the act, no further registration is required by persons selling the product, provided it remains in the registrant's

properly labeled, original unbroken, immediate container.

(b) Registration shall be effective on the date the registration is issued.

(c) The secretary may refuse registration if:

(1) The name, brand or trademark is misleading or deceptive or may tend to mislead or deceive as to the materials of which the product is composed;

(2) The person already has a product registered under the same name; or

(3) The copy of label does not show the information as required by the act and these regulations or fails to conform to any of the requirements of the act. (Authorized by K.S.A. 2-1013; implementing K.S.A. 2-1003; effective Jan. 1, 1966; amended May 1, 1982.)

4-3-12. Permit system. (a) The permit holder shall keep the records of sales available for inspection for a period of three years.

(b) The secretary may cancel the permit if:

(1) The holder fails to report and pay the inspection fee within thirty days after due and payable;

(2) Refuses to permit the secretary or his duly authorized representative to examine the records; or

(3) Makes a false report of tonnage of feeding stuffs sold on which the inspection fee was due. (Authorized by K.S.A. 2-1013; implementing K.S.A. 2-1004; effective Jan. 1, 1966; amended Jan. 1, 1972; amended Feb. 15, 1977; amended May 1, 1982.)

ADMINISTRATION

4-3-13. Hearing. (a) The notice of hearing as specified in K.S.A. 2-1010, shall be in writing, and mailed first-class to the record address of the manufacturer or dealer. The person so notified shall be given an opportunity to present his views in writing or by representative.

(b) Upon request reasonably made, by the person to whom a notice appointing a time and place for the hearing as provided by K.S.A. 2-1010, has been given, or by his representative, such time and place, or both such time and place, may be changed if the request states reasonable grounds therefor. Such request shall be received by the secretary, or his agent who issued the notice.

(c) No notice of hearing shall be required prior to the seizure of any commercial feeding stuffs. (Authorized by K.S.A. 2-1013; effective Jan. 1, 1966.)

GENERAL

4-3-14. Artificial color. Artificial colors shall be considered an adulterant in a commercial feeding stuffs whereby its use would tend to enhance the natural color or conceal inferiority. Dyes certified for use under the federal food, drug and cosmetic act may be used to indicate the distribution of a valuable ingredient or ingredients, or to increase or aid in proper intake of a feeding stuffs. (Authorized by K.S.A. 2-1013; effective Jan. 1, 1966.)

4-3-15. Name of unmixed by-product feeds containing screenings or scourings. Unmixed by-product feeds, to which either screenings or scourings or both have been added, shall be labeled to clearly indicate this fact in the name. The word "screenings" or "scourings" together with the kind of screenings or scourings shall appear as a part of the name and shall be printed in the same size and face of type as the remainder of the name. (Authorized by K.S.A. 2-1013; implementing K.S.A. 2-1002; effective Jan. 1, 1966; amended May 1, 1982.)

4-3-16 to 4-3-18. (Authorized by K.S.A. 2-1013; effective Jan. 1, 1966; revoked May 1, 1982.)

DEFINITIONS FOR COMMERCIAL FEEDING STUFFS

4-3-19 and 4-3-20. (Authorized by K.S.A. 2-1013; effective Jan. 1, 1966; amended Jan. 1, 1972; revoked May 1, 1981.)

4-3-21 and 4-3-22. (Authorized by K.S.A. 2-1013; effective Jan. 1, 1966; revoked May 1, 1981.)

4-3-23 to 4-3-29. (Authorized by K.S.A. 2-1013; effective Jan. 1, 1966; amended Jan. 1, 1972; revoked May 1, 1981.)

4-3-30. (Authorized by K.S.A. 2-1013; effective Jan. 1, 1966; revoked May 1, 1981.)

4-3-31 to 4-3-33. (Authorized by K.S.A. 2-1013; effective Jan. 1, 1966; amended Jan. 1, 1972; revoked May 1, 1981.)

4-3-34. (Authorized by K.S.A. 2-1013; effective Jan. 1, 1966; amended Jan. 1, 1972; amended May 1, 1980; revoked May 1, 1981.)

4-3-35. (Authorized by K.S.A. 2-1013; effective Jan. 1, 1966; amended Jan. 1, 1972; revoked May 1, 1981.)

4-3-36. (Authorized by K.S.A. 2-1013; effective Jan. 1, 1966; revoked May 1, 1981.)

4-3-37 to 4-3-40. (Authorized by K.S.A. 2-1013; effective Jan. 1, 1966; amended Jan. 1, 1972; revoked May 1, 1981.)

4-3-41. (Authorized by K.S.A. 2-1013; effective Jan. 1, 1966; amended Jan. 1, 1972; amended May 1, 1980; revoked May 1, 1981.)

4-3-42 and 4-3-43. (Authorized by K.S.A. 2-1013; effective Jan. 1, 1966; amended Jan. 1, 1972; revoked May 1, 1981.)

4-3-44 and 4-3-45. (Authorized by K.S.A. 2-1013; effective Jan. 1, 1966; revoked May 1, 1981.)

4-3-46. (Authorized by K.S.A. 2-1013; effective Jan. 1, 1972; revoked May 1, 1981.)

4-3-47. Adoption by reference. (a) The following portions of the “2010 official publication” copyrighted in 2010 by the association of American feed control officials incorporated are hereby adopted by reference and shall apply to commercial feeding stuffs in this state:

(1) Regulations 1 through 13 of the “AAFCO model good manufacturing practice regulations for feed and feed ingredients” on pages 128 through 132, with the following changes:

(A)(i) In the first sentence of regulation 1, “section 3 of the model bill” shall be replaced with “K.S.A. 2-1001, and amendments thereto”; and

(ii) in the definition of “adulteration” in regulation 1, “section 7(a) of the model bill” shall be replaced with “K.S.A. 65-664, and amendments thereto”; and

(B) in the second sentence of regulation 11(b), the blank line following “agents of the” shall be replaced with “Kansas department of agriculture”;

(2) the text titled “official feed terms” on pages 314 through 323; and

(3) the text titled “official names and definitions of feed ingredients as established by the association of American feed control officials” on pages 324 through 415.

(b) Copies of the material adopted by reference in this regulation may be obtained from the office of the agricultural commodity assurance program, Kansas department of agriculture, Topeka, Kansas. (Authorized by K.S.A. 2-1011 and K.S.A. 2009 Supp. 2-1013; implementing K.S.A. 2009 Supp. 2-1002 and K.S.A. 2009 Supp. 2-1013; effective May 1, 1981; amended May 1, 1982; amended

May 1, 1984; amended May 1, 1988; amended Oct. 21, 1991; amended Dec. 12, 1994; amended June 15, 2001; amended Jan. 18, 2008; amended, T-4-1-5-11, Jan. 5, 2011; amended April 29, 2011.)

4-3-48. (Authorized by K.S.A. 2-1013 as amended by L. 1987, Ch. 7, Sec. 1; implementing K.S.A. 2-1002 and 2-1013 as amended by L. 1987, Ch. 7, Sec. 1; effective May 1, 1981; amended May 1, 1982; amended May 1, 1984; amended May 1, 1988; revoked April 29, 2011.)

4-3-49. Good manufacturing practices; adoption by reference. (a) Except for those portions excluded by this subsection, 21 CFR Parts 225 and 226, as revised on April 1, 2010, are hereby adopted by reference and shall apply to good manufacturing practices for the production of commercial feeding stuffs in Kansas:

(1) Subpart (c) of section 225.1 is not adopted by reference.

(2) In section 225.115(b)(2), the following language shall be deleted: “, under §510.301 of this chapter.”

(3) Subpart (b) of section 226.1 is not adopted by reference.

(b) Copies of the regulations, or pertinent portions of the regulations, shall be available from the office of the agricultural commodity assurance program, Kansas department of agriculture, Topeka, Kansas. (Authorized by and implementing K.S.A. 2010 Supp. 2-1013; effective, T-88-46, Nov. 10, 1987; effective May 1, 1988; amended Oct. 21, 1991; amended Dec. 12, 1994; amended, T-4-2-13-01, Feb. 13, 2001; amended June 15, 2001; amended Jan. 18, 2008; amended Sept. 9, 2011.)

4-3-50. Good manufacturing practices; definitions. The following terms as used in 21 C.F.R. Parts 225 and 226, which are adopted by reference in K.A.R. 4-3-49, shall have the following meanings: (a) The term “form,” referred to either by number or by any other designation, shall mean a form supplied by the agricultural commodity assurance program, Kansas department of agriculture.

(b) The term “state feed control officials” shall mean the secretary of the Kansas department of agriculture or the secretary’s authorized representative.

(c) The term “center for veterinary medicine” shall mean the agricultural commodity assurance program, Kansas department of agriculture unless the context requires otherwise.

(d) The term “type A medicated article” shall mean a feeding stuff or ingredient for a feeding stuff that is intended solely for use in the manufacture of either another type A medicated article or a type B or type C medicated feed.

(e) The term “type B medicated feed” shall mean a feeding stuff or an ingredient for a feeding stuff that contains a substantial quantity of nutrients including vitamins or minerals or other nutritional ingredients in an amount not less than 25% of the weight of the type A medicated article and that is intended solely for the manufacture of other medicated feeds, either type B or type C.

(f) The term “type C medicated feed” shall mean a feeding stuff or an ingredient for a feeding stuff that contains a substantial quantity of nutrients including vitamins, minerals, or other nutritional ingredients and that is intended as the complete feed for the animal. (Authorized by and implementing K.S.A. 2009 Supp. 2-1013; effective, T-88-46, Nov. 10, 1987; effective May 1, 1988; amended April 29, 2011.)

4-3-51. Prohibited feeding stuffs; adoption by reference. (a) The following portions of 21 CFR Part 589, revised on April 1, 2010, with the changes specified in this subsection, are hereby adopted by reference and shall apply to the production of all commercial feeding stuffs and custom-mixed feed in Kansas:

(1) The second sentence of section 589.1000 shall be replaced with the following sentence: “Use of gentian violet in animal feed causes the feed to be adulterated under K.S.A. 65-664.”

(2) The second sentence of section 589.1001 shall be replaced with the following sentence: “Use of propylene glycol in or on cat food causes the feed to be adulterated under K.S.A. 65-664.”

(3) In section 589.2000(d)(5), “Food and Drug Administration” shall be replaced with “Kansas department of agriculture.”

(4) In section 589.2000(f), “Food and Drug Administration” shall be replaced with “Kansas department of agriculture.”

(5) In section 589.2000(g)(1), “section 402(a)(2)(C) or 402(a)(4) of the act” shall be replaced with “K.S.A. 65-664.”

(6) In section 589.2000(g)(2), “section 403(a)(1) or 403(f) of the act” shall be replaced with “K.S.A. 65-665.”

(7) In section 589.2000(h)(2), “Food and Drug Administration” shall be replaced with “Kansas department of agriculture.”

(8) In section 589.2001(c)(2)(vi), “Food and Drug Administration” shall be replaced with “Kansas department of agriculture.”

(9) In section 589.2001(c)(3)(i), “Food and Drug Administration” shall be replaced with “Kansas department of agriculture.”

(10) In section 589.2001(d)(1), “section 402(a)(4) of the Federal Food, Drug, and Cosmetic Act (the act)” shall be replaced with “K.S.A. 65-664 and K.S.A. 2-1011.”

(11) In section 589.2001(d)(2), “section 402(a)(2), 402(a)(3), or 402(a)(5) of the act” shall be replaced with “K.S.A. 65-664 and K.S.A. 2-1011.”

(12) In section 589.2001(d)(3), “section 403(a)(1) or 403(f) of the act” shall be replaced with “K.S.A. 65-665 and K.S.A. 2-1011.”

(13) In section 589.2001(d)(4), “section 402(a)(4) of the act” shall be replaced with “K.S.A. 65-664 and K.S.A. 2-1011.”

(14) In section 589.2001(e), “Food and Drug Administration” shall be replaced with “Kansas department of agriculture.”

(b) Copies of the regulations, or pertinent portions of the regulations, shall be available from the office of the agricultural commodity assurance program, Kansas department of agriculture, Topeka, Kansas. (Authorized by and implementing K.S.A. 2010 Supp. 2-1013; effective, T-4-2-13-01, Feb. 13, 2001; effective June 15, 2001; amended Jan. 18, 2008; amended Sept. 9, 2011.)

Article 4.—COMMERCIAL FERTILIZERS

4-4-1. Micronutrients. Additional plant nutrients, besides nitrogen, phosphorus and potassium, when mentioned or claimed on the label or container shall be registered and shall be guaranteed. Guarantees shall be made on the elemental basis. Sources of the elements guaranteed shall be shown on the application for registration. When claims for such nutrients are made on the label, container, or application for registration, the minimum percentages which will be accepted for registration are as follows:

	Percent
Calcium (Ca)	1.00
Magnesium (Mg).....	0.50
Sulfur (S).....	1.00
Boron (B).....	0.02
Chlorine (Cl)	0.10
Cobalt (Co).....	0.0005
Copper (Cu)	0.05
Iron (Fe)	0.10

	Percent
Manganese (Mn)	0.05
Molybdenum (Mo)	0.0005
Sodium (Na)	0.10
Zinc (Zn)	0.05

Guarantees or claims for the above-listed additional plant nutrients are the only ones which will be accepted. Proposed labels and directions for use of the fertilizer shall be furnished with the application for registration upon request. Warning or caution statements are required on the label for any product which contains 0.03% or more of boron in a water-soluble form or 0.001% or more of molybdenum. Any of the above-listed elements which are guaranteed shall appear in the order listed, immediately following guarantees for the primary nutrients, nitrogen, phosphorus and potassium. (Authorized by K.S.A. 2-1210; effective Jan. 1, 1966.)

4-4-2. Inspection fee. The inspection fee for commercial fertilizers shall be \$1.67 for each 2,000 pounds. (Authorized by and implementing K.S.A. 2-1205, as amended by L. 2002, Ch. 181, § 1; effective, T-83-35, Nov. 10, 1982; effective May 1, 1983; amended May 1, 1984; amended May 1, 1986; amended, T-87-6, May 1, 1986; amended May 1, 1987; amended, T-4-6-22-89, June 22, 1989; amended Aug. 14, 1989; amended Oct. 25, 2002.)

4-4-900. Definitions. (a) "Alternative design" means any process or technique for either primary or secondary containment that has been approved by the secretary in accordance with K.A.R. 4-4-956.

(b) "Application equipment" means any equipment used to apply fertilizer to land.

(c) "Appurtenance" means any device used in connection with a bulk fertilizer storage container or bulk fertilizer secondary containment area, structure, or device, including any safety device, liquid-level gauging device, auger, pump, valve, pipe, hose, fitting, and measuring or dispensing device.

(d) "Berm" means a dike, wall, or embankment used to contain liquid fertilizer.

(e) "Bladder tank" means any liquid fertilizer storage system consisting of the following:

(1) An external tank capable of holding the bladder tank's maximum volume without leakage;

(2) an internal, liquid-tight bladder that obtains its structural support from the external tank and is capable of holding the bladder tank's maximum volume without leakage; and

(3) a permanent cover to prevent the entry of precipitation.

(f) "Blending" means combining fertilizers or fertilizer ingredients to the customer's specifications.

(g) "Bulk fertilizer" means any fertilizer, whether dry or liquid, that is stored in quantities specified in K.A.R. 4-4-900 through K.A.R. 4-4-986.

(h) "Bulk fertilizer storage container" means any receptacle or device in which a bulk fertilizer is stored.

(i) "Bulk fertilizer storage facility" and "facility" mean any warehouse or other area where a bulk fertilizer, either in bulk or bagged, is held for storage. These terms shall include any facility in which fertilizer is mixed, blended, loaded, or unloaded. Each bulk fertilizer storage facility located within 300 feet of another facility owned or operated by the same person shall be considered the same facility for the purpose of determining the number of consecutive days in storage and determining whether the facility is exempt from the requirements of K.A.R. 4-4-900 through K.A.R. 4-4-986.

(j) "Chemically compatible" means that the material will not react adversely with the bulk fertilizer that is being or will be stored, loaded, unloaded, mixed, blended, or otherwise handled.

(k) "Discharge" means any spill, leak, deposit, pumping, dumping, or emptying, whether accidental or intentional, that results in the release of a fertilizer. This term shall not include the lawful transferring, loading, unloading, repackaging, refilling, distributing, using, or disposing of a fertilizer, and the normal washing and rinsing activities on loading areas.

(l) "Dry fertilizer" means any fertilizer that is in solid form before any end-use application or mixing or blending for end-use application. This term shall include formulations including dusts, powders, and granules.

(m) "Elephant ring" means an open-top storage container that serves as a secondary containment vessel into which a smaller primary storage container has been placed.

(n) "Empty storage container" means a bulk fertilizer storage container that has a liquid volume of less than one percent of the container capacity.

(o) "End-use application" means the application of fertilizer to soil or plants in the course of normal agricultural or horticultural practice.

(p) "Existing facility" means any facility already built and either in operation or capable of being in operation on the effective date of these regulations.

(q) "Fertilizer products" means any substance, including rinsates, that contains elements or compounds used to promote the growth of agricultural or horticultural plants.

(r) "Floodplain" means the lowlands and relatively flat areas adjoining inland waters, including flood-prone areas that are inundated by floods and that have a one percent or greater chance of recurring flooding in any given year.

(s) "Flood-proof facility" means a facility that has been constructed and maintained to withstand waters from a 100-year flood event and prevent floodwater from contacting the fertilizer.

(t) "Gallon" means the United States standard measure of one gallon.

(u) "Inspection port" means a secured opening that allows access into the interior of a bulk fertilizer storage container for the purpose of inspection.

(v) "Liquid fertilizer" means any bulk fertilizer in liquid form before dilution for end-use application. This term shall include solutions, emulsions, suspensions, slurries, and gels. This term shall not include anhydrous ammonia.

(w) "Loading pad" means a permanent or portable structure in the operational area designed and constructed to intercept and contain spills, rinse water, and precipitation to prevent runoff and the leaching of fertilizer.

(x) "Low-volume pass-through" means the tonnage of fertilizer transferred away from the facility, during any consecutive 365-day period, below which an operational area shall not be required.

(y) "Mixing" means the combining of fertilizers or fertilizer ingredients into a fertilizer product for resale to nonspecific customers.

(z) "Mobile storage container" means a bulk fertilizer storage container that is used for transportation or temporary storage of bulk fertilizer.

(aa) "Modification" means any change in structures, processes, or activities at a bulk fertilizer storage facility that alters the efficacy of containment structures or systems, including changes in capacity. Modification to an existing facility shall void any applicable exemption as specified in this article. "Modified" shall describe a fertilizer facility that has any modifications, as defined in this subsection.

(bb) "Operational area" means any area at the fertilizer facility where fertilizers are mixed, loaded, unloaded, or blended, or where fertilizers are washed from application, storage, or transportation equipment.

(cc) "Permanent cessation of operations" means that, for at least 12 consecutive months, the facility

has not been used to load, unload, mix, or blend any fertilizers.

(dd) "Plot plan" means a map or diagram showing the general layout of the facility.

(ee) "Primary containment" means the bulk fertilizer storage container that is in direct contact with the fertilizer being stored.

(ff) "Process flow diagram" means a schematic design showing the movement of fertilizer through the facility.

(gg) "Reasonably foreseeable" means what the secretary determines would have been foreseeable at the time the decision affecting the facility or its condition was made. This term shall include consideration of the facility owner's or operator's knowledge of conditions at the time the condition was created or the decision was made.

(hh) "Secondary containment" means any structure, tank, liner, or container that is designed, constructed, and maintained to perform the following:

(1) Intercept, hold, contain, or confine a discharge of fertilizer from primary containment;

(2) prevent runoff; and

(3) avoid leaching.

(ii) "Secretary" means the secretary of the Kansas department of agriculture or the secretary's authorized representative.

(jj) "Sump" means a recessed reservoir designed to be a receptacle for the collection of liquids.

(kk) "Temporary storage" means the storage of bulk fertilizer for no more than 60 consecutive days.

(ll) "Tip tank" means any tank or combination of tanks that is built on a frame having wheels and that is designed solely for the temporary storage of liquid fertilizer before its transfer to application equipment and not for the transportation of liquid fertilizer.

(mm) "Ton" means 2,000 pounds.

(nn) "Wastewater" means any water that is a result of precipitation collected in the facility or rinsates from cleaning the equipment or facility. (Authorized by and implementing K.S.A. 2-1227; effective Jan. 14, 1991; amended Jan. 25, 1993; amended, T-4-7-1-94, July 1, 1994; amended Aug. 22, 1994; amended July 18, 2003.)

4-4-901. Storage containers and appurtenances; basic requirements. (a) Each storage container and appurtenance shall be constructed, installed and maintained to prevent the discharge of fluid fertilizer.

(b) Each storage container and appurtenance shall be constructed of materials which are resistant to corrosion, puncture or cracking.

(c) All materials used in the construction or repair of any storage container or appurtenance shall not be of a type which react either chemically or electrolytically with stored fluid fertilizer and which might weaken the storage container or appurtenance, or create a risk of discharge.

(d) All metals used for valves, fittings and repairs shall be compatible with the metals used in the construction of the storage container or appurtenance, so that the combination of metals does not cause or increase any corrosion which might weaken the storage container or any appurtenance, or create a risk of discharge.

(e) Each storage container and appurtenance shall be designed to handle all operating stresses, taking into account static-head, pressure buildup from pumps and compressors, and any other mechanical stresses to which the storage container and appurtenance may be subject in the foreseeable course of operations.

(f) Every storage container connection shall be equipped with a shut-off valve located on the storage container as indicated by standard engineering practice except for any safety relief connection. Shut-off valves shall be left closed and secured except during periods of use. (Authorized by and implementing K.S.A. 1989 Supp. 2-1227; effective Jan. 14, 1991.)

4-4-902. Prohibition against underground storage. (a) From and after the effective date of this regulation, no person shall construct new storage containers for underground storage of fluid fertilizer. This prohibition does not apply to:

(1) a watertight catch basin used for the temporary collection of runoff or rinsate from transfer and loading areas; or

(2) storage in a stainless steel storage container, or other approved storage container, if:

(A) the storage container is enclosed within an approved liner as required by K.A.R. 4-4-933; and

(B) an approved program of ground water monitoring has been established to detect leakage.

(b) From and after the effective date of this regulation, wherever an underground storage container for the storage of bulk fertilizer already exists, a leak detection and liquid recovery system shall be installed within the time prescribed by K.A.R. 4-4-952.

(c) The liquid recovery portion of the system shall be located under the lowest area of the storage container and shall contain:

(1) a moisture barrier located below the storage container extending at least to the storage container's edges and draining into a collection sump;

(2) a collection sump equipped with a liquid activated pump to transfer collected liquid to another storage container located on or above ground level; and

(3) an alarm system which is activated whenever the pump is activated and which remains activated until manually reset.

(d) For purposes of this regulation, the term "underground storage container" includes every storage container having more than 10% of its capacity, including the capacity of any piping, located below the soil surface.

(e) From and after January 1, 1994, no fertilizer shall be stored in an underground storage container. (Authorized by and implementing K.S.A. 1989 Supp. 2-1227; effective Jan. 14, 1991.)

4-4-903. Prohibited materials. (a) Storage containers, elephant rings, and appurtenances shall not be constructed of copper, brass, zinc, or copper-base alloys unless recommended in writing by the manufacturer.

(b) Storage containers, elephant rings, and appurtenances used for the storage of fluid fertilizers containing phosphates or chlorides shall not be constructed of aluminum or aluminum alloys unless recommended in writing by the manufacturer.

(c) Storage containers, elephant rings, and appurtenances used for the storage of fertilizers or fluid fertilizer materials which have a pH of five or less shall not be constructed of ferrous materials other than stainless steel unless the ferrous materials have been coated or treated with protective substances adequate to prevent corrosion caused by the substance being stored or unless recommended in writing by the manufacturer.

(d) Storage containers, elephant rings, and appurtenances used for the storage of aqueous solutions of anhydrous ammonia shall not be constructed of galvanized brass or bronze materials and shall not be constructed of mild steel, stainless steel, aluminum, fiberglass, polyolefins or plastic unless recommended by the manufacturer.

(e) Storage containers, elephant rings, and appurtenances used for the storage of phosphoric acid shall not be constructed of ferrous materials other than stainless steel unless the container is

lined with a suitable substance to prevent corrosion caused by the substance being stored unless recommended in writing by the manufacturer.

(f) Storage containers, elephant rings, and appurtenances used for the storage of fluid fertilizers containing potassium chloride shall not be constructed of ferrous materials other than stainless steel or mild steel, unless:

(1) the container and appurtenances have been coated or treated with protective substances which are adequate to prevent corrosion resulting from the material being stored; or

(2) unless storage of fluid fertilizers containing potassium chloride in storage containers constructed of ferrous materials other than stainless steel or mild steel has been recommended in writing by the manufacturer of the container; and

(3) the container or appurtenance is used for storage periods of not more than a total of 90 calendar days within any period of 365 consecutive days. In such instances, the storage container shall be completely emptied between storage periods; or

(4) the empty container and appurtenances are cleaned and inspected for leaks prior to being refilled. (Authorized by and implementing K.S.A. 1989 Supp. 2-1227; effective Jan. 14, 1991.)

4-4-904. Grounding and anchoring storage containers. Storage containers shall be anchored, as necessary, to prevent flotation or instability which might occur as a result of liquid accumulations within a secondary containment facility constructed in accordance with K.A.R. 4-4-900 et seq. Metal storage containers shall be grounded when necessary to prevent corrosion or other damage which may be caused by electrolytic reaction with the material being stored. (Authorized by and implementing K.S.A. 1989 Supp. 2-1227; effective Jan. 14, 1991.)

4-4-905. Security. (a) All storage containers and appurtenances shall be either locked, located within a fenced enclosure or otherwise adequately secured to provide reasonable protection against vandalism or unauthorized access which might result in a discharge of fertilizer or fertilizer materials.

(b) Valves on storage containers shall be locked or otherwise secured except when persons responsible for facility security are present at the facility.

(c) Valves on nurse tanks and other mobile fertilizer containers parked overnight at a storage facility shall be adequately secured, locked or lo-

cated within a fenced enclosure except when persons responsible for facility security are present at the facility.

(d) Valves on empty containers need not be secured. (Authorized by and implementing K.S.A. 1989 Supp. 2-1227; effective Jan. 14, 1991.)

4-4-906. Filling storage containers. Storage containers shall not be filled beyond the capacity for which they are designed taking into account the density of the fluid being stored and the thermal expansion of the stored material during storage. (Authorized by and implementing K.S.A. 1989 Supp. 2-1227; effective Jan. 14, 1991.)

4-4-907. Pipes and fittings. Pipes and fittings shall be adequately supported to prevent sagging and possible breakage due to gravity and other forces which might be encountered in the ordinary course of operations. (Authorized by and implementing K.S.A. 1989 Supp. 2-1227; effective Jan. 14, 1991.)

4-4-908. Liquid-level-gauging device. (a) Except as provided in paragraph (b) of this regulation, each storage container shall be equipped with a liquid-level-gauging device by which the level of fluid in the storage container can be readily and reliably measured.

(b) A liquid-level-gauging device shall not be required if the level of fluid in a storage container can be readily and reliably measured by other means approved by the secretary.

(c) Liquid-level-gauging devices shall be locked or secured, in a safe manner, to protect against breakage or vandalism which could result in a discharge.

(d) External sight gauges shall be prohibited unless:

(1) the gauge has a positive shut-off valve constructed from stainless steel;

(2) all pipes or other plumbing components which connect the shut-off valve to the storage container shall be constructed from stainless steel;

(3) the sight gauge's shut-off valve remains closed except when the amount of material stored in the storage container is being determined; and

(4) the shut-off valve is located on the storage container in a location which is readily accessible and which conforms to the storage container manufacturer's specifications. (Authorized by and implementing K.S.A. 1989 Supp. 2-1227; effective Jan. 14, 1991.)

4-4-909. Labeling of storage containers.

(a) Each storage container or building in which fertilizer or fertilizer materials are stored shall be clearly marked with a description of the contents.

(b) In lieu of marking the building or storage container, a sign containing a written description of the fertilizer or fertilizer materials being stored may be posted outside the container.

(c) All descriptions shall be made in letters at least two inches high. (Authorized by and implementing K.S.A. 1989 Supp. 2-1227; effective Jan. 14, 1991.)

4-4-910. Inspection and maintenance. (a)

On a regularly scheduled basis, at least monthly, the operator of a storage facility shall:

(1) routinely inspect and maintain storage facilities, storage containers and appurtenances to minimize the risk of a discharge;

(2) inspect valves and other appurtenances for leakage; and

(3) make a written record of all inspections and major maintenance or repair on the day of the inspection, maintenance or repair.

(b) Inspection and maintenance records shall be kept at the storage site, or at the nearest local office from which the storage site is administered.

(c) For the purposes of this regulation, major maintenance or repair means any repair or maintenance which requires taking the pump appurtenance or storage container affected out of service. (Authorized by and implementing K.S.A. 1989 Supp. 2-1227; effective Jan. 14, 1991.)

4-4-911. Operational area containment for fertilizer. (a) Loading pads.

(1) Each area or pad used for loading fluid bulk fertilizer into storage containers or for unloading fluid bulk fertilizer from storage containers into mobile containers shall be curbed and paved with asphalt, concrete or other similar material approved by the secretary or be otherwise adequately designed to contain and allow recovery of any discharged fertilizer materials resulting from loading or unloading fertilizer materials or rinsates resulting from the cleaning of fertilizer application equipment.

(2) Each area or pad shall be sufficient to hold the entire mobile container during loading or unloading. This pad shall be designed, constructed and maintained to handle all reasonably foreseeable loading conditions to which it is exposed. Cracks and seams shall be kept sealed.

(3) Each area or pad shall be designed to prevent accumulation and overflow resulting from precipitation.

(4) Any cleaning at the storage facility of equipment used to apply fertilizer or fertilizer materials shall be cleaned upon a loading pad or area described in subsections (1), (2) and (3) of this section.

(5) Each facility where 125 tons or more of liquid fertilizer or 25 tons or more of dry fertilizer are received into or transferred out of one or more storage containers located at the facility during any period of 365 consecutive days shall have at least one loading pad or area which complies with the provisions of this regulation.

(b) Catch basins.

(1) The curbed and paved surface of the loading pad or area shall form or drain into a liquid-tight catch basin. If the curbed and paved surface of the loading pad or area drains to a sump, the catch basin may include the sump and an above-ground container if a pump is installed which transfers the contents of the sump into the above-ground container.

(2) The curbed surface and catch basin shall be of adequate design and size to contain a combined total of 110% of the largest volume of fertilizer or fertilizer material to be loaded or unloaded or 5,500 gallons of fluid whichever is greater and a minimum of 2,000 gallons of discharged fluid.

(d) Protection of containers and appurtenances. Each storage container and appurtenance, including pipes, shall be protected against any reasonably foreseeable risk of damage by trucks and other moving vehicles engaged in the loading or unloading of bulk fertilizer.

(e) Exceptions.

(1) This regulation shall not apply to the unloading of fertilizer or fertilizer materials from a mobile container into an application device at the site where the fertilizer is to be applied.

(2) In lieu of the requirements of paragraphs (a) and (b) of this regulation, a portable pad or device which provides confinement and allows recovery of fertilizer leaks, spills or other discharged fertilizer and which has been approved by the secretary may be used during the loading and unloading of fertilizer from rail cars.

(3) This regulation shall not apply to the unloading of rail cars directly into a permanent riser or manifold system which has been approved by the secretary as part of storage facility which complies with the requirements of K.A.R. 4-4-900 et seq.

(4) This regulation shall not apply to any storage facility through which a volume of less than 125

tons of liquid fertilizer or less than 25 tons of dry fertilizer is sold or transferred in any period of 365 consecutive days.

(f) Inspection and maintenance.

(1) The operator of every storage facility shall routinely inspect and maintain loading pads and catch basins. These inspections shall be conducted on a regularly scheduled basis at least monthly.

(2) The operator of a storage facility shall make a written record of each inspection and each major maintenance or repair on the day of the inspection, maintenance or repair. Inspection and maintenance records shall be kept at the storage site or at the nearest local office from which the storage site and operational area is administered.

(3) For the purposes of this regulation, major maintenance or repair means any repair or maintenance which requires taking the pump appurtenance or storage container affected out of service. (Authorized by and implementing K.S.A. 1989 Supp. 2-1227; effective Jan. 14, 1991.)

4-4-912. Abandoned containers. (a) Each storage container and other container used at a storage facility to hold fluid bulk fertilizer or fertilizer rinsate shall be deemed abandoned if:

(1) it has been out of service for more than six consecutive months because of a weakness or leak;

(2) or it has been out of service for any reason other than nonuse for more than two consecutive years.

(b) Each abandoned underground container, including each abandoned underground catch basin, shall be thoroughly cleaned and removed from the ground or filled with an inert solid. Each connection and vent in such a container shall be disconnected and sealed. A record of the catch basin size, location, and method of closing shall be maintained at the storage facility as provided in K.A.R. 4-4-921.

(c) Each abandoned aboveground container shall be thoroughly cleaned. All hatches on each such container shall be closed, and all valves or connections shall be closed and sealed.

(d) A secondary containment facility shall not be deemed abandoned merely because there have been no discharges into it.

(e) Prior to placing an abandoned container back into service, the container shall have been inspected for compliance with the provisions of K.A.R. 4-4-900 et seq.

(f) For each tank which will remain unused for a period of at least two years, the owner of a fertil-

izer storage facility shall notify the secretary of the date when the tank is taken out of service and the date it is returned to service.

(g) All records required to be kept pursuant to this regulation shall be made available to the secretary as specified in K.A.R. 4-4-921. (Authorized by and implementing K.S.A. 1989 Supp. 2-1227; effective Jan. 14, 1991.)

4-4-920. Storage and handling of dry bulk fertilizer. (a) Dry fertilizer materials shall be stored and handled in a manner which prevents pollution of groundwater by minimizing losses of the dry fertilizer or dry fertilizer materials to the air, surface water, groundwater, or subsoil.

(b) Non-fluid fertilizer or fertilizer materials shall be stored inside a properly designed structure or device with a cover or roof top, sidewalls and base sufficient to prevent fertilizer contact with precipitation and surface waters. Floors and sidewalls shall be strong enough to support the weight of the fertilizer being stored.

(c) All loading, unloading, mixing and handling of dry fertilizer, unless performed in the field where applied, shall be done using a containment method, device, or structure, which is of a size and design that will contain the fertilizer and can be operated to minimize emission of dust, vapors or both beyond the facility boundaries. Any collected materials shall be applied to a field at agronomic fertilizer rates or be otherwise recycled with other fertilizer mixes.

(d) Handling or work areas where any dry fertilizer is stored, loaded, unloaded or handled shall be constructed of concrete, asphalt or other material that is sealed with a product approved by the secretary to maintain a permeability rate at least equivalent to that of concrete or asphalt.

(e) Conveyors and augers shall be equipped with dust control boots or socks.

(f) Roof and surface runoff water shall be diverted away from the fertilizer buildings or loading area by use of grading or other means of water diversion.

(g) Railside unloading areas shall have a large enough area, including the area between the rails, surfaced with concrete or asphalt to provide for sufficient clean-up of all spilled fertilizer materials. As an alternative, a portable device approved by the secretary may be used if the user demonstrates that all spilled materials can be controlled and contained by the device.

(h) All doors shall be locked when facility is not in use.

(i) Mixing and blending devices shall be covered with a suitable roof or otherwise be suitably designed and installed to prevent rain, sleet, snow or hail from coming into contact with the dry fertilizer.

(k) The name of the storage facility and the name and telephone number of individuals who may be contacted in case of emergency shall be posted on the storage facility using letters not less than two inches high.

(l) Buildings used to store dry fertilizer or fertilizer materials shall be marked with a general description of their contents.

(m) Handling or working areas where dry fertilizers are stored, loaded, unloaded or handled shall be cleaned daily after use. (Authorized by and implementing K.S.A. 1989 Supp. 2-1227; effective Jan. 14, 1991.)

4-4-921. Record keeping. (a) Records required to be maintained. Each of the following records shall be prepared by the operator of the storage facility and kept at the storage facility affected, or at the nearest local office from which the storage facility is administered.

(1) A record shall be completed on the day of discovery of all discharges of either 1,000 pounds or more of dry fertilizer outside the handling or working area or 100 gallons or more of liquid fertilizer into the secondary containment structure or area or any other portion of the storage facility including:

- (A) the date and time of discharge, if known;
- (B) the type of fluid or dry bulk fertilizer discharged;
- (C) the volume of the discharged fertilizer;
- (D) the cause of the discharge;
- (E) the action taken, if any, to control or recover the discharged fertilizer; and
- (F) the method of use or disposal of any recovered discharge. Updates of this record shall be made promptly showing the measures taken to control, recover, use or dispose of the discharge.

(2) An inventory record shall be kept of each fertilizer product.

(3) Any difference between the volume of each fertilizer product as shown in the inventory and the volume as measured which exceeds one per cent for a liquid fertilizer product or two per cent for a dry fertilizer product shall be reported to the secretary within three working days.

(4) A semi-annual inventory reconciliation shall be made at the end of June and December each

year which shows the amount of fluid and dry bulk fertilizer which has been lost or unaccounted for from each storage container.

(5) Any difference between the volume of each fertilizer product as shown in the inventory and the volume as shown in the preceding inventory reconciliation which exceeds one per cent of the current inventory for each liquid fertilizer product or two per cent of the current inventory for each dry fertilizer product shall be reported to the secretary within three working days.

(6) A record shall be kept of the dates storage containers, appurtenances, operational area containment facilities, and secondary containment facilities were inspected and what maintenance or repairs, if any, were made.

(7) A record shall be kept listing the size and location of each abandoned storage container, if any.

(b) Period required for maintenance of records.

(1) Except as provided in subparagraph (b)(2), the records required by paragraph (a) shall be maintained for at least 5 years.

(2) Records required under subparagraph (a)(7) of this regulation shall be maintained as permanent records.

(3) Except for records required by paragraph (a), all other records required by K.A.R. 4-4-900 et seq. shall be maintained for at least 3 years.

(c) All records shall be available for inspection and copying by the secretary. (Authorized by and implementing K.S.A. 1989 Supp. 2-1227; effective Jan. 14, 1991.)

4-4-922. Discharge response plan. (a) The operator of each storage facility shall prepare a written discharge response plan for the storage facility. This plan shall include:

(1) the name and telephone number of each person or agency which is to be contacted in the event of a discharge, including any persons responsible for the stored fertilizer;

(2) a complete copy of the storage container labeling required by K.A.R. 4-4-909 for each bulk fertilizer stored and the labeling required under K.S.A. 2-1201 et seq. for each fertilizer stored;

(3) identification, by location, of each storage container and the type of bulk fertilizer stored in it;

(4) the procedures to be used in controlling and recovering, or otherwise responding to a discharge for each type of bulk fertilizer stored at the facility; and

(5) the procedures for using or disposing of a recovered discharge.

(b) The operator shall keep the discharge response plan current at all times and shall update it at least annually.

(c) A copy of the discharge response plan shall be kept readily available at both the storage facility and the nearest local office from which the storage facility is administered.

(d) The operator of the storage facility shall provide a current copy of the plan to the local fire and police departments and the secretary.

(e) As an alternative, any environmental response plan or other plan which has been prepared to meet the requirements of another law or regulation, either state or federal, which contains the information required by this regulation may be accepted by the secretary. (Authorized by and implementing K.S.A. 1989 Supp. 2-1227; effective Jan. 14, 1991.)

4-4-923. Existing storage tanks which have a capacity of 100,000 gallons or more.

(a) Liquid fertilizer storage containers with a capacity of 100,000 gallons or more shall be located within an approved secondary containment area designed to allow the containment and recovery of any discharged fertilizer material.

(b) Unless otherwise approved pursuant to K.A.R. 4-4-956, the surface supporting the storage container shall be elevated above the surrounding surface of the containment area so that the lowest point of the storage container shall be at least six inches above the surrounding surface of the containment area to permit visual identification of any leaks which may develop in the floor of the storage container.

(c) This regulation shall apply to all storage containers with a capacity of 100,000 gallons or more which were placed in service on or before January 13, 1991. (Authorized by and implementing K.S.A. 2-1227; effective Jan. 14, 1991; amended Jan. 25, 1993.)

4-4-924. Storage tanks which have a capacity of 100,000 gallons or more; new construction. (a) This regulation shall apply to all storage containers with a capacity of 100,000 gallons or more which are constructed or placed in service on or after the effective date of this regulation.

(b) Liquid fertilizer storage containers with a capacity of 100,000 gallons or more shall be:

(1) located within an approved secondary containment area designed to allow the containment and recovery of any discharged fertilizer material; and

(2) placed on a surface which has been sealed with asphalt, concrete, attapulgitic clay, sodium bentonite, or other material approved by the secretary.

(c) The bottom surface of the storage container shall be elevated above the surrounding surface of the containment area so that the lowest point of the storage container shall be at least six inches above the sealed surface to permit installation of a leak detection system.

(d) The leak detection system shall consist of:

(1) three or more perforated pipes or tile which shall:

(A) be placed on the sealed surface and below the storage container;

(B) be placed parallel to each other on not more than 10 foot centers; and

(C) extend to the outer edge of both sides of the tank; or

(2) any other leak detection system approved by the secretary.

(e) Unless otherwise approved pursuant to K.A.R. 4-4-956, each storage container shall be located in a secondary containment area which has been designed to permit both visual and sampling access to the leak detection system described in paragraph (d) of this regulation. (Authorized by and implementing K.S.A. 2-1227; effective Jan. 14, 1991; amended Jan. 25, 1993.)

4-4-931. Approved secondary containment of bulk fertilizer; general requirements. (a) Primary containment of liquid bulk fertilizer shall be located within a secondary containment area. Diked areas shall be constructed with a base, perimeter wall and sloped floor drain, except as provided by K.A.R. 4-4-934.

(b) The diked secondary containment area for fluid bulk fertilizer shall be physically separated and distinct from any secondary containment area for pesticides or other nonfertilizer materials; however adjoining secondary containment areas may share common walls.

(c) The diked area for secondary containment of storage facilities shall be able to contain, below the height of the dike, at least 110% of the capacity of the largest storage container plus the volume displaced by all other storage containers, fixtures, and materials located within the diked area.

(d) All pumps used for handling liquid fertilizer shall be located within the secondary containment structure or area.

(e) Except where used as a method of monitoring a secondary containment system, drainage

within or underlying the area to be diked shall be eliminated.

(f) This regulation shall apply to:

(1) each storage facility in existence on the effective date of this regulation which has a total storage capacity of 5,000 gallons or more;

(2) each storage facility in existence on the effective date of this regulation which has a total storage capacity of 2,000 gallons or more and less than 5,000 gallons where 125 tons or more of liquid fertilizer is received into or transferred out of one or more storage containers located at the storage facility during any period of 365 consecutive days; and

(3) each storage facility which was not in existence on the effective date of this regulation and which has a total storage capacity of 2,000 gallons or more. (Authorized by and implementing K.S.A. 2-1227; effective Jan. 14, 1991; amended Jan. 25, 1993.)

4-4-932. Secondary containment requirements; walls. (a) The walls of each secondary containment facility shall be constructed of earth, steel, concrete, solid masonry or any other material approved by the secretary, and be designed to withstand a full hydrostatic head of any discharged fluid and weight load of material used in construction.

(b) All cracks, joints, and seams shall be sealed to prevent leakage.

(c) Walls constructed of earth or other permeable materials shall be lined as provided in K.A.R. 4-4-933.

(d) Earthen walls shall have a horizontal-to-vertical slope of at least three to one, unless a steeper slope is consistent with good engineering practice, and shall be packed and protected from erosion. An exterior slope of 30 degrees or less shall be protected with grass or crushed stone. Slopes greater than 30 degrees and all interior slopes shall be protected with flat road stone or a similar crushed stone material.

(e) Walls shall not exceed six feet in height above interior grade unless provisions are made for normal access, necessary emergency access to tanks, valves and other equipment, and safe exit from the secondary containment facility.

(f) Walls constructed of concrete or solid masonry shall rest upon a floating base of concrete prepared as required in K.A.R. 4-4-933 or upon suitable concrete footings which extend below the average frost depth to provide structural integrity.

(Authorized by and implementing K.S.A. 2-1227; effective Jan. 14, 1991; amended Jan. 25, 1993.)

4-4-933. Secondary containment requirements; lining. (a) General requirement. The base of a secondary containment facility, and any earthen walls of the facility shall be lined with asphalt, concrete, an approved synthetic liner, a clay soil liner or other product approved by the secretary, designed to limit permeability of the base and walls. Liners shall meet the requirements of this regulation.

(b) Asphalt or concrete liners. Asphalt or concrete liners shall be designed, according to good engineering practices, to withstand any foreseeable loading conditions, including a full hydrostatic head of discharged fluid and static loads of storage containers, including appurtenances, equipment, and contents. Cracks and seams shall be sealed to prevent leakage.

(c) Synthetic liners.

(1) All synthetic liners and installation plans shall be approved by the secretary. Until the manufacturer of the synthetic liner provides the secretary with a written confirmation of compatibility and a written estimate of the life of the liner, no approval shall be given.

(2) Synthetic liners shall not react either chemically or electrolytically with the materials being stored within the storage facility.

(3) Synthetic liners shall be installed according to manufacturer's specifications. All field constructed seams shall be tested and repaired, if necessary, in accordance with the manufacturer's recommendations.

(d) Clay soil liners. The surface soil, including the berm of an earthen dike and 10 feet beyond the berm, shall be sealed with a sealing agent such as sodium bentonite, attapulgite clay or a similar clay material approved by the secretary. The liner shall be constructed in accordance with reliable civil engineering recommendations to establish a barrier layer which will maintain a water level up to the working height of the containment structure for 72 hours, or a clay application which results in a downward water movement of not greater than one-half of an inch per 24 hour period. The floor of the containment area shall be protected with a layer of gravel, sand, earth or crushed stone at least six inches thick placed on top of the clay liner.

(e) Exemptions.

(1) A liner need not be installed directly under a storage container with a capacity of 100,000 gal-

lons or more that has been constructed on site and put into use prior to the effective date of this regulation if all of the following conditions are met:

(A) A second bottom made of steel or other material approved by the secretary is constructed for the storage container, placed over the original bottom, and topped with a layer of smooth, fine gravel or coarse sand at least six inches thick;

(B) the original bottom of the storage container is tested for leaks before the sand layer or second bottom, as described in (A) are installed; and

(C) the newly constructed bottom is tested for leaks before any fluid fertilizer is stored in the storage container;

(D) records of the tests described in (B) and (C) are kept on file at the storage facility, or at the nearest local office from which the storage facility is administered; and

(E) a method to readily detect leaks from the newly constructed bottom into the sand layer is in place.

(2) The secondary containment requirements in this regulation shall not apply to rail cars which are periodically removed from the storage facility. (Authorized by and implementing K.S.A. 2-1227; effective Jan. 14, 1991; amended Jan. 25, 1993.)

4-4-934. Use of elephant rings for secondary containment. (a) Individual storage containers may be contained within an elephant ring as an alternative to a diked containment area. The elephant ring shall serve as a second containing wall in the event that the primary storage container develops a leak. The elephant ring shall be designed and installed to withstand a full hydrostatic head from the fluid stored in the enclosed primary storage container and all other stresses reasonably foreseeable from secondary containment of stored fertilizer.

(b) Both the primary storage container and the elephant ring shall be fabricated of materials compatible with each other and which do not react either chemically or electrolytically the fertilizer being stored. Use of any combination of metals or other materials which contribute to chemical or electrolytic corrosion is prohibited.

(c) The height of the elephant ring wall shall not exceed six feet. The volume contained within the secondary storage walls up to the working height of the elephant ring shall be sufficient to contain a volume of 110% of the volume contained in the primary storage container plus the volume displaced by the footings of any equipment such as

pumps, meter or other devices, placed within the secondary containment vessel.

(d) The elephant ring shall be free of leaks and structural defects. The base of the elephant ring shall be protected from corrosion, both from inside and outside, and underlain:

(1) by a concrete pad; or

(2) with eight inches of compacted gravel beneath four inches of compacted sand; or

(3) as recommended by the manufacturer of the elephant ring and approved by the secretary.

(e) All piping connections to the primary storage container shall be made over the wall of the elephant ring and adequately supported and braced. Pumps and other fixtures, if located within the elephant ring containment structure, shall be placed on an elevated platform.

(f) Accumulations of storm water and other material shall be pumped over the wall of the elephant ring by a sump pump within the secondary container, or by an exterior pump, and disposed of according to K.A.R. 4-4-935.

(g) Inspection and maintenance of the primary storage container and of the elephant ring shall be conducted as required by K.A.R. 4-4-920, and records of inspections and maintenance shall be made and maintained as required by K.A.R. 4-4-921. (Authorized by and implementing K.S.A. 2-1227; effective Jan. 14, 1991; amended Jan. 25, 1993.)

4-4-935. Drainage from contained areas within secondary containment. (a) Earthen or prefabricated containment area. An earthen or prefabricated containment area shall not have a relief outlet and valve. The base shall slope to a collecting spot where storm water can be discharged by pump over the berm for use in the blending process or for proper disposal in accordance with local requirements for disposal of storm water.

(b) Asphalt or concrete lined areas.

(1) An asphalt or concrete lined area shall have a recessed catch drain running through the center of the base or a sump as provided for in K.A.R. 4-4-936.

(2) The catch drain shall be at least six inches deep and 12 inches wide with an open grate cover.

(3) The asphalt or concrete slab located beneath the catch drain shall be at least the same thickness below and to the sides of the drain as the base is throughout the contained area and comply with K.A.R. 4-4-933.

(4) The asphalt or concrete base shall slope to the drain, and the drain shall slope to a discharge valve at the edge of the dike.

(5) The discharge valve shall be closed and secured except when used permitted by K.A.R. 4-4-905.

(6) The discharge valve shall drain to an underground concrete sump. A self-priming recovery pump shall be used to move all materials from the sump to alternate storage. The sump tank shall not be used as a permanent storage container. It shall be pumped periodically to remove any water, fertilizer material or both which it collects.

(7) Precipitation may be used for make-up water in fertilizer mixes or disposed of in accordance with local requirements if it is compatible with fertilizer materials being handled at the storage facility.

(c) Other areas.

(1) Earthen areas which are not lined with asphalt or concrete shall be lined with a synthetic liner approved by the secretary.

(2) Earthen areas lined with a synthetic liner shall be constructed as required in subsections (1) through (7) inclusive of section (b) of this regulation. (Authorized by and implementing K.S.A. 2-1227; effective Jan. 14, 1991; amended Jan. 25, 1993.)

4-4-936. Alternative to a recessed catch drain in containment areas. A sump may be located within the diked or secondary containment area as an alternative to the recessed catch drain if:

(a) the sump construction conforms to the thickness specifications for the remainder of the containment base;

(b) the sump is drained over the wall of the containment structure by means of a pump;

(c) no valve is plumbed into the sump unless the sump has a permanent catchment system as described in K.A.R. 4-4-911; and

(d) materials removed from the sump are disposed of in a manner consistent with K.A.R. 4-4-935. (Authorized by and implementing K.S.A. 1989 Supp. 2-1227; effective Jan. 14, 1991.)

4-4-937. Inspection and maintenance requirements; secondary containment. (a) Every secondary containment area, structure or device shall be inspected by the operator of the storage facility at least every six months and be maintained as necessary to assure compliance with these regulations.

(b) The operator shall make a written record of all inspections and maintenance on the day of the inspection or maintenance which shall be kept at the storage facility or at the nearest local office from which the storage facility is administered.

(c) All secondary containment areas, structures and devices shall be kept free of debris and foreign matter. (Authorized by and implementing K.S.A. 1989 Supp. 2-1227; effective Jan. 14, 1991.)

4-4-950. Time frames for submission of initial diagram or plans. (a) Within one year after the effective date of this regulation, the owner of each existing or proposed storage facility shall submit a diagram or plans of the storage facility containing the following information:

(1) the location and size of each storage container;

(2) the drainage pattern of the storage facility;

(3) any source of drinking water within the facility, if any;

(4) any source of ground or surface water within 1320 feet of the storage facility, if any;

(5) any tank or other container used for the storage of petroleum products within the storage facility, if any;

(6) the location of each pump, pipe or other appurtenance used in the storage or transfer of fertilizer within the storage facility, if any;

(7) the location of each pad used for the loading of bulk fertilizer, if any; and

(8) the location of the storage facility for the dry fertilizer, if any;

(9) the standards and specifications for the construction of the storage facility for dry fertilizer, if any;

(10) the size and location of each proposed secondary containment structure to be located within the storage facility to comply with the requirements of K.A.R. 4-4-900 et seq.;

(11) the size and location of each proposed loading pad or area to be located within the storage facility to comply with the requirements of K.A.R. 4-4-900 et seq.; and

(12) any other information required by the secretary.

(b) The diagram shall be drawn to an appropriate scale which permits all required information to be shown and be easily readable without magnification. (Authorized by and implementing K.S.A. 1989 Supp. 2-1227; effective Jan. 14, 1991.)

4-4-951. Requirements for plans and specifications. (a) Whenever a storage facility is

constructed or extensively remodeled or an existing structure is converted to use as a storage facility, properly prepared plans and specifications for the construction, remodeling or conversion shall be submitted by the owner of the storage facility to the secretary for review and approval before construction, remodeling or conversion is begun.

(b) The plans and specifications shall include the proposed layout, mechanical plans, construction materials, work areas, and type of equipment to be fixed and facilities which will be remodeled, converted or constructed.

(c) The plans shall also contain the information required by K.A.R. 4-4-950.

(d) Any person, after submitting the plans required by this regulation, shall be given a time period not exceeding six months by the secretary in which to resubmit the plans with any corrections or additions required by the secretary.

(e) Upon approval of the plans by the secretary, the owner of the fertilizer storage facility shall be given a time period in which to complete any changes, corrections or additional construction at the storage facility as contained in the approved plans. The time period shall not exceed two years for the construction of loading pads and shall not exceed three years for the construction or installation of dikes or secondary containment facilities. Time periods shall run from the date the plans are approved.

(f) The secretary may grant additional time for construction or installation of storage containers, structures, dikes, or other equipment for good cause upon receipt of a written request. Such request shall state the reason for the additional time and the amount of additional time needed. The request may be granted if the request was made in good faith and the circumstances underlying the request were beyond the control of applicant. (Authorized by and implementing K.S.A. 1989 Supp. 2-1227; effective Jan. 14, 1991.)

4-4-952. Time frames for construction; liquid fertilizer storage facilities. (a) Within three years after approval of construction plans by the secretary, the owner of each storage facility shall complete construction or installation of secondary containment facilities required by K.A.R. 4-4-900 et seq.

(b) Within two years after approval of construction plans by the secretary, the owner of each storage facility shall complete construction or installation of loading and unloading pads required by K.A.R. 4-4-900 et seq.

(c) The secretary may grant additional time for construction or installation of storage containers, structures, dikes, or other equipment for good cause upon receipt of a written request. Such request shall state the reason for the additional time and the amount of additional time needed. The request may be granted if the request was made in good faith and the circumstances underlying the request were beyond the control of applicant. (Authorized by and implementing K.S.A. 1989 Supp. 2-1227; effective Jan. 14, 1991.)

4-4-953. Time frames for construction plans; dry fertilizer. (a) Within three years after approval of construction plans by the secretary, the owner of each storage facility shall complete construction or installation of secondary containment facilities required by K.A.R. 4-4-900 et seq.

(b) Within two years after approval of construction plans by the secretary, the owner of each storage facility shall complete construction or installation of loading and unloading pads required by K.A.R. 4-4-900 et seq.

(c) The secretary may grant additional time for construction or installation of storage containers, structures, dikes, or other equipment for good cause upon receipt of a written request. Such request shall state the reason for the additional time and the amount of additional time needed. The request may be granted if the request was made in good faith and the circumstances underlying the request were beyond the control of applicant. (Authorized by and implementing K.S.A. 1989 Supp. 2-1227; effective Jan. 14, 1991.)

4-4-954. Fertilizer discharge report requirement. Any discharge of either 1000 pounds or more of dry fertilizer outside the handling or working area or 100 gallons or more of liquid fertilizer into the secondary containment structure or area or any other portion of the storage facility shall be reported to the secretary within 48 hours. (Authorized by and implementing K.S.A. 1989 Supp. 2-1227; effective Jan. 14, 1991.)

4-4-956. Alternative designs for bulk fertilizer storage facility. (a) A bulk fertilizer storage facility's alternative design that does not meet the requirements of K.A.R. 4-4-900 through K.A.R. 4-4-986 may be approved by the secretary. The applicant shall provide proof sufficient to the secretary that the alternative design meets or exceeds the applicable requirements of K.A.R. 4-4-900 through K.A.R. 4-4-986.

(b) Each application for approval of an alternative design shall include the following:

(1) The plans and specifications required by the applicable requirements of K.A.R. 4-4-900 through K.A.R. 4-4-986;

(2) data from the manufacturer or designer of the proposed bulk fertilizer storage facility documenting that the alternative design meets or exceeds the applicable requirements of K.A.R. 4-4-900 through K.A.R. 4-4-986;

(3) a description of the facility's system for the detection of leaks or other malfunctions that meets the applicable requirements of K.A.R. 4-4-900 through K.A.R. 4-4-986;

(4) a statement by a licensed professional engineer certifying that the design provides protection to the environment that meets or exceeds the applicable requirements of K.A.R. 4-4-900 through K.A.R. 4-4-986;

(5) the construction timelines; and

(6) any other relevant information regarding the safe handling of bulk fertilizers required by the secretary.

(c) Upon completion of construction and before using the bulk fertilizer storage facility, the owner or operator of the bulk fertilizer storage facility shall submit to the secretary a detailed record of construction and a statement certifying that the bulk fertilizer storage facility was constructed according to the approved application. (Authorized by and implementing K.S.A. 2-1227; effective Jan. 25, 1993; amended July 18, 2003.)

4-4-982. Marking of mobile storage containers. (a) Each owner or operator of any mobile storage container shall mark each mobile storage container with the following information on at least two opposing exterior surfaces of the container:

(1) The word "fertilizer";

(2) the name and address of, and the emergency contact information for, the individual, corporation, association, or entity responsible for the mobile storage container; and

(3) the type of fertilizer in the mobile storage container.

(b) All information required by this regulation shall be marked in letters and numbers at least two inches high and in colors that sharply contrast with the color of the background. (Authorized by and implementing K.S.A. 2-1227; effective, T-4-7-1-94, July 1, 1994; effective Aug. 22, 1994; amended July 18, 2003.)

4-4-983. Mobile storage containers. (a) Each mobile storage container or combination of mobile storage containers that has a combined storage capacity of 2,000 gallons or more and is used to store liquid fertilizer at the same location for more than 60 consecutive days of storage shall meet the applicable requirements of K.A.R. 4-4-900 through K.A.R. 4-4-986.

(b) The 60-day period specified in subsection (a) of this regulation shall begin when the liquid fertilizer is delivered to an empty mobile storage container or when the mobile storage container is moved to a separate location more than 300 feet from the previous location and in accordance with K.A.R. 4-4-900(i) and K.A.R. 4-4-901.

(c) Each seller that delivers liquid fertilizers to any mobile storage container shall make and, for a minimum of three years, maintain records of the following for each delivery:

(1) The date of the delivery;

(2) the name of the person making the delivery;

(3) the number of gallons delivered;

(4) the legal description, to the nearest 10-acre quarter of the section, of the mobile storage container location at the time of delivery;

(5) a description of the fertilizer transported;

(6) the approximate quantity of fertilizer in the mobile storage container before delivery;

(7) the name of the owner or user of the mobile storage container; and

(8) the name and address of the buyer, seller, and transporting company, if different from the seller.

(d) Each seller shall provide written receipts containing the information specified in subsection (c) of this regulation to the owner or operator of the mobile storage tank, who shall retain these records for a minimum of three years.

(e) The records required by this regulation shall be made available to the secretary upon request. (Authorized by and implementing K.S.A. 2-1227; effective, T-4-7-1-94, July 1, 1994; effective Aug. 22, 1994; amended July 18, 2003.)

4-4-984. Mobile containers. Each mobile container used for the storage of liquid fertilizer shall meet the requirements of K.A.R. 4-4-901 and K.A.R. 4-4-903. (Authorized by and implementing K.S.A. 2-1227; effective, T-4-7-1-94, July 1, 1994; effective Aug. 22, 1994.)

4-4-985. Application for new or modified bulk fertilizer storage facilities. (a) Before beginning construction, the owner or

operator of each proposed new or modified bulk fertilizer storage facility shall submit to the secretary a complete application. The applicant shall provide proof sufficient to the secretary that the design will meet or exceed the applicable requirements contained in K.A.R. 4-4-900 through K.A.R. 4-4-986.

(b)(1) Each application shall be submitted on forms provided by the secretary. Each applicant shall complete and submit the application according to the directions on the forms. The applicant shall identify all confidential business information. Each application shall include the following:

- (A) A location area map;
- (B) a detailed plot plan of the facility;
- (C) a water line backflow protection schematic diagram;
- (D) detailed construction plans and specifications;
- (E) a process flow diagram for the facility; and
- (F) any additional relevant information regarding the safe handling of bulk fertilizers that the applicant or secretary deems necessary.

(2)(A) In addition to meeting the requirements listed in paragraph (b)(1) of this regulation, each application for a bladder tank shall also meet the requirements of K.A.R. 4-4-986.

(B) In addition to meeting the requirements listed in paragraph (b)(1) of this regulation, each application for an alternative design shall meet the requirements of K.A.R. 4-4-956.

(c) The application shall specify the physical location and the mailing address of the facility, if different from the address on the application.

(d) All construction plans and specifications for the facility submitted as part of the application shall be drawn to scale, be clearly and completely labeled, and be legible without magnification. The plans and specifications shall at a minimum contain the following:

- (1) A plot plan or map of the property that shows all structures and the location of all wells, utility poles, and drainage systems on the site;
- (2) the location of the facility relative to the floodplain;
- (3) the approximate distance from, the direction to, and the identity of all lakes, streams, drainage ditches, and storm drains within 1,320 feet of the facility;
- (4) the drainage pattern of the facility;
- (5) the distance from and direction to all public and private water wells within the facility or within 1,320 feet of the facility;

(6) the location of all abandoned wells within 300 feet of the facility;

- (7) the site soil characteristics;
- (8) the depth to groundwater;
- (9) the location of all utility service entrances and easements or rights-of-way within the facility;
- (10) the construction plans for the secondary and operational area containment;

(11) the manufacturer's installation instructions, estimated life expectancy, and confirmation of compatibility with fertilizer material, if any synthetic liners, synthetic materials, or prefabricated basins are used in the containment structure; and

(12) the location of any tank or other container used for the storage of petroleum products within the storage facility, if any.

(e) Each set of construction plans and specifications for a bulk fertilizer secondary containment structure shall, at a minimum, contain the following:

- (1) The size and location of each proposed secondary containment structure;
- (2) the size and location of all bulk fertilizer storage containers or bins, pumps, piping, and appurtenances;
- (3) the size and location of all operational areas and load pads;
- (4) the drainage pattern and sump location; and
- (5) the calculated capacity of each containment structure in gallons or cubic feet.

(f) Elevation plans or maps shall be included with the application and shall show the location of all bulk fertilizer storage tanks and their horizontal, raised, or vertical positioning within the secondary containment and a tank schedule that provides all of the following information for each tank:

- (1) The construction material;
 - (2) the capacity;
 - (3) the diameter or dimensions;
 - (4) the height; and
 - (5) the date of installation.
- (g) Each construction or modification project shall conform with the plans and specifications identified in the approved application and required by this regulation.

(h) Upon completion of construction or modification and before use of the newly constructed or modified portion of the facility, the owner or operator shall provide the secretary with certification that all construction or modification was completed in accordance with this regulation.

(i) Sources outside of the Kansas department of agriculture may be utilized by the secretary for assistance in evaluating any alternative design

application submitted. (Authorized by K.S.A. 2-1227; implementing K.S.A. 2-1228; effective July 18, 2003.)

4-4-986. Liquid bulk fertilizer bladder tank requirements. (a) Each liquid bulk fertilizer bladder tank design shall be required to be approved by the secretary before use. Each applicant shall provide the information specified in this regulation to the secretary establishing that the bladder tank design meets or exceeds the applicable requirements of K.A.R. 4-4-900 through K.A.R. 4-4-986.

(b) Each application shall be submitted on one or more forms provided by the secretary. Each applicant shall complete these forms and submit the application in compliance with the directions on the forms. The applicant shall designate all trade secrets that the applicant wishes to be considered as confidential.

(c) Each application submitted for approval shall include the plans and specifications, which shall be certified and stamped by a registered professional engineer. These plans and specifications shall include the following:

(1) All information required by K.A.R. 4-4-985;
 (2) the results of a soil compaction study and an evaluation of these findings showing that the underlying soil and support pad can support the weight of the filled tank;

(3) construction details of the support pad, including details of the external leak detection;

(4) the wind loading and buoyancy calculations for the tank when empty; and

(5) construction and assembly details of the tank and liner, which shall include the following:

(A) The liner manufacturer's detailed information, including liner thickness, composition, chemical compatibility, and life expectancy;

(B) a description of the protective barriers between the liner and the tank, including cross-sections of each wall and the floor;

(C) detailed information about liner suspension;

(D) detailed information about roof support;

(E) detailed information about the method to be used to remove condensate, overage, and liner leakage, if any;

(F) detailed information about all external openings through the tank, including any leak detection ports, valves, manways, and other inspection ports;

(G) detailed information about all openings through the tank liner;

(H) detailed information about the liquid-level gauging device, including overage prevention;

(I) detailed information about the internal leak detection system;

(J) the method of securing the tank and appurtenances to prevent any discharge of stored fertilizer;

(K) each manufacturer's recommendations for inspection and maintenance of the tank, liner, and appurtenances and a statement specifying how these recommendations will be implemented; and

(L) any other relevant information regarding the safe handling of bulk fertilizer required by the secretary.

(d) All external appurtenances, including leak detection ports and valves, shall meet the following requirements:

(1) Be encased or enclosed to contain any leaks;

(2) have a leak detection method; and

(3) have a method to secure the enclosure from unauthorized access.

(e) All pipes outside the tank shall be double-walled from the storage tank to the loading pad and shall have a leak detection method.

(f) All tanks and appurtenances shall be protected from damage due to vehicle traffic.

(g) Each applicant shall verify the manufacturer's certification that the external tank has been built to the applicable provisions of the American petroleum institute's API standard 650, published November 1998 and including the January 2000 addenda, November 2001 addenda, and all appendices, which is hereby adopted by reference.

(h) Upon completion of construction and before use, the owner or operator of the facility shall submit to the secretary a detailed record of construction and a statement certifying that the facility was constructed according to the approved application.

(i) Each bladder tank shall be inspected and maintained according to the approved plan. (Authorized by K.S.A. 2-1227; implementing K.S.A. 2-1228; effective July 18, 2003.)

Article 5.—AGRICULTURAL LIMING MATERIALS

4-5-1. (Authorized by K.S.A. 1981 Supp. 2-2910; implementing K.S.A. 1981 Supp. 2-2902; effective May 1, 1982; revoked April 15, 2016.)

4-5-2. (Authorized by K.S.A. 1981 Supp. 2-2910; implementing K.S.A. 1981 Supp. 2-2903; effective May 1, 1982; revoked April 15, 2016.)

4-5-3. Inspection tonnage report. (a) When a manufacturer, producer, or distributor submits a tonnage report which covers several locations, the report shall include the following:

(1) Name and address of each location registered; and

(2) The number of tons sold or distributed from each location.

(b) Each manufacturer, producer, or distributor shall keep adequate records for a period of three (3) years of the tonnage of agricultural liming material sold and distributed from each of its business locations within the state. (Authorized by K.S.A. 1981 Supp. 2-2910; implementing K.S.A. 1981 Supp. 2-2906; effective May 1, 1982.)

4-5-4. Agricultural liming material testing. The process for determining the effective calcium carbonate equivalent of agricultural liming materials shall be in accordance with Kansas state university's document titled "Kansas state university soil testing lab agricultural liming material testing procedure," dated October 15, 2015, which is hereby adopted by reference. (Authorized by K.S.A. 2-2910; implementing K.S.A. 2015 Supp. 2-2903 and 2-2907; effective April 15, 2016.)

Article 6.—CERTIFICATE OF FREE SALE

4-6-1. Certificate of free sale; definitions.

(a)(1) "Certificate of free sale" and "certificate" shall mean a written document in English that states that the product described in the document was manufactured in Kansas by a business whose owner or operator meets the following requirements:

(A) Holds a license, registration, permit, or other authority issued by the Kansas department of agriculture for that business; and

(B) complies with the requirements of the Kansas laws for distribution of the product in Kansas and, where applicable, the United States.

(2) "Person" shall mean any individual, partnership, association of persons, corporation, or governmental agency.

(3) "Secretary" shall mean the secretary of agriculture or a designee of the secretary.

(b) When used in a certificate of free sale, "U.S. regulations" shall mean those regulations promulgated by agencies of the federal government as follows:

(1) Regulations that have been adopted by ref-

erence in regulations of the Kansas department of agriculture; or

(2) regulations administered by the Kansas department of agriculture pursuant to a cooperative agreement with a federal agency. (Authorized by and implementing K.S.A. 2008 Supp. 74-5,100; effective Jan. 1, 2009; amended Nov. 20, 2009.)

4-6-2. Certificate of free sale. Any person may request one or more certificates of free sale by providing the following information to the secretary on a form provided by the Kansas department of agriculture:

(a) The name, address, and telephone number of the person requesting each certificate;

(b) the name of the licensed, registered, or permitted establishment where the product was manufactured;

(c) the name and type of product for which each certificate is requested;

(d) either an original label or an exact and unaltered photocopy of the label in English for the product;

(e) the country or countries to which the product is to be shipped;

(f) the number of certificates requested;

(g) if more than one product is included in the request, specification of which products are to be listed on each certificate; and

(h) the address to which each certificate is to be sent. (Authorized by and implementing K.S.A. 2008 Supp. 74-5,100; effective Jan. 1, 2009; amended Nov. 20, 2009.)

4-6-3. Certificate of free sale; fees. (a) Each person requesting a certificate of free sale shall pay a \$25.00 fee for processing and a \$3.00 fee for each duplicate certificate.

(b) No additional fee shall be charged if the certificate of free sale is sent by first-class U.S. mail to an address in the continental United States. The person requesting the certificate of free sale shall pay the actual costs for delivery of the certificate in any other manner or to any other address.

(c) Except as specified in subsection (d), all fees and costs shall be due upon issuance of the certificate of free sale.

(d) Issuance of a certificate of free sale may be refused by the secretary until payment of all fees and costs is received. (Authorized by and implementing K.S.A. 2017 Supp. 74-5,100; effective Jan. 1, 2009; amended June 15, 2018.)

Article 7.—MILK AND DAIRY PRODUCTS**A. UNGRADED MILK AND CREAM
FOR HUMAN CONSUMPTION**

4-7-1. (Authorized by K.S.A. 1965 Supp. 75-1401; effective Jan. 1, 1966; revoked Jan. 14, 1991.)

4-7-2. Health of herd. (a) All ungraded raw milk shall be from herds, and additions to herds, that meet the requirements of sec. (D)(1) of “milk for manufacturing purposes and its production and processing,” as adopted by reference in K.A.R. 4-7-213.

(b) Milk and cream from cows affected with mastitis or containing any residue from drugs used in the treatment of mastitis shall not be sold. (Authorized by K.S.A. 2001 Supp. 65-772 and K.S.A. 2001 Supp. 65-775, as amended by L. 2002, Ch. 181, § 16; implementing K.S.A. 2001 Supp. 65-773; effective Jan. 1, 1966; amended Jan. 14, 1991; amended Oct. 21, 1991; amended Dec. 20, 2002.)

4-7-3. Production requirements. Each business owner or operator and each person subject to the Kansas dairy law shall ensure that the requirements in this regulation are met. (a) Milk barn. The milk barn shall be kept clean, dry, well lighted, well ventilated, and well drained. The floor shall be constructed so that it is easily cleanable. No swine, fowl, or horses shall be permitted in the milk barn.

(b) Milk room. A clean, sanitary, well-constructed building or room that is free from sources of contamination and is properly equipped to wash, sanitize, and store bottles and equipment shall be provided. The building or room shall be constructed in a manner preventing the entrance of dust, dirt, flies, and other pests or contamination. The building or room shall be well lighted and well ventilated.

(c) Utensils. All utensils used in handling milk or cream shall be easily cleanable, free of rust, and in good repair. These utensils shall be made from smooth, nonabsorbent, noncorrodible, nontoxic material. All milk pails shall be of the seamless, hooded type.

(d) Toilet. A sanitary toilet conveniently located and properly constructed shall be provided. The toilet shall be operated and maintained so that all waste is inaccessible to flies and does not pollute the surface soil or contaminate any water supply.

(e) Water supply. The water supply shall be easily accessible, adequate, and compliant with all applicable sanitary and quality standards. (Autho-

rized by K.S.A. 2001 Supp. 65-772; effective Jan. 1, 1966; amended Dec. 20, 2002.)

4-7-4. Handling requirements. (a) Cooling. All milk shall be cooled to 45°F or less within one hour after milking and shall be maintained at these temperatures until delivery to the consumer.

(b) Containers. All containers shall be stored in a sanitary place and manner and protected from possible contamination. All bottles, cans, and other multiuse containers shall be thoroughly washed and sanitized before each usage. (Authorized by K.S.A. 2001 Supp. 65-772 and 65-775, as amended by L. 2002, Ch. 181, § 16; implementing K.S.A. 2001 Supp. 65-773; effective Jan. 1, 1966; amended Jan. 14, 1991; amended Dec. 20, 2002.)

4-7-5. (Authorized by K.S.A. 1965 Supp. 75-1401; effective Jan. 1, 1966; revoked Jan. 14, 1991.)

4-7-6. Bacterial and coliform count. (a) Raw milk shall not have a bacterial plate count exceeding 100,000 per milliliter.

(b) Raw cream shall not have a bacterial plate count exceeding 200,000 per milliliter. (Authorized by K.S.A. 2001 Supp. 65-772; effective Jan. 1, 1966; amended Dec. 20, 2002.)

4-7-7. (Authorized by K.S.A. 1965 Supp. 75-1401; effective Jan. 1, 1966; revoked Jan. 14, 1991.)

**B. GRADE A MILK AND MILK PRODUCTS
FOR HUMAN CONSUMPTION**

4-7-100 to 4-7-115. (Authorized by K.S.A. 75-1401, 74-531; effective Jan. 1, 1966; revoked Jan. 1, 1967.)

**C. MILK FOR MANUFACTURING PURPOSES;
PRODUCTION AND PROCESSING**

4-7-200 to 4-7-212. (Authorized by K.S.A. 75-1401; effective Jan. 1, 1966; revoked, E-81-24, Aug. 27, 1980; revoked May 1, 1981.)

4-7-213. Adoption by reference. The United States department of agriculture’s recommended requirements titled “milk for manufacturing purposes and its production and processing,” effective September 1, 2005, are hereby adopted by reference, except for the following: (a) Subpart A;

(b) subpart B, section B2, paragraphs (a), (b), (c), (d), (e), (f), (h), (i), (k), (m), (r), (s), (t), and (u);

(c) subpart D, section D9; and

(d) subpart F.

Copies of the pertinent portions of these requirements may be obtained from the Kansas department of agriculture. (Authorized by K.S.A. 2009 Supp. 65-772 and K.S.A. 65-775; implementing K.S.A. 65-773 and 65-775; effective, E-81-24, Aug. 27, 1980; effective May 1, 1981; amended May 1, 1986; amended, T-87-21, Aug. 21, 1986; amended May 1, 1987; amended Jan. 14, 1991; amended Feb. 27, 1998; amended Feb. 11, 2000; amended Dec. 20, 2002; amended Sept. 1, 2006; amended July 9, 2010.)

4-7-213a. (Authorized by K.S.A. 65-720n, 75-1401; implementing K.S.A. 65-701, 65-720n; effective, T-4-10-30-97, Oct. 30, 1997; effective Feb. 27, 1998; revoked Dec. 20, 2002.)

4-7-214. Additional definitions. Whenever the following terms are used in the United States department of agriculture's recommended requirements regarding "milk for manufacturing purposes and its production and processing," adopted by reference in K.A.R. 4-7-213, the terms shall have the meanings assigned in this regulation: (a) All references to "the act" or "act" shall mean K.S.A. 65-771 et seq., and amendments thereto.

(b) All references to "Brucellosis test" shall mean any and all requirements of the Kansas department of animal health pertaining to brucellosis.

(c) All references to any "form" shall mean a form supplied by the Kansas secretary of agriculture.

(d) All references made to an "inspector" shall mean the individual who inspects for compliance with the Kansas dairy law.

(e) All references to "official methods" shall mean the "official methods of analysis of AOAC international," adopted by reference in K.A.R. 4-7-716.

(f) All references to "regulatory agency" shall mean the Kansas department of agriculture.

(g) All references to "standard methods" shall mean the edition of "standard methods for the examination of dairy products," adopted by reference in K.A.R. 4-7-716.

(h) All references to equipment, whenever "3-A sanitary standards," "3-A standards," "3-A suggested methods," and "3-A accepted practices" are used, shall mean that the equipment referred to in that context is 3-A sanitary standards-approved before use in producing manufacturing-grade

milk. (Authorized by K.S.A. 2001 Supp. 65-772 and K.S.A. 2001 Supp. 65-775, as amended by L. 2002, Ch. 181, § 16; implementing K.S.A. 2001 Supp. 65-773, K.S.A. 2001 Supp. 65-775, as amended by L. 2002, Ch. 181, § 16, and K.S.A. 2001 Supp. 74-568; effective, E-81-24, Aug. 27, 1980; effective May 1, 1981; amended Jan. 14, 1991; amended Feb. 11, 2000; amended Dec. 20, 2002.)

4-7-215. Insertions. (Authorized by K.S.A. 75-1401 and L. 1990, Ch. 219, Sec. 17; implementing K.S.A. 65-701 as amended by L. 1990, Ch. 219, Sec. 1 and L. 1990, Ch. 219, Sec. 17; effective, E-81-24, Aug. 27, 1981; effective May 1, 1981; amended Jan. 14, 1991; revoked Feb. 11, 2000.)

4-7-216. (Authorized by K.S.A. 2001 Supp. 65-775, as amended by L. 2002, Ch. 181, § 16; implementing K.S.A. 2001 Supp. 65-785 and 74-568; effective Feb. 11, 2000; amended Dec. 20, 2002; revoked Sept. 1, 2006.)

D. MILK OR CREAM BUYING

4-7-300 and 4-7-301. (Authorized by K.S.A. 1965 Supp. 75-1401; effective Jan. 1, 1966; revoked Jan. 14, 1991.)

4-7-302. (Authorized by K.S.A. 75-1401; effective Jan. 1, 1966; revoked Jan. 14, 1991.)

4-7-303 to 4-7-306. (Authorized by K.S.A. 1965 Supp. 75-1401; effective Jan. 1, 1966; revoked Jan. 14, 1991.)

E. MILK, CREAM; SAMPLING, WEIGHING, TESTING

4-7-400 to 4-7-405. (Authorized by K.S.A. 1965 Supp. 75-1401; effective Jan. 1, 1966; revoked Jan. 14, 1991.)

4-7-406. (Authorized by K.S.A. 75-1401; effective Jan. 1, 1966; amended Jan. 1, 1972; revoked Jan. 14, 1991.)

4-7-407. (Authorized by K.S.A. 1965 Supp. 75-1401; effective Jan. 1, 1966; revoked Jan. 14, 1991.)

4-7-408. (Authorized by K.S.A. 75-1401; effective Jan. 1, 1972; revoked Dec. 20, 2002.)

F. FROZEN DAIRY DESSERTS

4-7-500 to 4-7-506. (Authorized by K.S.A. 1965 Supp. 65-720a, 75-1401; effective Jan. 1, 1966; revoked May 1, 1984.)

4-7-507. Special dietary frozen desserts.

(a) The term “special dietary frozen desserts” shall mean frozen dairy desserts for special dietary purposes that are made in semblance of ice cream or ice milk and that contain sweetening ingredients other than nutritive carbohydrate sweeteners.

(b) Special dietary frozen desserts shall be labeled to meet the requirements of the Kansas food, drug, and cosmetic act, code of federal regulations, title 21. (Authorized by and implementing K.S.A. 2001 Supp. 65-772; effective Jan. 1, 1966; amended May 1, 1984; amended Dec. 20, 2002.)

4-7-508. (Authorized by K.S.A. 1965 Supp. 65-720a, 75-1401; effective Jan. 1, 1966; revoked May 1, 1984.)

4-7-509. (Authorized by K.S.A. 1965 Supp. 75-1401; effective Jan. 1, 1966; revoked Jan. 14, 1991.)

4-7-510. Adoption by reference. Except for 21 C.F.R. 135.160, pertaining to water ices, 21 C.F.R. part 135, revised on April 1, 2005, titled “frozen desserts,” is hereby adopted by reference. Copies of these federal regulations, or pertinent portions of the regulations, may be obtained from the Kansas department of agriculture. (Authorized by K.S.A. 2005 Supp. 65-772 and K.S.A. 65-775; implementing K.S.A. 65-775; effective May 1, 1984; amended March 26, 1990; amended Oct. 21, 1991; amended Dec. 20, 2002; amended Sept. 1, 2006.)

4-7-511. (Authorized by K.S.A. 75-1401 and K.S.A. 65-720a as amended by L. 1989, Ch. 190, Sec. 1; implementing K.S.A. 65-720a as amended by L. 1989, Ch. 190, Sec. 1; effective March 26, 1990; revoked Dec. 20, 2002.)

4-7-512. (Authorized by K.S.A. 75-1401 and K.S.A. 65-720a as amended by L. 1989, Ch. 190, Sec. 1; implementing K.S.A. 65-720a as amended by L. 1989, Ch. 190, Sec. 1; effective March 26, 1990; revoked Dec. 20, 2002.)

4-7-513. (Authorized by K.S.A. 75-1401, K.S.A. 1990 Supp. 65-720a and 65-720n; implementing K.S.A. 1990 Supp. 65-720a and 65-720n; effective March 26, 1990; amended Oct. 21, 1991; revoked Dec. 20, 2002.)

4-7-530. Adoption by reference. (a) The following sections of 7 C.F.R. part 58, revised on January 1, 2006, are hereby adopted by reference:

- (1) All of section 58.126;
- (2) all of sections 58.132 through 58.138; and

(3) all of sections 58.605 through 58.654, except sections 58.646, 58.648, and 58.653.

(b) Copies of these federal regulations, or pertinent portions of the regulations, may be obtained from the Kansas department of agriculture. (Authorized by K.S.A. 2005 Supp. 65-772 and K.S.A. 65-775; implementing K.S.A. 65-775; effective Oct. 21, 1991; amended Dec. 20, 2002; amended Sept. 1, 2006.)

4-7-531. Additional definitions. (a) Notwithstanding any language to the contrary, all references to any “standard of identity” in 7 C.F.R. 58.605, as adopted by reference in K.A.R. 4-7-530, shall mean the corresponding standard of identity established by K.A.R. 4-7-510.

(b) All references to “standard methods for the examination of dairy products” in the regulations adopted by reference in K.A.R. 4-7-530 shall mean the edition of the “standards for examination of dairy products” adopted by reference in K.A.R. 4-7-716.

(c) All references to “official methods of analysis of the association of analytical chemists” in the regulations adopted by reference in K.A.R. 4-7-530 shall mean the edition of the “official methods of analysis of AOAC international” adopted by reference in K.A.R. 4-7-716. (Authorized by and implementing K.S.A. 2001 Supp. 65-772 and 65-775, as amended by L. 2002, Ch. 181, § 16; effective Oct. 21, 1991; amended Dec. 20, 2002.)

4-7-532. Examination of frozen dairy desserts and frozen dairy dessert mixes. (a) A sample of any frozen dairy dessert or frozen dairy dessert mix may be taken by the Kansas secretary of agriculture as often as the secretary deems necessary to prevent the introduction of or to remove any adulterated, misbranded, or unclean frozen dairy desserts or frozen dairy dessert mixes from the marketplace.

(b) Samples shall be taken at least annually at each business or location owned or operated by any person required to obtain a license to operate a dairy manufacturing plant. (Authorized by K.S.A. 2001 Supp. 65-772 and 65-775, as amended by L. 2002, Ch. 181, § 16; implementing K.S.A. 2001 Supp. 65-773 and 65-775, as amended by L. 2002, Ch. 181, § 16; effective Oct. 21, 1991; amended Dec. 20, 2002.)

4-7-533. Coliform and bacteria standards for frozen dairy desserts and frozen dairy dessert mixes. (a) A frozen dairy dessert

product shall not contain more than 50,000 bacteria per gram as determined by the standard plate count and shall not contain more than 10 coliform organisms per gram in three out of the last five samples.

(b) A frozen dairy dessert mix shall not contain more than 20,000 bacteria per gram as determined by the standard plate count and shall not contain more than 10 coliform organisms per gram in three out of the last five samples. (Authorized by K.S.A. 2001 Supp. 65-772 and 65-775, as amended by L. 2002, Ch. 181, § 16; implementing K.S.A. 2001 Supp. 65-773 and 65-775, as amended by L. 2002, Ch. 181, § 16; effective Oct. 21, 1991; amended Dec. 20, 2002.)

G. GRADE A MILK AND MILK PRODUCTS FOR HUMAN CONSUMPTION

4-7-600 to 4-7-616. (Authorized by K.S.A. 74-531, K.S.A. 1970 Supp. 75-1401; effective Jan. 1, 1967; revoked July 1, 1970, by act of legislature, see L. 1968, ch. 120, § 1.)

H. GRADE A PASTEURIZED MILK AND MILK PRODUCTS

4-7-700. (Authorized by K.S.A. 1979 Supp. 65-737a; effective July 1, 1970; amended May 1, 1980; revoked Jan. 14, 1991.)

4-7-701. (Authorized by K.S.A. 1979 Supp. 65-737a; effective July 1, 1970; amended Jan. 1, 1972; revoked May 1, 1980.)

4-7-702. (Authorized by K.S.A. 1967 Supp. 65-737a; effective July 1, 1970; revoked Jan. 14, 1991.)

4-7-703 to 4-7-708. (Authorized by K.S.A. 1979 Supp. 65-737a; effective July 1, 1970; revoked May 1, 1980.)

4-7-709. (Authorized by K.S.A. 1967 Supp. 65-737a; effective July 1, 1970; revoked Jan. 14, 1991.)

4-7-710 to 4-7-714. (Authorized by K.S.A. 1979 Supp. 65-737a; effective July 1, 1970; revoked May 1, 1980.)

4-7-715. Enforcement. K.A.R. 4-7-715 through K.A.R. 4-7-722 shall be enforced by the Kansas secretary of agriculture in accordance with the corresponding provisions contained in the “grade ‘A’ pasteurized milk ordinance” adopted by reference in K.A.R. 4-7-716, a copy of which shall be on file in the office of the Kansas secretary

of agriculture. (Authorized by and implementing K.S.A. 2001 Supp. 65-772; effective July 1, 1970; amended May 1, 1980; amended May 1, 1983; amended Jan. 14, 1991; amended Dec. 20, 2002.)

4-7-716. Adoption by reference. (a) The following documents are hereby adopted by reference:

(1) Except for sections 1 (JJ), 2, 9, 15, 16, 17, and 18, the “grade ‘A’ pasteurized milk ordinance,” 2009 revision, including appendices, as published by the U.S. department of health and human services, public health service, and food and drug administration;

(2) the “methods of making sanitation ratings of milk shippers,” including appendices, published by the U.S. department of health and human services, public health service, and food and drug administration, 2009 revision;

(3) the 2009 revision of the “procedures governing the cooperative state-public health service/food and drug administration program of the national conference on interstate milk shipments,” including pages 49 through 68;

(4) the 17th edition of the “standard methods for the examination of dairy products,” dated 2004 and published by the American public health association;

(5) the 17th edition of the “official methods of analysis of AOAC international,” volumes I and II, revision 1, including appendices, dated 2002 and published by the association of official analytical chemists; and

(6) the 2007 revision of the “evaluation of milk laboratories,” published by the U.S. department of health and human services, public health service, and food and drug administration.

(b) Copies of the pertinent portions of the material adopted by reference shall be available from the Kansas department of agriculture. (Authorized by K.S.A. 2009 Supp. 65-772 and K.S.A. 65-775; implementing K.S.A. 65-775; effective May 1, 1980; amended May 1, 1983; amended May 1, 1986; amended Dec. 26, 1988; amended Jan. 14, 1991; amended Oct. 21, 1991; amended July 1, 1992; amended Aug. 22, 1994; amended Dec. 20, 2002; amended Sept. 1, 2006; amended July 9, 2010.)

4-7-717. Additional definitions. (a) All references to “this ordinance” in the “grade ‘A’ pasteurized milk ordinance” adopted by reference in K.A.R. 4-7-716 shall mean K.A.R. 4-7-716.

(b) All references to “regulatory agency” in the “grade ‘A’ pasteurized milk ordinance” adopted by reference in K.A.R. 4-7-716 shall mean the department.

(c) All references to “jurisdiction” in the “grade ‘A’ pasteurized milk ordinance” adopted by reference in K.A.R. 4-7-716 shall mean the state of Kansas.

(d) “Cottage cheese” means the product defined in 21 C.F.R. 133.128 as revised on April 1, 2005 and hereby adopted by reference. Grading of this product shall be optional.

(e) “Dry curd cottage cheese” means the product defined in 21 C.F.R. 133.129 as revised on April 1, 2005 and hereby adopted by reference. Grading of this product shall be optional.

(f) All references to the “standard methods for the examination of dairy products of the American public health association” in the “grade ‘A’ pasteurized milk ordinance” adopted by reference in K.A.R. 4-7-716 shall mean the publication adopted by reference in K.A.R. 4-7-716(a)(4).

(g) All references to the “official method of analysis of AOAC international” in the “grade ‘A’ pasteurized milk ordinance” adopted by reference in K.A.R. 4-7-716 shall mean the publication adopted by reference in K.A.R. 4-7-716(a)(5).

(h) Whenever reference is made in the “grade ‘A’ pasteurized milk ordinance,” as adopted by reference in K.A.R. 4-7-716, to the requirements or responsibilities of a “vendor,” the reference shall obligate the processor of milk. (Authorized by and implementing K.S.A. 2005 Supp. 65-772 and K.S.A. 65-775; effective May 1, 1980; amended Jan. 14, 1991; amended Oct. 21, 1991; amended Dec. 20, 2002; amended Sept. 1, 2006.)

4-7-718. Insertions. Each reference to the proper legal jurisdiction in the “grade ‘A’ pasteurized milk ordinance” adopted by reference in K.A.R. 4-7-716 shall be completed by insertion of the word “Kansas” or the phrase “state of Kansas,” whichever the context requires. (Authorized by and implementing K.S.A. 2001 Supp. 65-772 and 65-775, as amended by L. 2002, Ch. 181, § 16; effective May 1, 1980; amended Jan. 14, 1991; amended Dec. 20, 2002.)

4-7-719. Additions. (a) In item 10p appearing in section 7 of the “grade ‘A’ pasteurized milk ordinance” adopted by reference in K.A.R. 4-7-716, the following language shall be inserted after the last sentence in the first paragraph: “However, cottage cheese, cheese dressings, or cheese in-

gredients may be transported by other methods which protect the product from contamination.”

(b) In item 18p appearing in section 7 of the “grade ‘A’ pasteurized milk ordinance” adopted by reference in K.A.R. 4-7-716, the following language shall be inserted after the last sentence in the first paragraph: “However, cottage cheese, dry curd cottage cheese, and reduced-fat or low-fat cottage cheese may be transported in sealed containers in a protected sanitary manner from one plant to another for creaming or packaging.” (Authorized by and implementing K.S.A. 2001 Supp. 65-772 and 65-775, as amended by L. 2002, Ch. 181, § 16; effective May 1, 1980; amended Jan. 14, 1991; amended March 2, 1992; amended Aug. 22, 1994; amended Dec. 20, 2002.)

4-7-720. (Authorized by and implementing K.S.A. 65-737a as amended by L. 1990, Ch. 220, Sec. 3; effective Jan. 14, 1991; revoked Dec. 20, 2002.)

4-7-721. (Authorized by and implementing K.S.A. 65-737a as amended by L. 1990, Ch. 220, Sec. 3; effective Jan. 14, 1991; revoked Dec. 20, 2002.)

4-7-722. (Authorized by and implementing K.S.A. 1990 Supp. 65-720n and 65-737a; effective Jan. 14, 1991; amended Oct. 21, 1991; revoked Dec. 20, 2002.)

I. TAXES AND FEES

4-7-800. (Authorized by K.S.A. 75-1401, K.S.A. 1982 Supp. 65-708; implementing K.S.A. 1982 Supp. 65-708; effective, T-83-25, Oct. 1, 1982; effective May 1, 1983; revoked Oct. 29, 1990.)

4-7-801. (Authorized by K.S.A. 75-1402, K.S.A. 1982 Supp. 65-708, 65-719; implementing K.S.A. 1982 Supp. 65-708, 65-719; effective, T-83-25, Oct. 1, 1982; effective May 1, 1983; revoked Oct. 29, 1990.)

4-7-802. (Authorized by K.S.A. 75-1401 and K.S.A. 65-745 as amended by Sec. 3 of 1990 SB 419; implementing K.S.A. 65-745 as amended by Sec. 5 of 1990 SB 419; effective, T-83-25, Oct. 1, 1982; effective May 1, 1983; amended, T-4-7-2-90, July 2, 1990; amended Oct. 29, 1990; revoked Dec. 20, 2002.)

4-7-803. (Authorized by K.S.A. 75-1401, 1982 Supp. 65-708, 65-719; implementing K.S.A. 1982 Supp. 65-708, 65-719; effective, T-83-25,

Oct. 1, 1982; effective May 1, 1983; revoked Oct. 29, 1990.)

4-7-804. Schedule of fees for non-regulatory laboratory work. (a) Each person for whom a test is performed by the dairy laboratory of the Kansas department of agriculture for non-regulatory purposes shall pay the department \$5.00 for each of the following tests:

- (1) Standard plate count for raw or pasteurized milk or milk products;
- (2) coliform plate count with confirmation for raw or pasteurized milk or milk products;
- (3) direct microscopic somatic cell count for raw milk products;
- (4) B-lactam analysis with confirmation for raw and pasteurized milk or milk products;
- (5) dairy water coliform bacteria and heterotrophic plate count;
- (6) empty container sterility analysis;
- (7) thermometer calibration at two temperature points;
- (8) added water analysis in raw milk; and
- (9) butterfat analysis for raw or retail milk or milk products.

(b) Each person for whom a test is performed by the dairy laboratory of the Kansas department of agriculture for non-regulatory purposes shall pay the department \$10.00 for each of the following tests:

- (1) Electronic somatic cell count;
- (2) inhibitor analysis other than a B-lactam analysis; and
- (3) aflotoxin analysis.

(c) Any non-regulatory laboratory test may be refused to be performed by the secretary, at the secretary's discretion. (Authorized by and implementing K.S.A. 2001 Supp. 65-777; effective Dec. 20, 2002.)

4-7-900. Civil penalty; order. Each order assessing a civil penalty shall include the following:

- (a) A general statement citing the section of the act authorizing the assessment of a civil penalty;
- (b) a specific reference to each provision of the act or implementing regulation that the respondent is alleged to have violated;
- (c) a concise statement of the factual basis for each alleged violation;
- (d) the amount of the civil penalty; and
- (e) notice of the respondent's right to request a hearing. (Authorized by K.S.A. 2007 Supp. 65-772; implementing K.S.A. 65-788; effective Jan.

22, 1990; amended Dec. 12, 1994; amended Dec. 20, 2002; amended July 18, 2008.)

4-7-901. (Authorized by K.S.A. 2001 Supp. 65-772; implementing K.S.A. 2001 Supp. 65-788; effective Jan. 22, 1990; amended Dec. 12, 1994; amended Dec. 20, 2002; revoked July 18, 2008.)

4-7-902. Amount of civil penalty. (a) A separate civil penalty shall be assessed for each violation of the Kansas dairy law, K.S.A. 65-771 *et seq.*, and amendments thereto, that results from each independent act or failure to act by any dairy manufacturing plant or agent or employee of the plant or agent. In determining whether a given violation is independent of and substantially distinguishable from any other violation for the purpose of assessing separate civil penalties, consideration shall be given to whether each violation requires an element of proof not required by another violation. If several violations require the same elements of proof and are not distinguishable, assessment of separate civil penalties shall be within the discretion of the secretary or the secretary's authorized representative.

(b) A penalty of not more than \$300 may be assessed by the secretary if a violation ultimately could result in harm or danger to the public health or is a repeat violation identified in subsection (c).

(c) For the second occurrence and for each subsequent occurrence of a violation for which a civil penalty has been assessed within a three-year period, the civil penalty assessed shall be the maximum amount allowed by law. (Authorized by K.S.A. 2007 Supp. 65-772; implementing K.S.A. 65-788; effective Jan. 22, 1990; amended Dec. 20, 2002; amended July 18, 2008.)

4-7-903. Criteria to determine dollar amount of the civil penalty. In determining the amount of civil penalty, the gravity of the violation shall be considered by the secretary or the secretary's designee. Factors to be considered may include the following: (a) The potential of the act to injure or endanger the health of any consumer, or the general public;

- (b) the severity of actual or potential injuries;
- (c) the respondent's history of compliance with K.S.A. 65-789, and amendments thereto, and the regulations adopted thereunder;
- (d) any action taken by the respondent to remedy the specific violation or to mitigate any adverse health effects or environmental effects that were the result of the violation; and

(e) any misrepresentation or fraud associated with the violation. (Authorized by K.S.A. 2007 Supp. 65-772; implementing K.S.A. 65-788; effective Jan. 20, 1990; amended Oct. 29, 1990; amended Dec. 20, 2002; amended July 18, 2008.)

4-7-904. Informal settlement. (a) Any respondent may request a settlement conference if the respondent timely filed a written request for hearing. The request may be made before the prehearing conference.

(b) If a settlement is reached, the parties shall reduce the settlement to writing and present the proposed written consent agreement to the secretary. The consent agreement shall state that, for the purpose of the proceeding, the following conditions are met:

(1) The respondent admits the jurisdictional allegations and admits the facts stipulated in the consent agreement.

(2) The respondent neither admits nor denies the specific violations contained in the order.

(3) The respondent consents to the assessment of a stated civil penalty.

The consent agreement shall include all terms of the agreement and shall be signed by all parties or their counsel. (Authorized by K.S.A. 2007 Supp. 65-772; implementing K.S.A. 65-788; effective Jan. 22, 1990; amended Dec. 12, 1994; amended Dec. 20, 2002; amended July 18, 2008.)

4-7-905. (Authorized by K.S.A. 75-1401 and 65-720n; implementing K.S.A. 65-770; effective Jan. 22, 1990; amended Dec. 12, 1994; revoked Dec. 20, 2002.)

4-7-1000. Milk hauler license. (a) Each milk hauler shall sample, weigh, handle, and transport milk or cream samples in accordance with the “standard methods for examination of dairy products,” the “official methods of analysis of AOAC international,” and the provisions of the “grade ‘A’ pasteurized milk ordinance” adopted by reference in K.A.R. 4-7-716.

(b) Before the initial issuance of the milk hauler license, each applicant shall pass a written examination on the proper procedures for sampling, testing, and weighing milk or cream, and on the state laws and regulations pertaining to milk and dairy products.

(c) Each milk hauler license shall be renewed when the applicant pays the required fees and attends renewal training provided by the secretary at least once during any three consecutive licens-

ing periods. (Authorized by K.S.A. 2001 Supp. 65-772 and 65-775, as amended by L. 2002, Ch. 181, § 16; implementing K.S.A. 2001 Supp. 65-778; effective Jan. 14, 1991; amended Dec. 20, 2002.)

4-7-1001. (Authorized by L. 1990, Ch. 219, Sec. 17; implementing K.S.A. 65-704 as amended by L. 1990, Ch. 219, Sec. 4; effective Jan. 14, 1991; revoked Dec. 20, 2002.)

Article 8.—NOXIOUS WEEDS

4-8-1 to 4-8-3. (Authorized by K.S.A. 2-1315; effective Jan. 1, 1966; amended, E-67-3, April 24, 1967; amended Jan. 1, 1968; amended Jan. 1, 1972; amended, E-77-19, May 1, 1976; amended Feb. 15, 1977; revoked May 1, 1982.)

4-8-4. (Authorized by K.S.A. 1971 Supp. 2-1315; effective Jan. 1, 1966; amended Jan. 1, 1972; revoked May 1, 1982.)

4-8-5 and 4-8-6. (Authorized by K.S.A. 1971 Supp. 2-1315; effective Jan. 1, 1966; amended, E-67-3, April 24, 1967; amended Jan. 1, 1968; amended Jan. 1, 1972; revoked May 1, 1982.)

4-8-7. (Authorized by K.S.A. 2-1315; effective Jan. 1, 1966; amended, E-67-3, April 24, 1967; amended Jan. 1, 1968; amended Jan. 1, 1972; amended, E-77-19, May 1, 1976; amended Feb. 15, 1977; revoked May 1, 1982.)

4-8-8. (Authorized by K.S.A. 1971 Supp. 2-1315; effective Jan. 1, 1966; amended, E-67-3, April 24, 1967; amended Jan. 1, 1968; amended Jan. 1, 1972; revoked May 1, 1982.)

4-8-9. (Authorized by K.S.A. 1971 Supp. 2-1315; effective Jan. 1, 1966; amended Jan. 1, 1972; amended, E-77-19, May 1, 1976; amended Feb. 15, 1977; revoked May 1, 1982.)

4-8-10. (Authorized by K.S.A. 1971 Supp. 2-1315; effective Jan. 1, 1966; amended Jan. 1, 1968; amended Jan. 1, 1972; revoked May 1, 1982.)

4-8-11. (Authorized by K.S.A. 1971 Supp. 2-1315; effective Jan. 1, 1966; amended Jan. 1, 1972; revoked May 1, 1982.)

4-8-12. (Authorized by K.S.A. 1971 Supp. 2-1315; effective Jan. 1, 1966; amended Jan. 1, 1968; amended Jan. 1, 1972; revoked May 1, 1982.)

4-8-13. Service of notices and statements.

(a) Service of notices and statements required by K.S.A. 2-1320, and amendments thereto, shall be deemed sufficient when made upon the owner of the land to which the notice or statement pertains or the landowner's agent or trustee, the executor or administrator of the estate of a deceased landowner, the guardian or conservator of the estate of a minor or legally disabled person, or one of several joint owners or tenants in common, by either of the following means:

- (1) Personal delivery; or
- (2) certified mail.

(b) The notices and statements required by K.S.A. 2-1320, and amendments thereto, may be served by any of the following:

(1) The county, city, township, or district weed supervisor for the county, city, township, or district where the land specified in the notice or statement is located;

(2) a county commissioner of the county where the land specified in the notice or statement is located;

(3) the sheriff of the county where the land specified in the notice or statement is located; or

(4) a member of the governing body of a city or the marshal or a law enforcement officer of any city having jurisdiction over land described in the notice or statement.

(c) If personal service or service by certified mail cannot be achieved within 45 days of the date on which any weed control activities are performed pursuant to K.S.A. 2-1320 and amendments thereto, then the notice or statement may be posted at the property where the weed control activity was performed, and the posting shall be considered valid notice. (Authorized by and implementing K.S.A. 2019 Supp. 2-1315 and 2-1320; effective Jan. 1, 1966; amended March 26, 2021.)

4-8-14. (Authorized by and implementing K.S.A. 2-1315; effective May 1, 1982; amended May 1, 1984; amended May 1, 1986; amended May 1, 1988; amended Dec. 26, 1988; revoked Oct. 21, 1991.)

4-8-14a. Herbicides approved for cost-share. The Kansas department of agriculture's document titled "approved herbicides for cost-share," dated May 20, 2020, is hereby adopted by reference. (Authorized by and implementing K.S.A. 2019 Supp. 2-1315; effective Oct. 21, 1991; amended Jan. 25, 1993; amended Sept. 27, 1993;

amended Oct. 27, 2000; amended, T-4-5-27-04, May 27, 2004; amended Aug. 6, 2004; amended, T-4-5-20-05, May 20, 2005; amended, T-4-3-29-06, March 29, 2006; amended April 27, 2007; amended March 26, 2021.)

4-8-15. (Authorized by K.S.A. 2-1315; implementing K.S.A. 2-1315; effective May 1, 1982; revoked May 1, 1988.)

4-8-16. (Authorized by K.S.A. 2-1315; implementing K.S.A. 2-1315; effective May 1, 1982; amended May, 1 1986; revoked May 1, 1988.)

4-8-17. (Authorized by K.S.A. 2-1315; implementing K.S.A. 2-1315; effective May 1, 1982; amended May 1, 1984; revoked May 1, 1988.)

4-8-18. (Authorized by K.S.A. 2-1315; implementing K.S.A. 2-1315; effective May 1, 1982; revoked May 1, 1988.)

4-8-19. (Authorized by K.S.A. 2-1315; implementing K.S.A. 2-1315; effective May 1, 1982; revoked May 1, 1988.)

4-8-20. (Authorized by K.S.A. 2-1315; implementing K.S.A. 2-1315; effective May 1, 1982; amended May 1, 1986; revoked May 1, 1988.)

4-8-21. (Authorized by K.S.A. 2-1315; implementing K.S.A. 2-1315; effective May 1, 1982; amended May 1, 1986; revoked May 1, 1988.)

4-8-22. (Authorized by K.S.A. 2-1315; implementing K.S.A. 2-1315; effective May 1, 1982; revoked May 1, 1988.)

4-8-23. (Authorized by K.S.A. 2-1315; implementing K.S.A. 2-1315; effective May 1, 1982; amended May 1, 1986; revoked May 1, 1988.)

4-8-24. (Authorized by K.S.A. 2-1315; implementing K.S.A. 2-1315; effective May 1, 1982; revoked May 1, 1988.)

4-8-25. (Authorized by K.S.A. 2-1315; implementing K.S.A. 2-1315; effective May 1, 1982; revoked May 1, 1988.)

4-8-26. (Authorized by K.S.A. 2-1315; implementing K.S.A. 2-1315; effective May 1, 1982; amended May 1, 1986; revoked May 1, 1988.)

4-8-27. Adoption of control methods for musk thistle. (a) The Kansas department of agriculture's document titled "official control methods

for musk thistle,” dated May 20, 2020, is hereby adopted by reference and shall apply to the control of musk thistle in Kansas.

(b) If a county, city, township, or district weed supervisor determines that musk thistles in the weed supervisor’s county, city, township, or district have reached a stage of maturity that will render the weed control methods currently being used in that county, city, township, or district ineffective, the weed supervisor may give notice requiring the effective control methods to be implemented within 10 business days of the date the notice was issued. (Authorized by and implementing K.S.A. 2019 Supp. 2-1315; effective May 1, 1988; amended Jan. 22, 1990; amended March 2, 1992; amended June 1, 1992; amended Oct. 27, 2000; amended Aug. 6, 2004; amended, T-4-5-20-05, May 20, 2005; amended, T-4-3-29-06, March 29, 2006; amended April 27, 2007; amended March 26, 2021.)

4-8-28. Adoption of control methods for Johnsongrass. The Kansas department of agriculture’s document titled “official control methods for Johnsongrass,” dated May 20, 2020, is hereby adopted by reference and shall apply to the control of Johnsongrass in Kansas. (Authorized by and implementing K.S.A. 2019 Supp. 2-1315; effective May 1, 1988; amended Jan. 25, 1993; amended Sept. 27, 1993; amended Oct. 27, 2000; amended Aug. 6, 2004; amended April 27, 2007; amended March 26, 2021.)

4-8-29. Adoption of control methods for field bindweed. The Kansas department of agriculture’s document titled “official control methods for field bindweed,” dated May 20, 2020, is hereby adopted by reference and shall apply to the control of field bindweed in Kansas. (Authorized by and implementing K.S.A. 2019 Supp. 2-1315; effective May 1, 1988; amended Oct. 27, 2000; amended Aug. 6, 2004; amended April 27, 2007; amended March 26, 2021.)

4-8-30. Adoption of control methods for hoary cress. The Kansas department of agriculture’s document titled “official control methods for hoary cress,” dated May 20, 2020, is hereby adopted by reference and shall apply to the control of hoary cress in Kansas. (Authorized by and implementing K.S.A. 2019 Supp. 2-1315; effective May 1, 1988; amended Oct. 21, 1991; amended Aug. 6, 2004; amended April 27, 2007; amended March 26, 2021.)

4-8-31. Adoption of control methods for Russian knapweed. The Kansas department of agriculture’s document titled “official control methods for Russian knapweed,” dated May 20, 2020, is hereby adopted by reference and shall apply to the control of Russian knapweed in Kansas. (Authorized by and implementing K.S.A. 2019 Supp. 2-1315; effective May 1, 1988; amended Aug. 6, 2004; amended April 27, 2007; amended March 26, 2021.)

4-8-32. Adoption of control methods for bur ragweed. The Kansas department of agriculture’s document titled “official control methods for bur ragweed,” dated May 20, 2020, is hereby adopted by reference and shall apply to the control of bur ragweed in Kansas. (Authorized by and implementing K.S.A. 2019 Supp. 2-1315; effective May 1, 1988; amended Sept. 27, 1993; amended Oct. 27, 2000; amended Aug. 6, 2004; amended March 26, 2021.)

4-8-33. Adoption of control methods for Canada thistle. The Kansas department of agriculture’s document titled “official control methods for Canada thistle,” dated May 20, 2020, is hereby adopted by reference and shall apply to the control of Canada thistle in Kansas. (Authorized by and implementing K.S.A. 2019 Supp. 2-1315; effective May 1, 1988; amended Jan. 25, 1993; amended Aug. 6, 2004; amended, T-4-3-29-06, March 29, 2006; amended April 27, 2007; amended March 26, 2021.)

4-8-34. Adoption of control methods for leafy spurge. The Kansas department of agriculture’s document titled “official control methods for leafy spurge,” dated May 20, 2020, is hereby adopted by reference and shall apply to the control of leafy spurge in Kansas. (Authorized by and implementing K.S.A. 2019 Supp. 2-1315; effective May 1, 1988; amended Oct. 29, 1990; amended Oct. 27, 2000; amended Aug. 6, 2004; amended, T-4-5-20-05, May 20, 2005; amended, T-4-3-29-06, March 29, 2006; amended April 27, 2007; amended March 26, 2021.)

4-8-35. Adoption of control methods for quackgrass. The Kansas department of agriculture’s document titled “official control methods for quackgrass,” dated May 20, 2020, is hereby adopted by reference and shall apply to the control of quackgrass in Kansas. (Authorized by and implementing K.S.A. 2019 Supp. 2-1315; effective

May 1, 1988; amended Aug. 6, 2004; amended April 27, 2007; amended March 26, 2021.)

4-8-36. Adoption of control methods for pignut. The Kansas department of agriculture's document titled "official control methods for pignut," dated May 20, 2020, is hereby adopted by reference and shall apply to the control of pignut in Kansas. (Authorized by and implementing K.S.A. 2019 Supp. 2-1315; effective May 1, 1988; amended Aug. 6, 2004; amended March 26, 2021.)

4-8-37. Adoption of control methods for kudzu. The Kansas department of agriculture's document titled "official control methods for kudzu," dated May 20, 2020, is hereby adopted by reference and shall apply to the control of kudzu in Kansas. (Authorized by and implementing K.S.A. 2019 Supp. 2-1315; effective May 1, 1988; amended Aug. 6, 2004; amended March 26, 2021.)

4-8-38. Weed supervisor employment. (a) Each individual hired to serve as a county, city, township, or district weed supervisor shall be hired as an employee of the county, city, township, or district and not as an independent contractor. Any county, city, township, or district weed supervisor serving as an independent contractor when this regulation becomes effective may continue to serve as an independent contractor until the expiration of the current term under that individual's existing contract, which shall not be renewed or extended.

(b) Any individual seeking employment as a county, city, township, or district weed supervisor may be conditionally approved for employment by the secretary if the individual has education, training, or experience sufficient to allow the individual to carry out the employment duties of a county, city, township, or district weed supervisor.

(c) Final approval of the employment of each individual who has been conditionally approved to be employed as a county, city, township, or district weed supervisor may be issued by the secretary when the individual has met the following requirements:

(1) Obtained certification as a pesticide applicator in category 9a, regulatory pest control, noxious weed control, pursuant to K.S.A. 2-2438a *et seq.* and amendments thereto; and

(2) successfully completed the noxious weed basic short course offered by the Kansas department of agriculture, plant protection and weed control program.

(d) Approval of the employment of each individual previously approved for employment as a county, city, township, or district weed supervisor may be renewed by the secretary on or before January 1 of each year if the individual meets the following requirements:

(1) Is still employed as a county, city, township, or district weed supervisor by the same county, city, township, or district when renewal is sought;

(2) is currently certified as a pesticide applicator as specified in paragraph (b)(1); and

(3) has timely filed the annual weed eradication progress report and any other records or reports requested by the secretary.

(e) Approval of the employment of any county, city, township, or district weed supervisor shall be withdrawn by the secretary if the county, city, township, or district weed supervisor has failed, without just cause, to comply with any of the requirements specified in subsection (c). (Authorized by K.S.A. 2019 Supp. 2-1315; implementing K.S.A. 2019 Supp. 2-1316; effective May 1, 1988; amended March 26, 2021.)

4-8-39. (Authorized by and implementing K.S.A. 2006 Supp. 2-1315; effective May 1, 1988; amended Jan. 1, 1989; amended Oct. 21, 1991; amended Aug. 6, 2004; amended April 27, 2007; revoked March 26, 2021.)

4-8-40. Adoption of control methods for sericea lespedeza. The Kansas department of agriculture's document titled "official control methods for sericea lespedeza," dated May 20, 2020, is hereby adopted by reference and shall apply to the control of sericea lespedeza in Kansas. (Authorized by and implementing K.S.A. 2019 Supp. 2-1315; effective May 1, 1988; amended Jan. 1, 1989; amended Oct. 29, 1990; amended Oct. 21, 1991; amended Jan. 25, 1993; amended, T-4-5-27-04, May 27, 2004; amended Aug. 6, 2004; amended March 26, 2021.)

4-8-41. (Authorized by and implementing K.S.A. 2-1315; effective June 1, 1992; amended Oct. 27, 2000; revoked March 26, 2021.)

4-8-42. (Authorized by and implementing K.S.A. 2006 Supp. 2-1315; effective Oct. 27, 2000; amended Aug. 6, 2004; amended, T-4-3-29-06, March 29, 2006; amended April 27, 2007; revoked March 26, 2021.)

4-8-43. (Authorized by and implementing K.S.A. 2-1315, as amended by L. 2002, Ch. 37,

Sec. 1; effective, T-4-1-2-03, Jan. 2, 2003; effective April 18, 2003; revoked March 26, 2021.)

4-8-44. Designation of noxious weeds.

(a) Pursuant to K.S.A. 2-1314 and amendments thereto, the weeds designated noxious by the secretary shall be placed in the following categories:

(1) Category A noxious weeds, which are weed species that are generally not found in the state or that are found limited in distribution throughout the state;

(2) category B noxious weeds, which are weed species with discrete distributions throughout the state; and

(3) category C noxious weeds, which are weed species that are well established within the state and known to exist in larger or more extensive populations in the state.

(b) Category A noxious weeds shall be subject to control efforts directed at excluding the noxious weeds from the state or eradicating the population of noxious weeds wherever detected statewide, in order to protect neighboring lands and the state as a whole. Category A noxious weeds shall include the following:

- (1) Hoary cress, *Lepidium draba*;
- (2) leafy spurge, *Euphorbia virgata*;
- (3) quackgrass, *Elymus repens*;
- (4) Russian knapweed, *Rhaponticum repens*;
- (5) kudzu, *Pueraria montana* variety *lobata*; and
- (6) pignut, *Hoffmannseggia glauca*.

(c) Category B noxious weeds shall be subject to control wherever populations have become established within the state and subject to control efforts directed at eradication wherever populations are not established. Category B noxious weeds shall include Canada thistle, *Cirsium arvense*.

(d) New populations of category C noxious weeds shall be subject to control efforts directed at reducing or eradicating those populations. Known and established populations of category C noxious weeds shall be managed by any approved control method. Category C noxious weeds shall include the following:

- (1) Field bindweed, *Convolvulus arvensis*;
- (2) musk thistle, *Carduus nutans*;
- (3) sericea lespedeza, *Lepedeza cuneata*;
- (4) Johnsongrass, *Sorghum halepense*; and
- (5) bur ragweed, *Ambrosia grayii*.

(e) Any county, city, township, or district weed supervisor or any official of another government agency may require the most stringent control measures specified in this regulation for any nox-

ious weed, regardless of the category in which this regulation places that noxious weed, if the county, city, township, or district weed supervisor or government agency official determines that it is necessary to do so based on the results of the survey provided pursuant to K.S.A. 2-1316, and amendments thereto. (Authorized by and implementing K.S.A. 2019 Supp. 2-1314 and 2-1315; effective March 26, 2021.)

4-8-45. Official control plans. (a) Each official control plan adopted by the secretary shall be based on the most current available science and shall include, if applicable, biological, chemical, cultural, and mechanical methods of control.

(b) A control method adopted by the secretary as part of an official control plan that includes more than one control method shall not be used alone for the control of noxious weeds, except that any chemical control method may be used alone and any county, city, township, or district weed supervisor may, at the county, city, township, or district weed supervisor's discretion, use any integrated weed management technique alone for the control of any perennial noxious weed.

(c) The control of each noxious weed species shall be undertaken in accordance with the official control plan adopted by the secretary for that noxious weed species. (Authorized by and implementing K.S.A. 2019 Supp. 2-1315; effective March 26, 2021.)

4-8-46. Annual report. Each annual weed eradication progress report that a weed supervisor submits to the secretary pursuant to K.S.A. 2-1316, and amendments thereto, shall include, at a minimum, the following:

(a) The approximate acreage of land, including roadside areas, currently infested with each species of noxious weed and the location of each infestation in the county;

(b) the dollar amount of all expenditures made during the year to purchase materials, chemicals, and other equipment for the control of noxious weeds;

(c) the dollar amount of all sales made during the year, for cash or charge, of materials, chemicals, and other equipment for the control of noxious weeds;

(d) the dollar amount of all charges and receipts made during the year for use of equipment owned by each county, city, township, or district on public or private land;

(e) the approximate acreage of land, including roadside areas, treated for each species of noxious weed during the year and the control methods used for treatment; and

(f) any other relevant information that the secretary deems necessary. (Authorized by K.S.A. 2019 Supp. 2-1315; implementing K.S.A. 2019 Supp. 2-1315 and 2-1316; effective March 26, 2021.)

4-8-47. Management plan. Each county, city, township, or district weed supervisor, with the aid of that county, city, township, or district weed supervisor's board of county commissioners or city or township board, shall submit a management plan to the secretary no later than March 15 of each year pursuant to K.S.A. 2-1316, and amendments thereto. Each management plan shall be submitted on a form provided by the department and shall include, at a minimum, the following:

(a) The goals and priorities of the county, city, township, or district's noxious weed control program;

(b) the distribution and abundance of each noxious weed species known to exist within the county, city, township, or district; specific locations of new infestations; and areas particularly susceptible to new infestations;

(c) integrated weed management goals and procedures, including goals and procedures regarding biological control agent selection and distribution, pesticide selection and application, and cultural and mechanical controls;

(d) the estimated personnel, operations, and equipment costs of the proposed program;

(e) a compliance plan or strategy;

(f) a strategy for working with state agencies to control noxious weeds on state lands; and

(g) any other relevant information that the secretary deems necessary. (Authorized by K.S.A. 2019 Supp. 2-1315; implementing K.S.A. 2019 Supp. 2-1315 and 2-1316; effective March 26, 2021.)

4-8-48. Contents of notices and statements. Each notice or statement given to the owner, operator, or supervising agent of any noxious weed-infested land pursuant to K.S.A. 2-1331, and amendments thereto, shall include, at a minimum, the following:

(a) The legal description of the noxious weed-infested land;

(b) the name of the owner, operator, or supervising agent of the noxious weed-infested land, as

indicated by the records of the clerk of the county where the land is located;

(c) the approximate acreage of the noxious weed infestation or infestations specified in the notice or statement;

(d) the official methods adopted by the secretary for the control of the noxious weeds specified in the notice or statement;

(e) a time frame, which shall not be fewer than five days after mailing the notice, in which the owner or operator or supervising agent of the noxious weed-infested land shall implement the required noxious weed control methods;

(f) a statement that if the owner, operator, or supervising agent fails to implement the required noxious weed control methods within the time frame provided in the notice or statement, the county, city, township, or district weed supervisor may enter the noxious weed-infested land or cause the noxious weed-infested land to be entered upon as often as necessary to control the noxious weed infestation and may use approved noxious weed control methods that the county, city, township, or district weed supervisor deems best adapted for the control of noxious weeds on the particular area of land;

(g) a statement that if the county, city, township, or district weed supervisor enters the noxious weed-infested land or causes the noxious weed-infested land to be entered upon to control the noxious weed infestation, the owner, operator, or supervising agent shall be served notice of the costs of treatment pursuant to K.S.A. 2-1332, and amendments thereto; and

(h) a statement that the owner, operator, or supervising agent may be prosecuted pursuant to K.S.A. 2-1323, and amendments thereto, and, if convicted, fined as established by law. (Authorized by K.S.A. 2019 Supp. 2-1315, 2-1331, and 2-1332; implementing K.S.A. 2019 Supp. 2-1315 and 2-1331; effective March 26, 2021.)

Article 9.—CARCASS BEEF, CALF, VEAL: GRADES

4-9-1 to 4-9-4. (Authorized by K.S.A. 74-531; effective Jan. 1, 1966; revoked May 1, 1979.)

Article 10.—ANHYDROUS AMMONIA

4-10-1. Definitions. (a) "Appurtenances" means all devices that are used in connection with a container, including safety devices, liquid-level gauging devices, valves, pressure gauges, fittings, and metering or dispensing devices.

(b) "ASME" means American society of mechanical engineers.

(c) "ASME schedule 80" and "ASME schedule 40" mean pipe specifications contained in the 2007 edition of the ASME boiler and pressure vessel code, section II, part A, SA-53/SA-53M, titled "specification for pipe, steel, black and hot-dipped, zinc-coated, welded and seamless," and the appendices, which are hereby adopted by reference.

(d) "Backflow check valve" means a device designed to prevent ammonia from flowing in the wrong direction within a pipe or tube.

(e) "Capacity" means the total volume of a container as measured in standard U.S. gallons of 231 cubic inches, unless otherwise specified.

(f) "Chemical-splash goggles" and "Splashproof goggles" mean flexible-fitting chemical-protective goggles, with a hooded, indirect ventilation system that provides protection to the eyes and eye sockets from the splash of hazardous liquids. This term shall not include direct vented goggles.

(g) "Code" means the "introduction," the relevant parts of UG-1 through UG-137 titled "part UG: general requirements for all methods of construction and all materials," and parts UF-1 through UF-125 titled "part UF: requirements for pressure vessels fabricated by forging" of section VIII, division 1, of the ASME boiler and pressure vessel code, 2007 edition, which are hereby adopted by reference.

(h) "Container" means any vessel designed to hold anhydrous ammonia that is used for the storage, transportation, or application of anhydrous ammonia. This definition shall not apply to any refrigerated vessel with a design pressure of less than 15 psig.

(i) "Data plate" means a piece of noncorroding metal permanently attached by the manufacturer to the surface of a container that has been designed and constructed in accordance with paragraph UG-116 of section VIII, division 1 of the ASME code, 2007 edition, which is adopted by reference in subsection (g).

(j) "Densely populated area" means any location with either one or more multifamily housing units or eight or more single-family dwellings located within a quarter section.

(k) "Designed pressure" means maximum allowable working pressure.

(l) "Emergency shutoff valve" means a valve that stops the flow of product by spring closure, gravity, or pressure and can be activated by an

outside means including a cable pull, hose pull, air assists, electrical closure, or back pressure. The emergency shutoff valve shall be placed in the liquid line internally or externally to the container. If an external valve is used, the valve shall be after the manual shutoff valve but as close to the opening of the container as possible. The emergency shutoff valve shall work properly from a remote location or when activated at the valve.

(m) "Excess-flow valve" means a device placed in a line that is designed to close when the flow of vapor or liquid flowing through the line exceeds the amount for which the valve is rated.

(n) "Filling density" means the percent ratio of the weight of gas in a container to the weight of water that the container will hold at 60° F.

(o) "Implement of husbandry" means a farm wagon-type vehicle or application unit that has an anhydrous ammonia container mounted on it and that is used for transporting anhydrous ammonia from a source of supply to farms or fields or from one farm or field to another.

(p) "Mobile container" means any container that is not installed as a permanent storage container.

(q) "National board inspector" is a person who holds a valid national board commission from the national board of boiler and pressure vessel inspectors and has fulfilled the national board commission requirements as specified in section VIII of the ASME code, 2007 edition.

(r) "NIOSH" means the national institute for occupational safety and health.

(s) "Non-code welding" means welding that does not comply with parts UW-1 through UW-65 of the ASME boiler and pressure vessel code, section VIII, division 1, titled "part UW: requirements for pressure vessels fabricated by welding," 2007 edition, which is hereby adopted by reference.

(t) "PSIG" means pounds per square inch gauge pressure.

(u) "Permanent storage container" means a stationary container having a volume of at least 3,000 water gallons.

(v) "Permanent storage facility" means a site that includes one or more permanent storage containers and their connections and appurtenances.

(w) "Pressure-relief valve" means a device designed to open to relieve pressure above a specified value to prevent an increase in internal fluid or vapor and to close once acceptable pressure conditions have been restored.

(x) “Proof-of-inspection seal” and “current KDA-issued proof-of-inspection seal” mean the decal applied to a permanent system following a successful KDA inspection, which shall occur once per calendar year. The seal is current until it expires on December 31 of the year following the inspection.

(y) “Public assembly area” means any building or structure established to accommodate groups of people for commercial, civic, political, religious, recreational, educational, or similar purposes. This term shall include buildings or structures used for medical care, including hospitals, assisted care facilities, and prisons.

(z) “Reactor unit” means equipment that utilizes anhydrous ammonia to manufacture liquid fertilizer.

(aa) “Respirator” means an air-purifying device with a full face-piece that has been approved by NIOSH under the provisions of 30 CFR Part II, Subpart I [13], dated July 1, 2009, for use in an ammonia-contaminated atmosphere, in compliance with 29 CFR 1910.134, dated July 1, 2009.

(bb) “System” means an assembly of one or more containers, pipes, pumps, and appurtenances used for the storage, transfer, transportation, or application of anhydrous ammonia, which may be permanent or mobile. This definition shall not apply to interstate anhydrous ammonia pipelines.

(cc) “USDOT” and “D.O.T.” mean United States department of transportation. (Authorized by and implementing K.S.A. 2-1212; effective Jan. 1, 1966; amended Jan. 1, 1971; amended Jan. 1, 1973; amended May 1, 1986; amended, T-87-9, May 1, 1986; amended May 1, 1987; amended May 1, 1988; amended Jan. 25, 1993; amended March 12, 2010.)

4-10-1a. Prohibited acts. It shall be a violation to perform any of the following: (a) Install, relocate, modify, repair, or use any system or equipment for storing, reacting, transferring, transporting, applying, or dispersing by any other means anhydrous ammonia unless the system, permanent storage facility, or equipment is in compliance with this article 10;

(b) except as provided under K.A.R. 4-10-4b(b), transfer anhydrous ammonia into a mobile container unless the container bears a legible manufacturer’s data plate or equivalent stamp;

(c) deface the manufacturer’s data plate or equivalent stamp;

(d) transfer any anhydrous ammonia into a container or system having structural damage or any other defect that would prevent the containment of anhydrous ammonia;

(e) transfer anhydrous ammonia into or out of any container without the consent of the owner of each container;

(f) transfer, or permit the transfer of, anhydrous ammonia into a permanent storage container unless the permanent storage container has a current KDA-issued proof-of-inspection seal attached to the respective system;

(g) conduct non-code welding directly on a container or any parts subject to pressure;

(h) fail to report any release of 100 pounds or more of anhydrous ammonia within 48 hours of the release;

(i) conduct a transfer without an attendant present at the transfer site;

(j) transfer anhydrous ammonia into any vessel that does not comply with K.A.R. 4-10-1 through 4-10-16; or

(k) maintain anhydrous ammonia in any vessel that does not meet the requirements of K.A.R. 4-10-1 through 4-10-16. (Authorized by and implementing K.S.A. 2-1212; effective March 12, 2010.)

4-10-1b. Reportable events. The owner or operator of each anhydrous ammonia storage facility or any equipment shall report, to the secretary or the secretary’s authorized representative, each accidental or unauthorized release of 100 pounds or more of anhydrous ammonia within 48 hours after the release. Nothing in this regulation shall require the reporting of an intentional release of anhydrous ammonia into the soil during the normal course of application. (Authorized by and implementing K.S.A. 2-1212; effective March 12, 2010.)

4-10-2 (Authorized by and implementing K.S.A. 2-1212; effective Jan. 1, 1966; amended Jan. 1, 1971; amended Jan. 1, 1973; amended May 1, 1986; amended, T-87-9, May 1, 1986; revoked May 1, 1987.)

4-10-2a through 4-10-2c. (Authorized by and implementing K.S.A. 2-1212; effective May 1, 1987; revoked March 12, 2010.)

4-10-2d. (Authorized by and implementing K.S.A. 2-1212; effective May 1, 1987; amended May 1, 1988; amended Dec. 26, 1988; revoked March 12, 2010.)

4-10-2e. Container valves and appurtenances. (a) Connections to containers shall be limited to liquid-level gauges, emergency shutoff valves, pressure gauges, vapor-relief valves, liquid lines, vapor lines, and thermometers.

(b) Each vapor line and liquid line shall have a manually operated shutoff valve located as close to the container as practical.

(c) On or before July 1, 2012, each permanent storage container shall be equipped with an emergency shutoff valve that meets the requirements of K.A.R. 4-10-1 (l).

(d) No metal part or component of a system that is normally in contact with anhydrous ammonia shall be made of a metal that is incompatible with anhydrous ammonia, including galvanized metal, cast iron, zinc, copper, and brass.

(e) Openings from the container or through fittings that are not larger than a no. 54 drill size opening shall not be required to be equipped with an excess flow valve.

(f) Each valve and appurtenance shall be suitable for use with anhydrous ammonia and designed for not less than the maximum pressure to which the valve and appurtenance will be subjected. Each valve that could be subjected to container pressures shall have a rated working pressure of at least 250 psig.

(g) (1) Each vapor or liquid line greater than a no. 54 drill size opening shall be equipped with an excess flow valve that closes automatically at the rated flows of vapor or liquid specified by the manufacturer.

(2) The connections, lines, valves, and fittings protected by one or more excess flow valves shall have a greater capacity than the rated flow of the excess flow valves so that the valves will close in case of failure at any point in the lines or fittings.

(h) Each liquid connection used to fill a permanent storage container shall be fitted with a back-flow check valve.

(i) (1) All piping, tubing, and fittings subjected to container pressure shall be made of materials specified for use with anhydrous ammonia and shall be designed for a minimum working pressure of 250 psig.

(2) All piping, tubing, and metering or dispensing devices shall be securely mounted and protected against damage.

(3) Threaded joints may be used only with seamless black steel pipe that meets or exceeds ASME schedule 80 specifications. Black steel pipe that meets or exceeds ASME schedule 40 specifications

with at least 800 psig minimum bursting pressure may be used if pipe joints are welded or joined by means of welding type flanges. Pipe joint compounds used shall be resistant to ammonia.

(4) Each flexible connection shall have a bursting pressure of at least 1,000 psig. (Authorized by and implementing K.S.A. 2-1212; effective May 1, 1987; amended March 12, 2010.)

4-10-2f through 4-10-2h. (Authorized by and implementing K.S.A. 2-1212; effective May 1, 1987; revoked March 12, 2010.)

4-10-2i. (Authorized by and implementing K.S.A. 2-1212; effective May 1, 1987; amended May 1, 1988; revoked March 12, 2010.)

4-10-2j. (Authorized by and implementing K.S.A. 2-1212; effective May 1, 1987; amended April 13, 2001; revoked March 12, 2010.)

4-10-2k. (Authorized by and implementing K.S.A. 2-1212; effective May 1, 1987; amended May 1, 1988; amended Jan. 1, 1989; revoked March 12, 2010.)

4-10-3. (Authorized by K.S.A. 1970 Supp. 2-1212; effective Jan. 1, 1966; amended Jan. 1, 1971; revoked May 1, 1986.)

4-10-4. (Authorized by and implementing K.S.A. 2-1212; effective Jan. 1, 1966; amended Jan. 1, 1966; amended Jan. 1, 1971; amended Jan. 1, 1973; amended May 1, 1986; amended, T-87-9, May 1, 1986; amended May 1, 1987; amended May 1, 1988; revoked March 12, 2010.)

4-10-4a. Containers. (a) Each container shall be constructed and tested in accordance with the code and shall have a minimum design pressure of 250 psig.

(b) Subsection (a) shall not prohibit the continued use of permanent storage containers that were constructed and maintained in accordance with Kansas statutes and regulations in effect before the effective date of this regulation.

(c) Each permanent storage container shall be inspected according to K.S.A. 44-913 et seq., and amendments thereto, by the Kansas department of labor, division of industrial safety and health upon initial installation and relocation.

(d) (1) Each permanent storage container that has sustained structural damage shall be inspected and approved for use by the Kansas department of labor, division of industrial safety and health.

(2) Each mobile container that has sustained any structural damage shall be inspected and approved for use by a national board inspector.

(3) Structural damage shall include evidence of any of the following:

(A) Corrosion;

(B) any indentation or abrasion that meets any of the following conditions:

(i) Is over one-half inch deep and includes a weld;

(ii) is deeper than 1/10th of the greatest length of the dent but does not include a weld; or

(iii) is deeper than one inch;

(C) stretching;

(D) cracking;

(E) faulty welds;

(F) non-code welding;

(G) faulty couplings; or

(H) any other similar condition.

(e) All repairs and alterations of permanent and mobile containers shall meet the requirements of the code and shall be performed by a person or company that has a current certificate of authorization from the national board of boiler and pressure vessel inspections.

(f) Non-code welding shall be performed only on saddles or brackets that are not within the pressure-retaining boundaries of the container.

(g) All records of inspections and welding on the container shall meet the following requirements:

(1) Be maintained by the owner of the container;

(2) be made available to the secretary upon request; and

(3) be transferred with change of ownership of the container. (Authorized by and implementing K.S.A. 2-1212; effective March 12, 2010.)

4-10-4b. Markings on containers and systems. (a) Except as provided by K.A.R. 4-10-4a(b) and 4-10-4b(b), each container shall have a data plate, or manufacturer's equivalent stamping, that is permanently attached to the container in a location that is both legible and readily accessible for inspection.

(b) A mobile container that does not have a legible data plate or equivalent stamping may be allowed for ammonia use only if the container is properly tested, registered, and marked under USDOT exemption # DOT-SP13554.

(c) Each shutoff valve within a system shall be identified to show whether the valve is in liquid or vapor service. The method of identification may be by color code or by use of the word "vapor" or

"liquid" placed within 12 inches of the valve by means of a stencil, tag, or decal.

(d) All container surfaces shall be maintained to avoid deterioration. Surfaces that require paint shall be painted white.

(e) Each permanent storage container or group of permanent storage containers shall be marked with the following:

(1) Letters at least four inches high, on at least two sides, with the words "CAUTION AMMONIA" or "ANHYDROUS AMMONIA," in a color that contrasts with the color of the container; and

(2) a national fire protection association diamond for anhydrous ammonia placed in a location that would be readily visible to emergency responders.

(f) Each mobile container shall be marked with the following, using a color that contrasts with the color of the container and letters at least two inches high:

(1) The words "ANHYDROUS AMMONIA" or "Anhydrous Ammonia" on both sides and on the rear of the container; and

(2) the words "INHALATION HAZARD" or "Inhalation Hazard" on two opposing sides of the container.

(g) In addition to the markings required in subsection (f), the following information shall appear on each implement of husbandry:

(1) The owner's name;

(2) the address of the owner's place of business;

(3) a telephone number to be contacted in case of an emergency;

(4) an alphabetical or numerical identification symbol; and

(5) a decal containing the following information:

(A) "CAUTION ANHYDROUS AMMONIA (UNDER PRESSURE) READ CAREFULLY";

(B) "Keep away from pop-off valve marked ↑. This is a safety device and shall not be tampered with or adjusted";

(C) "Stand upwind when working around equipment";

(D) "Wear goggles and rubber gloves when transferring product and bleeding hoses";

(E) "Do not fill tank in excess of 85% full";

(F) "Never place any part of body in line with valve or hose openings. Use extreme care in handling hoses. Never lift a hose by the valve wheel";

(G) "Slowly bleed hoses after transferring product";

(H) "Close valves firmly but do not wrench";

(I) "Do not permit children near this equipment";

(J) “Park equipment away from buildings or any possible fire hazards. Never allow tanks to be subjected to extreme heat”;

(K) “Do not attempt any repairs of this equipment. In event of any failure, call your dealer immediately”; and

(L) “Do not operate this equipment until you have received instructions from your dealer.” (Authorized by and implementing K.S.A. 2-1212; effective March 12, 2010.)

4-10-4c. Permanent storage facility design and permanent storage container location. (a) Before installing or relocating a permanent storage container or permanent storage facility, the owner may submit to the secretary a detailed diagram of the permanent storage facility for review or request a preliminary site survey to ensure that the proposed site meets the requirements in subsections (c), (d), (e), and (f).

(b) The name of the permanent storage facility and the telephone number to be contacted in case of an emergency shall be posted and be legible from each facility entrance using letters at least two inches high.

(c) No permanent storage container shall be located inside an enclosed structure unless the structure is specifically constructed for this purpose.

(d) The nearest edge of the nearest permanent storage container shall be located at a distance meeting the following conditions:

(1) At least 50 feet from the edge of any property not owned or leased by the permanent storage facility;

(2) at least 50 feet from a well or other point of diversion used as a source of drinking water;

(3) at least 50 feet from storage locations of flammables or explosives;

(4) at least 1,000 feet from the area accessible to the public of any public assembly area, as defined in K.A.R. 4-10-1; and

(5) not on or less than 100 feet from the surface of a public roadway.

(e) The site of the permanent storage facility shall be located on property of sufficient size to permit traffic in and out of the area and allow adequate access for emergency personnel.

(f) Each new permanent storage container or permanent storage facility shall be located outside of a municipality or other densely populated areas, unless the location has been approved in writing by the appropriate local governing body. The owner or operator of each permanent stor-

age container located in a municipality or densely populated area shall obtain written approval from the appropriate local governing body before relocating the permanent storage facility or installing additional permanent storage containers within the municipality or densely populated area.

(g) (1) Each permanent storage container shall be mounted on either of the following:

(A) A skid assembly with sufficient surface area to properly support the skid-mounted container; or

(B) either reinforced concrete footings and foundations or structural steel supports mounted on reinforced concrete foundations. The reinforced concrete foundations or footings shall extend below the established frost line and shall be constructed to support the total weight of the containers and their contents. If the container is equipped with bottom withdrawal, the container’s foundation shall maintain the lowest point of the container at not less than 18 inches above ground level.

(2) Each container shall be mounted on its foundation in a manner that permits expansion and contraction. Each container shall be adequately supported so as to prevent the concentration of excessive loads on the supporting portion of the shell. Corrosion prevention measures shall be utilized on any portion of the container that is in contact with either the foundation or saddles.

(3) Each container shall be securely anchored.

(h) All appurtenances to any permanent storage container shall be protected from tampering and mechanical damage, including damage from vehicles. Each manually controlled valve that, if open, would allow ammonia to be transferred or released, shall be kept locked when unattended and during nonbusiness hours. (Authorized by and implementing K.S.A. 2-1212; effective March 12, 2010.)

4-10-4d. Pressure-relief valves. (a) Each container or system of containers shall have liquid and vapor pressure-relief valves to prevent pressure build-up in any portion of the system. Each pressure-relief valve shall be manufactured for use with anhydrous ammonia and be installed, maintained, and replaced according to the manufacturer’s instructions.

(b) Each vapor-relief valve shall be set to indicate discharge at a pressure of not less than 95 percent, and not more than 100 percent, of the design pressure of the container to which the vapor-relief valve is attached. Each vapor-relief valve shall be constructed to completely discharge

before the pressure exceeds 120 percent of the design pressure of the container to which the vapor-relief valve is attached.

(c) Pressure-relief valves shall not exhaust within or beneath any building or other confined area.

(d) Each pressure-relief valve discharge opening shall have a suitable rain cap or other device that allows free discharge of the vapor and prevents the entrance of water.

(e) Each pressure-relief valve shall be replaced if the valve meets any of the following conditions:

- (1) Fails to meet applicable requirements;
- (2) shows evidence of damage, corrosion, or foreign matter; and
- (3) does not have functional weep holes that permit moisture to escape.

(f) The discharge from each pressure-relief valve shall be vented according to one of the following:

(1) For vapor-relief valves, upward and away from where people could be located. The discharge shall flow in an unobstructed manner into the open air from a height of at least seven feet above the working area;

(2) for liquid-relief valves, downward with the opening positioned between six and 18 inches from the ground; or

(3) in any other manner that has been approved by the secretary or an authorized representative of the secretary.

(g) (1) Vent pipes or tubing used to channel releases from pressure-relief valves shall not be restricted or smaller in size than the pressure-relief valve outlet connection.

(2) Vent pipes may be connected and channeled into a common header if the cross-sectional area of the header is at least equal to the sum of the cross-sectional areas of each of the individual vent pipes.

(3) Unless a vent is directed toward the ground and rain will not be able to enter, each pressure relief valve discharge opening shall have a rain cap.

(4) If moisture accumulation could occur in a vent, suitable provision shall be made to drain the moisture from the vent. (Authorized by and implementing K.S.A. 2-1212; effective March 12, 2010.)

4-10-4e. Hose specifications. (a) Each hose with a diameter of at least $\frac{1}{2}$ inch used in ammonia service and subject to container pressure shall withstand at least 350 psig and shall have the following information etched, cast, or impressed in a

legible format at intervals not to exceed five feet along the hose surface:

- (1) The phrase "Anhydrous Ammonia";
- (2) the maximum working pressure of the hose; and

(3) the date the hose is to be removed from service.

(b) Each hose shall meet or exceed ASME schedule 80 specifications and have factory-installed ends designed for use with anhydrous ammonia.

(c) Each hose shall be replaced before or upon the expiration of the manufacturer's removal date.

(d) A hose shall be removed from service if a visual examination reveals any of the following:

(1) Illegibility of any of the markings required in subsection (a);

(2) cuts exposing reinforcing fabric;

(3) soft spots or bulges in the hose;

(4) a blistering or loose outer covering;

(5) kinking or flattening;

(6) stretch marks;

(7) slippage at any coupling; or

(8) any other damage that could compromise the integrity of the safe use of the hose. (Authorized by and implementing K.S.A. 2-1212; effective March 12, 2010.)

4-10-4f. Gauging devices. (a) Each container, except any container filled by weight, shall be equipped with a liquid-level gauging device designed for use with anhydrous ammonia and installed according to the manufacturer's instructions.

(b) Each gauging device shall be arranged so that the maximum liquid level to which the container may be filled is readily determinable.

(c) Each container shall be equipped with a fully operational pressure-indicating gauge with a dial graduated from 0-400 psig.

(d) Each gauging device shall have a design pressure at least equal to the design pressure of the container on which the device is used.

(e) Each device used to weigh or measure anhydrous ammonia shall meet all of the requirements of weighing and measuring devices in K.S.A. 83-201 et seq., and amendments thereto, and any implementing regulations adopted by the secretary. (Authorized by and implementing K.S.A. 2-1212; effective March 12, 2010.)

4-10-5. Tank trucks, semitrailers, and trailers for transportation of anhydrous ammonia. Each tank truck, semitrailer, and trailer,

except implements of husbandry, used for the transportation of anhydrous ammonia shall meet the following requirements: (a) Design pressure of containers.

(1) Each container shall be constructed in accordance with K.A.R. 4-10-2b and shall have a minimum design pressure of 250 psig.

(2) The shell or head thickness of each container shall not be less than $\frac{3}{16}$ of an inch.

(3) Baffles shall not be required for any cargo tank that is designed so that the container is loaded to capacity and discharged at one unloading point. All other containers having a capacity in excess of 500 gallons shall be equipped with suitable, semirigid baffle plates.

(4) Except for safety relief valves, liquid level gauging devices, and pressure gauges, all container openings shall be labeled to designate whether they communicate with liquid or vapor space. Labels may be located on valves.

(b) Mounting containers on truck.

(1) The container shall be attached to the cradle, frame, or chassis of a vehicle in a manner designed to withstand, in any direction, that amount of static loading equal to twice the weight of the container when filled and its attachments. The safety factor used shall be not less than four and shall be based on the ultimate strength of the material to be used.

(2) "Hold-down" devices, when used, shall anchor the container to the cradle, frame, or chassis in a suitable and safe manner that will not introduce an undue concentration of stresses.

(3) If any vehicle is designed and constructed so that cargo tanks constitute, in whole or in part, the stress member used in lieu of a frame, the cargo tanks shall be designed to withstand the stresses thereby imposed.

(4) All connections, including any hose installed in the bottom of a container, shall not be lower than the lowest horizontal edge of the trailer axle.

(5) While in transit, both ends of each transfer hose shall be secured.

(6) If the cradle and the container are not welded together, a suitable material shall be used between them to eliminate metal-to-metal friction.

(c) Container valves and appurtenances.

(1) Each container shall be equipped with a fixed liquid level gauge.

(2) Each container shall be equipped with a fully operational pressure-indicating gauge that has a dial graduated from 0-400 psi.

(3) Nonrecessed container fittings and appurtenances shall be protected against damage.

(4) Filling connections shall be provided with approved automatic valves to prevent backflow whenever the filling connection is broken.

(5) Except for safety relief valves and those connections specifically exempted by K.A.R. 4-10-2e(b) and K.A.R. 4-10-2e(d), all connections to containers shall be provided with approved excess-flow valves.

(6) All containers shall be equipped with an approved vapor return valve.

(d) Safety devices.

(1) The discharge from each safety relief valve shall be directed upward and away from the container and shall flow in an unobstructed manner into the atmosphere. Loosely fitting rain caps shall be used.

(2) Each unloading line shall be provided with an excess-flow valve at the point where the hose leaves the truck.

(e) Marking of containers. Each side and the rear of every container shall be conspicuously and legibly marked on a background of sharply contrasting color with the words "anhydrous ammonia" in letters at least four inches high and shall be placarded in compliance with applicable D.O.T. regulations.

(f) Piping, tubing, and fittings.

(1) All piping, tubing, and metering or dispensing devices shall be securely mounted and shall be protected against damage.

(2) Threaded pipe shall be extra heavy and comply with ASME schedule 80. Standard weight pipe that complies with ASME schedule 40 may be used if the joints are welded.

(g) Electrical equipment and lighting. Tank trucks, tank trailers, and tank semitrailers shall not be equipped with any artificial light other than electric light. Electric lighting circuits shall have suitable overcurrent protection.

(h) Trailers and semitrailers.

(1) Each trailer or semitrailer shall be equipped with a reliable system of brakes that comply with D.O.T. regulations.

(2) Each trailer or semitrailer shall have lights that comply with D.O.T. regulations.

(i) Safety equipment. All tank trucks, trailers, and semitrailers shall be equipped with the following:

(1) An approved gas mask that has current ammonia canisters having intact seals and that covers the entire face;

(2) one pair of rubber or suitable plastic protective gloves;

(3) one pair of rubber or suitable plastic protective boots;

(4) one rubber or suitable plastic protective slicker, or rubber or suitable plastic protective rain suit, or both;

(5) a pair of flexible-fitting, splash-proof goggles; and

(6) a container of not less than five gallons of clean water.

(j) Transfer of liquids.

(1) Each container shall be loaded by any of the following:

(A) Weight;

(B) a suitable liquid level gauging device; or

(C) a suitable meter.

(2) Pumps or compressors designed and installed in accordance with K.A.R. 4-10-2(j) and properly protected against physical damage may be mounted on ammonia tank trucks and trailers.

(k) Protection against collision. Each end-fitted tank truck and each semitrailer shall be provided with properly attached steel bumpers or a chassis extension to protect the tank, piping, valves, and fittings in case of collision.

(l) Conversion from other service to anhydrous ammonia. Tanks used for the transporting or storage of materials other than anhydrous ammonia shall be emptied of the material previously hauled, and the pressure in the tank shall be reduced to atmospheric pressure. If the material previously hauled in the container will be harmful to the anhydrous ammonia, then the tank shall be purged before being placed in anhydrous ammonia service, and all appurtenances shall be changed to comply with these regulations.

(m) Mobile containers. Except for tank trucks and semitrailers that comply with K.A.R. 4-10-5a, mobile containers shall be unloaded only at approved locations.

(n) Parking. Except in emergencies, tank trucks, semitrailers, or trailers transporting anhydrous ammonia shall not be parked in cities or in densely populated areas.

(o) Conversion of tanks from anhydrous ammonia to other service. Tanks used for the transportation of anhydrous ammonia shall be emptied and purged. Ammonia vapor shall be vented into an adequate portable supply of water and not into the atmosphere. An adequate supply of water shall be deemed to be five gallons of water per each one gallon of liquid ammonia. The aqueous ammonia solution resulting from the purging process shall be disposed of properly. (Authorized by and implementing K.S.A. 2-1212; effective Jan. 1, 1966; amended Jan. 1,

1971; amended Jan. 1, 1973; amended May 1, 1986; amended, T-87-9, May 1, 1986; amended May 1, 1987; amended May 1, 1988; amended April 13, 2001.)

4-10-5a. Tank trucks and semitrailers used for transport for infield delivery. Tank trucks and semitrailers used to transport anhydrous ammonia may be used to fill an implement of husbandry with a capacity of 20,000 pounds or more. These trucks and semitrailers shall be exempt from the requirements in K.A.R. 4-10-6b if the following requirements are met: (a) The tank truck or the semitrailer transferring the anhydrous ammonia or the implement of husbandry shall carry at least 100 gallons of water for whole-person rinsing if exposure to anhydrous ammonia occurs.

(1) The water shall be clearly identified for safety use and be readily accessible.

(2) The water shall be visibly clean, free of debris, and maintained in a liquid state.

(b) When an implement of husbandry is being loaded, at least 100 gallons of water shall be present at the delivery site for the venting of anhydrous ammonia and shall be used in accordance with K.A.R. 4-10-6a(k). This water shall be separate from the water specified in subsection (a) and shall be maintained in a liquid state.

(c) Any tank truck, semitrailer, and implement of husbandry subject to this regulation may be inspected by the department of agriculture.

(d) Each tank truck, semitrailer, and implement of husbandry subject to this regulation shall meet all requirements of this regulation before loading, transporting, or off-loading anhydrous ammonia.

(e) During the transfer of anhydrous ammonia, the nearest edge of the nearest vehicle, tank, and hose involved with the transfer shall be located according to the following:

(1) At least 50 feet from the edge of any property not owned or leased by the owner or operator of the permanent storage facility;

(2) at least 50 feet from any well or other point of diversion used as a source of drinking water;

(3) at least 50 feet from storage locations of flammables or explosives;

(4) at least 500 feet from the area accessible to the public within any public assembly area as defined in K.A.R. 4-10-1; and

(5) at least 50 feet from the surface of a public roadway. (Authorized by and implementing K.S.A. 2-1212; effective April 13, 2001; amended March 12, 2010.)

4-10-6. (Authorized by and implementing K.S.A. 2-1212; effective Jan. 1, 1966; amended Jan. 1, 1971; amended Jan. 1, 1973; amended May 1, 1986; revoked March 12, 2010.)

4-10-6a. Transfers. (a) Transfer to a permanent storage container shall be made only to a system displaying a current KDA-issued proof-of-inspection seal.

(b) Each container filled according to liquid level by any gauging method, other than a 85 percent fixed-length dip tube gauge, shall have a thermometer well and functional thermometer so that the internal liquid temperature can be easily determined and the amount of liquid in the container can be easily corrected to the volume the liquid would occupy at 60° F.

(c) A transfer shall not exceed one of the following:

(1) 85 percent of the container's capacity by volume; or

(2) 56 percent filling density for permanent storage containers or 54 percent filling density for implements of husbandry.

(d) The amount of anhydrous ammonia transferred shall be measured by one of the following:

(1) Weight;

(2) a liquid-level gauging device; or

(3) a flowmeter.

(e) Flammable gases, or gases that will react with anhydrous ammonia including air, shall not be used to transfer anhydrous ammonia.

(f) At least one attendant shall be present to monitor and control each transfer of anhydrous ammonia.

(g) Loading and unloading systems shall be protected to prevent a release if the transfer hose is severed.

(h) Each transfer shall occur only in the open air unless the transfer occurs within a structure specifically constructed for that purpose.

(i) (1) Only pumps and compressors designed for use with anhydrous ammonia shall be used.

(2) Liquid pumps and vapor compressors shall be designed for 250 psig working pressure.

(3) The pressure-actuated bypass valve and return piping shall be installed in accordance with the pump manufacturer's instructions.

(4) Each vapor compressor and liquid pump shall have an operational pressure gauge graduated from 0-400 psig at the inlet and at the outlet.

(5) Shutoff valves shall be installed within three feet of the inlet of a liquid pump and within two

feet of the discharge. With vapor compressors, the shutoff valves shall be located as close as is practical to the compressor connections.

(j) The piping used to transfer anhydrous ammonia from a tractor trailer or railroad tank car into a permanent storage container shall be equipped with an excess flow valve and backflow pressure valve, which shall be located as close as practical to where the piping connects with the transfer hose.

(k) (1) During the removal of anhydrous ammonia from a transfer hose, the anhydrous ammonia shall be vented into an adequate supply of water.

(2) For purposes of this regulation, an adequate supply of water shall mean at least five gallons of nonammoniated water for each gallon of liquid ammonia or fraction of a gallon that could be contained in the hose. (Authorized by and implementing K.S.A. 2-1212; effective March 12, 2010.)

4-10-6b. Transfers; tank cars and transport trucks; additional requirements. In addition to the transfer requirements in K.A.R. 4-10-6a, each transfer from a tank car or transport truck shall meet the following requirements:

(a) Except when loading into implements of husbandry or reactor units, tank cars and transport trucks shall be unloaded only through a permanently installed loading point and into a permanent storage container.

(b) A sign reading "Stop—Tank Car Connected" shall be displayed at the active end or ends of the siding while the tank car is connected for unloading.

(c) While tank cars are on a side track for unloading, the wheels at both ends shall be blocked on the rails. (Authorized by and implementing K.S.A. 2-1212; effective March 12, 2010.)

4-10-7. Implements of husbandry. In addition to the container requirements in K.A.R. 4-10-2e, 4-10-4a, 4-10-4b, 4-10-4d through 4-10-4f, and 4-10-6a, each system that is mounted on an implement of husbandry and is used for the transport of anhydrous ammonia shall meet the following requirements:

(a)(1) A stop or stops shall be attached to either the vehicle or the container to prevent the container from being dislodged from its mounting if the vehicle stops suddenly.

(2) A hold-down device shall anchor the container to the vehicle at one or more places on each side of the container.

(3) Each container mounted on a four-wheel trailer shall have the container's weight distributed evenly over both axles.

(4) If the cradle and the tank are not welded together, material shall be used between the cradle and the tank to eliminate metal-to-metal friction.

(b)(1) Each connection and appurtenance shall be protected from physical damage.

(2) A hose and connection installed in the bottom of a container shall not be lower than the lowest horizontal edge of the vehicle axle.

(3) The entire length of each hose shall be secured during transit in a manner that prevents damage to any portion of the hose or to the connections.

(4) When each hose is removed, the fittings shall be capped to prevent the accidental discharge of ammonia.

(c) Each implement of husbandry used for transportation shall meet the following requirements:

(1) Be securely attached to the pulling vehicle by use of a hitch pin or ball of proper size for the weight pulled. The hitch pin or ball shall be supplemented by two welded safety chains. Links of the safety chains shall be made of steel and shall have a breaking strength that exceeds the gross weight of the implement to which the chains are attached;

(2) be constructed, maintained, and utilized so as to follow in the path of the pulling vehicle and not swerve from side to side while being towed;

(3) be pulled at a speed not faster than is reasonable and safe under existing conditions;

(4) not be parked on any public street or other thoroughfare except in an emergency; and

(5) be equipped with at least five gallons of unfrozen and readily accessible water during the transport, transfer, or use of anhydrous ammonia, for use if exposure to anhydrous ammonia occurs.

(d) When any implement of husbandry is pulled on a public roadway, the following requirements shall be met:

(1) Each implement of husbandry with a capacity greater than 1,000 gallons shall be pulled as a single unit.

(2) When two implements of husbandry are pulled, the total capacity pulled shall be limited to not more than 2,000 gallons.

(3) No more than two implements of husbandry shall be pulled at the same time by the pulling vehicle. (Authorized by and implementing K.S.A. 2-1212; effective Jan. 1, 1966; amended Jan. 1,

1971; amended Jan. 1, 1973; amended May 1, 1986; amended March 12, 2010.)

4-10-8 and 4-10-9. (Authorized by K.S.A. 1970 Supp. 2-1212; effective Jan. 1, 1966; amended Jan. 1, 1971; revoked May 1, 1986.)

4-10-10. Safety. (a) The following personal safety equipment shall be available for use at each permanent storage facility and reactor unit when anhydrous ammonia is being transferred and when maintenance is being conducted on a system:

(1) A NIOSH-approved respirator that covers the entire face and has current ammonia canisters with intact seals;

(2) one pair of protective gloves made of rubber or any other material impervious to anhydrous ammonia;

(3) one pair of protective boots made of rubber or any other material impervious to anhydrous ammonia;

(4) one protective suit made of rubber or any other material impervious to anhydrous ammonia;

(5) a shower or at least 100 gallons of clean water to be used as safety water; and

(6) a pair of chemical-splash goggles.

(b) During each transfer, the attendant shall wear the personal protective equipment specified in paragraphs (a)(2) and (a)(6), at a minimum.

(c) An area of at least 10 feet around any container or system shall be kept free of combustibles. (Authorized by and implementing K.S.A. 2-1212; effective March 12, 2010.)

4-10-15. (Authorized by and implementing K.S.A. 2-1212; effective May 1, 1987; amended May 1, 1988; revoked March 12, 2010.)

4-10-16. Reactor units. (a) Each reactor unit shall operate only at a site that meets the following requirements:

(1) The nearest edge of the reactor unit shall be located at a distance in accordance with the following requirements:

(A) At least 50 feet from the edge of any property not owned or leased by the owner or operator of the permanent storage facility;

(B) at least 50 feet from any well or other point of diversion used as a source of drinking water;

(C) at least 50 feet from storage locations of flammables or explosives;

(D) at least 500 feet from any area accessible to the public as defined in K.A.R. 4-10-1; and

(E) not on or less than 50 feet from the surface of a public roadway.

(2) Each reactor unit shall be operated outside of municipalities or other densely populated areas unless the location has been approved in writing by the appropriate local governing body.

(b) During the transfer of anhydrous ammonia from railroad tank cars or transport trucks to a reactor unit for the manufacture of ammoniated solutions, the portable reactor unit shall be equipped with the following safety devices:

(1) Remote-controlled shutoff devices located on the tank car connection immediately preceding the hose attachment and on the discharge side of the pump; and

(2) a backflow check valve in the inlet line to the reactor unit.

(c) When anhydrous ammonia is transported to a stationary reactor unit in an implement of husbandry, the implement of husbandry shall be equipped with the following:

(1) A manually operated remote-controlled shutoff device on the discharge valve immediately preceding any hose attachments; and

(2) a backflow check valve installed in the rigid piping leading to the reactor unit at the point of connection for the transfer hose.

(d) The implement of husbandry shall be monitored at all times during the reacting process.

(e) The transfer hose shall be disconnected from the reactor unit when the reactor unit is not in operation.

(f) The required air-operated or manually operated remote-controlled shutoff device shall be tested before each production run of ammoniated solutions. (Authorized by and implementing K.S.A. 2-1212; effective May 1, 1986; amended May 1, 1988; amended Jan. 1, 1989; amended March 12, 2010.)

4-10-17. (Authorized by and implementing K.S.A. 2-1212; effective May 1, 1988; revoked March 12, 2010.)

Article 11.—EGGS

4-11-1. (Authorized by K.S.A. 2-2504; effective Jan. 1, 1966; revoked May 1, 1982.)

4-11-2. Definitions. (a) “Advertisement” shall mean any of the following:

- (1) Placard;
- (2) handbill;
- (3) sign;
- (4) newspaper advertisement;

(5) radio, internet, or television advertisement; or
(6) any other means of calling the consumer’s attention to eggs.

(b) “Carton” shall mean a container of 18 eggs or less.

(c) “Case,” for inspection fee purposes, shall mean a container of more than 15 dozen and not more than 30 dozen eggs.

(d) “Consumer” shall have the meaning specified in K.S.A. 2-2501, and amendments thereto.

(e) “Eggs” shall have the meaning specified in K.S.A. 2-2501, and amendments thereto.

(f) “Eggs of current production” shall mean eggs that are subject to the Kansas egg law and have been held in refrigerated storage for not more than 30 days.

(g) “Fresh,” when used to describe eggs, shall mean eggs of current production that do not possess any undesirable odors or flavors.

(h) “Half case,” for inspection fee purposes, shall mean a container of more than one dozen and not more than 15 dozen eggs.

(i) “Lot” shall mean all of the eggs that are located at any place of business where eggs are held and that are labeled with the same grade, size, and pack date from the same packer, the person for whom the eggs are packed, or, if the eggs have been repacked, the retailer.

(j) “Person” shall have the meaning specified in K.S.A. 2-2501, and amendments thereto.

(k) “Point of first purchase or assembly” shall mean any place of business of any person or any agent of the person purchasing or assembling eggs from the producer.

(l) “Secretary” shall mean the secretary of agriculture or the secretary’s authorized representative. (Authorized by K.S.A. 2-2504 and 74-531; implementing K.S.A. 2-2501, as amended by L. 2006, Ch. 90, §1, 2-2504, and 2-2505, as amended by L. 2006, Ch. 90, §4; effective Jan. 1, 1966; amended Jan. 1, 1972; amended May 1, 1982; amended June 25, 2004; amended Feb. 9, 2007.)

4-11-3. Egg containers; requirements for marking and labeling. (a) A mark or label shall be deemed false or deceptive if any of the following conditions is met:

(1) The eggs in the container are not of the quality or size indicated on the container.

(2) The mark or label bears a statement that is false or misleading.

(3) The mark or label bears a qualifying word with reference to size or quality that is misleading.

(4) The mark or label bears the word “fresh,” unless the eggs are of “A” or “AA” quality.

(b) Each person who has not been issued a permit shall use the inspection fee stamp on each container to indicate the quality and size of the eggs and to indicate that the inspection fee has been paid on the contents.

(c) For cases and half cases, the marks or labels shall be located on either the outside surface of the top or on either end of the container. (Authorized by K.S.A. 2-2504 and 74-531; implementing K.S.A. 2-2502, as amended by L. 2006, Ch. 90, §2, and 2-2503, as amended by L. 2006, Ch. 90, §3; effective Jan. 1, 1966; amended Jan. 1, 1969; amended Jan 1, 1972; amended May 1, 1982; amended June 25, 2004; amended Feb. 9, 2007.)

4-11-4. False advertisement. An advertisement shall be considered false or deceptive if it bears any reference to size or quality that is untrue or deceptive; or contains any qualifying words with reference to size or quality which are in any way misleading; or if there is any intent, design or purpose not to sell the eggs as advertised and priced therein. Eggs advertised in a manner which indicates price shall also indicate the full, correct and unabbreviated designation of size and quality to which the price refers. The term “fresh” shall be considered false and misleading except when used in connection with grades “AA” and “A,” and the term “fresh fancy” shall be considered false and misleading except when used in connection with eggs produced and marketed under a state or federal-state quality controlled program. (Authorized by K.S.A. 2-2504; effective Jan. 1, 1966; amended Jan. 1, 1972.)

4-11-5. (Authorized by K.S.A. 2-2502, 74-531; effective Jan. 1, 1966; amended Jan. 1, 1969; amended Jan. 1, 1972; revoked May 1, 1982.)

4-11-6. (Authorized by K.S.A. 2-2504; effective Jan. 1, 1966; amended Jan. 1, 1972; revoked June 25, 2004.)

4-11-7. (Authorized by K.S.A. 2-2504; effective Jan. 1, 1966; amended Jan. 1, 1972; revoked June 25, 2004.)

4-11-8. Sampling requirements. The minimum number of samples specified in the following table shall be drawn for inspection according to the size of each lot. At least 100 eggs shall be examined for each sample case or half case, pursuant to K.S.A. 2-2505 and amendments thereto.

For each lot consisting of fewer than 100 eggs, all eggs in that lot shall be examined.

Size of lot (cases or half cases)	Minimum number of samples to be drawn (cases or half cases)
1.....	1
2 through 10	2
11 through 25	3
26 through 50	4
51 through 100	5
101 through 200	8
201 through 300	11
301 through 400	13
401 through 500	14
501 through 600	16

For each additional 50 cases or half cases or fraction thereof, in excess of 600 cases, one additional case or half case shall be included in the sample. (Authorized by K.S.A. 2-2504 and 2-2505; implementing K.S.A. 2-2505; effective Jan. 1, 1966; amended June 25, 2004.)

4-11-9. Inspection fee. (a) Inspection fee stamps. Inspection fee stamps may be purchased from the secretary. Each minimum order shall consist of 1,000 carton stamps, 100 case or half-case stamps, or a combination of these.

(b) Cancellation of inspection fee stamp. The inspection fee stamp used on cartons, half cases, and cases shall be dated, which shall serve to cancel the stamp. (Authorized by K.S.A. 2-2504; implementing K.S.A. 2-2504 and 2-2507; effective Jan. 1, 1966; amended June 25, 2004.)

4-11-10. (Authorized by K.S.A. 2-2502, 74-531; effective Jan. 1, 1966; amended Jan. 1, 1969; revoked May 1, 1982.)

4-11-11. (Authorized by K.S.A. 2-2504; effective Jan. 1, 1966; revoked May 1, 1982.)

4-11-12. (Authorized by K.S.A. 2-2502, 74-531; effective Jan. 1, 1966; amended Jan. 1, 1969; revoked May 1, 1982.)

4-11-13. (Authorized by K.S.A. 2-2502, 74-531; effective Jan. 1, 1966; revoked May 1, 1982.)

4-11-14. Adoption by reference. In the “United States standards, grades, and weight classes for shell eggs,” AMS 56, published by the

USDA's agricultural marketing service and effective July 20, 2000, sections 56.200 through 56.217, except for section 56.215, are hereby adopted by reference. These sections shall apply to all eggs regulated pursuant to the Kansas egg law. Copies shall be available from the agricultural commodities assurance program of the Kansas department of agriculture, Topeka, Kansas. (Authorized by K.S.A. 2-2504 and 74-531; implementing K.S.A. 2-2502, 2-2504, and 74-531; effective May 1, 1982; amended June 25, 2004.)

4-11-15. License fee. The annual fee for an egg license shall be \$5.00. (Authorized by K.S.A. 2-2504; implementing K.S.A. 2-2508, as amended by L. 2006, Ch. 90, § 6; effective, T-4-11-2-06, Nov. 2, 2006; effective Feb. 9, 2007.)

Article 12.—PEST CONTROL

4-12-1 to 4-12-6. (Authorized by K.S.A. 1965 Supp. 2-2403; effective Jan. 1, 1966; revoked May 1, 1982.)

Article 13.—PESTICIDES

4-13-1. Definitions. For the purposes of this article, the following terms shall have the meanings specified in this regulation: (a) "Alternative treatment" means any method of pest control service performed for the purpose of controlling termites, other than those specified in subsections (b), (c), (d), (e), (g), and (i). This term shall include nonchemical methods of control and above-ground pesticide application.

(b) "Bait treatments" and "baiting system" mean the installation, servicing, and monitoring of termite bait stations and termite monitoring stations for the purpose of controlling termites within a structure. The placement of monitoring stations without a written agreement to periodically inspect the monitoring stations and replace monitoring stakes or other materials with a pesticide shall not constitute a bait treatment or baiting system.

(c)(1) "Complete soil treatment" and "complete treatment" mean a pesticide application to soil for the control of termites and shall include both of the following:

(A) Applying pesticide at the concentration, rate, and dosage required by the product labeling in such a manner that a chemical barrier is formed at all sites of potential termite entry into the structure from the soil, including the interior and ex-

terior foundation walls and cross walls; the area around any support piers, expansion joints, and cracks in concrete slabs; any void areas in masonry elements; and any other structural components that extend below soil grade; and

(B) removing wood scrap, paper scrap, and all other cellulose-containing debris from any accessible areas of crawl spaces under buildings being treated.

(2) Applications to wooden construction elements, the use of baits, and the use of alternative methods of control shall not be represented as complete treatments.

(d) "Limited soil treatment" and "limited treatment" mean a pesticide application that is intended to provide protection from termite infestation to the entire structure, but is not designed to provide a continuous barrier of pesticide to the soil, including treating only the exterior perimeter of a slab structure.

(e) "Partial soil treatment" and "partial treatment" mean applications of pesticide for soil treatment that are not intended to provide protection from termite infestation for the entire structure treated.

(f) "Restricted-use pesticide" means any pesticide product registered by the secretary under the provisions of the agricultural chemical act of 1947, K.S.A. 2-2204 and amendments thereto, that is either labeled as a restricted-use pesticide by the federal agency responsible for the classification or designated as a restricted-use pesticide by the secretary.

(g) "Spot treatment" means remedial applications of pesticide to control termites at a specific location within a structure that are not intended to control termites at any location beyond the treatment area.

(h) "Stump treatment" means the application of pesticide to the cut stump of any tree or other woody plant to prevent regrowth.

(i) "Wood treatment" means the application of pesticide to wooden structural components, including joints, voids, galleries, and chambers, that are present within wooden construction elements. (Authorized by and implementing K.S.A. 2-2467a; effective, E-78-26, Sept. 7, 1977; effective May 1, 1978; amended July 18, 2003; amended Feb. 29, 2008.)

4-13-2. Pesticide business license application. Each application for issuance or renewal of a business license shall provide the following information in addition to that required by K.S.A.

2-2440 (b) (1) through (3), and amendments thereto: (a) The home address and birth date of each owner, officer, representative, and any resident agent;

(b) the name of any other state in which the applicant holds or has held a pesticide business license within the last five years and a list of any such license that has been denied, modified, revoked, suspended, or surrendered;

(c) for each business location serving Kansas, the business name and street address of the business and the name of the certified applicator or other person responsible for pesticide business activity at that location. "Business location" shall include all locations where records of application are maintained, where application equipment and pesticide materials are stored, and from which customers are served;

(d) the name of each certified commercial applicator serving the applicant, for each business location;

(e) the name, home address, birth date, and driver's license number of each non-certified employee who applies pesticides for the applicant. If the applicant's uncertified commercial applicator does not have a driver's license, then the number assigned to any federal or state government-issued identification card shall be provided for that employee;

(f) the categories and subcategories in which the applicant business will operate;

(g) the signature and title of the applicant or authorized representative; and

(h) the date of submission of the application. (Authorized by and implementing K.S.A. 2008 Supp. 2-2440, as amended by L. 2009, Ch. 128, §11, and K.S.A. 2-2467a; effective, E-78-26, Sept. 7, 1977; effective May 1, 1978; amended July 18, 2003; amended Feb. 5, 2010.)

4-13-3. Categories and subcategories of qualification for the licensing of pesticide businesses and certification of commercial applicators. (a) The categories and subcategories of qualification for licensing of pesticide businesses and certification of commercial applicators shall include the following:

(1) Category 1: agricultural pest control. This category shall include any commercial application of pesticide in the production of agricultural plants or animals.

(A) Subcategory 1A: agricultural plant pest control. This subcategory shall include any commercial application of pesticide on grasslands and

noncrop agricultural lands, and in the production of agricultural crops, including tobacco, peanuts, cotton, feed grains, soybeans and forage, vegetables, small fruits, tree fruits, and nuts.

(B) Subcategory 1B: agricultural animal pest control. This subcategory shall include any commercial application of pesticide to places on, or in which, animals are confined and on animals, including beef cattle, dairy cattle, swine, sheep, horses, goats, poultry, and livestock. This subcategory shall include any doctor of veterinary medicine who applies pesticides for hire, engages in the large-scale use of pesticides, or is publicly held out as a pesticide applicator.

(C) Subcategory 1C: wildlife damage control. This subcategory shall include any commercial application of pesticide for the management and control of wildlife in rangeland and agricultural areas. Wildlife shall mean nondomesticated vertebrate species that hinder agricultural and rangeland production.

(D) Subcategory 1D: stump treatment. This subcategory shall be limited to the commercial application of pesticide for the treatment of cut stumps to control resprouting in pastures, rangeland, or lands held in conservation reserve. Nothing in this subcategory shall prohibit stump treatment by pesticide businesses and commercial applicators in other categories and subcategories that include pesticide application to cut stumps.

(2) Category 2: forest pest control. This category shall include any commercial application of pesticide in forests, forest nurseries, and forest seed-producing areas.

(3) Category 3: ornamental and turf pest control. This category shall include any commercial application of pesticide in the maintenance of ornamental trees, shrubs, flowers, and turf.

(A) Subcategory 3A: ornamental pest control. This subcategory shall include any commercial application of pesticide to control pests in the maintenance and production of ornamental trees, shrubs, and flowers. This subcategory shall not include those pests included in subcategory 3C.

(B) Subcategory 3B: turf pest control. This subcategory shall include any commercial application of pesticide to control pests in the maintenance and production of turf.

(C) Subcategory 3C: interior landscape pest control. This subcategory shall include any commercial application of pesticide to control pests in the production and maintenance of houseplants and other indoor ornamental plants kept or locat-

ed within structures occupied by humans, including houses, apartments, offices, shopping malls, and other places of business and dwelling places.

(4) Category 4: seed treatment. This category shall include any commercial application of pesticide on seeds.

(5) Category 5: aquatic pest control. This category shall include any commercial application of pesticide to standing or running water. Applicators engaged in public health pest control and health-related pest control activities shall be excluded.

Subcategory 5S: sewer root control. This subcategory shall be limited to any commercial application of pesticide for the control of roots in sewer lines and septic systems.

(6) Category 6: right-of-way pest control. This category shall include any commercial application of pesticide to control vegetation in the maintenance of public roads, electric power lines, pipelines, railway rights-of-way, industrial sites, parking lots, or other similar areas.

(A) This category shall include the types of commercial pesticide application specified in subcategory 7C.

(B) This category shall not include those types of commercial pesticide application specified in paragraph (a)(9).

(7) Category 7: industrial, institutional, structural, and health-related pest control.

(A) This category shall include any commercial application of pesticide for the protection of stored, processed, or manufactured products. This category shall also include any commercial application of pesticide in, on, or around the following:

(i) Food handling establishments, human dwellings, institutions including schools and hospitals, and any other similar structures and the areas immediately adjacent to those structures; and

(ii) industrial establishments including warehouses, grain elevators, food processing plants, and any other related structures and adjacent areas.

(B) Subcategory 7A: wood-destroying pest control. This subcategory shall include any commercial application of pesticide in the control of termites, powder post beetles, wood borers, wood rot fungus, and any other wood-destroying pest.

(C) Subcategory 7B: stored products pest control. This subcategory shall include any commercial application of pesticide for the control of pests in stored grain and food products.

(D) Subcategory 7C: industrial weed control. This subcategory shall include any commercial application of pesticide for the control of pest weeds.

(E) Subcategory 7D: health-related pest control. This subcategory shall include any commercial application of pesticide in health programs for the management and control of terrestrial and aquatic pests having medical or public health significance.

(F) Subcategory 7E: structural pest control. This subcategory shall include any commercial application of pesticide in a structure for the control of any pest not covered in subcategories 7A and 7B.

(G) Subcategory 7F: wood preservation and wood products treatment. This subcategory shall include any commercial application of pesticide made to extend the life of wooden poles, posts, crossties, and other wood products to preserve or protect them from damage by insects, fungi, marine organisms, weather deterioration, or other wood-destroying agents.

(8) Category 8: public health pest control. This category shall apply to qualification for commercial certification of employees of government agencies, including state, federal, and other governmental agencies, who apply or supervise the application of a restricted-use pesticide for the management and control of terrestrial and aquatic pests having medical or public health significance.

(9) Category 9: regulatory pest control. This category shall apply to qualification for commercial certification of employees of government agencies, including state, federal, and other governmental agencies, who apply or supervise the application of a restricted-use pesticide in the control of federally regulated and state-regulated pests.

(A) Subcategory 9A: noxious weed control. This subcategory shall include qualification for commercial certification of employees of state, federal, and other governmental agencies who use or supervise the use of a restricted-use pesticide in the control of weed pests regulated under the Kansas noxious weed law.

(B) Subcategory 9B: regulated pest control. This subcategory shall include qualification for commercial certification of employees of state, federal, and other governmental agencies who use or supervise the use of a restricted-use pesticide in the control of federally regulated or state-regulated pests not covered in subcategory 9A.

(10)(A) Category 10: demonstration and research pest control. This category shall include the following:

(i) Those persons who demonstrate to the public the proper techniques for application and use

of restricted-use pesticides or who supervise such a demonstration. These persons shall include extension specialists, county agents, commercial representatives who demonstrate pesticide products, and persons who demonstrate, in public programs, methods of pesticide use;

(ii) those persons who use or supervise the use of restricted-use pesticides in conducting field research that involves the use of pesticides. These persons shall include state, federal, and commercial employees and other persons who conduct field research regarding or utilizing restricted-use pesticides; and

(iii) qualified laboratory personnel using restricted-use pesticides while engaged in pesticide research in areas where environmental factors beyond the control of laboratory personnel, including wind, rain, and similar factors, can affect the safe use of the pesticide or can cause the pesticide to have an adverse impact on the environment.

(B) The persons listed in paragraphs (a)(10)(A)(ii) and (iii) shall not be considered exempt from certification under the provisions of K.S.A. 2-2441a(d) and amendments thereto.

(b) Each pesticide business shall be licensed in all categories in which the pesticide business makes commercial pesticide applications and shall employ one or more persons who maintain commercial certification in each subcategory in which the pesticide business makes commercial pesticide applications.

(c) Each state, federal, and other governmental agency shall be registered in all categories and subcategories in which the agency makes commercial pesticide applications. (Authorized by K.S.A. 2008 Supp. 2-2440, as amended by L. 2009, Ch. 128, §11, and K.S.A. 2-2467a; implementing K.S.A. 2008 Supp. 2-2444a and K.S.A. 2-2467a; effective, E-78-26, Sept. 7, 1977; effective May 1, 1978; amended Feb. 29, 2008; amended Feb. 5, 2010.)

4-13-4. Written statement of service by business.

(a) Any written statement of services or contract shall comply with the provisions of K.A.R. 4-13-4a and shall be presented to the customer before or upon completion of the work covered by said written statement or contract. Provided, that where the work covered involves two or more periodic applications over a specified period of time, such as monthly service calls for one year, the written statement shall be presented to the customer upon completion of the initial

treatment. Supplemental statements setting forth the application date, each pesticide used, including the quantity applied, the wind direction and velocity, if any, and the applicator's signature shall be presented to the customer following each periodic application.

(b) This regulation shall be in force and effect from and after January 1, 1991. (Authorized by K.S.A. 1988 Supp. 2-2467a as amended by L. 1989, Ch. 6, § 16, implementing K.S.A. 2-2455 as amended by L. 1989, Ch. 6, § 15; effective, E-78-26, Sept. 7, 1977; effective May 1, 1978; amended Jan. 1, 1991.)

4-13-4a. Requirements for written contract or statement of services by business.

(a) Each written contract or statement of services issued by a pesticide business licensee shall meet the following requirements, in addition to the requirements of K.S.A. 2-2455 and amendments thereto:

(1) The address of the pesticide business licensee shall include the street address of the pesticide business licensee's office that provides the pest control service for the named customer.

(2) The address of the customer shall include either the street address or the rural route and box number, whichever is applicable.

(3) The name of each pest to be controlled shall be stated in terms of the common name for each pest or, in the alternative, shall be stated in terms of the scientific name for each pest.

(4) Notwithstanding the requirements of paragraph (3) of this subsection, if the pest to be controlled is a weed, the name of the pest may be stated as grassy or broadleaf weeds.

(b)(1) For each pesticide applied, the statement of services shall include the complete product name of the pesticide, as the name appears on the label, and the pesticide's EPA registration number. If the pesticide applied does not have an EPA registration number, the Kansas registration number shall be provided.

(2) The concentration of the pesticide shall include the percent of the active ingredient in the pesticide mixture or solution actually applied. The quantity of pesticide mixture actually applied shall be stated in gallons or other appropriate volumetric unit if the pesticide applied has been diluted. For granular pesticides or other pesticides that are applied undiluted, the quantity applied shall be expressed in terms of pounds or other appropriate units using dry weight. Rates of application shall be expressed in terms of a unit volume or

weight of pesticide per unit of length, surface area, or volume corresponding to the mixing directions shown on the pesticide's label.

(3) Each statement of services shall include wind direction and velocity, except that this requirement shall not apply when the pesticide application is made in any of the following manners or locations or for any of the following reasons:

- (A) Inside an enclosed structure;
- (B) to control structural pests by use of a barrier treatment within 10 feet of the exterior of a building;
- (C) for seed treatment;
- (D) by direct injection of the pesticide into the soil or other substrate;
- (E) by direct application to the soil in a trench around a structure; or
- (F) by use of baiting stations, including the installation, servicing, and monitoring of the stations.

(c) Whenever any pesticide mixture or solution is applied at a dosage, concentration, or frequency of application that is less than that specified on the pesticide's label or labeling, at least one of the following requirements shall be met:

(1) The written statement of services shall state the following, or its equivalent, in a conspicuous manner: "PESTICIDE APPLIED AT LESS THAN LABEL RATE."

(2) In addition to or in lieu of the requirements of paragraph (c)(1), the licensee shall provide the customer with information about the conditions under which applications may be made at less than label dosage, concentration, or frequency, before the time of the initial application. The licensee shall obtain the customer's written acceptance of the use of these methods in writing before the initial application, which may be incorporated into any statement of service or contract, or both.

(d) Whenever any pesticide is applied in office buildings, apartment houses, or other multiple-tenant structures, the pesticide business licensee shall make available to the owner or manager of the structure information concerning any pesticide applied in the structure. In addition, information regarding any specific residence or business that has been treated with any pesticide shall be made available, upon the tenant's request, to the tenant of the residence or business treated.

(e) Whenever any pesticide is applied for the purpose of controlling termites, powder-post beetles, wood borers, wood-rot fungus, or any other

wood-destroying pest, the licensee shall meet the following requirements:

(1) The diagram required by K.S.A. 2-2455(b)(3), and amendments thereto, shall clearly represent the structure being treated and indicate the location of basement areas, crawl spaces, concrete slab floors, and any concrete slabs adjacent to the outside of the foundation walls of the structure.

(2) If the pesticide application is not for a complete treatment of the entire structure, as defined by K.A.R. 4-13-1 and K.A.R. 4-13-7, the written statement of services shall state the following in a conspicuous manner: "LIMITED TREATMENT," "PARTIAL TREATMENT," "SPOT TREATMENT," "BAITING SYSTEM," "ALTERNATIVE TREATMENT," or other equivalent statement. Each pesticide application that is not for a complete treatment of the entire structure shall show the areas of treatment on the representative diagram. If the pesticide application is not for a complete treatment of the entire structure due to exigent circumstances, in addition to requirements listed above, the exigent circumstances shall be described on the statement of services.

(3) Each statement of services for termite control involving the use of baiting systems shall clearly state whether the pest control service performed consists of placement or inspection, or both, of baiting material that contains pesticide or consists of placement or inspection, or both, of monitoring stations that do not contain pesticide. Each statement of services shall include records of the dates of placement and inspection and the locations of all bait stations and monitoring stations. Diagrams of the structure being treated shall clearly show the locations of all monitors and baits.

(4) The dates of inspection or inspection intervals and the conditions under which monitoring materials will be replaced by baiting materials shall be stated in any contract for service or statement of services. Each licensee shall maintain records of the dates of placement and inspection and the locations of bait stations and monitoring stations. (Authorized by K.S.A. 2-2467a; implementing K.S.A. 2-2455; effective March 26, 1990; amended July 18, 2003.)

4-13-5. Written statement of service by certified commercial applicator not acting for business. (a) Any certified commercial applicator who is not employed by or otherwise acting for a pesticide business licensee shall prepare a

written statement of work performed for each application of restricted use pesticides either made by or made under the direct supervision of the certified commercial applicator. Each such written statement of work performed shall set forth the following information:

(1) The name and address of the certified commercial applicator;

(2) All information required by K.S.A. 2-2455 as amended and supplemented and K.A.R. 4-13-4a except the name and address of the pesticide business licensee.

(b) This regulation shall be in force from and after January 1, 1991. (Authorized by and implementing K.S.A. 1988 Supp. 2-2467a as amended by L. 1989, Ch. 6, §16; effective, E-78-26, Sept. 7, 1977; effective May 1, 1978; amended Jan. 1, 1991.)

4-13-6. Marking of vehicles. Each business licensee with a license in category 3 or 7, as specified in K.A.R. 4-13-3, shall mark any vehicle used in the application of pesticides, including any vehicle used in transporting pesticide application equipment to an application site. Each licensee shall place the business name or registered trade name and the pesticide business license number on each side of the vehicle, with letters and numbers not less than 1½ inches in height and in a color contrasting from that of the vehicle. (Authorized by K.S.A. 2-2467a; implementing K.S.A. 2-2456; effective, E-78-26, Sept. 7, 1977; effective May 1, 1978; amended July 18, 2003.)

4-13-7. Termite control application procedures. (a) Except as provided in subsection (c), each structure shall be treated by applying pesticide at the rate, concentration, and dosage specified on the product label in a manner that provides wooden construction elements with protection from termites in the entire structure.

(b) Wood, paper scrap, cardboard scrap, and other cellulose-containing debris shall be removed from any accessible crawl space under the building to be treated.

(c) An application procedure different from that required by subsection (a) may be employed by a certified applicator. When a different application procedure is used, the pest control operator shall furnish adequate control and shall state on the required written statement the application procedure used. These methods of control shall be requested or agreed to by the customer in writing

before completion of application. The applicator shall state, on the required statement of services and diagram, the application procedures used and how the procedures differ from the requirements of subsection (a). (Authorized by and implementing K.S.A. 2-2467a and K.S.A. 2-2471; effective, E-78-26, Sept. 7, 1977; effective May 1, 1978; amended July 18, 2003.)

4-13-8. Surety bond requirement. Any surety bond submitted by a pesticide business licensee to comply with the provisions of K.S.A. 2-2448 as amended shall provide bond coverage of not less than \$6,000. The bond shall be effective for a period not to exceed one year and shall extend to December 31 of the licensing year. (Authorized by K.S.A. 1988 Supp. 2-2467a as amended by L. 1989, Ch. 6, §16; implementing K.S.A. 2-2448 as amended by L. 1989, Ch. 6, §17; effective, E-78-26, Sept. 7, 1977; effective May 1, 1978; amended May 1, 1983; amended March 26, 1990.)

4-13-9. Report of address, name, or personnel change by business. (a) Each pesticide business licensee shall provide the secretary with written notification of any modification or change to the initial application regarding the business address or business name and of any change in service personnel involved in the application of pesticides. Each notification shall be provided within 30 days of the modification or change made by the pesticide business licensee. Notification shall be required for the following:

(1) Hiring or terminating, or both, any employees involved in the application of pesticides;

(2) making any change in certification or technician status, or both; and

(3) making any change in the manager, operator, authorized representative, or resident agent.

(b) The pesticide business licensee shall submit with each such notification the required \$15.00 fee for each previously unreported uncertified individual employed to apply pesticides for a total of more than 10 days or for a period of five or more consecutive days during any 30-day period.

(c) Each notification shall include the full name, home address, birth date, and social security number of each applicator of pesticides listed who is a certified applicator or a registered pest control technician.

(d) Each notification shall also include the full name, home address, birth date, and driver's license number of each applicator of pesticides list-

ed who is not a certified commercial applicator of pesticides or a registered pest control technician.

(e) The \$15.00 fee shall revert to \$10.00 on and after July 1, 2015, unless this date is modified by statute. (Authorized by K.S.A. 2-2467a; implementing K.S.A. 2008 Supp. 2-2440, as amended by L. 2009, Ch. 128, §11; effective, E-78-26, Sept. 7, 1977; effective May 1, 1978; amended, T-88-46, Nov. 10, 1987; amended May 1, 1988; amended, T-4-6-27-02, July 1, 2002; amended Oct. 25, 2002; amended Feb. 29, 2008; amended Feb. 5, 2010.)

4-13-10. Application for governmental agency registration. An application for a governmental agency registration or for renewal of a governmental agency registration shall provide the following information in addition to that required by K.S.A. 2-2440 (e):

(1) If the applicant is a township, the county in which said township is located.

(2) Names of certified applicators and uncertified persons working under their supervision who will work under the governmental agency registration being applied for.

(3) Signature and title of the official submitting the application.

(4) Date the application is submitted. (Authorized by K.S.A. 1977 Supp. 2-2467a; effective, E-78-26, Sept. 7, 1977; effective May 1, 1978.)

4-13-11. (Authorized by K.S.A. 1987 Supp. 2-2467a; implementing K.S.A. 2-2444a and K.S.A. 1987 Supp. 2-2467a; effective, E-78-26, Sept. 7, 1977; effective May 1, 1978; amended May 1, 1985; amended, T-87-39, Nov. 19, 1986; amended May 1, 1987; amended Jan. 1, 1989; revoked Feb. 29, 2008.)

4-13-12. Age restriction for certification.

To be eligible for certification as a commercial applicator of restricted use pesticides, an individual shall be eighteen (18) years of age or older. (Authorized by K.S.A. 1977 Supp. 2-2467a; effective, E-78-26, Sept. 7, 1977; effective May 1, 1978.)

4-13-13. Commercial applicator examinations. (a) Each general core examination for commercial applicator certification shall test the applicant's knowledge in the following subjects, in addition to testing the applicant's knowledge in those subjects specified in K.S.A. 2-2443a (a) through (h), and amendments thereto:

(1) The general format and terminology of pesticide labels and labeling, the instructions, warn-

ings, symbols and other information appearing on pesticide labels, the classification designation on pesticide labels, and the necessity of using each pesticide in a manner that is consistent with the information and instructions on its label;

(2) safety factors, including pesticide toxicity; types and causes of pesticide accidents; precautionary measures that are necessary to guard against injury to the applicator and other individuals; symptoms of pesticide poisoning; first aid and other procedures to follow in case of a pesticide accident; proper identification, storage, transportation of, mixing, and handling of pesticides; prevention of and cleanup of pesticide spills; and disposal of pesticide containers;

(3) the potential for damage to the environment from use and misuse of pesticides as influenced by factors including types of terrain, soil, and other substrata and drainage patterns;

(4) pest development and biology relevant to pest identification and control;

(5) the types of pesticides and pesticide formulations used, compatibility, synergism, persistence and animal and plant toxicity of pesticides, practices that cause pesticide resistance, and dilution procedures;

(6) the types of equipment used and the limitations of each and equipment use, maintenance, and calibration;

(7) proper application techniques for various pesticides and formulations of pesticide in given situations, relationship of placement of pesticides to proper use, unnecessary pesticide use and pesticide misuse, and prevention of pesticide loss into the environment through drift and other means; and

(8) requirements that must be met by a certified applicator in supervising noncertified applicators of restricted pesticides, including practical knowledge of federal and state supervisory requirements, requirements found on labeling, requirements regarding verifiable instruction of the noncertified applicator and availability of certified applicator during application, and any added restrictions that may be imposed for specific pesticides through labeling, including the required physical presence of the supervising applicator during the application.

(b) As specified in this subsection, each category or subcategory examination for commercial applicator certification shall test the applicant's practical knowledge of the category or subcategory of certification in which the applicant wishes to be certified, in addition to testing the applicant's

practical knowledge in those subjects specified in K.S.A. 2-2443a and amendments thereto.

(1) Agricultural pest control.

(A) Each examination for agricultural plant pest control applicators shall test the applicant's practical knowledge of the crops grown in Kansas and the specific pests commonly associated with these crops, potential soil and water damage, preharvest intervals, reentry intervals, phytotoxicity, environmental contamination, nontarget injury, and potential adverse effects on the community that are related to the use of restricted pesticides in agricultural areas.

(B) Each examination for agricultural animal pest control applicators shall test the applicant's practical knowledge of Kansas agricultural animals and their pests, specific pesticide toxicity levels, residue potential and relative hazards associated with various pesticide formulations, application techniques, ages of animals, and the stress and extent of treatment.

(C) Each examination for wildlife damage control applicators shall test the applicant's practical knowledge of vertebrate pest species and damage associated with each species, methods useful in damage prevention, products used in damage control, the potential for direct poisoning of nontarget species, the potential for secondary poisonings, effects upon threatened and endangered species, specific pesticide toxicity and residue levels, and methods of application necessary to minimize hazards to humans, the environment, pets, and domestic animals.

(D) Each examination for stump treatment applicators shall test the applicant's practical knowledge of stump control methods, limited area applications, and the potential adverse effects of pesticides.

(2) Forest pest control. Each examination for forest pest control applicators shall test the applicant's practical knowledge of types of forests, forest nurseries and forest seed production in Kansas and of the pests associated with them, pest cycles and population dynamics as they influence control programming, biotic agents and their relative vulnerability to pesticides, and proper use of specialized equipment as it relates to adjacent land use.

(3) Ornamental and turf pest control.

(A) Each examination for ornamental pest control applicators shall test the applicant's practical knowledge of pest and pesticide problems associated with the production and maintenance of ornamental trees, shrubs and flowers in Kansas,

potential phytotoxicity problems related to the wide variety of plants in treated areas, pesticide persistence beyond the intended period of control, and application methods that minimize hazards to humans, pets, and domestic animals.

(B) Each examination for turf pest control applicators shall test the applicant's practical knowledge of pest and pesticide problems associated with the production and maintenance of turf in Kansas, potential phytotoxicity problems related to the wide variety of plants in treated areas, pesticide persistence beyond the intended period of control, and application methods that minimize hazards to humans, pets, and domestic animals.

(C) Each examination for interior landscape pest control applicators shall test the applicant's practical knowledge of pest and pesticide problems associated with the production and maintenance of houseplants and other ornamental plants kept or located within structures occupied by humans, including houses, apartments, offices, shopping malls, other places of business, and other dwelling places. The examination shall also test the applicant's practical knowledge of potential phytotoxicity problems related to treatment of plants in enclosed areas, pesticide persistence beyond the intended period of control, and application methods that minimize hazards to humans, pets, and domestic animals.

(4) Seed treatment. Each examination for seed treatment applicators shall test the applicant's practical knowledge of the types of seeds that require protection against pests, factors that could affect germination, including seed coloration, carriers and surface-active agents, hazards associated with handling, storing, mixing and misuse of treated seeds, and the proper disposal of unused treated seeds.

(5) Aquatic pest control.

(A) Each examination for aquatic pest control applicators shall test the applicant's practical knowledge of secondary effects caused by improper application rates, incorrect formulations, and faulty aquatic pesticide applications; knowledge of various water use situations and the potential of downstream effects; knowledge of potential effects on plants, fish, birds, beneficial insects, and other organisms in the aquatic environment; and knowledge of the principles of limited area application.

(B) Each examination for sewer root control shall test the applicant's practical knowledge of sewer control methods, limited area applications, and potential adverse effects of pesticides.

(6) Right-of-way pest control. Each examination for right-of-way pest control applicators shall test the applicant's practical knowledge of the wide variety of environments crossed by rights-of-way, problems of runoff, drift and excessive foliage destruction, the nature of herbicides, the need for containment of herbicides within the right-of-way area, and the impact of the applicator's activities on adjacent areas and communities.

(7) Industrial, institutional, structural, and health-related pest control.

(A) Each examination for wood-destroying pest control applicators shall test the applicant's practical knowledge of wood-destroying pests and their life cycles, pesticide formulations appropriate for the control of these pests, methods of application that avoid exposure of people and pets, and specific factors that can lead to hazardous conditions, including continuous exposure to the pesticide.

(B) Each examination for stored products pest control shall test the applicant's practical knowledge of pests found in stored grain and food processing areas, their life cycles, pesticide formulations appropriate for their control, methods of application that avoid contamination of food products and exposure of people, and specific factors that can lead to a hazardous condition, including continuous exposure.

(C) Each examination for industrial weed control applicators shall test the applicant's practical knowledge of weed pests found in industrial areas, pesticide formulations appropriate for the control of these pests, methods of application that avoid contamination of habitat and exposure of people and pets, and environmental conditions particularly related to this activity.

(D) Each examination for health-related pest control applicators shall test the applicant's practical knowledge of vector-disease transmission as it relates to and influences application programs, pests that adversely affect public health and their life cycles and habitats, and the variety of environments in which these pests are encountered.

(E) Each examination for structural pest control applicators shall test the applicant's practical knowledge of the wide variety of pests found in buildings, including their life cycles; types of pesticide formulations appropriate for their control and methods of application that avoid contamination of food, damage to and contamination of habitat, and exposure of people and pets; specific factors that can lead to a hazardous condition, including continuous exposure in the various situations encountered in this

category; and environmental conditions particularly related to this activity.

(F) Each examination for wood preservation and wood-products treatment applicators shall test the applicant's practical knowledge of pest problems and pests associated with wood degradation, including their life cycles, types of pesticide formulations appropriate for their control, methods of application, application hazards and safety, and the proper means of container storage and container and waste disposal. The examination shall also test the applicant's practical knowledge of procedures to contain spills and to avoid contamination and exposure of the environment, including people, domestic animals, and wildlife.

(8) Public health pest control. Each examination for public health pest control applicators shall test the applicant's practical knowledge of vector-disease transmission as it relates to and influences application programs, pests that adversely affect public health and their life cycles and habitats, the variety of environments in which these pests are encountered, and the importance of nonchemical control methods including sanitation, waste disposal, and drainage.

(9) Regulatory pest control.

(A) Each examination for noxious weed control applicators shall test the applicant's practical knowledge of pest weeds as regulated by the Kansas noxious weed law, the potential impact on the environment of restricted-use pesticides used in suppression and eradication programs, and factors influencing the introduction, spread, and population dynamics of those pest weeds.

(B) Each examination for regulated pest control applicators shall test the applicant's practical knowledge of federally regulated and state-regulated pests, applicable laws relating to quarantine and other regulations regarding pests, the potential impact on the environment of restricted-use pesticides used in suppression and eradication programs, and factors influencing the introduction, spread, and population dynamics of relevant pests.

(10) Demonstration and research pest control. Each examination for demonstration and research pest control applicators shall test the applicant's practical knowledge of the many different pest problems encountered in the course of activities associated with demonstration, field research and method improvement work, pesticide-organism interactions, and the importance of integrating pesticide use with control methods. Each appli-

cator shall meet the examination requirements for application in the other categories that are applicable to the applicator's particular activity.

(c) A grade of at least 75% correct answers shall be required to pass each commercial applicator examination. (Authorized by K.S.A. 2-2467a; implementing K.S.A. 2006 Supp. 2-2443a and K.S.A. 2-2467a; effective, E-78-26, Sept. 7, 1977; effective May 1, 1978; amended May 1, 1985; amended, T-87-39, Nov. 19, 1986; amended May 1, 1987; amended May 1, 1988; amended Jan. 1, 1989; amended Feb. 29, 2008.)

4-13-14. Private applicator examination.

Initial examinations for certified private applicators shall be taken in the presence of a representative of the Kansas department of agriculture or the Kansas state university extension service. Each applicant for this certification shall be required to answer at least 75% of the questions correctly to pass the examination.

Examinations for private applicator certification shall test the applicant's knowledge in those subject areas specified in K.S.A. 2-2445, and amendments thereto, involving pest control practices associated with the applicant's agricultural operation and the applicant's legal responsibility as a certified applicator of restricted pesticides. Each applicant shall be tested to determine the applicant's ability to meet the following requirements:

(a) Recognize common pests to be controlled and damage caused by them;

(b) read and understand the label and labeling information, including the common name of the pesticide applied, pest or pests to be controlled, timing and methods of application, safety precautions, any preharvest reentry restrictions, and any specific disposal procedures;

(c) apply pesticides in accordance with label instructions and warnings, including the ability to prepare the proper concentration of pesticide to be used under particular circumstances taking into account such factors as area to be covered, speed at which application equipment will be driven, and the quantity dispersed in a given period of operation;

(d) recognize local environmental situations that must be considered during application to avoid contamination;

(e) recognize poisoning symptoms and procedures to follow in case of a pesticide accident; and

(f) understand federal and state supervisory requirements, including labeling, that must be

met by a certified private applicator in supervising the non-certified application of restricted pesticides. These supervisory requirements shall include verifiable instruction of the applicator, availability during application, and any added restrictions that may be imposed for specific pesticides through labeling. These restrictions may include the required physical presence of the supervising applicator during the application. (Authorized by K.S.A. 2-2467a; implementing K.S.A. 2008 Supp. 2-2445a, as amended by L. 2009, Ch. 128, §18; effective, E-78-26, Sept. 7, 1977; effective May 1, 1978; amended May 1, 1988; amended Feb. 5, 2010.)

4-13-15. Certificates and pocket cards. A certificate and pocket card shall be issued to each certified person upon satisfactory completion of the requirements for certification. Such certificate and pocket card shall show the applicator's name, type of certificate issued, the category of issuance including subcategory, if any, the expiration date of the certification and other pertinent information. The certified applicator shall produce such certificate or pocket card when requested to do so by any customer, law enforcement official, the secretary or any authorized representative of the secretary. (Authorized by K.S.A. 1989 Supp. 2-2467a; implementing K.S.A. 2-2441a; effective, E-78-26, Sept. 7, 1977; effective May 1, 1978; amended June 4, 1990.)

4-13-16. Supervision of uncertified applicators. (a) An uncertified commercial applicator of any pesticide and an uncertified private applicator of restricted-use pesticides shall be considered to be under the supervision of a certified applicator if the certified applicator has provided the uncertified applicator with instructions in the handling and application of the pesticide being used.

(b) The certified applicator shall be available to the uncertified applicator by telephone, two-way radio, or other comparable means of communication when the pesticide is being applied.

(c) The certified applicator shall be physically present if that person's presence is required by the pesticide label.

(d) The certified applicator shall verify that the requirements of this regulation were met when requested to do so by the secretary or the secretary's authorized representative.

(e) An uncertified applicator of pesticides, including registered pest control technicians, shall

be considered to be under the supervision of a certified commercial applicator only if both individuals are stationed at and work from the same business address. (Authorized by K.S.A. 2-2467a; implementing K.S.A. 2008 Supp. 2-2441a, as amended by L. 2009, Ch. 128, §16; effective, E-78-26, Sept. 7, 1977; effective May 1, 1978; amended, T-88-46, Nov. 10, 1987; amended May 1, 1988; amended Feb. 5, 2010.)

4-13-17. Report of address change by certified applicators. Each certified commercial applicator shall notify the secretary of any change in that applicator's mailing address within 30 days of the change. (Authorized by and implementing K.S.A. 2-2467a; effective, E-78-26, Sept. 7, 1977; effective May 1, 1978; amended Feb. 5, 2010.)

4-13-18. Disposal of pesticides and containers. Any amount of unused pesticide and each empty pesticide container shall be stored in the same manner as the pesticide involved until the unused pesticide or empty container is disposed of in a manner consistent with technology current at the time of disposal. Questions regarding the latest technology shall be submitted to any of the following: (a) The Kansas department of agriculture;

(b) Kansas state university extension service;

(c) Kansas department of health and environment; or

(d) the United States environmental protection agency. (Authorized by and implementing K.S.A. 2-2467a; effective, E-78-26, Sept. 7, 1977; effective May 1, 1978; amended Feb. 5, 2010.)

4-13-19. Marking of aircraft. Each pesticide business licensed in category one (1) which uses aircraft to apply pesticides shall identify each aircraft with a decal furnished by the secretary. Decals shall not be issued until all licensing requirements have been satisfied. Decals shall not be transferable. For fixed wing aircraft, the decal shall be affixed to and prominently displayed on the left rear portion of the cockpit or the canopy or on the left rear portion of the fuselage near the rear of the cockpit or canopy. For rotorcraft, the decal shall be affixed to and prominently displayed on the left side of the aircraft but not on the tail rotor. (Authorized by K.S.A. 1980 Supp. 2-2467a; implementing K.S.A. 1980 Supp. 2-2456; effective May 1, 1981.)

4-13-20. Pesticide business license, renewal, and uncertified commercial applicator fees. The application fee for a pesticide business license or for the renewal of a pesticide business license shall be \$140.00 for each category in which the applicant applies for a pesticide business license or renewal of that license. An additional fee of \$15.00 for each uncertified commercial applicator employed by the applicant to apply pesticides shall also be paid. This regulation shall apply to all pesticide business licenses, or renewals of these licenses, that will be effective through June 30, 2015, regardless of when the application is received by the agency.

The \$140.00 pesticide business license fee shall revert to \$112.00 on and after July 1, 2015, unless this date is modified by statute. The \$15.00 uncertified commercial applicator shall revert to \$10.00 on and after July 1, 2015, unless this date is modified by statute. (Authorized by K.S.A. 2008 Supp. 2-2440, as amended by L. 2009, Ch. 128, §11, and K.S.A. 2-2467a; implementing K.S.A. 2008 Supp. 2-2440, as amended by L. 2009, Ch. 128, §11; effective, T-83-36, Nov. 10, 1982; effective May 1, 1983; amended, T-88-46, Nov. 10, 1987; amended May 1, 1988; amended, T-4-6-27-02, July 1, 2002; amended Oct. 25, 2002; amended Feb. 29, 2008; amended Feb. 5, 2010.)

4-13-21. Government agency registration and renewal fees. The application fee for a government agency registration shall be \$50.00. This regulation shall apply to all government agency registrations, or renewals of these registrations, effective through June 30, 2015, regardless of when the agency receives the application. The \$50.00 government agency registration fee shall revert to \$35.00 on and after July 1, 2015, unless this date is modified by statute. (Authorized by K.S.A. 2008 Supp. 2-2440, as amended by L. 2009, Ch. 128, §11, and K.S.A. 2-2467a; implementing K.S.A. 2008 Supp. 2-2440, as amended by L. 2009, Ch. 128, §11; effective, T-83-36, Nov. 10, 1982; effective May 1, 1983; amended, T-4-6-27-02, July 1, 2002; amended Oct. 25, 2002; amended Feb. 29, 2008; amended Feb. 5, 2010.)

4-13-22. (Authorized by K.S.A. 2006 Supp. 2-2441a and K.S.A. 2-2467a; implementing K.S.A. 2006 Supp. 2-2441a; effective, T-83-36, Nov. 10, 1982; effective May 1, 1983; amended, T-4-6-27-02, July 1, 2002; amended Oct. 25, 2002; amended Feb. 29, 2008; revoked Feb. 5, 2010.)

4-13-23. Examination fees. The examination fee for a commercial applicator's certificate shall be \$45.00 through June 30, 2015, for each category, subcategory, and general core examination taken. The fee shall also apply if the applicant seeks reexamination. The \$45.00 examination fee shall revert to \$35.00 on and after July 1, 2015, unless this date is modified by statute. (Authorized by K.S.A. 2008 Supp. 2-2443a, as amended by L. 2009, Ch. 128, §17, and K.S.A. 2-2467a; implementing K.S.A. 2008 Supp. 2-2443a, as amended by L. 2009, Ch. 128, §17; effective, T-83-36, Nov. 10, 1982; effective May 1, 1983; amended, T-4-6-27-02, July 1, 2002; amended Oct. 25, 2002; amended Feb. 29, 2008; amended Feb. 5, 2010.)

4-13-24. Certified private applicator's certificate fee. The certified private applicator's certificate fee shall be \$25.00. This regulation shall apply to certified private applicator certificates that will be effective through June 30, 2015, regardless of when the department receives the application. The \$25.00 certified private applicator's certificate fee shall revert to \$10.00 on and after July 1, 2015, unless this date is modified by statute. (Authorized by K.S.A. 2008 Supp. 2-2445a, as amended by L. 2009, Ch. 128, §18, and K.S.A. 2-2467a; implementing K.S.A. 2008 Supp. 2-2445a, as amended by L. 2009, Ch. 128, §18; effective, T-83-36, Nov. 10, 1982; effective May 1, 1983; amended, T-4-6-27-02, July 1, 2002; amended Oct. 25, 2002; amended Feb. 29, 2008; amended Feb. 5, 2010.)

4-13-25. Bulk pesticide storage and handling of pesticides; definitions. As used in K.A.R. 4-13-25 through 4-13-25m, the following terms shall be defined as follows:

(a) "Appurtenance" means any valve, pump, fitting, pipe, hose, auger, metering device, and dispensing device connected to a storage container. "Dispensing device" shall include any device that is used to transfer bulk pesticides into or out of a container.

(b) "Bulk pesticide" means any pesticide, whether liquid or solid, that is kept at ambient temperature and pressure and is stored, loaded, or unloaded in an individual container of undivided capacity in quantities identified in K.A.R. 4-13-25b.

(c) "Bulk pesticide container" means any receptacle or device in which a pesticide is stored, mixed, treated, disposed of, or handled in any manner in quantities greater than 55 gallons liq-

uid measure or quantities greater than 100 pounds net dry weight.

(d) "Bulk pesticide storage facility" and "facility" mean any warehouse, loading pad, or other area where a bulk pesticide is stored, mixed, loaded, or unloaded, unless otherwise exempted. Each bulk pesticide storage facility located within 300 feet of another facility owned or operated by the same person shall be considered the same facility for the purpose of finding the number of consecutive days in storage and determining whether the facility is exempt from the requirements of K.A.R. 4-13-25 through K.A.R. 4-13-25m.

(e) "Chemically compatible" means that the material will not react chemically adversely or electrolytically adversely to the bulk pesticide being stored, loaded, unloaded, mixed, or handled.

(f) "Discharge" means any spilling, leaking, depositing, pumping, dumping, or emptying, whether accidental or intentional, resulting in the release of a pesticide or material containing a pesticide at a bulk pesticide storage facility. "Discharge" shall not include the lawful transferring, loading, unloading, repackaging, refilling, distributing, using, disposing, or application of a pesticide. This term shall also exclude the normal washing and rinsing activities on a mixing and loading pad.

(g) "Dry bulk pesticide" means any bulk pesticide that is in solid form before any end-use application or before any mixing for end-use application. This term shall include making formulations including dusts, powders, and granules.

(h) "End-use application" means the application of a pesticide by the owner or lessee of the real property upon which the application is made to control a pest covered by the pesticide label.

(i) "Flood plain" means an area at one percent or greater risk of flood occurrence in any given year.

(j) "Gallon" means the United States standard measure of a gallon.

(k) "Liquid bulk pesticide" means any bulk pesticide in liquid form before dilution for end-use application. This term shall include solutions, emulsions, suspensions, slurries, and gels.

(l) "Mixing and loading pad" and "pad" mean a surface designed to provide containment of a pesticide during the loading, unloading, mixing, or handling of a pesticide, or during the cleaning, rinsing, or refilling of a pesticide container.

(m) "Mobile container" means a bulk pesticide container that is designed and used for transporting bulk pesticides.

(n) "Owner or operator" shall include any agent or employee of an owner or operator and mean any of the following:

(1) A pesticide dealer as defined by K.S.A. 2-2438a(q) and amendments thereto;

(2) a pesticide business licensee as defined by K.S.A. 2-2438a(p) and amendments thereto;

(3) a government agency registrant as addressed in K.S.A. 2-2440(e) and amendments thereto;

(4) a certified private applicator, as defined by K.S.A. 2-2438a(c)(2) and amendments thereto, of a bulk pesticide storage facility; or

(5) any other person, as defined by K.S.A. 2-2438a(l) and amendments thereto, responsible for the storage of bulk pesticides as defined by subsection (b).

(o) "Permanent cessation of operations" means either of the following:

(1) No pesticides have been loaded, unloaded, or stored at the facility for 12 consecutive months.

(2) The facility has gone out of business and is no longer a going concern.

(p) "Reasonably foreseeable" means what the secretary determines would have been foreseeable at the time the decision affecting the facility or its condition was made. "Reasonable foreseeability" shall include consideration of the owner's or operator's knowledge of conditions at the time the condition was created or the decision was made.

(q) "Secondary containment" means any structure, tank, or container, including rigid diking, that is designed, constructed, and maintained to intercept, hold, contain, or confine a discharge from a bulk pesticide container and to contain spills, prevent runoff, and avoid leaching.

(r) "Static pressure" means the pressure exerted by a fluid that is not flowing or moving.

(s) "Sump" means a recessed reservoir or catch basin designed to be a receptacle for the collection of liquids in the floor of secondary containment or in the part of the secondary containment that constitutes the loading pad. (Authorized by and implementing K.S.A. 2-2467a; effective May 1, 1985; amended Dec. 27, 2002; amended Sept. 3, 2010.)

4-13-25a. Exemptions. (a) The regulations found in K.A.R. 4-13-25 through K.A.R. 4-13-25k shall not apply to any of the following:

(1) A mobile container of 350-gallon capacity or less, if the use of the container is solely incidental to the end-use application of the bulk pesticide and if the container is not at a specific location for

more than 60 days of storage in any consecutive 365-day period;

(2) a sealed or an unopened pesticide manufacturer's storage container being loaded or unloaded;

(3) a railcar in which the storage of bulk pesticides is solely incidental to the transportation of the pesticide and that remains on a train track; or

(4) a bulk pesticide stored, loaded, or unloaded in quantities less than all the quantities specified in K.A.R. 4-13-25b.

(b) The owner or operator of a facility shall have the burden of establishing the applicability of an exemption under paragraph (a)(4) of this regulation.

(c) Contemporaneously kept records maintained pursuant to K.A.R. 4-13-25k shall constitute prima facie evidence of an exemption. (Authorized by and implementing K.S.A. 2-2467a and 2-2471; effective Dec. 27, 2002.)

4-13-25b. Quantities of bulk pesticide. A facility shall be subject to the requirements of K.A.R. 4-13-25 through K.A.R. 4-13-25k if any of the following conditions is met:

(a) A cumulative total of 1,000 gallons or more of liquid bulk pesticide is transferred away from the facility during any consecutive 365-day period.

(b) A total of 1,000 gallons or more of liquid bulk pesticide is stored, held, or maintained at the facility at any time.

(c) A cumulative total of 3,000 pounds or more of dry bulk pesticide is transferred away from the facility during any consecutive 365-day period.

(d) A total of 3,000 pounds or more of dry bulk pesticide is stored, held, or maintained at the facility at any time. (Authorized by and implementing K.S.A. 2-2467a; effective Dec. 27, 2002; amended Sept. 3, 2010.)

4-13-25c. Location, design, and construction requirements of a bulk pesticide storage facility. Each owner or operator shall meet the following requirements: (a)(1) Each bulk pesticide storage facility shall be designed, constructed, and maintained according to the pesticide manufacturers' directions, instructions, or recommendations. The facility shall be constructed of materials that contain spills, prevent runoff, and avoid leaching of the pesticide being mixed, loaded, or unloaded. Construction materials shall be chemically compatible with the pesticides that come in contact with the material.

(2) Each bulk pesticide storage facility shall be designed, constructed, and maintained to accom-

modate all reasonably foreseeable loading and unloading conditions, including the anticipated wheel load of a vehicle, and to protect appurtenances and bulk pesticide containers against damage from operating personnel and moving equipment through the use of flexible connections, guard rails, barriers, and protective cages, where necessary.

(3) Asphalt shall not be used as a material in the construction of a bulk pesticide storage facility.

(b) No bulk pesticide storage facility shall be constructed or maintained in a flood plain unless the bulk pesticide is stored above the base flood elevation.

(c) The floor of each bulk pesticide storage facility shall be constructed of material that prevents the movement of pesticide materials and moisture through the floor and shall be designed, constructed, and maintained in a manner that allows discharges to be collected, contained, and recovered.

(d) All electrical equipment and wiring shall be elevated to prevent the equipment and wiring from becoming submerged and shall be grounded to dissipate static electricity.

(e) Both private and public water supplies shall be protected from contamination from the bulk pesticide storage facility.

(f) Each bulk pesticide storage facility shall contain a mixing and loading pad.

(g) Each bulk pesticide storage facility shall be secured to protect against reasonably foreseeable unauthorized access that could result in a discharge.

(h) Each bulk pesticide storage facility shall be designed, constructed, and maintained to prevent contact of any dry bulk pesticide with precipitation. Contact with precipitation shall be prevented by the following:

(1) Using a permanent cover; and

(2) placing dry bulk pesticide on pallets or a raised concrete platform enclosed by a curb that is at least six inches high and extends at least two feet beyond the perimeter of the dry bulk pesticide storage area.

(i) Each bulk pesticide storage facility shall be designed, constructed, and maintained to avoid the creation of pesticide waste and to prevent cross-contamination of pesticides.

(j) Bulk pesticides shall not be stored or mixed in underground containers. (Authorized by and implementing K.S.A. 2-2467a; effective Dec. 27, 2002; amended Sept. 3, 2010.)

4-13-25d. Secondary containment for bulk pesticide storage. Each owner or operator shall meet the following requirements: (a) All bulk pesticide shall be stored within secondary containment. The secondary containment capacity shall be at least 110 percent of the capacity of the largest single bulk pesticide container in addition to the displacement of tanks, appurtenances, fixtures, equipment, and material located within the secondary containment.

(b) The secondary containment, including the floor or bottom of the secondary containment, shall meet the following requirements:

(1) Be constructed of steel, reinforced concrete, or any other material of sufficient thickness, density, and composition to contain any discharged pesticide material;

(2) be leakproof with cracks, seams, and joints sealed; and

(3) for liquids, be capable of withstanding the static pressure resulting from the secondary containment being completely filled with a liquid having a density greater than or equal to the density of the most dense liquid bulk pesticide to be stored within the containment.

(c) A soil liner shall not be considered adequate for the secondary containment of pesticides. Masonry block, asphalt, earthen materials, unfired or fired clay, clay, natural soil-clay mixtures, clay-bentonite mixtures, and prefabricated bentonite liners shall not be deemed to be of appropriate density and composition to contain discharged pesticide material and shall not be used as secondary containment. Sealant-coated concrete blocks may be used if the facility owner's or operator's use of the blocks is approved in writing by the manufacturer of the pesticide.

(d) The floor of the secondary containment shall drain to a sump or other specific point of recovery.

(e) The sump or other specific point of recovery shall be emptied daily in accordance with K.A.R. 4-13-25g(a) by an on-site operator, who shall continuously monitor this process. The on-site operator may use an automatically activated pump to empty the sump if an automatic overflow switch is installed for the receiving container.

(f) No outlet, drain, or other means of penetration shall be located through the floor, bottom, or walls of the secondary containment.

(g) Secondary containment shall be constructed to allow the interior and exterior of the walls to be viewed.

(h) A synthetic liner used to line the secondary containment shall be installed and maintained according to the liner manufacturer's specifications, directions, and recommendations. The specifications, directions, and recommendations about liners from the manufacturers of the pesticides stored in the facility shall also be followed. All seams shall be tested, maintained, and repaired according to the manufacturer's specifications, directions, and recommendations. The liner shall be replaced if it cannot be repaired to meet the liner manufacturer's requirements. In no event shall a liner that is incapable of containing bulk pesticides independent of the support of another container be used in lieu of secondary containment. (Authorized by and implementing K.S.A. 2-2467a; effective Dec. 27, 2002; amended Sept. 3, 2010.)

4-13-25e. Requirements for mixing and loading pads for bulk pesticides. Each owner or operator shall meet the following requirements: (a) Each mixing and loading pad not connected to a storage area shall be of adequate size and design to contain at least 110 percent of the capacity of the container or tank on the pad and the displacement of tanks, equipment, appurtenances, fixtures, and material located on the pad.

(b) Each mixing and loading pad shall be constructed to contain any discharge and shall be leakproof with all cracks, seams, and joints sealed. The pad shall be impervious to spills and capable of supporting the weight of the heaviest vehicle plus all loading, unloading, and mixing operations. The floor of the mixing and loading pad shall slope to a single point or to a sump, for the recovery of liquid spills.

(c) The sump shall be emptied daily by an on-site operator, who shall continuously monitor this process. The on-site operator may use an automatically activated pump to empty the sump if an automatic overflow switch is installed for the receiving container. The owner or operator may use the recovered pesticide for its intended purpose if it can be used according to the recovered pesticide's label. The owner or operator shall dispose of, in accordance with the label, any recovered pesticide that cannot be used.

(d) The following activities conducted at the facility shall be performed on the mixing and loading pad or within secondary containment:

- (1) Filling pesticide containers;
- (2) washing application equipment;

(3) rinsing pesticide containers or application equipment;

(4) mixing operations; and

(5) loading application equipment. (Authorized by and implementing K.S.A. 2-2467a; effective Dec. 27, 2002; amended Sept. 3, 2010.)

4-13-25f. Requirements for bulk pesticide containers and appurtenances. Each owner or operator shall meet the following requirements: (a) Each bulk pesticide container shall be designed to handle all operating stresses, including static pressure, pressure buildup from pumps and compressors, and any other mechanical stresses to which the storage container could be subject during operations. Each bulk pesticide container shall be chemically compatible with the pesticide it holds and shall meet all specifications, directions, and recommendations of the manufacturers of the pesticide and bulk pesticide container.

(b) Each bulk pesticide container connection, except for safety relief connections, shall be equipped with a shutoff valve accessible and located within the secondary containment.

(c) Except while the stored pesticide is being removed from the container, shutoff valves shall be left either closed and locked or otherwise secured from access. The transfer of pesticide from one bulk pesticide container to another and between a bulk pesticide container and a transport vehicle shall be attended at all times by an on-site operator.

(d) Bulk pesticide containers and appurtenances shall be supported to prevent sagging.

(e) Sight gauges shall not be used on bulk pesticide containers.

(f) Each bulk pesticide container that is not located within a structure with a roof and walls shall be designed, installed, and maintained to prevent flotation and to withstand winds of 90 miles per hour or less.

(g) Each bulk pesticide container shall be designed to protect against excessive internal pressure or vacuum.

(h) Each bulk pesticide container used for storage shall be marked clearly to identify the pesticide stored in the container. (Authorized by and implementing K.S.A. 2-2467a; effective Dec. 27, 2002; amended Sept. 3, 2010.)

4-13-25g. Discharge, recovery, and reporting requirements. (a) Each owner or op-

erator shall recover promptly any discharge. The owner or operator may use the recovered pesticide for its intended purpose if it can be used according to the recovered pesticide's label or labeling. The owner or operator shall dispose of, in accordance with the label, any recovered pesticide that cannot be used.

(b) The owner or operator shall notify the secretary within 48 hours of any discharge not contained by secondary containment. (Authorized by and implementing K.S.A. 2-2467a; effective Dec. 27, 2002; amended Sept. 3, 2010.)

4-13-25h. Submission of diagrams, plans, and specifications. (a) The owner or operator of each bulk pesticide storage facility shall maintain diagrams, plans, and specifications of the facility on site and with the secretary. The copy maintained at the facility shall be made available to a representative of the secretary upon request.

(b)(1) Each owner or operator of a bulk pesticide storage facility that is to be remodeled, an existing structure that is to be converted to use as a bulk pesticide storage facility, or a proposed bulk pesticide storage facility shall submit diagrams, plans, and specifications to the secretary before commencement of remodeling, conversion, or construction. Remodeling, conversion, or construction shall not commence until the owner or operator receives written notice from the secretary that no further information is required.

(2) The owner or operator of each facility under this subsection shall complete remodeling, conversion, or construction within two years after the secretary's written notice that no additional information is required. Upon completion of the remodel, conversion, or construction, the owner or operator of a facility under this subsection shall certify on a form prescribed by the secretary that the facility meets or exceeds all the requirements of K.A.R. 4-13-25 through K.A.R. 4-13-25k and is constructed in accordance with the diagrams, plans, and specifications submitted to the secretary.

(c) The diagrams, plans, and specifications shall include the facility layout, mechanical and electrical diagrams, construction materials, and the type of equipment that is located in the facility or that is to be fixed or installed in the facility. The diagrams shall be drawn to scale and shall be legible without magnification. The diagrams, plans, and specifications shall contain all information required in subsection (d).

(d) The diagrams, plans, and specifications of the bulk pesticide storage facility shall be submitted with the form prescribed by the secretary. The required documentation shall include, at a minimum, the following information:

(1) The location of the facility relative to the flood plain;

(2) the location of the facility relative to any surface water within 1,320 feet of the facility and the distance between the facility and the surface water;

(3) the distance from both the facility and the area within 100 feet of the facility to groundwater, and the location of the groundwater relative to the facility;

(4) the location of any plumbing and access to private and public water supplies and the distance from the plumbing and access to the private and public water supplies;

(5) the drainage pattern of the facility;

(6) certification that the facility is not located on any abandoned or active oil, gas, or water well;

(7) certification that the facility is not located on a utility easement;

(8) the size and location of the proposed walls and flooring to be located within the facility;

(9) the location and size of each bulk pesticide storage container;

(10) the location and size of each loading and mixing pad;

(11) the location of each appurtenance used in the storage or transfer of bulk pesticide within the facility;

(12) the location of electrical equipment, wiring, and static grounding wires;

(13) the location and size of dry bulk pesticide storage; and

(14) any other relevant information required by the secretary.

(e) Each owner or operator of a bulk pesticide storage facility shall submit the diagrams, plans, and specifications required in this regulation to the secretary at least 30 days before the date the owner or operator proposes that the construction will commence.

(f) Additional time to comply with any deadline in this regulation may be granted by the secretary upon receipt of a written request and upon a showing of good cause for the additional time requested. Each request shall state the reason for the additional time requested and the amount of additional time needed.

(g) The construction, remodeling, conversion, and maintenance of a facility shall conform with

the diagrams, plans, and specifications submitted and required by K.A.R. 4-13-25a through K.A.R. 4-13-25k. (Authorized by and implementing K.S.A. 2-2467a; effective Dec. 27, 2002; amended Sept. 3, 2010.)

4-13-25i. (Authorized by and implementing K.S.A. 2-2467a and 2-2471; effective Dec. 27, 2002; revoked Sept. 3, 2010.)

4-13-25j. Bulk pesticide storage facility inspection and maintenance requirements.

(a) Each owner or operator shall inspect the bulk pesticide storage facility and secondary containment, including all appurtenances, at least monthly for any defects, including the following:

- (1) Corrosion;
- (2) leaks;
- (3) cracks;
- (4) spills;
- (5) gaps;
- (6) tears;
- (7) unsealed joints;
- (8) cross-contamination of pesticides;
- (9) structural defects;
- (10) equipment defects; and

(11) any other defect in the facility or potential violation of K.A.R. 4-13-25 through K.A.R. 4-13-25k.

The owner or operator shall promptly correct any defect.

(b) Upon the discovery of each defect or potential violation specified in subsection (a) that compromises the facility's ability to contain the pesticide, the owner or operator shall, within 24 hours after the discovery, either initiate repairs to correct the defect or take the appurtenance or secondary containment out of service. If the appurtenance or secondary containment is left in service, the defect or potential violation shall be corrected within 14 days following the discovery. If the defect or potential violation is not corrected within 14 days following the discovery, the appurtenance or secondary containment shall be removed from service.

(c) The owner or operator shall make a record of the following:

- (1) Each inspection performed pursuant to subsection (a);
- (2) each discharge within the facility in excess of 55 gallons; and
- (3) more than one discharge within the facility in a 24-hour period totaling or exceeding 55 gallons.

- (d) Each record made pursuant to subsection (c) shall include the following:
 - (1) The name of the person making the record;
 - (2) the date the record was made;
 - (3) if any inspection is performed, the following:
 - (A) The date of the inspection;
 - (B) a description of any defect found; and
 - (C) a description of any repairs made to remedy the defect;
 - (4) if a discharge occurred, the following:
 - (A) The date of the discharge;
 - (B) the amount of the discharge;
 - (C) the cause of the discharge;
 - (D) a description of any repairs made; and
 - (E) the date and time the secretary was notified pursuant to K.A.R. 5-13-25g;
 - (5) the date any defective equipment at the facility is taken out of service; and
 - (6) the date any defective equipment is placed back into service.

(e) All records maintained at the facility shall be retained for three years from the date of the record and shall be made available to the secretary or an authorized representative of the secretary upon request. (Authorized by and implementing K.S.A. 2-2467a; effective Dec. 27, 2002; amended Sept. 3, 2010.)

4-13-25k. Site closure and discontinuation of operation. (a) The owner or operator shall notify the secretary within 30 calendar days following the permanent cessation of operations of a bulk pesticide storage facility.

(b) Whenever a bulk pesticide storage facility permanently ceases operations, the owner or operator shall provide the secretary with written verification of both of the following, on a form prescribed by the secretary:

(1) All pesticides, solutions containing a pesticide, wash waters, and other materials that may contain pesticides have been removed from the facility and have been used or disposed of according to the pesticide's label or labeling and according to all federal, state, and local requirements.

(2) All bulk pesticide containers, appurtenances, mixing and loading pads, and sumps have been thoroughly cleaned according to each pesticide manufacturer's requirements, instructions, directions, or recommendations or, if none exist, according to standard industry practice. (Authorized by and implementing K.S.A. 2-2467a; effective Dec. 27, 2002; amended Sept. 3, 2010.)

4-13-25l. Penalty for noncompliance with pesticide containment. (a) The license, certification, or registration of any pesticide business licensee, governmental agency registrant, pesticide dealer, or certified private applicator who is found to have violated a pesticide containment requirement in K.A.R. 4-13-25a through 4-13-25k shall be subject to suspension, revocation, nonrenewal, or cancellation.

(b) Any pesticide business licensee or pesticide dealer who is found to have violated a pesticide containment requirement in K.A.R. 4-13-25 through 4-13-25k may incur a civil penalty in accordance with K.A.R. 4-13-62.

(c) Enforcement of K.A.R. 4-13-25 through K.A.R. 4-13-25k shall be conducted in accordance with the provisions of the Kansas administrative procedures act, K.S.A. 77-501 et seq. and amendments thereto. (Authorized by K.S.A. 2009 Supp. 2-2449 and K.S.A. 2-2467a; implementing K.S.A. 2-2440e, K.S.A. 2009 Supp. 2-2449, K.S.A. 2-2453, 2-2454, and 2-2467a; effective Dec. 27, 2002; amended Sept. 3, 2010.)

4-13-25m. Change in owner or operator of bulk pesticide storage facility; reporting requirements. (a) If the owner or operator of a bulk pesticide storage facility changes, the new owner or operator shall notify the secretary of the change within 30 days after the effective date of the change, on a form prescribed by the secretary.

(b) The new owner or operator shall meet one of the following requirements:

(1) Submit to the secretary the diagram, plans, and specifications of the bulk pesticide storage facility required by K.A.R. 4-13-25h; or

(2)(A) State on the notification form that the owner or operator has reviewed the existing diagrams, plans, and specifications maintained by the secretary;

(B) certify that the bulk pesticide storage facility remains consistent with those existing diagrams, plans, and specifications; and

(C) certify that the bulk pesticide storage facility has been constructed, remodeled, or converted and is maintained and operated in accordance with K.A.R. 4-13-25 through K.A.R. 4-13-25k. (Authorized by and implementing K.S.A. 2-2467a; effective Sept. 3, 2010.)

4-13-26. Preconstruction application of pesticide for termite control. In addition to the requirements of the label, each preconstruction

application of pesticide for the control of termites shall consist of establishing both horizontal and vertical chemical barriers, as specified in this regulation. (a) Horizontal chemical barriers shall be established in areas intended to be covered, including the soil beneath slab floors and porches, footing trenches for monolithic slabs, and the soil beneath stairs.

(b) Vertical chemical barriers shall be established in the soil around the base of foundations, plumbing fixtures, foundation walls, support piers, and voids in masonry, and any other critical areas where structural components extend below grade. (Authorized by K.S.A. 2-2467a; implementing K.S.A. 2-2471; effective March 26, 1990; amended July 18, 2003.)

4-13-27. Certificate of liability insurance.

Each applicant for a pesticide business license shall provide the secretary with a certificate of liability insurance which shall contain the following information:

(a) the name of the insured pesticide business licensee;

(b) the name of the insurance company which issued the policy;

(c) the effective date of the policy;

(d) the expiration date of the policy; and

(e) the policy number.

If a surety bond is furnished in lieu of a certificate of liability insurance, the bond shall be executed on a form provided by the secretary and shall comply with the provisions of K.A.R. 4-13-8. (Authorized by K.S.A. 1988 Supp. 2-2467a as amended by L. 1989, Ch. 6, §16; implementing K.S.A. 2-2448 as amended by L. 1989, Ch. 6, §17; effective March 26, 1990.)

4-13-28. Target pests which are not specified on the pesticide's label or labeling.

Any pesticide may be applied for the purpose of controlling a pest which is not specified on the pesticide's label or labeling provided that: (a)(1) the pesticide's label or labeling authorizes application of the pesticide to the same crop, animal or site requiring application;

(2) the pest to be controlled belongs to the same general group of pests intended to be controlled by the pesticide to be applied;

(3) the pesticide's label or labeling does not specifically prohibit its application to the target pest to be controlled, or to the crop, animal or site to which the pesticide is to be applied; and

(4) the application of the pesticide to the target pest, or to the crop, animal or site, has not been prohibited by rules and regulations promulgated by the secretary.

(b) Each pesticide which is applied in accordance with the provisions of subsection (a) of this regulation shall be deemed not to cause any unreasonable adverse effects on the environment, nor to endanger the health, safety or welfare of the citizens of this state. (Authorized by K.S.A. 1990 Supp. 2-2467a; implementing K.S.A. 1990 Supp. 2-2470 and 2-2471; effective Oct. 21, 1991.)

4-13-29. General use pesticides for household application or use for the purpose of pesticide dealer registrations. General use pesticide products sold for household application or use shall include only those ready-to-use general use pesticide products which:

(a) are to be applied undiluted, in accordance with use instructions shown on the pesticide's label; and

(b) are to be applied by homeowners or occupants to control pests in and around the family dwelling and associated structures. (Authorized by K.S.A. 2-2467a; implementing K.S.A. 1985 Supp. 2-2469; effective May 1, 1987.)

4-13-30. Dealer recordkeeping requirements. (a) Each pesticide dealer shall maintain records of all restricted-use pesticide products sold or otherwise conveyed. These records shall be made available during reasonable business hours to the secretary or the secretary's authorized representative for purposes of inspection and copying. Each record required by this regulation shall be kept for at least two years after the date of the sale or conveyance.

(b) The records specified in subsection (a) shall contain the following information:

(1) The name of each person to whom the restricted-use pesticide product has been sold or conveyed, as verified by the person's presentation of a federal or state government-issued identification card;

(2) the address of either the residence or principal place of business of each person to whom the restricted-use pesticide product has been sold or conveyed;

(3) the name and address of either the residence or principal place of business of the individual to whom the restricted-use pesticide

product has been delivered or conveyed, if different from the purchaser;

(4) the certification number of the applicator's certificate;

(5) the name of the state issuing the certificate;

(6) the expiration date of the certificate;

(7) if the applicator is a certified commercial applicator of pesticides, then, if applicable, the categories and subcategories in which the applicator is certified;

(8) the registered name of the restricted-use pesticide product, the EPA registration number of the restricted-use pesticide product, and, if applicable, the "special local need" state registration number of the restricted-use pesticide product;

(9) the quantity of the restricted-use pesticide product sold or conveyed; and

(10) the date of the transaction.

(c) If the pesticide dealer makes a restricted-use pesticide product available to an uncertified person for use by a certified applicator, then the following records shall be kept in addition to those required in subsection (a):

(1) The name of the uncertified person to whom the restricted-use pesticide product has been made available, as verified by the uncertified person's presentation of a federal or state government-issued identification card;

(2) the address of either the residence or principal place of business of the uncertified person to whom the restricted-use pesticide product has been made available;

(3) the name of the certified applicator who will use the restricted-use pesticide product; and

(4) the address of either the residence or principal place of business of the certified applicator who will use the restricted-use pesticide product.

(d) Each pesticide dealer shall submit an annual report for each restricted-use pesticide product that the dealer has sold or otherwise conveyed. The report shall include the following:

(1) The registered name of the restricted-use pesticide product, the EPA registration number of the restricted-use pesticide product, and, if applicable, the "special local need" state registration number of the restricted-use pesticide product; and

(2) the quantity of the restricted-use pesticide product sold or otherwise conveyed. (Authorized by and implementing K.S.A. 2-2467a; effective, T-86-27, Aug. 19, 1985; effective May 1, 1986; amended May 1, 1987; amended Feb. 5, 2010.)

4-13-31. Certificates of registration. Each pesticide dealer shall display that dealer's current certificate of registration in a prominent location which can be seen by the general public. (Authorized by K.S.A. 2-2467a; implementing L. 1985, Ch. 12, section 2; effective, T-86-27, Aug. 19, 1985; effective May 1, 1986.)

4-13-32. Report of address change by pesticide dealers. Each pesticide dealer shall notify the secretary of any change in its business address or business name by the tenth day of the month following the month in which the change occurred. (Authorized by K.S.A. 2-2467a; implementing L. 1985, Ch. 12, section 2; effective, T-86-27, Aug. 19, 1985; effective May 1, 1986.)

4-13-33. Pest control technician registration and renewal fees. The application fee for a pest control technician registration or for the renewal of a pest control technician registration shall be \$40.00. Each fee paid by the applicant pursuant to K.A.R. 4-13-9 shall be applied toward payment of the fee required by this regulation. This regulation shall apply to all pest control technician registrations, or renewals of these registrations, that will be effective through June 30, 2015, regardless of when the department receives the application. The \$40.00 pest control technician registration fee shall revert to \$25.00 on and after July 1, 2015, unless this date is modified by statute. (Authorized by K.S.A. 2008 Supp. 2-2440b, as amended by L. 2009, Ch. 128, §13, and K.S.A. 2-2467a; implementing K.S.A. 2008 Supp. 2-2440b, as amended by L. 2009, Ch. 128, §13; effective, T-88-46, Nov. 10, 1987; amended May 1, 1988; amended, T-4-6-27-02, July 1, 2002; amended Oct. 25, 2002; amended Feb. 29, 2008; amended Feb. 5, 2010.)

4-13-34. Verification of training of registered pest control technicians. (a) Each pesticide business licensee who applies pesticides or causes pesticides to be applied for the control of wood destroying pests, structural pests, ornamental pests, turf pests, interior landscape pests, or any combination of these pests shall maintain records to verify that each registered pest control technician employed by such business licensee has received the required training in each appropriate category of pest control. These training records shall contain the following information for each training session:

(a) The typed or printed name of the trainee;

(b) the subject matter covered;

(c) type of training, classroom or on-the-job;

(d) the date on which the training occurred;

(e) the duration of the training in hours;

(f) the signature of the trainee; and

(g) the signature of the authorized officer or representative of the pesticide business licensee who administered the training.

(b) This regulation shall be in force and effect from and after January 1, 1989. (Authorized by K.S.A. 1987 Supp. 2-2467a; implementing K.S.A. 1987 Supp. 2-2440c as amended by L. 1988, ch. 7, § 4; effective, T-88-46, Nov. 10, 1987; effective May 1, 1988; amended Jan. 1, 1989.)

4-13-35. Registered pest control technician identification cards. (a) The secretary shall issue an identification card to each registered pest control technician upon satisfactory completion of the requirements for registration. This identification card shall show the registered technician's typed name and signature, the category or subcategory for which the registration has been issued, the name of the business licensee employing the registered technician, the date on which the identification card was issued, and the expiration date of the registration. The registered pest control technician shall have this identification card in the technician's possession when applying any pesticide for the control of wood destroying pests, structural pests, ornamental pests, turf pests, interior landscape pests, or any combination of these pests or when supervising the application of any general use pesticide. The technician shall produce this identification card when requested to do so by any customer, law enforcement official, the secretary or any authorized representative of the secretary. This regulation does not authorize any registered pest control technician to supervise the use of, or to apply, any restricted use pesticide unless the application is supervised by a commercial applicator who is certified to apply restricted use pesticides for the control of pests in the category or subcategory for which the pesticide application is made.

(b) This regulation shall be in force and effect from and after January 1, 1989. (Authorized by K.S.A. 1987 Supp. 2-2467a; implementing K.S.A. 1987 Supp. 2-2440b as amended by L. 1988, Ch. 7, § 3; effective, T-88-46, Nov. 10, 1987; effective May 1, 1988; amended Jan. 1, 1989.)

4-13-36. Training of registered pest control technicians in wood destroying pest

control and structural pest control. (a) All applicants for pest control technician registration in wood destroying pest control or structural pest control shall have completed a minimum of 40 hours of verifiable training, 30 hours of which must consist of supervised application of pesticides in and around structures, and 10 hours of which must be classroom instruction.

(b) Classroom instruction shall include the following:

(1) The proper use and maintenance of equipment, including calibration, "crack and crevice" and "spot" application, and other application techniques;

(2) the potential dangers involved in applying the pesticides, including:

(A) hazards to the applicator resulting from mixing, loading and applying pesticides, poisoning prevention, symptoms and first aid for pesticide poisoning;

(B) hazards to the occupants of the structures where pesticides are applied with particular emphasis on children, the aged and infirm;

(C) procedures for preventing pesticide contamination of food, groundwater, wells and cisterns, and the air within the structure being treated;

(D) label review and basic information about each pesticide used for control of wood destroying pests or structural pests, including common names of the pesticides, where and how each pesticide may be applied, and the kinds of pests controlled;

(E) basic information about prevention and cleanup of spills; and

(F) the use of non-chemical means to control wood destroying and structural pests;

(3) calculating the concentration of pesticides to be used and the quantities of diluted pesticide necessary to complete a particular treatment;

(4) identification of common pests to be controlled and damages caused by such pests as subterranean termites, carpenter ants, wood decaying fungi, German, American and oriental cockroaches, silverfish, fleas, ticks, spiders, pantry pests, house mice, field mice, and Norway rats, the basic characteristics and habits of these pests and conditions that favor structural infestation by these pests;

(5) protective clothing and equipment, including the use and maintenance of rubber gloves and respirators;

(6) general precautions to be followed in the storage and disposal of pesticide containers and

rinsate, as well as the cleaning and decontamination of equipment;

(7) applicable state and federal pesticide laws and regulations germane to the work of a technician, including but not limited to following label directions, direct supervision, information required on statements of services, and termite control application procedures; and

(8) basic information regarding elements of construction likely to be encountered including, heating and plumbing systems and such terms as footing, foundation wall, wall voids, sill plate, joists, subfloor, and slab-on-grade. (Authorized by K.S.A. 2-2467a, implementing K.S.A. 2-2440a; effective, T-88-46, Nov. 10, 1987; effective May 1, 1988; amended Jan. 1, 1989; amended Jan. 25, 1993.)

4-13-37. Renewal of pest control technician registration. A pest control technician's registration may be renewed for a succeeding one-year period by paying the fees prescribed by law, completing the renewal application form provided by the secretary, and completing successfully six hours of classroom training in approved subjects during the effective period of the technician's registration. This training may be conducted by the pesticide business licensee, or in the alternative, the pest control technician may attend a training course approved by the secretary. The pesticide business licensee shall verify and maintain records to support the verification that each pest control technician it employs has satisfactorily completed the training required for renewal. (Authorized by K.S.A. 2-2467a, as amended by L. 1987, Ch. 12, § 5; implementing L. 1987, Ch. 12, § 4; effective, T-88-46, Nov. 10, 1987; effective May 1, 1988.)

4-13-38. Training of registered pest control technicians in ornamental pest control, turf pest control and interior landscape pest control. (a) All applicants for pest control technician registration in ornamental pest control, turf pest control or interior landscape pest control shall have completed a minimum of 40 hours of verifiable training, 30 hours of which must consist of supervised application of pesticides for the control of ornamental pests, turf pests or interior landscape pests as appropriate, and 10 hours of which must be classroom instruction.

(b) Classroom instruction shall include the following:

(1) The proper use and maintenance of equipment, including calibration.

(2) the hazards that may be involved in applying the pesticides, including:

(A) The effect of drift of the pesticides on adjacent and nearby property and on nontarget organisms, and methods for preventing drift;

(B) the proper weather conditions for the application of pesticides and the precautions to be taken;

(C) procedures for preventing pesticide contamination of groundwater, wells and cisterns, surface water, soil, or the air within a structure;

(D) the effect of the pesticides on humans, plants or animals in the area, including the possibility of damage to plants or animals or the possibility of undesirable or illegal residues resulting on them;

(E) the effect of the application of pesticides on wildlife in the area, including aquatic life;

(F) the possibility of contamination of water or injury to persons, pets or desirable vegetation;

(G) hazards to the applicator resulting from mixing, loading and applying pesticides;

(H) poisoning prevention, symptoms and first aid for pesticide poisoning;

(I) label review and basic information about each pesticide used, including common names of the pesticides, where and how each pesticide may be applied, and the kinds of pests controlled;

(J) basic information about prevention and cleanup of spills; and

(K) basic information about beneficial insects and the use of non-chemical means to control ornamental pests, turf pests and interior landscape pests;

(3) calculating the concentration of pesticides to be used and the quantities of diluted pesticide necessary to complete a particular treatment.

(4) identification of common pests to be controlled and damages caused by such pests, as listed below, and the basic characteristics and habits of these pests.

(A) For registered pest control technicians in the field of ornamental pest control, common pests shall include but not be limited to: bagworms, cankerworms, elm leaf beetles, aphids, spider mites, galls and gall-producing insects and diseases, flatheaded and roundheaded wood boring beetles, scale insects, cedar-apple rust, anthracnose and powdery mildew.

(B) For registered pest control technicians in the field of turf pest control, common pests shall include but not be limited to: sod webworms, chinch bugs, white grubs, sowbugs, broadleaf weeds such as dandelion, chickweed, and henbit, grasses such as crabgrass, foxtail and annual blue-

grass, *Helminthosporium* leaf spot, *Pythium* and *Fusarium* blights, moles and gophers.

(C) For registered pest control technicians in the field of interior landscape control, common pests shall include but not be limited to: whiteflies, mealybugs, scale insects, spider mites, aphids, fungus gnats, snails and slugs, ants, sowbugs, thrips, damping-off, botrytis blight and powdery mildew;

(5) protective clothing and equipment, including the use and maintenance of rubber gloves and boots, rainsuits and respirators.

(6) general precautions to be followed in the storage and disposal of pesticide containers and rinsate, as well as the cleaning and decontamination of equipment.

(7) applicable state and federal pesticide laws and regulations germane to the work of a technician, including following label directions, direct supervision and information required on statements of services. (Authorized by K.S.A. 2-2467a; implementing K.S.A. 2-2440a; effective Jan. 1, 1989; amended Jan. 25, 1993.)

4-13-40. Types of hearings. (a) A conference adjudicative hearing may be used for the following types of action:

(1) Suspension or revocation of a pesticide business license for the licensee's failure to maintain acceptable insurance or bond continuously during the licensing period as required by K.S.A. 2-2448, and amendments thereto;

(2) suspension or revocation of the pesticide business license or governmental registration for the licensee's failure to employ a certified commercial applicator for each category of business operations in which a license has been issued;

(3) suspension of a pesticide business license, governmental registration, or applicator's certificate, whether commercial or private, that has been issued when fees were paid by an insufficient fund check;

(4) suspension or revocation of a pesticide business license, governmental agency registration, or any certificate for multiple or repeated violations of the Kansas pesticide law or of the implementing regulations, if no material issue of fact is involved; and

(5) any other instances designated in K.S.A. 77-533, and amendments thereto.

Nothing in this subsection shall prohibit the conversion of another type of hearing to a conference adjudicative hearing. Conversion procedures

shall conform with K.S.A. 77-506, and amendments thereto.

(b) The summary adjudicative hearing may be used for the following types of action:

(1) A reprimand, warning, or disciplinary report pertaining to a violation of the Kansas pesticide law or any implementing regulation;

(2) any matter that can be resolved solely on the basis of inspections, examinations, or tests made by the agency or its personnel; and

(3) assessment of civil penalties pertaining to a violation of the Kansas pesticide law or any implementing regulation.

All other hearings, except emergency adjudicative hearings or hearings that have been initiated as or converted to conference adjudicative hearings or summary adjudicative hearings, shall be formal adjudicative hearings as defined in the Kansas administrative procedures act. (Authorized by K.S.A. 2-2467a; implementing K.S.A. 2-2449 and 2-2451; effective May 1, 1985; amended July 18, 2008.)

4-13-41. (Authorized by K.S.A. 2-2467a; implementing K.S.A. 2-2449, 2-2451, and K.S.A. 77-513, 77-537, 77-538, 77-539, 77-540, 77-541; effective May 1, 1985; amended Jan. 25, 1993; revoked July 18, 2008.)

4-13-42. (Authorized by K.S.A. 2-2467a; implementing K.S.A. 2-2449, 2-2451, and K.S.A. 77-513, 77-534, 77-535; effective May 1, 1985; amended Jan. 25, 1993; revoked July 18, 2008.)

4-13-60. Civil penalty; order. Each order assessing a civil penalty shall include the following:

(a) A statement reciting each subsection of the act authorizing the assessment of civil penalty;

(b) a specific reference to each provision of the act or implementing regulation that the respondent is alleged to have violated;

(c) a concise statement of the factual basis for each violation alleged;

(d) the amount of the civil penalty to be assessed; and

(e) the notice of the respondent's right to request a hearing. (Authorized by K.S.A. 2-2467a; implementing K.S.A. 2-2440e; effective Jan. 1, 1989; amended Aug. 22, 1994; amended July 18, 2008.)

4-13-61. (Authorized by K.S.A. 2-2467a; implementing K.S.A. 2-2440e; effective Jan. 1, 1989; amended Aug. 22, 1994; revoked July 18, 2008.)

4-13-62. Amount of civil penalty. (a) A separate civil penalty shall be assessed for each violation of the pesticide law that results from each independent act or failure to act by any pesticide business licensee or pesticide dealer, or any agent or employee of a pesticide business licensee or pesticide dealer. In determining whether a given violation is independent of and substantially distinguishable from any other violation for the purpose of assessing separate civil penalties, consideration shall be given to whether each violation requires an element of proof not required by another violation. If several violations require the same elements of proof and are not distinguishable, the assessment of separate civil penalties shall be within the discretion of the secretary or the secretary's authorized representative.

(b) The amount of each civil penalty shall be within the following ranges:

(1) For each violation of K.S.A. 2-2453(a) or (b) and amendments thereto, the civil penalty shall be not less than \$100 and not more than \$5,000.

(2) For each violation of K.S.A. 2-2454(b), (m), (o), (r), (s), or (t) and amendments thereto, the civil penalty shall be not less than \$100 and not more than \$5,000.

(3) For each violation of K.S.A. 2-2454, and amendments thereto, not covered in paragraph (b)(2), the civil penalty shall be not less than \$100 and not more than \$1,000.

(4) For each violation of K.S.A. 2-2453(c), and amendments thereto, not already covered in paragraph (b) (1), (2), or (3), the civil penalty shall be not less than \$100 and not more than \$1,000.

(c) For each subsequent occurrence of a violation for which a civil penalty has been assessed within a three-year period, the civil penalty assessed for the subsequent violation shall be the maximum amount for the category listed. (Authorized by K.S.A. 2-2467a; implementing K.S.A. 2-2440e, as amended by L. 2009, Ch. 128, §15; effective Jan. 1, 1989; amended Jan. 25, 1993; amended Feb. 5, 2010.)

4-13-63. Criteria to determine dollar amount of proposed civil penalty. In determining the amount of any proposed civil penalty, the gravity of the violation shall be considered by the secretary or the secretary's designee. Factors to be considered shall include:

(a) The potential of the act to injure humans, pets, domestic animals, wildlife or the environment;

(b) the severity of potential injuries;

(c) the extent to which injury actually occurred;

(d) the respondent's history of compliance with state and federal pesticide laws and regulations promulgated thereunder;

(e) any action taken by respondent to remedy the specific violation or to mitigate any adverse health effects or environmental effects which were the result of the violation; and

(f) whether or not the violation involved any misrepresentation or fraud. (Authorized by K.S.A. 2-2467a; implementing K.S.A. 2-2440e; effective Jan. 1, 1989; amended Jan. 25, 1993.)

4-13-64. Informal settlement. (a) Any respondent may request a settlement conference if the respondent timely filed a written request for hearing. The request may be made before the prehearing conference.

(b) If a settlement is reached, the parties shall reduce the settlement to writing and present the proposed written consent agreement to the secretary. The consent agreement shall state that, for the purpose of the proceeding, the following conditions are met:

(1) The respondent admits the jurisdictional allegations and admits the facts stipulated in the consent agreement.

(2) The respondent neither admits nor denies the specific violations contained in the order.

(3) The respondent consents to the assessment of a stated civil penalty.

The consent agreement shall include all terms of the agreement and shall be signed by all parties or their counsel. (Authorized by K.S.A. 2-2467a; implementing K.S.A. 2-2440e; effective Jan. 1, 1989; amended Aug. 22, 1994; amended July 18, 2008.)

4-13-65. Adjusting the amount of the civil penalty. (a) Each respondent shall present all evidence on the issue of adjustment of the civil penalty at the settlement conference. This evidence may include mitigating factors or new evidence not previously known to the agency when the order was issued.

(b) Upon presentation by the respondent of new evidence establishing facts and circumstances that were unknown to the secretary when the order was issued and that relate to the gravity of the violation, the civil penalty may be reduced. If additional facts establish a respondent did not commit a violation, the order shall be amended or vacated.

(c) The burden shall be on the respondent to present evidence of any mitigating factors to support any requested reduction in the amount of the civil penalty. The amount of the civil penalty may be reduced if the reduction serves the public interest.

(d) The amount of a civil penalty shall not be reduced to less than \$100 per offense.

(1) Whether or not a civil penalty is reduced shall be within the sole discretion of the secretary or the secretary's designee.

(2) Reductions shall not occur unless evidence of mitigating factors has been presented by a respondent. (Authorized by K.S.A. 2-2467a; implementing K.S.A. 2-2440e; effective Jan. 1, 1989; amended Aug. 22, 1994; amended July 18, 2008.)

Article 14.—HONEYBEES

4-14-1. (Authorized by K.S.A. 2-413, 2-424; implementing K.S.A. 2-413; effective, T-83-37, Nov. 10, 1982; effective May 1, 1983; revoked Oct. 18, 2002.)

4-14-2. (Authorized by K.S.A. 2-415, 2-424; implementing K.S.A. 2-415; effective, T-83-37, Nov. 10, 1982; effective May 1, 1983; revoked Oct. 18, 2002.)

4-14-3. (Authorized by K.S.A. 2-422a, 2-424; implementing K.S.A. 2-422a; effective, T-83-37, Nov. 10, 1982; effective May 1, 1983; revoked Oct. 18, 2002.)

Article 15.—PLANTS AND PLANT PRODUCTS

4-15-1. (Authorized by K.S.A. 2-2118, 2-2126; implementing K.S.A. 2-2118; effective, T-83-25, Oct. 1, 1982; effective May 1, 1983; revoked Oct. 18, 2002.)

4-15-2. (Authorized by K.S.A. 2-2118, 2-2126; implementing K.S.A. 2-2118; effective, T-83-25, Sept. 1, 1982; effective May 1, 1983; amended July 1, 1992; revoked Oct. 18, 2002.)

4-15-3. (Authorized by K.S.A. 2-2120, 2-2126; implementing K.S.A. 2-2120; effective, T-83-25, Sept. 1, 1982; effective May 1, 1983; revoked Oct. 18, 2002.)

4-15-4. Live plant definition: exclusions. The following shall be excluded from the defini-

tion of live plant in K.S.A. 2-2113, and amendments thereto: (a) Field and forage crops;

(b) seeds of any kind;

(c) cut flowers and cut greenery not used for propagation; and

(d) fruits and vegetables used for food or feed. (Authorized by K.S.A. 2010 Supp. 2-2126, as amended by L. 2011, ch. 72, sec. 11; implementing K.S.A. 2010 Supp. 2-2113, as amended by L. 2011, ch. 72, sec. 1; effective Oct. 18, 2002; amended May 18, 2012.)

4-15-5. Live plant dealer license fee. The fee for a live plant dealer license shall be \$80. (Authorized by K.S.A. 2010 Supp. 2-2126, as amended by L. 2011, ch. 72, sec. 11; implementing K.S.A. 2010 Supp. 2-2120, as amended by L. 2011, ch. 72, sec. 6; effective Oct. 18, 2002; amended June 5, 2009; amended, T-4-11-21-11, Nov. 21, 2011; amended March 23, 2012.)

4-15-6. Plant pest emergency response fund fee. In addition to the license fee specified in K.A.R. 4-15-5, each licensed live plant dealer shall pay a fee of \$5, which shall be deposited in the plant pest emergency response fund. (Authorized by K.S.A. 2010 Supp. 2-2126, as amended by L. 2011, ch. 72, sec. 11, and K.S.A. 2010 Supp. 2-2129, as amended by L. 2011, ch. 72, sec. 13; implementing K.S.A. 2010 Supp. 2-2129, as amended by L. 2011, ch. 72, sec. 13; effective Oct. 18, 2002; amended March 23, 2012.)

4-15-7. Live plant dealer licensing exemptions. (a) Any live plant dealer who does not import live plants from outside the state of Kansas, does not export live plants from the state of Kansas, and has annual gross receipts from the distribution of live plants that are less than \$10,000 shall be exempt from the licensing requirements.

(b) Each live plant dealer seeking to claim the licensing exemption shall submit annually on a form furnished by the department an application specifying the applicant's basis for claiming exemption from licensing requirements. If the secretary finds that an applicant meets the criteria specified in subsection (a), the applicant shall be exempt from licensing requirements.

(c) Each live plant dealer exempt from licensing requirements shall be subject to all quarantines and the regulated nonquarantine pest freedom standards established in K.A.R. 4-15-10. (Authorized by K.S.A. 2010 Supp. 2-2126, as amended by L. 2011, ch. 72, sec. 11; implementing K.S.A.

2010 Supp. 2-2120, as amended by L. 2011, ch. 72, sec. 6; effective Oct. 18, 2002; amended May 6, 2005; amended May 18, 2012.)

4-15-8. Fees for the inspection of live plants, plant products, bees, beekeeping equipment, and regulated articles. (a) Inspection services may be provided upon request to any person who owns or possesses live plants, plant products, bees, beekeeping equipment, or regulated articles. The person shall pay inspection fees of \$30 per hour plus mileage expenses. Inspection fees shall include hourly fees for travel time and time spent on-site.

(b) On-site hourly fees shall be calculated from the inspector's time of arrival until completion of the inspection, excluding breaks, meals, and any time not directly associated with conducting the inspection. A quarter-hour minimum shall be assessed, and the total on-site inspection time shall be rounded to the nearest quarter-hour.

(c) Hourly fees for travel time shall consist of actual driving time, excluding breaks, meals, and any time not directly associated with traveling to and from the inspection site. The total travel time shall be rounded to the nearest quarter-hour. If multiple inspections are completed at different locations, travel time shall be apportioned between inspections using the method for calculating and apportioning mileage fees specified in this regulation. If mileage fees are reduced to reflect a distance less than the distance actually travelled, travel time shall be reduced by a percentage equal to the percentage of reduction in the number of miles actually travelled.

(d) Mileage to the inspection site shall be calculated from one of the following locations as applicable on the date the inspection is conducted, whichever is less:

(1) The inspector's official station;

(2) the last location at which a requested inspection was conducted; or

(3) the last location at which the inspector incurred lodging expenses.

(e) The person for which the last requested inspection is conducted on any day shall pay mileage fees for the return trip to the inspector's official station or the location at which the inspector incurs lodging expenses, whichever is less.

(f) Mileage fees shall be calculated using the actual miles driven by the inspector or the adjusted miles if reduced pursuant to this regulation. The rate per mile shall be the private

vehicle mileage reimbursement rate fixed by the secretary of administration.

(g) Any inspection, certification, diagnostic, or identification fee may be waived if the fee would be assessed against a state or local government agency. (Authorized by K.S.A. 2010 Supp. 2-2126, as amended by L. 2011, ch. 72, sec. 11; implementing K.S.A. 2010 Supp. 2-2118, as amended by L. 2011, ch. 72, sec. 5; effective Oct. 18, 2002; amended May 6, 2005; amended May 18, 2012.)

4-15-9. Fees for the certification of live plants, plant products, bees, beekeeping equipment, and regulated articles. (a) If a state certificate is required for the entry of an inspected article into another state or a foreign country, the person needing certification shall pay one or more of the following, as applicable:

(1) \$20 for a certificate for a commodity or article certified for domestic shipment;

(2) \$50 for a certificate for a commodity or article certified for international shipment; or

(3) 20 cents for each bale tag provided to satisfy a weed-free forage requirement.

(b) If a federal certificate is also required for the entry of an inspected article into another state or a foreign country, the associated fee shall be added to the amount specified in subsection (a). (Authorized by K.S.A. 2010 Supp. 2-2126, as amended by L. 2011, ch. 72, sec. 11; implementing K.S.A. 2010 Supp. 2-2118, as amended by L. 2011, ch. 72, sec. 5; effective Oct. 18, 2002; amended Feb. 2, 2007; amended May 18, 2012.)

4-15-9a. Live plant dealer; certificate of inspection. (a) Any live plant dealer may request a certificate of inspection to establish that the live plant dealer's live plants meet pest freedom standards.

(b) Each inspection pursuant to this regulation shall be conducted at a time chosen by the secretary to permit adequate inspection for the presence of plant pests giving consideration to the type of live plants inspected. If necessary due to the diversity of the live plants or for other reasons, multiple inspections may be conducted by the secretary.

(c) If the live plants inspected meet pest freedom standards, a certificate of inspection may be issued by the secretary.

(d) Each certificate of inspection shall be valid for one of the following:

(1) A period beginning on October 1 of the year the inspection was conducted through September 30 of the following calendar year; or

(2) a lesser period that the secretary may determine based upon the request of the live plant dealer due to the growing season and distribution schedule for the live plants.

(e) Any request for a certificate of inspection may be denied and any certificate of inspection may be revoked by the secretary upon finding any of the following:

(1) An adequate inspection cannot be conducted.

(2) The live plant dealer's live plants do not meet pest freedom standards.

(3) Denial of the request for a certificate of inspection or revocation of the certificate of inspection is necessary to prevent or retard the spread of a plant pest that could cause economic or environmental harm. (Authorized by K.S.A. 2010 Supp. 2-2126, as amended by L. 2011, ch. 72, sec. 11; implementing K.S.A. 2010 Supp. 2-2118, as amended by L. 2011, ch. 72, sec. 5; effective May 18, 2012.)

4-15-10. Pest freedom standards. (a) The pest freedom standards specified in this regulation shall apply to all live plants grown, sold, distributed, planted, transported, moved, or given away by a live plant dealer or the live plant dealer's designated agent. As used in this regulation, "possessed" shall include being grown, sold, distributed, planted, transported, moved, or given away.

(b) Live plants on which quarantine pests are present shall be prohibited from entering the state or being possessed within the state by live plant dealers or any live plant dealer's designated agent.

(c) Live plants on which regulated nonquarantine pests are present shall be prohibited from entering the state or being possessed within the state by live plant dealers or any live plant dealer's designated agent unless the live plants are within the limits as specified in this regulation.

(d) Live plants on which plant pests that are neither quarantine pests nor regulated nonquarantine pests are present may enter the state and be possessed by live plant dealers. These live plants shall remain subject to regulatory action if the secretary finds that action is necessary to prevent or retard the spread of a plant pest that could cause economic or environmental harm.

(e) Only live plants free of quarantine pests and within the limits for the presence of regulated nonquarantine pests may be certified as meeting pest freedom standards. When necessary for ex-

port, standards more stringent than those specified in this regulation may be utilized by the secretary to ensure compliance with all applicable quarantines and regulated nonquarantine pest freedom standards.

(f) The classes of regulated nonquarantine pests shall be the following, with the limits specified:

(1) For insects and arachnids that bore into live plants, scarab beetles, scale insects, and weevils, the number of infested plants shall be zero percent of the total number of plants in the lot, cultivar, or group of a single species of plant.

(2) For diseases known as viruses, viroids, phytoplasmas, spiroplasmas, mycoplasmas, the genera or species of diseases caused by *Phytophthora* (a group of fungal diseases that infect various plants and plant parts), *Bursaphelenchus xylophilus* (pine wilt nematode), *Meloidogyne* (root knot nematodes), *Erwinia amylovora* (fire blight), *Agrobacterium tumefaciens* (crown gall), and bacterial species that can cause wilt disease, the number of infected plants shall be zero percent of the total number of plants in the lot, cultivar, or group of a single species of plant.

(3) For diseases known to cause wilts, galls, cankers, root rot, and crown rot, the number of infected plants shall be less than five percent of the total number of plants in the lot, cultivar, or group of a single species of plant.

(4) For plant parasitic nematodes, the number of infected plants with foliage affected or root systems stunted or underdeveloped shall be less than five percent of the total number of plants in the lot, cultivar, or group of a single species of plant.

(5) For foliar diseases of plants other than evergreens, the number of infected plants with more than 10 percent of the foliage affected shall be less than 15 percent of the total number of plants in the lot, cultivar, or group of a single species of plant.

(6) For foliar diseases of evergreens, the number of infected plants with more than one percent of the foliage affected shall be less than five percent of the total number of plants in the lot, cultivar, or group of a single species of plant. (Authorized by K.S.A. 2010 Supp. 2-2126, as amended by L. 2011, ch. 72, sec. 11; implementing K.S.A. 2010 Supp. 2-2117, as amended by L. 2011, ch. 72, sec. 4; effective Oct. 18, 2002; amended May 18, 2012.)

4-15-11. Civil penalty; order. Each order assessing a civil penalty shall include the following:

(a) A statement reciting each subsection of the act authorizing the assessment of a civil penalty;

(b) a statement of the factual basis for each violation alleged and a reference to each provision of the act or implementing regulation that the respondent is alleged to have violated;

(c) the amount of the civil penalty; and

(d) notice of the respondent's right to a hearing. (Authorized by K.S.A. 2007 Supp. 2-2126; implementing K.S.A. 2007 Supp. 2-2125; effective Oct. 18, 2002; amended July 18, 2008.)

4-15-12. (Authorized by K.S.A. 2-2126, as amended by 2002 SB 437, § 13; implementing K.S.A. 2-2125(b), as amended by 2002 SB 437, § 12; effective Oct. 18, 2002; revoked July 18, 2008.)

4-15-13. Criteria to determine dollar amount of civil penalty. (a) A civil penalty of at least \$100.00 but not more than \$2,000.00 may be assessed by the secretary for each violation of the plant pest and agriculture commodity certification act, K.S.A. 2-2112 et seq., and amendments thereto, and the implementing regulations.

(b) In determining the amount of any civil penalty, the gravity of the violation shall be considered by the secretary. Factors to be considered shall include the following:

(1) The potential of the act to injure, endanger, or harm the health of any consumer, the general public, cultivated or native plant resources, or the environment;

(2) the severity of actual or potential harm or injuries;

(3) the respondent's history of compliance with the plant pest and agriculture commodity certification act, and amendments thereto, and the implementing regulations;

(4) any action taken by respondent to remedy the specific violation or to mitigate any adverse effects of the violation on public health, cultivated or native plant resources, or the environment as a result of the violation; and

(5) any misrepresentation or fraud involved in the violation. (Authorized by K.S.A. 2011 Supp. 2-2126; implementing K.S.A. 2011 Supp. 2-2125; effective Oct. 18, 2002; amended July 18, 2008; amended May 18, 2012.)

4-15-14. Informal settlement. (a) Any respondent may request a settlement conference if the respondent timely filed a written request for hearing. The request may be made before the prehearing conference.

(b) If a settlement is reached, the parties shall reduce the settlement to writing and present the proposed written consent agreement to the secretary. The consent agreement shall state that, for the purpose of the proceeding, the following conditions are met:

(1) The respondent admits the jurisdictional allegations and admits the facts stipulated in the consent agreement.

(2) The respondent neither admits nor denies the specific violations contained in the order.

(3) The respondent consents to the assessment of a stated civil penalty.

The consent agreement shall include all terms of the agreement and shall be signed by all parties or their counsel. (Authorized by and implementing K.S.A. 2007 Supp. 2-2126; effective Oct. 18, 2002; amended July 18, 2008.)

Article 16.—MEAT AND MEAT PRODUCTS INSPECTION

Part I.—DEFINITIONS

4-16-1. (Authorized by K.S.A. 65-6a44; implementing K.S.A. 65-6a18, 65-6a30; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended, E-71-18, April 28, 1971; amended Jan. 1, 1972; amended, E-73-10, Feb. 16, 1973; amended Jan. 1, 1974; amended May 1, 1975; amended May 1, 1982; revoked May 1, 1986.)

4-16-1a. Definitions. (a) Each of the following terms, as used in the act and in the portions of the code of federal regulations adopted by reference in K.A.R. 4-16-1c, shall have the meaning specified in this subsection:

(1) “The act,” “act,” and “federal meat inspection act” shall mean K.S.A. 65-6a18 et seq. and amendments thereto.

(2) “Administrator,” except as used in 9 C.F.R. 303.1(d)(2)(iii)(b), shall mean the secretary of the department of agriculture or the secretary’s designee.

(3) “Beef” shall mean the skeletal muscle of any cattle. Beef shall not include any of the following:

(A) The muscles of the tongue, heart, or esophagus;

(B) the muscles found in the lips, muzzle, or ears;

(C) any portions of bone, including hard bone, bone marrow, and related components; or

(D) any amount of brain trigeminal ganglia, spinal cord, or dorsal root ganglia (DRG).

(4) “Cheek meat” shall mean meat that is the trimmed cheeks of the carcass of cattle.

(5) “Commerce” shall mean intrastate commerce.

(6) “Egg products inspection act” shall mean the Kansas egg law, K.S.A. 2-2501 et seq. and amendments thereto.

(7) “Federal food, drug and cosmetic act” shall mean the Kansas food, drug and cosmetic act, K.S.A. 65-655 et seq. and amendments thereto.

(8) “Federal inspection” shall mean inspection by the Kansas department of agriculture.

(9) “Food locker plant” shall mean a “slaughter facility” or “processing facility,” as defined in K.S.A. 65-6a18 and amendments thereto.

(10) “Form,” either by number or by any other designation, shall mean a form supplied by the Kansas department of agriculture.

(11) “Inspected for wholesomeness by U.S. department of agriculture” shall mean inspected and passed by the Kansas department of agriculture.

(12) “Official establishment” and “establishment” shall mean any building or adjacent premises that are registered pursuant to this act, where livestock, as defined in K.S.A. 65-6a18 and amendments thereto, domestic rabbits, meat food products, poultry, or poultry products capable of use as human food are “prepared,” as defined by K.S.A. 65-6a18 and amendments thereto.

(13) “Program,” “food safety and inspection service,” “inspection service,” “service,” “department,” and “FSIS” shall mean the meat and poultry inspection program of the Kansas department of agriculture.

(14) “Secretary,” “national supervisor,” “area supervisor,” “inspection service supervisor,” “inspection program supervisor,” “circuit supervisor,” and “station supervisor” shall mean the secretary of the department of agriculture or the secretary’s designee.

(15) “U.S.” and “the United States” shall mean Kansas or the state of Kansas, as appropriate.

(16) “U.S. inspected” and “government inspected” shall mean inspected by the Kansas department of agriculture.

(17) “U.S.D.A.” and “USDA” shall mean Kansas department of agriculture or KDA, as appropriate.

(b) The phrase “official review and copying” in 9 C.F.R. 417.5(f), as adopted by reference in K.A.R. 4-16-1c, shall mean review and copying by the secretary of the department of agriculture or the secretary’s designee. (Authorized by K.S.A.

2011 Supp. 65-6a20, as amended by L. 2012, ch. 145, sec. 29, K.S.A. 65-6a25, K.S.A. 2011 Supp. 65-6a30, and K.S.A. 2011 Supp. 65-6a44; implementing K.S.A. 2011 Supp. 65-6a20, as amended by L. 2012, ch. 145, sec. 29, K.S.A. 65-6a21, K.S.A. 65-6a22, K.S.A. 65-6a23, K.S.A. 65-6a25, and K.S.A. 2011 Supp. 65-6a30; effective May 1, 1982; amended May 1, 1986; amended Jan. 1, 1989; amended Jan. 21, 1991; amended Jan. 25, 1993; amended Dec. 12, 1994; amended Sept. 5, 1997; amended Sept. 1, 2006; amended Dec. 5, 2008; amended May 10, 2013.)

4-16-1b. (Authorized by K.S.A. 65-6a44; implementing K.S.A. 65-6a20, 65-6a21, 65-6a22, 65-6a23, 65-6a25 and 65-6a30; effective May 1, 1982; amended May 1, 1985; revoked May 1, 1986.)

4-16-1c. Adoption by reference. (a) The following portions of title 9 of the code of federal regulations, as revised on January 1, 2012, except as otherwise specified, are hereby adopted by reference:

(1) Part 301, except the following terms and their definitions in section 301.2: “the act,” “adulterated,” “animal food manufacturer,” “label,” “labeling,” “livestock,” “meat broker,” “meat food product,” “misbranded,” “official import inspection established,” “person,” “pesticide chemical, food additive, color additive, raw agricultural commodity,” “prepared,” and “territory”;

(2) part 302, except section 302.2;

(3) part 303, except sections 303.1(d)(3) and 303.2;

(4)(A) Sections 304.1 and 304.2; and

(B) section 304.3, as amended by 77 fed. reg. 26936 (2012);

(5) parts 305 and 306, except sections 306.1, 306.2, and 306.3;

(6)(A) Sections 307.1 through 307.3;

(B) section 307.4, as amended by 77 fed. reg. 59294 (2012); and

(C) section 307.7;

(7) part 309;

(8) part 310;

(9) part 311;

(10) part 312, except section 312.8;

(11) parts 313 through 316;

(12) part 317, except sections 317.7 and 317.369;

(13) part 318, except section 318.8;

(14) part 319;

(15) part 320, except section 320.5(a);

(16) part 325, except section 325.3;

(17) part 329;

(18) part 352, except sections 352.1 (e), (f), (g), (j), (k), and (l), 352.4, 352.8, 352.10(a), 352.11(b), 352.17, and 352.18;

(19)(A) Section 354.1, except subparagraphs (a), (n), and (w);

(B) section 354.2;

(C) sections 354.10 through 354.14;

(D) sections 354.23 through 354.24;

(E) sections 354.26 through 354.30;

(F) sections 354.46 through 354.49;

(G) sections 354.53 through 354.92;

(H) sections 354.120 through 354.133; and

(I) sections 354.160 through 354.247;

(20)(A) Section 381.1, except the following terms and their definitions in subsection (b): “act,” “adulterated,” “animal food manufacturer,” “label,” “labeling,” “misbranded,” “pesticide chemical, food additive, color additive, raw agricultural commodity,” “poultry products broker,” “territory,” and “U.S. refused entry”;

(B) sections 381.3 through 381.7, except 381.5;

(C) sections 381.10 through 381.21;

(D) section 381.22, as amended by 77 fed. reg. 26936 (2012);

(E) sections 381.23 through 381.36;

(F) section 381.37, as amended by 77 fed. reg. 59294 (2012);

(G) sections 381.65 through 381.103, except 381.96;

(H) sections 381.108 through 381.182;

(I) sections 381.189 through 381.194;

(J) sections 381.210 through 381.217, except section 381.216; and

(K) sections 381.300 through 381.500, except section 381.469;

(21) part 416;

(22)(A) Sections 417.1 through 417.3;

(B) section 417.4, as amended by 77 fed. reg. 26936 (2012); and

(C) sections 417.5 through 417.8;

(23) part 418, as added in 77 fed. reg. 26936 (2012); and

(24) parts 424, 430, 439, 441, 442, and 500.

(b) The “food standards and labeling policy book,” as published by the office of policy, program and employee development of the USDA food safety and inspection service and revised for web publication in August 2005, is hereby adopted by reference. This document shall apply to meat and poultry products.

(c) Copies of the adopted material or the pertinent portions shall be available from the meat and poultry

inspection program of the department of agriculture, Topeka, Kansas. (Authorized by K.S.A. 2011 Supp. 65-6a20, as amended by L. 2012, ch. 145, sec. 29, K.S.A. 65-6a25, K.S.A. 2011 Supp. 65-6a30, and K.S.A. 2011 Supp. 65-6a44; implementing K.S.A. 2011 Supp. 65-6a20, as amended by L. 2012, ch. 145, sec. 29, K.S.A. 65-6a21, K.S.A. 65-6a22, K.S.A. 65-6a23, K.S.A. 65-6a25, and K.S.A. 2011 Supp. 65-6a30; effective May 1, 1986; amended May 1, 1988; amended Jan. 1, 1989; amended Jan. 21, 1991; amended Jan. 25, 1993; amended Dec. 12, 1994; amended Sept. 5, 1997; amended Sept. 1, 2006; amended Dec. 5, 2008; amended May 10, 2013.)

Part II.—SCOPE OF INSPECTION

4-16-2. (Authorized by K.S.A. 65-6a30, 65-6a44; implementing K.S.A. 65-6a30; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended May 1, 1982; revoked May 1, 1986.)

4-16-3. (Authorized by K.S.A. 1972 Supp. 65-6a30; effective, E-70-4, Dec. 1, 1970; effective Jan. 1, 1971; amended, E-71-18, April 28, 1971; amended Jan. 1, 1972; amended Jan. 1, 1973; revoked May 1, 1986.)

4-16-3a. Exemptions. (a) Notwithstanding the requirements for the exemption as a “custom slaughterer” as set forth in 9 C.F.R. 303.1(a) and (b) adopted by reference in K.A.R. 4-16-1c, both the custom slaughtering of dead or dying animals by any person and the custom processing of the carcasses of dead or dying animals by any person shall be prohibited.

(b)(1) The custom slaughtering of diseased or disabled animals by any person and the custom processing of the carcasses of diseased or disabled animals by any person may be allowed if both of the following requirements are met:

(A) The animal shall be examined by a licensed veterinarian on the day of slaughter.

(B) The animal shall be accompanied by a health certificate that meets the following requirements:

(i) Is issued on the day of slaughter by that veterinarian. This health certificate shall be valid only on the date of issuance;

(ii) includes a record of the animal’s body temperature, taken at the time of the veterinary examination;

(iii) for cattle, states that the animal was ambulatory when examined;

(iv) includes a description of the condition of the animal; and

(v) states that the animal is free of any visible signs of infection or contagious disease.

(2) Notwithstanding the slaughter of an apparently healthy animal or an animal for which a health certificate has been issued, an establishment shall not custom process any carcass of an animal so infected that consumption of the resulting products of the animal could pose a health risk. This prohibition shall include all carcasses showing signs of any of the following:

(A) Acute inflammation of the lungs, pleura, pericardium, peritoneum, or meninges;

(B) septicemia or pyemia, whether puerperal, traumatic, or without any evident cause;

(C) gangrenous or severe hemorrhagic enteritis or gastritis;

(D) acute, diffuse metritis or mammitis;

(E) phlebitis of the umbilical veins;

(F) septic or purulent traumatic pericarditis;

(G) any of the following conditions or similar conditions, either singly or in combination:

(i) Any acute inflammation, abscess, or suppurating sore, if associated with acute nephritis;

(ii) fatty and degenerated liver;

(iii) swollen, soft spleen;

(iv) marked pulmonary hyperemia;

(v) general swelling of lymph nodes;

(vi) diffuse redness of the skin;

(vii) cachexia; or

(viii) icteric discoloration of the carcass; or

(H) salmonellosis.

(3) The department shall not be responsible for the costs associated with obtaining a health certificate.

(4)(A) An establishment may lose the privilege of custom slaughtering and custom processing diseased or disabled animals if any of the following occurs at the establishment:

(i) Custom slaughter, custom processing, or both, without the required health certificate;

(ii) custom slaughtering, custom processing, or both, with an inaccurate, incomplete, or falsified health certificate. Evidence of the falsification of any health certificate shall be forwarded to USDA-APHIS and to the Kansas board of veterinary medical examiners;

(iii) custom slaughtering, custom processing, or both, of an animal that is so infected that consumption of the resulting products from that animal could pose a health risk; or

(iv) any other violation of this act or any regulations adopted pursuant to this act.

(B) The slaughtering of diseased or disabled

animals on a custom basis without the required health certificate may result in the revocation of the custom exemption.

(c) Except as specified in this subsection, the following animals with any of these conditions shall not be eligible for slaughter or processing for human food on a custom basis at any establishment and shall not be issued a health certificate:

(1) Livestock that are known to have reacted to the tuberculin test;

(2) any swine having a temperature of 106°F or higher and any cattle, sheep, or goats having a temperature of 105°F or higher;

(3) any animal found in a comatose or semicomatose condition;

(4) nonambulatory disabled cattle, which shall mean cattle that cannot rise from a recumbent position and that cannot walk, including those cattle with broken appendages, severed tendons or ligaments, nerve paralysis, fractured vertebral column, or metabolic conditions;

(5) all livestock showing symptoms of anaplasmosis, ketosis, leptospirosis, listeriosis, parturient paresis, pseudorabies, rabies, scrapie, tetanus, grass tetany, transport tetany, strangles, purpura hemorrhagica, azoturia, infectious equine encephalomyelitis, toxic encephalomyelitis (forage poisoning), dourine, acute influenza, generalized osteoporosis, glanders (farcy), acute inflammatory lameness, or extensive fistula;

(6) all swine found to be affected with hog cholera;

(7) all swine that are of lots in which one or more animals have been found to be affected with hog cholera;

(8) any animal found to be affected with epithelioma of the eye;

(9) any animal found to be affected with anthrax;

(10) any animal of a lot in which anthrax is found, until it has been determined by a veterinary inspection that no anthrax-infected livestock remain in the lot;

(11) all cattle found, upon veterinary inspection, to be affected with anasarca in an advanced stage and characterized by an extensive and generalized edema;

(12) any hog showing that it is affected with acute swine erysipelas;

(13) any animal showing signs of the onset of parturition, until after parturition and passage of the placenta;

(14) any goat that has reacted to a test for brucellosis; or

(15) any animal suspected of having been treated with or exposed to any substance that could impart a biological residue that would make the edible tissues unfit for human food or otherwise adulterated.

(d) Only those requirements of the act relating to sanitation and adulteration shall apply to the slaughtering or processing, or both, of healthy rabbits by any person if either of the following conditions is met:

(1) The rabbits are raised by that person and are for the exclusion use or consumption by that person, members of that person's household, former members of that person's household, or that person's nonpaying guests and employees.

(2)(A) That person slaughters not more than 250 rabbits in a calendar year;

(B) the rabbits are for distribution directly to household consumers from that person's own premises; and

(C) that person does not engage in the business of buying or selling any rabbits or rabbit products capable of use as human food in a calendar year. (Authorized by K.S.A. 2005 Supp. 65-6a44; implementing K.S.A. 2005 Supp. 65-6a31; effective Jan. 1, 1989; amended Sept. 1, 2006.)

Part III.—APPLICATION FOR REGISTRATION AND INSPECTION

4-16-4. (Authorized by K.S.A. 1970 Supp. 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1986.)

Part IV.—OFFICIAL NUMBERS AND INAUGURATION OF INSPECTION

4-16-5. (Authorized by K.S.A. 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1982.)

Part V.—ASSIGNMENTS OF DIVISION EMPLOYEES

4-16-6. (Authorized by K.S.A. 1970 Supp. 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1986.)

Part VI.—FACILITIES FOR INSPECTION AND HOURS OF OPERATION

4-16-7. (Authorized by K.S.A. 65-6a26, 65-6a30, 65-6a32, 65-6a44; effective Jan. 1, 1971; amended, E-80-25, Dec. 12, 1979; amended May 1, 1980; revoked May 1, 1986.)

4-16-7a. Inspection fees. (a) Each establishment that requires inspection services at any

time other than the establishment's regularly scheduled inspection periods or requests voluntary inspection services shall be subject to the charges specified in this regulation to defray the department's costs of providing these inspection services. Regularly scheduled inspection periods shall not include any legal holiday or any officially observed holiday as designated in K.A.R. 1-9-2.

(b) Each establishment that requests inspection services on a legal holiday or an officially observed holiday as designated in K.A.R. 1-9-2 shall give the secretary at least two weeks' notice before the holiday. Except for Martin Luther King, Jr. Day, the Fourth of July, and Veterans' Day, if the legal holiday occurs or is observed on a Monday or Friday, the fees shall also apply to inspection services requested during the adjacent weekend.

(c)(1) The hourly fee shall be \$28. The hourly fee shall be calculated in quarter-hour units. Unless otherwise specified, a required minimum charge of two hours shall be assessed.

(2) For slaughter with the mark of inspection, the hourly fee shall be assessed for the amount of time needed to conduct the inspection. The inspection shall include the inspector's drive time to and from the establishment. If the establishment processes with the mark of inspection that day, then the amount of time to inspect the processing operations shall be included in the total inspection time.

(3) For processing with the mark of inspection, a fee of \$40 shall be assessed per day if the establishment is processing with the mark of inspection and not slaughtering with the mark of inspection.

(d) Each establishment that requests inspection services over eight hours in one day shall be assessed fees as follows, if the secretary can accommodate the extra time:

(1) If the request is made before the inspector's arrival at the establishment or while the inspector is at the establishment, the hourly fee shall be assessed for the actual time of the additional inspection. The two-hour minimum charge shall be waived, and the inspector's drive time shall not be charged.

(2) If the request is made after the inspector has left the establishment, the hourly fee shall be assessed, including the two-hour minimum charge. The inspector's drive time shall not be charged.

(3) If the establishment requests to slaughter with the mark of inspection when the regularly inspected operation is processing, the request may be granted by the secretary without assessing overtime charges if the operations will not

exceed the establishment's regularly scheduled hours that day.

(4) Any requests specified in this subsection may be denied by the secretary if the requested additional time at the establishment causes inspections to be missed at other establishments.

(e) Payment of all applicable fees shall be due at or before the end of the month following the date of the requested inspection services. If the fees are not paid, requests for the following may be denied by the secretary:

(1) Inspection services on holidays;

(2) inspection services outside of the establishment's regularly scheduled inspection periods; and

(3) voluntary inspection services.

(f) Any applicable fees may be waived by the secretary under either of the following conditions:

(1) The establishment trades a regularly scheduled day of inspection in the week during which the additional inspection services are provided.

(2) Additional requested inspection services can be provided without causing undue hardship to the program.

(g) For fees associated with 4-H slaughter or processing, each establishment providing slaughter services associated with 4-H shall be assessed fees as follows for each seven-day calendar week, Sunday through Saturday:

(1) The facility shall be provided with not more than eight hours of inspection services without charge for 4-H slaughter operations in a 24-hour period.

(2) Inspection services for 4-H slaughter for more than eight hours in a calendar week shall be subject to the hourly fee specified in subsection (c) for slaughter.

(3) The fee may be waived if the facility cancels a day of inspection in the same seven-day calendar week in which 4-H slaughter is conducted.

(4) The fee shall be assessed for actual inspection time and shall not include the inspector's drive time to and from the facility. (Authorized by K.S.A. 2011 Supp. 65-6a26 and K.S.A. 2011 Supp. 65-6a44; implementing K.S.A. 2011 Supp. 65-6a26; effective May 1, 1986; amended Jan. 1, 1989; amended July 1, 1993; amended Jan. 17, 2003; amended July 18, 2008; amended May 10, 2013.)

Part VII.—SANITATION

4-16-8. (Authorized by K.S.A. 65-6a25, 65-6a30, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended Jan. 1, 1973; amended May 1, 1975; revoked May 1, 1982.)

4-16-9. (Authorized by K.S.A. 65-6a25, 65-6a30, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended May 1, 1975; revoked May 1, 1982.)

4-16-10 and 4-16-11. (Authorized by K.S.A. 65-6a25, 65-6a30, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1982.)

4-16-12. (Authorized by K.S.A. 65-6a25, 65-6a30, 65-6a32, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1982.)

4-16-13. (Authorized by K.S.A. 65-6a25, 65-6a30, 65-6a32, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended May 1, 1975; revoked May 1, 1982.)

4-16-14. (Authorized by K.S.A. 65-6a25, 65-6a30, 65-6a32, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1982.)

4-16-15. (Authorized by K.S.A. 65-6a25, 65-6a30, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1982.)

4-16-16 to 4-16-18. (Authorized by K.S.A. 65-6a25, 65-6a30, 65-6a32, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1982.)

4-16-19. (Authorized by K.S.A. 65-6a25, 65-6a30, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended May 1, 1975; revoked May 1, 1982.)

4-16-20. (Authorized by K.S.A. 65-6a25, 65-6a30, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1982.)

Part VIII.—ANTE MORTEM INSPECTION

4-16-21. (Authorized by K.S.A. 65-6a20, 65-6a30, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1982.)

4-16-22. (Authorized by K.S.A. 65-6a20, 65-6a30, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended May 1, 1975; revoked May 1, 1982.)

4-16-23 to 4-16-35. (Authorized by K.S.A. 65-6a20, 65-6a30, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1982.)

4-16-36. (Authorized by K.S.A. 65-6a20, 65-

6a30, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended, E-72-7, Feb. 1, 1972; amended Jan. 1, 1973; amended Jan. 1, 1974; revoked May 1, 1982.)

4-16-37 and 4-16-38. (Authorized by K.S.A. 65-6a20, 65-6a30, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1982.)

Part IX.—POST MORTEM INSPECTION

4-16-40 to 4-16-54. (Authorized by K.S.A. 65-6a21, 65-6a30, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1982.)

4-16-55. (Authorized by K.S.A. 65-6a21, 65-6a30, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked Jan. 1, 1973.)

4-16-55a. (Authorized by K.S.A. 65-6a21, 65-6a30, 65-6a44; effective Jan. 1, 1974; revoked May 1, 1982.)

4-16-56 to 4-16-59. (Authorized by K.S.A. 65-6a21, 65-6a30, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1982.)

4-16-59a. (Authorized by K.S.A. 65-6a21, 65-6a30, 65-6a44; effective May 1, 1975; revoked May 1, 1982.)

Part X.—DISPOSAL OF DISEASED OR OTHERWISE ADULTERATED CARCASSES AND PARTS

4-16-60. (Authorized by K.S.A. 65-6a21, 65-6a22, 65-6a23, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended May 1, 1975; revoked May 1, 1982.)

4-16-61. (Authorized by K.S.A. 65-6a21, 65-6a22, 65-6a23, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended Jan. 1, 1973; amended May 1, 1975; revoked May 1, 1982.)

4-16-62 to 4-16-69. (Authorized by K.S.A. 65-6a21, 65-6a22, 65-6a23, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1982.)

4-16-70 and 4-16-71. (Authorized by K.S.A. 65-6a21, 65-6a22, 65-6a23, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended Jan. 1, 1972; revoked May 1, 1982.)

4-16-72 to 4-16-77. (Authorized by K.S.A.

65-6a21, 65-6a22, 65-6a23, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1982.)

4-16-78. (Authorized by K.S.A. 65-6a21, 65-6a22, 65-6a23, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended May 1, 1975; revoked May 1, 1982.)

4-16-79 to 4-16-81. (Authorized by K.S.A. 65-6a21, 65-6a22, 65-6a23, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1982.)

4-16-82. (Authorized by K.S.A. 65-6a21, 65-6a22, 65-6a23, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended May 1, 1975; revoked May 1, 1982.)

4-16-83 to 4-16-89. (Authorized by K.S.A. 65-6a21, 65-6a22, 65-6a23, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1982.)

4-16-90. (Authorized by K.S.A. 65-6a21, 65-6a22, 65-6a23, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended May 1, 1975; revoked May 1, 1982.)

4-16-91 to 4-16-98. (Authorized by K.S.A. 65-6a21, 65-6a22, 65-6a23, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1982.)

**Part XI.—OFFICIAL MARKS,
DEVICES, AND CERTIFICATES**

4-16-99. (Authorized by K.S.A. 1970 Supp. 65-6a21, 65-6a22, 65-6a23, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1986.)

4-16-100. (Authorized by K.S.A. 1972 Supp. 65-6a21, 65-6a23, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended Jan. 1, 1972; amended Jan. 1, 1973; revoked May 1, 1986.)

4-16-101 and 4-16-102. (Authorized by K.S.A. 1970 Supp. 65-6a21, 65-6a22, 65-6a23, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1986.)

4-16-103. (Authorized by K.S.A. 65-6a21, 65-6a22, 65-6a23, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended Jan. 1, 1974; revoked May 1, 1986.)

4-16-104. (Authorized by K.S.A. 1972 Supp. 65-6a21, 65-6a22, 65-6a23, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended Jan. 1, 1973; revoked May 1, 1986.)

**Part XII.—HANDLING AND DISPOSAL OF
CONDEMNED OR OTHER INEDIBLE
PRODUCTS AT ESTABLISHMENTS**

4-16-106 to 4-16-114. (Authorized by K.S.A. 65-6a21, 65-6a22, 65-6a23, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1982.)

4-16-115. (Authorized by K.S.A. 65-6a21, 65-6a22, 65-6a23, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended May 1, 1975; revoked May 1, 1982.)

4-16-116. (Authorized by K.S.A. 65-6a21, 65-6a22, 65-6a23, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended Jan. 1, 1974; revoked May 1, 1982.)

**Part XIII.—RENDERING OR OTHER
DISPOSAL OF CARCASSES AND PARTS
PASSED FOR COOKING**

4-16-117. (Authorized by K.S.A. 65-6a21, 65-6a22, 65-6a23, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended Jan. 1, 1973; revoked May 1, 1982.)

4-16-118. (Authorized by K.S.A. 65-6a21, 65-6a22, 65-6a23, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1982.)

**Part XIV.—MARKING PRODUCTS
AND THEIR CONTAINERS**

4-16-119 to 4-16-122. (Authorized by K.S.A. 65-6a21, 65-6a22, 65-6a23, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1982.)

4-16-123. (Authorized by K.S.A. 65-6a21, 65-6a22, 65-6a23, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended Jan. 1, 1974; amended May 1, 1975; revoked May 1, 1982.)

4-16-124 to 4-16-126. (Authorized by K.S.A. 65-6a21, 65-6a22, 65-6a23, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1982.)

4-16-127. (Authorized by K.S.A. 65-6a21, 65-6a22, 65-6a23, 65-6a44; effective, E-70-4,

Dec. 1, 1969; effective Jan. 1, 1971; amended Jan. 1, 1974; amended May 1, 1975; revoked May 1, 1982.)

4-16-128. (Authorized by K.S.A. 65-6a21, 65-6a22, 65-6a23, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended, E-73-10, Feb. 16, 1973; amended Jan. 1, 1974; revoked May 1, 1982.)

4-16-129. (Authorized by K.S.A. 65-6a21, 65-6a22, 65-6a23, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended Jan. 1, 1974; amended May 1, 1975; revoked May 1, 1982.)

4-16-129a. Special marking for custom products. Each custom prepared carcass, parts thereof, and each package of custom prepared or processed product shall be plainly marked "CUSTOM—NOT FOR SALE" in letters not less than three-eighths inch in height immediately after being received or prepared. (Authorized by K.S.A. 65-6a22, 65-6a23, 65-6a24, 65-6a31, 65-6a44; effective May 1, 1975.)

4-16-130 to 4-16-132. (Authorized by K.S.A. 65-6a21, 65-6a22, 65-6a23, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended May 1, 1975; revoked May 1, 1982.)

4-16-133. (Authorized by K.S.A. 65-6a21, 65-6a22, 65-6a23, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1982.)

Part XV.—LABELING, MARKING DEVICES, AND CONTAINERS

4-16-134. (Authorized by K.S.A. 1970 Supp. 65-6a18, 65-6a24, 65-6a25, 65-6a28, 65-6a29, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1986.)

4-16-135. (Authorized by K.S.A. 65-6a18, 65-6a24, 65-6a25, 65-6a28, 65-6a29, 65-6a44; implementing K.S.A. 65-6a24 and 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended, E-73-10, Feb. 16, 1973; amended Jan. 1, 1974; amended May 1, 1975; amended May 1, 1982; revoked May 1, 1986.)

4-16-136. (Authorized by K.S.A. 1970 Supp. 65-6a18, 65-6a24, 65-6a25, 65-6a28, 65-6a29, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1986.)

4-16-138 to 4-16-140. (Authorized by K.S.A. 1970 Supp. 65-6a18, 65-6a24, 65-6a25, 65-6a28, 65-6a29, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1986.)

4-16-141. (Authorized by K.S.A. 65-6a18, 65-6a24, 65-6a25, 65-6a28, 65-6a29, 65-6a44; implementing K.S.A. 65-6a24, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended, E-73-10, Feb. 16, 1973; amended Jan. 1, 1974; amended May 1, 1975; amended May 1, 1982; revoked May 1, 1986.)

4-16-142. (Authorized by K.S.A. 1970 Supp. 65-6a29; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1986.)

4-16-143 to 4-16-148. (Authorized by K.S.A. 1970 Supp. 65-6a18, 65-6a24, 65-6a25, 65-6a28, 65-6a29, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1986.)

Part XVI.—ENTRY INTO ESTABLISHMENTS; REINSPECTION AND PREPARATION OF PRODUCTS

4-16-150 to 4-16-154. (Authorized by K.S.A. 1970 Supp. 65-6a18, 65-6a22, 65-6a23, 65-6a24, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1986.)

4-16-155. (Authorized by K.S.A. 65-6a18, 65-6a22, 65-6a23, 65-6a24, 65-6a44; implementing K.S.A. 65-6a24 and 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended Jan. 1, 1972; amended May 1, 1975; amended May 1, 1982; revoked May 1, 1986.)

4-16-156. (Authorized by K.S.A. 65-6a18, 65-6a22, 65-6a23, 65-6a24, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended Jan. 1, 1972; amended Jan. 1, 1974; amended May 1, 1975; revoked May 1, 1982.)

4-16-157 to 4-16-159. (Authorized by K.S.A. 1970 Supp. 65-6a18, 65-6a22, 65-6a23, 65-6a24, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1986.)

4-16-160 and 4-16-161. (Authorized by K.S.A. 65-6a18, 65-6a22, 65-6a23, 65-6a24, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended Jan. 1, 1974; revoked May 1, 1986.)

4-16-162 to 4-16-164. (Authorized by K.S.A. 1970 Supp. 65-6a18, 65-6a22, 65-6a23, 65-

6a24, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1986.)

Part XVII.—DEFINITIONS AND STANDARDS OF IDENTITY OR COMPOSITION OF STANDARDS OF FILL OF CONTAINERS

4-16-170. (Authorized by K.S.A. 1970 Supp. 65-6a18, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1986.)

4-16-170a. (Authorized by K.S.A. 65-6a18, 65-6a44; implementing K.S.A. 65-6a24, 65-6a44; effective May 1, 1982; revoked May 1, 1986.)

4-16-171. (Authorized by K.S.A. 65-6a18, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended Jan. 1, 1972; amended Jan. 1, 1973; amended Jan. 1, 1974; revoked May 1, 1986.)

4-16-171a. (Authorized by K.S.A. 65-6a18, 65-6a44; effective Jan. 1, 1973; amended Jan. 1, 1974; revoked May 1, 1986.)

4-16-172. (Authorized by K.S.A. 65-6a18, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended Jan. 1, 1973; amended Jan. 1, 1974; revoked May 1, 1986.)

4-16-173 and 4-16-174. (Authorized by K.S.A. 1970 Supp. 65-6a18, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1986.)

4-16-174a. (Authorized by K.S.A. 65-6a18, 65-6a44; implementing K.S.A. 65-6a24, 65-6a44; effective May 1, 1982; revoked May 1, 1986.)

CURED MEATS, UNSMOKED AND SMOKED

4-16-175. (Authorized by K.S.A. 1971 Supp. 65-6a18, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended Jan. 1, 1972; revoked May 1, 1986.)

4-16-176 to 4-16-179. (Authorized by K.S.A. 1970 Supp. 65-6a18, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1986.)

4-16-180. (Authorized by K.S.A. 65-6a18, 65-6a44, and K.S.A. 1981 Supp. 65-6a44a; implementing K.S.A. 65-6a44 and K.S.A. 1981 Supp. 65-6a44a; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended Jan. 1, 1974; amended, E-82-15, Aug. 12, 1981; amended May 1, 1982; revoked May 1, 1985; revoked May 1, 1986.)

4-16-181. (Authorized by K.S.A. 1970 Supp. 65-6a18, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1985; revoked May 1, 1986.)

4-16-182. (Authorized by K.S.A. 65-6a18, 65-6a44; implementing K.S.A. 65-6a24, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended Jan. 1, 1972; amended May 1, 1982; revoked May 1, 1986.)

4-16-183 to 4-16-185. (Authorized by K.S.A. 1971 Supp. 65-6a18, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended Jan. 1, 1972; revoked May 1, 1986.)

4-16-186. (Authorized by K.S.A. 65-6a18, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended Jan. 1, 1972; amended Jan. 1, 1974; revoked May 1, 1986.)

4-16-187 and 4-16-188. (Authorized by K.S.A. 1971 Supp. 65-6a18, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended Jan. 1, 1972; revoked May 1, 1986.)

4-16-191 to 4-16-193. (Authorized by K.S.A. 1970 Supp. 65-6a18, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1986.)

4-16-193a. (Authorized by K.S.A. 65-6a18, 65-6a44; implementing K.S.A. 65-6a24, 65-6a44; effective May 1, 1982; revoked May 1, 1986.)

4-16-194 to 4-16-208. (Authorized by K.S.A. 1970 Supp. 65-6a18, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1986.)

4-16-209. (Authorized by K.S.A. 1971 Supp. 65-6a18, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended Jan. 1, 1972; revoked May 1, 1986.)

4-16-209a. (Authorized by K.S.A. 65-6a18, 65-6a44; effective Jan. 1, 1974; revoked May 1, 1986.)

4-16-210 to 4-16-219. (Authorized by K.S.A. 1970 Supp. 65-6a18, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1986.)

4-16-220. (Authorized by K.S.A. 65-6a18, 65-6a44; implementing K.S.A. 65-6a24, 65-6a44; effective May 1, 1982; revoked May 1, 1986.)

Part XVIII.—RECORDS AND REPORTS

4-16-225 to 4-16-230. (Authorized by K.S.A. 1970 Supp. 65-6a28, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1986.)

Part XIX.—TRANSPORTATION

4-16-231 to 4-16-233. (Authorized by K.S.A. 1970 Supp. 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1986.)

4-16-233a. (Authorized by K.S.A. 65-6a18, 65-6a44; implementing K.S.A. 65-6a33, 65-6a44; effective May 1, 1982; revoked May 1, 1986.)

4-16-234. (Authorized by K.S.A. 1970 Supp. 65-6a28, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1986.)

4-16-235. (Authorized by K.S.A. 65-6a23, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; amended Jan. 1, 1974; amended May 1, 1975; revoked May 1, 1986.)

4-16-236 to 4-16-239. (Authorized by K.S.A. 1970 Supp. 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1986.)

Part XX.—DETENTION; SEIZURE AND CONDEMNATION; CRIMINAL OFFENSES

4-16-240 to 4-16-245. (Authorized by K.S.A. 1970 Supp. 65-6a37, 65-6a44; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1986.)

Part XXI.—MISCELLANEOUS

4-16-246. (Authorized by K.S.A. 1970 Supp. 65-6a29; effective, E-70-4, Dec. 1, 1969; effective Jan. 1, 1971; revoked May 1, 1986.)

4-16-250. (Authorized by K.S.A. 65-6a44; implementing K.S.A. 65-6a25, 65-6a30 and 65-6a35; effective May 1, 1987; revoked Sept. 1, 2006.)

4-16-251. (Authorized by K.S.A. 65-6a44; implementing K.S.A. 65-6a25, 65-6a30 and 65-6a35; effective May 1, 1987; revoked Sept. 1, 2006.)

4-16-252. (Authorized by K.S.A. 65-6a44; implementing K.S.A. 65-6a25 and 65-6a30; effective Dec. 26, 1988; revoked Sept. 1, 2006.)

4-16-260. (Authorized by K.S.A. 65-6a44; implementing K.S.A. 65-6a20; effective May 1, 1988; revoked Sept. 1, 2006.)

4-16-300. Civil penalty; order. Each order assessing a civil penalty shall include the following:

(a) A statement citing K.S.A. 65-6a56, and amendments thereto, authorizing the assessment of a civil penalty;

(b) a specific reference to each provision of the act or implementing regulation that the respondent is alleged to have violated;

(c) a concise statement of the factual basis for each alleged violation;

(d) the amount of the civil penalty that is assessed; and

(e) the notice of the respondent's right to request a hearing. (Authorized by K.S.A. 2007 Supp. 65-6a44; implementing K.S.A. 2007 Supp. 65-6a56; effective July 1, 1992; amended Dec. 12, 1994; amended July 18, 2008.)

4-16-301. (Authorized by K.S.A. 65-6a44; implementing K.S.A. 65-6a56; effective July 1, 1992; amended Dec. 12, 1994; revoked July 18, 2008.)

4-16-302. Amount of civil penalty. (a) A separate civil penalty shall be assessed for each violation of any provision of the Kansas meat and poultry inspection act or any implementing regulation that results from each independent act or failure to act by any person or the person's agent or employee. In determining whether a given violation is independent of and substantially distinguishable from any other violation for the purpose of assessing separate civil penalties, consideration shall be given to whether each violation requires an element of proof not required by another violation. If several violations require the same elements of proof and are not distinguishable, assessment of separate civil penalties shall be within the discretion of the secretary or the secretary's authorized representative.

(b) For each violation, the amount of the civil penalty shall be within the following ranges:

(1) For each violation of K.S.A. 65-6a34 or K.S.A. 65-6a41, and amendments thereto, or any regulations implementing these statutes, the civil penalty shall be not less than \$100 and not more than \$1,000.

(2) For each violation of K.S.A. 65-6a22, K.S.A. 65-6a24, K.S.A. 65-6a25, K.S.A. 65-6a27(a), K.S.A. 65-6a29, K.S.A. 65-6a31, or K.S.A. 65-

6a32, and amendments thereto, or any regulations implementing these statutes, the civil penalty shall be not less than \$100 and not more than \$2,500.

(3) For each violation of K.S.A. 65-6a20, K.S.A. 65-6a21, K.S.A. 65-6a23, K.S.A. 65-6a27(b), 65-6a28, or K.S.A. 65-6a33, and amendments thereto, or any regulations implementing these statutes, the civil penalty shall be not less than \$100 and not more than \$5,000.

(c) For the second or each subsequent occurrence of a violation within a three-year period for which a civil penalty has been assessed, the civil penalty assessed for the subsequent violation shall be not less than double the amount of the civil penalty assessed for the original violation but not more than the maximum amount for the category listed. (Authorized by K.S.A. 2007 Supp. 65-6a44; implementing K.S.A. 2007 Supp. 65-6a56; effective July 1, 1992; amended July 18, 2008.)

4-16-303. Criteria to determine dollar amount of the civil penalty. In determining the amount of civil penalty, the gravity of the violation shall be considered by the secretary or the secretary's designee. Factors to be considered shall include the following: (a) The potential of the act to injure or endanger the health of any consumer, or the general public;

(b) the severity of actual or potential injuries;

(c) the respondent's history of compliance with the Kansas meat and poultry inspection act and the implementing regulations;

(d) any action taken by the respondent to remedy the specific violation or to mitigate any adverse effects that were the result of the violation; and

(e) specification of whether or not the violation involved any adulterated article, misrepresentation, or fraud. (Authorized by K.S.A. 2007 Supp. 65-6a44; implementing K.S.A. 2007 Supp. 65-6a56; effective July 1, 1992; amended July 18, 2008.)

4-16-304. Informal settlement. (a) Any respondent may request a settlement conference if the respondent timely filed a written request for hearing. The request may be made before the prehearing conference.

(b) If a settlement is reached, the parties shall reduce the settlement to writing and present the proposed written consent agreement to the secretary. The consent agreement shall state that, for the purpose of the proceeding, the following conditions are met:

(1) The respondent admits the jurisdictional allegations and admits the facts stipulated in the consent agreement.

(2) The respondent neither admits nor denies the specific violations contained in the order. The respondent consents to the assessment of a stated civil penalty, if any is assessed.

The consent agreement shall include all terms of the agreement and shall be signed by all parties or their counsel. (Authorized by K.S.A. 2007 Supp. 65-6a44; implementing K.S.A. 2007 Supp. 65-6a56; effective July 1, 1992; amended Dec. 12, 1994; amended July 18, 2008.)

4-16-305. Adjusting the amount of the civil penalty. (a) Each respondent shall present all evidence on the issue of adjustment of the civil penalty at the settlement conference. This evidence may include mitigating factors or new evidence not previously known to the secretary when the order was issued.

(b) Upon presentation by the respondent of new evidence establishing facts and circumstances that were unknown to the secretary or to the secretary's duly authorized agent when the order was issued and that relate to the gravity of the violation, an adjusted civil penalty may be assessed. If these additional facts establish that a respondent did not commit a violation, the order shall be amended or vacated.

(c) The burden shall be on the respondent to present evidence of any mitigating factors to support any requested reduction in the amount of the civil penalty. The amount of the civil penalty may be reduced if the reduction serves the public interest.

(d) The amount of a civil penalty shall not be reduced to less than \$100 per offense.

(1) Whether or not a civil penalty is reduced shall be within the sole discretion of the secretary or the secretary's duly authorized representative.

(2) Reductions shall not occur unless evidence of mitigating factors has been presented by a respondent. (Authorized by K.S.A. 2007 Supp. 65-6a44; implementing K.S.A. 2007 Supp. 65-6a56; effective July 1, 1992; amended Dec. 12, 1994; amended July 18, 2008.)

4-16-306. Retail exemption; establishments selling food other than meat and poultry. (a) Any person operating an establishment that is registered or required to be registered under the Kansas meat and poultry inspection act

may process meat and poultry products for retail sale without the mark of inspection as specified in 9 C.F.R. 303.1, as adopted in K.A.R. 4-16-1c, if both of the following conditions are met:

(1) The establishment is maintained and operated in a sanitary manner.

(2) The establishment meets the applicable requirements of the department's regulations to ensure that any carcasses or parts thereof, meat, meat food products, poultry, and poultry products handled on a retail basis, and any containers or packages containing these products, are separated at all times from both of the following:

(A) Carcasses or parts thereof, meat, meat food products, poultry, and poultry products that bear the mark of inspection; and

(B) carcasses or parts thereof, meat, meat food products, poultry, and poultry products custom prepared according to K.S.A. 65-6a31(b), and amendments thereto, and 9 C.F.R. 303.1, as adopted in K.A.R. 4-16-1c.

(b) If an establishment at which inspection under the Kansas meat and poultry inspection act is maintained processes or sells food other than meat, meat food products, poultry, or poultry products, the owner or operator of that establishment may be required to obtain a separate license, permit, or registration for those operations at the establishment under the Kansas food, drug, and cosmetic act, K.S.A. 65-619 et seq. and amendments thereto. (Authorized by K.S.A. 2011 Supp. 65-6a30 and 65-6a44; implementing K.S.A. 2011 Supp. 65-6a30, K.S.A. 2011 Supp. 65-6a31, as amended by L. 2012, ch. 145, sec. 30, and K.S.A. 65-6a34, as amended by L. 2012, ch. 145, sec. 31; effective May 10, 2013.)

Article 17.—POULTRY AND POULTRY PRODUCTS INSPECTION

Part I.—DEFINITIONS

4-17-1. (Authorized by K.S.A. 65-6a44; effective, E-70-22, July 1, 1970; effective Jan. 1, 1971; revoked May 1, 1982.)

4-17-1a. (Authorized by K.S.A. 2005 Supp. 65-6a44; implementing K.S.A. 2005 Supp. 65-6a20, K.S.A. 65-6a21, K.S.A. 65-6a22, K.S.A. 65-6a23, K.S.A. 65-6a25, and K.S.A. 2005 Supp. 65-6a30; effective Jan. 1, 1989; amended Jan. 21, 1991; amended Jan. 25, 1993; amended Sept. 5, 1997; amended Sept. 1, 2006; revoked May 10, 2013.)

4-17-1c. (Authorized by K.S.A. 2005 Supp. 65-6a44; implementing K.S.A. 2005 Supp. 65-6a20, K.S.A. 65-6a21, K.S.A. 65-6a22, K.S.A. 65-6a23, K.S.A. 65-6a25, and K.S.A. 2005 Supp. 65-6a30; effective Jan. 1, 1989; amended Jan. 21, 1991; amended Jan. 25, 1993; amended Dec. 12, 1994; amended Sept. 5, 1997; amended Sept. 1, 2006; revoked May 10, 2013.)

Part II.—ADMINISTRATION

4-17-2. (Authorized by K.S.A. 65-6a44; effective, E-70-22, July 1, 1970; effective Jan. 1, 1971; revoked May 1, 1982.)

Part III.—SCOPE OF INSPECTION

4-17-3. (Authorized by K.S.A. 65-6a30, 65-6a44; effective, E-70-22, July 1, 1970; effective Jan. 1, 1971; revoked May 1, 1982.)

4-17-4. (Authorized by K.S.A. 65-6a44; effective, E-70-22, July 1, 1970; effective Jan. 1, 1971; revoked May 1, 1982.)

4-17-5. (Authorized by K.S.A. 1970 Supp. 65-6a44; effective, E-70-22, July 1, 1970; effective Jan. 1, 1971; revoked Dec. 26, 1988.)

4-17-5a. (Authorized by K.S.A. 65-6a44; implementing K.S.A. 65-6a31; effective Jan. 1, 1989; amended Jan. 25, 1993; amended Dec. 12, 1994; revoked Sept. 1, 2006.)

Part IV.—OFFICIAL PLANT NUMBERS INAUGURATION, SUSPENSION AND WITHDRAWAL OF INSPECTION SERVICES

4-17-6 to 4-17-9. (Authorized by K.S.A. 65-6a44; effective, E-70-22, July 1, 1970; effective Jan. 1, 1971; revoked May 1, 1982.)

4-17-10. (Authorized by K.S.A. 65-6a21, 65-6a30, 65-6a44; effective, E-70-22, July 1, 1970; effective Jan. 1, 1971; revoked May 1, 1982.)

Part V.—SANITARY REQUIREMENTS MINIMUM STANDARDS FOR SANITATION, FACILITIES AND OPERATING PROCEDURES IN ESTABLISHMENTS

4-17-11 to 4-17-13. (Authorized by K.S.A. 65-6a25, 65-6a30, 65-6a32, 65-6a44; effective, E-70-22, July 1, 1970; effective Jan. 1, 1971; revoked May 1, 1982.)

Part VI.—INSPECTION PROCEDURES

4-17-19. (Authorized by K.S.A. 65-6a20, 65-6a30, 65-6a44; effective, E-70-22, July 1, 1970; effective Jan. 1, 1971; revoked May 1, 1982.)

4-17-20. (Authorized by K.S.A. 65-6a21, 65-6a30, 65-6a44; effective, E-70-22, July 1, 1970; effective Jan. 1, 1971; revoked May 1, 1982.)

4-17-21 to 4-17-24. (Authorized by K.S.A. 65-6a21, 65-6a22, 65-6a23, 65-6a44; effective, E-70-22, July 1, 1970; effective Jan. 1, 1971; revoked May 1, 1982.)

Part VII.—CANNING OR COOKING REQUIREMENTS

4-17-25 and 4-17-26. (Authorized by K.S.A. 65-6a23, 65-6a30, 65-6a44; effective, E-70-22, July 1, 1970; effective Jan. 1, 1971; revoked May 1, 1982.)

Part VIII.—FROZEN FOODS

4-17-27 and 4-17-28. (Authorized by K.S.A. 65-6a23, 65-6a30, 65-6a44; effective, E-70-22, July 1, 1970; effective Jan. 1, 1971; revoked May 1, 1982.)

Part IX.—POULTRY PRODUCTS CONTAMINATED BY POLLUTED WATER

4-17-29. (Authorized by K.S.A. 65-6a23, 65-6a30, 65-6a44; effective, E-70-22, July 1, 1970; effective Jan. 1, 1971; revoked May 1, 1982.)

Part X.—PREPARATION OF ARTICLES OTHER THAN FOR HUMAN FOOD

4-17-30. (Authorized by K.S.A. 65-6a23, 65-6a30, 65-6a44; effective, E-70-22, July 1, 1970; effective Jan. 1, 1971; revoked May 1, 1982.)

Part XI.—REPORTS

4-17-31 to 4-17-33. (Authorized by K.S.A. 65-6a30, 65-6a44; effective, E-70-22, July 1, 1970; effective Jan. 1, 1971; revoked May 1, 1982.)

Part XII.—LABELING

4-17-34 to 4-17-51. (Authorized by K.S.A. 65-6a18, 65-6a24, 65-6a25, 65-6a28, 65-6a29, 65-6a44; effective, E-70-22, July 1, 1970; effective Jan. 1, 1971; revoked May 1, 1982.)

Part XIII.—INSPECTION PERSONNEL AND ADMINISTRATION

4-17-52. (Authorized by K.S.A. 65-6a26, 65-6a30, 65-6a32, 65-6a44; effective, E-70-22, July 1, 1970; effective Jan. 1, 1971; revoked May 1, 1982.)

4-17-300. (Authorized by K.S.A. 2007 Supp. 65-6a44; implementing K.S.A. 2007 Supp. 65-6a56; effective July 1, 1992; amended Dec. 12, 1994; amended July 18, 2008; revoked May 10, 2013.)

4-17-301. (Authorized by K.S.A. 65-6a44; implementing K.S.A. 65-6a56; effective July 1, 1992; amended Dec. 12, 1994; revoked July 18, 2008.)

4-17-302 and 4-17-303. (Authorized by K.S.A. 2007 Supp. 65-6a44; implementing K.S.A. 2007 Supp. 65-6a56; effective July 1, 1992; amended July 18, 2008; revoked May 10, 2013.)

4-17-304 and 4-17-305. (Authorized by K.S.A. 2007 Supp. 65-6a44; implementing K.S.A. 2007 Supp. 65-6a56; effective July 1, 1992; amended Dec. 12, 1994; amended July 18, 2008; revoked May 10, 2013.)

Article 18.—LIVESTOCK REMEDIES

4-18-1. (Authorized by and implementing K.S.A. 1982 Supp. 47-504; effective, T-83-35, Nov. 10, 1982; effective May 1, 1983; revoked Oct. 18, 2002.)

Article 19.—SOIL AMENDMENTS

4-19-1. Registration fee. The registration fee for each soil amendment shall be \$100.00 for each product registered. (Authorized by K.S.A. 2005 Supp. 2-2805 and K.S.A. 2-2811; implementing K.S.A. 2005 Supp. 2-2805; effective, T-83-35, Nov. 10, 1982; effective May 1, 1983; amended, T-4-6-27-02, July 1, 2002; amended Oct. 25, 2002; amended Feb. 23, 2007.)

Article 20.—CHEMIGATION

4-20-3. Records and reports. (a) Each person using a chemigation process shall keep records regarding each application of any chemical other than water or animal waste. The records shall contain the following information:

- (1) the type of chemical used;
- (2) the amount of active ingredient used;
- (3) the date of use;
- (4) the legal description of the location of the water supply or the point of diversion of the water supply;
- (5) the total number of acres treated by means of chemigation;
- (6) the type of crop to which the chemical was applied; and
- (7) the EPA registration number for each pesticide applied and the name of the target pest stated as the common name for the pest or pests. When pesticides are applied for the control of weeds, the target pests may at a minimum be identified

as grassy or broadleaf weeds. Records required under this section shall be retained by the holder of the chemigation user permit for a period of not less than two years from the date of application.

(b) Each person using a chemigation process to apply animal wastes through the person's chemigation system shall keep records regarding each application of animal waste. The records shall contain the following information:

(1) the date of application; and

(2) the location of the water supply used for chemigation or the legal description of the point of diversion.

(c) Each application for renewal of a chemigation user permit shall be accompanied by a copy of the records for chemigation use during the previous year as described in paragraphs (a) and (b) of this regulation.

(d) Each chemigation permit holder shall report immediately both to the secretary of the board of agriculture and to the secretary of health and environment all spills, accidents, system malfunctions, or other situations involving actual or potential contamination of either groundwater or surface water. (Authorized by K.S.A. 1988 Supp. 2-3309; implementing K.S.A. 1988 Supp. 2-3303; effective, T-86-27, Aug. 19, 1985; effective May 1, 1986; amended March 26, 1990.)

4-20-4. Permits. No individual shall supervise more than 10 operating chemigation units at one time.

Each individual possessing a chemigation user permit shall be responsible for insuring that those persons who work under his or her direct supervision and who handle pesticides:

(a) are knowledgeable in the use of the pesticide;

(b) are knowledgeable concerning the proper calibration methods for the pesticide;

(c) are knowledgeable regarding the injection devices and anti-pollution devices being used in the system;

(d) follow all applicable directions on the pesticide's label; and

(e) use all safety precautions pertaining to that pesticide. (Authorized by K.S.A. 1985 Supp. 2-3309; implementing K.S.A. 1985 Supp. 2-3306; effective, T-86-27, Aug. 19, 1985; effective May 1, 1986; amended May 1, 1987.)

4-20-5. Waterline check valves. (a) Each waterline check valve required by K.S.A. 2-3305,

and amendments thereto, shall be constructed and installed in accordance with the requirements specified in K.A.R. 5-6-13a.

(b) Each check valve and all required components shall be maintained in an operating condition that prevents backflow into the source of water supply whenever a foreign substance could reasonably be expected to be introduced into the water system.

(c) Each chemigation installation, unit, or system that can serve as a conduit for chemicals, effluent, or any substance while water is not being pumped shall also be equipped with a positive closing gate valve or its equivalent. This valve shall be located between the check valve and the point at which chemicals, effluents, or other substances enter the water distribution system and shall be closed whenever chemicals, effluents, or other substances enter the distribution system and water is not being pumped. (Authorized by K.S.A. 2-3309; implementing K.S.A. 2-3305; effective, T-86-27, Aug. 19, 1985; effective May 1, 1986; amended March 26, 1990; amended Oct. 24, 2003.)

4-20-6. Injection equipment. (a) The injection equipment used shall be constructed and maintained in a manner which prohibits application of any pesticide at a rate which exceeds the maximum rate of application recommended by the pesticide's label or labeling and which prohibits application of any fertilizer or animal wastes at any rate which exceeds the planned application rate. Injection equipment shall be calibrated before each chemigation application.

(b) Chemigation users who apply only animal wastes through their irrigation distribution systems are required to install only those anti-pollution devices required by K.S.A. 2-3305.

(c) For those chemigation users who apply fertilizers and other chemicals, injection equipment shall include:

(1) a manually operated valve on the supply tank;

(2) a strainer on the suction side of the injection pump; and

(3) a calibration device of sufficient volume to accurately calibrate the injection pump.

(d) For pesticides, the following additional pieces of equipment shall be used;

(1) an air bleeder valve on the injection line;

(2) a positive displacement injection pump; and

(3) any other equipment required by the pesticide's label or labeling. (Authorized by K.S.A. 1988 Supp. 2-3309; implementing K.S.A. 2-3305,

as amended by L. 1989, Ch. 7, Sec. 3; effective, T-86-27, Aug. 19, 1985; effective May 1, 1986; amended March 26, 1990.)

4-20-7. Vacuum relief device and automatic low-pressure drain. The vacuum relief device and automatic low-pressure drain shall be properly installed and shall be fully operational whenever the chemigation process is being used. These devices shall not be blocked, capped or otherwise modified in any manner which prevents their proper operation in any manner to render them inoperable. (Authorized by K.S.A. 1988 Supp. 2-3309; implementing K.S.A. 2-3305 as amended by L. 1989, Ch. 7, Sec. 3; effective March 26, 1990.)

4-20-8. Chemical injection line and checkvalve. The point at which any chemical, fertilizer or animal waste is injected into the irrigation distribution system shall be located on the downstream side of any waterline checkvalve. The chemical injection line shall contain a checkvalve which shall be located between the chemical injection pump and the point at which any chemical or fertilizer enters the irrigation distribution system. (Authorized by K.S.A. 2-3309; implementing K.S.A. 1988 Supp. 2-3305 as amended by L. 1989, Ch. 7, Sec. 3; effective March 26, 1990.)

4-20-11. Civil penalties. (a) The process for issuing and processing civil penalties shall follow the procedure established in K.A.R. 4-13-60 and in K.A.R. 4-13-62 through 4-13-65, except for the following:

(1) The provision of K.A.R. 4-13-62(b) shall be replaced by the provisions of subsection (b) in this regulation.

(2) The terms "state and federal pesticide laws" and "pesticide law" contained in K.A.R. 4-13-60 and K.A.R. 4-13-62 through 4-13-65 shall be replaced by the term "the Kansas chemigation safety law," as the context requires.

(3) The term "pesticide business licensee" shall be replaced by the term "person" or "swine facility," as the context requires.

(b) The amount of civil penalty assessed for each violation shall be within the following ranges:

(1) For each violation of K.S.A. 2-3305, and amendments thereto, the civil penalty shall be not less than \$100 and not more than \$5,000.

(2) For each violation of K.S.A. 2-3308(a)(2), (a)(3), or (a)(4), and amendments thereto, the civil penalty shall be not less than \$100 and not more than \$5,000.

(3) For each violation of K.S.A. 2-3313(a) or (b) or of K.S.A. 2-3313(f) or (i), and amendments thereto, the civil penalty shall be not less than \$100 and not more than \$5,000.

(4) For each violation of K.S.A. 2-3308, and amendments thereto, not covered in paragraph (b)(2) in this regulation, the civil penalty shall be not less than \$100 and not more than \$1,000.

(5) For each violation of K.S.A. 2-3313, and amendments thereto, not covered in paragraph (b)(3) in this regulation, the civil penalty shall be not less than \$100 and not more than \$1,000.

(6) For each application of waste in violation of K.S.A. 2-3318, and amendments thereto, the civil penalty shall be not less than \$100 and not more than \$5,000.

(c) For any subsequent occurrence of a violation for which a civil penalty has been assessed within a three-year period, the civil penalty assessed for this violation shall be the maximum amount for the category listed. (Authorized by K.S.A. 2007 Supp. 2-3309; implementing K.S.A. 2-3308 and 2-3317; effective March 26, 1990; amended, T-4-12-29-98, Jan. 1, 1999; amended April 23, 1999; amended April 4, 2003; amended July 18, 2008.)

4-20-12. Certified chemigation equipment operator examination. (a) Examinations for certified chemigation equipment operators shall be provided by the Kansas state board of agriculture. A grade of 75% correct answers shall be required to pass the examination.

(b) Examinations for chemigation equipment operator certification shall test the applicant's knowledge in those subject areas set out in K.S.A. 2-3306 as amended and supplemented involving chemigation practices associated with the applicant's agricultural operation and the applicant's legal responsibility as a certified chemigation equipment operator. (Authorized by K.S.A. 1988 Supp. 2-3309; implementing K.S.A. 1988 Supp. 2-3306 as amended by L. 1989, Ch. 7, Sec. 5; effective March 26, 1990.)

4-20-13. Certificates and pocket cards. A certificate and pocket card shall be issued to each certified person upon satisfactory completion of the requirements for certification. Such certificate and pocket card shall show the applicator's name, type of certificate issued, the expiration date of the certification and other pertinent information. The certified chemigation equipment operator shall produce such certificate or pocket card when re-

requested to do so by any law enforcement official, the secretary or any authorized representative of the secretary. (Authorized by K.S.A. 1988 Supp. 2-3309; implementing K.S.A. 1988 Supp. 2-3306 as amended by L. 1989, Ch. 7, Sec. 5; effective March 26, 1990.)

4-20-14. Report of address change by certified chemigation equipment operators.

Each certified chemigation equipment operator shall notify the secretary of any change in the operator's mailing address by the 10th day of the month following the month during which such change occurred. (Authorized by K.S.A. 1988 Supp. 2-3309; implementing K.S.A. 1988 Supp. 2-3306 as amended by L. 1989, Ch. 7, Sec. 5; effective March 26, 1990.)

4-20-15. Agronomic application rates.

The agronomic application rate for swine waste shall be the amount of waste required for plant nutrition and for the nutrient-holding capacity of the surfaces or soils to which swine waste is applied, as determined by sound agronomic methods. Sound agronomic application rates shall be determined in consultation with Kansas state university. Sound agronomic methods may include the rate derived from the calculations from the form prescribed by the secretary of agriculture in K.A.R. 4-21-1 and K.A.R. 4-21-7. (Authorized by K.S.A. 2-3305, K.S.A. 2-3309; implementing K.S.A. 2-3318, as amended by L. 2002, ch. 181, sec. 14 and K.S.A. 2001 Supp. 65-1,182; effective, T-4-12-29-98, Jan. 1, 1999; effective April 23, 1999; amended April 4, 2003.)

Article 21.—NUTRIENT UTILIZATION PLANS

4-21-1. “Nutrient utilization plan” defined; amendments to the plan; exceptions. (a)

A confined feeding facility for swine under Kansas law that has an animal unit capacity of 1,000 or more and whose waste is applied to land shall prepare a nutrient utilization plan for review by the secretary of agriculture. The plan shall be on a form prescribed by the secretary and shall be a plan that forecasts nutrient management from the date of submission through the next five years. The plan shall be updated annually, maintained at the office of the swine facility, along with the three previous years' versions of the records, and made available to the secretary of agriculture upon request.

(b) Whenever the term “waste” is referred to in

article 21 of these regulations, it shall mean swine manure, swine wastewater, or swine manure and swine wastewater mixed together.

(c) Changes in conditions that warrant amendments requiring the secretary's approval to a facility's nutrient utilization plan shall include any of the following:

(1) A swine facility's permit is no longer valid, but the facility plans to seek a new permit.

(2) Additional land to which waste will be applied is not described in an approved plan.

(3) A procedure for waste application will be used that is not described in an approved plan.

(4) Land included in an approved nutrient utilization plan is no longer available for application as provided for in the approved nutrient utilization plan because legal authorization for land application no longer exists for that land.

(5) A phosphorus soil analysis result exceeds the phosphorus-holding capacity of the soil in a field as prescribed by K.A.R. 4-21-7.

(d) Swine facilities required by law to prepare nutrient utilization plans shall submit any other amendments necessary to facilitate approval as requested by the secretary of agriculture.

(e) Any amendment described in subsection (c) or subsection (d) of this regulation to the plan shall be submitted to the secretary of agriculture and approved by the secretary before the application of waste.

(f) “Swine facility” or “facility,” as used in article 21 of these regulations, shall mean a confined feeding facility for swine under Kansas law that has an animal unit capacity of 1,000 or more and that applies manure or wastewater to land. (Authorized by K.S.A. 2-3309; implementing K.S.A. 2-3302, K.S.A. 2002 Supp. 2-3318 and K.S.A. 65-1,182; effective, T-4-12-29-98, Jan. 1, 1999; effective April 23, 1999; amended April 4, 2003.)

4-21-2. “Field” defined. A field is defined, for purposes of preparation of a nutrient utilization plan, as an expanse of land devoted to one particular crop or tillage condition at a time and managed uniformly. A field shall also be the area identified by section, township, and range and outlined on a site map contained in a filed nutrient utilization plan approved by the secretary of agriculture. (Authorized by K.S.A. 1998 Supp. 2-3305 and 2-3309; implementing K.S.A. 1998 Supp. 2-3318 and 65-1,182; effective, T-4-12-29-98, Jan. 1, 1999; effective April 23, 1999.)

4-21-3. Soil samples. (a) (1) The soil nutrient values may be determined either by analysis of a single composite of representative samples from a field or from the mathematical average of all the results from grid samples. Grid soil sampling is defined as a systematic method of sampling that separates the field into identified subunits with each subunit sampled separately. Each composite sample shall be representative, at the time it is taken, of the soils and of the nutrient values in the field from which the sample is taken.

(2) Each field where waste is to be applied shall be sampled before the application unless the field has been sampled in the preceding 12 months, but sampling shall not be required more frequently than annually unless required by the department due to elevated nutrient levels. The sampling shall consist of a representative number of soil cores from each field and shall be collected by either of the following methods:

(A) Two composite samples shall be collected from each field by separating the top six inches of each core collected from the bottom of the core sample. If multiple cores are taken, all samples from the top six inches of soil shall be mixed together. This composite sample shall be tested for phosphorous, zinc, copper, nitrate-N, and chloride. The bottom segment of each soil core sample from six through 24 inches shall then be mixed together, and this composite sample shall be tested for nitrate-N and chloride.

(B) Two composite samples shall be collected by obtaining individual core samples. A composite sample to be tested for phosphorous, copper, and zinc shall be collected from the top six inches of the soil and mixed if multiple cores are collected. The second composite sample shall be tested for nitrate-N and chloride, and shall be collected by taking a core sample from the soil surface to a soil depth of 24 inches. If multiple cores are taken, the samples shall be mixed before testing.

(b) The owner or operator of each swine facility shall sample the soil within 60 days following any application of waste if the application is the result of an emergency waste disposal. Each individual who collects any soil sample to comply with these regulations shall certify the location and number of representative cores collected from the field.

(c) A copy of the certification of each field and the laboratory analysis of composite or grid soil sample shall be maintained in the office of the swine facility and made available to the secretary of agriculture or designee upon request. The cer-

tification required by this regulation shall be submitted on a form prescribed by the secretary.

(d) Samples shall be taken by the secretary of agriculture or designee if, at that individual's discretion, an inspection requires a sample. Each composite soil sample taken by the secretary of agriculture or designee shall be taken in the manner required by this regulation and by K.A.R. 4-21-4. A composite soil sample taken by the secretary of agriculture or designee shall be presumed to be representative of the field. Whether a sample is representative shall be within the sole discretion of the secretary of agriculture, and the secretary's determination of whether a sample is representative shall be final. (Authorized by K.S.A. 2-3305 and K.S.A. 2-3309; implementing K.S.A. 2-3318, as amended by L. 2002, ch. 181, sec. 14 and K.S.A. 2001 Supp. 65-1,182; effective, T-4-12-29-98, Jan. 1, 1999; effective April 23, 1999; amended April 4, 2003.)

4-21-4. Soil tests. The composite soil samples from each field shall be analyzed for the nutrients specified in subsection (a) in the manner prescribed by this regulation.

(a) The analyses listed in this subsection shall follow the directions on the specified pages that are hereby adopted by reference from the north central regional research publication no. 221, "recommended chemical soil test procedures for the north central region," revised January 1998, as follows:

(1) The analysis for nitrate-N shall follow the directions on pages 17 through 19.

(2) The analysis for phosphorus shall follow the directions on pages 21 through 26. Calcareous soils shall follow the directions for the Olsen phosphorus test on pages 25 through 26. For non-calcareous soils, the analysis shall follow the directions for either the Bray and Kurtz P-1 analysis, on pages 21 through 22, or the Mehlich 3 analysis, on pages 23-24. Calcareous soil is defined as soil having a pH above 7.0 that effervesces when a solution of 3N (three normal) hydrochloric acid is added drop-wise to the sample.

(3) The analysis for copper shall follow the directions for diethylenetriaminepentaacetic acid (DTPA) extraction on pages 41 through 42.

(4) The analysis for chlorides shall follow the directions for the mercury (II) thiocyanate method on pages 49 through 50.

(5) The analysis for zinc shall follow the directions for DTPA extraction on pages 41 through 42.

(b) An analysis different from any analysis specified in this regulation may be used if the analysis

is based on generally recognized sound agronomic interpretations and laboratory methods and is approved by the secretary of agriculture.

(c) The authorized representative for the laboratory at which the sample was analyzed shall certify that the sample was analyzed according to the applicable procedure set forth in this regulation and that the results of the analysis are an accurate analysis of the sample. The laboratory's certification shall show the date the sample was received, the date the sample was analyzed, the signature of the laboratory's authorized representative, and the results of the analysis for each chemical in each sample analyzed. (Authorized by K.S.A. 2-3305 and K.S.A. 2-3309; implementing K.S.A. 2-3318, as amended by L. 2002, ch. 181, sec. 14 and K.S.A. 2001 Supp. 65-1,182; effective, T-4-12-29-98, Jan. 1, 1999; effective April 23, 1999; amended April 4, 2003.)

4-21-5. Agreements to apply waste. Each agreement for the application of waste on land owned by a person or persons other than the swine facility that is required to prepare a nutrient utilization plan shall be in writing. (Authorized by K.S.A. 2-3305 and K.S.A. 2-3309; implementing K.S.A. 2-3318, as amended by L. 2002, ch. 181, sec. 14 and K.S.A. 2001 Supp. 65-1,182; effective, T-4-12-29-98, Jan. 1, 1999; effective April 23, 1999; amended April 4, 2003.)

4-21-6. Recordkeeping. (a) Each swine facility that is required to prepare a nutrient utilization plan shall keep records required by the law for the five years immediately preceding the date of the then-current inspection or for the years the swine facility operates after January 1, 1999. The swine facility shall not be required to keep records required by these regulations for more than five years from the date of approval.

(b) Actual nutrient values of waste may be used if the analysis used to determine the values is based on generally recognized sound agronomic interpretations and laboratory methods. Book values that are generally recognized as based on sound agronomic calculations may be substituted for actual values in preparing a nutrient utilization plan except for soil nutrient contents that require assay.

(c) Only actual soil analysis values shall be used in the preparation of nutrient utilization plans.

(d) Each facility shall maintain the records required for that facility by K.A.R. 4-21-1 through

K.A.R. 4-21-7, and K.A.R. 4-20-15 at the facility's site office. All records required to be kept by K.A.R. 4-21-1 through K.A.R. 4-21-7, and K.A.R. 4-20-15 shall be made available to the secretary of agriculture upon request. (Authorized by K.S.A. 2-3305 and K.S.A. 2-3309; implementing K.S.A. 2-3318, as amended by L. 2002, ch. 181, sec. 14 and K.S.A. 2001 Supp. 65-1,182; effective, T-4-12-29-98, Jan. 1, 1999; effective April 23, 1999; amended April 4, 2003.)

4-21-7. Exceeding the agronomic rate for phosphorus-holding capacity. A phosphorus soil analysis, as required by the secretary, shall be deemed to exceed the agronomic rate for phosphorus-holding capacity of the soil in a field if any of the following conditions is met: (a) The average annual rainfall is less than or equal to 22 inches, all of the field has a slope of five percent or less, and the soil analysis result using the Bray and Kurtz P-1 or the Mehlich 3 analysis method for phosphorus ("P") for the field exceeds 200 ppm or exceeds 76 ppm of "P" using the Olsen analysis method, as adopted by reference in K.A.R. 4-21-4.

(b) The average annual rainfall is less than or equal to 22 inches, any part of the field has a slope of greater than five percent, and the soil analysis result using the Bray and Kurtz P-1 or the Mehlich 3 analysis method for "P" exceeds 150 ppm or exceeds 57 ppm of "P" using the Olsen analysis method.

(c) The average annual rainfall is greater than 22 inches but less than 30 inches, the slope for all of the field is less than five percent, and the soil analysis result using the Bray and Kurtz P-1 or Mehlich 3 analysis method for "P" for the field exceeds 150 ppm or exceeds 57 ppm of "P" using the Olsen analysis method.

(d) The average annual rainfall is greater than 22 inches but less than or equal to 30 inches, the slope of any part of the field is greater than five percent, and the soil analysis result using the Bray and Kurtz P-1 or Mehlich 3 analysis method for "P" for the field exceeds 100 ppm or exceeds 38 ppm of "P" using the Olsen analysis method.

(e) The average annual rainfall is greater than 30 inches, and the soil analysis result using the Bray and Kurtz P-1 or Mehlich 3 analysis method for "P" for the field exceeds 100 ppm or exceeds 38 ppm of "P" using the Olsen analysis method. (Authorized by K.S.A. 2-3309; implementing K.S.A. 2002 Supp. 2-3318 and K.S.A. 65-1,182; effective April 4, 2003.)

Article 25.—GRAIN WAREHOUSE

4-25-1. (Authorized by and implementing L. 1986, Ch. 24, section 2; effective, T-87-39, Nov. 19, 1986; effective May 1, 1987; revoked Dec. 26, 1988.)

4-25-2. Record retention. (a) Each public warehouseman shall retain the following documents for at least six years after the public warehouseman is no longer liable for the grain specified in the document:

- (1) Scale tickets;
- (2) evidence of cancelled checks;
- (3) customer ledgers;
- (4) records of daily grain position;
- (5) insurance records;
- (6) warehouse receipts; and
- (7) any other document stored electronically or by any other means that identifies, in any way, grain stored in the warehouse.

(b) Upon request of the secretary or the secretary's designee, a public warehouseman shall produce for inspection or review any of the documents required to be maintained in subsection (a) of this regulation. (Authorized by K.S.A. 34-102; implementing K.S.A. 34-102, 34-228, 34-236, 34-246, 34-249a, 34-295a, 34-295b, and 34-2,104; effective March 8, 2002.)

4-25-3. Return of documents. Each public warehouseman shall return to the secretary all unused warehouse receipts and all Kansas public warehouseman licenses when either of the following occurs:

(a) The public warehouseman is no longer engaged in business as a public warehouseman.

(b) The name of the public warehouseman changes. (Authorized by K.S.A. 34-102; implementing K.S.A. 34-102 and 34-299; effective March 8, 2002.)

4-25-4. Storage space; exception. No portion of the total bulk grain capacity shall be deleted from the licensed capacity of a public warehouse if this portion is an integral part of any one unit under license and is equipped for grain handling and warehousing. However, any part of the licensed capacity may be reserved and designated "not for public use," if the public warehouseman submits an application to the secretary and receives the secretary's approval. A seal, a lock, or other method of segregating an area designated "not for public use" from the public warehouse

may be required by the secretary. (Authorized by K.S.A. 34-102; implementing K.S.A. 34-102, 34-228 and 34-237; effective March 8, 2002.)

4-25-5. Storage liability reports. (a) The "examiner's copy" of all executed warehouse receipts for the previous month shall be post-marked by the fifth of each month and mailed to the secretary.

(b) Each local public warehouseman shall maintain current and complete records at all times with respect to all grain, including grain owned by the public warehouseman, that is stored in or handled through the warehouse. These records shall include a daily summarized position record showing the following:

(1) The total quantity of each kind of grain received and shipped, and the quantity of each kind of grain remaining in the warehouse at the close of each business day; and

(2) the public warehouseman's total storage obligation for each kind of grain at the close of each business day.

(c) The public warehouseman shall forward to the secretary, not later than the fifth day of each month, a monthly statement of stocks of grain in each elevator through the last day of the preceding month, for each licensed warehouse location. (Authorized by K.S.A. 34-102; implementing K.S.A. 34-102 and 34-295a; effective March 8, 2002.)

4-25-6. Secretary's right to seal bins and weigh grain. Any grain on hand for which there are outstanding warehouse receipts may be weighed and required to be stored in sealed bins or tanks by the secretary. (Authorized by K.S.A. 34-102; implementing K.S.A. 34-102 and 34-239; effective March 8, 2002.)

4-25-7. Public warehouse receipts; form. The form used for warehouse receipts shall conform to the provisions of K.S.A. 34-239 and all other applicable sections of chapter 34 of the Kansas statutes annotated, and amendments thereto, and shall include, as a part of the form, the following statement:

"The undersigned warehouseman is not the owner of the grain covered by this receipt, either solely, jointly, or in common with others, unless otherwise stated hereon. It is hereby agreed that the grain herein described has been graded as provided by law and may be stored with other grain of the same grade; that this grain is stored under all the rights, powers, privileges, and duties provided

by chapter 34 of the Kansas Statutes Annotated. This grain is fully covered by fire, lightning, tornado, and internal explosion insurance. The storage, insurance, elevation, and other charges on said grain shall be governed by the published schedule of charges, which includes any legal change, in effect during the period from date of receipt of the grain until sold or delivered to the above named depositor or the depositor's order." (Authorized by K.S.A. 34-102; implementing K.S.A. 34-102, 34-238, and 34-239; effective March 8, 2002.)

4-25-8. Scale tickets; inbound form. (a) When a depositor leaves grain in any warehouse licensed under the provisions of chapter 34 of the Kansas statutes annotated, and amendments thereto, the grain shall be weighed and graded as provided by the laws and regulations of the state of Kansas. (b) Each scale ticket shall be plainly marked "inbound," shall be serially numbered, and shall contain at some convenient, conspicuous point the phrase "approved by the Kansas Department of Agriculture." Each ticket shall also include lines designated for the following:

- (1) The name of the licensee;
- (2) the date;
- (3) the name of the depositor;
- (4) the gross weight;
- (5) the tare weight;
- (6) the net weight, and a designation of whether the driver is on or off the truck;
- (7) the test weight;
- (8) the price;
- (9) the kind of grain; and
- (10) the signature of the licensee or duly authorized agent.

Each scale ticket may contain additional information if the additional information has received the prior approval of the secretary, but scale tickets shall be used only for grain received by the public warehouseman.

(c) Each public warehouseman shall keep a copy of the scale tickets, including voided tickets, in numerical order. The public warehouseman shall furnish a copy of these tickets to an authorized examiner of the Kansas department of agriculture upon demand. (Authorized by K.S.A. 34-102; implementing K.S.A. 34-102 and 34-233; effective March 8, 2002.)

4-25-9. Scale tickets; outbound form. (a) When, by any means of transportation except by rail or water, a public warehouseman licensed un-

der the provisions of chapter 34 of the Kansas statutes annotated, and amendments thereto, ships or transfers grain, grain shall be weighed as provided by the laws and regulations of the state of Kansas.

(b) Each scale ticket shall be plainly marked "outbound," shall be serially numbered, and shall contain at some convenient, conspicuous point the phrase "approved by the Kansas Department of Agriculture." Each ticket shall include lines designated for the following:

- (1) The name of the licensee;
- (2) the date;
- (3) the name of the customer;
- (4) the gross weight;
- (5) the tare weight;
- (6) the net weight, and a designation of whether the driver is on or off the truck;
- (7) the test weight;
- (8) the price;
- (9) the kind of grain; and
- (10) the signature of the licensee or duly authorized agent.

Scale tickets may contain additional information if the additional information has received the prior approval of the secretary.

(c) The approved scale tickets shall not be used for custom weighing or for any other purpose or use that is not pursuant to chapter 34 of the Kansas statutes annotated, and amendments thereto, and the regulations of the Kansas department of agriculture, but shall be used only for grain shipped or transferred by the warehouseman.

(d) Each public warehouseman shall keep a copy of the scale tickets, including voided tickets, in numerical order. The public warehouseman shall furnish a copy of these tickets to an authorized examiner of the Kansas department of agriculture upon demand. (Authorized by K.S.A. 34-102; implementing K.S.A. 34-102 and 34-233; effective March 8, 2002.)

4-25-10. Grain bank grain. (a) Grain bank grain shall be considered to be the same as storage grain and shall be subject to the same regulations as those for storage grain. For grain that is processed by each public warehouseman in whose warehouse the grain was originally deposited for processing, the minimum load out and receiving charges may be zero.

(b) Grain bank grain shall be entered into the records of the public warehouseman as a liability in the same manner as that for other storage grain for which the public warehouseman is lia-

ble. Grain bank grain shall be accounted for on an individual depositor basis and shall not be shown as a part of the total grain bank grain obligation. The records for grain bank grain shall be kept on a pound, bushel, or hundredweight basis for the grain deposited. (Authorized by K.S.A. 34-102 and 34-227b; implementing K.S.A. 34-227b; effective March 8, 2002.)

4-25-11. Allowance to licensed warehouses for the purpose of handling and storage of dry edible beans. For the purpose of allowing public licensed warehouses to handle and store dry edible beans, the definition of the word “grain” in K.S.A. 34-223, and amendments thereto, shall include dry edible beans. (Authorized by K.S.A. 34-102; implementing K.S.A. 34-102 and 34-223; effective March 8, 2002.)

4-25-12. Financial statements. (a) The financial statement of an applicant for a license or the financial statement of an existing grain warehouse shall show that current liquid assets equal or exceed current liabilities. If liabilities exceed liquid assets, the bond required by K.S.A. 34-229, and amendments thereto, may be amended to cover the deficiency, or an unused line of credit available to pay the depositor may offset the deficiency.

(b) If current liabilities exceed current liquid assets, the public warehouseman shall comply with subsection (a) of this regulation within 60 days from the date the secretary receives the financial statement that shows any deficiency.

(c) For the purposes of this regulation, liquid assets shall not include deferred income taxes or residential property. (Authorized by K.S.A. 34-102; implementing K.S.A. 34-102, 34-228, and 34-229; effective March 8, 2002.)

4-25-13. Appraisals. (a) If the financial statement of a public warehouseman does not reflect assets sufficient to comply with the net worth requirements of K.S.A. 34-228, and amendments thereto, the public warehouseman may acquire an appraisal. Each appraisal prepared pursuant to this regulation shall be performed by an independent appraiser certified by a generally recognized appraisal society. Each public warehouseman shall submit credentials for the appraiser upon request of the secretary.

(b) Surplus designated under an appraisal shall be discounted by 30 percent to account for estimated unrealized capital gains at the time of the

disposition of any grain for which the public warehouseman is liable.

(c) An appraisal prepared according to this regulation may be relied upon by the secretary for up to four years from the date of completion of the appraisal. (Authorized by K.S.A. 34-102; implementing K.S.A. 34-102 and 34-228; effective March 8, 2002.)

4-25-14. Successor agreement. (a) In each successor’s agreement, grain in open storage, grain bank grain, or warehouse receipts shall be identified separately. The public warehouseman whose liability is being assumed shall report within five days of closing, or within a reasonable time approved by the secretary, the amount of each commodity stored in the warehouse and shall identify the grain as grain in open storage, grain bank grain, or grain subject to a warehouse receipt. The report shall be submitted in writing on a form prescribed by the secretary.

(b) The report specified in subsection (a) of this regulation shall not be required if the change in the ownership is a change only in the name of the grain warehouse. (Authorized by K.S.A. 34-102; implementing K.S.A. 34-102 and 34-228; effective March 8, 2002.)

4-25-15. Definition of 12-month period. The inspection required by K.S.A. 34-228, and amendments thereto, shall be conducted at least once in the 12-month period commencing July 1 of each year. (Authorized by K.S.A. 34-102; implementing K.S.A. 34-102 and 34-228; effective March 8, 2002.)

4-25-16. Fees and charges. (a) The annual fee for a public warehouse license shall be computed as follows, based on the capacity of the public warehouse:

Capacity in Bushels	Annual Fee
1 to 100,000	\$400.00
100,001 to 150,000	430.00
150,001 to 250,000	460.00
250,001 to 300,000	490.00
300,001 to 350,000	520.00
350,001 to 400,000	550.00
400,001 to 450,000	575.00
450,001 to 500,000	605.00
500,001 to 600,000	630.00
600,001 to 700,000	660.00
700,001 to 800,000	850.00
800,001 to 900,000	875.00
900,001 to 1,000,000	900.00
1,000,001 to 1,750,000	1,225.00
1,750,001 to 2,500,000	1,400.00
2,500,001 to 5,000,000	1,750.00
5,000,001 to 7,500,000	2,100.00

Capacity in Bushels	Annual Fee
7,500,001 to 10,000,000	2,375.00
10,000,001 to 12,500,000	2,600.00
12,500,001 to 15,000,000	2,800.00
15,000,001 to 17,500,000	3,000.00
17,500,001 to 20,000,000	3,225.00
Over 20,000,000 bushels.....	add 350.00
for each 2,500,000 bushels or fraction thereof.	

(b) The charge for amending a warehouse license shall be \$300.00.

(c) The charges for each special or requested examination of a warehouse shall consist of the following:

- (1) \$50.00 per hour for each examiner, with a required minimum charge of four hours;
- (2) subsistence expenses for each examiner; and
- (3) mileage expenses for each examiner, which shall be charged, per mile driven, at the rate per mile determined by the secretary of administration pursuant to K.S.A. 75-4607, and amendments thereto.

(d) The license fee shall be the applicable amount specified in the fee schedule in subsection (a) plus \$500 for each functional unit. Each public warehouseman shall pay the hourly rate, subsistence, and mileage expenses identified in subsection (c) of this regulation for examinations necessitated by changes in storage capacity, including conditional storage space of a licensed warehouse, or by the need to confirm that a warehouse is empty. Any other charge or requirement identified in statute or regulation shall apply to the conditional or empty storage space of a public warehouse.

(e) Each public warehouseman shall pay the hourly rate, subsistence, and mileage expenses identified in subsection (c) of this regulation for examinations necessitated by changes in storage capacity, including the addition of conditional storage space in a licensed warehouse, or by the need to confirm that a warehouse is empty. Any other charge or requirement identified in statute or regulation shall apply to the conditional or empty storage space of a public warehouse. (Authorized by K.S.A. 34-102; implementing K.S.A. 34-102 and 34-228; effective March 8, 2002; amended, T-4-12-16-03, Jan. 1, 2004; amended Feb. 6, 2004.)

4-25-17. Transfer of grain between public warehouses. (a) A public warehouseman, as defined by K.S.A. 34-223, and amendments thereto, who lacks sufficient space and desires to transfer grain for which valid receipts have been issued may transfer this grain either by physical move-

ment of the grain or by other methods approved by the secretary as standard industry practice, subject to the following requirements:

(1) The shipping public warehouseman shall immediately notify the secretary before the transfer of receipted grain. This notice to the secretary shall include the location where the grain will be transferred for storage. The shipping public warehouseman shall also provide written notice to all depositors who hold receipts for grain that the shipping public warehouseman may forward grain deposited on a commingled basis.

(2) For purposes of this regulation, a licensed public warehouse shall mean a warehouse operated by a public warehouseman who holds a valid license under the U.S. warehouse act for grain, or a public warehouse operated by a public warehouseman who holds a valid warehouse license for the public storage of grain or rice, issued by a state that has financial, bonding, and examination requirements for the benefit of all depositors.

(3) The shipping public warehouseman shall promptly obtain nonnegotiable warehouse receipts from the receiving public warehouseman for all transferred grain. The receipts shall be kept on forms furnished by the secretary pursuant to K.S.A. 34-238 and amendments thereto. Receipts shall not be used in any other manner except as provided by Kansas statute. The receipts shall be retained by the shipping public warehouseman to be presented to and used by department examiners in lieu of an on-site inventory. The grain covered by these receipts shall not be the property of either the receiving or shipping public warehouseman but shall be held in trust by both parties solely for the benefit of the depositors whose bailed grain was transferred individually or collectively, and the depositor or the depositor's transferee shall retain title to it.

(4) The shipping public warehouseman's bond shall be increased to consider the addition of the transferred grain to the licensed capacity of the public warehouse with the net worth requirements based on the total of the licensed capacity and the forwarded grain. The bond amount shall not be required to be more than \$500,000 unless necessary to cover a deficiency in net worth to meet the requirements of K.S.A. 34-228, and amendments thereto.

(5) The shipping public warehouseman shall continue to retain that individual's obligations to the owners for all grain deposited in the public warehouse for storage, whether forwarded or re-

tained, and shall redeliver the grain upon demand to the depositor or the depositor's transferee at the public warehouse where the grain was first deposited for storage.

(6) Nothing in this regulation shall diminish either the right of the owner of the grain to receive on delivery or the obligation of the public warehouseman of a licensed public warehouse from which the product is transferred to deliver, to the owner, grain in the amount and of the kind, quality, and grade specified by the warehouse receipts or other evidence of storage.

(7) If it is the shipping public warehouseman's obligation by terms of the warehouse receipt or by any other agreement to insure the grain subject to the transfer, that individual shall in accordance with K.S.A. 34-236, and amendments thereto, keep this grain insured in that individual's own name or transfer the grain only to a public warehouse where the grain is fully insured.

(b) A shipping public warehouseman may transfer stored grain, as defined by K.S.A. 34-223, and amendments thereto, by complying with the provisions of paragraphs (a)(2), (a)(5), (a)(6), and (a)(7) of this regulation. (Authorized by K.S.A. 34-102; implementing K.S.A. 34-102 and 34-241; effective March 8, 2002.)

4-25-18. Credit for unexpired portion of license on new or amended license. A successor to a current license holder may prorate the unused portion of the license fee to reduce the amount of a new license fee if the change in the successor is solely a change in the name of the license holder. (Authorized by K.S.A. 34-102; implementing K.S.A. 34-102 and 34-228; effective March 8, 2002.)

Article 27.—LODGING ESTABLISHMENTS

4-27-1. Lodging establishment application fees. The application fee for each lodging establishment doing business in Kansas shall be based on the number of rooms as follows: (a) 1 room through 29 rooms: \$100; and

(b) 30 rooms or more: \$200. (Authorized by K.S.A. 2010 Supp. 36-506; implementing K.S.A. 2010 Supp. 36-502, as amended by 2011 HB 2282, sec. 2; effective June 4, 2010; amended, T-4-6-30-11, July 1, 2011; amended Oct. 28, 2011.)

4-27-2. Definitions. (a) "Bathroom" shall mean a room provided to guests, including a

locker room, shower room, or other similar room, where guests can shower, store personal items, or change into appropriate clothing for use in the spa.

(b) "Bed and breakfast home" shall mean a boarding house that is a private residence where the owner or manager resides and provides lodging and meals for guests. Any licensee operating a bed and breakfast home may serve food only to the licensee's overnight guests, unless the licensee obtains a food service license.

(c) "Egress" shall mean an exit or route leading out of a lodging establishment.

(d) "Extended-stay establishment" shall mean a lodging establishment in which a room is rented or leased to transient guests. Housekeeping functions are not provided on a daily basis.

(e) "Hot tub" shall mean a pool or container of water designated for recreational use in which one or more people can soak. A hot tub can use hydrojet circulation or an air induction system, or a combination of these, to provide water circulation. A hot tub can use various water temperatures and additives, including minerals and oils, to provide therapy or relaxation.

(f) "Imminent health hazard" shall mean fire, flood, sewage backup, rodent infestation, bed bug or other insect infestation, misuse of poisonous or toxic materials, gross unsanitary occurrence or condition, or any other condition that could endanger the health or safety of guests, employees, or the general public.

(g) "Kitchenette" shall mean a compact kitchen with cooking utensils, tableware, refrigerator, microwave, stove, or sink or any combination of these.

(h) "Licensee" shall mean a person who is responsible for the operation of the lodging establishment and possesses a valid license to operate a lodging establishment.

(i) "Linens" shall mean the cloth items used in the lodging establishment, including sheets, bedspreads, blankets, pillowcases, mattress pads, towels, and washcloths.

(j) "Lodge" shall mean a boarding house or a rooming house that provides seasonal lodging for recreational purposes. If meals are provided for overnight guests, the lodge is operating as a boarding house. If meals are not provided for overnight guests, the lodge is operating as a rooming house.

(k) "Major renovation" shall mean a physical change to a lodging establishment or portion of a lodging establishment, including the following:

(1) Replacing or upgrading any of the following types of major systems:

- (A) Electrical;
- (B) plumbing;
- (C) heating, ventilation, and air-conditioning;
- (2) demolition of the interior or exterior of a building or portion of the building; and
- (3) replacement, demolition, or installation of interior walls and partitions, whether fixed or moveable.

Major renovation shall not include replacement of broken, dated, or worn equipment and other items, including individual air-conditioning units, bathroom tiles, shower stalls, and any other items that do not require additional or new plumbing or electrical repairs.

(l) "Person in charge" shall mean the individual or employee who is present in the lodging establishment at the time of the inspection and who is responsible for the operation. If no designated individual or employee is the person in charge, then any employee present is the person in charge.

(m) "Recreational water facility" and "RWF" shall mean a water environment with design and operational features that provides guests with recreational activity and that involves immersion of the body partially or totally in the water. This term shall include water slides, watercourse rides, water activity pools, jetted pools, and wave pools. This term shall not include swimming pools and hot tubs.

(n) "Sanitize" shall mean to apply cumulative heat or chemicals on any clean surface so that, when evaluated for efficacy, the surface yields a reduction of 99.999% of disease-causing microorganisms.

(o) "Single-service articles" shall mean items that are designed, constructed, and intended for one-time use and for one person's use, after which the items are discarded. This term shall include plastic, paper, or foam tableware and utensils, lightweight metal foil, stirrers, straws, toothpicks, and other items including single-use gloves, bags, liners, containers, placemats, and wrappers.

(p) "Spa" shall mean any area of a lodging establishment where a hot tub, swimming pool, fitness equipment, tanning bed, or similar guest amenities are located. (Authorized by K.S.A. 2011 Supp. 36-506, as amended by L. 2012, ch. 145, sec. 6; implementing K.S.A. 2011 Supp. 36-501, as amended by L. 2012, ch. 145, sec. 3, and K.S.A. 2011 Supp. 36-506, as amended by L. 2012, ch. 145, sec. 6; effective June 4, 2010; amended Feb. 8, 2013.)

4-27-3. Licensure; plans and specifications; variances. (a) Each person applying for a license to operate a lodging establishment shall submit the following to the secretary:

(1) A completed application and the required application and license fees; and

(2) if required by subsection (b), the plans and specifications of the lodging establishment.

(b) The plans and specifications shall be submitted before any of the following:

(1) The construction of a lodging establishment;

(2) the conversion of an existing structure for use as a lodging establishment;

(3) the major renovation of a lodging establishment;

(4) the addition or major renovation of a swimming pool, hot tub, recreational water facility, or spa; or

(5) the addition or change of a food service operation within a lodging establishment.

(c) Each plan and specification for a lodging establishment shall demonstrate conformance with the applicable requirements of these regulations and shall include the following:

(1) The proposed layout, mechanical schematics, construction materials, and completion schedules;

(2) the equipment layout, construction materials, and completion schedules for any food preparation and service area; and

(3) the equipment layout and completion schedules for each swimming pool, hot tub, RWF, and spa.

(d) A variance may be granted by the secretary to modify or waive one or more requirements of a regulation if the secretary determines that a health hazard, safety hazard, or nuisance will not result from the variance.

(1) Each person requesting a variance shall submit the following to the department:

(A) A written statement of the proposed variance of the regulatory requirement;

(B) documentation of how the proposed variance addresses public health hazards and guest safety at the same level of protection as that of the original requirement; and

(C) any other relevant information if required by the secretary.

(2) For each variance granted, the licensee shall meet the following requirements:

(A) Follow the plans and procedures approved by the secretary;

(B) maintain a permanent record of the variance at the lodging establishment; and

(C) maintain and provide to the secretary, upon request, records that demonstrate that the variance is being followed. (Authorized by K.S.A. 2011 Supp. 36-506, as amended by L. 2012, ch. 145, sec. 6; implementing K.S.A. 2011 Supp. 36-502, as amended by L. 2012, ch. 145, sec. 4; effective June 4, 2010; amended Feb. 8, 2013.)

4-27-4. Food service and food safety.

Each person operating a guest house that serves food to the general public, in addition to overnight guests, shall obtain a food establishment license in accordance with K.S.A. 65-688 et seq., and amendments thereto. (Authorized by and implementing K.S.A. 2011 Supp. 36-506, as amended by L. 2012, ch. 145, sec. 6; effective June 4, 2010; amended Feb. 8, 2013.)

4-27-5. Imminent health hazard. (a) Each licensee shall discontinue operations of the affected portions of the lodging establishment on discovery that an imminent health hazard exists.

(b) Each licensee shall notify the secretary within 12 hours of the discovery of an imminent health hazard. (Authorized by and implementing K.S.A. 2011 Supp. 36-506, as amended by L. 2012, ch. 145, sec. 6; effective June 4, 2010; amended Feb. 8, 2013.)

4-27-6. General requirements. (a) Each licensee shall meet all of the following requirements:

(1) Post the license in a location in the lodging establishment that is conspicuous to guests;

(2) comply with the provisions of these regulations, including the conditions of any granted variance;

(3) ensure that no room or any portion of the lodging establishment is rented unless the room or portion of the lodging establishment is safe and sanitary; and

(4) replace any existing items, including equipment, furnishings, fixtures, or items of décor, with items that meet the requirements of these regulations, under any of the following conditions:

(A) The items constitute a public health hazard;

(B) the items affect guest safety; or

(C) the items do not meet the requirements of these regulations.

(b) Each licensee shall ensure that the hot water capacity is sufficient to meet the hot water demands of the lodging establishment.

(c) Each licensee shall ensure that all handwashing sinks meet all of the following requirements:

(1) Hot and cold potable water shall be supplied under pressure to each sink in enough capacity to meet handwashing needs.

(2) A mixing valve or combination faucet shall be used, unless the lodging establishment is listed on the state historical register or a variance that alters this requirement has been granted.

(3) The temperature of the hot water shall be at least 100 degrees Fahrenheit. If a mixing valve or combination faucet is not used, the temperature of the hot water shall not exceed 130 degrees Fahrenheit.

(4) A supply of hand soap and either paper towels or an electric drying device shall be available at all times at the handwashing sink.

(d) In public areas, cloth towels may be provided for one-time use by an individual. A receptacle for the soiled cloth towels shall be provided.

(e) The use of a common cloth towel shall be prohibited, except in guest rooms.

(f) A handwashing reminder sign shall be posted in each handwashing area, except in guest rooms.

(g)(1) A toilet room that is accessible at all times to employees shall be provided. A public toilet room may be used by employees in lieu of a separate employee toilet room.

(2) A public toilet room or rooms shall be provided and accessible to the public if the lodging establishment provides space for guest or public gatherings or functions, including conferences, meetings, seminars, receptions, teas, dances, recitals, weddings, parties, wakes, and other events.

(3) There shall be at least one handwashing sink in or immediately adjacent to each toilet room. Each sink shall meet the requirements specified in subsection (c).

(4) Each toilet and urinal shall be sanitary, maintained in good repair, and operational at all times.

(5) Each toilet and urinal shall be cleaned and sanitized daily or more often if visibly soiled.

(6) The floor in each toilet room shall be constructed of smooth, nonabsorbent, easily cleanable materials and maintained in good repair. Carpeting shall be prohibited as a floor covering in toilet rooms.

(7) Except as specified in this paragraph, the storage of items in any toilet room shall be prohibited. A small amount of commonly used toilet room supplies may be stored, including toilet paper, hand soap, and paper towels. (Authorized by K.S.A. 2008 Supp. 36-506; implementing K.S.A. 2008 Supp. 36-502 and 36-506; effective June 4, 2010.)

4-27-7. Personnel; health, cleanliness, and clothing. Each licensee shall ensure that all of the following requirements are met: (a) Health of employees. Each employee with any of the following health problems shall be excluded from a lodging establishment:

(1) The employee is infected with a communicable disease, and the disease can be transmitted to other employees or guests in the normal course of employment.

(2) The employee is a carrier of organisms that cause a communicable disease.

(3) The employee has a boil, an infected wound, or an acute respiratory infection.

(b) Cleanliness of employees.

(1) Each employee shall wash that employee's hands in accordance with paragraph (b)(2) before handling clean utensils or dishware, ice, beverages, food, or clean laundry.

(2) Each employee shall wash that employee's hands and any exposed portions of that employee's arms with soap and water in a designated sink by vigorously rubbing together the surfaces of the lathered hands and arms for 15 seconds to 20 seconds and thoroughly rinsing with clean water.

(c) Clothing. Each employee providing services directly to guests or performing housekeeping functions shall wear clean outer clothing that is in good repair. (Authorized by and implementing K.S.A. 2008 Supp. 36-506; effective June 4, 2010.)

4-27-8. Guest and public safety. (a) If the secretary has reason to believe that defects could be present with regard to the integrity of the structure or electrical system of the lodging establishment, the licensee may be required by the secretary to retain the services of a professional engineer or local building code officer to certify the lodging establishment for building safety. Disasters after which the structural integrity may need to be evaluated shall include a heavy snow or ice storm, flood, tornado, straight-line winds, fire, hurricane, and earthquake.

(b) Each licensee shall ensure that all repairs, construction, renovations, and maintenance are conducted in a manner that provides safe conditions for the guests and the public.

(c) The licensee of each lodging establishment using fuel-fired equipment or appliances that pose a potential carbon monoxide risk, including lodging establishments with attached parking garages or wood-burning fireplaces, shall install one

or more carbon monoxide detectors according to the manufacturer's specifications.

(1) A carbon monoxide detector shall be required in each non-guest room adjoining or sharing a common ventilation system with an attached parking garage.

(2) Each carbon monoxide detector shall be in working condition.

(A) Each carbon monoxide detector shall be tested at least every six months to ensure that the detector is operating properly. The batteries shall be changed, as needed.

(B) A 12-month history of all test results shall be logged and maintained at the lodging establishment and made available to the secretary upon request.

(C) If a battery-operated detector is not operational for two consecutive tests, the licensee shall install a detector that is hardwired with a battery backup.

(3) A carbon monoxide detector shall not be required to be installed in an attached parking garage area.

(d) The operation and maintenance requirements for each lodging establishment shall include all of the following:

(1) Each lodging establishment shall meet the requirements of all applicable building codes, fire codes, and ordinances.

(2) No freshly cut Christmas trees or boughs shall be used unless the freshly cut trees or boughs are treated with a flame-resistant material. The documentation of the treatment shall be kept on file at the lodging establishment for at least one year.

(3) Textile materials having a napped, tufted, looped, woven, nonwoven, or similar surface shall not be applied to walls or ceilings, unless the textile materials are treated with a flame-resistant material. The documentation of the treatment shall be kept on file at the lodging establishment for as long as the materials are used on the walls or ceilings. This documentation shall be made available to the secretary upon request. Carpeting used as coving that covers the junction between the floor and walls shall be exempt from this requirement.

(4) Foam or plastic materials or other highly flammable or toxic material shall not be used as an interior wall, ceiling, or floor finish unless approved by the secretary.

(5) The doors in any public areas that lead outside the lodging establishment shall not be locked

or blocked, preventing egress when the building is occupied. No exit doors shall be concealed or obscured by hangings, draperies, or any other objects.

(6)(A) Portable fire extinguishers shall be required and located in the hallways, mechanical rooms, laundry areas, and all other hazardous areas and within 75 feet of each guest room door. All portable fire extinguishers shall be easily accessible to the guests and employees.

(B) Each fire extinguisher shall meet the following requirements:

(i) Be maintained in a fully charged and operable condition;

(ii) be rated at least 2A-10BC;

(iii) contain at least five pounds of fire suppressant; and

(iv) be inspected annually by a fire extinguisher company, a fire department representative, or another entity approved by the secretary. The licensee shall retain a record of these inspections at the lodging establishment for at least one year.

(7) Emergency lighting shall be provided where guest room doors open to an interior corridor and where guest room doors open to the outside but not directly at ground level.

(8) A smoke detector shall be installed in each guest sleeping room, cooking area and kitchen, interior stairwell, hallway, laundry area, mechanical room, and any other fire hazard area. Any heat-sensing device designed to detect fire may be installed in a cooking area in lieu of a smoke detector.

(A) All smoke detectors and heat-sensing devices shall be maintained in operating condition.

(B) Each smoke detector and each heat-sensing device shall be tested at least every six months to ensure that the detector or device is operating properly. The batteries shall be replaced as needed.

(C) A 12-month history of test results shall be logged and maintained at the lodging establishment and made available to the secretary upon request.

(D) If a battery-operated detector is not operational for two consecutive tests, the licensee shall install a detector that is hardwired with a battery backup.

(E) Smoke detectors for hearing-impaired individuals shall be available as specified in K.S.A. 36-517, and amendments thereto.

(9) If hardwired, interconnected smoke detectors are used, these detectors shall be tested and approved annually by a fire sprinkler company, fire alarm company, fire department representa-

tive, or any other entity approved by the secretary. A 12-month history of test results shall be maintained at the lodging establishment and made available to the secretary upon request.

(10) If fire alarm systems and fire sprinkler systems are used, the systems shall be tested and approved annually by a fire alarm company, fire sprinkler company, fire department representative, or any other entity approved by the secretary. A 12-month history of test results shall be maintained at the lodging establishment and made available to the secretary upon request.

(11)(A) All exit signs shall be clean and legible. At least one exit sign shall be visible from each of the following locations:

(i) The doorway of each guest room that opens to an interior corridor; and

(ii) the doorway of each guest room that opens to the outdoors but not directly at ground level.

(B) Each newly constructed lodging establishment shall have supplemental directional signs indicating the direction and path of egress.

(C) Boarding houses and rooming houses shall not be required to have exit signs if the requirements in paragraphs (d)(5) and (12) are met.

(12) An evacuation route diagram shall be posted in a conspicuous location in each guest room. The diagram shall include the location of the guest room, the layout of the floor, and the location of the nearest available exits. If the door of a guest room opens directly to the outdoors at ground level, the diagram shall not be required to be posted.

(13) A copy of an emergency management plan and employee instructions shall be kept on file in the lodging establishment, made accessible to all employees, and made available to the secretary upon request. A record that each employee has received training on the emergency management plan shall be maintained at the lodging establishment in each employee's file. (Authorized by and implementing K.S.A. 2011 Supp. 36-506, as amended by L. 2012, ch. 145, sec. 6; effective June 4, 2010; amended Feb. 8, 2013.)

4-27-9. Guest rooms. Each licensee shall ensure that each guest room is kept clean, is in good repair, and is maintained with regard to the health and safety of each guest, in accordance with all of the following requirements: (a) The walls, floors, ceilings, doors, and windows shall be constructed of materials intended for that purpose, maintained in good repair, and cleaned, painted, or replaced as necessary.

(1) All junctures between floors and walls shall be constructed, covered, or finished with a baseboard and readily cleanable.

(2) All floors and floor coverings shall be cleaned as needed. The methods for cleaning shall be suitable to the finish and material.

(3) All floor maintenance, repair, or replacement shall be done in a manner that prevents slipping or tripping hazards to any guest.

(4) A guest room that has visible mold on the floors, walls, ceiling, or windows shall not be rented until mold cleanup is completed.

(b) All furnishings, including draperies, beds, appliances, furniture, lamps, and decorative items, shall be kept clean and in good repair. The methods for cleaning shall be suitable to the material and finish.

(c) Each guest room shall have a connecting toilet room and bathing facilities, including a bathtub or shower, except for the following:

(1) If the lodging establishment is listed on the state historical register and documentation is provided to the secretary, at least one toilet room with bathing facilities located on the same floor shall be provided for every two guest rooms, unless otherwise specified by the secretary.

(2) If the lodging establishment is a boarding house, including a bed and breakfast home, or a rooming house, at least one toilet room with bathing facilities located on the same floor shall be provided for every two guest rooms.

(3) If the lodging establishment is a lodge with dormitory sleeping areas, at least one toilet and at least one bathtub or one shower shall be provided for every six guests and shall be located within the same building as the dormitory sleeping area or adjacent to the dormitory sleeping area.

(d) Each handwashing sink shall meet the requirements specified in K.A.R. 4-27-6.

(e) Each rented guest room shall be serviced daily in the following manner except as otherwise specified in this subsection:

(1) Clean bathroom linens, including towels and washcloths, shall be provided. If bathmats are provided, the bathmats shall be clean.

(2) Clean bed linens shall be provided, and the bed shall be made.

(3) All floors shall be swept or vacuumed, if visibly soiled. All hard-surface floors shall be wet-cleaned if visibly soiled.

(4) Each toilet, sink, bathtub, and shower area shall be cleaned if visibly soiled.

(5) Each trash container shall be emptied and

shall be cleaned if visibly soiled. A trash container liner may be reused during the same guest's stay if the liner is not visibly soiled.

(6) All soap and prepackaged guest toiletry items shall be replenished, as necessary.

(7) All toilet paper shall be replenished, as necessary.

(8) Clean ice bucket liners shall be provided and replaced, as necessary and upon request of the guest.

(9) All glassware and cups, if provided, shall be replaced with clean and sanitized dishware. Single-service cups, if provided, shall be replenished.

(10) If a coffeemaker is present in the guest room, the coffeepot shall be rinsed. If the coffeepot is visibly soiled or contaminated, it shall be washed, rinsed, and sanitized. A fresh supply of coffee, condiments, and any single-service articles shall be replenished, if provided.

(f) Each guest room shall be serviced daily during the guest's stay if the stay is less than five days, unless the guest requests that all or part of the room not be serviced.

(g) If the same guest continuously occupies the same room for five or more days, the room shall be serviced and cleaned at least every five days. For each extended-stay establishment, the guest room shall be serviced and cleaned at least every five days.

(h) Each guest room that is available for rent shall be serviced and cleaned before each new guest. In addition to the required service activities in subsection (e), each guest room cleaning shall include the following:

(1) All floors shall be swept or vacuumed, and all hard-surface floors shall be wet-cleaned.

(2) All furniture, fixtures, and any items of decoration shall be cleaned in a manner that is appropriate to the finish.

(3) The interior of all drawers shall be cleaned.

(4) All toilets, sinks, bathtubs, and shower areas shall be cleaned and sanitized in a manner that is appropriate to the finish.

(5) All sinks, bathtubs, and shower areas shall be kept free of hair, mold, and mildew.

(6) Bed linens and bath linens shall not be used for cleaning or dusting.

(7) All trash containers shall be emptied and cleaned, and new liners shall be provided.

(8) All ice bucket liners shall be replaced with new liners.

(9) All used guest toiletries and soap shall be replenished.

(10) The guest room shall be visually inspected for any evidence of insects, rodents, and other pests.

(i)(1) All bedspreads, top-covering linens, blankets, mattress pads, mattresses, and box springs shall be cleaned and maintained in good repair according to all of the following requirements:

(A) All linens with tears or holes shall be repaired or replaced, and all soiled and stained linen shall be cleaned.

(B) All bedspreads and top-covering linens shall be cleaned at least monthly.

(C) All blankets and mattress pads shall be cleaned at least monthly. All blankets and mattress pads that are visibly soiled or stained shall be removed and replaced with clean linen.

(D) All mattresses and box springs shall be kept clean. Each damaged or soiled mattress and box spring shall be repaired or cleaned.

(E) Each mattress that is not kept in sanitary condition shall be replaced.

(2) The interior and surface of each enclosed mattress platform shall be cleaned if visibly soiled and either maintained in good repair or replaced.

(j) If a coffeepot is not located within a toilet room, the coffeepot shall be rinsed before each new guest. If a coffeepot is located within a toilet room, the coffeepot shall be washed, rinsed, and sanitized before each new guest as specified in K.A.R. 4-27-10.

(k) All single-service drinking glasses and utensils shall be prepackaged.

(l) All food and condiments provided in each guest room shall be individually prepackaged.

(m) If a refrigerator unit is provided in a guest room, the unit shall be cleaned before each new guest.

(n) Each appliance provided for guest use, including microwaves, stoves, dishwashing machines, coffeemakers, hair dryers, clothing irons, radios, televisions, remote controls, and video equipment, shall be operational and in good repair. All cooking appliances, including microwaves and stoves, shall be cleaned before each new guest. All appliances shall be listed with or certified by underwriters' laboratories (UL) and shall bear the UL designation.

(o) Except as specified in this subsection, the use of portable electrical or open-flame cooking devices shall be prohibited in a guest room. These devices shall include hot plates, electric skillets and grills, propane and charcoal grills, camping stoves, and any similar cooking devices. These de-

vices shall not include slow cookers. Microwaves and toasters that are provided in a guest room by the licensee shall be permitted.

(p) Each guest room shall be free of any evidence of insects, rodents, and other pests.

(1) If a guest room has been vacant for at least 30 days, the licensee shall visually inspect that room for any evidence of insects, rodents, and other pests within 24 hours of occupancy by the next guest.

(2) No guest room that is infested by insects, rodents, or other pests shall be rented until the infestation is eliminated.

(3) The presence of bed bugs, which is indicated by observation of a living or dead bed bug, bed bug carapace, eggs or egg casings, or the typical brownish or blood spotting on linens, mattresses, or furniture, shall be considered an infestation.

(4) The presence of bed bugs shall be reported to the secretary within one business day upon discovery or upon receipt of a guest complaint.

(5) All infestations shall be treated by a licensed pest control operator.

(6) All pest control measures, both mechanical and chemical, shall be used in accordance with the manufacturer's recommendations.

(7) No rodenticides, pesticides, or insecticides shall be stored in a guest room or in any area that could contaminate guest supplies, food, condiments, dishware, or utensils.

(q)(1) The licensee of each lodging establishment that allows pets into any guest room shall advise consumers that the establishment is "pet-friendly" by posting a sign in a conspicuous place at the front desk to alert guests that pets are allowed.

(2) The licensee of each lodging establishment where pets or service animals have been in a guest room shall meet one of the following requirements:

(A) The guest room shall be deep cleaned before the next guest. Deep cleaning shall include servicing and cleaning the guest room as specified in subsections (e) and (h), as well as vacuuming and shampooing the carpet and upholstered furnishings and vacuuming the mattress. All bed linens, including sheets, mattress pads, blankets, bedspreads or top coverings, and pillows, shall be replaced with clean bed linens.

(B) If the room is not deep cleaned, the licensee shall not offer that room to any guest without giving notification to that guest that a pet or service animal was in the room previous to the new guest.

(3) If the previous guest has smoked in a room, the licensee of any lodging establishment shall not offer that room as a non-smoking room until one of the following requirements is met:

(A) The guest room is deep cleaned as specified in paragraph (q)(2)(A).

(B) If the room is not deep cleaned, the licensee shall give notification to the new guest that the previous guest smoked in the room.

(r) Each guest room shall be provided with a means for locking each entrance both from the inside and from the outside, according to all of the following requirements:

(1) The key furnished to each guest shall not unlock the door to any other guest room.

(2) At least one secondary lock, including a dead bolt lock, thumb bolt, chain lock, or a similar device, shall be provided in addition to the primary key lock and shall be installed in accordance with the manufacturer's specifications.

(3) All locks shall be in good repair and fully operational.

(s) Each pair of connecting guest rooms shall have two doors in the connecting doorway. Each connecting door shall be equipped with a lock on only the guest room side of that door.

(t) If cribs are provided upon request, the cribs shall be easily cleanable, safe, and in good repair. Each crib rail, pad, and mattress shall be cleaned and sanitized after each guest. (Authorized by and implementing K.S.A. 2011 Supp. 36-506, as amended by L. 2012, ch. 145, sec. 6; effective June 4, 2010; amended Feb. 8, 2013.)

4-27-10. Dishware and utensils. Each licensee shall ensure that all of the following requirements are met: (a) General.

(1) All dishware and utensils that are designed for repeat use shall be made of safe, durable, and nonabsorbent material and shall be kept in good repair. No cracked or chipped dishware or utensils shall be provided for use by guests or employees.

(2) All single-service articles shall be constructed of safe, durable, and nonabsorbent materials.

(3) All single-service drinking glasses and utensils shall be prepackaged or protected in a dispenser.

(4) No single-service articles may be reused.

(b) Storage.

(1) All clean dishware and utensils and all single-service articles shall be protected from dirt, dust, liquids, insects, vermin, and any other sources of contamination at all times.

(2) Each licensee shall provide storage facilities for dishware and utensils in a clean, dry location at least six inches above the floor.

(3) No dishware and utensils shall be stored under an exposed sewer line or a dripping water line.

(4) No dishware, utensils, single-service articles, ice buckets, and food containers shall be stored within a toilet room.

(c) Cleaning and sanitization. Each licensee shall use either manual cleaning and sanitizing equipment or mechanical cleaning and sanitizing equipment.

(1) All dirty or used glasses, dishware, and utensils that are in areas other than a guest room kitchenette shall be removed from each guest room during the servicing or cleaning of the room and upon vacancy of that room. All items shall be washed, rinsed, and sanitized using one of the approved methods in this regulation.

(2) If the licensee provides repeat service dishware or utensils to the lodging establishment's guests or to the public, the licensee shall install in the lodging establishment, or in a food service area operated in conjunction with the lodging establishment, manual or mechanical cleaning equipment for dishware and utensils that meets the requirement of this regulation.

(3) The manual cleaning and sanitizing of dishware, utensils, and food equipment shall meet all of the following requirements:

(A)(i) A sink with at least three compartments or three adjacent sinks shall be used and shall be large enough to permit the immersion of the largest item of dishware, utensil, or food equipment articles to be cleaned.

(ii) All sinks and dishware drying surfaces shall be cleaned before use.

(B) Each compartment of the sink shall be supplied with hot and cold potable running water.

(C) The wash, rinse, and sanitizing water shall be kept clean.

(D) The steps for manual cleaning and sanitizing shall consist of all of the following:

(i) All dishware, utensils, and food equipment shall be thoroughly washed in the first compartment with a hot detergent solution.

(ii) All dishware, utensils, and food equipment shall be rinsed free of detergent and abrasives with clean hot water in the second compartment.

(iii) All dishware, utensils, and food equipment shall be sanitized in the third compartment according to one of the methods in paragraph (c)(3)(E).

(E) The food contact surfaces of all dishware, utensils, and food equipment shall be sanitized during manual ware washing by one of the following methods:

(i) Immersion for at least 10 seconds in a clean solution containing 50 to 200 parts per million of available chlorine, with a water temperature of at least 75 degrees Fahrenheit;

(ii) immersion for at least 30 seconds in clean hot water with a temperature of at least 171 degrees Fahrenheit;

(iii) immersion in a clean solution containing a quaternary ammonium compound with a minimum water temperature of 75 degrees Fahrenheit and with the concentration indicated by the manufacturer's directions on the label; or

(iv) immersion in a clean solution containing a sanitization chemical other than those specified in this subsection that meets the applicable requirements specified in K.A.R. 4-28-11.

(F) A chemical test kit, thermometer, or other device that accurately measures the concentration of sanitizing chemicals, in parts per million, and the temperature of the water shall be available and used daily.

(4) The mechanical cleaning and sanitizing of dishware, utensils, and food equipment may be done by spray-type or immersion commercial dishwashing machines. Another type of dishwashing machine or device may be used if the machine or device meets the requirements of this regulation.

(A) Each dishwashing machine and device shall be properly installed and maintained in good repair and shall be operated in accordance with the manufacturer's instructions.

(B) If an automatic detergent dispenser, rinsing agents dispenser, or liquid sanitizer dispenser is used, the dispenser shall be properly installed and maintained.

(C) Each dishwashing machine using hot water to sanitize shall be installed and operated according to the manufacturer's specifications and shall achieve a minimum dishware and utensil surface temperature of 160 degrees Fahrenheit as measured by a dishwasher-safe thermometer. For each dishwashing machine using hot water to sanitize that does not cause the surface temperature of the dishware and utensils to reach a temperature of 160 degrees Fahrenheit, one of the following requirements shall be met:

(i) The licensee shall install a heat booster.

(ii) The licensee shall provide the secretary with documentation of a time and temperature rela-

tionship that results in the sanitization of the dishware and utensils.

(D) The final rinse temperature of each dishwashing machine using hot water to sanitize shall be monitored by a dishwasher-safe thermometer.

(E) All dishware, utensils, and food equipment shall be exposed to all dishwashing and drying cycles.

(F) Each dishwashing machine using chemicals for sanitization shall be used as follows:

(i) The temperature of the wash water shall be at least 120 degrees Fahrenheit, and the chemical sanitizing rinse water shall be at least 75 degrees Fahrenheit unless specified differently by the machine's manufacturer.

(ii) The wash water shall be kept clean.

(iii) The chemicals added for sanitization purposes shall be automatically dispensed.

(iv) All dishware, utensils, and food equipment shall be exposed to the final chemical sanitizing rinse in accordance with the manufacturer's specifications for time and concentration.

(v) All chemical sanitizers shall meet the applicable requirements of K.A.R. 4-28-11.

(G) A chemical test kit, thermometer, or other device that accurately measures the concentration of sanitizing chemicals, in parts per million, and the temperature of the water shall be available and used daily.

(H) Each dishwashing machine or device shall be cleaned as often as necessary to be maintained in operating condition according to the manufacturer's specifications.

(d) All dishware, utensils, and food equipment shall be air-dried.

(e) Each licensee that provides dishware, utensils, and food equipment in the guest room shall clean and sanitize the dishware, utensils, and food equipment provided by one of the following methods:

(1) Provide manual dishwashing and sanitizing as specified in paragraph (c)(3);

(2) provide a mechanical dishwashing machine as specified in paragraph (c)(4); or

(3) provide a complete set of clean and sanitized dishware, utensils, and food equipment before each new guest arrives. (Authorized by and implementing K.S.A. 2011 Supp. 36-506, as amended by L. 2012, ch. 145, sec. 6; effective June 4, 2010; amended Feb. 8, 2013.)

4-27-11. Housekeeping and laundry facilities; maintenance supplies and equipment. Each licensee shall ensure that all house-

keeping and laundry facilities and equipment are clean and maintained in good repair. Each licensee shall ensure that all of the following requirements are met:

(a)(1) Each housekeeping cart shall be maintained and operated to prevent the contamination of clean linens by dirty linens.

(2) Each housekeeping cart shall be designed, maintained, and operated to protect clean glasses, utensils, dishware, single-service articles, food, coffee, and condiments from dirty linens and other sources of contamination, including dirty glasses and dishware, cleaning and sanitizing agents, and poisonous or toxic materials.

(3) Each service or utility cart shall be maintained and operated to prevent the contamination of clean linens by dirty linens or other sources of contamination, according to one of the following methods:

(A) Cleaning and sanitizing the service cart before transporting clean linens;

(B) lining the service cart with a clean liner before transporting clean linens;

(C) placing the clean linens in a clean container before transporting the linens in the service cart; or

(D) using another method as approved by the secretary.

(4) All laundry bags used for dirty linen shall be laundered before being used for clean linen.

(5) Each housekeeping cart and each service cart shall be kept clean and in good repair.

(b)(1) Each licensee shall provide laundry facilities, unless a commercial laundry service is used.

(2) All clean laundry shall be handled in a manner that prevents contact with dirty linen.

(3) Each laundry area shall be designed and arranged in a manner that provides for the functional separation of clean and dirty laundry. A space large enough for sorting and storing soiled linens and for sorting and storing clean linens shall be provided.

(4) The laundry facilities shall be located in areas that are not used by guests or the public and are not used as corridors or passageways.

(5) The laundry area shall be kept clean and free from accumulated lint and dust.

(6) The laundry facilities and areas shall be used for their intended purpose and shall not be used for storage of equipment or supplies not related to the laundering process.

(7) All laundry equipment shall be functional and in good repair. Any laundry equipment that is no longer in use shall be removed from the laundry area.

(8) Each lodging establishment that is newly constructed, undergoes a major renovation, or is licensed under a new ownership shall be required to have a hand sink in the laundry area. Each hand sink shall meet the requirements specified in K.A.R. 4-27-6.

(9) All housekeeping and cleaning supplies and equipment shall be stored in a designated area. The storage area may be in the laundry area if the supplies and equipment are physically separated from the laundry, laundry equipment, and laundry supplies.

(c) All laundry that is cleaned commercially off the premises shall have a segregated storage space for clean and dirty laundry and shall be located and equipped for convenient pick-up and delivery.

(d) Separate laundry facilities may be provided for use by guests if these facilities are located in a room or area of the lodging establishment designated only for guest laundry. The area and equipment shall be kept clean and in good repair.

(e) Single-use gloves shall be available for housekeeping and laundry staff and made available in the laundry and housekeeping areas.

(f) A specific location or area shall be provided for the storage of maintenance supplies and equipment. No other items shall be stored in this location or area. (Authorized by and implementing K.S.A. 2011 Supp. 36-506, as amended by L. 2012, ch. 145, sec. 6; effective June 4, 2010; amended Feb. 8, 2013.)

4-27-12. Poisonous or toxic materials.

Each licensee shall ensure that all of the following requirements are met: (a) Only those poisonous or toxic materials that are required for the operation and maintenance of the lodging establishment shall be allowed on the premises, including the following:

(1) Detergents, sanitizers, cleaning or drying agents, caustics, acids, polishes, and similar chemicals;

(2) insecticides and rodenticides;

(3) building maintenance materials, including paint, varnish, stain, glue, and caulking; and

(4) landscaping materials, including herbicides, lubricants, and fuel for equipment.

(b) The storage of poisonous or toxic materials shall meet all of the following requirements:

(1) The substances listed in each of the four categories specified in subsection (a) shall be stored on separate shelves or in separate cabinets. These shelves and cabinets shall be used for no other purpose.

(2) To prevent the possibility of contamination, poisonous or toxic materials shall not be stored above food, ice or ice-making equipment, linens, towels, utensils, single-service articles, or guest toiletry items. This requirement shall not prohibit the availability of cleaning or sanitizing agents in dishwashing or laundry work areas.

(c) Each bulk or original container of a poisonous or toxic material shall bear a legible manufacturer's label. All poisonous or toxic materials taken from a bulk container or an original container and put into another container shall be clearly identified with the common name of the material.

(d) Each poisonous or toxic material shall be used according to the manufacturer's directions. Additional safety requirements regarding the safe use of poisonous or toxic materials may be established by the secretary upon discovery of the unsafe use of these materials.

(e) Each restricted-use pesticide shall be applied only by a certified applicator or a person under the direct supervision of a certified applicator and in accordance with all applicable statutes and regulations. (Authorized by and implementing K.S.A. 2011 Supp. 36-506, as amended by L. 2012, ch. 145, sec. 6; effective June 4, 2010; amended Feb. 8, 2013.)

4-27-13. Public indoor areas. Each licensee shall ensure that all of the following requirements are met: (a) All indoor public areas shall be kept clean and free of debris.

(b)(1) All equipment, appliances, and fixtures shall be maintained in good repair. All equipment, appliances, and fixtures that require repair or maintenance either shall be removed for repair or under repair by using signs, placards, cones, hazard tape, or other visual means to alert guests of any possible hazard.

(2) All unused or damaged equipment, appliances, and fixtures shall be removed.

(c)(1) All floors and floor coverings in public areas, service areas, hallways, walkways, and stairs shall be kept clean by effective means suitable to the finish.

(2) All floor coverings shall be maintained in good repair. All floor maintenance, repair, and replacement shall be done in a manner that prevents slipping or tripping hazards to guests.

(d) All furniture and items of décor shall be in good repair and kept clean by effective means suitable to the material and finish.

(e) All stairs, landings, hallways, and other walkways shall be kept free of debris and in good repair and shall meet the following requirements:

(1) The storage of items shall be prohibited.

(2) A minimum illumination of 10 foot-candles shall be required.

(f) Each fitness room, bathhouse, and spa shall meet the following requirements:

(1) Each area shall be cleaned and sanitized daily or more frequently, if necessary to maintain cleanliness.

(2) All floors shall be maintained in good repair and have a slip-resistant finish or covering that prevents slipping when wet.

(3) All equipment and fixtures that come into contact with guests, including benches, tables, stools, chairs, tanning beds, and fitness equipment, shall be constructed with a covering of a nonabsorbent material suitable for the use of the equipment or fixture. The following requirements shall be met:

(A) All surfaces that come into contact with guests shall be cleaned and sanitized daily or more frequently, if necessary to maintain cleanliness.

(B) Cleaning or sanitizing solutions shall be made available for guest use and shall be kept in clearly labeled bottles.

(C) All showers shall be cleaned and sanitized daily or more frequently, if necessary to maintain cleanliness.

(4)(A) Towels, including bath towels, hand towels, and paper towels, shall be provided in the area and made available upon guest request.

(B) Each cloth towel shall be laundered before being provided to a guest.

(C) A receptacle for wet or soiled towels shall be provided for guest use in the area. The receptacle shall be emptied at least once daily.

(5) All equipment, fixtures, and recreational items provided for guest use shall be maintained in good repair.

(6) Protective eye equipment shall be provided if tanning equipment is provided for guest use. (Authorized by and implementing K.S.A. 2008 Supp. 36-506; effective June 4, 2010.)

4-27-14. Ice and ice dispensing. Each licensee shall ensure that all of the following requirements are met: (a)(1) If ice is provided in a public area to guests or the general public, the ice shall be provided only through automatic, self-service dispensing machines that are constructed to prevent the direct access to bulk ice storage compartments by guests or the general public.

(2) Ice machines other than the type specified in paragraph (a)(1), including bin-type ice machines that allow direct access to the bulk ice storage compartments, shall not be accessible to guests or the general public. Any lodging employee may provide containers of ice to guests or the general public from this type of ice machine, from an icemaker, or from prepackaged ice.

(b)(1) Only ice that has been made from potable water and handled in a sanitary manner shall be provided by a lodging establishment. All ice shall be free of visible contaminants.

(2) All ice that is not made on the premises of the lodging establishment shall be obtained from a commercial source and shall be protected from contamination during transportation and storage.

(c) Each ice machine shall meet the following requirements:

(1) Be constructed of sanitary, durable, corrosion-resistant material and be easily cleanable;

(2) be constructed, located, installed, and operated to prevent contamination of the ice;

(3) be kept clean, free of any mold, rust, debris, or other contaminants, and maintained in good repair; and

(4) be drained through an air gap.

(d)(1) Each ice container or ice bucket shall meet the following requirements:

(A) Be made of smooth, nonabsorbent, impervious, food-grade materials and be easily cleaned;

(B) be kept clean and stored in a sanitary manner;

(C) be cleaned and sanitized before each new guest; and

(D) be provided with a sanitary, single-service use, food-grade liner that is changed daily.

(2) All canvas or wax-coated buckets or containers shall be prohibited.

(3) No ice container or ice bucket shall be located within the room housing the toilet.

(e) Each icemaker located in a guest room shall be kept clean and sanitary.

(1) No individual ice cube trays shall be used.

(2) All ice shall be removed from the icemaker's storage bin before each new guest. (Authorized by and implementing K.S.A. 2008 Supp. 36-506; effective June 4, 2010.)

4-27-15. Exterior premises. Each licensee shall ensure that all of the following requirements are met: (a) Exterior areas and surfaces.

(1) All exterior areas and surfaces, including alleys and driveways, shall be kept clean, free of debris, and in good repair.

(2) Each walking, driving, and parking surface shall be graded or maintained to prevent the pooling of water.

(3) All lawns and landscaping shall be mowed or pruned as needed to promote guest safety.

(4) All parking areas and walkways shall be illuminated for guest safety and shall be kept free of debris.

(5) All unused or discarded equipment and materials shall be removed from the premises, except when placed in a designated storage area.

(6)(A) All exterior balconies, landings, porches, decks, stairways, and ramps shall be kept in good repair and free of debris and shall be illuminated for guest safety.

(B) Storage on stairs, landings, and ramps shall be prohibited.

(C) All guards and railings shall be attached securely and shall be kept in good repair.

(D) All ramps shall have a slip-resistant surface.

(E) All exterior stairways, ramps, landings, and walkways shall be kept free of ice and snow.

(b) Outside playgrounds and recreational areas.

(1) All equipment shall be kept clean and in good repair at all times. All protruding bolts, screws, and nails and all sharp edges shall be removed or covered.

(2) The ground cover under children's play equipment shall be a soft surface, including turf, rubber chips, bark mulch, clean sand, or any other surface approved by the secretary.

(3) Unused equipment shall be stored in a designated area.

(4) If the area is open for nighttime use, lighting shall be provided for guest safety.

(5) The area shall be kept clean and free of debris.

(6) If fencing is provided, the fencing shall be kept in good repair.

(c) Refuse containers.

(1) The area where refuse containers are located shall be kept free of debris and cleaned as necessary to prevent the attraction and harborage of insects, rodents, and other pests and to minimize odors.

(2) Containers of adequate capacity or number shall be available to store all refuse that accumulates between refuse pickups. All refuse containers shall be emptied at least once each week or more frequently, if necessary to meet the requirements of these regulations. All rotten waste shall be removed daily.

(3) All refuse container lids shall be closed. All refuse containers shall be kept on a solid surface.

Solid surfaces shall include concrete, asphalt, and any other hard surface approved by the secretary.

(d) Outdoor vector control.

(1) The premises shall be free of any harborage conditions that can lead to or encourage infestations of rodents, insects, and any other pests.

(2) Control measures shall be taken to protect against the entrance of rodents, insects, and any other pests into the lodging establishment. All buildings shall be verminproofed and kept in a verminproof condition.

All doors leading outside shall be tightfitting to eliminate entrance points for rodents, insects, and any other pests. All windows and doors that can be opened for ventilation shall have screening material that is at least 16 mesh to the inch and shall be tightfitting and kept in good repair.

(3) Identified infestation problems shall be treated by a licensed pest control operator.

(4) All control measures, both mechanical and chemical, shall be used in accordance with each manufacturer's recommendations.

(e) Exterior storage.

(1) A storage area shall be provided for maintenance and recreational equipment, machinery, and any other maintenance items.

(2) Only those items necessary for the operation and maintenance of the lodging establishment shall be kept in a storage area.

(3) All poisonous and toxic materials shall be stored as specified in K.A.R. 4-27-12.

(4) Each storage area shall be kept free of debris, filth, and any harborage conditions.

(5) All articles in need of repair may be stored on a short-term basis, which shall not exceed six months. All articles that are not repaired within six months shall be discarded or moved to an off-site storage facility.

(f) Outdoor space for pets. All pets shall be kept on a leash or controlled in a manner that prevents the pets from running freely about the premises. (Authorized by and implementing K.S.A. 2011 Supp. 36-506, as amended by L. 2012, ch. 145, sec. 6; effective June 4, 2010; amended Feb. 8, 2013.)

4-27-16. Swimming pools, recreational water facilities, and hot tubs. (a) General requirements. Each licensee shall ensure that all swimming pools, recreational water facilities, and hot tubs are kept sanitary and in good repair.

(1) Each swimming pool, RWF, and hot tub shall meet the requirements in these regulations,

unless local ordinances pertaining to planning and design, lifesaving and safety equipment, water quality, and sanitation exist and these ordinances are as restrictive or more restrictive than these regulations.

(2) Each licensee shall maintain records of each inspection conducted by a local regulatory agency for at least one year. The inspection records shall be made available for review by the secretary, upon request.

(b) Design and safeguards.

(1) Each plan for a new swimming pool or RWF and for a swimming pool or RWF undergoing major renovation, including installation of a diving board, slide, or other similar recreational devices, shall be designed by a licensed engineer, architect, or other qualified professional and shall be submitted to the secretary before the start of construction. Submission of documentation of plan approval by the local regulatory agency shall meet the requirements of this paragraph.

(2) Each grate over a main drain in each swimming pool or RWF shall be intact, firmly affixed at all times, and designed to prevent swimmer entanglement, entrapment, or injury. Other methods to prevent swimmer entanglement, entrapment, or injury may include multiple main drains, antivortex drain covers, or any similar device approved by the secretary.

(3) The depth of water in each swimming pool or RWF shall be plainly marked with at least four-inch high numbers of a color that contrasts with the color of the pool decking or vertical pool wall.

(A) Water depth markings for an in ground swimming pool shall be clearly marked on the edge of the deck and visible at all times. In addition, water depth markings may be placed above the water surface on the vertical pool walls and shall be visible at all times.

(B) Water depth markings for each aboveground swimming pool or RWF shall be on the edge of the deck and shall be visible to persons entering the swimming pool. If water depth markings cannot be placed on the edge of the deck, another means shall be used so that the water depth is visible to persons entering the swimming pool.

(C) The water depth markings in each swimming pool or RWF shall be located in the following areas:

(i) At the maximum and minimum depths. Intermediate increments of depth may be used in addition to the required maximum and minimum depths; and

(ii) the transition point between the shallow end, which shall be five feet or less, and the deep end, which shall be more than five feet. This transition point shall be marked by a line on the floor and the walls of the swimming pool or RWF or by a safety rope equipped with buoys.

(4) Each lighting and electrical system for a swimming pool, RWF, or hot tub shall be kept in good repair at all times. The following requirements shall be met:

(A) Artificial lighting shall be provided at each swimming pool, RWF, or hot tub if used at night and for each indoor swimming pool, RWF, or hot tub. The lighting shall illuminate all portions of each swimming pool, RWF, or hot tub.

(B) All artificial lighting located in the water shall be designed and maintained to prevent electrical shock hazards to guests.

(5) Each outdoor swimming pool and RWF shall be protected by a fence, wall, building, or other enclosure that is at least four feet in height.

(A) Each enclosure shall be made of durable material and kept in good repair.

(B) Each gate shall have self-closing and self-latching mechanisms. The self-latching mechanism shall be installed at least four feet from the bottom of the gate.

(C) A hedge shall not be an acceptable protective enclosure.

(6) Each door leading into an indoor or enclosed swimming pool or RWF area shall have self-closing and self-latching mechanisms. The self-closing mechanism shall be at least four feet from the bottom of the door.

(c) Lifesaving and safety equipment.

(1) Each swimming pool or RWF shall have lifesaving equipment, consisting of at least one U.S. coast guard-approved flotation device that can be thrown into the water and at least one reaching device.

(A) The flotation device shall be attached to a rope that is at least as long as one and one-half times the maximum width of the swimming pool or RWF. If a lifeguard is on duty, life-saving rescue equipment, including rescue tubes, may also be used.

(B) The reaching device shall be a life pole or a shepherd's crook-type of pole, with a minimum length of 12 feet.

(C) Each lifesaving device shall be located in a conspicuous place and shall be accessible. The lifeguard personnel shall keep their rescue equipment close for immediate use.

(D) Each lifesaving device shall be kept in good repair.

(2) A first-aid kit shall be accessible to the lodging employees.

(3) No glass containers shall be permitted in the swimming pool, RWF, or hot tub area.

(4) Each swimming pool, RWF, and hot tub and each deck shall be kept clean of sediment, floating debris, visible dirt, mold and algae and shall be maintained free of cracks, peeling paint, and tripping hazards.

(5) Each swimming pool, RWF, and hot tub shall be refinished or relined if the bottom or wall surfaces cannot be maintained in a safe and sanitary condition.

(6) If handrails are not present, all steps leading into the swimming pool or RWF shall be marked in a color contrasting with the color of the interior of the swimming pool and RWF so that the steps are visible from the swimming pool or RWF deck.

(7) All steps, ladders, and stairs shall be easily cleanable, in good repair, and equipped with nonslip treads. Handrails and ladders, if present, shall be provided with a handhold and securely attached.

(8) The rules of operation and safety signs for each swimming pool, RWF, and hot tub shall be posted in a conspicuous place at the swimming pool, RWF, or hot tub. Each swimming pool and RWF without a lifeguard shall have posted the following sign: "Warning — No Lifeguard On Duty." The sign shall be legible, with letters at least four inches in height.

(9) If chlorinating equipment is located indoors, the chlorinating equipment shall be housed in a separate room, which shall be vented to the outside or to another room that is vented to the outside. If chlorinating equipment is located outdoors and within an enclosed structure, the structure shall be vented to the outside.

(d) Water quality and sanitation. Each licensee shall ensure that all of the following requirements are met:

(1) Each swimming pool, RWF, and hot tub shall be maintained to provide for continuous disinfection of the water with a chemical process. This process shall use a disinfectant that leaves a measurable residual in the water.

(A) If chlorine or bromine is used to disinfect the water of any swimming pool or RWF, the water shall have a disinfectant residual level of at least 1.0 part per million (ppm) and not more than 5.0 ppm.

(B) If chlorine or bromine is used to disinfect the water of any hot tub, the water shall have a disinfectant residual level of at least 2.0 ppm and not more than 5.0 ppm.

(C) Each means of disinfection other than those specified in paragraphs (d)(1)(A) and (B) shall be used only if the licensee has demonstrated that the alternate means provides a level of disinfection equivalent to that resulting from the residual level specified in paragraph (d)(1)(A) or (B).

(2) The pH of the water in each swimming pool, RWF, and hot tub shall be maintained at not less than 7.0 and not more than 8.0.

(3) Each licensee shall use a chemical test kit or a testing device approved by the secretary. Each testing kit or device shall be appropriate for the disinfecting chemical used and capable of accurately measuring disinfectant residual levels of 0.5 ppm to 20.0 ppm. In addition, a chemical test kit or testing device for measuring the pH of the water shall be used and capable of accurately measuring the pH of water in 0.2 increments.

(4) The water in each swimming pool, RWF, and hot tub shall have sufficient clarity at all times so that one of the following conditions is met:

(A) A black disc with a diameter of six inches is clearly visible in the deepest portion of the swimming pool or RWF.

(B) The bottom drain at the deepest point of the swimming pool or RWF is clearly visible, and the bottom of the hot tub is clearly visible.

(5) The water in each swimming pool, RWF, and hot tub shall be free of scum and floating debris. The bottom and walls shall be free of dirt, algae, and any other foreign material.

(6) No chemical shall be added manually and directly to the water of any swimming pool, RWF, or hot tub while any individual is present in the water.

(7) The temperature of the water in each hot tub shall not exceed 104 degrees Fahrenheit.

(A) Each hot tub shall be operated in accordance with the manufacturer's specifications.

(B) Each hot tub shall have a thermometer or other device to accurately record the water temperature within plus or minus two degrees.

(e) Fecal accident in a swimming pool and RWF. If a fecal accident occurs in a swimming pool or RWF, the following requirements shall be met:

(1) In response to any accident involving formed feces, the following requirements shall be met:

(A) Direct the guests to leave the swimming pool or the RWF, and do not allow any individuals to reenter until the decontamination process

has been completed. The closure times can vary since the decontamination process takes from 30 to 60 minutes;

(B) remove as much fecal material as possible using a net or scoop, and dispose of the material in a sanitary manner. Sanitize the net or scoop;

(C) raise the disinfectant level to 2.0 ppm and ensure that the water pH is between 7.2 and 7.8; and

(D) return the disinfectant level to the operating range specified in paragraph (d)(1)(A) before the swimming pool or RWF is reopened to guests.

(2) In response to any accident involving diarrhea, the following requirements shall be met:

(A) Direct guests to leave the swimming pool or the RWF, and do not allow any individuals to reenter until the decontamination process has been completed;

(B) remove as much fecal material as possible using a scoop, and dispose of the material in a sanitary manner. Sanitize the scoop. Vacuuming the fecal material shall be prohibited;

(C) raise the disinfectant level to 20.0 ppm and maintain a water pH of at least 7.2 but not more than 7.8. This level of concentration shall be maintained at least eight hours to ensure inactivation of *Cryptosporidium*. A lower disinfectant level and a longer inactivation time may be used according to the following table:

Cryptosporidium inactivation for diarrheal accident

Disinfectant levels (ppm)	Disinfection time
1.0	6.5 days
10.0	16 hours
20.0	8 hours

(D) ensure that the filtration system is operating and maintaining the required disinfectant levels during the disinfection process. Backwash the filter. Do not return the backwashed water through the filter. Replace the filter medium, if necessary; and

(E) return the disinfectant level to the operating range specified in paragraph (d)(1)(A) before the swimming pool or RWF is reopened to guests.

(f) Vomiting accident in a swimming pool or RWF. If a vomiting accident occurs in a swimming pool or RWF, the procedures in paragraph (e)(1) shall be followed.

(g) Body fluid spills at a swimming pool or RWF. All body fluid spills that occur on swimming pool or RWF equipment or hard surfaces,

including decking, shall be cleaned and chemically sanitized. Disposable gloves shall be available for employees' use during cleanup. The following cleanup method shall be used:

(1) Wipe up the spill using absorbent, disposable material. Paper towels may be used;

(2) use a bleach solution by combining one part bleach and 10 parts water. Pour the bleach solution onto the contaminated surface, leave the solution on the surface for at least 10 minutes, and rinse the surface with clean water;

(3) disinfect all nondisposable cleaning materials, including mops and scrub brushes, and allow to air-dry; and

(4) require each employee assisting with the cleanup to wash that employee's hands with warm water and soap after the cleanup is completed.

(h) Fecal or vomiting accident in a hot tub. If a fecal accident or vomiting occurs in a hot tub, all of the following requirements shall be met:

(1) All guests shall be required to leave the hot tub, and the water shall be completely drained.

(2) The hot tub shall be disinfected according to the manufacturer's specifications.

(3) The filtering system shall be disinfected or the filter medium shall be replaced with a clean filter medium before refilling the hot tub with clean water.

(i) Operation and maintenance of a swimming pool, RWF, or hot tub. Each licensee shall ensure that all of the following requirements for each swimming pool, RWF, and hot tub are met:

(1) Daily operational logs shall be maintained for at least one year at the lodging establishment and made available to the secretary, upon request. These logs shall include the date and time the information was collected and the name or initials of the person who collected the information. These logs shall also record the following information:

(A) The disinfectant residuals shall be recorded at least once daily when the swimming pool, RWF, or hot tub is available for guest use or more often, if necessary to maintain the water quality as specified in subsection (d).

(B) The pH test shall be recorded at least once daily when the swimming pool, RWF, or hot tub is available for guest use or more often, if necessary to maintain the water quality as specified in subsection (d).

(C) The temperature reading of each hot tub shall be recorded at least once daily when the hot tub is available for guest use.

(2) Each fecal and vomiting accident log shall include the time and date of the accident and the disinfection measures taken.

(3) Each indoor swimming pool area and chemical storage room shall be either vented directly to the exterior or vented to a room that is vented directly to the exterior.

(4) All chemicals applied to a swimming pool, RWF, or hot tub shall be used, handled, stored, and labeled in accordance with the manufacturer's specifications.

(5) All recreational equipment shall be kept sanitary. Recreational equipment shall include slides, diving boards, play equipment, water sports equipment, and accessory items available to guests, including floats, tubes, air mattresses, and pads for water slides.

(6) A cleaning system shall be used to remove dirt, algae, and any other foreign material from the bottom of the swimming pool or RWF.

(7) All surface skimmers, strainer baskets, and perimeter overflow systems shall be kept clean and in good repair.

(8) The water in each swimming pool and each RWF shall be maintained at the manufacturer's recommended level so that the water will flow into each skimmer and strainer.

(9) The recirculation system serving each swimming pool, RWF, and hot tub shall operate continuously or in accordance with the manufacturer's specifications. The filtration and recirculation systems shall be maintained in accordance with the manufacturer's specifications. (Authorized by and implementing K.S.A. 2011 Supp. 36-506, as amended by L. 2012, ch. 145, sec. 6; effective June 4, 2010; amended Feb. 8, 2013.)

4-27-17. Water supply systems. Each licensee shall ensure that all of the following requirements are met: (a) Sufficient potable water to meet the needs of the lodging establishment shall be provided from a source constructed and operated pursuant to K.S.A. 65-161 et seq., and amendments thereto.

(b) No water supply system deemed unsafe by the secretary shall be used as a potable water supply.

(c)(1) Each nonpublic water supply system shall be constructed, maintained, and operated as specified in K.S.A. 65-161 et seq., and amendments thereto.

(2) All water from a nonpublic water supply system shall meet the state drinking water qual-

ity standards specified in K.S.A. 65-161 et seq., and amendments thereto. The most recent sample report for the nonpublic water supply system used by the lodging establishment shall be retained for at least 12 months at the lodging establishment and shall be made available to the secretary upon request.

(d) During any period when a boil-water order is in effect, including a precautionary boil-water notice or advisory issued by the secretary of the Kansas department of health and environment on a public or nonpublic water supply, the licensee shall meet the following requirements until the problem has been corrected:

(1) Notify each guest, verbally upon check-in and by written notice placed in each rented guest room, that the plumbed water is not potable and only potable water should be used for drinking and for brushing teeth;

(2) discard any ice that could have been made from or exposed to contaminated water; and

(3) obtain a temporary, alternate supply of potable water by using one of the following:

(A) A supply of commercially bottled drinking water;

(B) one or more closed, portable, bulk water containers;

(C) an enclosed vehicular water tank;

(D) an on-premises water storage tank; or

(E) any other alternative water source if approved by the secretary. (Authorized by and implementing K.S.A. 2011 Supp. 36-506, as amended by L. 2012, ch. 145, sec. 6; effective June 4, 2010; amended Feb. 8, 2013.)

4-27-18. Sewage systems. Each licensee shall ensure that all of the following requirements are met: (a) All sewage shall be disposed of through an approved facility, including one of the following:

(1) A public sewage treatment plant; or

(2) an individual sewage disposal system that is constructed, maintained, and operated according to K.S.A. 65-161 et seq., and amendments thereto, and meets all applicable sanitation requirements.

(b) A temporary sewage disposal facility shall be allowed only as approved by the secretary in response to a disaster.

(c) All condensate drainage, rainwater, and other nonsewage liquids shall be drained from the point of discharge to disposal pursuant to K.S.A. 65-161 et seq., and amendments thereto. (Authorized by and implementing K.S.A. 2011 Supp.

36-506, as amended by L. 2012, ch. 145, sec. 6; effective June 4, 2010; amended Feb. 8, 2013.)

4-27-19. Electrical systems. (a) Each licensee shall ensure that the electrical wiring is installed and maintained in accordance with all applicable local electrical codes. In the absence of local electrical codes, the electrical wiring shall be installed and maintained by a licensed electrician. Each licensee shall ensure that all of the following requirements are met:

(1)(A) Each newly constructed lodging establishment shall have a ground-fault circuit interrupter in each electrical outlet located within five feet of any water source, including a swimming pool and hot tub.

(B) Each existing lodging establishment in which major renovation or rewiring has occurred shall be required to have a ground-fault circuit interrupter in each electrical outlet located within five feet of any water source, including a swimming pool and hot tub.

(C) Each licensee shall ensure that the lodging establishment has a ground-fault circuit interrupter in each electrical outlet located within five feet of any water source, including a swimming pool and hot tub.

(2) Each electrical switch and each outlet shall be covered by a faceplate. Each junction box shall have a junction box cover.

(3) All circuit breaker boxes, fuse boxes, and electrical panels shall be protected from physical damage and kept in good condition. All fuses and circuits shall be labeled to identify the circuit location.

The storage of any item that obstructs access to any circuit box shall be prohibited.

(4) All wire splices shall be located in covered junction boxes.

(5) Bare or frayed wiring shall be prohibited.

(6) All three-prong outlets shall be grounded. Each appliance shall be grounded in accordance with the manufacturer's specifications.

(b) All emergency lighting shall be kept in working condition.

(c) The permanent use of extension cords in guest rooms shall be prohibited.

Individual branch circuits, including multiple-plug outlet strips that contain fuse breakers and multiple-plug outlet adapters that do not exceed the amperage for which the outlets are rated, shall be permitted.

(d) The temporary use of extension cords shall be allowed for housekeeping and maintenance

purposes if the extension cords are rated for industrial use.

(e) The wattage of light bulbs shall not exceed the wattage rating of the corresponding light fixtures.

Empty light sockets shall be prohibited. (Authorized by and implementing K.S.A. 2008 Supp. 36-506; effective June 4, 2010.)

4-27-20. Plumbing systems. (a) Each licensee shall ensure that all plumbing is installed and maintained in accordance with all applicable local plumbing codes. In the absence of local plumbing codes, all plumbing shall be installed and maintained by a licensed plumber.

(b) Each licensee shall ensure that all of the following requirements are met:

(1) Potable water under pressure shall be available at all times at each fixture designed to provide water. Hot water shall be provided to each fixture designed to use hot water.

(2) Each toilet room, bathing facility, and laundry area shall be provided with ventilation to minimize condensation and to prevent mold, algae, and odors.

Each newly constructed lodging establishment and each lodging establishment undergoing major renovation shall be required to have mechanical ventilation in each toilet room, bathing facility, and laundry area.

(3) Each fixture drain shall be plumbed with a P-trap.

(4) All openings for the passage of plumbing shall be verminproof.

(5) No fitting, connection, device, or method of installation of plumbing shall obstruct or retard the flow of water, wastes, sewage, or air in the drainage or venting system.

(c) All backflow devices shall meet the design specifications for their intended use. All potable water supplies shall be protected from sources of potential contamination. Each licensee shall ensure that all of the following requirements are met:

(1) If provided, each boiler unit, fire sprinkler system with chemical additives, lawn sprinkler system with a means for injection of pesticides, herbicides, or other chemicals, and pumped or re-pressurized cooling or heating system shall be protected by a reduced-pressure-principle backflow prevention assembly.

(A) The backflow prevention assembly shall be tested at least annually.

(B) Documentation of each test shall be maintained at the lodging establishment for at least one

year and shall be made available to the secretary upon request.

(2) If provided, each fire sprinkler system not using chemical additives and lawn sprinkler system without a means for injection of pesticides, herbicides, or other chemicals shall be protected by a double-check valve assembly.

(A) The double-check valve assembly shall be tested at least annually.

(B) Documentation of each test shall be maintained at the lodging establishment for at least one year and shall be made available to the secretary upon request.

(3) If provided, each threaded faucet to which a hose is connected, flush valve, and any similar device shall be protected by a vacuum breaker. Each commercial dishwasher and each commercial laundry machine shall be protected by either a vacuum breaker or an air gap.

(4) If provided, each relief valve discharge line from a water heater, water-holding tank, cooling tower, or water softener, each discharge line from a commercial laundry machine, and each condensation line shall be protected by an air gap.

(5) Each swimming pool water supply line shall be protected by either an air gap or a double-check valve assembly.

(6) Fire sprinklers plumbed into a waterline over gas water heaters or furnaces, or both, shall not be required to have a backflow device unless required by local ordinance. (Authorized by and implementing K.S.A. 2011 Supp. 36-506, as amended by L. 2012, ch. 145, sec. 6; effective June 4, 2010; amended Feb. 8, 2013.)

4-27-21. Heating, ventilation, and air conditioning (HVAC) systems. (a) Each licensee shall ensure that each guest room has heating, ventilation, and related heating and ventilation equipment.

(1) All equipment shall be installed according to the manufacturer's directions and shall be kept in operating condition.

(2) A means to control the temperature in the guest room shall be provided in each guest room that is furnished with a separate heating or air conditioning unit.

(3) If the guest room has air-conditioning, the air-conditioning system shall meet the requirements specified in paragraphs (a)(1) and (2).

(b) Unvented fuel-fired heaters, unvented fireplaces, and similar devices and portable electrical space heaters shall be prohibited from use in all

areas of the lodging establishment, unless designed by the manufacturer for commercial use and approved by the secretary. The following conditions shall be met:

(1) The unvented fuel-fired heater, unvented fireplace, or similar device or the portable electrical space heater is not the primary source of heat.

(2) The unvented fuel-fired heater, unvented fireplace, or similar device or the portable electric space heater is not used in a guest room.

(c) All gas and electric heating equipment shall be equipped with thermostatic controls.

(d) All gas water heaters, gas furnaces, and other gas heating appliances shall be vented to the outside.

(e) A gas shutoff valve shall be located next to each gas appliance, gas furnace, and gas water heater.

(f) Each furnace and each air-conditioning unit shall be equipped with an electrical fuse breaker to protect the unit from electrical overload.

(g) Each furnace room or room containing a gas water heater or any other fuel-fired appliance shall be provided with adequate air for circulation.

(h) Each filter shall be changed according to the manufacturer's specifications. (Authorized by and implementing K.S.A. 2011 Supp. 36-506, as amended by L. 2012, ch. 145, sec. 6; effective June 4, 2010; amended Feb. 8, 2013.)

4-27-22. Lodging establishment inspections by qualified individuals, private entities, or public entities. (a) "Supplemental inspection" shall mean an inspection of a lodging establishment conducted by a qualified person employed by a lodging business, lodging trade organization, or local governmental entity and not employed by the Kansas department of agriculture.

(b) Each person who wishes to conduct a supplemental inspection of a lodging establishment shall complete the following requirements:

(1) Submit to the secretary, or the secretary's designee, a written letter of application and statement describing the applicant's knowledge of lodging standards established pursuant to K.S.A. 36-506, and amendments thereto, acquired by education, training, and experience; and

(2) answer at least 80% of the questions correctly to pass a written examination administered by the secretary, or secretary's designee. The written examination shall test the applicant's knowledge of lodging standards established pursuant to K.S.A. 36-506, and amendments thereto.

(c) A supplemental inspection report on a lodging establishment shall be accepted by the secretary if all of the following conditions are met:

(1) The person conducting the supplemental inspection meets the requirements in subsection (b).

(2) The supplemental inspection is conducted to determine if the lodging establishment meets lodging standards established pursuant to K.S.A. 36-506, and amendments thereto.

(3) The supplemental inspection report is submitted to the secretary no later than 10 calendar days from the date the inspection occurred. If an "imminent health hazard," as defined in K.A.R. 4-27-5, is discovered during the inspection, the person shall notify the secretary, or the secretary's designee, within 12 hours of the discovery, as required in K.A.R. 4-27-5.

(4) The supplemental inspection report thoroughly describes conditions in the lodging establishment at the time of the inspection. Each violation of a lodging establishment standard shall be described in detail and photographed. The supplemental inspection report shall describe any actions taken by the licensee to correct each violation.

(d) An inspection of the lodging establishment may be conducted by department lodging inspectors to determine the accuracy of a supplemental report. The inspection shall be conducted within five days after receipt of a supplemental inspection report.

(e) The secretary's acceptance of a supplemental inspection report shall not preclude the department from conducting an inspection to assess the lodging establishment's compliance with lodging establishment standards or determine the accuracy of the supplemental inspection report. The supplemental inspection report, if accepted, may be considered by the secretary when determining the inspection frequency of a lodging establishment. (Authorized by K.S.A. 2009 Supp. 36-506; implementing K.S.A. 2009 Supp. 36-519; effective June 4, 2010.)

Article 28.—FOOD SAFETY

4-28-1. Definition; specialized processing. "Specialized processing" shall mean any food preparation method having an increased risk of foodborne illness associated with improper implementation, including the following:

(a) Smoking food as a method of food preservation rather than as a method of flavor enhancement;

(b) curing food;

(c) canning food, except for fruit jams, jellies, and preserves;

(d) using food additives or adding components, which may include vinegar, for either of the following;

(1) A method of food preservation rather than flavor enhancement; or

(2) a method to render a food so that the food does not require time and temperature control for food safety;

(e) packaging food using a reduced-oxygen packaging method;

(f) sprouting seeds or beans;

(g) drying food, other than herbs, whole fruits, or whole vegetables;

(h) keeping molluscan shellfish in a life-support tank;

(i) custom-processing animals in a facility for personal use;

(j) processing and packaging juice;

(k) fermenting foods;

(l) producing cultured dairy products, including cheese, yogurt, and buttermilk; and

(m) using a noncontinuous cooking process. (Authorized by K.S.A. 2011 Supp. 65-688, as amended by L. 2012, ch. 145, sec. 23; implementing K.S.A. 2011 Supp. 65-689, as amended by L. 2012, ch. 145, sec. 24; effective, T-4-11-5-04, Nov. 5, 2004; effective Feb. 18, 2005; amended June 4, 2010; amended Feb. 8, 2013.)

4-28-2. Adoption by reference. (a) The following federal regulations are hereby adopted by reference, except as otherwise indicated in this subsection:

(1) 9 C.F.R. Parts 317, excluding 9 C.F.R. 317.2(a), 319, 381, and 424, as revised on January 1, 2011;

(2) 21 C.F.R. Parts 100 through 186, excluding 21 C.F.R. 100.1 and 100.2, as revised on April 1, 2011;

(3) 21 C.F.R. 1030.10, as revised on April 1, 2011; and

(4) 40 C.F.R. Part 180, as revised on July 1, 2011.

(b) Copies of the adopted material shall be available from the division of food safety and lodging of the Kansas department of agriculture, Topeka, Kansas. (Authorized by K.S.A. 2011 Supp. 65-688, as amended by L. 2012, ch. 145, sec. 23; implementing K.S.A. 2011 Supp. 65-688, as amended by L. 2012, ch. 145, sec. 23, and K.S.A. 2011 Supp. 74-581; effective, T-4-11-5-04, Nov. 5,

2004; effective Feb. 18, 2005; amended June 4, 2010; amended April 26, 2013.)

4-28-3. (Authorized by K.S.A. 2003 Supp. 36-503; implementing K.S.A. 2003 Supp. 36-503 and L. 2004, Ch. 192, Sec. 2; effective Feb. 18, 2005; revoked Oct. 26, 2012.)

4-28-4. (Authorized by K.S.A. 36-504; implementing K.S.A. 36-504 and L. 2004, Ch. 192, Sec. 2; effective Feb. 18, 2005; revoked Oct. 26, 2012.)

4-28-5. Fees; food processing plant. Each food processing plant shall be licensed by the secretary.

(a) Each person operating or intending to operate a food processing plant shall submit an application on a form supplied by the department with one of the following pairs of application fees and license fees based on the size and type of the plant, as applicable:

(1) For each food processing plant that only stores food, one of the following fees:

(A) Less than 1,000 square feet: \$150 application fee and \$160 license fee;

(B) 1,000 square feet through 5,000 square feet: \$200 application fee and \$175 license fee;

(C) 5,001 square feet through 10,000 square feet: \$250 application fee and \$250 license fee;

(D) 10,001 square feet through 50,000 square feet: \$300 application fee and \$300 license fee; or

(E) more than 50,000 square feet: \$350 application fee and \$350 license fee; and

(2) for each food processing plant not specified in paragraph (a)(1), one of the following fees:

(A) Less than 1,000 square feet: \$150 application fee and \$175 license fee;

(B) 1,000 square feet through 5,000 square feet: \$200 application fee and \$200 license fee;

(C) 5,001 square feet through 10,000 square feet: \$250 application fee and \$275 license fee;

(D) 10,001 square feet through 50,000 square feet: \$300 application fee and \$325 license fee; or

(E) more than 50,000 square feet: \$350 application fee and \$400 license fee.

(b) For the purpose of this regulation, a facility that only stores food shall include any premises, establishment, building, room, area, facility, or place where food is stored, kept, or held for distribution, whether or not the food is temperature-controlled.

(c) For the purpose of this regulation, "food processing plant" shall not include either of the following:

(1) A facility in which fresh fruits and vegetables are harvested and washed, if the fruits and vegetables are not otherwise processed at the facility; or

(2) a storage facility used solely for the storage of grain or other raw agricultural commodities.

(d) Each license issued shall expire on March 31 each year.

(e) Each license shall require annual renewal by the licensee's submission of an online application for renewal available on the department's web site and the payment of the applicable license fee specified in subsection (a). (Authorized by and implementing K.S.A. 2017 Supp. 65-688; effective Feb. 18, 2005; amended Dec. 5, 2008; amended Feb. 8, 2013; amended June 15, 2018.)

4-28-6. Fees; risk levels; food establishment. (a) Each food establishment required to be licensed shall be assessed by the secretary for classification by risk level according to this regulation. The following classifications shall be used to determine licensing fees and inspection frequency at food establishments:

(1) A "category I facility" shall mean a food establishment that presents a high relative risk of causing food-borne illness based upon the usage of food-handling processes associated with food-borne illness outbreaks. Factors considered in classifying a food establishment as a category I facility shall include whether the food establishment meets any of the following conditions:

(A) Cooks, cools, or reheats food that requires time and temperature control for safety;

(B) uses freezing as a means to achieve parasite destruction;

(C) handles raw, in-shell molluscan shellfish ingredients;

(D) uses specialized processing;

(E) has a required hazard analysis critical control point plan; or

(F) offers for consumption without further preparation any food containing raw or undercooked eggs, meat, poultry, fish, or shellfish.

(2) A "category II facility" shall mean a food establishment that presents a moderate relative risk of causing food-borne illness based upon the usage of a limited number of food-handling processes associated with food-borne illness outbreaks. Factors considered in classifying a food establishment as a category II facility shall include whether the food establishment meets any of the following conditions:

(A) Prepares baked products;

(B) repackages foods from a licensed food processor in smaller quantities for distribution;

(C) heats only foods from a licensed food processor; or

(D) handles, cuts, grinds, or slices only raw animal foods or ready-to-eat meats and cheeses.

(3) A "category III facility" shall mean a food establishment that presents a low relative risk of causing food-borne illness based upon the usage of few or no food-handling processes associated with food-borne illness outbreaks. Factors considered in classifying a food establishment as a category III facility shall include whether the food establishment meets any of the following conditions:

(A) Offers self-service beverages;

(B) offers prepackaged food and beverages, including those prepackaged foods and beverages that are required to be held at a temperature of 41°F or below for food safety; or

(C) offers unpackaged food that does not require time and temperature control for safety, including mixed drinks.

(4) A "category IV facility" shall mean a food establishment that presents a very low relative risk of causing food-borne illness based upon the usage of few or no food-handling processes associated with food-borne illness outbreaks. The food establishment shall have systematic controls in place to further reduce the risk of a food-borne illness outbreak. Factors considered in classifying a food establishment as a category IV facility shall include whether the food establishment meets the following conditions:

(A)(i) Offers prepackaged food and beverages, including those prepackaged foods and beverages that are required to be held at a temperature of 41°F or below for food safety;

(ii) offers unpackaged food that does not require time and temperature control for safety; or

(iii) offers prepackaged food and beverages, including those prepackaged foods and beverages that are required to be held at a temperature of 41°F or below for food safety, and unpackaged food that does not require time and temperature control for safety; and

(B) has the following controls in place in a structure that has limited or controlled access, including an office building with keyed entrances or security guards:

(i) Continuous electronic monitoring of all food items that require temperature control for safety;

(ii) a means to prevent lawful purchase of a food that has been held outside of the time and

temperature combinations specified in the Kansas food code by physical lockout, transaction lockout, or other equivalent method; and

(iii) remote monitoring and recording of video surveillance covering all areas of the food establishment.

(b) Each food establishment with operations in multiple categories shall be placed in the highest risk-level category. A history of a food establishment's noncompliance with applicable statutes and regulations may be considered and may warrant placement of the food establishment in a higher risk-level category. The risk level assigned to a food establishment may be changed if the secretary determines that the change is warranted based upon the degree of risk of a health hazard and protection of the public health and safety.

(c) Each person operating or intending to operate a food establishment shall submit an application on a form prescribed by the secretary with the following fees, as applicable:

(1) Category I facilities.

(A) Application fee. Each person shall submit a onetime application fee based on the size of the food establishment as follows:

(i) Less than 5,000 square feet: \$300;

(ii) 5,000 through 10,000 square feet: \$325;

(iii) 10,001 through 50,000 square feet: \$350; and

(iv) more than 50,000 square feet: \$350.

(B) License fee. Each person shall submit a license fee based on the size of the food establishment as follows:

(i) Less than 5,000 square feet: \$250;

(ii) 5,000 through 10,000 square feet: \$300;

(iii) 10,001 through 50,000 square feet: \$500; and

(iv) more than 50,000 square feet: \$750.

(2) Category II facilities.

(A) Application fee. Each person shall submit a onetime application fee of \$325.

(B) License fee. Each person shall submit a license fee of \$220.

(3) Category III facilities.

(A) Application fee. Each person shall submit a onetime application fee of \$275.

(B) License fee. Each person shall submit a license fee of \$190.

(4) Category IV facilities.

(A) Application fee. Each person shall submit a onetime application fee of \$100.

(B) License fee. Each person shall submit a license fee of \$75.

(d)(1) Each category I facility shall be inspected at least once every 12 months.

(2) Each category II facility shall be inspected at least once every 15 months.

(3) Each category III facility shall be inspected at least once every 18 months.

(4) Each category IV facility shall be inspected at least once every 36 months.

(e) Each license shall expire on the first March 31 following the date of issuance.

(f) Each license shall require annual renewal by the licensee's submission of an online application for renewal available on the department's web site and payment of the applicable license fee specified in subsection (c).

(g) For the purpose of this regulation, "mixed drink" shall mean any beverage combining two or more liquids, including any combination of alcoholic or nonalcoholic liquids. (Authorized by and implementing K.S.A. 2017 Supp. 65-688; effective Feb. 18, 2005; amended, T-4-6-28-12, July 1, 2012; amended Oct. 26, 2012; amended May 31, 2013; amended June 15, 2018.)

4-28-7. (Authorized by K.S.A. 2010 Supp. 36-503; implementing K.S.A. 2010 Supp. 36-503 and K.S.A. 2010 Supp. 74-582; effective Feb. 18, 2005; amended, T-4-6-30-11, July 1, 2011; amended Oct. 28, 2011; revoked Oct. 26, 2012.)

4-28-8. Adoption of Kansas food code. The document titled "Kansas food code," dated July 1, 2012 and published by the division of food safety and lodging of the Kansas department of agriculture, is hereby adopted by reference. (Authorized by and implementing K.S.A. 2011 Supp. 65-688, as amended by L. 2012, ch. 145, sec. 23, and K.S.A. 2011 Supp. 74-581; effective Feb. 29, 2008; amended June 4, 2010; amended April 26, 2013.)

4-28-9 and 4-28-10. (Authorized by and implementing K.S.A. 36-507, K.S.A. 65-626, and K.S.A. 2007 Supp. 74-582; effective Feb. 29, 2008; revoked April 26, 2013.)

4-28-11 and 4-28-12. (Authorized by and implementing K.S.A. 2008 Supp. 36-507, K.S.A. 65-626, and K.S.A. 2008 Supp. 74-581; effective Feb. 29, 2008; amended June 4, 2010; revoked April 26, 2013.)

4-28-13 and 4-28-14. (Authorized by and implementing K.S.A. 36-507, K.S.A. 65-626,

and K.S.A. 2007 Supp. 74-582; effective Feb. 29, 2008; revoked April 26, 2013.)

4-28-15. (Authorized by K.S.A. 36-507 and 65-626 and K.S.A. 2007 Supp. 65-673 and 74-582; implementing K.S.A. 36-503, 36-507, 65-626, and 65-662 and K.S.A. 2007 Supp. 65-673; effective Feb. 29, 2008; revoked April 26, 2013.)

4-28-16. (Authorized by K.S.A. 36-507 and 65-626; implementing K.S.A. 36-507 and 65-626 and K.S.A. 2006 Supp. 74-581; effective Feb. 29, 2008; revoked April 26, 2013.)

4-28-18. (Authorized by K.S.A. 65-673 and K.S.A. 2008 Supp. 74-581; implementing K.S.A. 65-659; effective June 4, 2010; revoked Feb. 8, 2013.)

4-28-19 through 4-28-22. (Authorized by K.S.A. 65-663, K.S.A. 2008 Supp. 65-673, and K.S.A. 2008 Supp. 74-581; implementing K.S.A. 65-663; effective June 4, 2010; revoked Feb. 8, 2013.)

4-28-23. Sidewalk or street display of food products; prohibitions. (a) The sidewalk or street display or sale of fresh meat and meat products, fresh seafood and fish, fresh poultry, and any other foods that require time and temperature control for safety shall be prohibited.

(b) Any food product, other than those products listed in subsection (a), that ordinarily is washed, peeled, pared, or cooked in the course of preparation for consumption may be displayed in street and sidewalk displays if the product is in containers that are at least six inches above the surface of the sidewalk or street.

(c) The street or sidewalk display of all food products not specified in this regulation shall be prohibited unless the products are enclosed to protect the products from flying insects, dust, and other contamination. (Authorized by K.S.A. 2011 Supp. 65-688, as amended by L. 2012, ch. 145, sec. 23, and K.S.A. 2011 Supp. 74-581; implementing K.S.A. 2011 Supp. 65-688, as amended by L. 2012, ch. 145, sec. 23; effective June 4, 2010; amended Feb. 8, 2013.)

4-28-24 through 4-28-30. (Authorized by K.S.A. 65-626, K.S.A. 2008 Supp. 74-581; implementing K.S.A. 65-625 and 65-626; effective June 4, 2010; revoked Feb. 8, 2013.)

4-28-31. Fees; education facility with a school lunch program or satellite school lunch program. Each education facility with a

school lunch program or satellite school lunch program subject to the national school lunch act, 42 U.S.C. §1751 et seq., shall be licensed by the secretary.

(a) Each of the following terms, as used in this regulation, shall have the meaning specified in this subsection:

(1) "Education facility with a school lunch program" means any school, institution, or other organization providing meals to children through the national school lunch program of the division of food and nutrition services, United States department of agriculture.

(2) "Satellite school lunch program" means any program offered through an education facility with a school lunch program that is operated at a different location as designated by the education facility. A satellite school lunch program does not have on-site food preparation, except portioning food for service.

(b) Each person operating or wanting to operate an education facility with a school lunch program or satellite school lunch program shall submit an application on forms provided by the department with the following fees, as applicable:

(1) Application fee: \$200; and

(2)(A) License fee for an education facility with a school lunch program: \$415; or

(B) license fee for an education facility with a satellite school lunch program: \$340.

(c) Each license shall expire on the first March 31 following the date of issuance.

(d) Any licensee may renew a license before the expiration date of the license by submitting an application for renewal on a form supplied by the department and the applicable license fee specified in paragraph (b)(2).

(e)(1) Each license renewal application received within 30 days after the license expiration date shall require annual renewal by the licensee's submission of an application for renewal on a form supplied by the department, the applicable license fee specified in paragraph (b)(2), and a late fee of \$25, pursuant to 2012 Sen. Sub. for HB 2730, sec. 1 and amendments thereto.

(2) License renewal applications received by the department on or after May 1 shall not be approved before the licensee submits the fees prescribed in paragraphs (b)(1) and (b)(2) and the licensee's food establishment is inspected pursuant to K.S.A. 65-689, and amendments thereto.

(f) For an education facility with a school lunch program or satellite school lunch program licensed

before July 1, 2012, the difference between the original license fee paid and the current license fee shall be paid for the license year ending March 31, 2013. In subsequent years, the full license fee shall be paid. (Authorized by and implementing K.S.A. 2011 Supp. 65-688, as amended by 2012 Sen. Sub. for HB 2730, sec. 23; effective, T-4-6-28-12, July 1, 2012; effective Oct. 26, 2012.)

4-28-32. Vehicles used in transportation.

Each vehicle used in the transportation of food shall be kept in a condition by which food cannot become adulterated. During transport, the food shall be protected from physical, chemical, and microbial contamination and degradation by the use of the following:

(a) Clean and sanitary transportation vehicles and containers; and

(b) temperature-control measures meeting the department's requirements. (Authorized by K.S.A. 2011 Supp. 65-688, as amended by L. 2012, ch. 145, sec. 23; implementing K.S.A. 2011 Supp. 65-688, as amended by L. 2012, ch. 145, sec. 23, and K.S.A. 2011 Supp. 74-581; effective Feb. 8, 2013.)

4-28-33. Sanitation and hygiene requirements for exempt food establishments.

Each food establishment exempted from licensure in K.S.A. 65-689, and amendments thereto, shall meet the following requirements: (a) Food preparation areas shall be protected from environmental contamination, including rain, dust, and pests.

(b) Food contact surfaces, including cutting boards, utensils, and dishes, shall be cleaned, rinsed, and sanitized before food-handling activities begin and also as necessary. Hot, potable water and a dishwashing detergent shall be used for cleaning operations. Clean, hot, potable water shall be used for rinsing. Sanitizing shall be accomplished by immersing each item in a chlorine bleach solution of 50 to 100 parts per million for 10 seconds and allowing the item to air-dry. A sanitizer labeled for use on food contact surfaces may be used instead of chlorine bleach. Warewashing activities shall be conducted in easily cleanable sinks or food-grade tubs large enough to accommodate immersion of the largest items.

(c) Animals shall not be permitted in food preparation areas.

(d) Food and utensils shall be protected from contamination.

(e) A potable water supply shall be provided. Commercially bottled water or water from a private system may be used.

(1) If water is supplied from a private system, including a well or spring, the private system shall meet the local water system test requirements. If local requirements do not exist, the water shall meet the following standards, with testing obtained by the operator of the food establishment at least annually:

(A) Nitrates shall be less than 20 milligrams per kilogram.

(B) Total coliforms shall be zero colony-forming units.

(C) Fecal coliforms shall be zero colony-forming units.

The current copy of the testing shall be made available upon request.

(2) Each mobile or portable establishment shall ensure that the water is maintained in a potable state by use of appropriate containers, hoses, or other water-handling systems.

(f) Adequate sewage disposal shall be provided. Each septic system shall be approved by the Kansas department of health and environment or the county sanitarian. The current copy of the approval shall be made available upon request. Each mobile or portable establishment shall have adequate on-site sewage storage and shall dispose of sewage in a sanitary sewer or septic system.

(g) Bare-hand contact shall not be permitted with ready-to-eat foods.

(h) Each person working with food shall wash that person's hands before working with food or food contact surfaces and after the hands are contaminated, or could have become contaminated, including after handling raw eggs, raw meat, or raw poultry or after touching the face or hair. The following procedure shall be used:

(1) Wet hands using warm, running potable water;

(2) apply soap and rub hands together vigorously for at least 10 seconds;

(3) rinse hands; and

(4) dry hands with a clean paper towel.

(i) No person with any of the following symptoms or conditions shall work with food:

(1) Vomiting;

(2) diarrhea;

(3) jaundice;

(4) sore throat with fever;

(5) any lesion, boil, or infected wound that contains pus, is open or draining, and is located on any of the following:

(A) The hands or wrists, unless an impermeable cover that may include a finger cot or stall protects the affected site and a single-use glove is worn over the impermeable cover;

(B) exposed portions of the arms, unless the affected site is protected by an impermeable cover; or

(C) other parts of the body, unless the affected site is covered by a dry, durable, tight-fitting bandage; or

(6) an illness due to any of the following:

(A) Norovirus;

(B) hepatitis A virus;

(C) shigella;

(D) enterohemorrhagic or shiga toxin-producing *Escherichia coli*; or

(E) salmonella typhi. (Authorized by K.S.A. 2012 Supp. 65-688; implementing K.S.A. 2012 Supp. 65-688 and 65-689; effective May 31, 2013.)

4-28-34. Exemption from licensure; definitions. (a) Each person who is exempt under K.S.A. 65-689(d)(7), and amendments thereto, from licensure for operating a food establishment shall post at the point of sale a placard or sign that states, in letters at least one-quarter inch high and in contrasting color to the background, that the food establishment is not subject to routine inspection by the Kansas department of agriculture.

(b) As used in K.S.A. 65-689(d)(7) and amendments thereto, each of the following terms shall have the meaning specified in this subsection:

(1) “Community or humanitarian purposes” shall mean purposes for the common good, including building or refurbishing playgrounds or parks, preserving historic public buildings, religious organization fundraising, promoting human welfare including disaster relief, providing food to the food-insecure, providing shelter for humans, and similar activities.

(2) “Educational or youth activities” shall mean activities associated with an early childhood, elementary, secondary, or postsecondary school or activities for persons less than 21 years of age that engage these persons in recreational, educational, or social activities, including sports teams, summer camps, music programs, arts programs, and similar activities.

(c) Funds raised in food establishments exempt from licensure under K.S.A. 65-689(d)(7), and amendments thereto, shall not be used for wages or other compensation of volunteers or employ-

ees, except for providing complimentary food to volunteer staff.

(d) Nothing in this regulation shall prohibit a person who is exempt from licensure for operating a food establishment from applying for a food establishment license from the secretary. Upon the secretary’s review of the application, a license may be issued by the secretary pursuant to K.S.A. 65-689(b), and amendments thereto. (Authorized by K.S.A. 2012 Supp. 65-688; implementing K.S.A. 2012 Supp. 65-688 and 65-689; effective May 31, 2013.)

Article 33.—MILL LEVY ASSESSMENT

4-33-1. Mill levy assessment. (a) Except as provided in paragraph (b) of this regulation, soybeans marketed through commercial channels in the state of Kansas shall be assessed at 20 mills per bushel. The assessment shall be levied and assessed to the grower at the time of sale.

(b) Whenever a federal marketing order issued pursuant to the soybean promotion, research, and consumer information act, section 1965 of public law 101-624 (7 U.S.C.A. 6301 et seq.) establishing a national checkoff program for soybeans becomes effective, all soybean assessments shall be assessed as provided in K.A.R. 4-33-2. As long as the federal marketing order remains in effect, no assessments shall be collected pursuant to paragraph (a) of this regulation.

(c) This regulation shall be in force and effect from and after September 1, 1991. (Authorized by K.S.A. 2-3006; implementing 1990 Supp. K.S.A. 2-3007 as amended by 1991 SB 323, Sec. 4 and 1991 SB 323, Sec. 6, 7; effective July 1, 1989; amended, T-4-8-23-91, Sept. 1, 1991; amended Oct. 21, 1991.)

4-33-2. Assessment under federal marketing order. (a) While any federal marketing order issued pursuant to the soybean promotion, research, and consumer information act, section 1965 of public law 101-624 (7 U.S.C.A. 6301 et seq.) is in effect, soybeans-marketed through commercial channels in the state of Kansas shall be assessed at the rate of one-half of 1 percent of the net market price of soybeans sold by the producer or grower to the first purchaser. The assessment shall be levied and assessed to the producer or grower at the time of sale.

(b) This regulation shall be in force and effect from and after September 1, 1991. (Authorized by K.S.A. 2-3006 as amended by SB 323, Sec. 3; implementing 1990 Supp. K.S.A. 2-3007 as amend-

ed by 1991 SB 323, Sec. 4 and 1991 SB 323, Sec. 6, 7; effective, T-4-8-23-91, Sept. 1, 1991; effective Oct. 21, 1991.)

Article 34.—INDUSTRIAL HEMP

4-34-1. Definitions. Each of the following terms, as used in this article of the department's regulations, shall have the meaning specified in this regulation:

(a) "Act" means the commercial industrial hemp act, K.S.A. 2019 Supp. 2-3901 et seq. and amendments thereto.

(b) "Administrative license" means a license issued to any of the following:

(1) An individual appointed as a member of the state advisory board;

(2) an individual employed by the designated certifying agency who requires licensure as a result of the individual's assigned employment duties and is involved in the administration of the designated certifying agency's responsibilities pursuant to the pilot program;

(3) an individual employed by the department who is involved in the administration, regulation, or oversight of the pilot program or an individual employed by the department who requires licensure as a result of the individual's assigned employment duties; or

(4) an individual who is an employee or agent of a bank, financial institution, or other creditor that has a legal right to take possession of industrial hemp for the purposes of settling a debt.

(c) "Approved variety of industrial hemp" means a variety or strain of industrial hemp authorized for use in the pilot program.

(d) "Certifying agency" has the meaning specified in K.S.A. 2-1415, and amendments thereto.

(e) "Condition," as used in this article of the department's regulations, means to clean or to clean and blend seed within a licensed research section, in order to meet the requirements of agricultural seed for the purpose of being planted or seeded. Seed that has undergone this process is known as "conditioned."

(f) "Department" means Kansas department of agriculture.

(g) "Destroy" means to make incapable of being harvested or processed by means of being incinerated, tilled under the soil, or made into compost or by using another manner approved by the secretary. This process is known as "destruction," which is a type of "effective disposal" as defined

in K.S.A. 2019 Supp. 2-3901 and amendments thereto.

(h) "Devitalize" means to render incapable of germinating.

(i) "Grain," as used in this article of the department's regulations, means an industrial hemp plant's unit of sexual reproduction intended to be consumed or processed into hemp products.

(j) "Ground cover" means any species of grass, legume, or forb that is planted to provide seasonal soil cover and is not intended to be harvested.

(k) "Handle" means to cause any movement of industrial hemp on or within a licensed research section.

(l) "Harvest" means to remove industrial hemp plants, plant parts, grain, or seeds from the research area where the industrial hemp plants, plant parts, grain, or seeds were cultivated, planted, or grown.

(m) "Harvest certificate" means a document issued by the department to the primary licensee, after the industrial hemp plants, plant parts, grain, or seeds are harvested, that includes information to assist in identifying the industrial hemp plants, plant parts, grain, or seeds that were harvested.

(n) "Individual" means a natural person.

(o) "Licensed growing area" means an area that is identified on an application or license for cultivating or producing industrial hemp for commercial purposes, can consist of a single primary section legally designated by the public land survey system, and may include an additional half mile in any direction beyond the primary section.

(p) "Licensed research distributor" means an individual licensed by the department to handle, condition, store, distribute, or transport raw, harvested industrial hemp plants, plant parts, grain, or seeds in Kansas.

(q) "Licensed research grower" means an individual licensed by the department to cultivate, plant, grow, handle, harvest, condition, store, distribute, or transport industrial hemp plants, plant parts, grain, or seeds in Kansas.

(r) "Licensed research processor" means an individual licensed by the department to handle, store, or process industrial hemp plants, plant parts, or grain and take part in any aspect of turning raw, harvested industrial hemp into a hemp product in Kansas.

(s) "Licensed research section" means a section legally designated by the public land survey system that is identified in the license issued by the department establishing where a licensee may

cultivate, plant, grow, handle, harvest, condition, store, distribute, transport, or process industrial hemp plants, plant parts, grain, or seeds. A licensed research section may include land, structures, and buildings that are not used to cultivate, plant, grow, handle, harvest, condition, store, distribute, transport, or process industrial hemp plants, plant parts, grain, or seeds.

(t) “Licensee” means any individual who possesses a valid license issued by the department pursuant to the act.

(u) “Lot” means a contiguous area in a field, greenhouse, or indoor growing structure containing the same variety or strain of cannabis throughout the area.

(v) “Pilot program” means the industrial hemp research program administered by the department pursuant to the act.

(w) “Plant part” means any portion of an industrial hemp plant, including any of the following:

(1) Whole or partial unprocessed plants, including stalk, leaf, seed, floral, and root materials;

(2) raw roots;

(3) fresh, unprocessed, dried, or ground leaves or floral material; or

(4) rooted plants, cuttings, propagules, or clones.

(x) “Primary licensee” means an individual at least 18 years of age who was issued a research license by the department and who shall be responsible for ensuring that all licensees listed on the research license application submitted by that individual comply with the requirements of the act and any implementing regulations.

(y) “Research area” means a location within a licensed research section used for the cultivation, planting, growth, handling, harvesting, conditioning, storage, distribution, transporting, or processing of industrial hemp plants, plant parts, grain, or seeds.

(z) “Secretary” means secretary of the Kansas department of agriculture or the secretary’s designated representative.

(aa) “Seed,” as used in this article of the department’s regulations, means an industrial hemp plant’s unit of sexual reproduction intended to be planted for germination.

(bb) “Variety” means a subdivision of a species that meets the following conditions:

(1) Is uniform, in the sense that the variations in essential and distinctive characteristics are describable;

(2) is stable, in the sense that the variety will remain unchanged in its essential and distinctive

characteristics and its uniformity if reproduced or reconstituted as required by the different categories of varieties; and

(3) is distinct, in that the variety can be differentiated by one or more identifiable morphological, physiological, or other characteristics from all other publicly known varieties.

(cc) “Volunteer plant” means any plant of the genus *cannabis* that grows of its own accord from seeds or roots and is not intentionally planted. (Authorized by and implementing K.S.A. 2019 Supp. 2-3902; effective Feb. 8, 2019; amended Feb. 26, 2021.)

4-34-2. Certified seed. (a) All certified seed shall be considered “agricultural seed” subject to the Kansas agricultural seed act, K.S.A. 2-1415 et seq. and amendments thereto, and the implementing regulations.

(b) No certification of seed shall be made unless by or on the authority of the designated certifying agency. (Authorized by and implementing K.S.A. 2018 Supp. 2-3902; effective Feb. 8, 2019.)

4-34-3. License approval process. (a) Each individual wanting to conduct research pursuant to the pilot program shall submit or be listed on a completed, accurate, and legible research license application. Each research license application shall be submitted on a form provided by the department and shall designate the individual wanting to be the primary licensee and all proposed licensees. Each research license application shall include a research proposal and all required state and national criminal history record check and application fees, except that an individual wanting to be a primary licensee on a state educational institution license shall not be required to submit an application fee.

(b) Each individual issued an administrative license, each individual wanting to be a primary licensee, and each individual listed on a research license application shall meet the following requirements:

(1) Be fingerprinted and submit to a state and national criminal history record check, which shall be performed by the Kansas bureau of investigation;

(2) submit payment for the fingerprint-based criminal history record check to the Kansas bureau of investigation; and

(3) submit payment for the costs of fingerprinting to the law enforcement agency that provided the fingerprinting services.

(c) Each individual wanting to be a primary licensee and each individual listed on a research license application shall submit that individual's fingerprints and a state and national criminal history record check no more than 30 days before submitting the research license application to the department.

(d) Following the department's receipt of the completed research license application, verification that all individuals passed the state and national criminal history record check, and the application fees, the research license application shall be reviewed by the state advisory board and either rejected or recommended for approval and forwarded to the secretary.

(e) Following the secretary's review, each research license application shall be denied or conditionally approved. The individual wanting to be the primary licensee shall be notified by the department of the denial or conditional approval in writing. Each research license application for a state educational institution license shall be reviewed solely by the secretary and shall be denied or approved. If approved, each state educational institution license shall be issued by the department and the licensee may begin the approved research.

(f) Upon conditional approval of a research license application, the individual wanting to be the primary licensee shall remit the applicable license fees for each approved license category within 15 days of receipt of the department's written notice of conditional approval. Once the department receives the applicable license fees, the research license application shall be officially approved and each appropriate license shall be issued by the department. Upon receipt of the research license, the licensee may begin the approved research. (Authorized by and implementing K.S.A. 2018 Supp. 2-3902; effective Feb. 8, 2019.)

4-34-4. Research license applications. (a) Each individual wanting to be a primary licensee shall identify the following on the research license application:

(1) Each owner of all land, structures, and buildings where any proposed research will be conducted;

(2) each owner of all motor vehicles that will be used to distribute or transport industrial hemp plants, plant parts, grain, or seeds;

(3) each individual that will own 10 percent or more of the industrial hemp plants, plant parts,

grain, or seeds being cultivated, planted, or grown; and

(4) each individual that will otherwise be involved in the research proposal, including those individuals that will be engaged in the purchasing, researching, cultivating, planting, growing, handling, harvesting, conditioning, storing, distributing, transporting, processing, studying, analyzing, or selling of industrial hemp plants, plant parts, grain, or seeds.

(b) Each research license application shall include the following:

(1) A research proposal submitted on a form provided by the department that includes the following, at a minimum:

(A) A statement of the type of research to be conducted;

(B) the purpose of the research;

(C) the data that will be collected;

(D) the location where the research will occur;

(E) the number of acres or square feet that will be used to conduct the research;

(F) the methods to be used in conducting the research;

(G) the intended duration of the research;

(H) the anticipated results of the research; and

(I) any other relevant information that the secretary requests;

(2) legal descriptions and maps depicting each location where industrial hemp plants, plant parts, grain, or seeds will be cultivated, planted, grown, handled, harvested, conditioned, stored, distributed, transported, or processed, including appropriate designations for field identifications and boundaries and the global positioning system coordinates;

(3) a description of each vehicle that will be used for transporting or distributing industrial hemp plants, plant parts, grain, or seeds, including the make, model, license plate number, and color; and

(4) a list of each individual who will transport any industrial hemp plants, plant parts, grain, or seeds, along with a copy of the individual's current driver's license.

(c) Each research license application shall be submitted to the department on an annual basis, on a form provided by the department. Each research license application shall be submitted to the department no later than March 1 for the 2019 growing season and no later than November 30 for each subsequent growing season.

(d) Incomplete or illegible research license ap-

plications shall not be accepted, and the application fees shall not be refunded.

(1) Any individual wanting to be a primary licensee may complete or resubmit a previously incomplete or illegible research license application no later than November 30.

(2) For the 2019 growing season, any individual wanting to be a primary licensee may complete or resubmit a previously incomplete or illegible research license application no later than March 1.

(e) Any individual may apply for multiple licenses in a single license category or multiple license categories. Each individual shall provide the department with all required information for each license being sought along with payment of separate application fees and license fees.

(f) A research license application may be denied and the application fees shall not be refunded if at least one of the following conditions is met:

(1) The research license application is not submitted by the established deadline.

(2) The research license application does not include the application fees.

(3) Any individual identified on the research license application fails to submit to the state and national criminal history record check as required.

(4) Any criminal history records check reveals that an individual identified on the license application has been convicted of any crime specified in K.S.A. 2018 Supp. 2-3902, and amendments thereto, or a violation of any law of another jurisdiction that is in substantial conformity with the offenses listed in that statute.

(5) The research license application does not include a research proposal.

(6) The research license application includes a home or residence as a location to cultivate, plant, grow, handle, harvest, condition, store, distribute, transport, or process industrial hemp plants, plant parts, grain, or seeds. (Authorized by and implementing K.S.A. 2018 Supp. 2-3902; effective Feb. 8, 2019.)

4-34-5. Licenses issued by the department; general requirements for licensees.

(a) Each license issued by the department shall establish the requirements governing each licensee's participation in the pilot program. Any violation of the terms and conditions specified in a license may result in the revocation of any license held by the licensee and denial of future applications. Each licensee shall comply with all instructions from representatives of the department and

local, state, and federal law enforcement agencies pertaining to the licensee's involvement in the pilot program.

(b) Before cultivating, planting, growing, handling, harvesting, conditioning, storing, distributing, transporting, processing, researching, overseeing, studying, or analyzing industrial hemp plants, plant parts, grain, or seeds for research purposes at any location in Kansas, each individual shall obtain a license issued by the department.

(c) Before a license is issued by the department, license fees shall be paid as required by K.A.R. 4-34-12. Failure by the individual wanting to be the primary licensee to pay the license fees within 15 days of receipt of notice of conditional approval shall terminate the approval process of the research license application, and the requested licenses shall not be issued by the department.

(d) Except in the case of the death of the primary licensee, a license issued by the department shall not be sold or transferred. If the primary licensee dies, any individual listed on the research license application that has also been issued a license may request that the department modify the license as required by K.A.R. 4-34-13.

(e)(1) Each licensee shall use or allow to be used as part of the pilot program only industrial hemp plants, plant parts, grain, or seeds from varieties currently designated by the department as approved varieties of industrial hemp. The department's document titled "approved varieties of industrial hemp for planting," dated October 15, 2018, is hereby adopted by reference.

(2) Upon request of the individual wanting to be the primary licensee, any licensees listed on that individual's research license application may be authorized by the secretary to cultivate, plant, grow, handle, harvest, condition, store, distribute, transport, or process varieties of industrial hemp other than those varieties identified under paragraph (e)(1), if doing so is appropriate and consistent with the individual's research proposal.

(f) At all times while a licensee is engaged in cultivating, planting, growing, handling, harvesting, conditioning, storing, distributing, transporting, processing, researching, overseeing, studying, or analyzing industrial hemp plants, plant parts, grain or seeds pursuant to the pilot program, the licensee shall have that individual's current license authorizing the activity in possession.

(g) Each license issued by the department shall be valid from the date of issuance until the expiration date unless the license is revoked by the de-

partment. Each license shall expire on January 31, following the date of issuance. An individual may apply for a license in successive years by completing a research license application, state and national criminal history records check, fingerprinting, and paying the application and license fees. Issuance of a license in one year shall not guarantee issuance of a license in any subsequent year.

(h) A license shall not be issued by the department to an individual if the individual's research license application includes a location approved by the department as a research area in a license previously issued by the department in the same license year. Any individual may request that the department approve multiple licensed research sections. However, each request shall require a separate research license application, application fees, and license fees.

(i) Any primary licensee may be approved by the department to cultivate, plant, or grow industrial hemp plants, plant parts, grain, or seeds on an acreage or square footage that is equal to or less than the acreage or square footage stated in the research license application. Industrial hemp plants, plant parts, grain, or seeds may be cultivated, planted, or grown on an acreage or square footage that is equal to or less than the approved acreage or square footage. Completion of a modification request form shall not be required if a primary licensee elects to cultivate, plant, or grow industrial hemp plants, plant parts, grain, or seeds on an acreage or square footage that is less than the acreage or square footage authorized in the license.

(j) Licensees shall use only approved varieties of industrial hemp when engaged in cultivating, planting, growing, handling, harvesting, conditioning, storing, distributing, transporting, or processing industrial hemp plants, plant parts, grain, or seeds, except that any primary licensee may request that the secretary approve varieties of industrial hemp pursuant to paragraph (e)(2).

(k) Each licensee growing seed for seed certification shall meet the requirements specified in the Kansas agricultural seed act, K.S.A. 2-1415 et seq. amendments thereto, and the implementing regulations.

(l)(1) Each licensee shall consent to the department's providing information to law enforcement, fire, and rescue agencies and the public regarding each research area. Additionally, each licensee shall consent to the department's providing information about any licensed research section or research area, including global positioning system

coordinates, to representatives of the Kansas bureau of investigation, United States drug enforcement agency, and other law enforcement agencies if representatives of any of these agencies request the information.

(2) Each licensee shall consent to the department's providing appropriate law enforcement agencies in each county with copies of the licensee's license.

(m) Each research area shall be subject to inspection by the department. Each representative of the department shall have complete, unrestricted, and immediate access to all industrial hemp plants, plant parts, grain, and seeds, whether growing or not, including access to all land, buildings, facilities, motor vehicles, and other structures listed on the license issued by the department. Access shall be granted whether the licensee is present or not, at reasonable times, without interference or obstruction, with or without cause, and with or without advance notice. The right of access shall include the unrestricted right to inspect or take samples of any industrial hemp plants, plant parts, grain, or seeds present at the location being accessed, as well as the right to inspect any reports or records pertaining to the licensee's research.

(n) Each licensee shall permit the department to perform any inspections and to collect any samples of any industrial hemp plants, plant parts, grain, or seeds at any time.

(o) Each licensee shall submit all reports required by the department on or before the specified deadlines.

(p) Each primary licensee shall retain, for at least five years, all records created as a result of the primary licensee's participation in the pilot program unless otherwise ordered by the secretary. The records shall be made available for inspection by the department, the Kansas bureau of investigation, and any other law enforcement agencies upon request.

(q) Each licensee shall ensure that any individual applying pesticides to industrial hemp plants or plant parts complies with the Kansas pesticide act, K.S.A. 2-2438a et seq. amendments thereto, and the implementing regulations.

(r) Each licensee shall be solely responsible for that licensee's risk of financial or other loss as a result of participating in the pilot program.

(s) A licensee shall not allow industrial hemp plants, plant parts, grain, or seeds to be cultivated, planted, grown, handled, harvested, conditioned,

stored, distributed, transported, or processed at any location other than the locations included on the license issued by the department.

(t)(1) Each licensee shall immediately notify the department of any interaction with law enforcement related to the licensee's participation in the pilot program, as well as any contact with law enforcement related to criminal charges or a criminal investigation involving any crime specified in K.S.A. 2018 Supp. 2-3902, and amendments thereto, or a violation of any law of another jurisdiction that is in substantial conformity with the offenses listed in that statute. The licensee shall provide a written follow-up summarizing the interaction and its outcome to the department within three calendar days of the interaction.

(2) Each primary licensee shall notify the department and appropriate law enforcement agencies of the theft of any industrial hemp plants, plant parts, grain, or seeds within three calendar days of the theft.

(u) A primary licensee shall not permit any individual to participate in the pilot program pursuant to the primary licensee's research license application if that individual's license was revoked by the department or that individual was denied admission to participate in the pilot program. Except when conducting educational activities, a licensee shall not allow access to any research area listed on the license, industrial hemp plants, plant parts, grain, or seeds by an individual whose license was revoked by the department or who was denied admission to participate in the pilot program.

(v) A primary licensee shall not rent or lease land, buildings, facilities, motor vehicles, or other structures that will be used to conduct research as part of the pilot program from any individual whose license was revoked by the department or who was denied admission to participate in the pilot program.

(w) Any licensee may host or engage in educational activities as authorized by the license issued by the department. Any licensee hosting or engaging in educational activities may allow members of the public access to each research area for the sole purpose of participating in educational activities. Any licensee may set up a public display booth showcasing the individual's research relating to industrial hemp plants, plant parts, grain, or seeds at trade shows, county fairs, or other similar events. Licensees shall not allow any members of the public to have physical contact with or possess any industrial hemp plants, plant parts, grain, or

seeds and shall not transfer, distribute, trade, sell, give away, barter, or exchange for value any industrial hemp plants, plant parts, grain, or seeds to any member of the public.

(x) A licensee shall not conduct activities that involve industrial hemp plants, plant parts, grain, or seeds that are unrelated to the licensee's approved research proposal, license, or educational activities at any location listed on the license, including industrial hemp-related activities involving an industrial hemp maze.

(y) A licensee shall not distribute industrial hemp plants, plant parts, grain, or seeds at any location that is not identified on the license, including trade shows, county fairs, educational or other events, and any other address not listed on the license. (Authorized by and implementing K.S.A. 2018 Supp. 2-3902; effective Feb. 8, 2019.)

4-34-6. Research grower license. (a) In addition to the requirements of K.A.R. 4-34-5, each individual who is issued a research grower license by the department shall meet the following requirements:

(1) Obtain industrial hemp plants or certified seeds from a licensed research distributor or from legally imported sources of industrial hemp;

(2) obtain and retain a copy of each seed label for all certified seed planted, cultivated, or grown;

(3) obtain and retain a copy of the following documents, if applicable:

(A) The research grower license of the primary licensee that cultivated, planted, grew, handled, harvested, conditioned, stored, distributed, or transported the industrial hemp plants or seeds being received;

(B) the research distributor license of the primary licensee that handled, conditioned, stored, distributed, or transported the industrial hemp plants or seeds being received; and

(C) the harvest certificate pertaining to the industrial hemp plants or seeds being received by the licensee or a bill of lading or other documentation identifying the source of the industrial hemp plants or seeds being received;

(4) ensure that industrial hemp plants, plant parts, grain, or seeds are not interplanted with any other crop in any research area;

(5) ensure that a copy of the harvest certificate pertaining to the industrial hemp plants, plant parts, grain, or seeds that were harvested or a bill of lading or other documentation identifying the source of the industrial hemp plants, plant parts, grain,

or seeds accompanies the industrial hemp plants, plant parts, grain, or seeds being transported;

(6) ensure that industrial hemp plants, plant parts, grain, or seeds are not commingled with any other commodity or other items being transported; and

(7) survey and monitor any unlicensed growing areas, whether inactive or previously licensed as part of any research area, or never been licensed, including any ditches, fence lines, and other unmanaged land areas adjacent to the research areas, for volunteer plants and destroy any volunteer plants during the current license year and for at least three years after the last date of planting reported to the department.

(b) The primary licensee on each research grower license shall have a primary residence in Kansas.

(c) Any licensed research grower may cultivate, plant, grow, handle, harvest, condition, store, distribute, or transport industrial hemp plants, plant parts, grain, or seeds pursuant to the license issued by the department.

(d) A licensed research grower shall not handle, harvest, condition, store, distribute, transport, or process industrial hemp plants, plant parts, grain, or seeds cultivated, planted, or grown by another licensee without first obtaining any required license issued by the department.

(e) A licensed research grower shall not cultivate, plant, grow, handle, or harvest more than 80 acres in a licensed research section under one license in calendar year 2019 and shall not cultivate, plant, grow, handle, or harvest more than 320 acres in a licensed research section under one license in calendar year 2020. Each primary licensee on a research grower license who wants to cultivate, plant, grow, handle, or harvest more than the authorized acres in a licensed research section in any calendar year shall obtain an additional research grower license and pay all required application fees and license fees for the additional acreage.

(f) Each licensed research grower that cultivates, plants, grows, handles, harvests, conditions, stores, or transports industrial hemp plants or seeds that were obtained from outside Kansas shall maintain a bill of lading or other documentation that identifies the source of the industrial hemp plants or seeds to demonstrate that the industrial hemp plants or seeds were legally imported into Kansas. (Authorized by and implementing K.S.A. 2018 Supp. 2-3902; effective Feb. 8, 2019.)

4-34-7. Research distributor license. (a) In addition to the requirements of K.A.R. 4-34-5, each individual who is issued a research distributor license by the department shall meet the following requirements:

(1) Obtain industrial hemp plants, plant parts, grain, or seeds from a licensed research grower, licensed research distributor, or licensed research processor or from legally imported sources of industrial hemp;

(2) obtain and retain a copy of the following documents, if applicable:

(A) The research grower license of the primary licensee that cultivated, planted, grew, handled, harvested, conditioned, stored, distributed, or transported the industrial hemp plants, plant parts, grain, or seeds being received;

(B) the research distributor license of the primary licensee that handled, conditioned, stored, distributed, or transported the industrial hemp plants, plant parts, grain, or seeds being received;

(C) the research processor license of the primary licensee that handled or stored the industrial hemp plants, plant parts, or grain being received; and

(D) the harvest certificate pertaining to the industrial hemp plants, plant parts, grain, or seeds being received by the licensee or a bill of lading or other documentation identifying the source of the industrial hemp plants, plant parts, grain, or seed being received by the licensee;

(3) ensure that a copy of the harvest certificate pertaining to the industrial hemp plants, plant parts, grain, or seeds that were harvested or a bill of lading or other documentation identifying the source of the industrial hemp plants, plant parts, grain, or seeds accompanies the industrial hemp plants, plant parts, grain, or seeds being distributed or transported; and

(4) ensure that industrial hemp plants, plant parts, grain, or seeds are not commingled with any other commodity or other items being distributed or transported.

(b) The primary licensee on a research distributor license shall have a primary residence in Kansas.

(c) Any licensed research distributor may handle, condition, store, distribute, or transport industrial hemp plants, plant parts, grain, or seeds pursuant to the license issued by the department.

(d) A licensed research distributor shall not harvest or process industrial hemp plants, plant parts, grain, or seeds cultivated or grown by an-

other licensee without first obtaining any required license issued by the department.

(e) Each individual exchanging, distributing, selling, or reselling certified seed in Kansas shall be licensed pursuant to the Kansas agricultural seed act, K.S.A. 2-1415 et seq. amendments thereto, and the implementing regulations.

(f) A licensed research distributor that handles, conditions, stores, distributes, or transports industrial hemp plants, plant parts, grain, or seeds that were obtained from outside Kansas shall maintain a bill of lading or other documentation that identifies the source of the industrial hemp plants, plant parts, grain, or seeds to demonstrate that the industrial hemp plants, plant parts, grain, or seeds were legally imported into Kansas. (Authorized by and implementing K.S.A. 2018 Supp. 2-3902; effective Feb. 8, 2019.)

4-34-8. Research processor license. (a) In addition to the requirements of K.A.R. 4-34-5, each individual who is issued a research processor license by the department shall meet the following requirements:

(1) Obtain industrial hemp plants, plant parts, or grain from a licensed research grower or licensed research distributor or from legally imported sources of industrial hemp;

(2) devalize any industrial hemp grain within 10 days of receipt and take appropriate security measures to ensure that the industrial hemp grain cannot be stolen before it is devalized;

(3) obtain and retain a copy of the following documents, if applicable:

(A) The research grower license of the primary licensee that cultivated, planted, grew, handled, harvested, conditioned, stored, distributed, or transported the industrial hemp plants, plant parts, or grain being received;

(B) the research distributor license of the primary licensee that handled, conditioned, stored, distributed, or transported the industrial hemp plants, plant parts, or grain being received; and

(C) the harvest certificate pertaining to the industrial hemp plants, plant parts, or grain being received by the licensee or a bill of lading or other documentation identifying the source of the industrial hemp plants, plant parts, or grain being received; and

(4) ensure that a copy of the harvest certificate pertaining to the industrial hemp plants, plant parts, or grain that was harvested or a bill of lading or other documentation identifying the source

of the industrial hemp plants, plant parts, or grain accompanies the industrial hemp plants, plant parts, or grain being processed.

(b) Any licensed research processor may handle, store, or process industrial hemp plants, plant parts, or grain pursuant to the license issued by the department. A licensed research processor shall not handle, store, or process seeds.

(c)(1) The primary licensee on a research processor license who processes industrial hemp plants, plant parts, or grain into hemp products in a mobile processing facility shall meet the following requirements:

(A) Notify the department of the mobile processing facility's planned processing locations no more than five days in advance of the first day of processing in each location. The primary licensee shall immediately notify the department of any changes to a submitted schedule; and

(B) at all times, operate in compliance with all state, county, and local laws, regulations, and ordinances.

(2) The primary licensee shall be present at each mobile processing facility's planned processing locations at all times while each mobile processing facility is operating.

(d) A licensed research processor shall not cultivate, plant, grow, harvest, condition, distribute, or transport industrial hemp plants, plant parts, grain, or seeds cultivated, planted, or grown by another licensee without first obtaining any required license issued by the department.

(e) A licensed research processor that processes industrial hemp plants, plant parts, or grain that were obtained from outside Kansas shall maintain a bill of lading or other documentation demonstrating that the industrial hemp plants, plant parts, or grain was legally imported into Kansas.

(f) Possession of a current research processor license shall not guarantee a licensee access to the premises of any private landowner. Permission for a licensee to enter the premises of any landowner shall be established contractually or otherwise by agreement of the licensee and the landowner. (Authorized by and implementing K.S.A. 2018 Supp. 2-3902; effective Feb. 8, 2019.)

4-34-9. State educational institution research license. (a) Each state educational institution wanting to allow individuals to conduct research pursuant to the pilot program shall authorize this participation and shall be directly responsible for any volunteer, student, employee, or

research and extension employee conducting the research.

(b) Each volunteer, student, employee, or research and extension employee of a state educational institution that wants to conduct research pursuant to the pilot program shall submit a completed, accurate, and legible research license application for a state educational institution research license. Each research license application shall designate the individual wanting to be a primary licensee and list all proposed licensees. Each research license application shall include a research proposal and the required state and national criminal history record check.

No application fees or license fees shall be assessed to any individuals wanting a state educational institution research license. However, the costs associated with fingerprinting and the state and national criminal history record check shall be the responsibility of any individual wanting a state educational institution research license.

(c) Volunteers, students, employees, and research and extension employees of a state educational institution shall not apply for a license or conduct research without first obtaining written approval from the head of any applicable department stating that the individual wanting to be a primary licensee and the proposed licensees are part of a sanctioned state educational institution research proposal, which shall be submitted with the research license application. Each individual wanting to be the primary licensee on a state educational institution research license shall apply for and obtain that license before conducting research or having industrial hemp plants, plant parts, grain, or seeds at any location in Kansas.

(d) Each individual wanting to be the primary licensee on a state educational institution research license shall identify the following on the research license application:

(1) Each owner of all land, structures, and buildings where any proposed research will be conducted;

(2) each owner of any motor vehicle that will be used to distribute or transport industrial hemp plants, plant parts, grain, or seeds;

(3) each individual that will own 10 percent or more of the industrial hemp plants, plant parts, grain, or seeds being cultivated, planted, or grown;

(4) each individual that will otherwise be involved in the research proposal, including volunteers, students, employees, research and extension employees, and any other individuals

that will be engaged in the purchasing, researching, cultivating, planting, growing, handling, harvesting, conditioning, storing, distributing, transporting, processing, studying, analyzing, or selling of industrial hemp plants, plant parts, grain, or seeds; and

(5) all individuals that will have access to any proposed research area.

(e) Any state educational institution licensee may cultivate, plant, grow, handle, harvest, condition, store, distribute, transport, or process industrial hemp plants, plant parts, grain, or seeds pursuant to the license.

(f)(1) The requirements for research license applications specified in K.A.R. 4-34-4 (b) through (f) and the requirements for the state and national criminal history record check specified in K.A.R. 4-34-3 shall apply to state educational institution licensees. Each state educational institution licensee shall comply with the requirements of K.A.R. 4-34-5, the requirements for a research grower license pursuant to K.A.R. 4-34-6, the requirements for a research distributor license pursuant to K.A.R. 4-34-7, and the requirements for a research processor license pursuant to K.A.R. 4-34-8, except that a state educational institution licensee shall not be required to pay any application fees, license fees, modification fees, sampling fees, or testing fees.

(2) Any individual wanting to be primary licensee on a state educational institution license may include a location on the individual's research license application that has previously been approved by the department as a research area in the same license year.

(3) A state educational institutional licensee shall be prohibited from the following:

(A) Storing or distributing industrial hemp plants, plant parts, grain, or seeds cultivated or grown under another's license, except with the secretary's written permission; and

(B) operating a mobile processing facility.

(g) A state educational institution licensee shall not conduct research as part of the pilot program on any research area not owned by the state educational institution. A state educational institution licensee shall not enter into any agreement or otherwise subcontract with an individual or business entity to permit the licensee to conduct research on any land, structures, or buildings not owned by the state educational institution.

(h) A primary licensee on a state educational institution license shall not permit any individual to

participate in the pilot program pursuant to the primary licensee's research license application or otherwise have access to the licensee's research area, industrial hemp plants, plant parts, grain, or seeds if that individual's license was revoked by the department or that individual was denied admission to participate in the pilot program.

(i) Any individual wanting to be a primary licensee on a state educational institution license may request that the department authorize the licensee to interplant industrial hemp plants, plant parts, grain, or seeds with other crops in a research area.

(j) Each state educational institution licensee that is no longer affiliated with the state educational institution shall notify the department and withdraw from the pilot program pursuant to K.A.R. 4-34-16. (Authorized by K.S.A. 2018 Supp. 2-3902; implementing K.S.A. 2018 Supp. 2-3902 and 2-3903; effective Feb. 8, 2019.)

4-34-10. Administrative license. (a) An administrative license may be issued to any individual specified in K.A.R. 4-34-1(b).

(b) Before being issued an administrative license, each individual shall be required to undergo and pass the state and national criminal history record check as specified in K.A.R. 4-34-3.

(c) Each administrative license shall identify the activities that the licensee is authorized to undertake, including handling, inspecting, sampling, testing, and transporting industrial hemp plants, plant parts, grain, or seeds.

(d) No application fee or license fee shall be assessed for any administrative license issued pursuant to this regulation. (Authorized by K.S.A. 2018 Supp. 2-3902; implementing K.S.A. 2018 Supp. 2-3902 and 2-3903; effective Feb. 8, 2019.)

4-34-11. State advisory board. (a) The board established by the secretary pursuant to K.S.A. 2018 Supp. 2-3902, and amendments thereto, shall be recognized as the state advisory board. Members shall be appointed by the secretary. The state advisory board shall consist of at least five and no more than nine members. Membership shall reflect the different geographic areas of the state equally, to the greatest extent possible. Members of the state advisory board shall receive no compensation for serving on the board, but may be paid subsistence allowances, mileage, and other expenses as provided in K.S.A. 75-3223, and amendments thereto. Each member appointed to

the state advisory board shall be recognized for knowledge and leadership in at least one of the following sectors: crop research, industrial hemp production or processing, law enforcement, seed certification, or any other sector deemed relevant by the secretary. The secretary shall appoint one member from the Kansas legislature to the state advisory board.

(b) Of the members first appointed to the state advisory board, four members whose terms shall expire on June 30, 2021 shall be designated by the secretary. The remaining members' terms shall expire on June 30, 2023. After the expiration of the initial terms, each member shall be appointed by the secretary to serve for a term of four years until a successor is appointed. Each member shall be limited to serving a total of two full terms and shall hold office until the expiration of the term for which the member is appointed or until a successor has been qualified and appointed. A member may be appointed by the secretary to fill an unexpired term of any member due to a vacancy on the state advisory board.

(c) Before being qualified and appointed as a member of the state advisory board, each individual shall undergo and be required to pass the state and national criminal history record check as specified in K.A.R. 4-34-3. Upon determination that an individual is qualified, that individual may be appointed by the secretary as a member of the state advisory board and shall be issued an administrative license by the department. No application or license fees shall be assessed for an administrative license issued to a member of the state advisory board pursuant to this regulation.

(d) A quorum of the state advisory board shall be a majority of the members appointed to the state advisory board. A quorum of the state advisory board shall organize by election of a chairperson, vice-chairperson, and other officers as the state advisory board deems appropriate.

(e) In addition to the duties specified in K.S.A. 2018 Supp. 2-3902 and amendments thereto, the state advisory board shall perform other duties, which may include the review of regulations and recommendation of potential changes. The state advisory board shall make recommendations to the secretary only if the recommendations are approved by a majority vote of the state advisory board members.

(f) Any member of the state advisory board may be removed by the secretary for misconduct, incompetence, or neglect of duty. (Authorized by

K.S.A. 2018 Supp. 2-3902; implementing K.S.A. 2018 Supp. 2-3902 and 2-3903; effective Feb. 8, 2019.)

4-34-12. Fees. (a) The application fee shall be \$200 for each license sought, with the exception of state educational institution licenses and administrative licenses, for which no application fee shall be charged.

(b) Upon conditional approval of a research grower license, each individual wanting to be the primary licensee shall pay a license fee of \$1,000.

(c) Upon conditional approval of a research distributor license, each individual wanting to be the primary licensee shall pay a license fee of \$2,000 for each licensed research section approved by the department.

(d)(1) Upon conditional approval of a research processor license for processing fiber or grain, each individual wanting to be the primary licensee shall pay a license fee of \$3,000 for each processing facility in a licensed research section and for each mobile processing facility.

(2) Upon conditional approval of a research processor license for processing floral material, each individual wanting to be the primary licensee shall pay a license fee of \$6,000 for each processing facility in a licensed research section and for each mobile processing facility.

(e) Each license fee shall include the cost for the department's initial sample collection and initial laboratory test. Each primary licensee shall pay a subsequent sampling fee of \$45 per hour, plus transportation time and mileage for representatives of the department, for each of the following:

(1) The department collects a subsequent sample.

(2) The primary licensee requests that the department collect a subsequent pre-harvest sample.

(3) The primary licensee requests that the department collect a subsequent post-harvest sample.

(4) More than one harvest occurs in the same research area in a license year.

(f) Each primary licensee shall pay a testing fee of \$250 for every laboratory test determining the delta-9 tetrahydrocannabinol concentration for each of the following:

(1) The department collects a subsequent sample.

(2) The primary licensee requests that the department collect a subsequent pre-harvest sample.

(3) The primary licensee requests that the department collect a subsequent post-harvest sample.

(4) The department collects more than one sample because more than one harvest occurs in the same research area in a license year.

(g) Each primary licensee shall pay a modification fee of \$750 for each requested change to a license that was previously issued by the department. (Authorized by K.S.A. 2018 Supp. 2-3902; implementing K.S.A. 2018 Supp. 2-3902 and 2-3903; effective Feb. 8, 2019.)

4-34-13. Modification of license. (a) Each primary licensee who wants to modify that individual's license or the license of any individual listed on the research license application shall submit a modification request form and the required fee, except as specified in paragraph (d) (2), to the department.

(b) Each licensee shall comply with the requirements of the original license, unless the department modifies the license in writing.

(c) Any primary licensee may request multiple license modifications by submitting one modification request form, but separate fees shall be required for each requested change.

(d)(1) If a primary licensee dies, any licensee who was listed on the research license application and was issued a license may request that the department modify the license to name the requesting individual as the primary licensee. This request may be granted by the department if the requesting individual performs the following:

(A) Notifies the department of the primary licensee's death within 15 business days;

(B) submits a license modification request form to the department within 45 days of the primary licensee's death;

(C) submits a copy of the primary licensee's death certificate to the department within 45 days of that individual's death; and

(D) meets the requirements in K.A.R. 4-34-5 and, if applicable, the requirements of K.A.R. 4-34-6, K.A.R. 4-34-7, K.A.R. 4-34-8, and K.A.R. 4-34-9.

(2) A modification fee to name the requesting individual as the new primary licensee shall not be charged by the department, except for modification requests received more than 45 days after the death of the primary licensee, which shall require a modification request form and modification fee unless the department extends the 45-day time period in writing.

If any other modification request is included, that modification request shall be subject to the modification fee specified in K.A.R. 4-34-12.

(e) A license modification shall be approved by the secretary if the request is appropriate and consistent with the licensee's approved research proposal and meets the requirements of this regulation. If the secretary denies the requested modification, no refund of the modification fee shall be provided, and the licensee shall comply with the terms and conditions of the existing license. (Authorized by K.S.A. 2018 Supp. 2-3902; implementing K.S.A. 2018 Supp. 2-3902 and 2-3903; effective Feb. 8, 2019.)

4-34-14. Land-use restrictions. (a) A licensee shall not cultivate, plant, grow, handle, harvest, condition, store, distribute, transport, or process any plants, plant parts, grain, or seeds of the genus *cannabis* that are not industrial hemp.

(b) A licensee shall not cultivate, plant, grow, handle, harvest, condition, store, distribute, or process industrial hemp plants, plant parts, grain, or seeds at any location not included on the licensee's license.

(c)(1) A licensee shall not cultivate, plant, grow, handle, harvest, condition, store, distribute, or process industrial hemp plants, plant parts, grain, or seeds as follows, except with the secretary's written permission:

(A) In or within 50 feet of a residential structure; or

(B) within one-quarter mile of any public or private K-12 school or public recreational area.

(2) For licensed research sections consisting of any outdoor locations, one-quarter mile shall be calculated from any field boundary of any research area, and for licensed research sections consisting of any indoor locations or a greenhouse, one-quarter mile shall be calculated from any exterior wall.

(d) A licensee shall not interplant, cultivate, plant, or grow any crop other than industrial hemp plants, plant parts, grain, or seeds in any research area, except that any state educational institution licensee may do so upon authorization by the secretary. A licensee shall not cultivate, plant, grow, harvest, or condition more than one approved variety of industrial hemp in a research area without the secretary's written approval.

(e) A licensee shall not cultivate, plant, grow, handle, harvest, condition, store, distribute, transport, or process industrial hemp plants, plant parts, grain, or seeds on property owned by any individual whose license was revoked by the department or who was denied admission to participate in the pilot program.

(f) Each primary licensee shall post and maintain at least one sign at each research area listed on the license. A sign shall be posted along each research area boundary adjacent to a public road, except that if the research area is adjacent to an intersection of two or more public roads, a sign shall be posted at the intersection. If a research area is not adjacent to any public road, a sign shall be posted at the point of access to the research area. Each sign shall measure at least 36 inches per side, shall be clearly visible and legible from the adjacent public road, intersection of public roads or access point, and shall include the following information:

(1) The following text: "Kansas Department of Agriculture Industrial Hemp Research Program";

(2) the primary licensee's name;

(3) the primary licensee's license number; and

(4) the department's telephone number.

(g) Each licensee shall allow the department to inspect unlicensed growing areas for volunteer plants. The primary licensee or a licensee listed on the primary licensee's research license application shall destroy any volunteer plants for at least three years after the last reported date of planting. (Authorized by and implementing K.S.A. 2018 Supp. 2-3902; effective Feb. 8, 2019.)

4-34-15. Movement of industrial hemp; restrictions on sale or transfer of industrial hemp; compliance with applicable law. (a)

The movement of all industrial hemp plants, plant parts, grain, or seeds into, out of, or within Kansas shall be at the licensee's expense and risk.

(b) A licensee shall not sell or transfer industrial hemp plants, plant parts, grain, or seeds to any individual or business entity outside Kansas who is not authorized by an institution of higher education or a state department of agriculture under 7 U.S.C. 5940, as amended, and the laws of that state. A licensee shall not purchase or receive industrial hemp plants, plant parts, grain, or seeds from an individual or business entity or permit any transfer of industrial hemp plants, plant parts, grain, or seeds to or from any individual or business entity outside Kansas who is not authorized by an institution of higher education or a state department of agriculture under 7 U.S.C. 5940, as amended, and the laws of that state. Each licensee shall ensure that any sale or transfer of industrial hemp plants, plant parts, grain, or seeds is lawful in the state in which the transaction is undertaken.

(c) Each licensee shall comply with all local, state, and federal laws and regulations related to industrial hemp and with the act and the implementing regulations.

(d) Each licensee shall be responsible for any loss or obligation that the licensee incurs as a result of the licensee's involvement in the pilot program. (Authorized by and implementing K.S.A. 2018 Supp. 2-3902; effective Feb. 8, 2019.)

4-34-16. Voluntary withdrawal; voluntary partial destruction. (a) Any licensee may voluntarily withdraw from the pilot program after providing the department with written notice of the intent to do so. Notice shall be provided at least 30 days before the intended withdrawal date, except with prior written approval from the department. If a licensee listed on a primary licensee's research license application withdraws from the pilot program, the primary licensee shall modify each license as specified in K.A.R. 4-34-13.

(b) If a primary licensee voluntarily withdraws from the pilot program, all industrial hemp plants, plant parts, grain, or seeds being cultivated, planted, grown, handled, harvested, conditioned, stored, distributed, transported, or processed pursuant to the licensee's license shall be destroyed and all licenses issued pursuant to the research license application shall be surrendered. Each primary licensee who voluntarily withdraws from the pilot program shall provide the department at least 15 days' notice of the date and time the primary licensee intends to destroy the industrial hemp plants, plant parts, grain, or seeds pursuant to that individual's license and shall notify the department of any change in the destruction date or time.

(c) If a primary licensee notifies the department of the intent to withdraw from the pilot program but fails to destroy all industrial hemp plants, plant parts, grain, or seeds being cultivated, planted, grown, handled, harvested, conditioned, stored, distributed, transported, or processed pursuant to that individual's license within 15 days of the intended destruction date, the license of the primary licensee and each license issued pursuant to the research license application may be revoked and all industrial hemp plants, plant parts, grain, or seeds being cultivated, planted, grown, handled, harvested, conditioned, stored, distributed, transported, or processed as part of the primary licensee's research shall be destroyed at the primary licensee's expense.

(d) Any primary licensee conducting research pursuant to a research grower license may voluntarily destroy any industrial hemp plants being cultivated, planted, or grown in a portion of any research area without withdrawing from the pilot program. Each primary licensee conducting research pursuant to a research grower license who intends to destroy the industrial hemp plants being cultivated, planted, or grown in any research area listed on that individual's license shall provide the department at least 15 days' notice of the date and time of destruction and shall notify the department of any change in the destruction date or time.

(e) Each primary licensee that has been issued a failing report of analysis shall comply with the destruction requirements in K.A.R. 4-34-18 and K.A.R. 4-34-19, as applicable.

(f) Representatives of the department or law enforcement may be present during any destruction of industrial hemp plants, plant parts, grain, or seeds, or proof of the destruction may be required by the department.

(g) Each primary licensee who destroys any industrial hemp plants being cultivated, planted, grown, handled, harvested, conditioned, stored, distributed, transported, or processed pursuant to that individual's license shall, within 15 days after the destruction, notify the department in writing of the number of acres of industrial hemp plants, plant parts, grain, or seeds that were planted in each research area and the number of acres destroyed in each research area.

(h) Upon destruction of any industrial hemp plants, plant parts, grain, or seeds, all volunteer plants shall also be destroyed during the current license year and for at least three years after the last date of planting reported to the department.

(i) Voluntary destruction of industrial hemp plants, plant parts, grain, or seeds shall be performed by a licensee listed on the research license application of the primary licensee and shall be at the primary licensee's expense. If the destruction of industrial hemp plants, plant parts, grain, or seeds occurs, the licensee shall not be eligible for a refund of any fees paid by a primary licensee. (Authorized by and implementing K.S.A. 2018 Supp. 2-3902; effective Feb. 8, 2019.)

4-34-17. Pre-harvest and harvest requirements; harvest certificates. (a) Each primary licensee shall notify the department of

every intended harvest date in a pre-harvest report at least 30 days before each intended harvest date. Each primary licensee shall immediately notify the department regarding a change to any date previously reported to the department if the change to the harvest date is five or more days. Additional sampling and testing may be required by the department as a result of any change to the harvest date of five or more days.

(b) If two or more harvests will be conducted from the same research area within a license year, the primary licensee shall notify the department of each intended harvest date at least 30 days before each intended harvest date. The primary licensee shall pay a subsequent sampling fee and testing fee for each harvest conducted after the initial harvest of a research area.

(c) No more than 15 days before any industrial hemp plants, plant parts, grain, or seeds are cut, picked, collected, or otherwise harvested, each licensee shall allow a sample to be collected by the department for testing as specified in K.A.R. 4-34-18. The initial pre-harvest sample shall not require an additional sampling fee or testing fee.

(d) Before harvesting any industrial hemp plants, plant parts, grain, or seeds, the licensee shall be required to receive a passing report of analysis from the department. After issuance of a passing report of analysis from the department, the licensee shall have 10 days to fully harvest the industrial hemp plants, plant parts, grain, or seeds, unless otherwise authorized in writing by the secretary.

(e) If a licensee fails to fully harvest the industrial hemp plants, plant parts, grain, or seeds within 10 days after issuance of the passing report of analysis, the primary licensee shall perform one of the following:

(1) Notify the department within seven days after the expiration of the 10-day harvest period of the intended second harvest date, request that the department collect a subsequent pre-harvest sample, and pay the required sampling and testing fees; or

(2) notify the department within seven days after the expiration of the 10-day harvest period of the intended date by which the licensee shall destroy the industrial hemp plants, plant parts, grain, or seeds. The primary licensee shall notify the department of any change in the destruction date.

Destruction of industrial hemp plants, plant parts, grain, or seeds shall occur by an individual listed on the primary licensee's research license

application and at the primary licensee's expense. All volunteer plants shall be destroyed during the current license year and for at least three years after the last reported date of planting. If destruction of industrial hemp plants, plant parts, grain, or seeds occurs, no refund shall be issued for any fees paid by a primary licensee.

(f) No more than five days after the harvest of industrial hemp plants, plant parts, grain, or seeds is completed, the primary licensee shall notify the department that the harvest has been completed and request issuance of a harvest certificate. A harvest certificate shall not be issued by the department until the following information is provided for inclusion in the harvest certificate:

(1) The official name of the industrial hemp variety that was cultivated, planted, or grown;

(2) each date on which the licensee harvested the industrial hemp plants, plant parts, grain, or seeds;

(3) the global positioning system coordinates for each research area where the industrial hemp plants, plant parts, grain, or seeds were harvested; and

(4) a statement of intended end-use for all industrial hemp plants, plant parts, grain, or seeds that were harvested. (Authorized by and implementing K.S.A. 2018 Supp. 2-3902; effective Feb. 8, 2019.)

4-34-18. Pre-harvest inspection; sample collection; testing and post-testing actions.

(a) A licensee, whether present or not, shall permit representatives of the department complete, unrestricted, and immediate access to all industrial hemp plants, plant parts, grain, and seeds and all locations, buildings, and motor vehicles listed on the license. Access shall be granted at reasonable times, without interference or obstruction, with or without cause, and with or without advance notice.

(b) Any primary licensee may request collection of a sample from each research area listed on the license. Each sample collected shall be subject to the sampling and testing fees required by K.A.R. 4-34-12.

(c) Based on the results of the testing, one of the following shall apply:

(1) A sample containing a delta-9 tetrahydrocannabinol concentration of 0.3 percent or less on a dry-weight basis shall result in the issuance of a passing report of analysis and shall list each research area from which the sample was taken.

(2) A sample containing a delta-9 tetrahydrocannabinol concentration of higher than 0.3 percent on a dry-weight basis shall result in the issuance of a failing report of analysis and shall list each research area from which the sample was taken.

(A) Within seven days of issuance of a failing report of analysis, the primary licensee may request that the department either collect a subsequent pre-harvest sample or destroy all plants, plant parts, grain, or seeds located in each research area sampled and identified on the failing report of analysis.

(B) A subsequent pre-harvest sample requested by the primary licensee and found to contain a delta-9 tetrahydrocannabinol concentration of higher than 0.3 percent on a dry-weight basis shall result in the issuance of a failing report of analysis. Within seven days of issuance of the failing report of analysis, a licensee listed on the primary licensee's research license application shall destroy all plants, plant parts, grain, or seeds that are located in each research area that was sampled and identified in the failing report of analysis.

(C) If any sample is found to contain a delta-9 tetrahydrocannabinol concentration of higher than 0.3 percent on a dry-weight basis, the testing results and the location of each sampled research area may be referred to the Kansas bureau of investigation and other appropriate law enforcement agencies for further investigation.

(D) If any sample is found to contain a delta-9 tetrahydrocannabinol concentration of 2.0 percent or higher on a dry-weight basis, the testing results and the location of each sampled research area shall be referred to the Kansas bureau of investigation and other appropriate law enforcement agencies for further investigation.

(d) Destruction of industrial hemp plants, plant parts, grain, or seeds shall occur by a licensee listed on the primary licensee's research license application and at the primary licensee's expense. All volunteer plants shall be destroyed during the current license year and for at least three years after the last reported date of planting. Each licensee shall allow representatives of the department or law enforcement to be present during the destruction of industrial hemp plants, plant parts, grain, or seeds, or proof of destruction may be required by the department. If the destruction of industrial hemp plants, plant parts, grain, or seeds is required, the primary licensee shall not be eligible for a refund of any fees paid.

(e) All samples collected by the department shall become the property of the department, and no compensation shall be owed to the licensee. (Authorized by and implementing K.S.A. 2018 Supp. 2-3902; effective Feb. 8, 2019.)

4-34-19. Post-harvest inspection; sample collection; testing and post-testing actions.

(a) Each licensee shall allow the department to inspect and sample industrial hemp plants, plant parts, grain, or seeds any time after the industrial hemp plants, plant parts, grain, or seeds have been harvested. The initial post-harvest sample shall not require an additional sampling fee or testing fee.

(b) A licensee, whether present or not, shall permit representatives of the department complete, unrestricted, and immediate access to all industrial hemp plants, plant parts, grain, and seeds and all locations, buildings, and motor vehicles listed on the license. Access shall be granted at reasonable times, without interference or obstruction, with or without cause, and with or without advance notice.

(c) Any primary licensee may request collection of a sample from each research area listed on the license. Each sample collected shall be subject to the sampling and testing fees required by K.A.R. 4-34-12.

(d) Based on the results of the testing, one of the following shall apply:

(1) A sample containing a delta-9 tetrahydrocannabinol concentration of 0.3 percent or less on a dry-weight basis shall result in the issuance of a passing report of analysis and shall list each research area from which the sample was taken. Each passing report of analysis shall identify the harvest certificate or bill of lading that accompanied the industrial hemp plants, plant parts, grain, or seeds sampled.

(2) A sample containing a delta-9 tetrahydrocannabinol concentration of higher than 0.3 percent on a dry-weight basis shall result in the issuance of a failing report of analysis and shall list each research area from which the sample was taken.

(A) Within seven days of issuance of a failing report of analysis, the primary licensee may request that the department either collect a subsequent post-harvest sample or destroy all plants, plant parts, grain, or seeds located in each research area that was sampled and identified on the failing report of analysis.

(B) A subsequent post-harvest sample requested by the primary licensee and found to contain

a delta-9 tetrahydrocannabinol concentration of higher than 0.3 percent on a dry-weight basis shall result in the issuance of a failing report of analysis. Within seven days of issuance of the failing report of analysis, a licensee listed on the primary licensee's research license application shall destroy all plants, plant parts, grain, or seeds that are located in each research area that was sampled and identified in the failing report of analysis.

(C) If any sample is found to contain a delta-9 tetrahydrocannabinol concentration of higher than 0.3 percent on a dry-weight basis, the testing results and the location of each sampled research area may be referred to the Kansas bureau of investigation and other appropriate law enforcement agencies for further investigation.

(D) If any sample is found to contain a delta-9 tetrahydrocannabinol concentration of 2.0 percent or higher on a dry-weight basis, the testing results and the location of each sampled research area shall be referred to the Kansas bureau of investigation and other appropriate law enforcement agencies for further investigation.

(e) After the collection of a sample, no licensee shall handle, condition, distribute, transport, or process the sampled industrial hemp plants, plant parts, grain, or seeds until the primary licensee is issued a passing report of analysis. The sampled industrial hemp plants, plant parts, grain, or seeds shall not be processed, exchanged for value, or otherwise allowed to come into the possession of anyone other than a licensee listed on the primary licensee's research license application until a passing report of analysis is issued.

(f) Destruction of industrial hemp plants, plant parts, grain, or seeds shall occur by a licensee listed on the primary licensee's research license application at the primary licensee's expense. All volunteer plants shall be destroyed during the current license year and for at least three years after the last reported date of planting. Each licensee shall allow representatives of the department or law enforcement to be present during the destruction of industrial hemp plants, plant parts, grain, or seeds, or proof of the destruction may be required by the department. If the destruction of industrial hemp plants, plant parts, grain, or seeds occurs, the primary licensee shall not be eligible for a refund of any fees paid.

(g) All samples collected by the department shall become the property of the department, and no compensation shall be owed to the licensee. (Authorized by and implementing K.S.A. 2018 Supp. 2-3902; effective Feb. 8, 2019.)

4-34-20. Reports. (a) Each report required by the department shall be submitted on a form provided by the department. Each licensee shall submit the complete, accurate, and legible reports on or before the date required.

(b) A primary licensee on a research grower license shall submit a field planting report to the department within 15 days after every planting, including replanting seeds or propagules or establishing plants. Each field planting report shall identify the following for each research area:

(1) The official name of the industrial hemp variety that was cultivated, planted, or grown;

(2) the global positioning system coordinates for each research area where industrial hemp plants, plant parts, grain, or seeds are being cultivated, planted, or grown; and

(3) a statement of intended end-use for all industrial hemp plants, plant parts, grain, or seeds being cultivated, planted, or grown in each research area.

(c) Each primary licensee on a research grower license shall submit a voluntary withdrawal report if either of the following conditions is met:

(1) Industrial hemp plants, plant parts, grain, or seeds are not cultivated, planted, or grown in a research area. The report shall be due no later than June 1.

(2) Industrial hemp plants being grown in a portion of any research area are voluntarily destroyed as specified in K.A.R. 4-34-16. The report shall be due no later than 15 days after the industrial hemp plants are destroyed.

(d) Each primary licensee on a research grower license shall submit a pre-harvest report to the department at least 30 days before every intended harvest date, for each licensed research section. The pre-harvest report shall include the following:

(1) The number of acres planted in each research area;

(2) the intended harvest date for each research area; and

(3) a statement of intended end-use for all industrial hemp plants, plant parts, grain, or seeds that will be harvested from each research area.

(e) Each primary licensee on a research grower license shall submit a production report to the department within 30 days after the last harvest date for every harvest. Each production report shall include the following, at a minimum:

(1) The amount of industrial hemp plants, plant parts, grain, or seeds harvested from each research area, which shall be provided as follows:

(A) If the industrial hemp crop was cultivated, planted, or grown for the production of fiber, the number of bales and the size and shape of the bales;

(B) if the industrial hemp crop was cultivated, planted, or grown for the production of grain or seed, the quantity by weight;

(C) if the industrial hemp crop was cultivated, planted, or grown for the production of floral material, the quantity by weight; and

(D) if the industrial hemp crop was cultivated, planted, or grown for the production of more than one end-use, the information for each end-use as required by this regulation;

(2) the name, address, and, if applicable, the license number of the primary licensee on the research distributor license or an out-of-state individual or business entity that is authorized by an institution of higher education or a state department of agriculture under 7 U.S.C. 5940, as amended, and the laws of the state that transported any industrial hemp plants, plant parts, grain, or seeds that were harvested; and

(3) the name, address, and, if applicable, the license number of the primary licensee on the research processor license or an out-of-state individual or business entity that is authorized by an institution of higher education or a state department of agriculture under 7 U.S.C. 5940, as amended, and the laws of the state that received the industrial hemp plants, plant parts, or grain for processing.

(f) Each primary licensee on a research distributor license shall annually submit a completed distribution report to the department no later than November 30. Each distribution report shall include the following, at a minimum:

(1) The amount of industrial hemp plants, plant parts, grain, or seeds distributed in each load, which shall be provided as follows:

(A) If the industrial hemp crop was cultivated, planted, or grown for the production of fiber and was distributed, the number of bales and the size and shape of the bales;

(B) if the industrial hemp crop was cultivated, planted, or grown for the production of grain or seed and was distributed, the quantity by weight;

(C) if the industrial hemp crop was cultivated, planted, or grown for the production of floral material and was distributed, the quantity by weight; and

(D) if the industrial hemp crop was cultivated, planted, or grown for the production of more than one end-use and was distributed, the information for each end-use as required by this regulation;

(2) the name, address, and, if applicable, the license number of the primary licensee on the research grower license or an out-of-state individual or business entity that is authorized by an institution of higher education or a state department of agriculture under 7 U.S.C. 5940, as amended, and the laws of the state that cultivated, planted, grew, handled, harvested, conditioned, stored, distributed, or transported any industrial hemp plants, plant parts, grain, or seeds that the licensee distributed or transported;

(3) the name, address, and, if applicable, the license number of the primary licensee on the research processor license or an out-of-state individual or business entity that is authorized by an institution of higher education or a state department of agriculture under 7 U.S.C. 5940, as amended, and the laws of the state that processed each load of industrial hemp plants, plant parts, or grain that the licensee distributed or transported; and

(4) the amount of industrial hemp plants, plant parts, grain, or seeds that was sold during the current license year.

(g) Each primary licensee on a research processor license shall annually submit a completed processing report no later than November 30. Each processing report shall include the following, at a minimum:

(1) The amount of industrial hemp plants, plant parts, or grain processed by the licensee, which shall be provided as follows:

(A) If the industrial hemp crop was cultivated, planted, or grown for the production of fiber and was processed, the number of bales and the size and shape of the bales;

(B) if the industrial hemp crop was cultivated, planted, or grown for the production of grain or seed and was processed, the quantity by weight;

(C) if the industrial hemp crop was cultivated, planted, or grown for the production of floral material and was processed, the quantity by weight; and

(D) if the industrial hemp crop was cultivated, planted, or grown for the production of more than one end-use and was processed, the information for each end-use as required by this regulation;

(2) the name, address, and, if applicable, the license number of the primary licensee on the research grower license or an out-of-state individual or business entity that is authorized by an institution of higher education or a state department of agriculture under 7 U.S.C. 5940, as amended, and the laws of the state that cultivated, planted, grew, handled, harvested, conditioned, stored, distribut-

ed, or transported any industrial hemp plants, plant parts, or grain that the licensee processed; and

(3) the name, address, and, if applicable, the license number of the primary licensee on the research distributor license or an out-of-state individual or business entity that is authorized by an institution of higher education or a state department of agriculture under 7 U.S.C. 5940, as amended, and the laws of the state that distributed or transported any of industrial hemp plants, plant parts, or grain that the licensee processed.

(h) On and after January 1, 2019, each primary licensee shall prepare and submit a research report to the department no later than November 30 each year. Each research report shall include the following, at a minimum:

- (1) A summary of the research conducted;
- (2) a description of the methods and materials used in conducting the research;
- (3) the results of the research; and
- (4) an analysis of the results.

(i) All research conducted and all reports submitted to the department as part of the pilot program shall become the property of the department, and no compensation shall be due from the department to any licensee. (Authorized by and implementing K.S.A. 2018 Supp. 2-3902; effective Feb. 8, 2019.)

4-34-21. Violations; disciplinary sanctions. (a) Each of the following acts and omissions shall constitute a violation for which disciplinary sanctions, including revocation of any license and denial of future applications, may be imposed by the department:

(1) Failure to cooperate with the department and law enforcement agencies in administration and enforcement of the act, and amendments thereto, and the implementing regulations;

(2) failure to provide any information relating to the administration of the pilot program that the department requests;

(3) providing false, misleading, or incorrect information relating to the licensee's participation in the pilot program to the department;

(4) failure to submit any forms or reports as required;

(5) cultivating, planting, growing, or otherwise possessing plants of the genus *cannabis* with a delta-9 tetrahydrocannabinol concentration greater than 0.3 percent on a dry-weight basis;

(6) failure to pay any fees assessed by the department;

(7) submitting a pre-harvest report or destruction report and harvesting or destroying industrial hemp plants, plant parts, grain, or seeds before sampling by the department;

(8) harvesting any industrial hemp plants, plant parts, grain, seeds without being issued a passing report of analysis;

(9) failure to destroy any industrial hemp plants, plant parts, grain, seeds, volunteer plants, or plants of the genus *cannabis* with a delta-9 tetrahydrocannabinol concentration greater than 0.3 percent on a dry-weight basis as required by this article of the department's regulations;

(10) harvesting any industrial hemp plants, plant parts, grain, or seeds after being issued a failing report of analysis; and

(11) any other violation of the act, and amendments thereto, or the implementing regulations.

(b) If a licensee cultivates, plants, grows, handles, harvests, conditions, stores, distributes, transports, or processes any industrial hemp plants, plant parts, grain, or seeds as part of the pilot program at any location not listed on the license, the industrial hemp plants, plant parts, grain, or seeds at that location shall be destroyed by any licensee that received a license issued pursuant to the primary licensee's research license application. The destruction shall be at the primary licensee's expense, and any license may be revoked.

(c)(1) Each licensee whose license is revoked shall destroy any industrial hemp plants, plant parts, grain, or seeds in that individual's possession at that individual's own expense, no more than 15 business days after the department directs the individual to do so. The licensee shall not be eligible to reapply or otherwise participate in the pilot program for at least five years from the date of revocation. If a primary licensee's research license is revoked, all industrial hemp plants, plant parts, grain, or seeds that are subject to the primary licensee's license shall be destroyed by a licensee listed on the research license application and at the primary licensee's expense.

(2) Each licensee that will destroy industrial hemp plants, plant parts, grain, or seeds pursuant to paragraph (c)(1) shall notify the department of the date and time of destruction within five days of issuance of the notification that destruction is required. Each licensee shall notify the department of any change in the destruction date or time. Additional sampling and testing may be required by the department for a change of five or more days. Representatives of the department or

law enforcement may be present during the destruction, or proof of the destruction may be required by the department.

(3) All volunteer plants shall be destroyed during the current license year and for at least three years after the last reported date of planting.

(4) No refund shall be issued for any fees paid by the primary licensee.

(d) If a licensee violates any provision of the act, and amendments thereto, or the implementing regulations, any license may be revoked, in whole or in part, by the secretary, as deemed appropriate.

(e) Any prior violations of the act, and amendments thereto, the implementing regulations or previous revocations of a license may be considered when reviewing new research license applications. (Authorized by and implementing K.S.A. 2018 Supp. 2-3902; effective Feb. 8, 2019.)

4-34-22. License required to cultivate or produce industrial hemp for commercial purposes. (a) K.A.R. 4-34-22 through 4-34-30 shall apply only to the commercial production of industrial hemp pursuant to K.S.A. 2-3901 et seq., and amendments thereto, and, unless otherwise stated, shall not apply to research conducted as part of the pilot program pursuant to K.S.A. 2-3902, and amendments thereto, and regulated by K.A.R. 4-34-2 through 4-34-21.

(b) No individual may cultivate or produce industrial hemp for commercial purposes without a license issued by the secretary. A license shall not be required for employees, agents, contractors, or volunteers of a licensee.

(c) Only individuals shall be eligible to apply for licenses to cultivate or produce industrial hemp.

(d) Each individual who applies for a license to cultivate or produce industrial hemp shall be required to submit to a fingerprint-based state and national criminal history record check to verify that the individual has not been convicted of a felony violation of K.S.A. 2019 Supp. 21-5701 et seq., and amendments thereto, or a substantially similar offense in another jurisdiction, within the 10 years immediately preceding submission of that individual's application.

(e)(1) Each individual submitting a license application shall submit the application on a form provided by the secretary, which shall include the following:

(A) The individual's full legal name and date of birth;

(B) the individual's current mailing address, telephone number, and electronic-mail address;

(C) the legal description and global positioning system coordinates of the entrance to the proposed licensed growing area and the entrance to each lot that will be used to cultivate or produce industrial hemp and a map of the proposed licensed growing area and each lot;

(D) the total number of acres or square feet that will be used to cultivate or produce industrial hemp;

(E) the number of acres or square feet that will be used to cultivate or produce industrial hemp in each lot;

(F) the variety of industrial hemp to be cultivated or produced in each lot;

(G) a completed fingerprint card for submission to the Kansas bureau of investigation; and

(H) any other relevant information requested by the secretary.

(2) Each individual submitting a license application shall include with the application a \$100 application fee and the fee established by the Kansas bureau of investigation for performing a state and national criminal history record check. A single criminal history record check conducted in accordance with the act may be used to satisfy the act's criminal history record check requirement for multiple licenses in a single license year.

(f) All license applications shall be submitted no later than March 15 of each year in which an applicant intends to grow industrial hemp. Any individual who submits a license application after March 15, 2020 may be granted a license if good cause is shown and the secretary determines that granting the license is necessary to assist with the transition from the pilot program to the commercial industrial hemp program during 2020.

(g) Each license shall allow the cultivation and production of industrial hemp within one licensed growing area.

(h) Upon approval of a license application by the secretary, the applicant shall submit a license fee of \$1,200 to the secretary within 15 days of notice of the approval.

(i) All licenses shall expire annually on December 31.

(j) In addition to providing the department with the information required by this regulation, each individual who is issued a license shall report the following directly to the United States department of agriculture farm service agency for each license:

(1) The street address and, to the extent practicable, the global positioning system coordinates for each growing area and for each lot or greenhouse where industrial hemp will be produced;

(2) the number of acres that will be used to cultivate or produce industrial hemp;

(3) the assigned license number; and

(4) any other information required by the United States department of agriculture.

(k) Acceptance of a license shall constitute a grant of authority by each licensee allowing the secretary to supply information to the United States department of agriculture and post information on the department's web site, including the industrial hemp producer license number, the full legal name of the licensee, the licensee's contact information, descriptions of all locations identified for cultivating or producing industrial hemp, and any information related to modifications to ensure that the information remains accurate.

(l) Each licensee shall be held responsible for any plant cultivated or produced in violation of the act and for the actions of all employees, agents, contractors, and volunteers engaged in the cultivation or production of industrial hemp under the supervision or direction of, or otherwise in conjunction with, the licensee. Each licensee shall be subject to the same disciplinary actions for a violation of the act committed by any employee, agent, contractor, or volunteer of that licensee as if the licensee had committed the violation.

(m) Each licensee requesting a license modification after issuance of a license shall submit the modification request to the secretary on a form provided by the secretary. Each modification request form shall be accompanied by a \$50 fee. Upon the secretary's review and approval of the modification request, a modified license shall be issued and may include any additional terms and conditions that the secretary deems necessary to implement the requested modification and to protect the public health, safety, and welfare. If the secretary denies the modification request, the licensee shall remain subject to the terms of the original license.

(n) Each license shall be nontransferable, unless the secretary determines that a transfer is necessary because the licensee dies or becomes disabled or because an individual who is an employee or agent of a bank, financial institution, or other creditor that has a legal right to take possession of industrial hemp for the purposes of settling a debt is required to obtain a license to do so. A

license that is transferable may be transferred to the individual requesting the transfer upon that individual's submission of a modification request, a \$50 modification fee, the fee established by the Kansas bureau of investigation for performing a state and national criminal history record check, and satisfactory completion of a fingerprint-based state and national criminal history record check. A modification request shall be submitted within 60 days of the licensee's death or within 60 days of the date that the right of the bank, financial institution, or other creditor to take possession of the industrial hemp arises. If a modification request is not submitted within the time frame required by this regulation, all industrial hemp being cultivated or produced pursuant to the license shall be subject to an order to be destroyed. The individual applying for the transfer shall assume the full liability for all of the previous licensee's actions related to the cultivation or production of hemp.

(o) Each individual who materially falsifies any information in a license application or modification request shall be ineligible to receive a license to cultivate or produce industrial hemp pursuant to the act. (Authorized by K.S.A. 2019 Supp. 2-3906; implementing K.S.A. 2019 Supp. 2-3903 and 2-3906; effective Jan. 8, 2021.)

4-34-23. Planting and pre-harvest requirements. (a) All industrial hemp cultivated or produced shall have originated from authorized seed or clone plants.

(b) Each licensee shall maintain written certification for all authorized seed or clone plants cultivated or produced, which shall consist of either of the following:

(1) A certificate of analysis, or a similar document, stating that the source of the authorized seed or clone plants was cultivated or produced with a delta-9 tetrahydrocannabinol concentration less than 0.3 percent on a dry-weight basis during the most recent growing season; or

(2) documentation that the authorized seed or clone plants are certified pursuant to K.S.A. 2-1415 et seq., and amendments thereto.

(c) All industrial hemp seed shall be considered agricultural seed. Before selling agricultural seed in Kansas, each individual shall obtain a license pursuant to K.S.A. 2-1415 et seq., and amendments thereto.

(d) Each licensee shall submit a planting report to the department within 15 days after each planting, including replanting seeds or propagules

or establishing plants. Each planting report shall identify the following:

(1) The official name of the industrial hemp variety that was cultivated or produced in each lot;

(2) the global positioning system coordinates for the licensed growing area and each lot where industrial hemp plants, plant parts, grain, or seeds are being cultivated or produced;

(3) the total number of acres planted in the licensed growing area;

(4) the number of acres planted in each lot; and

(5) a statement of the intended end-use for all industrial hemp plants, plant parts, grain, or seeds being cultivated or produced.

(e) Before harvesting industrial hemp, each licensee shall provide the secretary at least 30 days' notice of the intended harvest date on a form provided by the secretary and, if the harvest does not begin on that date, shall provide an updated notice of the anticipated harvest date before harvesting any industrial hemp. Failure to provide notice of the harvest may result in the revocation of an existing hemp producer license and the denial of future hemp producer licenses. Each pre-harvest report shall identify the following:

(1) The global positioning system coordinates of the entrance to the licensed growing area and each lot where industrial hemp plants are intended for harvest;

(2) the total number of acres planted in the licensed growing area subject to harvest;

(3) the number of acres planted in each lot subject to harvest;

(4) the planting date for each lot;

(5) the total number of acres intended for harvest in the licensed growing area, if different from the number of acres intended for harvest in the lot;

(6) the number of acres intended for harvest in each lot;

(7) the intended harvest date for each lot;

(8) the official name of the industrial hemp variety that is intended for harvest from each lot; and

(9) a statement of the intended end-use for all industrial hemp plants, plant parts, grain, or seeds that will be harvested from each lot.

(f) If two or more harvests will be conducted within a licensed growing area or lot within a license year, the licensee shall notify the department of each intended harvest date at least 30 days before the intended harvest date. The primary licensee shall pay the subsequent sampling fees and testing fees for each harvest conducted after the initial harvest of a lot.

(g) Each licensee shall maintain records regarding the source of all industrial hemp cultivated or produced and records regarding the disposition of all industrial hemp cultivated or produced for three years and shall present those records to the secretary upon request. (Authorized by and implementing K.S.A. 2019 Supp. 2-3906; effective Jan. 8, 2021.)

4-34-24. Sampling, testing, and harvest requirements.

(a) No more than 30 days before any industrial hemp cultivated or produced pursuant to the act is harvested, each licensee shall allow a sample to be collected by the secretary for testing, using post-decarboxylation or any other similarly reliable method, to determine the delta-9 tetrahydrocannabinol concentration of industrial hemp cultivated or produced. A licensee shall not harvest any industrial hemp before receiving notice that testing of the samples has shown a delta-9 tetrahydrocannabinol concentration of less than 0.3 percent on a dry-weight basis and that the licensee may harvest the industrial hemp.

(b) Each licensee shall complete each harvest of industrial hemp plants, plant parts, grain, or seeds within 30 days of sampling.

(c) If a licensee fails to harvest all of the industrial hemp plants, plant parts, grain, or seeds within the time frame specified in subsection (b), the licensee shall perform one of the following:

(1) Notify the department that harvest has not occurred within seven days after the expiration of the time frame specified in subsection (b), request that the department collect a subsequent pre-harvest sample, and pay the required sampling and testing fees; or

(2) notify the department that harvest has not occurred within seven days after the expiration of the time frame specified in subsection (b) and inform the department of the date by which the licensee intends to effectively dispose of the industrial hemp plants, plant parts, grain, or seeds. The licensee shall conduct effective disposal no more than seven days after the licensee informs the department that harvest has not occurred and shall notify the department of any change in the effective disposal date. Effective disposal of industrial hemp plants, plant parts, grain, or seeds shall occur by the licensee and at the licensee's expense. All volunteer plants within and adjacent to the licensed growing area shall be effectively disposed of during the current license year and for at least three years after the

last reported date of planting. If effective disposal of industrial hemp plants, plant parts, grain, or seeds occurs, no refund shall be issued for any fees paid by a licensee, the cost of effective disposal, or the value of the crop.

(d) Each licensee shall submit a harvest report to the department no more than 15 days after each harvest of industrial hemp plants, plant parts, grain, or seeds is completed for each lot. Each harvest report shall identify the following:

(1) The global positioning system coordinates of the entrance to the licensed growing area and each lot where industrial hemp plants were harvested;

(2) the total number of acres planted in the licensed growing area;

(3) the number of acres planted in each lot;

(4) the planting date for each lot;

(5) the total number of acres harvested from the licensed growing area;

(6) the number of acres harvested from each lot;

(7) the harvest date for each lot;

(8) the official name of the industrial hemp variety harvested from each lot; and

(9) a statement of intended end-use for all industrial hemp plants, plant parts, grain, or seeds harvested from each lot.

(e) Industrial hemp shall be subject to post-harvest sampling and testing by the secretary. Each licensee shall agree to provide the secretary access to any harvested industrial hemp or to provide the secretary with a copy of the bill of lading and, if available, a certificate of analysis or similar document provided for any industrial hemp already sold or transferred to another person. All samples collected by the secretary shall be subject to testing, using post-decarboxylation or any other similarly reliable method, of delta-9 tetrahydrocannabinol concentration of industrial hemp produced. A licensee whose industrial hemp is sampled after it is harvested shall not sell, transfer, or transport any industrial hemp harvested from the licensed growing area where samples were collected until that licensee has received notice from the department that testing of the samples has shown a delta-9 tetrahydrocannabinol content of less than 0.3 percent on a dry-weight basis.

(f) Each licensee shall be assessed a \$225 fee for the required pre-harvest sample collected and tested by the secretary.

(g) At any time other than at the time of the required pre-harvest sample collected and tested by the secretary, a licensee may request that

the secretary collect a sample and test the delta-9 tetrahydrocannabinol concentration, subject to a testing fee of \$225 for each test and additional costs assessed for the secretary's travel time and mileage.

(h) All samples collected by the secretary shall become the property of the secretary, and no compensation shall be owed to any licensee.

(i) Any licensee may request a test from a private laboratory at any time. However, test results from private laboratories shall not be considered official and shall not be substituted for a sample collected and tested by the secretary, and each licensee shall be responsible for the costs of testing by a private laboratory.

(j) Each sample collected and tested by the secretary and found to contain a delta-9 tetrahydrocannabinol concentration greater than 0.3 percent on a dry-weight basis shall result in the hemp being classified as cultivated or produced in violation of the act and shall result in the issuance of a failing report of analysis. Hemp that receives a failing report of analysis may be eligible to be remediated pursuant to K.A.R. 4-34-25.

(k) Within seven days of notice of the failing report of analysis, any licensee may request, on a form provided by the secretary, an additional test by the secretary. The request shall include payment of a retesting fee of \$225 and any additional costs assessed for the secretary's travel time and mileage. If a licensee requests an additional test and the sample collected and tested pursuant to this subsection is found to contain a delta-9 tetrahydrocannabinol concentration greater than 0.3 percent on a dry-weight basis, then all plants in the licensed growing area shall be effectively disposed of as required by K.A.R. 4-34-25 or, if eligible, remediated pursuant to K.A.R. 4-34-25.

(l) For each licensee who is issued an order to effectively dispose of plants, one of the following requirements shall apply:

(1) The licensee shall be subject to a corrective action plan as specified in K.A.R. 4-34-29 and reported to the appropriate state or local law enforcement agency if the violation is deemed negligent.

(2) The licensee shall be reported to the United States department of agriculture, the office of the Kansas attorney general, the office of the United States attorney for the district of Kansas, and the appropriate state or local law enforcement agency if the violation is the result of a culpable mental state greater than negligence. If any plants are tested by the secretary and found to contain a delta-9

tetrahydrocannabinol concentration of greater than 2.0 percent, the licensee responsible for those plants shall be presumed to have acted with a culpable mental state greater than negligence.

(m) Except as provided in K.A.R. 4-34-28, each licensee or an authorized representative of each licensee shall be present whenever the secretary collects a sample of industrial hemp cultivated or produced pursuant to the act and whenever a compliance inspection is conducted pursuant to this regulation. (Authorized by K.S.A. 2020 Supp. 2-3906; implementing K.S.A. 2020 Supp. 2-3903, as amended by L. 2021, ch. 76, sec. 4, and 2-3906; effective Jan. 8, 2021; amended, T-4-8-25-21, Aug. 25, 2021; amended Dec. 17, 2021.)

4-34-25. Remediation; effective disposal; violations. (a) All hemp that is deemed to be in violation of the act for any reason or that contains a delta-9 tetrahydrocannabinol concentration greater than 0.3 percent on a dry-weight basis shall, by order of the secretary, be subject to effective disposal or remediation.

(b) Remediation shall not be allowed for any hemp for which the secretary has not approved a remediation plan. Hemp for which remediation is not allowed shall be effectively disposed of as specified in this regulation.

(c) Remediation shall include any method approved by the United States department of agriculture and may include either of the following:

(1) Separating and removing all flowers and floral materials from the stalks, leaves, and seeds of all plants or plant parts, which may include removal by hand or mechanical removal; or

(2) shredding the entirety of all plants or plant parts into hemp biomass, which may be accomplished with shredders, composters, specialty mechanical equipment, or similar means.

(d) Seeds removed from hemp plants or contained in hemp biomass as a result of remediation shall not be used for propagation purposes.

(e) Each remediation plan or request to submit a remediation plan shall be submitted to the secretary before the expiration of the 10-day period following the licensee's receipt of notice that effective disposal is required as specified in subsection (q).

(f) Each remediation plan submitted to the secretary pursuant to this regulation shall include the following, at a minimum:

- (1) The date that remediation will begin;
- (2) the approximate date that remediation will be completed;

(3) the total number of acres that will be remediated;

(4) the intended end-use of all plants or plant parts to be remediated;

(5) the location where each plant or plant part will be stored before and after remediation and the location where remediated material will be stored following remediation;

(6) the method or methods of remediation intended to be used; and

(7) any other information that is relevant to the circumstances surrounding the cultivation or production of the hemp proposed to be remediated or the intended remediation plan and that the secretary requests.

(g) Any remediation plan that does not contain all required information may be denied or returned to the licensee. Any remediation plan may be denied at the discretion of the secretary, based on the circumstances surrounding the cultivation or production of the hemp proposed to be remediated.

(h) Hemp for which a failing report of analysis is issued may be remediated by the licensee upon the secretary's approval of the remediation plan submitted by the licensee, if the most recent sampling and testing conducted showed the hemp to have a delta-9 tetrahydrocannabinol concentration of 1.0 percent or less on a dry-weight basis.

(i) Any licensee may request permission from the secretary to submit a remediation plan for any hemp for which a failing report of analysis is issued if the most recent sampling and testing conducted showed the hemp to have a delta-9 tetrahydrocannabinol concentration greater than 1.0 percent but not greater than 2.0 percent on a dry-weight basis. If the secretary agrees to review a remediation plan based upon the circumstances surrounding the production or cultivation of the hemp, then the industrial hemp may be remediated upon approval of the plan submitted by the licensee.

(j) Each licensee who conducts remediation of any hemp shall allow representatives of the secretary to be present during the remediation. Proof of remediation may be required to be provided to the secretary.

(k) All plant material that is undergoing remediation shall be clearly labeled to indicate that the plant material is remediated hemp biomass and to verify the source of all of the hemp that comprises the remediated material. Remediated hemp biomass shall require a bill of lading pursuant to K.A.R. 4-34-26, which shall identify the materi-

al as remediated hemp biomass and identify the source of all material used in the remediation.

(l) All plant material resulting from remediation shall be subject to postremediation sampling and testing and shall be required to be effectively disposed of as specified in this regulation and prohibited from entering commerce if the final postremediation testing performed shows the plant material to have a delta-9 tetrahydrocannabinol concentration of greater than 0.3 percent on a dry-weight basis.

(m) Remediation may be conducted as many times as is necessary to achieve a delta-9 tetrahydrocannabinol concentration of 0.3 percent or less on a dry-weight basis. However, all hemp biomass that is not successfully remediated so as to have a delta-9 tetrahydrocannabinol concentration of 0.3 percent or less on a dry-weight basis within 60 days of the issuance of the final failing report of analysis for any hemp that comprises the remediated hemp biomass shall be effectively disposed of as specified in this regulation.

(n) Hemp for which a failing report of analysis is issued and for which the most recent testing conducted shows a delta-9 tetrahydrocannabinol concentration greater than 2.0 percent on a dry-weight basis shall not be eligible for remediation and shall be required to be effectively disposed of as provided in this regulation.

(o) Acceptable methods of effective disposal shall include plowing under, mulching or composting, disking, mowing or chopping, deep burial, burning, or any other method allowed under federal law and approved by the secretary.

(p) If required pursuant to federal law, all hemp that requires effective disposal shall be destroyed or disposed of as required by the controlled substances act, 21 U.S.C. 801 et seq., and in compliance with requirements of the United States drug enforcement agency.

(q) If allowed pursuant to federal law, each licensee shall conduct effective disposal at the licensee's expense within 10 days of receiving notice that effective disposal is required. Each licensee shall effectively dispose of all volunteer plants within and adjacent to the licensed growing area during the current license year and for at least three years after the last reported date of planting. Each licensee shall allow representatives of the secretary to be present during the effective disposal of plants or plant parts, or proof of the effective disposal may be required by the secretary. Each licensee who conducts effective dispos-

al shall, within 14 days of conducting the effective disposal, report the number of acres effectively disposed of to the department. A licensee who conducts effective disposal shall not be eligible for a refund of any fees paid, the cost of effective disposal, or the value of the crop.

(r) Each licensee whose plants are effectively disposed of shall be responsible for reimbursing any law enforcement agency whose officers or agents are required to participate in or be present during the effective disposal for all of the law enforcement agency's costs associated with the effective disposal.

(s) Failure of a licensee to conduct effective disposal as required by the secretary within 10 days of receiving notice that effective disposal is required shall result in the secretary's conducting effective disposal at the expense of the licensee, unless an extension is granted by the secretary.

(t) A licensee's failure to conduct effective disposal as required by the secretary, failure to reimburse the secretary for any costs incurred as a result of the secretary's conducting effective disposal, or failure to reimburse any law enforcement agency for any costs associated with effective disposal shall be grounds for denial of any future hemp producer license application.

(u) Each licensee who violates the act with a culpable mental state of negligence shall be subject to a corrective action plan as specified in K.A.R. 4-34-29 and reported to the appropriate state or local law enforcement agency. Each licensee who violates the act with a culpable mental state greater than negligence shall be reported to the United States attorney's office and the Kansas attorney general's office, in addition to the appropriate state or local law enforcement agency. (Authorized by and implementing K.S.A. 2020 Supp. 2-3906; effective Jan. 8, 2021; amended, T-4-8-25-21, Aug. 25, 2021; amended Dec. 17, 2021.)

4-34-26. Transportation of industrial hemp.

(a) Each licensee who sells, trades, barbers, gives away, or otherwise transfers any unprocessed industrial hemp to any other person shall ensure that the unprocessed industrial hemp is accompanied by a signed bill of lading that includes the licensee's license number, the total quantity of industrial hemp transferred, the date the transfer occurred, and the name of the person acquiring the industrial hemp. A certificate of analysis or other similar document shall be attached to the bill of lading.

(b) Each person who sells, trades, barter, gives away, or otherwise transfers unprocessed industrial hemp subsequent to an initial transfer involving unprocessed industrial hemp as specified in subsection (a) shall record the transfer and shall amend the bill of lading or attach the information regarding the subsequent transfer to the original bill of lading and shall include the name of the person acquiring possession of the industrial hemp, the amount of industrial hemp transferred, and the date of the transfer. Any individual in possession of unprocessed industrial hemp plants, plant parts, grain, or seeds without a valid hemp producer's license or a bill of lading may be presumed to have unlawfully cultivated or produced hemp in violation of the act or gained possession of industrial hemp plants, plant parts, grain, or seeds that were cultivated or produced in violation of the act.

(c) Each licensee shall comply with all local, state, and federal laws and regulations related to the transportation of industrial hemp and with the act. (Authorized by and implementing K.S.A. 2019 Supp. 2-3906; effective Jan. 8, 2021.)

4-34-27. Planting restrictions; signage requirements; volunteer plants. (a) A licensee shall not cultivate, plant, grow, or harvest industrial hemp plants, plant parts, grain, or seeds at any location not included on the license.

(b) A licensee shall not cultivate, plant, grow, or harvest industrial hemp plants, plant parts, grain, or seeds in a residential structure, within 50 feet of a residential structure, or within one-quarter mile of any public or private K-12 school or public recreational area, except with the secretary's written permission.

(c) A licensee shall not interplant any other crop with industrial hemp, except that any state educational institution licensee may do so upon authorization by the secretary. This subsection shall not prohibit the use of ground cover, but ground cover shall not be harvested.

(d) A licensee shall not interplant different varieties of industrial hemp within a lot.

(e) Harvested lots of industrial hemp plants shall not be commingled with other harvested lots or other material.

(f) Each licensee shall post and maintain at least one sign at each licensed growing area listed on the license. A sign shall be posted along each licensed growing area boundary adjacent to a public road, except that if the licensed growing area is

adjacent to an intersection of two or more public roads, a sign shall be posted at the intersection. If a licensed growing area is not adjacent to any public road, a sign shall be posted at the point of access to the licensed growing area. Each sign shall measure at least 36 inches per side, shall be clearly visible and legible from the adjacent public road, intersection of public roads, or access point, and shall include the following information:

(1) The following text: "Kansas Department of Agriculture Industrial Hemp Program";

(2) the licensee's name;

(3) the licensee's license number; and

(4) the department's telephone number.

(g) Each licensee shall allow the secretary to inspect, for volunteer plants, ditches, fence lines, or other unmanaged land areas adjacent to any licensed growing area. Each licensee shall destroy any volunteer plants for at least three years after the last date of planting. (Authorized by and implementing K.S.A. 2019 Supp. 2-3906; effective Jan. 8, 2021.)

4-34-28. Access to records and property.

(a) Acceptance of a license shall constitute a grant of authority by each licensee allowing the secretary to inspect all records related to the cultivation or production of industrial hemp.

(b) Each licensee shall grant the secretary access to all land identified for the cultivation or production of industrial hemp for purposes of inspection to determine compliance with the act and the implementing regulations. In addition to pre-harvest sampling and testing of all industrial hemp plants being cultivated or produced pursuant to the act as specified in K.A.R. 4-34-24, in accordance with federal law, each licensee's premises and records related to the cultivation or production of industrial hemp shall be subject to annual inspection to ensure compliance with the act and the implementing regulations.

(c) Each licensee shall consent to the secretary's providing information to the United States department of agriculture, law enforcement, fire and rescue agencies, and the public regarding each licensed growing area. Additionally, each licensee shall consent to the secretary's providing information about any licensed growing area, including global positioning system coordinates, to representatives of the United States department of agriculture, Kansas bureau of investigation, United States drug enforcement agency, and other law enforcement agencies.

(d) Each licensed growing area and all adjacent areas shall be subject to inspection by the secretary. The secretary shall have complete, unrestricted, and immediate access to all industrial hemp plants, plant parts, grain, and seeds, whether growing or not, including access to all land, buildings, facilities, motor vehicles, and other structures used for industrial hemp-related activities. Access shall be granted at reasonable times, without interference or obstruction, with or without cause, and with or without advance notice. The secretary's right of access specified in this regulation shall include the unrestricted right to inspect or take samples of any industrial hemp plants, plant parts, grain, or seeds, whether growing or not, present at the location being accessed, as well as the right to inspect any reports or records pertaining to industrial hemp plants, plant parts, grain, or seeds. (Authorized by and implementing K.S.A. 2019 Supp. 2-3906; effective Jan. 8, 2021.)

4-34-29. Negligent violations; corrective action plans. (a) Negligent violations of the act may include failure to provide a legal description of land on which a licensee produces industrial hemp, producing plants with a delta-9 tetrahydrocannabinol concentration greater than 1.0 percent on a dry-weight basis, or producing plants with a delta-9 tetrahydrocannabinol concentration greater than 0.3 percent on a dry-weight basis if the licensee did not make reasonable efforts to cultivate or produce industrial hemp. It shall not be a negligent violation of the act if a licensee produces plants with a delta-9 tetrahydrocannabinol concentration of 1.0 percent or less on a dry-weight basis and the licensee has made reasonable efforts to cultivate or produce industrial hemp. Each licensee who negligently violates the act or the implementing regulations shall be required to follow a corrective action plan developed by the secretary.

(b) Upon the first negligent violation, each licensee shall meet the following requirements:

(1) Correct the violation within 10 days of notification of the violation by the secretary, including conducting effective disposal of the industrial hemp crop if so ordered;

(2) for the duration of the time period specified in the corrective action plan, which shall be at least two years, provide a report to the secretary as often as is required by the secretary regarding the status of the violation; and

(3) complete any other actions required by the secretary.

(c) Upon a second negligent violation within five years of a previous negligent violation, each licensee shall meet the following requirements:

(1) Correct the violation within 10 days of notification of the violation by the secretary, including the effective disposal of the industrial hemp crop if so ordered;

(2) for the duration of the time period specified in the corrective action plan, which shall be at least two years, provide a report to the secretary at least every 30 days, or as often as is required by the secretary, regarding the status of the violation; and

(3) complete any other actions required by the secretary.

(d) Upon a third negligent violation within five years of the first negligent violation, each licensee shall be ineligible to cultivate or produce industrial hemp for a period of five years beginning on the date of the third violation. Each license or registration held by the licensee shall be subject to immediate revocation, and all of the licensee's industrial hemp shall be subject to destruction, if so ordered. (Authorized by and implementing K.S.A. 2020 Supp. 2-3906; effective Jan. 8, 2021; amended, T-4-8-25-21, Aug. 25, 2021; amended Dec. 17, 2021.)

4-34-30. State educational institutions.

(a) Each state educational institution shall obtain a license before cultivating or producing industrial hemp for research purposes.

(b) Each state educational institution shall be exempt from all application and licensing fees if the state educational institution's license application is accompanied by a written summary of the research to be performed, except as provided in subsection (f).

(c) Each state educational institution shall be subject to all other requirements applicable to a hemp producer, except that a state educational institution may request the waiver of any requirement in K.A.R. 4-34-1 through K.A.R. 4-34-30 by submitting a written request to the secretary that explains why the waiver of an existing regulation is necessary for the proposed research.

(d) In spite of subsection (c), a state educational institution shall not request a waiver of the fingerprint-based state and national criminal history record check or corrective action plan requirements.

(e) Each state educational institution seeking licensure shall designate an individual as the primary licensee for any license. The primary licensee shall be responsible for all employees, agents, students, and volunteers of the institution, and any activities that the institution undertakes, related to industrial hemp at the locations identified in each application. The costs associated with fingerprinting and the required state and national criminal history record check shall be the responsibility of the individual designated as the primary licensee.

The head of a department of the state educational institution, or a similar person with supervisory authority, shall submit a written letter designating the responsible individual as the primary licensee along with the application.

(f) Upon written request, a state educational institution may be granted a multiyear license that is valid for up to five years for completion of a multiyear research project. (Authorized by and implementing K.S.A. 2019 Supp. 2-3906; effective Jan. 8, 2021.)

Article 1.—DEFINITIONS

5-1-1. Definitions. As used in these regulations and the Kansas water appropriation act and by the division of water resources in the administration of the Kansas water appropriation act, unless the context clearly requires otherwise, each of the following terms shall have the meaning specified in this regulation:

(a) “Above-baseflow stage” means streamflow that is in response to a significant runoff event during which period the water level elevation of the stream is greater than the elevation of the adjacent water table.

(b) “Acceptable quality surface water” means surface water that will not degrade the quality of the groundwater source into which the surface water is discharged.

(c) “Application” means the formal document submitted on the form prescribed by the chief engineer for a permit to appropriate water for beneficial use and filed in the office of the chief engineer pursuant to K.S.A. 82a-708a and 82a-709, and amendments thereto.

(d) “Approval of application” means a permit to proceed with construction of diversion works and the diversion and use of water in accordance with the terms and conditions specified in the permit. Approval of application shall not constitute any permit that may be required by other state laws.

(e) “Aquifer storage” means the act of storing water in an aquifer by artificial recharge for subsequent diversion and beneficial use.

(f) “Aquifer storage and recovery system” means the physical infrastructure that meets the following conditions:

- (1) Is constructed and operated for artificial recharge, storage, and recovery of source water; and
- (2) consists of apparatus for diversion, treatment, recharge, storage, extraction, and distribution.

(g) “Artificial recharge” means the use of source water to artificially replenish the water supply in an aquifer.

(h) “Authorized representative” means any staff employee designated by the chief engineer to perform duties and functions on behalf of the chief engineer.

(i) “Bank storage” means water absorbed by and temporarily stored in the banks and bed of a stream during above-baseflow stage.

(j) “Bank storage well” means a well used to divert or withdraw water from bank storage.

(k) “Basin storage area” means the portion of the aquifer used for aquifer storage that has defined horizontal boundaries and is delimited by a maximum index level and a minimum index level.

(l) “Basin storage loss” means that portion of artificial recharge naturally flowing or discharging from the basin storage area.

(m) “Basin term permit” means a term permit to appropriate surface water from a stream within a specific drainage basin, or a portion of it, for a reasonable quantity of water, not to exceed a maximum of 100 acre-feet per calendar year, for use in either of the following:

- (1) Drilling oil and gas wells; or
- (2) construction projects within the specified basin.

(n) “Battery of wells” means two or more wells connected to a common pump by a manifold, or not more than four wells in the same local source of supply within a 300-foot-radius circle that are being operated by pumps not to exceed a total maximum rate of diversion of 800 gallons per minute and that supply water to a common distribution system.

(o) “Beneficial uses of water” are the following:

- (1) Domestic uses;
- (2) stockwatering;
- (3) municipal uses;
- (4) irrigation;
- (5) industrial uses;
- (6) recreational uses;
- (7) waterpower;
- (8) artificial recharge;
- (9) hydraulic dredging;
- (10) contamination remediation;
- (11) dewatering;
- (12) fire protection;
- (13) thermal exchange; and
- (14) sediment control in a reservoir.

(p) “Complete and accurate water use report” means a water use report that the water right owner has filed pursuant to K.S.A. 82a-732, and amendments thereto, that provided all of the information required on the form prescribed by the chief engineer, including the following:

- (1) The quantity of water diverted during the calendar year;
- (2) if the diversion of water was required to be metered during the calendar year for which the report is being filed, the information required by K.A.R. 5-3-5e;
- (3) if the water was used for irrigation purposes, the number of acres that were irrigated; and

(4) if the water was diverted from a sand and gravel pit operation, the size of the surface area of the pit in acres at the end of the calendar year for which the report was filed.

(q) "Completed substantially as shown on aerial photograph, topographic map, or plat," as used to define the authorized point of diversion, means within 300 feet of the location as shown on the aerial photograph, topographic map, or plat accompanying the application.

(r) "Confined Dakota aquifer system" means that portion of the Dakota aquifer system overlain by a confining layer resulting in the aquifer normally being under greater than atmospheric pressure.

(s) "Conjunctive use" means the safe-yield management and operation of an aquifer in coordination with a surface water system to enhance the use of the total water supply availability in accordance with the provisions of the water appropriation act.

(t) "Contamination remediation" means the diversion of water by a state agency, or under a written agreement or order of an appropriate state agency, for the purpose of improving the water quality.

(u) "Dakota aquifer system" shall include the Dakota formation, the Kiowa formation, the Cheyenne sandstone, and, where hydraulically connected, the Morrison formation.

(v) "Dakota aquifer system well" means a well or proposed well screened in whole or in part in the Dakota aquifer system.

(w) "Dam" means any artificial barrier, together with all appurtenant works, that does or could impound water.

(x) "Dewatering" means the removal of surface water or groundwater to achieve either of the following:

(1) Facilitate the construction of a building, pipeline, or other facility; or

(2) protect a building, levee, mining activity, or other facility.

(y) "Direct diversion of surface water" means the diversion of surface water directly from a stream by means of a pump, headgate, siphon, or similar installation, for application to beneficial use without storing it behind a dam, levee, or similar type of structure.

(z) "Diversion" means the act of bringing water under control by means of a well, pump, dam, or other device for delivery and distribution for the proposed use.

(aa) "Diversion works" means any well, pump, power unit, power source, dam, and any other devices necessary to bring water under control for delivery to a distribution system by which the water will be distributed to the proposed use and any other equipment required as a condition of the permit, including a check valve, water level measurement tube, meter, or other measuring device.

(bb) "Division" means the division of water resources of the Kansas department of agriculture.

(cc) "Dry hydrant" means a permanent, unpresurized intake pipe used to remove water from a pond, stream, reservoir, or other surface water supply by means of suction or vacuum supplied by a fire truck or other portable pumping device.

(dd) "Field inspection" means that for the purpose of issuing a certificate of appropriation pursuant to K.S.A. 82a-714 and amendments thereto, the chief engineer conducts a test of the rate of diversion of the diversion works under the normal and maximum conditions that the diversion works actually applied water to beneficial use during the perfection period. The chief engineer also collects all other information necessary to prepare a certificate, including the following:

(1) A description of the location and size of the place where water was actually applied to beneficial use during the perfection period in accordance with the terms, conditions, and limitations of the approval of application;

(2) information on the quantity and rate of water that was applied to the authorized use during the perfection period; and

(3) the actual location of the point or points of diversion from which water was diverted in accordance with the terms, conditions, and limitations of the approval of application.

(ee) "Fire protection" means the use of water for fire protection by a fire department for public protection in general.

(ff) "Fish farming" means the controlled cultivation and harvest of aquatic animals.

(gg) "Flow-straightening vanes" means vanes, or any other devices installed at the upstream throat of a measuring chamber for the purpose of aligning all velocity components of flow parallel with the flow in the measuring chamber at the water flowmeter sensor location.

(hh) "Full irrigation" means the application of water to crops during the growing season. Full irrigation shall include water for preirrigation.

(ii) "Groundwater" means water below the surface of the earth.

(jj) “Growing season” means the average frost-free period of the year.

(kk) “Household purposes” means the use of water by a person for cooking, cleaning, washing, bathing, human consumption, rest room facilities, fire protection, and other uses normally associated with the operation of a household.

(1) “Fire protection” shall be considered to be use of water for “household purposes” if either of the following conditions is met:

(A) Water is available from a “dry hydrant” that has been installed on a pond located within 1,000 feet of the residence.

(B) Water can be pumped from a well located within 1,000 feet of the residence for fire protection.

(2) Household purposes shall also include the replacement of the potential net evaporation from a domestic pond of up to ½ acre in surface area if both of the following conditions are met:

(A) The pond is utilized for aesthetic purposes as an integral part of the landscaping of a house.

(B) Any portion of the pond is located within 300 feet of the closest edge of the house.

(3) The maximum reasonable annual quantity of groundwater that may be pumped into a pond to be withdrawn later for domestic fire protection shall not exceed 0.06 acre-feet plus the average annual potential net evaporation for a pond at that location in the state having a surface area of 0.2 of an acre.

(4) Household purposes shall also include the use of 1½ acre-feet of water or less per calendar year by an industrial user, restaurant, hotel, motel, church, camp, correctional facility, educational institution, or similar entity for household purposes.

(ll) “Hydraulic dredging” means the removal of saturated aggregate from a stream channel, pit, or quarry by means of hydraulic suction and the pumping of the aggregate and water mixture as a slurry to a location where at least 95 percent of the water returns directly to the source of supply.

(mm) “Immediate vicinity,” as used in specifying the place of use for a water right in which the water is authorized to be used for municipal purposes, means within 2,640 feet of the corporate limits of the municipality, rural water district, or other entity.

(nn) “In compliance” means that a water flowmeter does not meet any of the criteria of K.A.R. 5-1-9 for being out of compliance.

(oo) “Index level” means elevations established spatially throughout a basin storage area to be used to represent the maximum volume of a ba-

sin storage area, and storage available for recovery based upon accounting methodology, and conditions of the permit.

(pp) “Indirect use” means the total of the seepage loss and the average annual potential net evaporation loss from the surface of water originally impounded in a reservoir for beneficial use.

(qq) “Industrial use” means the use of water in connection with the manufacture, production, transport, or storage of products, or the use of water in connection with providing commercial services, including water used in connection with steam electric power plants, greenhouses, fish farms, poultry operations that are not incidental to the operation of a traditional farmstead pursuant to K.S.A. 82a-701(c) and amendments thereto, secondary and tertiary oil recovery, air conditioning, heat pumps, equipment cooling, and all uses of water associated with the removal of aggregate for commercial purposes except the following:

(1) The evaporation caused by exposing the groundwater table or increasing the surface area of a stream, lake, pit, or quarry by excavation or dredging, unless the evaporation has a substantially adverse impact on the area groundwater supply; and

(2) hydraulic dredging.

(rr) “Irrigation use” means the use of water for the following:

(1) The growing of crops;

(2) the watering of gardens, orchards, and lawns exceeding two acres in area; and

(3) the watering of golf courses, parks, cemeteries, athletic fields, racetrack grounds, and similar facilities.

(ss) “Maximum index level” means the maximum elevation for storage within a basin storage area or, if the basin storage area is subdivided, a smaller subdivided area.

(tt) “Measuring chamber” means a cylindrical chamber in which a water flowmeter is installed that is calibrated to match the measuring element of the water flowmeter and the nominal size of the pipe in which it is installed.

(uu) “Minimum index level” means 20 feet above the bedrock elevation or an alternatively proposed minimum elevation for storage within a basin storage area or, if the basin storage area is subdivided, a smaller subdivided area.

(vv) “Municipal use” means the various uses made of water delivered through a common distribution system operated by any of the following:

(1) A municipality;

- (2) a rural water district;
- (3) a water district;
- (4) a public wholesale water supply district;
- (5) any person or entity serving 10 or more hookups for residences or mobile homes; or
- (6) any other similar entity distributing water to other water users for various purposes.

Municipal use shall also include the use of water by restaurants, hotels, motels, churches, camps, correctional facilities, educational institutions, and similar entities using water that does not qualify as a domestic use.

(ww) "Nonvolatile memory" means the ability of a water flowmeter to retain the values stored in the mechanical or electronic memory if all power, including backup battery power, is removed.

(xx) "Normal operating range" means the range of flow rates for which the water flowmeter will meet the accuracy requirements of K.A.R. 5-1-4 (a), as certified by the water flowmeter manufacturer.

(yy) "Off-season irrigation" means the application of water to land for the purpose of storing moisture in the soil for future use by a crop that will not be irrigated during the growing season.

(zz) "Operator," as used in the regulation of sand and gravel pits, means any person who engages in mining sand or gravel, or both.

(aaa) "Perennial stream" means a stream, or part of a stream, that normally flows during all of the calendar year, except during a drought.

(bbb) "Perfect" means the actions taken by a water user to develop an approval of application into a water right. These actions shall consist of the completion of the diversion works and the actual application of water to the authorized beneficial use in accordance with the terms, conditions, and limitations of the approval of application.

(ccc) "Point of diversion" means the point at which water is diverted or withdrawn from a source of water supply.

(ddd) "Point of diversion of a dewatering site" means the geographic center of the area from which water is temporarily removed to lower the static water level or streamflow to allow one construction project or one excavation to take place. Each one-quarter linear mile of construction trench, or part thereof, shall have at least one point of diversion.

(eee) "Point of diversion of a remediation site" means the geographic center of the area from which water is being removed to be treated or injected into a single disposal well.

(fff) "Point of diversion for storage of surface water in a reservoir created by a dam" means the point at which the longitudinal axis of the dam crosses the centerline of the stream impounded by the reservoir.

(ggg) "Potential annual runoff" means the mean annual runoff for the watershed of the reservoir.

(hhh) "Preirrigation" means the application of water to the land for a crop before planting to ensure adequate moisture for early plant growth.

(iii) "Primary well" means a well for which a standby well is available.

(jjj) "Prior right" means a vested right, an appropriation right with earlier priority, or a permit with earlier priority than that of a subsequent appropriation right or permit.

(kkk) "Proven reserves" means extractable sand and gravel deposits for which good estimates of the quantity and quality have been made by various means, including core drilling.

(lll) "Recharge" means the natural infiltration of surface water or rainfall into an aquifer from its catchment area.

(mmm) "Recharge credit" means the quantity of water that is stored in the basin storage area and that is available for subsequent appropriation for beneficial use by the operator of the aquifer storage and recovery system.

(nnn) "Recreation storage" means the storage and use of water within the reservoir for recreational use as defined in this regulation. Water stored for recreational use in a reservoir shall be considered to be an indirect use of water.

(ooo) "Recreational use" means a use of water in accordance with a water right that provides entertainment, enjoyment, relaxation, and fish and wildlife benefits.

(ppp) "Rediversion of water" means releasing or withdrawing water that had been previously impounded behind a dam, levee, or similar type of structure, by use of a pump, outlet tube, headgate, or similar type of device, and the application of the water directly to beneficial use.

(qqq) "Register" means an integral or remote device that displays the quantity of water passing the water flowmeter sensor and is part of the water flowmeter.

(rrr) "Remediation site" means the geographic area where contamination is being removed from groundwater.

(sss) "Reservoir" means the area upstream from a dam that contains, or will contain, impounded water.

(ttt) “Reservoir capacity” means the volume of water that can be stored below the lower of either of the following:

(1) The elevation of the principal spillway tube; or

(2) the lowest uncontrolled spillway in the reservoir.

(uuu) “Reservoir having a total water volume of less than 15 acre-feet,” as used in K.S.A. 82a-728 and amendments thereto, means a reservoir having a capacity of 15 acre-feet or less as measured at the principal spillway tube or the lowest uncontrolled spillway, whichever is lower.

(vvv) “Safe yield” means the long-term sustainable yield of the source of supply, including hydraulically connected surface water or groundwater.

(www) “Sand and gravel pit operation” means a project that meets the following conditions:

(1) Excavates overburden for mining sand or gravel, or both, exposing the underlying groundwater table to evaporation; and

(2) has a perimeter equal to or greater than its depth.

(xxx) “Sediment control in a reservoir” means a beneficial use of water that meets both of the following criteria:

(1) The water is stored in a reservoir that has no other authorized type of beneficial use, except domestic use.

(2) The water is stored only in the part of the reservoir designed and constructed for the storage of sediment.

(yyy) “Source water” means water used for artificial recharge that meets the following conditions:

(1) Is available for appropriation for beneficial use;

(2) is above base-flow stage in the stream;

(3) is not needed to satisfy minimum desirable streamflow requirements; and

(4) will not degrade the ambient groundwater quality in the basin storage area.

(zzz) “Specialty crop” means a crop other than a normal Kansas field crop. This term shall include turf grass, trees, vegetables, ornamentals, and other similar crops.

(aaaa) “Standby well” means a well that can withdraw water from the same source of supply as the primary well and that is used only when water is temporarily unavailable from the primary well or wells authorized to be used on the same place of use because of mechanical failure, maintenance, or power failure. A standby well may

also be used for fire protection or a similar type of emergency.

(bbbb) “Static water level” means the depth below land surface at which the top of the groundwater is found when not affected by recent pumping.

(ccc)(1) “Stockwatering” means the watering of livestock and other uses of water directly related to either of the following:

(A) The operation of a feedlot with the capacity to confine 1,000 or more head of cattle; or

(B) any other confined livestock operation or dairy that would divert 15 or more acre-feet of water per calendar year.

(2) Stockwatering shall not include the irrigation of feed grains or other crops.

(3) For the purposes of this subsection, a group of feedlots or other confined feeding operations shall be considered to be one feedlot or confined feeding operation if both of these conditions are met:

(A) There are common feeding or other physical facilities.

(B) The group of facilities is under common management.

(dddd) “Straight pipe” means a straight length of pipe free of all internal obstructions, including size changes, valves, cooling coils, injection ports, sand or foreign material, and any other condition that would cause a disturbance of the internal velocity profile in the pipe. Internal obstructions shall not include properly designed, constructed, and installed straightening vanes and inspection ports.

(eeee) “Stream channel aquifer” means unconsolidated water-bearing deposits in river valleys, flood plains, and terraces that are separate and distinct from any other aquifer and capable of yielding water in sufficient quantities for beneficial use.

(ffff) “Surface water” means water in creeks, rivers, or other watercourses and in reservoirs, lakes, and ponds.

(gggg) “Term permit” means a permit to appropriate water that is issued for a specified period of time and exceeds the criteria for a temporary permit specified in K.S.A. 82a-727, and amendments thereto, and K.A.R. 5-9-3 through K.A.R. 5-9-5. At the end of the specified time, or any authorized extension approved by the chief engineer, the term permit shall be automatically dismissed, and any priority it may have had shall be forfeited.

(hhhh) “The production and return of saltwater in connection with the operation of oil and gas wells in accordance with the written approval

granted therefor by the Kansas corporation commission pursuant to K.S.A. 55-901, and amendments thereto” means only that saltwater actually produced during the primary production of oil and gas wells and shall not include the following:

(1) Saltwater used in the drilling of an oil and gas well; and

(2) saltwater injected into an enhanced recovery injection well, unless that saltwater was produced in the primary production of the oil and gas well, separated from the oil and gas, and then subsequently reinjected.

(iiii) “Thermal exchange” means the use of water for climate control in a nondomestic building and in a manner that is essentially nonconsumptive to the source of supply.

(jjjj) “Totalizer” means the mechanical or electronic portion of the register that displays the total quantity of water that has passed the water flowmeter sensor.

(kkkk) “Unconfined Dakota aquifer system” means that portion of the Dakota aquifer system not overlain by a confining layer in which the aquifer is in equilibrium with atmospheric pressure.

(llll) “Unconsolidated regional aquifer” means a body of mostly unconsolidated and heterogeneous water-bearing deposits that are hydraulically and geologically contiguous and are capable of yielding water in sufficient quantities for beneficial use.

(mmmm) “Waste of water” means any act or omission that causes any of the following:

(1) The diversion or withdrawal of water from a source of supply that is not used or reapplied to a beneficial use on or in connection with the place of use authorized by a vested right, an appropriation right, or an approval of application for a permit to appropriate water for beneficial use;

(2) the unreasonable deterioration of the quality of water in any source of supply, thereby causing impairment of a person’s right to the use of water;

(3) the escaping and draining of water intended for irrigation use from the authorized place of use; or

(4) the application of water to an authorized beneficial use in excess of the needs for this use.

(nnnn) “Waterpower use” means the use of falling water for hydroelectric or hydromechanical power.

(oooo) “Water balance” means the method of determining the amount of water in storage in a basin storage area by accounting for inflow to, outflow from, and changes in storage in that basin storage area.

(pppp) “Water flowmeter” means the combination of a flow-sensing device, measuring chamber, integral or remote display device or register, and any connecting parts required to make a working assemblage to measure, record, and allow determination of flow rate and total quantity of water flowing past the water flowmeter sensor.

(qqqq) “Water storage device” means a reservoir, elevated water tank, pressurized water tank, including a bladder tank, or other container into which water is pumped and stored before beneficial use.

(rrrr) “Water use correspondent” means a person designated in writing, on a form prescribed by the chief engineer, by one of the owners of a water right to file the water use reports required by K.S.A. 82a-732 and amendments thereto, on behalf of the owner or owners of that water right. (Authorized by and implementing K.S.A. 82a-706a; modified, L. 1978, ch. 460, May 1, 1978; amended May 1, 1980; amended May 1, 1981; amended May 1, 1983; amended May 1, 1986; amended Dec. 3, 1990; amended May 31, 1994; amended Sept. 22, 2000; amended Oct. 24, 2003; amended Oct. 31, 2008; amended April 29, 2016.)

5-1-2. Standby well. In order for a well to qualify as a standby well, all of the following requirements shall be met: (a) The well shall be maintained in operable condition and be capable of being hooked to a power source within a reasonable amount of time to allow the well to function effectively as a standby well.

(b) Both the primary well or wells and the standby well or wells shall be required to be metered by order of the chief engineer or as a condition of the water right or permit.

(c) The standby well shall be located close enough to the primary well so that both wells withdraw water from the same local source of supply. However, a standby well shall not be required to meet the well spacing requirements from the standby well to the primary well.

(d) The standby well shall be authorized to divert the same rate and quantity as the primary well or wells. A limitation clause shall be placed on any water right or permit authorizing a standby well or wells limiting the standby well to no more than the rate and quantity authorized for the primary well or wells. With the limitation clause or clauses in effect, the standby well or wells shall not be counted in any safe yield, allowable appropriation, depletion or similar type of analysis.

(e) A primary well and a standby well shall not be operated at the same time, unless one of the wells is being operated for maintenance, testing, fire protection, or a similar reason. (Authorized by and implementing K.S.A. 82a-706a; effective May 31, 1994; amended Oct. 31, 2008.)

5-1-3. Permitting requirements of the Kansas water appropriation act. An individual engaged in the drilling of water well test holes, seismic test holes, stratigraphic test holes, observation wells, and water quality sampling wells, shall not be required to have an approval of application pursuant to the Kansas water appropriation act if water will not be diverted for beneficial use. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-701(f), 82a-703, 82a-705, and K.S.A. 1999 Supp. 82a-711; effective Sept. 22, 2000.)

5-1-4. Water flowmeter specifications. (a) Each water flowmeter required by the chief engineer, or required pursuant to a regulation adopted by the chief engineer, on or after the effective date of this regulation shall meet the following minimum requirements:

(1)(A) The water flowmeter has been certified by the manufacturer to register neither less than 98 percent nor more than 102 percent of the actual volume of water passing the water flowmeter when installed according to the manufacturer's instructions. This requirement shall be met throughout the water flowmeter's normal operating range without further adjustment or calibration.

(B) The manufacturer has certified to the chief engineer that it has an effective quality assurance program, including wet testing a random sample of production line water flowmeters with water flowmeter test equipment. The minimum number of samples to be tested shall be determined using a confidence interval of 90 percent, an expected compliance of 95 percent, and an acceptable error of two percent. The minimum number of samples of each model that shall be tested shall be calculated by multiplying 1,300 times the annual production of that model of water flowmeter divided by Q. Q equals four times the annual production of that water flowmeter plus 1,300.

(C) The manufacturer has certified that the water flowmeter test equipment described in paragraph (a)(1)(B) has been tested annually and found accurate by standards traceable to the national institute of standards and technology (NIST). Documentation of the testing required in

paragraphs (a)(1)(A) and (B) shall be maintained by the manufacturer for a period of at least five years and shall be made available to the chief engineer upon request during normal business hours.

(2) The water flowmeter shall be designed and constructed so that it will meet the following criteria:

(A) Maintain the accuracy required by the chief engineer in paragraph (a)(1)(A) through (C) and K.A.R. 5-1-9(a)(1);

(B) be protected by the following:

(i) A seal installed by the manufacturer or an authorized representative of the manufacturer; or

(ii) a way that makes it impossible to alter the totalizer reading without breaking the seal or obtaining the authorization of the manufacturer, an authorized representative of the manufacturer, or the chief engineer;

(C) clearly indicate the direction of water flow;

(D) clearly indicate the serial number of the water flowmeter;

(E) have a weatherproof register that is sealed from all water sources;

(F) have a register that is readable at all times, whether the system is operating or not;

(G) be able to be sealed by an authorized representative of the chief engineer to prevent unauthorized manipulation of, tampering with, or removal of the water flowmeter;

(H) be equipped with a manufacturer-approved measuring chamber through which all water flows. Except for positive displacement water flowmeters, full-bore electromagnetic water flowmeters, and multijet water flowmeters, flow-straightening vanes shall be installed at the upstream throat of the water flowmeter chamber. The flow-straightening vanes shall meet either of the following criteria:

(i) Be designed and installed by the manufacturer, or an authorized representative of the manufacturer; or

(ii) consist of at least three vanes that are longer, when placed parallel to the length of the pipe, than the inside diameter of the pipe, are equally spaced radially on the inner periphery of the pipe, and are wider in diametrical distance than one-fourth of the inside diameter of the pipe;

(I) be equipped with an inspection port if the straightening vanes are not designed, constructed, and installed by the manufacturer or an authorized representative of the manufacturer. The port shall be of sufficient size and placement to allow determination of the following:

(i) The proper installation of the flow-straightening vanes; and

(ii) the inside diameter of the pipe in which the water flowmeter sensor is installed;

(J) remain operable without need for recalibration to maintain accuracy throughout the operating life of the water flowmeter; and

(K) have a totalizer that meets the following criteria:

(i) Is continuously updated to read directly only in acre-feet, acre-inches, or gallons;

(ii) has sufficient capacity, without cycling past zero more than once each year, to record the quantity of water diverted in any one calendar year;

(iii) reads in units small enough to discriminate the annual water use to within the nearest 0.1 percent of the total annual permitted quantity of water;

(iv) has a dial or counter that can be timed with a stopwatch over not more than a 10-minute period to accurately determine the rate of flow under normal operating conditions; and

(v) has a nonvolatile memory.

(3) Each water flowmeter that is required to be installed by the chief engineer, or that was required to be installed as a condition of either an approval of application or an order of the chief engineer, or pursuant to a regulation adopted by the chief engineer before the effective date of this regulation, shall meet the following minimum specifications:

(A) Each water flowmeter shall be of the proper size, pressure rating, and style, and shall have a normal operating range sufficient to accurately measure the water flow passing the water flowmeter under normal operating conditions.

(B) Each water flowmeter shall meet the accuracy requirements of K.A.R. 5-1-9(a)(1). If the water flowmeter does not meet the accuracy requirements of K.A.R. 5-1-9(a)(1), then the water flowmeter shall meet either of the following criteria:

(i) Be repaired so that it meets the accuracy requirements of K.A.R. 5-1-9(a)(1); or

(ii) be replaced with a water flowmeter meeting all of the requirements of K.A.R. 5-1-4 and installed in a manner that meets the requirements of K.A.R. 5-1-6.

(b) A water flowmeter installed in the diversion works or a distribution system for a water right authorized for municipal use shall not be subject to the requirements of paragraph (a)(2)(B) if an accurate record of water use can be determined by readings from at least one alternate water flowmeter in the same diversion works or distribution system. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706a and K.S.A. 82a-706c;

effective Sept. 22, 2000; amended Oct. 24, 2003; amended May 21, 2010.)

5-1-5. Variances from water flowmeter specifications. (a) A variance from the chief engineer's water flowmeter specifications may be granted by the chief engineer if the water right owner furnishes detailed specifications of a proposed water flowmeter and demonstrates to the chief engineer all the following:

(1) A water flowmeter meeting the specifications of K.A.R. 5-1-4 will not satisfactorily serve the water user's needs.

(2) The proposed water flowmeter will meet the accuracy requirements of K.A.R. 5-1-4(a) and (b).

(3) The proposed water flowmeter will provide a reliable and accurate water use record for that point of diversion.

(b) Variances shall be granted only on a site-by-site, case-by-case basis. No general variances shall be granted for any brand or model of water flowmeter, except as set forth in subsection (c).

(c) A limited variance shall be granted by the chief engineer for a period of up to three years to allow that specific brand and model of a water flowmeter to be tested in the field and to serve as a water flowmeter required by the chief engineer if all of the following conditions are met:

(1) The manufacturer demonstrates to the chief engineer that a particular model and brand of water flowmeter utilizes new technology, does not meet one or more of the requirements of K.A.R. 5-1-4, and is likely to be as reliable, or more reliable, than water flowmeters currently meeting all of the requirements of K.A.R. 5-1-4.

(2) The manufacturer agrees to install not more than 50, nor less than 10, water flowmeters to test the new technology.

(3) The manufacturer agrees to collect data for at least one year that is sufficient to allow the chief engineer to determine whether that brand and model of water flowmeter meets the reliability and accuracy specifications of K.A.R. 5-1-4. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706c; effective Sept. 22, 2000.)

5-1-6. Water flowmeter installation specifications. (a) Each water flowmeter required by the chief engineer to be installed or required pursuant to a regulation adopted by the chief engineer, on or after the effective date of these regulations shall meet the following minimum water flowmeter installation specifications:

(1) Each water flowmeter shall be installed in a manner that meets the following criteria:

(A) Meets or exceeds the instructions of the manufacturer; and

(B) except for a multijet and a positive displacement water flowmeter, is installed so that there are at least five pipe diameters of straight pipe upstream and at least two pipe diameters of straight pipe downstream of the sensor portion of the water flowmeter, regardless of the manufacturer's installation specifications.

(2) Each water flowmeter shall be sized and installed so that full pipe flow will be maintained through the water flowmeter and so that water velocity in the measuring chamber will be within the normal operating range of the water flowmeter at all times while water is being diverted.

(3) If a water flowmeter is located downstream of a water storage device, there shall be at least seven diameters of straight pipe upstream of the water storage device where a water flowmeter may be installed for a field test by the chief engineer.

(4) Each water flowmeter shall be installed at a location at which the flowmeter measures all water diverted from the source of supply and does not measure water or other discharge, including tailwater and sewage effluent.

(b) Each water flowmeter that is required by the chief engineer to be installed, or that was required to be installed as a condition of either an approval of application or an order of the chief engineer, or pursuant to a regulation adopted by the chief engineer, before the effective date of these regulations, shall meet the following minimum installation specifications:

(1) Each water flowmeter shall be installed in a manner that meets or exceeds the instructions of the manufacturer and, except for a multijet and a positive displacement water flowmeter, shall be installed so that there are at least five pipe diameters of straight pipe upstream and at least two pipe diameters of straight pipe downstream of the sensor portion of the water flowmeter, regardless of the manufacturer's installation specifications.

(2) Each water flowmeter shall be sized and installed so that full pipe flow will be maintained through the water flowmeter and so that water velocity in the measuring chamber will be within the normal operating range of the water flowmeter at all times while the water is being diverted.

(3) Each water flowmeter shall be installed at a location at which the flowmeter measures all water diverted from the source of supply and does

not measure water or other discharge, including tailwater and sewage effluent. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706a and K.S.A. 82a-706c; effective Sept. 22, 2000; amended Oct. 24, 2003.)

5-1-7. Requirement to install a water flowmeter or other suitable water-measuring device. (a) All nondomestic, nontemporary wells and pump sites operated under the authority of an approval of application issued on or after the effective date of this regulation shall be equipped with a water flowmeter that meets or exceeds the specifications of the chief engineer effective at the time the application is approved by the chief engineer.

(b)(1) All nondomestic, nontemporary gravity diversions of water, including irrigation ditches, operating under the authority of an approval of application issued on or after the effective date of this regulation shall be equipped with a continuous recording gauge, or other suitable water-measuring device located at or near the headgate. Before installation, the water right owner shall submit plans and specifications for the proposed gauge, or other suitable water-measuring device, to the chief engineer and shall receive approval in writing from the chief engineer before installing the gauge or other suitable water-measuring device.

(2) The gauge or other suitable water-measuring device shall meet the following criteria:

(A) Register not less than 94% and not more than 106% of the actual volume of water passing the device under normal operating conditions when compared to a field test made by, or approved by, the chief engineer;

(B) be installed in accordance with the installation requirements of the chief engineer; and

(C) be maintained in a satisfactory operating condition any time water can reasonably be expected to be diverted.

(c) An approval of a nondomestic application for change in place of use, the point of diversion, or the use made of the water, or any combination of these, shall require the owner of the water right to install a water flowmeter on all points of diversion authorized by the water right or approval of application, unless any of the following conditions is met:

(1) The applicant demonstrates to the chief engineer that the application to change the place of use meets the requirements of K.A.R. 5-5-11(e).

(2) The applicant demonstrates to the chief engineer both of the following:

(A) Installation of a water flowmeter meeting these specifications is not physically feasible.

(B) The applicant agrees to implement a reasonable, objective alternative of measuring the quantity of water diverted that is acceptable to the chief engineer.

(3) The water is being diverted from multiple points of diversion authorized by one water right that does not limit the maximum annual quantity and maximum rate of diversion by point of diversion, and all of the water flows to a common point where a water flowmeter meeting the requirements of K.A.R. 5-1-4 and K.A.R. 5-1-6 measures all of the water pumped from all of the points of diversion authorized by that water right.

(4) An application for change in point of diversion only is filed to change the point of diversion of only one well, when more than one well is authorized by the approval of application or water right that authorizes the well for which a change in point of diversion is sought. In this case, only the well that is being relocated shall be required to have a water flowmeter.

(5) The water is being diverted from multiple points of diversion, and all of the following conditions are met:

(A) All points of diversion deliver water to only one distribution system.

(B) Each point of diversion can reasonably be expected to operate simultaneously and for the same total amount of time each calendar year.

(C) Each individual point of diversion has a tested diversion rate of less than 400 gallons per minute.

(D) A water flowmeter is installed that will measure 100 percent of the water pumped from all points of diversion.

(E) If the flow rate has not been tested within the last five years by the chief engineer or a person approved by the chief engineer, the owner shall have each point of diversion tested by a person approved by the chief engineer pursuant to K.A.R. 5-1-11. If the chief engineer becomes aware of information that the tested rates could no longer be correct, the chief engineer, or someone approved by the chief engineer pursuant to K.A.R. 5-1-11, may retest the rate of diversion produced by each point of diversion and those flow rates shall subsequently be used to determine the quantity diverted by each point of diversion.

(F) The owner has signed a consent agreement with the chief engineer that includes the following:

(i) A determination of the percentage of flow that will be attributed to each point of diversion if future administration becomes necessary; and

(ii) an agreement that the chief engineer may require a water flowmeter for each point of diversion if the chief engineer determines there are issues concerning impairment, violations of the conditions of the permit or water right, or a violation of the Kansas water appropriation act and its regulations.

(G) All uses of water are authorized by either a vested water right or a water right that has been certified pursuant to K.S.A. 82a-714, and amendments thereto.

(d) Except as set forth in subsection (c), if an approval of an application for change requires the installation of a water flowmeter, the requirement to install a water flowmeter shall also be placed on all other water rights and approvals authorizing diversion of water from the same point of diversion.

(e) If any water right or approval of application has a condition requiring development, adoption, and implementation of a water conservation plan pursuant to K.S.A. 82a-733 and amendments thereto, a water flowmeter or suitable water-measuring device shall be installed on each authorized point of diversion in compliance with these regulations.

(f) The owner of a water right, including a domestic water right, or an approval of application shall also be required by the chief engineer to install a water flowmeter or other suitable water-measurement device that meets the requirements of these regulations on each authorized point of diversion if it is necessary for the chief engineer to effectively administer water rights to prevent impairment, to protect minimum desirable stream flows, to conserve water, or to otherwise carry out the duties of the chief engineer as set forth in the Kansas water appropriation act, K.S.A. 82a-701 et seq. and amendments thereto.

(g) Except as set forth in subsection (c), if a water flowmeter is required by the chief engineer, each point of diversion authorized by the approval of application or water right shall be required to have a separate meter. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706c; effective Sept. 22, 2000; amended Oct. 31, 2008.)

5-1-8. Water flowmeter maintenance. If a water right owner is required by the chief engineer to install a water flowmeter, the water right owner shall maintain the water flowmeter in compliance, as defined by K.A.R. 5-1-1, whenever

diversion of water can reasonably be expected to occur. If at any time the required water flowmeter fails to function properly, the owner shall promptly initiate action to repair or replace the meter, or to correct any problems with the installation. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706c; effective Sept. 22, 2000.)

5-1-9. Criteria to determine when a water flowmeter is out of compliance. (a) A water flowmeter shall be considered to be out of compliance if any of the following criteria is met:

(1) The water flowmeter registers less than 94 percent or more than 106 percent of the actual volume of water passing the water flowmeter. If necessary, this determination may be made by a field test conducted by, or approved by, the chief engineer.

(2) The seal placed on the totalizer by the manufacturer or the manufacturer's authorized representative has been broken, or the totalizer value has been reset or altered without the authorization of the manufacturer, an authorized representative of the manufacturer, or the chief engineer.

(3) A seal placed on the water flowmeter or totalizer by the chief engineer has been broken.

(4) The water flowmeter register is not visible or is unreadable for any reason.

(5) There is not full pipe flow through the water flowmeter.

(6) Flow-straightening vanes have not been properly designed, manufactured, and installed.

(7) The water flowmeter is not calibrated for the nominal size of the pipe in which the flowmeter is installed.

(8) The water flowmeter is not installed in accordance with the manufacturer's installation specifications. However, five diameters of straight pipe above the water flowmeter sensor and two diameters below the water flowmeter sensor shall be the minimum spacing, regardless of the manufacturer's installation specifications.

(9) A water flowmeter is installed at a location at which the flowmeter does not measure all of the water diverted from the source of supply.

(b) A water flowmeter installed in the diversion works or a distribution system for a water right authorized for municipal use shall not be subject to the requirements of paragraphs (a)(2) and (3) if an accurate record of water use can be determined by readings from at least one alternate water flowmeter in the same diversion works or distribution system. (Authorized by K.S.A. 82a-706a; imple-

menting K.S.A. 82a-706a and K.S.A. 82a-706c; effective Sept. 22, 2000; amended Oct. 24, 2003; amended May 21, 2010.)

5-1-10. Duties of water right owner when a water flowmeter is out of compliance. (a) A water right owner, or the water right owner's authorized designee, shall promptly notify the chief engineer if any water flowmeter required by the chief engineer is out of compliance.

(b) Within 30 days after the date on which the out-of-compliance water flowmeter has been repaired or replaced, the water right owner or the water right owner's authorized designee shall notify the chief engineer in writing of the following information:

(1) The date the water flowmeter became out of compliance;

(2) the water flowmeter reading at the time the water flowmeter became out of compliance;

(3) if the water flowmeter was replaced, the following information:

(A) The brand, model, size, and serial number of the new water flowmeter;

(B) the units in which the new water flowmeter reads;

(C) the reading of the new water flowmeter at the time of installation; and

(D) the location of the new water flowmeter on the diversion works or delivery system;

(4) if the water flowmeter was repaired, the water flowmeter reading immediately before the repair and the reading of the water flowmeter at the time it was reinstalled or the repair was completed on site;

(5) the date the repair or replacement was completed; and

(6) the amount of water diverted while the water flowmeter was out of compliance.

(c) If the water right owner does not maintain a record of diversions of water that is sufficient to reasonably estimate the quantity of water diverted while the water flowmeter was out of compliance, it shall be assumed, for the sole purposes of enforcement of the terms, conditions, and limitations of the approval of application or water right, and priority administration of water rights among water users, that the diversion works were operated continuously at the tested rate of diversion during the entire period the water flowmeter was out of compliance. If the rate of diversion has not been tested by the chief engineer, then it shall be assumed that the diversion works were operated

continuously at the authorized rate of diversion during the entire time the water flowmeter was out of compliance. The assumption set forth in this subsection shall not apply to the determination of the annual quantity of water diverted for the purpose of perfecting a water right.

(d) If the water right owner is required by the chief engineer to repair or replace an inoperable water flowmeter, it shall be the duty of the water right owner to ensure that the repaired or replaced water flowmeter is in compliance with K.A.R. 5-1-4 and K.A.R. 5-1-6. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706c; effective Sept. 22, 2000.)

5-1-11. Water flowmeter testing by a non-agency person. If a water right owner desires to have a water flowmeter flow rate test done by a nonagency person for any reason, a person may be approved by the chief engineer to perform a water flowmeter flow rate test if the person demonstrates to the chief engineer both of the following:

(a) The person has the training, skills, and experience necessary to properly conduct the test.

(b) The person has the appropriate water flowmeter to do the test, and the water flowmeter has been tested for accuracy with water flowmeter test equipment that has been found to be accurate using standards traceable to the national institute of standards and technology (NIST). The equipment shall have been tested and found to be accurate within 12 months of performing the water flowmeter test. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706c; effective Sept. 22, 2000.)

5-1-12. List of water flowmeters certified by the manufacturer to meet the specifications of the chief engineer. (a) A list of all makes and models of water flowmeters that have been certified by the water flowmeter manufacturer to meet the specifications of the chief engineer shall be maintained by the chief engineer. This list shall be made available by the chief engineer to the public upon request.

(b) A water flowmeter shall be placed on the list only if the manufacturer has submitted to the chief engineer all of the following information for each water flowmeter model:

(1) The water flowmeter manufacturer's name, address, contact person's name, and telephone number;

(2) the water flowmeter model name or number;

(3) proof that a random sample of water flowmeters of each model has been tested in accordance with the requirements of K.A.R. 5-1-4(a);

(4) the last date that the water flowmeter test equipment was tested and found to be accurate by standards traceable to the national institute of standards and technology (NIST);

(5) verification that the water flowmeter is designed and constructed so that accuracy will be maintained over the life of the water flowmeter;

(6) verification that the water flowmeter serial number and direction of flow are clearly indicated on the water flowmeter;

(7) verification that the register is weatherproof and sealed from all water sources;

(8) verification that the totalizer will read only in acre-feet, acre-inches, or gallons;

(9) the number of active digits in the totalizer;

(10) verification that the memory is nonvolatile;

(11) verification that the totalizer cannot be reset without breaking the manufacturer's seal or obtaining the authorization of the manufacturer, an authorized representative of the manufacturer, or the chief engineer;

(12) verification that the water flowmeter and register are constructed in such a manner that they can be sealed by the chief engineer;

(13) a description of the measuring chamber provided for each water flowmeter model;

(14) specifications of the flow-straightening vanes installed in the measuring chamber;

(15) the spacing recommendations for each water flowmeter model in terms of pipe diameters of straight pipe required upstream and downstream of the water flowmeter sensor; and

(16) the normal operating range of the water flowmeter.

(c) A brand or model of a water flowmeter shall be removed from the list of water flowmeters specified in subsection (a) of this regulation if it has been demonstrated to the chief engineer that the brand or model of water flowmeter does not reliably and consistently meet the accuracy standards of K.A.R. 5-1-9(a). (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706a and K.S.A. 82a-706c; effective Sept. 22, 2000; amended Oct. 24, 2003.)

Article 2.—VESTED RIGHTS

5-2-1 and 5-2-2. (Authorized by K.S.A. 82a-706a; effective May 1, 1978; rejected, L. 1978, ch. 460, May 1, 1978.)

5-2-3. Battery of wells. Except as set forth in subsection (c), if a permit to appropriate water did not authorize a battery of wells, as defined in K.A.R. 5-1-1, before the effective date of this regulation, an application for change filed pursuant to K.S.A. 82a-708b, and amendments thereto, to add one or more wells to the authorized well to create a battery of wells shall not be approved unless all of the following criteria in either subsection (a) or (b) are met at the time that the application for change is filed:

(a) (1) The time to construct the diversion works has not expired.

(2) The proposed battery will meet the definition of a battery of wells as defined in K.A.R. 5-1-1.

(b) (1) The time to construct the diversion works has expired.

(2) A new application to appropriate water filed to appropriate water at the geocenter of the proposed battery of wells would meet the safe yield, allowable appropriation, or similar type of regulation, for a well filed at that location.

(3) The proposed battery of wells meets the definition of a battery of wells as defined in K.A.R. 5-1-1.

(c) Subsections (a) and (b) shall not apply to an application to change the point of diversion filed to add one or more wells to the authorized well to create a battery of wells if the proposed battery of wells is located within the boundary of a ground-water management district for which the chief engineer has adopted a specific regulation applicable to batteries of wells within that district. (Authorized by and implementing K.S.A. 82a-706a; effective Sept. 22, 2000.)

5-2-4. Determination or certification of a domestic water right. Each application filed after the effective date of this regulation to determine or certify a domestic water right based on water use in a confined feeding facility that had a capacity of 1,000 head or more and was privately owned and operated before May 1, 1986 shall be determined or certified for an annual quantity of water of 15 acre-feet or the annual quantity of water actually used, whichever is less. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-701, K.S.A. 82a-706a, and K.S.A. 2007 Supp. 82a-708b; effective Oct. 31, 2008.)

Article 3.—APPROPRIATION RIGHTS

5-3-1. Application acceptable for filing.

(a) To be acceptable for filing, an application for an approval of application shall be accompanied

by the statutorily required filing fee, except for an application for domestic use, and shall contain all of the following:

(1) The name and mailing address of each applicant;

(2) the signature of each applicant or each authorized representative;

(3) the proposed source of water supply;

(4) the proposed authorized place of use; and

(5) either a description of the location of the proposed point of diversion or a request for a 60-day period of time in which to establish the proposed point of diversion within a specifically described, nominal legal quarter section of land.

(b) When an application is received in the office of the chief engineer and assigned a number, the maximum quantity of water per calendar year and the maximum rate of diversion shall not be increased. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706a and K.S.A. 82a-709; modified, L. 1978, ch. 460, May 1, 1978; amended May 1, 1980; amended Oct. 24, 2003.)

5-3-1a. Application for a basin term permit. An application for a basin term permit shall be filed on a form prescribed by the chief engineer. The term requested shall not exceed one year. A basin term permit may be extended in one-year increments if all of the following conditions are met:

(a) The request for extension is filed before the end of the current term in a manner acceptable to the chief engineer.

(b) The applicant has complied with the terms, conditions, and limitations of the basin term permit during the previous calendar year.

(c) Granting the requested extension will not cause impairment of each approval of application and water right with an earlier priority.

(d) The applicant shows good cause why the extension should be granted.

The total time authorized by a basin term permit shall not exceed five calendar years. Basin term permits shall not be transferable. At the end of the specified term, the permit shall be dismissed, and any priority it may have had shall be forfeited. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-712; effective Sept. 22, 2000.)

5-3-1b. Complete new application. (a) A new application to appropriate water for beneficial use shall be considered to be a “complete application” for the purposes of K.S.A. 82a-708a, and

amendments thereto, if the application completely and accurately meets all the requirements specified in this regulation and the following criteria:

(1) The requirements specified in K.S.A. 82a-708a, and amendments thereto;

(2) the requirements specified in K.S.A. 82a-709, and amendments thereto;

(3) the requirements specified in K.S.A. 82a-710, and amendments thereto;

(4) any water conservation plans required by the chief engineer pursuant to K.S.A. 82a-733, and amendments thereto;

(5) the requirements of K.S.A. 82a-301 through K.S.A. 82a-305a, and amendments thereto, if the proposed point of diversion, or redirection, is a dam or stream obstruction;

(6) the requirements specified in K.A.R. 5-3-1;

(7) the requirements specified in K.A.R. 5-3-4; and

(8) the requirements specified in K.A.R. 5-3-4d.

(b) If minimum desirable streamflow (MDS) requirements have been set for the proposed source of water supply, the application shall contain a statement signed by the applicant acknowledging that the MDS requirements apply to the proposed source of water supply and that the diversions of water authorized by this approval of application could be regulated at times to protect MDS.

(c) If the applicant is requesting a waiver or exemption of a regulation pursuant to K.S.A. 82a-1904, and amendments thereto, the applicant shall submit a written request for the waiver or exemption, and documentation to support the waiver or exemption.

(d) If the proposed point of diversion is located within the boundaries of a groundwater management district, a final recommendation or analysis of the availability of water has been received from the groundwater management district within the time limit set by the chief engineer concerning the approval, denial, or modification of the application.

(e) If a substantive question has been raised concerning whether approval of the application could cause impairment of senior water rights or prejudicially and unreasonably affect the public interest, the applicant shall submit sufficient information to resolve that question.

(f) If any actions are required to be taken by the applicant on other approvals of applications or water rights owned by the applicant in order to make the new application approvable, including dismissals, reductions in water rights in accordance

with K.A.R. 5-7-5, and applications for change, all necessary forms shall be completed and filed with the chief engineer.

(g) The applicant shall submit all information and data necessary to demonstrate that the application complies with the applicable regulations adopted by the chief engineer. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706a, K.S.A. 2002 Supp. 82a-708a, K.S.A. 82a-709, K.S.A. 82a-710, K.S.A. 2002 Supp. 82a-711, K.S.A. 82a-733, and K.S.A. 2002 Supp. 82a-1904; effective Oct. 24, 2003.)

5-3-2. Priorities. (a) Upon receipt in the office of the chief engineer of an acceptable application for permit to appropriate water for beneficial use, accompanied by the statutory application fee, a stamp showing the date and time of receipt shall be placed on the application form. The date and time of receipt of the application for any use, other than domestic, shall establish the priority of whatever appropriation right that may be subsequently perfected pursuant to the application; (b) The date and time of the receipt of an application for permit to appropriate water for domestic use or the date of the first use of water for such purpose, whichever is earlier, shall establish the priority of the appropriation right for domestic use. When the first use of water is earlier in time than the filing date of an application, the applicant shall furnish affidavits from disinterested parties to substantiate the date that water was first used from the appropriate water supply for domestic purposes. (Authorized by K.S.A. 82a-706a; modified, L. 1978, ch. 460, May 1, 1978.)

5-3-3. Storage of surface water for domestic use. (a) Any person entitled to use surface water for beneficial purposes may collect and store surface water if the collection, storage, use, and times of use are consistent with reasonable storage and conservation practices. A reasonable quantity of water stored for domestic use shall be considered to be any quantity of water that meets the following requirements:

(1) Is sufficient to satisfy the domestic use for the current year and two succeeding years; and

(2) is necessary for the initial filling of the reservoir and refilling the reservoir after being drawn down for maintenance or other essential reasons. Collection and storage of all natural flows for domestic use shall be subject to vested rights and prior appropriation rights.

(b) The maximum average annual potential net evaporation from the surface of a pond, reservoir, or other similar surface water impoundment used exclusively for domestic purposes shall not exceed 15 acre-feet. The Kansas department of agriculture's map titled "maximum water surface for domestic reservoirs and ponds," dated December 7, 2007, is hereby adopted by reference. This map shall be used to determine the maximum surface area of a pond, reservoir, or similar surface water impoundment that may be used exclusively for domestic purposes. The maximum water surface shall be measured at either of the following, whichever is lower:

(1) The elevation of the principal spillway tube; or

(2) the elevation of the lowest uncontrolled spillway.

(c) An average annual potential net evaporation volume in excess of 15 acre-feet may be allowed if a person entitled to use surface water for domestic use demonstrates to the chief engineer that the quantity of water necessary to satisfy the domestic use, and to offset evaporation and seepage, makes it necessary to store surface water in a pond, reservoir, or similar surface water impoundment with a surface area that produces an average annual potential net evaporation volume greater than that provided in subsection (b).

(d) Groundwater shall not be pumped from a well into a pond, reservoir, or similar surface water impoundment for storage unless the owner of the groundwater right demonstrates to the chief engineer that the storage would be reasonable. (Authorized by K.S.A. 82a-706a; modified, L. 1978, ch. 460, May 1, 1978; implementing K.S.A. 82a-701(c), K.S.A. 82a-705a, and K.S.A. 82a-706a; amended Oct. 31, 2008.)

5-3-3a. Legal access. If the chief engineer is aware, or becomes aware, that the applicant does not have legal access to either the point of diversion or the place of use, before an application for any of the following can be approved by the chief engineer, the applicant shall demonstrate that the applicant has legal access to the proposed point of diversion and the proposed place of use before the approval of the application: (a) An approval of application;

(b) a change in place of use;

(c) a change in point of diversion; or

(d) any combination of subsections (a), (b), and (c). (Authorized by K.S.A. 82a-706a; imple-

menting K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-708a; effective Oct. 24, 2003.)

5-3-4. Application. (a) Each application for a permit to appropriate water for beneficial use shall contain all the information requested for the proposed uses as specified in the prescribed application form and any other information that may be required for a complete understanding of the proposed appropriation.

(b) Each application shall be accompanied by an aerial photograph or a detailed plat with a scale of at least one inch equals 1,320 feet, or a U. S. geological survey topographic map, with a scale of at least 1:24,000. The following information shall be plotted on the plat, photograph, or topographic map using appropriate symbols:

(1) The section corners;

(2) the center of the section, identified by the section number, township, and range;

(3) the location of each point of diversion, including each proposed well location, stream bank pump site, dam location or location of other works for diversion of water;

(4) the location of the place of use, including any remediation site or dewatering site, identified by crosshatching or by some other appropriate method;

(5) the location of all other water wells of every kind within one-half mile of each well covered by the proposed appropriation, each of which shall be identified by its use and the name and mailing address of the owner, if the proposed appropriation is for use of groundwater;

(6) the name and mailing address of the owner or owners of each tract of land adjacent to the stream for a distance of one-half mile upstream and one-half mile downstream from the property lines of the land owned or controlled by the applicant, if the proposed appropriation is for the use of surface water;

(7) the locations of proposed or existing dams, dikes, reservoirs, canals, pipelines, power houses, and any other structures for the purpose of storing, conveying, or using water; and

(8) a north arrow and scale.

The information shown on the photograph, plat, or map shall be legible. Black line prints may be submitted in lieu of the original drawing if a plat is submitted.

(c) Separate applications shall be filed for surface water and groundwater.

(d) If the source of supply is groundwater, a separate application shall be filed for each proposed well

or battery of wells, except that any of the following categories may be included in a single application:

(1) Not more than four wells within a circle with a quarter-mile radius in the same local source of supply that do not exceed a maximum diversion rate of 20 gallons per minute per well;

(2) all wells for a remediation site; or

(3) all wells for a dewatering site. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706a and K.S.A. 82a-709; modified, L. 1978, ch. 460, May 1, 1978; amended May 1, 1980; amended May 1, 1981; amended Oct. 31, 2008.)

5-3-4a. Hearing before issuance of an order. (a) A hearing may be held pursuant to K.A.R. 5-14-3a by the chief engineer, or a person designated by the chief engineer, before the chief engineer issues an order if one of the following conditions is met:

(1) The chief engineer finds it to be in the public interest to hold a hearing.

(2) A hearing has been requested by a person who shows to the satisfaction of the chief engineer that approval of the application could cause impairment of senior water rights or permits.

(3) The chief engineer desires public input on the matter.

(b) The hearing shall be electronically recorded by the chief engineer.

(c) If all of the parties agree, an informal conference instead of a hearing may be held by the chief engineer pursuant to K.A.R. 5-14-3a. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706a, K.S.A. 2008 Supp. 82a-708b, 82a-711, and 82a-737; effective May 1, 1980; amended May 31, 1994; amended March 20, 2009.)

5-3-4b. Deadlines for return of documents. (a) If the chief engineer allows a person a specific number of days to return or submit a document or other information, the time period shall be computed as prescribed in K.S.A. 60-206(a) and (e), and amendments thereto.

(b) If a person is given until a specific date to return or submit a document or other information, the document or information shall be deemed to be timely filed if it is received in the office of the chief engineer no later than the third working day following the specified date. Working days shall be all days except Saturdays, Sundays, and legal holidays designated by the United States congress, the Kansas legislature, or the governor of Kansas. Half holidays shall be counted as working days.

(c) Any document that is postmarked by the United States postal service with a legible date on or before the deadline set by the division for returning the document shall be accepted by the division as being timely filed, regardless of when it is received. In the case of United States registered mail, the date of registration shall be deemed to be the postmark date. The term "United States postal service," as used in this subsection, shall include a private delivery service available to the general public that routinely records, in the regular course of business, the date the item is given to the service for delivery. The date the item is given to the service for delivery shall be deemed to be the postmark date. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-710; effective May 1, 1980; amended Sept. 22, 2000.)

5-3-4c. Retaining new applications. (a) A new application to appropriate water for beneficial use shall be held by the chief engineer in accordance with the terms of subsection (b) if the application meets both of the following conditions:

(1) The application is in proper form and has been completely processed, but cannot be approved because it does not currently comply with one or more statutory or regulatory requirements, including spacing, safe yield, and allowable appropriation regulations.

(2) There is good cause to believe that, if the application were held for a reasonable period of time, it may be approvable in the future because of actions currently pending on other permits and water rights in the area, including issuance of certificates, dismissals of applications, and declarations of abandonment.

(b) Upon demonstration by the applicant to the chief engineer that the application apparently could be approved within a reasonable time, not to exceed 365 days from the date the request to retain the application was received by the chief engineer, if the pending actions take place, the applicant's pending new application may be held by the chief engineer for a period not to exceed 365 days.

(c) If the application still cannot be approved at the end of the time set forth in section (b), the application shall be dismissed by the chief engineer and the priority of the application forfeited.

(d) If any prior applications to appropriate water or prior applications to change the point of diversion from the same source of supply are not

complete and if the approval or denial of these applications could affect the approval of the proposed new application or application to change a water right, then the 150-day period specified in K.S.A. 82a-708a, and amendments thereto, shall begin to run only after all these prior applications have been processed. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-705, K.S.A. 82a-706a, K.S.A. 2002 Supp. 82a-708a, and K.S.A. 82a-710; effective Sept. 22, 2000; amended Oct. 24, 2003.)

5-3-4d. Stratigraphic log requirements.

(a) Except as set forth in subsection (b), each applicant who files either of the following applications shall submit to the chief engineer a stratigraphic log for a test hole located within 300 feet of the proposed new or replacement well:

(1) A new application to appropriate groundwater, except for domestic use, a temporary permit, or a term permit for fewer than five years; or

(2) an application to change the point of diversion to relocate a well.

This stratigraphic log shall contain geologic and any other information sufficient to allow the chief engineer to understand the lithology and to classify the groundwater source formation or formations from which the proposed well will be withdrawing water.

(b) (1) If an application is filed for a new well, the stratigraphic log shall not be required if the chief engineer has sufficient information to understand the lithology and determine the groundwater source formation or formations from which the proposed well will be withdrawing water.

(2) If an application is filed for a change in point of diversion, the stratigraphic log shall not be required if the chief engineer has sufficient information to understand the lithology and determine the groundwater source formation or formations from which the original well withdrew water and the replacement well will withdraw water.

(c) Each applicant to construct a new well or to change the point of diversion to a newly constructed well who submitted a stratigraphic log to the chief engineer pursuant to subsection (a) above shall not be required to submit to the chief engineer a copy of the stratigraphic log of the completed well as required by the Kansas department of health and environment under the authority of K.S.A. 82a-1212 and amendments thereto. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706a, K.S.A. 82a-709, and K.S.A. 82a-710; effective Sept. 22, 2000; amended Oct. 24, 2003.)

5-3-4e. Groundwater source formation codes. The Kansas department of agriculture, division of water resources' document titled "groundwater source formation codes," dated June 24, 2004, is hereby adopted by reference. The groundwater source formation codes used by the chief engineer in administering the Kansas water appropriation act shall be the codes specified in this document. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-709; effective Sept. 22, 2000; amended, T-5-8-23-04, Aug. 23, 2004; amended Nov. 29, 2004.)

5-3-5. Approval of application. The approval of an application on the prescribed form shall constitute a permit to proceed with the construction of authorized diversion works and the diversion and use of water.

The applicant shall be notified of the approval of the application by transmitting to him or her the original document setting forth the terms, conditions, and limitations of the permit which has been duly dated and signed by the chief engineer or his or her authorized representative. A copy of the approval of application and permit to proceed shall be maintained in the office of the chief engineer or the appropriate field office. (Authorized by K.S.A. 82a-706a; modified, L. 1978, ch. 460, May 1, 1978.)

5-3-5a. Authorization for the use of water for emergency purposes. The chief engineer, or a person designated by the chief engineer, may authorize the use of water for emergency purposes. The emergency approval shall be subject to the terms, conditions and limitations specified by the chief engineer and may be granted when determined to be in the public interest or when needed to protect the quality of a water supply, to provide fire protection, or to provide an alternate point of diversion or source of supply when the principal source of supply or point of diversion is unavailable due to conditions beyond the control of the applicant. (Authorized by K.S.A. 82a-706a and 82a-711; effective May 1, 1980.)

5-3-5b. Approval of application for water for the development of underground storage in mineralized formations. In any case where it is not technologically and economically feasible to utilize poorer quality water for the development of underground storage in mineralized formations and fresh water must be used, the chief engineer shall require the construction of surface

brine storage facilities to the extent economically and technologically feasible in an amount not to exceed forty percent (40%) of underground storage capacity of the applicant. This regulation does not exempt a person from complying with the requirements of other state and federal agencies relative to the construction of surface brine storage facilities. (Authorized by K.S.A. 82a-706a and 82a-707(d); effective May 1, 1980.)

5-3-5c. Check valves. (a) All diversion works not subject to regulation under the Kansas chemigation safety law, K.S.A. 2-3301 et seq. and amendments thereto, into which any type of chemical or other foreign substances will be injected into the water pumped from the diversion works shall be equipped with an in-line, automatic, quick-closing check valve capable of preventing pollution of the source of the water supply.

(b) Each check valve required by the chief engineer shall be constructed and installed in accordance with the requirements specified in K.A.R. 5-6-13a.

(c) Each check valve and all required components shall be maintained in an operating condition that prevents backflow into the source of water supply whenever a foreign substance could reasonably be expected to be introduced into the water system. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706, K.S.A. 82a-706a, K.S.A. 82a-712; effective May 1, 1980; amended May 1, 1981; amended Oct. 24, 2003.)

5-3-5d. Requirement to install a water level measurement tube. Each well with an authorized maximum rate of diversion of 100 or more gallons per minute drilled after the effective date of this regulation, except those wells authorized under a temporary permit or a domestic right, shall have a tube installed in accordance with specifications adopted by the chief engineer. This tube shall be suitable for making water level measurements and shall be maintained in working condition. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706a and K.S.A. 82a-706c; effective May 1, 1980; amended Sept. 22, 2000; amended Oct. 31, 2008.)

5-3-5e. Meters and other water-measuring devices; reporting readings; maintenance, and replacement. (a) For the purpose of this regulation, "meter" shall mean a water flowmeter or other water-measuring device.

(b) Whenever the installation of a meter is required by the chief engineer as a condition of

a water right or permit, by written order of the chief engineer, or by requirement of a groundwater management district, the water right owner shall report all information required on the form prescribed by the chief engineer pursuant to K.S.A. 82a-732, and amendments thereto, including the following:

(1) The beginning and ending readings of the meter each calendar year;

(2) the units in which the meter registers; and

(3) the quantity of water diverted during the calendar year in the same units in which the meter registers.

(c) Whenever a totalizing hour meter has been required by the chief engineer or a groundwater management district, the water right owner shall report all information required on the form prescribed by the chief engineer pursuant to K.S.A. 82a-732, and amendments thereto, including the following:

(1) The beginning and ending readings of the meter each calendar year;

(2) the units in which the meter registers; and

(3) the rate of diversion at which water is pumped in gallons per minute. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-732; effective May 31, 1994; amended Sept. 22, 2000.)

5-3-5g. Designation of a water use correspondent. If the owner or owners of an approval of application or a water right desire to delegate the authority to receive and submit the annual water use reports as prescribed by K.S.A. 82a-732, and amendments thereto, to another person, an owner of the approval of application or the water right shall sign and submit a form prescribed by the chief engineer designating the person responsible to receive and submit the required annual water use report. However, the water right owner or owners shall remain, in all cases, the person or persons legally responsible for filing the water use reports required by K.S.A. 82a-732, and amendments thereto. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-732; effective Sept. 22, 2000.)

5-3-5h. Water conservation plans. Each water conservation plan shall be submitted on a form prescribed by the chief engineer. The plan shall also contain the name, address, and telephone number of the designer of the water conservation plan. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-733; effective Sept. 22, 2000.)

5-3-5i. Time limit to implement a water conservation plan. (a) The time to fully implement the water conservation plan shall be limited by the chief engineer to a reasonable specific date, which may be extended for good cause shown by the applicant.

(b) A municipal or industrial water user shall be given at least one full calendar year after the conservation plan is approved by the chief engineer to fully implement the water conservation plan.

(c) A user of water for irrigation shall be given at least one full growing season after the conservation plan is approved by the chief engineer to fully implement the approved water conservation plan. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-733; effective Sept. 22, 2000.)

5-3-5j. Maintenance of a water conservation plan. Once implemented, the applicant shall continue to satisfactorily maintain each component of the water conservation plan. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-733; effective Sept. 22, 2000.)

5-3-5k. Review of a water conservation plan. The right to review the water conservation plan to determine if it is consistent with current guidelines adopted and maintained pursuant to K.S.A. 74-2608, and amendments thereto, shall be reserved by the chief engineer. If the review determines that the water conservation plan is materially different from those guidelines, then the owner of the water right or approval of application may be ordered by the chief engineer to amend the water conservation plan to make it consistent with the current guidelines for conservation plans and practices adopted and maintained pursuant to K.S.A. 74-2608, and amendments thereto. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-733; effective Sept. 22, 2000.)

5-3-5l. Changes in a water conservation plan. If a person required to implement a water conservation plan desires to make a material change in the plan, that person shall submit a request to make the change to the chief engineer on a form prescribed by the chief engineer. Any material change in an approved water conservation plan shall require the prior written approval of the chief engineer. Any proposed change in a water conservation plan shall be subject to the same type of review as that required for the original water conservation plan. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-733; effective Sept. 22, 2000.)

5-3-5m. Limited power of attorney. If all of the owners of an approval of application or water right desire to authorize any other person to take any type, or types, of official action on behalf of the approval of application or water right, all of the owners of the approval of application or water right shall meet the following requirements:

(a) A limited power of attorney shall be submitted to the chief engineer.

(b) The limited power of attorney shall be signed and acknowledged by all of the owners of the approval of application or water right and filed pursuant to the provisions of K.S.A. 58-601, and amendments thereto. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706a and K.S.A. 82a-701 et seq.; effective Sept. 22, 2000.)

5-3-5n. Authorized place of use. (a) Except as set forth in subsection (b), each approval of application, or an approval of an application for change filed in accordance with K.S.A. 82a-708b, and amendments thereto, shall describe the authorized place of use as either of the following:

(1) Land not authorized for beneficial use of water by any other water right or approval of application; or

(2) exactly the same land authorized for beneficial use of water by one or more prior approvals of applications or water rights.

(b) The requirement in subsection (a) shall not apply to applications that propose to partially overlap the authorized place of use with any of the following:

(1) A municipality;

(2) an irrigation district;

(3) an irrigation ditch company;

(4) a rural water district;

(5) another authorized place of use that cannot all be physically served by all of the water rights and approvals of applications;

(6) an authorized place of use that is owned by different landowners who do not operate together; or

(7) the owner or owners of the water rights and approvals of applications demonstrate both of the following to the chief engineer:

(A) It is not practical or desirable to have a complete overlap.

(B) Allowing an incomplete overlap of authorized places of use will not prejudicially and unreasonably affect the public interest. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-709; effective Sept. 22, 2000.)

5-3-50. Amending water use reports. (a) Except as specified in this subsection, each annual water use report submitted to the chief engineer pursuant to K.S.A. 82a-732, and amendments thereto, shall be considered the official report of water use information filed in the office of the chief engineer. Each person who files a request to correct a water use report shall ensure that the water use report is corrected in accordance with all of the following procedures, in order for the corrected report to be considered the official report:

(1) A written request to correct the report is submitted to the chief engineer on a form prescribed by the chief engineer.

(2) Each requested change in the water use report is documented by independent, verifiable supporting information, including fuel records, power records, crop production records, county appraiser records, natural resource conservation service records, crop insurance records, other similar types of records, and any combination of these records. The independent, verifiable supporting information may be supported by an affidavit from one or more competent, disinterested persons who have actual personal knowledge of the facts.

(3) The written request, including the supporting documentation, is verified upon oath or affirmation to be accurate and complete to the best knowledge of the person filing the request.

(4) The person filing the request to change a water use report sustains the burden to show the following:

(A) How the water use report on file in the office of the chief engineer is erroneous or incomplete; and

(B) that the proposed changes are the most complete and accurate water use information available.

(b) The right to perform the following shall be reserved by the chief engineer:

(1) Contest the accuracy and completeness of any water use report filed with the chief engineer, or corrected in accordance with this regulation, to show that the water use report is inaccurate, incomplete, false, or fraudulent; and

(2) make a determination of the actual water use based on the best available information. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706a and K.S.A. 82a-732; effective Aug. 13, 2004.)

5-3-6. Forfeiture, revocation and dismissal. Failure of the applicant or his or her successors

to comply with the provisions of the approval of application and permit to proceed and its terms, conditions and limitations without good cause shall result in the forfeiture of the priority date, revocation of the permit and dismissal of the application. (Authorized by K.S.A. 82a-706a; modified, L. 1978, ch. 460, May 1, 1978.)

5-3-6a. Sealing diversion works. (a) If the chief engineer or any authorized representative has reasonable cause to believe that any person has failed to obey an order or a notice and directive of the chief engineer to cease and desist from operating a diversion works, the chief engineer or authorized representative may place a seal, or a chain and padlock, on the diversion works or any part of the diversion works in a manner that renders the diversion works inoperable without breaking the seal, chain, or padlock.

(b) The chief engineer or any authorized representative may place a seal on any water flowmeter or measuring chamber in a manner that prevents removal of the water flowmeter from the measuring chamber and prevents access to the internal working parts of the water flowmeter without breaking the seal. The seal may include a bolt, chain, lock, or any combination of these, or any other mechanism.

(c) For purposes of this regulation, "authorized representative" shall include any employee of the division or a groundwater management district that has been delegated this authority by the chief engineer in writing. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706a, K.S.A. 2016 Supp. 82a-706b and K.S.A. 82a-706c; effective May 1, 1980; amended March 17, 2017.)

5-3-7. Request for extension of time. (a) For applications filed after May 1, 1978, any request for extension of time either for completion of diversion works or for perfecting the appropriation shall be submitted to the chief engineer before the expiration of the time allowed for completing the diversion works or perfecting the appropriation. The request shall be signed by the holder of the approval of application and permit to proceed, by the owner of the land to be irrigated, by an authorized official of a municipality, corporation or partnership, or by any other person that has a recognized interest in the appropriation. Failure to request an extension of time to perfect the appropriation within the time allowed shall limit the water appropriation right to the extent perfected in accordance

with the terms, conditions, and limitations set forth in the approval of application.

(b) The request for an extension of time either for completion of diversion works or for perfecting the appropriation shall be accompanied by the statutorily required filing fee and shall include the following information:

- (1) The application number;
- (2) the date by which the diversion works will be completed or the appropriation will be perfected;
- (3) the progress that has been made toward completing the diversion works or perfecting the appropriation;
- (4) if for irrigation, the number of acres of land to which water has been applied during one calendar year;
- (5) the reason why the diversion works have not been completed or the appropriation has not been perfected; and
- (6) the plans for completing the diversion works or perfecting the appropriation. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-714(e); modified, L. 1978, ch. 460, May 1, 1978; amended Oct. 24, 2003.)

5-3-8. Certificate of appropriation. Upon determination that the appropriation diversion works have been completed and an appropriation right perfected in conformity with an approved application and plans, the chief engineer shall issue a certificate of appropriation setting forth the extent to which the appropriation right was perfected. No appropriation shall be determined for a quantity of water or a diversion rate in excess of that set forth in the approval of application and permit to proceed or in excess of that found to have been actually applied to the approved beneficial use or for any quantity of water found to have been wasted during the calendar year of record used as the basis for perfecting the appropriation right. (Authorized by K.S.A. 82a-706a; modified, L. 1978, ch. 460, May 1, 1978.)

5-3-9. Public interest. (a) In accordance with K.S.A. 82a-711(b)(5), as amended, in ascertaining whether a proposed use will prejudicially and unreasonably affect the public interest, the chief engineer shall also take into consideration the quantity, rate and availability of water necessary to:

(1) satisfy senior domestic water rights from the stream;

(2) protect senior water rights from being impaired by the unreasonable concentration of naturally occurring contaminants; and

(3) over the long term reasonably recharge the alluvium or other aquifers hydraulically connected to the stream.

(b) Unless otherwise provided by regulation, it shall be considered to be in the public interest that only the safe yield of any source of water supply, including hydraulically connected sources of water supply, shall be appropriated. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 1993 Supp. 82a-711; effective Nov. 28, 1994.)

5-3-10. Availability of water for appropriation—safe yield. (a) Except as set forth in subsection (b) and K.A.R. 5-3-16 and K.A.R. 5-3-17, the approval of any new application to appropriate groundwater or surface water for beneficial use, except for domestic use, temporary use and term permits for five years or less, shall not cause the safe yield of the source of water supply to be exceeded, neither shall it otherwise prejudicially and unreasonably affect the public interest. The approval of term permits shall not allow impairment nor prejudicially and unreasonably affect the public interest.

(b) This regulation shall not apply to an application which proposes:

(1) to divert water from a source of water supply subject to a different safe yield, allowable appropriation, depletion or other similar type of criteria adopted by rule and regulation of the chief engineer or intensive groundwater use control area order of the chief engineer issued pursuant to K.S.A. 82a-1036 et seq., or

(2) to use water in a manner so that there is no significant net consumptive use of the local source of supply either in quantity or availability of water for use by other appropriators.

(c) If a total quantity of water that is available for appropriation in any basin, subbasin, stream reach or other hydrologic unit has been determined by the chief engineer prior to the date the application is filed, the total quantity of water authorized by vested rights, prior appropriations, requests by prior unapproved applications and the proposed appropriation shall be determined by the chief engineer.

(1) If the total quantity of water authorized and requested by applications with earlier filing dates is less than or equal to the total annual quantity of water determined to be available for appropri-

tion, or if no total quantity of water available was determined by the chief engineer prior to the date the application was filed, the following procedures shall be used by the chief engineer to further evaluate the applications:

(A) K.A.R. 5-3-11 shall be used to evaluate an application to appropriate groundwater from an unconfined aquifer;

(B) K.A.R. 5-3-14 shall be used to evaluate an application to appropriate groundwater from a confined aquifer; or

(C) K.A.R. 5-3-15 shall be used to evaluate an application to appropriate surface water.

(2) If the total quantity of water authorized and requested exceeds the limit determined by the chief engineer pursuant to this subsection, the application shall be denied or considered only for the quantity available. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 1993 Supp. 82a-711; effective Nov. 28, 1994.)

5-3-11. Availability of water for appropriation—safe yield; unconfined groundwater aquifers. (a) Each application to appropriate groundwater from an unconfined aquifer shall be processed in accordance with this regulation.

(b) To determine the safe yield available for appropriation from an unconfined aquifer at a specific location, the following procedure shall be used by the chief engineer:

(1) The amount of calculated recharge occurring within the area of consideration shall be determined by the chief engineer.

(2) That amount shall be multiplied by the percent of calculated recharge determined by the chief engineer to be available nondomestic groundwater and surface water for appropriation.

(3) The total quantity of water authorized and requested in the same area of consideration shall be subtracted from the number derived from paragraph (b)(2) above. If a water right or permit authorizes more than one point of diversion and not all of them are within the area of consideration, the authorized quantity shall be divided equally between or among all the points of diversion, unless information is available to more accurately distribute the authorized quantity between or among the multiple points of diversion.

(c) (1) If the quantity of water remaining is sufficient to satisfy the proposed application, then the safe yield criteria shall be deemed to have been met, unless there are other relevant factors that need to be taken into account in order to protect

the public interest. The application shall then be processed according to other criteria in effect in that area.

(2) If there is sufficient water available to reasonably satisfy part of the request, then the application shall be approved for the quantity available if the remaining quantity is reasonable for the proposed use and the application meets the other applicable criteria in that area.

(3) If no water is available to satisfy the proposed application, then the application shall be denied by the chief engineer.

(d)(1) In making a safe yield calculation, unless the context clearly requires otherwise, the following words and phrases shall have the meanings ascribed to them:

(A) “Circle” means a circle with a two-mile radius, with the proposed point of diversion as the center.

(B) “Area of consideration” means the portion of the two-mile circle located within the limits of the unconfined aquifer expressed in acres, including any area of the circle located within the boundaries of a groundwater management district. The area of consideration shall not include any portion of the circle located outside the state of Kansas.

(C) “Total quantity of water” means the total combined authorized annual quantities under all groundwater rights and approvals of applications, and requested by pending applications with a senior priority in that unconfined aquifer except for domestic use, temporary permits, and term permits for five or fewer years with priority dates senior to the proposed application and with points of diversion located within the area of consideration.

(D) “Calculated recharge” means that portion of the average annual precipitation that becomes recharge to the unconfined aquifer, calculated using the data shown on water resources investigations report 87-4230, plate no. 4, dated 1987, prepared by the United States geological survey, hereby adopted by reference, interpolated to the nearest tenth of an inch, unless better or more specific recharge data for the area of consideration, basin, or aquifer is supplied by the applicant or is already available to the chief engineer.

(2) The calculated recharge in the Kansas river alluvium shall be determined by taking 25% of the average annual rainfall in the area of consideration as taken from figure 2, United States geological survey water resources investigation report 92-4137, dated 1993, hereby adopted by reference, interpolated to the nearest 0.1 of an inch.

(3) For each application to appropriate groundwater from an unconfined aquifer filed on or after the effective date of this regulation, the percentages of calculated recharge that shall be considered to be available for appropriation shall be determined using the following table:

Percent of Calculated Recharge Available for Appropriation	River Basin	Percent of Calculated Recharge Available for Appropriation	River Basin
(A) 100% plus the recharge from the Missouri River available to the well, as calculated by a Jenkins or similar stream-depletion technique	Missouri		Elk River [°] Fall River [°] Kansas River ^{°°} Little Arkansas River above GMD No. 2 [°] Lower Republican River Basin outside the effective alluvium and the Belleville formation that contributes significant baseflow to a stream. ^{°°} Neosho River [°] Ninnescah River [°] Saline River ^{°°} Salt Creek ^{°°} Smoky Hill above its confluence with the Saline River ^{°°} Solomon River ^{°°} South Fork Ninnescah River (except Smoots Creek) [°] Upper Republican Basin outside areas closed to new appropriations as set forth in paragraph (d)(5) of this regulation. ^{°°}
(B) 100%	Arkansas River below Hutchinson [°] Big Blue River ^{°°} Black Vermillion River ^{°°} Delaware River ^{°°} Little Arkansas River below GMD No. 2 [°] Little Blue River ^{°°} Little Osage River ^{°°} Lower Republican River Basin outside the effective alluvium and the Belleville formation that does not contribute significant baseflow to a stream ^{°°} Marais des Cygnes River ^{°°} Mill Creek ^{°°} Marmaton River ^{°°} Nemaha River ^{°°} Pottawatomie Creek ^{°°} Smoky Hill River below its confluence with the Saline River ^{°°} Spring River ^{°°} Stranger Creek ^{°°} Sugar Creek ^{°°} Vermillion Creek ^{°°} Wakarusa River ^{°°} Walnut River [°] Any hydrologic unit that does not contribute significant baseflow to a stream.	(D) 50%	Verdigris River [°] Any other basin in Kansas not specifically identified Any hydrologic units in the following river basins that contribute significant baseflow to a stream: Bluff Creek-Chikaskia River [°] Bluff Creek-Cimarron River [°] Chikaskia River [°] Cimarron River outside GMD No. 3 [°] Medicine Lodge River [°] North Fork Ninnescah River [°] Rattlesnake Creek [°] Salt Fork Arkansas River [°] Sandy Creek [°] South Fork Ninnescah River (Smoots Creek only) [°]
(C) 75%	Any hydrologic units in the following river basins that contribute significant baseflow to a stream: Arkansas River above Hutchinson [°] Caney River [°] Cottonwood River [°] Cow Creek outside the boundaries of GMD No. 2 and GMD No. 5 [°]		

[°] Located in Arkansas River Basin

^{°°} Located in Kansas River Basin

(4) The total quantity of water and the percent of calculated recharge originally available to be appropriated for nondomestic groundwater and surface water use in all or part of the following basins, subbasins, stream reaches, and other hydrologic

units identified in electronic data file unitbsn.e00, dated July 30, 1997, prepared by the division of water resources, Kansas department of agriculture

and hereby adopted by reference for the purpose of defining the boundaries of the hydrologic units, shall be determined using the following table:

South-Central Kansas Designated Unit Areas

Map Label	Effective Date	Area (acres)	Recharge Rate (in/yr)	Recharge Quantity (Ac-ft/yr)	Percentage of Recharge to Appropriate	Original Quantities Available (Ac-ft/yr)	General Location (Twp.-Range)	Abbreviation for Portion of Basin or Basins

* Revision is effective the date of this regulation.

(5) The following hydrologic units, which have been determined by the chief engineer to be fully appropriated based on the safe yield criteria, shall be closed to further new surface water and groundwater appropriations except for domestic use, temporary permits, and term permits for five years or less:

(A) Big Creek, its tributaries and their valley alluviums, and any other aquifer that has a substantial hydraulic connection to an alluvium;

(B) Beaver Creek and Little Beaver Creek, their tributaries and their alluviums, and any other aquifer that has a substantial hydraulic connection to an alluvium;

(C) North Fork Solomon River, its tributaries and their alluviums, and any other aquifer that has a substantial hydraulic connection to an alluvium;

(D) Prairie Dog Creek, its tributaries and their alluviums, and any other aquifer that has a substantial hydraulic connection to an alluvium;

(E) Sappa Creek, its tributaries and their alluviums, and any other aquifer that has a substantial hydraulic connection to an alluvium;

(F) South Fork of the Solomon River, its tributaries and their alluviums above Glen Elder Dam, and any other aquifer that has a substantial hydraulic connection to an alluvium; and

(G) Walnut Creek, its tributaries and their alluviums, and other hydraulically connected aquifers outside the boundaries of the intensive groundwater use control area created by order of the chief engineer shall be those set forth below:

(6) “Technical guidelines for determining the availability of groundwater for appropriation in the Lower Republican River Basin and Belleville Formation and the availability of surface water for appropriation in the Lower Republican River Basin,” adopted by the chief engineer, division of water resources, Kansas department of agriculture, on October 1, 1999, is hereby adopted by reference as determining the availability of groundwater for appropriation in the lower Republican River basin and Belleville formation and the availability of surface water for appropriation in the lower Republican River basin.

(7) (A) All applications for a permit to appropriate groundwater from the area described in paragraph (7) (B) for any beneficial use, except for domestic use, temporary permits, and short-term permits for five or fewer years, shall be accepted for filing and given a file number, if acceptable for filing. The application shall be returned by the chief engineer, and the reason that the application

will be denied shall be specified by the chief engineer. The applicant shall be given 30 days to show cause why the application should not be denied. If the applicant does not show good cause, the application shall be dismissed.

(B) The area is described as sections 17, 18, 19, 20, township 7 south, range 6 west, and sections 13, 14, township 7 south, range 7 west, all in Mitchell County, Kansas.

(C) All applications for permits to appropriate groundwater from sections 29 and 30 in township 7 south, range 6 west, and sections 12, 15, 16, 21, 22, 23, 24, 25, 26, and 27 in township 7 south, range 7 west, all in Mitchell County, Kansas, for any beneficial use, except for domestic use, temporary permits, and term permits for five or fewer years, shall be processed based on the criteria set forth below in paragraph (7) (D).

(D) No new wells shall be allowed in the area described in paragraph (7) (C) above if the proposed well would produce one foot or more of additional drawdown at any existing well in that area and if the proposed well was pumped continuously for 45 days (1,080 hours) at the rate requested on the application. This analysis shall be done by using the Theis equation, with a coefficient of transmissivity of 71,000 gallons per day per foot (gpd/ft) and a coefficient of storage of 0.02.

(E) Any application for a change in the point of diversion filed for a well located in the areas described in paragraphs (7) (B) and (C) above shall be limited to a move of no more than 100 feet, unless the applicant can show the chief engineer that the proposed move will not prejudicially and unreasonably affect the public interest, will not impair existing water rights, and otherwise complies with the provisions of K.S.A. 82a-708b, and amendments thereto. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 1999 Supp. 82a-711; effective Nov. 28, 1994; amended Sept. 22, 2000.)

5-3-12. (Authorized by K.S.A. 82a-701(g), 82a-706a; effective May 1, 1980; revoked May 1, 1987.)

5-3-13. Dewatering of construction sites.

The chief engineer shall limit the time in which water may be withdrawn for dewatering purposes. Any water right that may be perfected by the dewatering project shall be deemed abandoned and terminated upon the completion of the dewatering project. Any extension of time in which to complete the project must be requested in writing

by the applicant prior to the expiration date on the permit. (Authorized by K.S.A. 82a-706a and 82a-712; effective May 1, 1980.)

5-3-14. Availability of water for appropriation—safe yield; confined groundwater aquifers. (a) Each application to appropriate water from a confined aquifer shall be processed on a case by case basis so that the safe yield of the source of water supply is not exceeded.

(b) Until a specific regulation is adopted by the chief engineer for the confined source of water supply, the analysis shall be made using the best information reasonably available to the chief engineer. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 1993 Supp. 82a-711; effective Nov. 28, 1994.)

5-3-15. Availability of water for appropriation—safe yield; surface water. (a) Each application filed to directly divert the natural flow of the Kansas river, the Missouri river, the Big Blue river, the Spring river, or their tributaries, shall:

(1) be processed in accordance with K.A.R. 5-3-9; and

(2) meet all other requirements for the approval of a new application.

(b) The water right owner shall be required by the chief engineer to meet minimum desirable streamflows (MDS), assurance district target flows (assurance target flows) and division of water resources (DWR) target flows where applicable.

(c) Each application filed to directly divert the natural flow from any stream or tributary in the state of Kansas, except those streams listed in paragraph (a) of this regulation, shall have the following conditions of approval.

(1) If MDS or assurance target flows or DWR target flows have been set for that stream, and MDS administration has been requested by the Kansas water office, diversion of natural flow shall only be permitted if MDS, assurance target flows or DWR target flows, if applicable, are being met at the gage or gages immediately below the proposed point of diversion.

(2) Diversion of natural flow shall not take place unless there is water available to satisfy all demands by senior water rights and permits.

(3) The streamflow shall not be stopped at the first riffle below the point of diversion while diversion is taking place under the authority of that water right or permit.

(4) During the period October 1 through June 30, the verbal or written permission of the chief

engineer, or an authorized representative of the chief engineer, shall be obtained in order to divert water each time the applicant desires to divert water.

(5) The applicant shall be required to demonstrate that the direct diversion of streamflow is not necessary during the period July 1 through September 30 each calendar year because of lack of need; the availability of adequate water storage or alternative water supplies; or other similar reasons.

(6) During the period July 1 through September 30 each calendar year, no direct diversions of water shall be permitted unless written permission is obtained from the chief engineer or the chief engineer's authorized representative.

(d) Each application filed by a member of an operational assurance district for that stream shall be processed taking into consideration the provisions of the assurance district contract.

(e) Each application filed for a point of diversion which might divert water released from storage pursuant to an agreement between the state of Kansas and the federal government shall be processed taking into consideration the provisions of that agreement.

(f) Each application filed to divert the natural flow of any stream subject to a more specific regulation adopted by the chief engineer or an intensive groundwater use control area order issued by the chief engineer, for a basin or portion thereof, shall be processed in accordance with the provisions of that regulation or order. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 1993 Supp. 82a-711; effective Nov. 28, 1994.)

5-3-16. Safe yield; exemptions for up to 15 acre-feet of groundwater. (a) Each application to appropriate groundwater in any area of the state shall be exempt from meeting the safe yield criteria if all of the conditions in subsection (b) are met.

(b)(1) The proposed point of diversion will be located in an area that is outside a groundwater management district that is subject to safe yield criteria and meets either of the following conditions:

(A) Is not closed by regulation or intensive groundwater use control area order by the chief engineer to new nondomestic, nontemporary permits, and term permits for more than five years; or

(B) has not exceeded the quantity of water available to be appropriated in the hydrologic unit as set forth in K.A.R. 5-3-11.

(2) The sum of the annual quantity requested by the proposed appropriation and the total annual quantities authorized by prior permits and water rights allowed because of an exemption pursuant to this regulation does not exceed 15 acre-feet in a two-mile-radius circle surrounding the proposed point of diversion.

(3) The approval of the application does not authorize an additional quantity of water to be diverted from an existing authorized well with a nondomestic permit or water right, which would result in a total combined annual quantity of water authorized from that well in excess of 15 acre-feet.

(4) The approval of the application does not authorize an additional quantity of water to be used on a currently authorized nondomestic place of use in excess of 15 acre-feet.

(5) The maximum authorized rate of diversion does not exceed 50 gallons per minute.

(6) All other criteria for processing a new application to appropriate water at that location have been met.

(c) After an application has been approved pursuant to this regulation, no application to change that water right shall be approved if that approval would authorize the water use approved under that application to be diverted from any other point of diversion authorized at the time the application is filed or to be used on any other place of use authorized at the time the application for change is filed. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 2007 Supp. 82a-711; effective Nov. 28, 1994; amended Sept. 22, 2000; amended Oct. 31, 2008.)

5-3-16a. Closed areas; exemptions for up to five acre-feet of groundwater. In any area of the state that is outside a groundwater management district and an intensive groundwater use control area (IGUCA) and that is closed to new appropriations of groundwater by regulation except for domestic use, temporary permits, and term permits for five or fewer years, applications to appropriate groundwater shall be exempt from meeting the safe yield criteria and the regulation closing the area to new appropriations if the chief engineer finds that all of the following criteria are met: (a) The sum of the annual quantity of water requested by the proposed appropriation and the total annual quantities of water authorized by prior approvals of applications allowed because of an exemption pursuant to this regulation does not

exceed five acre-feet in a two-mile-radius circle surrounding the proposed point of diversion.

(b) The annual quantity of water requested is reasonable for the proposed beneficial use of water.

(c) All other criteria for processing a new application to appropriate water at that location, including well spacing criteria, have been met.

(d) The approval of the application does not authorize an additional quantity of water out of an existing well that would result in a total combined annual quantity of water authorized from that well in excess of five acre-feet per calendar year.

(e) The proposed beneficial use of water will significantly benefit the public interest and help maximize economic development. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706a, K.S.A. 2002 Supp. 82a-711, and K.S.A. 2002 Supp. 82a-1904; effective Oct. 24, 2003.)

5-3-17. Safe yield; miscellaneous exemptions. In any area of the state which is subject to safe yield criteria, and outside a groundwater management district or an intensive groundwater use control area closed to new non-domestic, non-temporary uses, each application to appropriate groundwater for a beneficial use shall be exempt from meeting the safe yield criteria if the chief engineer finds that:

(a) the proposed use has occurred continuously since prior to the effective date of this regulation;

(b) the proposed use could have reasonably been classified by the division of water resources as a domestic use at the time the use began; and

(c) all other requirements in effect for the approval of a new application to appropriate water at that location have been met. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 1993 Supp. 82a-711; effective Nov. 28, 1994.)

5-3-18. Applicant's opportunity to submit additional information. (a) If at any stage of processing an application, it is determined by the chief engineer that an application does not meet the safe yield criteria, the applicant shall be notified by the chief engineer in writing prior to denial of the application that the safe yield requirements have not been met and the reason for the proposed denial. In this written notice, the chief engineer shall allow the applicant 15 days to request time in which to submit additional information to show why the application should be approved.

(b) Within 15 days the applicant shall either submit the additional information or file a written

request for a reasonable amount of time to submit an engineering report or similar type of hydrologic analysis to show that approval of the application will not cause the safe yield of the source of water supply to be exceeded.

(c) If the applicant fails to timely show to the satisfaction of the chief engineer that the application can be approved, then the application shall be denied by the chief engineer. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 1993 Supp. 82a-711; effective Nov. 28, 1994.)

5-3-19. Maximum reasonable annual quantity of water for irrigation use. (a) For applications filed before the effective date of this regulation, the maximum annual quantity of water reasonably necessary to irrigate crops shall be determined as follows:

(1) In that area of Kansas located between the eastern border of Kansas and the western border of range 6 east, the maximum reasonable annual quantity of water shall not exceed one acre-foot of water per acre irrigated.

(2) In that area of Kansas located between the eastern border of range 5 east and the western border of range 20 west, the maximum reasonable annual quantity of water shall not exceed 1½ acre-feet of water per acre irrigated.

(3) In that area of Kansas located between the eastern border of range 21 west and the western border of Kansas, the maximum reasonable annual quantity of water shall not exceed two acre-feet of water per acre irrigated.

(b) On and after the effective date of this regulation, the maximum annual quantity of water reasonably necessary to irrigate crops shall be determined by multiplying the number of irrigated acres by the county value found on the map adopted by reference in K.A.R. 5-3-24. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706a, K.S.A. 82a-707(e), and K.S.A. 2002 Supp. 82a-711; effective Sept. 22, 2000; amended Oct. 24, 2003.)

5-3-20. Maximum reasonable annual quantity of water approvable for a new appropriation of water for irrigation use. (a) The maximum reasonable annual quantity of water that may be approved for use on irrigated land for applications filed before the effective date of this regulation shall be limited to the following:

(1) The quantity of water available for appropriation as determined by the safe yield, allowable ap-

propriation or similar type of limitation adopted by regulation of the chief engineer for the area in which the proposed point of diversion will be located;

(2) the quantity of water reasonably physically available from the source of water supply based on the physical characteristics of the source of water supply and the proposed diversion works; and

(3) the quantity of water reasonably necessary to irrigate crops in the region of the state where the proposed place of use is located as set forth in K.A.R. 5-3-19(a). The authorized quantity shall be determined by multiplying the number of acres approved to be irrigated by the quantity per acre set forth in K.A.R. 5-3-19(a).

(b) The maximum reasonable annual quantity of water that may be approved for use on irrigated land for applications filed on or after the effective date of this regulation shall be limited to the following:

(1) The quantity of water available for appropriation as determined by the safe yield, allowable appropriation or similar type of limitation adopted by regulation of the chief engineer for the area in which the proposed point of diversion will be located;

(2) the quantity of water reasonably physically available from the source of water supply based on the physical characteristics of the source of water supply and the proposed diversion works; and

(3) the quantity of water reasonably necessary to irrigate crops in the region of the state where the proposed place of use is located as set forth in K.A.R. 5-3-19(b).

(c) The quantity specified in subsection (a) or (b) may be exceeded only if the applicant demonstrates both of the following to the chief engineer:

(1) Because of specialty crops or other unusual conditions, the quantity specified in K.A.R. 5-3-19 is insufficient.

(2) The requested quantity is reasonable for the intended irrigation use, is not wasteful, and will not otherwise prejudicially and unreasonably affect the public interest. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-707(e), K.S.A. 1999 Supp. 82a-711, and K.S.A. 82a-712; effective Sept. 22, 2000.)

5-3-21. Perfection of a water right for irrigation use. (a) For applications with a priority date before the effective date of this regulation, the maximum reasonable annual quantity of water that may be perfected for irrigation use shall not exceed the following:

(1) The maximum annual quantity of water actually applied to beneficial use in any one calendar

year in accordance with the terms, conditions, and limitations of the approval of application during the perfection period; and

(2) the quantity of water reasonably necessary to irrigate crops in the region of the state where the place of use is located as set forth in K.A.R. 5-3-19(a). The reasonable quantity shall be determined by multiplying the number of acres actually irrigated during the year of record by the quantity per acre as set forth in K.A.R. 5-3-19(a).

(b) For applications with a priority date on or after the effective date of this regulation, the maximum reasonable annual quantity of water that may be perfected for irrigation use shall not exceed the following:

(1) The maximum annual quantity of water actually applied to beneficial use in any one calendar year in accordance with the terms, conditions, and limitations of the approval of application during the perfection period; and

(2) the quantity of water reasonably necessary to irrigate crops in the region of the state where the place of use is located as set forth in K.A.R. 5-3-19(b). The reasonable quantity shall be determined by multiplying the number of acres actually irrigated during the year of record by the quantity per acre set as forth in K.A.R. 5-3-19(b).

(c) The quantity specified in subsection (a) or (b) may be exceeded only if the water right owner demonstrates both of the following to the chief engineer:

(1) Because of specialty crops or other unusual conditions, the quantity specified in K.A.R. 5-3-19 was insufficient.

(2) A greater quantity was reasonable for the intended irrigation use, was not wasteful, and did not otherwise prejudicially and unreasonably affect the public interest. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-707(e) and K.S.A. 1999 Supp. 82a-714; effective Sept. 22, 2000.)

5-3-22. Maximum reasonable quantity of water for livestock and poultry. (a) The following quantities shall be deemed the maximum quantity of water reasonable for nondomestic livestock and poultry water use:

Livestock/ poultry	Drinking water (gallons per head per day)	Additional quantities for servicing/flushing (gallons per head per day)
Cattle, beef	15	0 (open lot) 100 [confined building capacity (cbc)]
Cattle, dairy	35	100 (cbc)

Livestock/ poultry	Drinking water (gallons per head per day)	Additional quantities for servicing/flushing (gallons per head per day)
Swine		
finishing	5	15 (cbc)
nursery	1	4 (cbc)
sow and litter	8	35 (cbc)
gestating sow	6	25 (cbc)
Sheep	2	0 (open lot) 15 (cbc)
Horses	12	0 (open lot) 100 (cbc)
Poultry		
chickens (100 layers)	9	200 (cbc)
turkeys (100)	30	400 (cbc)

(b) The maximum reasonable quantity of water that may be approved for nondomestic livestock and poultry use for applications approved on or after the effective date of this regulation shall be limited as set forth in subsection (a) above. The quantities set forth in subsection (a) may be exceeded only if the applicant demonstrates both of the following to the chief engineer:

(1) The requested quantity is reasonable for the intended use.

(2) This quantity is not wasteful and will not otherwise prejudicially and unreasonably affect the public interest.

(c) For all other types of nondomestic livestock, poultry, birds, and animals, the maximum quantity of water approved for beneficial use shall be reasonable.

(d) The maximum reasonable quantity of water that may be perfected for nondomestic livestock or poultry use shall not exceed the quantities set forth in subsections (a), (b) and (c) above, unless the water right owner demonstrates both of the following to the chief engineer:

(1) A larger quantity of water was actually applied to beneficial use within the terms, conditions, and limitations of the permit within the perfection period.

(2) The quantity used was not wasted. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-707(e), K.S.A. 1999 Supp. 82a-711, K.S.A. 82a-712, and K.S.A. 1999 Supp. 82a-714; effective Sept. 22, 2000.)

5-3-23. Maximum reasonable annual quantity approvable for irrigation use for an application for change in place of use and a request to reduce a water right; exceptions. (a) Except as provided in subsections (c), (d), and (e), for water rights with a priority date before September 22, 2000, the maximum reasonable

annual quantity of water that may be approved for either of the following shall be that quantity of water reasonably necessary to irrigate crops in the region of the state where the proposed place of use is located as specified in K.A.R. 5-3-19(a):

(1) An application for change in place of use for irrigation filed pursuant to K.S.A. 82a-708b and amendments thereto; or

(2) a request to reduce the authorized place of use for irrigation for a water right filed pursuant to K.A.R. 5-7-5.

(b) Except as provided in subsections (c), (d), and (e), for water rights with a priority date on or after September 22, 2000, the maximum reasonable annual quantity of water that may be approved for either of the following shall be that quantity of water reasonably necessary to irrigate crops in the region of the state where the proposed place of use is located as specified in K.A.R. 5-3-19(b):

(1) An application for change in place of use for irrigation filed pursuant to K.S.A. 82a-708b and amendments thereto; or

(2) a request to reduce the authorized place of use for a water right filed pursuant to K.A.R. 5-7-5.

(c) The maximum reasonable quantities allowable in subsections (a) and (b) shall not exceed either of the following:

(1) The applicable quantity specified in either subsection (a) or (b); or

(2) the maximum quantity of acre-feet per acre authorized by the vested water right or certificate of appropriation, whichever is greater. The maximum authorized quantity of acre-feet per acre shall be calculated by dividing the maximum annual quantity of water authorized when the application for change or request to reduce is filed by the number of acres authorized when the application for change is filed.

(d) The quantities specified in subsections (a), (b), and (c) may be exceeded only if the applicant demonstrates to the chief engineer that the requested quantity is reasonable for the intended irrigation use, is not wasteful, and will not otherwise prejudicially and unreasonably affect the public interest and if either of the following conditions is met:

(1) Because of specialty crops or other unusual conditions, the quantity specified in K.A.R. 5-3-19(a) is insufficient.

(2) A request for reduction of the authorized place of use is made for a water right located in both the Rattlesnake Creek Subbasin and the Big

Bend Groundwater Management District Number Five to comply with the agriculture water enhancement program and both of the following conditions are met:

(A) The reduction of the authorized place of use will lead to an overall reduction in water use.

(B) The reduction of the authorized place of use pursuant to paragraph (d)(2) requires the approval of any future reduction or change to a water right so reduced to meet the requirements in subsections (a), (b), (c), and (e) of this regulation and in K.A.R. 5-5-11.

(e) The maximum annual quantity of water approved pursuant to this regulation shall not exceed the maximum annual quantity of water authorized by the water right when the change application is approved. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 2009 Supp. 82a-707(e) and K.S.A. 2009 Supp. 82a-708b; effective Sept. 22, 2000; amended, T-5-8-16-10, Aug. 16, 2010; amended Nov. 19, 2010.)

5-3-24. Reasonable quantity for irrigation use. The Kansas department of agriculture, division of water resources' map titled "reasonable quantities for irrigation use in Kansas, by county," dated October 21, 1999, is hereby adopted by reference. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-707(e), K.S.A. 1999 Supp. 82a-711, and K.S.A. 1999 Supp. 82a-714; effective Sept. 22, 2000.)

5-3-25. Conditions on permits and certificates. (a) All terms, conditions, and limitations placed on an approval of application by the chief engineer pursuant to the provisions of K.S.A. 82a-712, and amendments thereto, shall remain in full force and effect until expressly modified or removed by the chief engineer.

(b) Unless the terms and conditions are expressly modified or removed by the subsequent approval, certification, or other order of the chief engineer, none of the following shall modify or remove any of the terms, conditions, and limitations placed on the original approval of applications or water right:

(1) The approval of an application to change the place of use, the point of diversion, or the use made of water under the authority of K.S.A. 82a-708b and amendments thereto;

(2) the issuance of a certificate of appropriation pursuant to K.S.A. 82a-714 and amendments thereto; or

(3) the issuance of any other findings and order relative to the approval of application or water right. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 1999 Supp. 82a-708b, K.S.A. 1999 Supp. 82a-711, K.S.A. 82a-712, and K.S.A. 1999 Supp. 82a-714; effective Sept. 22, 2000.)

5-3-26. Closed townships in Pawnee and Buckner drainage basins in Pawnee, Hodge-man, Ness, and Finney counties. (a) Except as specified in subsection (c), the following townships in the Pawnee and Buckner drainage basins shall be closed to new appropriations of water:

- (1) T 20 S:
 - (A) R 19 W through R 26 W;
 - (B) R 18 W, section 7 and sections 17 through 36; and
 - (C) R 17 W, section 31;
- (2) T 21 S:
 - (A) R 30 W, sections 1 through 4, 9 through 16, 21 through 28, and 33 through 36;
 - (B) R 21 W through R 29 W;
 - (C) R 20 W and R 19 W, sections 1 through 6; and
 - (D) R 18 W, sections 1 through 24;
- (3) T 22 S:
 - (A) R 30 W, sections 1 through 4, 9 through 16, 21 through 28, and 33 through 36;
 - (B) R 21 W through R 29 W;
 - (C) R 19 W and R 20 W, sections 13 through 36;
 - (D) R 18 W, sections 20 through 36; and
 - (E) R 17 W, sections 20, 21, and 30;
- (4) T 23 S:
 - (A) R 22 W through R 26 W;
 - (B) R 21 W, sections 1 through 24, and 27 through 32;
 - (C) R 20 W, sections 1 through 18;
 - (D) R 19 W, sections 1 through 12 and 14 through 18; and
 - (E) R 18 W, sections 3 through 10; and
- (5) T 24 S:
 - (A) R 23 W through R 26 W;
 - (B) R 22 W, sections 1 through 23 and 26 through 35; and
 - (C) R 21 W, sections 5, 6, and 7.

(b) Except as specified in subsection (c), all new applications that propose a point of diversion in any of the areas described in subsection (a) that are pending approval on the effective date of this regulation shall be dismissed.

(c) The closure of the townships listed in subsection (a) to new appropriations of water shall not apply to the following types of wells:

- (1) Wells for domestic use;

(2) wells authorized by temporary permits; and

(3) wells authorized by term permits of fewer than five years.

This regulation shall be effective on and after October 25, 2002. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 2001 Supp. 82a-711 and K.S.A. 82a-721; effective Sept. 22, 2000; amended, T-5-6-27-02, June 27, 2002; amended Oct. 25, 2002.)

5-3-27. Equus Beds special groundwater quality area. (a) A special groundwater quality area located within the boundaries of the Equus Beds groundwater management district no. 2 shall be hereby established in the following area consisting of approximately 36 square miles in north-west Harvey County, south-central McPherson County, and northeast Reno County, Kansas:

(1) Sections 3 through 10, 15 through 22, and 27 through 34, of township 22 south, range 3 west, Harvey County;

(2) sections 31 through 34, township 21 south, range 3 west, and section 36, township 21 south, range 4 west, McPherson County; and

(3) sections 1, 12, 13, 25, 26, and 36, township 22 south, range 4 west, Reno County, Kansas.

(b) Each application for a new appropriation of groundwater, a newly constructed well, or a change in the point of diversion for a well within the area shall be reviewed by the chief engineer to determine the effect of the proposed appropriation or well on the movement of saltwater pollution in the area.

(c) A test well log shall accompany each type of application described in subsection (b) within the area described in subsection (a) above and shall include the following information:

(1) Depth to bedrock;

(2) a water quality analysis of water taken from the bottom 20 feet of the aquifer, including sodium and chloride concentrations; and

(3) a water quality analysis of water taken within the top 20 feet of the aquifer, including specific conductance and chloride concentrations.

(d) If the chief engineer can not determine whether the proposed application will affect the movement of saltwater pollution in the area in a manner that is adverse to the public interest or that will cause impairment to other water rights by causing an unreasonable deterioration of the water quality, then the applicant shall submit any information the chief engineer needs to make that determination. The information shall be submit-

ted within a reasonable time period specified by the chief engineer.

(e) The chief engineer shall submit the proposed application to the board of the Equus Beds groundwater management district no. 2 for its review and recommendation. The board shall have 30 days to review the application and provide its recommendation to the chief engineer. The recommendation of the board shall be considered by the chief engineer in making a decision as to whether the application can be approved as filed or modified.

(f) The application shall be dismissed and its priority forfeited if either of the following conditions is met:

(1) The chief engineer determines that approval of the application will affect the movement of saltwater pollution in the area in a manner that will prejudicially and unreasonably affect the public interest or that will cause impairment to other water rights by causing an unreasonable deterioration of the water quality because of saltwater pollution.

(2) The applicant fails to submit the information requested by the chief engineer within the time specified.

(g) The application shall be approved if both of the following conditions are met:

(1) The chief engineer determines that the approval of the application, as filed or modified, will not affect the movement of saltwater pollution in the area in a manner that is adverse to the public interest and will not cause impairment to other water rights by causing an unreasonable deterioration of the water quality because of saltwater pollution.

(2) The application meets all other statutory and regulatory criteria.

(h) In addition to reporting the information normally required in the water use reports required by K.S.A. 82a-732, and amendments thereto, each owner of a water right or approval of application shall also report the depth to the static water level in each well, in a manner acceptable to the chief engineer.

(i) All groundwater diversion works permitted in the Equus Beds special groundwater quality area shall be equipped with a water flowmeter that meets the specifications adopted by the chief engineer, except for domestic wells, temporary wells, and wells authorized by term permits for fewer than five years. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706c, K.S.A. 82a-709, K.S.A. 82a-710, K.S.A. 1999 Supp. 82a-711, and K.S.A. 82a-732; effective Sept. 22, 2000.)

5-3-28. Lyons special groundwater quality area. (a) A special groundwater quality area all in Rice County, Kansas, and partially located within the boundaries of the Big Bend groundwater management district no. 5 shall be hereby established in the following described area consisting of approximately 37 square miles in central Rice County, Kansas:

(1) Sections 33, 34, and 35 of township 19 south, range 8 west;

(2) sections 1-4, 9-16, 21-25, township 20 south, range 8 west;

(3) sections 7, 17-21, 27-34, township 20 south, range 7 west; and

(4) sections 3-5, township 21 south, range 7 west.

(b) Each application for a new appropriation of groundwater, a newly constructed well, or a change in point of diversion for a well proposed to be located within the area shall be reviewed by the chief engineer to determine whether the proposed appropriation will have any adverse effect on the movement and remediation of saltwater pollution south and east of Lyons, Kansas.

(c) A test well log shall accompany each type of application filed for a point of diversion described in subsection (b) that is proposed to be located within the area described in subsection (a), and shall include the following information:

(1) Depth to bedrock;

(2) a water quality analysis of water taken from the bottom 20 feet of the aquifer, including analysis of sodium and chloride concentrations; and

(3) a water quality analysis of water taken within the top 20 feet of the aquifer, including analysis of sodium and chloride concentrations.

(d) If the chief engineer can not determine whether the proposed application will affect the movement and cleanup of saltwater pollution south and east of Lyons in a manner that is adverse to the public interest or that will cause impairment to other water rights by causing an unreasonable deterioration of the water quality, then the applicant shall submit any information the chief engineer needs to make that determination. The information shall be submitted within a reasonable time period specified by the chief engineer.

(e) If the proposed point of diversion is located within the district, the proposed application shall be submitted by the chief engineer to the board of the district for review and recommendation. The board shall have 30 days to review the application and submit its recommendation to the chief en-

gineer. The recommendation of the board shall be considered by the chief engineer in making a decision as to whether the application can be approved as filed or modified.

(f) The application shall be dismissed and its priority forfeited if either of the following conditions is met:

(1) The chief engineer determines that approval of the application will affect the movement and cleanup of saltwater pollution south and east of Lyons in a manner that prejudicially and unreasonably affects the public interest or that will cause impairment to other water rights by causing an unreasonable deterioration of the water quality because of saltwater pollution.

(2) The applicant fails to submit the information requested by the chief engineer within the time specified.

(g) The application shall be approved if both of the following conditions are met:

(1) The chief engineer determines that the approval of the application, as filed or modified, will not affect the movement and cleanup of saltwater pollution south and east of Lyons in a manner that would prejudicially and unreasonably affect the public interest and will not cause impairment to other water rights by causing an unreasonable deterioration of the water quality because of saltwater pollution.

(2) The application meets all other applicable statutory and regulatory criteria. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706c, K.S.A. 82a-709, K.S.A. 82a-710, K.S.A. 1999 Supp. 82a-711, and K.S.A. 82a-732; effective Sept. 22, 2000.)

5-3-29. Ozark and Springfield plateau aquifers. (a) Except as specified in subsections (b) and (c), the Ozark aquifer and the Springfield plateau aquifer in the following townships in Cherokee, Crawford, Allen, Bourbon, Neosho, and Labette counties in Kansas shall be closed to new appropriations of water: ranges 20 east through 25 east and townships 26 south through 35 south.

(b) The closure of townships listed in subsection (a) to new appropriations of water shall not apply to the following types of wells:

- (1) Wells for domestic use;
- (2) wells authorized by temporary permits;
- (3) wells meeting the requirements of K.A.R. 5-3-16a; and
- (4) wells meeting both of the following conditions:

(A) Are authorized by a term permit of five or fewer years, which can be extended by the chief engineer not beyond December 31, 2010, and over which the chief engineer retains jurisdiction to dismiss or amend if necessary to prevent impairment of the water quantity, rate, or quality or to otherwise protect the public interest; and

(B) Are used as an alternate source of water supply that is actively being planned, financed, and constructed and that will be available no later than December 31, 2010.

(c) Notwithstanding the provisions of paragraph (b)(4)(A), the term permits may be extended by the chief engineer beyond December 31, 2010 or may be converted by the chief engineer to regular permits to appropriate water, if both of the following conditions are met:

(1) A study has been completed before December 31, 2010, determining the safe yield of the Ozark aquifer and the Springfield plateau aquifer.

(2) Extending the term of the term permit or converting the term permit to a regular permit to appropriate water will not result in any of the following:

- (A) Causing the safe yield to be exceeded;
- (B) impairing prior permits or water rights; or
- (C) prejudicially and unreasonably affecting the public interest. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706a and K.S.A. 2003 Supp. 82a-711; effective, T-5-8-23-04, Aug. 23, 2004; effective Nov. 29, 2004.)

Article 4.—DISTRIBUTION OF WATER BETWEEN USERS

5-4-1. Distribution of water between users when a prior right is being impaired. In responding to a complaint that a prior water right is being impaired, the following procedure shall be followed:

(a) Complaint. The complaint shall be submitted in writing to the chief engineer or that person's authorized representative. The chief engineer shall take no action until the written complaint is submitted and, for non-domestic groundwater rights, the information specified in paragraph (b) (2) is provided.

(b) Investigation. The chief engineer shall investigate the physical conditions involved, according to the water rights involved in the complaint.

(1) If the water right is domestic, the chief engineer may require the complainant to provide a written report similar to that described in paragraph (b)(2).

(2) If the water right claimed to be impaired is not a domestic right and its source of water is groundwater, the complainant shall provide to the chief engineer a written report completed within 180 days preceding the date of the complaint. Within 30 days of the complainant's request, the chief engineer shall provide the complainant with data from the division of water resources that is relevant to preparation of the required report. The complainant's report shall meet the following requirements:

(A) Be prepared by a licensed well driller, a professional engineer, or a licensed geologist;

(B) describe the construction and the components of the well;

(C) provide data to show the extent to which the well has fully penetrated the productive portions of the aquifer with water of acceptable quality for the authorized use; and

(D) provide testing and inspection data to show the extent to which the pump and power unit are in good working condition to make full use of the available aquifer.

(3) In assessing the complainant's written report, the chief engineer may use all relevant data, including historical data from water well completion records, Kansas geological survey bulletins, and other data in the water right files.

(4) If the area of complaint is located within the boundaries of a groundwater management district (GMD), the chief engineer shall notify the GMD of the complaint before initiating the investigation and shall give the board of directors of the GMD the opportunity to assist with the investigation.

(5) If the source of water is groundwater, the chief engineer may require hydrologic testing to determine hydrological characteristics as part of the investigation. The chief engineer shall provide notice to water right owners in a geographic area sufficient to conduct the hydrologic testing and to determine who could be affected by the actions made necessary by the results of the investigation. These water right owners shall be known as the potentially affected parties. As part of the investigation, the chief engineer may require access to points of diversion or observation wells and may require the installation of observation wells.

(6) Data acquired during the investigation shall be provided to the complainant and any other persons notified for review and comment at their request as the investigation proceeds.

(c) Report. The chief engineer shall issue a report stating the relevant findings of the investigation.

(1) If the complainant's water right is a domestic water right or has surface water as its source and the complainant claims impairment by the diversion of water pursuant to surface rights, the chief engineer shall provide a copy of the report to the complainant and to the potentially affected parties. This report shall constitute the final report of the investigation.

(2) If the complainant's water right is not a domestic right and has groundwater as its source or if the complainant's water right has surface water as its source and claims impairment by the diversion of water pursuant to groundwater rights, a copy of the report shall be provided by the division of water resources to the complainant and to the potentially affected parties. The report shall be posted by the division of water resources on the department of agriculture's web site. This report shall constitute the initial report of the investigation.

(A) If the initial report shows impairment, the potentially affected parties shall have the opportunity to submit written comments on the initial report within 30 days of its posting on the department's web site or a longer period if granted by the chief engineer. The chief engineer shall consider the written comments of the potentially affected parties.

(B) If the area of complaint is located within the boundaries of a GMD, the chief engineer shall provide a copy of the initial report to the GMD and shall consider any written comments submitted by the GMD board within 30 days of the posting of the initial report on the department's web site or a longer period if granted by the chief engineer.

(C) Nothing in this regulation shall prevent the chief engineer from regulating water uses that the chief engineer has determined are directly impairing senior water rights during the comment period or, if applicable, before obtaining written comments by the GMD board during the comment period.

(3) After reviewing comments on the initial report from potentially affected parties and, if applicable, from the GMD board, the chief engineer shall issue a final report, which shall be provided to the complainant, the potentially affected parties, and the GMD board if applicable and shall be posted on the department of agriculture's web site.

(4) The chief engineer may require conservation plans authorized by K.S.A. 82a-733, and amendments thereto, based on the initial and final reports.

(5) If the chief engineer's final report determines impairment and the source of water is a regional aquifer, the final report shall determine whether the impairment is substantially caused by a regional overall lowering of the water table. If the impairment is determined to be substantially caused by a regional overall lowering of the water table, no further action shall be taken under this regulation, and the procedure specified in K.A.R. 5-4-1a shall be followed.

(d) Request to secure water. If the complainant desires the chief engineer to regulate water rights that the final report has found to be impairing the complainant's water right, the complainant shall submit a written request to secure water to satisfy the complainant's prior right. The request to secure water shall be submitted on a prescribed form furnished by the division of water resources. The complainant shall specify the minimum reasonable rate needed to satisfy the water right and shall also provide information substantiating that need. The chief engineer shall determine how to regulate the impairing rights. Each request to secure water to satisfy irrigation-use water rights shall expire at the end of the calendar year in which the request was submitted.

(e) Notice of order.

(1) The chief engineer shall give a written notice and directive to those water right holders whose use of water must be curtailed to secure water to satisfy the complainant's prior rights.

(2) If the area of complaint is located within the boundaries of a GMD and if the final report determines that the impairment is substantially due to direct interference, the chief engineer shall allow the GMD board to recommend how to regulate the impairing water rights to satisfy the impaired right.

(3) The chief engineer may consider regulating the impairing rights the next year and rotating water use among rights.

(4) All water delivered to the user's point of diversion for that individual's use at the specified rate or less shall be applied to the authorized beneficial use and shall count against the quantity of water specified unless the user notifies the chief engineer or authorized representative that diversion and use will be discontinued for a period of time for good reason.

(5) When the quantity of water needed has been delivered to the user's point of diversion or when the user discontinues that individual's use of water, those persons who have been directed to

regulate their use shall be notified that they may resume the diversion and use of water.

(6) If the available water supply in the source increases, the chief engineer may allow some or all of the regulated users to resume use, depending on the supply. (Authorized by and implementing K.S.A. 82a-706a; modified, L. 1978, ch. 460, May 1, 1978; amended Oct. 29, 2010.)

5-4-1a. Distribution of water between users when a prior right is being impaired due to a regional lowering of the water table. (a)

When a complaint is received that a prior right to the use of water is being impaired, the procedure specified in K.A.R. 5-4-1 shall be followed until the determination is made that the impairment is caused substantially by a regional lowering of the water table.

(b)(1) If the area of complaint is located within the boundaries of a groundwater management district (GMD), the GMD board shall recommend the steps necessary to satisfy senior water rights. Recommendations may include following the GMD management program, amending the GMD management program, or pursuing any other means to satisfy senior water rights. The GMD board shall submit its recommendations to the chief engineer within six months of the determination that the impairment is caused substantially by a regional lowering of the water table or within a longer time if approved by the chief engineer.

(2) The GMD board shall publish notice of its recommendations once in a newspaper of general circulation in the county where the impairment is occurring.

(3) The chief engineer shall determine the appropriate course of action to satisfy senior water rights. To that end, the chief engineer shall consider the GMD's timely recommendations and may conduct a study similar to that described in paragraph (c)(1).

(4) The chief engineer shall publish notice of the course of action once in a newspaper of general circulation in the county where the impairment is occurring.

(c)(1) If the area of complaint is located outside the boundaries of a GMD and determined to be caused by a regional lowering of the water table, the chief engineer shall conduct a study to determine the appropriate course of action. The study shall include a determination of the effectiveness and economic impact of administering one or more water rights in accordance with K.A.R. 5-4-

1, the effectiveness and economic impact of the types of corrective controls listed under K.S.A. 82a-1038 and amendments thereto, and any other means to satisfy senior water rights while preserving the economic vitality of the region.

(2) The chief engineer shall determine the appropriate course of action, based on the study described in paragraph (c)(1).

(3) The chief engineer shall publish notice of the course of action once in a newspaper of general circulation in the county where the impairment is occurring. (Authorized by and implementing K.S.A. 82a-706a; effective Oct. 29, 2010.)

5-4-2. Protection of releases from storage under low-flow conditions. (a) As used only in this regulation, the following terms shall have the meanings specified in this subsection:

(1) “Low-flow conditions” shall mean that the natural flow below a reservoir is not sufficient to satisfy the demand for water use below the reservoir by known domestic water rights and by permits and water rights of record in the office of the chief engineer.

(2) “Natural flow” shall mean water that is flowing in a river or stream, except water that is entitled to be protected from diversion.

(b) If the owner of a surface water right below a reservoir could physically divert water that has been released from storage under the authority of the state of Kansas or that has been released from storage pursuant to an agreement between the state and federal government and that owner has been notified by the chief engineer that low-flow conditions exist, that owner shall not divert any water under that surface water right without the written permission of the chief engineer.

(c) If the owner of a surface water right described in subsection (b) desires to divert water after being notified that low-flow conditions exist, that owner shall submit a written request to the chief engineer containing all of the following information:

- (1) The water right number;
- (2) the following information for the owner:
 - (A) Name and telephone number; and
 - (B) if available, electronic mail address, fax number, and cellular telephone number;
- (3) the name and telephone number of any representative authorized by the owner to request and receive permission to divert water under low-flow conditions from the chief engineer. Each request shall also contain, if available, the electronic

mail address, cellular telephone number, and fax number of the authorized representative;

(4) the total quantity of water that has been diverted under that water right during that current calendar year; and

(5) the length of time and the maximum rate of diversion which the owner is requesting to divert water.

(d) As soon as practical after receiving the request, the owner may be notified in writing by the chief engineer if any natural flow is available to be diverted under the authority of that water right.

(e) If an owner has been notified that low-flow conditions exist, diversion of any water without the written permission of the chief engineer shall cause the owner to be subject to any enforcement action available to the chief engineer, including levying a civil penalty pursuant to K.S.A. 82a-737, and amendments thereto.

(f) If an owner has been notified that low-flow conditions exist, diversion of water in excess of the rate and quantity authorized by the express written permission of the chief engineer shall cause the owner to be subject to any enforcement action available to the chief engineer, including levying a civil penalty pursuant to K.S.A. 82a-737, and amendments thereto.

(g) Written notice may be issued by the chief engineer to all owners of surface water rights notified pursuant to subsection (b) to inform the owners when low-flow conditions no longer exist. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706a and K.S.A. 2007 Supp. 82a-737; effective Oct. 31, 2008.)

5-4-4. Well spacing. (a) The spacing between wells shall be sufficient to prevent direct impairment between wells located in a common source of supply or hydraulically connected sources of supply and to protect the public interest. Except as set forth in subsection (b), the following guidelines shall be used to determine the spacing required between wells permitted by the chief engineer in a common source of supply, unless it is determined by the chief engineer in any specific instance that the spacing guidelines set forth in this regulation are insufficient to prevent direct impairment or are not necessary to prevent direct impairment.

(b) Whenever an applicant proposes to divert water from a source of supply in a location where there is a significant hydraulic connection between the proposed source of supply and another

er source or sources of supply, the chief engineer shall determine the spacing necessary to prevent impairment and to protect the public interest on a case by case basis.

(c) Except as set forth in subsection (e) below, each well that is described in an application for a permit to appropriate water for beneficial use or for a term permit, excluding any domestic or temporary well, shall meet the minimum spacing requirements set out in paragraphs (1) and (2) below.

(1) The minimum distance from the well which is the subject of the application to all other senior authorized non-domestic and non-temporary wells in the same aquifer or a hydraulically connected aquifer shall be:

(A) four miles between wells whose common source of supply is the confined Dakota aquifer system;

(B) one-half mile between wells whose common source of supply is the unconfined Dakota aquifer system; and

(C) 1320 feet for wells whose common source of supply is any other aquifer.

(2) In addition to meeting the minimum spacing requirements of paragraph (1) above, the minimum distance from the well which is the subject of the application to all domestic wells, except where the domestic well owner has given the applicant written permission to reduce the spacing interval, shall be:

(A) one-half mile for wells whose common source of supply is the confined Dakota aquifer system;

(B) 1320 feet for wells whose common source of supply is the unconfined Dakota aquifer system; and

(C) 660 feet for wells whose common source of supply is any other aquifer.

(d) Except as provided in subsection (e), the location of a well or wells on an application to change the point of diversion under an existing water right shall either:

(1) meet the spacing requirements in paragraphs (c)(1) and (c)(2) above; or

(2) not decrease the distance to other wells or authorized well locations by more than 300 feet.

(e) This regulation shall not apply if the chief engineer has adopted another regulation, or issued an order pursuant to K.S.A. 82a-1036 *et seq.*, specifying a different well spacing for the source of supply in which the proposed point of diversion is located.

(f) In the case of a battery of wells, the distance shall be measured from the geographic center of the points of diversion comprising the battery.

(g) If the proposed point of diversion does not meet the well spacing requirements in this regulation, the applicant shall be notified by the chief engineer in writing prior to dismissal that the requirements have not been met. The applicant shall then have 15 days to request time in which to submit additional information. Upon written request, the applicant shall be given a specified reasonable amount of time by the chief engineer to submit an engineering or similar type of hydrologic analysis to show that the spacing can be decreased without impairing existing rights or prejudicially and unreasonably affecting the public interest. The burden shall be on the applicant to make such a showing to the satisfaction of the chief engineer. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 1993 Supp. 82a-711; effective May 31, 1994.)

5-4-5. Approval of application for additional rate only. (a) Except as set forth in subsection (c), an application for a permit to appropriate water for beneficial use that requests only an increase in the authorized rate of diversion, and no net increase in maximum annual quantity, from a specific point of diversion already authorized by another water right or approval of application shall be exempt from complying with any safe yield, allowable appropriation, or similar type of criteria adopted by the chief engineer if both of the following conditions are met:

(1) The application requests only an increase in the authorized maximum rate of diversion of 15 percent or less.

(2) There has been no significant physical enlargement of the capacity of the original diversion works to divert water. If a well has been replaced, reconstructed, and reequipped in accordance with an approval of an application for change by the chief engineer pursuant to K.S.A. 82a-708b and amendments thereto in substantially the same way that the original diversion works were constructed, that type of well shall not be considered to be a significant physical enlargement of the diversion works. Conversion to a battery of wells or adding an additional well shall be considered to be a significant physical enlargement of the capacity of the diversion works.

(b) Except as set forth in subsection (c), an application to increase the rate of diversion by more than 15 percent that requests no net increase in maximum annual quantity from a specific point of diversion already authorized by another water

right or approval of application shall be exempt from complying with any safe yield, allowable appropriation, or similar type of criteria adopted by the chief engineer if the conditions in either paragraph (b)(1) or (2) are met:

(1)(A) The application was filed within the time authorized to perfect any water right authorizing that point of diversion.

(B) The application is filed to increase the authorized maximum rate of diversion to the rate the original diversion works were physically capable of diverting water under actual maximum operating conditions, or less.

(2) The appropriator demonstrates to the chief engineer that authorizing an increase in the rate of diversion meets the following criteria:

(A) Will not impair existing water rights;

(B) will not prejudicially and unreasonably affect the public interest; and

(C) will not substantially increase the consumptive use in violation of K.A.R. 5-5-3.

(c) If the chief engineer adopts a regulation pertaining to applications for additional rate only for a specific groundwater management district, or issues an order concerning that type of application pursuant to an intensive groundwater use control area (IGUCA) proceeding authorized by K.S.A. 82a-1036 et seq. and amendments thereto, the application for additional rate shall be processed by the chief engineer pursuant to the provisions of that regulation or IGUCA order. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-701(f), K.S.A. 1999 Supp. 82a-711, K.S.A. 82a-712, K.S.A. 82a-1036, K.S.A. 82a-1037, K.S.A. 1999 Supp. 82a-1038, K.S.A. 82a-1039, and K.S.A. 82a-1040; effective Sept. 22, 2000.)

5-4-8. Custodial care of the state. (a) For any groundwater or surface water right placed in the custodial care of the state, the following criteria shall be met by the chief engineer:

(1) Not reappropriate the water authorized to be diverted by a water right in the custodial care of the state;

(2) continue to include the priority, terms, limitations, authorized rate and quantity, and other conditions of the water right in any analysis or action conducted for the permitting, management, regulation, or administration of other water rights or applications to appropriate water;

(3) not declare the water right abandoned for the nonuse of water. Placement of the water right in the custodial care of the state shall be deemed

to be due and sufficient cause for nonuse of a water right pursuant to K.S.A. 82a-718 and amendments thereto; and

(4) not dismiss the water right, unless the chief engineer determines that the geographic area in which the water right is located no longer meets the requirements of K.S.A. 2-1919(2), and amendments thereto, and reopens the area to new appropriations of water.

(b) A water right owner desiring to place a portion of an existing water right in the custodial care of the state shall request the division to divide the water right. Each portion of a divided water right shall be treated as a separate water right and administered accordingly. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-707(d) and K.S.A. 1999 Supp. 82a-718; effective Sept. 22, 2000.)

Article 5.—CHANGE IN THE PLACE OF USE, THE POINT OF DIVERSION OR THE USE MADE OF WATER UNDER AN EXISTING WATER RIGHT

5-5-1. Filing an application for change. (a)

An application for approval to change the place of use, the point of diversion, the use made of water, or combinations thereof, filed pursuant to K.S.A. 82a-708b and amendments thereto, shall be made on a form prescribed by the chief engineer and shall include whatever information is required by the chief engineer to properly understand the proposed change in the place of use, the point of diversion, the use made of water, or any combination of these.

(b) Before the application may be accepted for filing, the application shall be signed by at least one owner of the water right, or a duly authorized agent of an owner.

(c) Except as set forth in subsection (e), before any approval of an application can be granted, all of the water right owners, including their spouses, or a duly authorized agent of the owners of the water right, shall verify upon oath or affirmation that the statements contained in the application are true and complete.

(d) If one or more owners refuse to sign the application, or a written request is filed by one or more owners to withdraw their signatures from the application before the application is approved, the application shall be dismissed.

(e) (1) An application to change the location of a groundwater point of diversion that proposes to do only the following shall be signed by at least

one owner of the approval of application or water right, or the duly authorized agent, who verifies upon oath or affirmation all of the items specified below in paragraph (e)(2):

(A) Move the location of the well 300 or fewer feet; and

(B) have the new well located on land owned by all the same owners as the owners of the original point of diversion.

(2) (A) The signer of the application for change has the authority to sign the application on behalf of all the owners.

(B) None of the ownership interests of any of the owners of the approval of application or water right will be adversely affected if the application for change is approved as filed.

(C) If the application is not approved expeditiously, there will be substantial damage to property, public health, or safety. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 1999 Supp. 82a-708b; modified, L. 1978, ch. 460, May 1, 1978; amended Sept. 22, 2000.)

5-5-2. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-708b; effective May 1, 1980; revoked May 1, 1983.)

5-5-2a. Complete change application. (a) An application to change a water right pursuant to K.S.A. 82a-708b, and amendments thereto, shall be considered to be a "complete application," if the application completely and accurately meets all of the requirements specified in this regulation and the following criteria:

(1) The requirements specified in K.S.A. 82a-708b, and amendments thereto;

(2) any water conservation plans required by the chief engineer pursuant to K.S.A. 82a-733, and amendments thereto;

(3) the requirements specified in K.A.R. 5-5-1;

(4) the requirements specified in K.A.R. 5-5-5;

(5) the requirements specified in K.A.R. 5-3-4d;

(6) a demonstration that the proposed point of diversion meets all applicable well spacing criteria; and

(7) the requirements of K.S.A. 82a-301 through K.S.A. 82a-305a, and amendments thereto, if the proposed point of diversion, or rediversion, is a dam or stream obstruction.

(b) If the applicant is requesting a waiver or exemption of a regulation pursuant to K.S.A. 82a-1904, and amendments thereto, the applicant shall submit a written request for the waiver or

exemption, and documentation to support the waiver or exemption.

(c) If the proposed point of diversion is located within the boundaries of a groundwater management district, a final recommendation or an analysis of water availability has been received from the groundwater management district within the time allowed by the chief engineer concerning the approval, denial, or modification of the application.

(d) If any questions have been raised concerning whether approval of the application could cause impairment of senior water rights or prejudicially and unreasonably affect the public interest, the applicant shall submit sufficient information to resolve those questions.

(e) If any actions are required to be taken by the applicant on other approvals of applications or water rights owned by the applicant in order to make the application for change approvable, including dismissals, division agreements, reductions in water rights in accordance with K.A.R. 5-7-5, and applications for change, all necessary forms shall be completed and filed with the chief engineer.

(f) If the application involves a change in the place of use or the use made of water, the applicant shall submit all information and data necessary to ensure that the consumptive use will not be increased substantially in violation of K.A.R. 5-5-3.

(g) If the application proposes to add one or more additional wells in accordance with the provisions of K.A.R. 5-5-16, the applicant shall submit all tests, data, and information required by that regulation.

(h) If there is an issue as to whether the water right for which the change application has been filed has been abandoned in whole or in part pursuant to K.S.A. 82a-718, and amendments thereto, the applicant shall submit whatever information is necessary to resolve all abandonment issues.

(i) Each application shall be accompanied by an aerial photograph or a detailed plat with a scale of one inch equals 1,320 feet, or a U.S. geological survey topographic map with a scale of 1:24,000. The following information shall be plotted on the plat, photograph, or topographic map:

(1) The section corners;

(2) the center of the section, identified by the section number, township, and range;

(3) the actual location of the currently authorized point of diversion and the location of the proposed point of diversion indicated by appropriate symbols;

(4) the location of the place of use identified by crosshatching or by some other appropriate method;

(5) the location of all other water wells of every kind within one-half mile of the well or wells to be authorized by the proposed appropriation, each of which shall be identified by its use and the name and mailing address of the owner, if the proposed appropriation is for use of groundwater;

(6) the name and mailing address of the owner or owners of each tract of land adjacent to the stream for a distance of one-half mile upstream and one-half mile downstream from the property lines of the land owned or controlled by the applicant, if the proposed appropriation is for the use of surface water;

(7) the locations of proposed or existing dams, dikes, reservoirs, canals, pipelines, power-houses, and other structures for the purpose of storing, conveying, or using water; and

(8) a north arrow and scale.

All information shown on the photograph, plat, or map shall be legible. Black line prints may be submitted in lieu of the original drawing if a plat is submitted.

(j) The applicant shall certify on the application that all water wells of any kind located within one-half mile of the requested point of diversion have been plotted on the plat, photograph, or map attached to the application.

(k) The applicant shall submit all information and data necessary to demonstrate that the application complies with the applicable regulations adopted by the chief engineer. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706a, K.S.A. 2002 Supp. 82a-708b, K.S.A. 82a-709, K.S.A. 82a-710, K.S.A. 2002 Supp. 82a-711, K.S.A. 2002 Supp. 82a-718, K.S.A. 82a-733, and K.S.A. 2002 Supp. 82a-1904; effective Oct. 24, 2003.)

5-5-3. Change in consumptive use. The extent of consumptive use shall not be increased substantially after a vested right has been determined or the time allowed in which to perfect the water right has expired, including any authorized extension of time to perfect the water right. (Authorized by K.S.A. 82a-706a, 82a-708b; effective May 1, 1983.)

5-5-4. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-708b; effective May 1, 1980; revoked May 1, 1981.)

5-5-5. Signatures required on change applications. If more than one person is the owner of a water right, and an application is filed for a

change in the place of use, point of diversion, use made of the water, or any combination thereof, only the signature(s) of the landowner(s) whose portion of the water right(s) is (are) involved in the change shall be required on the application. If the extent of each owners interest in the water right has not been legally determined, then all landowners holding an undetermined portion of the water right must sign the change application or the landowners must submit an agreement signed by all landowners agreeing how the water right should be divided. (Authorized by K.S.A. 82a-706a and 82a-708b; effective May 1, 1980.)

5-5-6. Failure to construct diversion works at authorized location. (a) If an application to appropriate water for beneficial use is approved by the chief engineer, the location of the point of diversion shall be limited to a specific tract of land and to within 300 feet of a point identified in distances measured in feet north and west from the southeast corner of the legal section.

(b) If the diversion works were not constructed at the location authorized for the point of diversion, but the appropriator can demonstrate to the satisfaction of the chief engineer that all of the following criteria have been met, the authorized location shall be corrected to the actual location of the point of diversion by a correctional order issued by the chief engineer:

(1) The original application was filed before January 1, 1978.

(2) The diversion works were constructed before the date the original application to appropriate water was signed.

(3) It was not discovered that the actual diversion works were not constructed at the authorized point of diversion until after the application was approved.

(4) The diversion works were constructed at a location that could have been approved at the time the original application was filed based on the criteria in effect at the time the original application was filed.

(c) An application for a change in point of diversion filed pursuant to K.S.A. 82a-708b and amendments thereto shall be approved by the chief engineer, authorizing the actual location where the diversion works were constructed and extending the time to construct the diversion works until the end of the calendar year in which the application to change the point of diversion was approved, if the diversion works were not constructed at the authorized location, but the ap-

proprietor can demonstrate to the satisfaction of the chief engineer that all of the following criteria have been met:

(1) The original application was filed with the chief engineer before January 1, 1978.

(2) The diversion works were completed after the application was filed, but within the time authorized to construct the diversion works.

(3) The diversion works were constructed within 1,320 feet of the authorized point of diversion.

(4) The diversion works were constructed at a location that could have been approved at the time that the original application was filed based upon the criteria in effect at the time the original application was filed.

(5) The change application meets the other criteria of K.S.A. 82a-708b and amendments thereto.

If the actual point of diversion is within a groundwater management district, the application shall be sent to the groundwater management district board for review and recommendation.

(d) The point of diversion shall be authorized at the actual location by approval of a new application to appropriate water by the chief engineer if the diversion works were not constructed at the authorized location, but the proprietor can demonstrate to the chief engineer that all of the following criteria have been met:

(1) The original application was filed on or after January 1, 1978.

(2) The diversion works were subsequently completed within the time authorized to complete the diversion works.

(3) The diversion works were constructed within 1,320 feet of the authorized point of diversion.

(4) The time authorized to complete the diversion works has expired.

(5) There is no water available for a new appropriation to be approved at the location of the actual point of diversion.

(6) The application would have met all the criteria for a new application that were in effect at the time the original new application was filed.

If the actual point of diversion is within a groundwater management district, the application shall be sent to the groundwater management district board for review and recommendation. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 1999 Supp. 82a-708b, and K.S.A. 82a-728; effective May 1, 1980; amended Sept. 22, 2000.)

5-5-6c. Authorized point of diversion or place of use. (a) If a point of diversion or place

of use meets the following conditions, the authorized location shall be administratively corrected by the chief engineer to the more accurate location and the owner notified of this action:

(1) Has been determined by the chief engineer to be located at the authorized location by a vested right determination, a certificate of appropriation, or other similar action or approval by the chief engineer;

(2) has not been physically moved or expanded since the location was certified or otherwise approved by the chief engineer; and

(3) is determined by the chief engineer to be incorrect based on a more accurate survey, a global positioning system determination, or other reliable means.

No enforcement action shall be taken against the owner of the water right solely because the location was determined to be at an unauthorized location with the use of better technology than was previously available.

(b) The maximum annual quantity of water authorized to be used by the water right shall not be decreased or increased because of any administrative correction made to the water right pursuant to subsection (a). (Authorized by and implementing K.S.A. 82a-706a; effective Oct. 31, 2008.)

5-5-7. Waste of water. Each person shall not commit a waste of water as defined in these regulations. Upon a finding by the chief engineer that waste of water has occurred, the chief engineer may suspend use of that water right until the owner shows to the satisfaction of the chief engineer that the waste of water will no longer occur. (Authorized by K.S.A. 82a-706(a); implementing K.S.A. 82a-706; effective Dec. 3, 1990.)

5-5-8. Standards for approval of an application for a change in the place of use and a change in the use made of water. (a) Each application for a change in the place of use or the use made of water which will materially injure or adversely affect water rights or permits to appropriate water with priorities senior to the date the application for change is filed shall not be approved by the chief engineer.

(b) Each approval of a change application shall be conditioned by the chief engineer with the terms, conditions and limitations the chief engineer deems necessary to protect the public interest and enforce the terms of K.A.R. 5-5-3.

(c) As used in K.A.R. 5-5-3, “consumptive use” means gross diversions minus:

(1) waste of water, as defined in K.A.R. 5-1-1(cc); and

(2) return flows to the source of water supply:

(A) through surface water runoff which is not waste; and

(B) by deep percolation.

(d) The maximum annual quantity and maximum rate of diversion of water authorized by an approval of an application for a change in the use made of water shall not exceed the maximum annual quantity or maximum rate of diversion perfected at the time the application for change in the use made of water is filed with the chief engineer. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 1993 Supp. 82a-708b; effective Nov. 28, 1994.)

5-5-9. Approval of application for change in the use made of water from irrigation to any other type of beneficial use of water. (a)

The approval of a change in the use made of water from irrigation to any other type of beneficial use of water shall not be approved if the change will cause the net consumptive use from the local source of water supply to be greater than the net consumptive use from the same local source of water supply by the original irrigation use based on the following requirements:

(1) The maximum annual quantity of water to be allowed by the approved change shall be the authorized quantity of the water right multiplied by the consumptive use percentage specified for the county within which the change is approved, as shown on the department’s map titled “consumptive use percentages in Kansas, by county,” dated August 3, 2017 and hereby adopted by reference.

(2) In determining whether the net consumptive use of water will be increased by the proposed change in the use made of water, the applicant shall be given credit by the chief engineer for any return flows from the proposed type of beneficial use of water that will return to the same local source of supply as the return flows from the originally authorized type of beneficial use of water, as substantiated by the applicant to the satisfaction of the chief engineer by an engineering report or similar type of hydrologic analysis.

(3) The authorized quantity to be changed to the new type of beneficial use of water shall never exceed the maximum annual quantity authorized by the water right.

(4) If a water right that overlaps the authorized place of use of one or more other water rights, either in whole or in part, is being changed to a different type of beneficial use of water, the total net consumptive use of all water rights after the change is approved shall not exceed the total net consumptive use of all of the rights before the change is approved.

(5) The approval for a change in the use made of water shall also be limited by that quantity reasonable for the use proposed by the change in the use made of water in order to prevent waste pursuant to K.A.R. 5-1-1.

(b) Upon request of the applicant, the historic net consumptive use actually made during the perfection period, or before June 28, 1945 for vested rights, under the water right proposed to be changed shall be considered by the chief engineer. The burden shall be on the owner to document that historic net consumptive use with an engineering study, or equivalent documentation and analysis, and demonstrate to the satisfaction of the chief engineer that the analysis submitted by the applicant is a more accurate estimate of the historic net consumptive use than the net consumptive use calculated using the methodology specified in paragraph (a)(1).

(c) If the methods specified in subsection (a) produce an authorized annual quantity of water that could result in impairment of other water rights, the chief engineer shall make a site-specific net consumptive use analysis to determine the quantity of water that was actually beneficially consumed under the water right. If the water right is within a groundwater management district and the district has additional site-specific data available, the data may be submitted to the chief engineer for consideration. The quantity approved shall be limited to the quantity determined to be reasonable by the chief engineer’s analysis.

(d) A term permit that would increase the consumptive use of the water right or would otherwise circumvent the limits specified in this regulation shall not be issued to any applicant. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 2016 Supp. 82a-708b; effective Nov. 28, 1994; amended Sept. 22, 2017.)

5-5-10. Partial changes in the use made of water from irrigation to another type of beneficial use of water. (a)

If an irrigation right is to be divided and only a portion of the rate and quantity will be changed to a different beneficial

use of water, only that portion of the annual quantity of the water right being changed to a different type of beneficial use of water shall be reduced as necessary to prevent the net consumptive use from increasing.

(b) The authorized place of use for the irrigation right may be reduced in proportion to the reduction in annual quantity caused by the change. If the irrigator wants to retain more than that person's proportional allotment of acres after the change, the procedures specified in K.A.R. 5-5-11(b)(2)(B)(ii) shall be followed to determine whether the irrigator shall be allowed to retain more acreage.

(c) The authorized rate of diversion shall be divided between the irrigation use and the non-irrigation use. Each reasonable division of the rate by the parties shall be approved. A reasonable division of the rate shall be based on the actual rate of withdrawal at the time of the application and the existing physical conditions of the water source at the time of the application. The division of the maximum rate of diversion shall not be required to be proportional to the division of the quantity if the division of the rate of diversion is reasonable to divert each portion of the annual quantity of water after the division of the water right is made.

(d) The division of the annual quantity shall be calculated as follows:

(1) Calculate the maximum quantity that could be changed to another type of beneficial use of water if the entire water right were changed pursuant to K.A.R. 5-5-9(a)(1).

(2) Divide the annual quantity sought to be changed to the new beneficial use of water by the maximum quantity that could be changed if the entire water right were changed. The result shall be the percentage of the entire reduced water right that will be changed to the new beneficial use of water. The remaining percentage of the current water right may be retained by the irrigation water right owner.

(3) Multiply the remaining percentage times the total currently authorized quantity. The result shall be the annual quantity of water that may be retained by the irrigation water right owner. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 2016 Supp. 82a-708b; effective Nov. 28, 1994; amended Sept. 22, 2017.)

5-5-11. Applications for change in place of use for irrigation purposes. (a) For the purpose of this regulation, "base acreage" means:

(1) the maximum number of acres actually legally irrigated in any one calendar year on or before December 31, 1994 if the perfection period expired on or before December 31, 1994 or the water right is a vested right; or

(2) if the perfection period expires after December 31, 1994, and the perfection period has not expired at the time the change application has been filed, the base acreage shall be the number of acres authorized by the permit; or

(3) if the perfection period expires after December 31, 1994, and the perfection period has expired at the time the change application was filed, the base acreage shall be the maximum acreage legally irrigated in any one calendar year during the perfection period.

(4) Any year in which any of the terms, conditions and limitations of the water right or permit were violated shall not be used to determine base acreage.

(b) An application to change the authorized place of use for irrigation purposes which would permit the applicant to exceed the base acreage by 10 acres or 10 percent, whichever is less, shall not be approved by the chief engineer because it would result in a substantial increase in net consumptive use in violation of K.A.R. 5-5-3 except when one of the six following criteria are met.

(1) Identical places of use.

(A) The change application shall be filed only for the purpose of creating an identical place of use with another water right or rights;

(B) there shall not be a net increase in authorized acres;

(C) each water right involved in the proposed identical overlap in place of use shall be certified by the chief engineer prior to processing the change application if approval of the change application would authorize an increase in base acreage; and

(D) the total quantity authorized by all existing water rights and all permits involved shall be reasonable to irrigate the land authorized after the change in place of use is approved.

(2) Necessity to install more efficient irrigation system; limited acres and quantity.

(A) The change applicant shall submit information demonstrating to the satisfaction of the chief engineer that it is necessary to increase the base acreage so that a significantly more efficient irrigation delivery system may be installed. Types of crops to be grown or tillage practices used shall not be considered in deciding whether the proposed system is more efficient.

(B) If the chief engineer approves the application for a change in place of use pursuant to this subsection, the following limitations shall apply.

(i) The authorized quantity of water under the water right shall be limited to a 5 year fixed allocation, computed by dividing the net irrigation requirement (NIR), as set forth in K.A.R. 5-5-12, for the 50% chance rainfall for the county where the place of use is located, by an efficiency factor of 0.85, multiplying by the base acreage as determined in subsection (a) of this regulation, and then multiplying by 5. In any given year, the water right owner shall still be authorized to divert the maximum annual quantity authorized, provided that the 5 year allocation is not exceeded.

(ii) The maximum number of irrigated acres that shall be allowed under the proposed change in place of use shall be computed by multiplying the currently authorized annual quantity by 0.85 and dividing by the NIR, as set forth in K.A.R. 5-5-12, for the 80% chance rainfall for the county where the place of use is located.

(iii) The approval of the change shall be conditioned so that the use of water in excess of the five year allocation shall result in a two year suspension of all water use under that water right and a subsequent restriction of the authorized place of use to the base acreage at a location specifically set forth in the change approval.

(3) Necessity to install a more efficient irrigation system; limited quantity.

(A) The groundwater management district in which the point of diversion is located shall agree to assume monitoring responsibility to ensure compliance with the conditions of the change approval;

(B) the applicant shall submit information demonstrating to the satisfaction of the chief engineer that it is necessary to increase the base acreage so that a significantly more efficient irrigation delivery system may be installed;

(C) the applicant shall submit a feasible operation plan demonstrating to the satisfaction of the chief engineer that the amount of water available for appropriation under that water right is reasonable to irrigate the number of acres requested to be irrigated; and

(D) the water right owner shall have no recent pattern of water use significantly in excess of the maximum annual quantity of water authorized.

(E) If the chief engineer approves the application for a change in place of use pursuant to this subsection, the following limitations shall apply.

(i) The authorized quantity of water under the water right shall be limited to a 5 year fixed allocation, computed by dividing the net irrigation requirement (NIR), as set forth in K.A.R. 5-5-12, for the 50% chance rainfall for the county where the place of use is located by an efficiency factor of 0.85, multiplying by the base acreage irrigated as determined in subsection (a) of this regulation, and then multiplying by 5. In any given year, the water right owner shall still be authorized to divert the maximum annual quantity authorized, provided that the 5 year allocation is not exceeded.

(ii) The approval of the change shall be conditioned so that the use of water in excess of the five year allocation shall result in a two year suspension of all water use under that water right and a subsequent restriction of the authorized place of use to the base acreage at a location specifically set forth in the change approval.

(4) Rotation of the irrigated land within the authorized place of use.

(A) The point of diversion is located outside a groundwater management district or the groundwater management district in which the point of diversion is located shall agree to assume monitoring responsibility to ensure compliance with the conditions of the change approval;

(B) the water right owner shall have no recent pattern of water use significantly in excess of the maximum annual quantity of water authorized; and

(C) approval of the change application shall result in a net increase in the number of acres authorized for irrigation purposes solely for the purpose of rotation of the irrigated land within the authorized place of use.

(D) If the chief engineer approves the application for a change in place of use pursuant to this subsection, the following limitations shall apply.

(i) Approval of the change application shall be limited by the chief engineer so that the net acres physically irrigated in any one calendar year after the change approval shall not exceed the base acreage; and

(ii) the approval shall be conditioned so that the use of water on more than the maximum number of acres authorized to be irrigated in any one calendar year shall result in a two year suspension of all water use under that water right and a subsequent restriction of the authorized place of use to the base acreage at a location specifically set forth in the change approval.

(5) Specific groundwater management district regulation.

The application shall meet the criteria in a regulation adopted by the chief engineer pursuant to K.S.A. 82a-1028(o) and K.S.A. 82a-706a specifically for changes in place of use for irrigation purposes for the groundwater management district in which the point of diversion is located.

(6) No increase in historic net consumptive use.

The applicant shall demonstrate to the satisfaction of the chief engineer, with an engineering report or similar type of hydrologic analysis, that the historic net consumptive use will not be increased substantially if the proposed change in place of use is approved.

(c) If the chief engineer determines that the application cannot be approved as filed, the applicant shall be notified in writing by the chief engineer prior to denial that the change application requirements have not been met and the reason for the proposed denial.

(1) In this written notice the chief engineer shall allow the applicant 15 days to request time in which to submit additional information to show why the application should be approved.

(2) Upon written request, the applicant shall be given a reasonable time specified by the chief engineer to submit an engineering report or similar type of hydrologic analysis to show that approval of the change application will not substantially increase the historic net consumptive use.

(3) The applicant shall have the burden of demonstrating to the satisfaction of the chief engineer that approval of the change application will not cause the historic net consumptive use to be increased substantially.

(d) Whether or not the time to perfect the water right has expired, including any authorized extensions of time, the application for a change in place of use to change the size of the authorized place of use for irrigation purposes may be approved without the certificate of appropriation being issued except as provided in subsection (b)(1)(C) of this regulation.

(1) If a certificate of appropriation has not been issued, the increase in base acreage shall be determined based on reliable information.

(2) The types of acceptable information shall include, but not be limited to, field inspection reports or U.S. department of agriculture records.

(e) A flow meter meeting the specifications adopted by the chief engineer, and installed and maintained in a manner satisfactory to the chief

engineer, shall be required by the chief engineer in all cases where there is an increase in the base acreage authorized to be irrigated by the approval of the change in the place of use, except when:

(1) the application for change in place of use is filed solely to create an identical place of use with other water rights; and

(2) the total quantity authorized by all existing water rights and all permits to appropriate water that are involved equals or exceeds the NIR, as set forth in K.A.R. 5-5-12, in that county for a 50% chance rainfall divided by an irrigation efficiency of 0.85. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 1993 Supp. 82a-708b; effective Nov. 28, 1994.)

5-5-12. Net irrigation requirements (NIR). The following amounts shall be used as the net irrigation requirements (NIR).

Jackson	7.4" = 0.62'	10.5" = 0.88'	(Authorized by K.S.A. 82a-706a; implementing K.S.A. 1993 Supp. 82a-708b; effective Nov. 28, 1994.)		
Jefferson	7.0" = 0.58'	10.1" = 0.84'	5-5-13. Relocation of alluvial wells. (a) If an authorized point of diversion is a well that has as its source of supply an alluvium in a reach of a basin that is fully appropriated or closed to new appropriations, the approval of a change in point of diversion, and any subsequent approvals of changes in points of diversion, shall not authorize the distance between the well and the centerline of the stream to be decreased by more than 10 percent as measured from the following:		
Jewell	10.6" = 0.88'	13.1" = 1.09'	(1) The authorized well location when the basin became fully appropriated or was closed to new appropriations; and		
Johnson	6.6" = 0.55'	9.5" = 0.79'	(2) the centerline of the stream when the change application was filed.		
Kearny	14.9" = 1.24'	16.6" = 1.38'	(b) Only for the purposes of applying this regulation, the term "stream" shall include the main stem and any tributary to the main stem that was a perennial stream when the basin was closed to new appropriations. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 2007 Supp. 82a-708b; effective Sept. 22, 2000; amended Oct. 31, 2008.)		
Kingman	11.7" = 0.98'	14.0" = 1.17'	5-5-14. Duties of owners of approvals of applications and water rights. (a) All of the owners of an approval of application or a water right shall be responsible for taking all legally required actions necessary to maintain the validity of the approval of application or water right, including the filing of statutorily required fees, reports, and applications.		
Kiowa	13.2" = 1.10'	15.1" = 1.26'	(b)(1) Unless the approval of application or the water right has been severed from the authorized place of use and unless the requirements specified in either paragraph (b)(2) or (b)(3) have been met, all of the owners of the authorized place of use shall be considered to be the owners of the approval of application or the water right.		
Labette	7.3" = 0.61'	10.3" = 0.86'	(2) Unless the chief engineer has documentation to the contrary, an approval of application or water right for municipal use shall be considered to be owned by the entity owning and operating the water distribution system. A water right for an irrigation district shall be considered to be owned by the irrigation district.

(3) Unless the chief engineer has documentation to the contrary, an approval of application or water right that authorizes water to be used for either of the following shall be considered to be owned by the watershed district:

- (A) Sediment control in a reservoir; or
- (B) recreation in a reservoir constructed, maintained, and operated by a watershed district. (Authorized by and implementing K.S.A. 82a-706a; effective Sept. 22, 2000; amended Oct. 31, 2008.)

5-5-16. Additional wells. (a) An application to change a point of diversion by adding an additional point of diversion to divert groundwater, by either constructing a new well or moving a portion of a water right to a well that has previously been authorized by the chief engineer, shall not be approved unless the application meets the following requirements:

(1) Each proposed point of diversion shall meet the requirements of K.S.A. 82a-708b, and amendments thereto, and any applicable regulations adopted by the chief engineer.

(2) The total maximum quantity of water authorized to be diverted each calendar year by the original well or wells, and the additional well or wells, shall not exceed any of the following limits:

(A) The maximum annual quantity of water that has been perfected;

(B) the maximum annual quantity of water authorized to be diverted before approval of the change; or

(C) the maximum consumptive use of water during the perfection period as required by K.A.R. 5-5-3 and as specified in either of the following:

(i) If the water right authorizes the use of water for irrigation use, the consumptive use of water shall be presumed to not be increased in violation of K.A.R. 5-5-3 if the maximum annual quantity requested does not exceed the quantity in acre-feet calculated by use of the following formula: multiply the maximum number of acres legally irrigated in any one year during the perfection period by the 80 percent chance net irrigation requirements (N.I.R.), as specified in K.A.R. 5-5-12 expressed in acre-feet, and divide that number by a delivery efficiency of 0.85; or

(ii) if the water right authorizes the use of water for irrigation and an additional well or wells are authorized for a beneficial use of water that is not irrigation, the consumptive use of the portion of the water right used for irrigation shall be determined as specified in paragraph (a)(2)(C)(i). The

non-irrigation portion of the water right available for diversion shall be determined as specified in K.A.R. 5-5-9 and K.A.R. 5-5-10.

(3) The total maximum rate of diversion that may be authorized for the original well or wells and the additional well or wells shall not be greater than the total maximum rate of diversion that could have been diverted from the original well or wells if they were currently being replaced by new wells at substantially the originally authorized location or locations in the same local source of supply. The maximum rate of diversion shall be one of the following:

(A) The total rate of diversion based on a current water flow rate test done on the point or points of diversion; or

(B) a value resulting from a hydraulic analysis, which may include rate tests, pump tests, and water level data, submitted by the applicant and acceptable to the chief engineer based on the veracity of its data and its proper application of scientific principles, showing the current capacity of the aquifer to yield water at the currently authorized point or points of diversion.

(4) A condition shall be placed on the approval of the application for change authorizing the additional well or wells that provides that, for the sole purpose of administering wells concerning direct impairment, the additional well or wells shall be considered to have the priority of the date the application was filed to add the additional well or wells.

(b) The applicant shall submit the following information:

(1) A well completion log of the currently authorized well or a stratigraphic log of a test hole located within 300 feet of the currently authorized well;

(2) the depth of the currently authorized well;

(3) the current depth to the static water level of the currently authorized well;

(4) a stratigraphic log of a test hole located within 300 feet of the proposed location of each of the proposed additional well or wells; and

(5) any additional information that the chief engineer may require to understand the nature of the proposed additional well or wells.

(c) The proposed additional well or wells shall meet one of the following conditions:

(1) Meet the well spacing requirements to all other wells with a priority earlier than the date on which the change application was filed; or

(2) demonstrate by a hydraulic analysis, which may include rate tests, pump tests, and water level data, as submitted by the applicant and acceptable

to the chief engineer based on the veracity of its data and its proper application of scientific principles, that the approval of an additional well within 300 feet of a currently authorized well location, or within the geographic center of a currently authorized battery of wells, will neither impair any water rights senior to the date on which the application for change was filed nor prejudicially affect the public interest.

(d) Each point of diversion authorized by an approval of an application for change for an additional well shall have a specific assignment of a maximum instantaneous rate of diversion and a maximum annual quantity of water.

(e) Each well authorized by a water right that has been changed under the provisions of this regulation shall be equipped with a separate water flowmeter that meets or exceeds the specifications for water flowmeters adopted by the chief engineer.

(f) Each approval of an additional well or wells shall have a condition that reserves jurisdiction for the chief engineer to review the approval of the additional well or wells at intervals of at least five years, and not more than 10 years, to determine if the total annual quantity of water actually being withdrawn by all wells authorized by the approval of an application for change is exceeding the total annual quantity of water that could have been physically withdrawn if the additional well or wells had not been approved. If the chief engineer determines during the review that the total annual quantity being withdrawn by all the wells, including the additional wells, exceeds the total annual quantity of water that could have been physically withdrawn by the original well or wells, the total maximum annual quantity that can be withdrawn by all the wells shall be reduced by the chief engineer to the total maximum annual quantity that could have been physically withdrawn by the original well or wells. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706a and K.S.A. 2016 Supp. 82a-708b; effective Sept. 22, 2000; amended Oct. 24, 2003; amended Sept. 22, 2017.)

Article 6.—STORAGE OF WATER

5-6-1. Application proposing storage, contents. Any person intending to store water may make application to the chief engineer in the same manner as any other person making application for permit to appropriate water for beneficial use. The application shall set forth the same general information as any other applica-

tion for permit to appropriate water for beneficial use and, in addition, shall be accompanied by information to show:

(a) The area-capacity data of the reservoir in which the water is to be stored.

(b) The drainage area.

(c) The names and mailing addresses of the owners of lands that will be inundated by water accumulated in the reservoir.

(d) Any additional information as may be required by the chief engineer for a proper understanding of the proposed appropriation and storage of water. (Authorized by K.S.A. 82a-706a; modified, L. 1978, ch. 460, May 1, 1978.)

5-6-2. Storage of water in watershed district reservoirs. (a) Each person filing an application for a permit to appropriate water for beneficial use and proposing to store the water in a watershed district reservoir shall submit one of the following with the application:

(1) A copy of an agreement or letter from the board of directors of the watershed district that states it was mutually agreed and understood at the time an easement was granted by the landowner that the landowner was to have the use of space in the sediment pool to store water to which the landowner is entitled under the water appropriation act; or

(2) a copy of a resolution by the board of directors that shows when the board allocated or gave to the applicant the use of all, or a specified part of, the sediment pool for the storage of water in accordance with the Kansas water appropriation act.

(b) If surface water will be stored in a watershed district reservoir with a capacity of more than 15 acre-feet and an application to appropriate water to be stored in the reservoir was not filed before July 1, 2008, a separate application shall be filed to appropriate water to store water in each watershed district reservoir.

(c) If a reservoir operated by a watershed district has a capacity of more than 15 acre-feet and no application to appropriate water has been filed with the chief engineer before July 1, 2008, the watershed district shall release, drain, pump, or siphon water from behind the dam and maintain the quantity of water stored behind the dam to 15 acre-feet or less. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706a and 82a-709; modified, L. 1978, ch. 460, May 1, 1978; amended Oct. 31, 2008.)

5-6-3. Potential net evaporation. (a) The Kansas department of agriculture, division of water resources' map titled "potential net evaporation, in inches, for Kansas," dated September 6, 1996, is hereby adopted by reference for the purpose of determining potential net evaporation from a free water surface.

(b) The values on the map shall be used in all situations in which determination of potential net evaporation from a free water surface is necessary, including the following:

(1) Calculating the maximum annual quantity of water allowed to be appropriated for the storage of surface water in a reservoir;

(2) computing the annual amount of evaporation that will be caused by exposing the groundwater table;

(3) calculating the quantity of evaporation from surface water or exposed groundwater that will be used to determine annual water use; and

(4) determining the maximum annual quantity of water that is perfected pursuant to K.S.A. 82a-714 and amendments thereto.

(c) The values shown on the map shall be used unless the applicant provides, or the chief engineer has available, better or more site-specific data concerning potential net evaporation. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-707(e), K.S.A. 1999 Supp. 82a-711, and K.S.A. 1999 Supp. 82a-714; effective Sept. 22, 2000.)

5-6-4. Determination of potential annual runoff. (a) Unless the applicant for an approval of application supplies, or the chief engineer has available, better or more site-specific data, the potential annual runoff shall be determined using the following:

(1) A 20 percent chance of occurrence of runoff by extrapolating from the "annual yield of runoff" graph of the United States department of agriculture, natural resources conservation service, national engineering handbook series, part 650, engineering field handbook, EFM notice KS-38, dated December 12, 1991, which is adopted by reference;

(2) the soil cover complex number of the drainage basin, using the "generalized soil cover complex number" map of Kansas produced by the Kansas department of agriculture, division of water resources, dated August 1999, which is hereby adopted by reference;

(3) the normal annual precipitation in the watershed as set forth in K.A.R. 5-6-12; and

(4) the area of the watershed of the reservoir determined by using a United States geological survey 7½-minute topographic map.

(b) In computing the potential annual runoff of the watershed of the reservoir, if the quantity of water applied for, or authorized by, prior upstream surface water and groundwater applications, approvals of applications, and existing water rights within the watershed of the reservoir will significantly decrease the potential annual runoff available for appropriation in the reservoir, the impact of those rights on the potential annual runoff shall be subtracted from the total computed potential annual runoff in order to determine the potential annual runoff available. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-707(e) and K.S.A. 1999 Supp. 82a-711; effective Sept. 22, 2000.)

5-6-5. Maximum reasonable annual quantity for storage of water for beneficial use in a reservoir. The maximum reasonable annual quantity of water that may be authorized for appropriation by the chief engineer for diversion and storage in a reservoir shall be limited to the lesser of either of the following: (a) The potential annual runoff as determined pursuant to K.A.R. 5-6-4; or

(b) one of the following:

(1) (A) A three-year supply of water to be reddiverted for all authorized beneficial uses; and

(B) a three-year supply of water for indirect use; or

(2) if the total maximum annual quantity of water requested for storage in paragraphs (b)(1)(A) and (B) exceeds the reservoir capacity, the maximum annual quantity of water authorized to be diverted and stored in any one year shall not exceed the total of the following:

(A) The annual quantity of water reddiverted for beneficial use;

(B) the reservoir capacity; and

(C) one year of indirect use from the reservoir. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706a, K.S.A. 82a-707(e), K.S.A. 2007 Supp. 82a-711, and K.S.A. 82a-712; effective Sept. 22, 2000; amended Oct. 31, 2008.)

5-6-6. Initial filling and refilling of a reservoir. (a) The initial filling of a reservoir that has a capacity that exceeds the maximum annual quantity of water authorized shall be authorized by a special condition on the approval of application.

(b) Each refilling of a reservoir after the release of water for maintenance or similar reasons shall be required to be authorized by a term permit if the reservoir capacity exceeds the maximum annual quantity authorized. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-707(e), K.S.A. 1999 Supp. 82a-711, and K.S.A. 82a-712; effective Sept. 22, 2000.)

5-6-7. Determination of average annual potential net evaporation loss. The average annual potential net evaporation loss shall be determined by multiplying the surface area of the reservoir at the top of the reservoir capacity times the value for average annual potential net evaporation, as set forth in K.A.R. 5-6-3, for the township in which the point of diversion is located. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-707(e), K.S.A. 1999 Supp. 82a-711, and K.S.A. 82a-712; effective Sept. 22, 2000.)

5-6-8. Determination of average annual seepage loss from a reservoir. Average annual seepage loss from a reservoir shall be determined by the chief engineer based on relevant, credible information furnished by the applicant. If no relevant, credible information is supplied by the applicant, it shall be assumed by the chief engineer that there is no seepage loss. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-707(e), K.S.A. 1999 Supp. 82a-711, and K.S.A. 82a-712; effective Sept. 22, 2000.)

5-6-9. Administration of surface water stored in a reservoir. Water lawfully stored within any reservoir authorized to store water for subsequent beneficial use shall not be subject to administration unless senior water right holders downstream of the reservoir make an appropriate request to have water bypassed to satisfy their senior water right within two weeks of the runoff event, or any other time frame in which inflow to the reservoir could reasonably have been expected to be available to the downstream senior water right if the reservoir had not impounded the water. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706b; effective Sept. 22, 2000.)

5-6-10. Authorized place of use for stored surface water. The approval of application shall limit the authorized place of use to the actual location where the water will be put to beneficial use. If the authorized use is for recreational use within the reservoir only, the authorized place

of use shall not exceed the size and location of the surface area of the reservoir at the elevation of the top of the principal spillway. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 1999 Supp. 82a-711 and K.S.A. 82a-712; effective Sept. 22, 2000.)

5-6-11. Reasonable rate of diversion for storage of surface water in a reservoir. Each approval of application shall limit the rate of diversion for storage of surface water in a reservoir to all natural flows not necessary to satisfy all of the following:

- (a) Senior water rights;
- (b) senior approvals of applications;
- (c) senior water reservation rights; and
- (d) senior minimum desirable stream flows pertaining to the use of water from the same source of water supply. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-712; effective Sept. 22, 2000.)

5-6-12. Average annual precipitation. (a) The Kansas department of agriculture, division of water resources' map titled "normal annual precipitation, by township, 1961-1990," dated September 29, 1999, is hereby adopted by reference for the purpose of determining average annual precipitation.

(b) The data on the map shall be used in all situations in which the determination of average annual precipitation is necessary, including calculating the maximum annual quantity of water allowed to be appropriated for the storage of surface water in a reservoir.

(c) The values shown on the map shall be used unless the applicant provides, or the chief engineer has available, better or more site-specific data concerning average annual precipitation. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 1999 Supp. 82a-711; effective Sept. 22, 2000.)

5-6-13. Water level measurement tube specifications. (a) The Kansas department of agriculture, division of water resources' document titled "specifications for water level measurement tube," dated November 5, 1999, is hereby adopted by reference.

(b) If a water level measurement tube is required by the chief engineer to be installed, the required water level measurement tube shall be installed in accordance with the specifications for water level measurement tubes adopted by the chief engineer. These requirements are in addi-

tion to those made by the Kansas department of health and environment pursuant to the groundwater exploration and protection act, K.S.A. 82a-1201 et seq., and amendments thereto.

(c) As long as the well is permitted, the water level measurement tube shall be maintained in a satisfactory condition. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706c; effective Sept. 22, 2000.)

5-6-13a. Check valve specifications. The Kansas department of agriculture, division of water resources' document titled "check valve specifications," dated March 14, 2003, is hereby adopted by reference. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706, K.S.A. 82a-706a, and K.S.A. 82a-712; effective Oct. 24, 2003.)

5-6-14. Irrigation with effluent from a confined feeding facility lagoon. An individual who irrigates with effluent pumped from a confined feeding facility lagoon or runoff retention pit shall not be required to have an approval of application pursuant to K.S.A. 82a-701 et seq. and amendments thereto, unless there are more than 15 acre-feet of average annual runoff meeting the following criteria:

(1) Is generated from outside of the confined feeding facility;

(2) is impounded in the lagoon or runoff retention pit; and

(3) is used for irrigation purposes. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-705 and 82a-707(a); effective Sept. 22, 2000.)

5-6-15. Drainage basin boundaries. (a) The following electronic data files, all dated February 14, 2002, prepared by the division of water resources, Kansas department of agriculture, using data developed by the United States geological survey and the natural resource conservation service, are hereby adopted by reference by the chief engineer for the purpose of defining the boundaries of the 62 drainage basins in Kansas:

(1) dwrbasins.dbf;

(2) dwrbasins.sbn;

(3) dwrbasins.sbx;

(4) dwrbasins.shp; and

(5) dwrbasins.shx.

(b) The electronic data files described in subsection (a) shall be used in all situations in which determination of the basin boundaries is necessary.

(c) The boundaries shown in the electronic data files shall be used unless the applicant provides,

or the chief engineer has available, better or more site-specific data concerning the actual drainage basin boundaries. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706 and K.S.A. 82a-706a; effective Sept. 22, 2000; amended Oct. 24, 2003.)

Article 7.—ABANDONMENT AND TERMINATION

5-7-1. Due and sufficient cause for non-use. (a) Each of the following circumstances shall be considered "due and sufficient cause," as used in K.S.A. 82a-718 and amendments thereto:

(1) Adequate moisture from natural precipitation exists for the production of grain, forage, or specialty crops, as determined by the moisture requirements of the specific crop.

(2) A right has been established or is in the process of being perfected for use of water from one or more preferred sources in which a supply is available currently but is likely to be depleted during periods of drought.

(3) Water is not available from the source of water supply for the authorized use at times needed.

(4) Water use is temporarily discontinued by the owner for a definite period of time to permit soil, moisture, and water conservation, as documented by any of the following:

(A) Furnishing to the chief engineer a copy of a contract showing that land that has been lawfully irrigated with a water right that has not been abandoned is enrolled in a multiyear federal or state conservation program that has been approved by the chief engineer;

(B) enrolling the water right in the water right conservation program in accordance with K.A.R. 5-7-4, K.A.R. 5-7-4b, and K.S.A. 2013 Supp. 82a-741 and amendments thereto; or

(C) any other method acceptable to the chief engineer that can be adequately documented by the owner before the nonuse takes place.

(5) Management and conservation practices are being applied that require the use of less water than authorized. If a conservation plan has been required by the chief engineer, the management and conservation practices used shall be consistent with the conservation plan approved by the chief engineer to qualify under this subsection.

(6) The chief engineer has previously approved the placement of the point of diversion in a stand-by status in accordance with K.A.R. 5-1-2.

(7) Physical problems exist with the point of diversion, distribution system, place of use, or the

operator. This circumstance shall constitute due and sufficient cause only for a period of time reasonable to correct the problem.

(8) Conditions exist beyond the control of the owner that prevent access to the authorized place of use or point of diversion, as long as the owner is taking reasonable affirmative action to gain access.

(9) An alternate source of water supply was not needed and was not used because the primary source of supply was adequate to supply the needs of the water right owner.

(10) The chief engineer determines that a manifest injustice would result if the water right were deemed abandoned under the circumstances of the case.

(11) The water right is located in an area of the state that is closed to new appropriations of water by regulation or order of the chief engineer but is not closed by a safe-yield analysis.

(12) The water right has been deposited in a water bank authorized by K.S.A. 2013 Supp. 82a-761 through K.S.A. 2013 Supp. 82a-773, and amendments thereto.

(13) Water use, as authorized by the water right, is suspended because the water right is enrolled in a multiyear flex account, pursuant to K.S.A. 2013 Supp. 82a-736 and amendments thereto.

(b) In addition to circumstances considered due and sufficient cause pursuant to subsection (a), both of the following requirements shall also be met to constitute due and sufficient cause for nonuse of water:

(1) The reason purporting to constitute due and sufficient cause shall have in fact prevented, or made unnecessary, the authorized beneficial use of water.

(2) Except for the temporarily discontinued use of water as provided by paragraph (a)(4) and for physical problems with the point of diversion or distribution system as provided by paragraph (a)(7), the owner shall maintain the diversion works in a functional condition.

(c) Each year of nonuse for which the chief engineer finds that due and sufficient cause exists shall be considered to interrupt the successive years of nonuse for which due and sufficient cause does not exist.

(d) When a verified report of the chief engineer, or the chief engineer's authorized representative, is made a matter of record at a hearing held pursuant to K.S.A. 82a-718, and amendments thereto, that establishes nonuse of a water right for five or more successive years, the water right owner shall have

the burden of showing that there have not been five or more successive years of nonuse without due and sufficient cause. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706a and K.S.A. 2013 Supp. 82a-718; modified, L. 1978, ch. 460, May 1, 1978; amended May 1, 1986; amended May 31, 1994; amended Oct. 24, 2003; amended May 21, 2010; amended April 18, 2014.)

5-7-2. Waiver of hearing. The owner of a water right may waive any hearing on the questions of abandonment and termination of such right by letter to the chief engineer requesting that it be terminated and its priority forfeited. In the event of such waiver the chief engineer shall cause the termination and forfeiture of priority date to be made a matter of record in his office and shall notify the owner of the water right of his or her action by regular mail. (Authorized by K.S.A. 82a-706a; modified, L. 1978, ch. 460, May 1, 1978.)

5-7-3. (Authorized by K.S.A. 82a-706a; modified, L. 1978, ch. 460, May 1, 1978; revoked May 31, 1994.)

5-7-4. Water rights conservation program; tier 1. (a) Applications for enrollment in the water rights conservation program (WRCP) received on or before December 31, 2009, shall be considered for enrollment in the program as tier 1 applications. Enrollment in tier 1 of the WRCP approved by the chief engineer and continued compliance with the WRCP shall constitute due and sufficient cause for nonuse pursuant to K.S.A. 82a-718, and amendments thereto, and K.A.R. 5-7-1.

(b) In order to qualify for enrollment in the WRCP as a tier 1 applicant, all of the following requirements and conditions shall be met:

(1) The point of diversion shall be located in either of the following locations:

(A) An area that is closed to new appropriations of water, except for temporary permits, term permits, and domestic use; or

(B) some other area designated by the chief engineer as an area where it would be in the public interest to allow water rights to be placed in the WRCP. In areas within the boundaries of a groundwater management district, the recommendations of the board of the district shall be taken into consideration by the chief engineer.

(2) Each of the owners of the water right shall agree to totally suspend all water use authorized by that water right for the duration of the contract.

(3) The owner or owners of the water right shall sign a contract with the chief engineer, or the chief engineer's authorized representative, before placing the water right into the WRCP. The contract shall be binding on all successors in interest to the water right owner.

(4) Only an entire water right may be placed into the WRCP. If a portion of a water right has been abandoned, the portion that is still in good standing may be enrolled in the WRCP. If a water right is administratively divided by the chief engineer, each portion of that divided water right shall be considered to be an entire water right for the purpose of this regulation.

(A) If at least five successive years of nonuse have occurred before application for enrollment in the WRCP, a determination of whether or not that water right is subject to abandonment before entry into the program, including an analysis of any reasons given that might constitute due and sufficient cause for nonuse, shall be made by the chief engineer.

(B) If, after review of the information, it appears that the right has been abandoned, the statutory procedures, including the right to a hearing, shall be followed to determine whether or not the right has been abandoned.

(5) Only the portion of a water right in good standing at the time of application for enrollment may be entered into the WRCP.

(c) Other requirements of enrollment in the WRCP program shall include the following:

(1) Water rights shall be placed into the WRCP for a definite period of calendar years of no fewer than five and no more than 10. Each WRCP contract shall terminate upon expiration of the time period specified in the contract.

(2) The water right owner or operator shall not be required to maintain the diversion works or delivery system during the period of the WRCP contract. If the pump is removed from a well, the well shall be properly capped or sealed during the contract. These requirements shall be in addition to those made by the Kansas department of health and environment pursuant to the groundwater exploration and protection act, K.S.A. 82a-1201 et seq. and amendments thereto.

(3) A certificate determining the extent to which a water right has been perfected shall be issued by the chief engineer before entering the water right into the WRCP if all of the following conditions are met:

(A) An applicant has a permit to appropriate water for beneficial use and has perfected all, or any portion, of the water right authorized by the permit.

(B) The time in which to perfect the water right has expired, including any authorized extensions of time.

(C) A field inspection has been completed.

(4) If the time to perfect the water right, or any authorized extension of that right, has not expired, enrollment in the WRCP shall be considered as suspending the time to perfect. Upon expiration of the WRCP contract pertaining to this water right, the time to perfect shall again commence, and the applicant shall be required to perfect the water right within the remainder of the time allowed to perfect, or any authorized extension of that time.

(5) Each year after authorized enrollment in the WRCP, the water use correspondent shall indicate on the water use report that no water was used because the water right was enrolled in the WRCP.

(6) If the owner breaches, or causes or allows a breach of, the WRCP contract with the chief engineer, each year of nonuse between the effective date of the contract and the date of the breach shall be counted as years of nonuse without due and sufficient cause for the purpose of determining whether or not the water right has been abandoned pursuant to K.S.A. 82a-718, and amendments thereto. Before this penalty is imposed, the owner shall be given an opportunity to show either of the following:

(A) A breach of contract did not occur.

(B) A breach occurred, but either was minor or has been cured, and should not constitute grounds for imposing the penalty. (Authorized by K.S.A. 82a-706a and K.S.A. 2013 Supp. 82a-741; implementing K.S.A. 82a-706, K.S.A. 82a-713, K.S.A. 2013 Supp. 82a-714, K.S.A. 2013 Supp. 82a-718, and K.S.A. 2013 Supp. 82a-741; effective July 1, 1994; amended Sept. 22, 2000; amended Dec. 28, 2009; amended April 18, 2014).

5-7-4a. Conservation reserve program.

(a) Enrollment of all, or part of, the authorized place of use in the conservation reserve program (CRP) shall not be considered good cause to extend the time to construct the diversion works.

(b) If an authorized place of use has been placed into the CRP after the diversion works have been completed but before the time to perfect the water right has expired, the appropriator may request and receive an extension of time to perfect the water right for the length of time that the authorized place of use is enrolled in the CRP program, plus the length of time remaining to perfect the water right, if all of the following conditions are met:

(1) The diversion works were properly completed within the time allowed by the approval of application.

(2) The time to perfect the water right as set forth in the approval of the application has not expired at the time the request for the extension is filed.

(3) The appropriator furnishes the chief engineer with a copy of the CRP contract, including the aerial photograph designating which land has been placed into the CRP program. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-713 and K.S.A. 1999 Supp. 82a-714; effective Sept. 22, 2000.)

5-7-4b. Water rights conservation program; tier 2. (a) Each application for enrollment in the water rights conservation program (WRCP) received on or after July 1, 2011, shall be considered as a WRCP tier 2 application.

(b) Enrollment of a water right in tier 2 of the WRCP shall be by order of the chief engineer and compliance with the requirements of subsection (d).

(c) For a water right to be eligible to be enrolled in tier 2 of the WRCP, each of the following requirements shall be met:

(1) Except for domestic use, the point of diversion shall be located in either of the following locations:

(A) An area that is closed to new appropriations of water by regulation or order of the chief engineer or, only within the Ogallala aquifer, is effectively closed due to overappropriation determined by a safe-yield analysis; or

(B) some other area designated by the chief engineer as an area where it would be in the public interest to allow water rights to be placed in the WRCP. In areas within the boundaries of a groundwater management district, the recommendations of the board of the district shall be taken into consideration by the chief engineer.

(2) Each of the owners of the water right shall agree to totally suspend all water use authorized by the water right for the duration of the enrollment period.

(3) The owner or owners of the water right shall submit an application to the chief engineer, or the chief engineer's authorized representative, requesting that the water right be enrolled.

(4) Only an entire water right may be enrolled in the WRCP. If a water right is administratively divided by the chief engineer, each portion of the water right shall be considered to be an entire water right.

(5) The water right shall not be deemed abandoned pursuant to K.S.A. 82a-718, and amendments thereto.

(d) Requirements of any order enrolling a water right in the WRCP shall include the following:

(1) Water rights shall be placed into the WRCP for a definite period of calendar years of no fewer than five and no more than 10 as requested by the application.

(2) The water right owner or operator shall not be required to maintain the diversion works or delivery system during the period of enrollment. If the pump is removed from a well, the well shall be properly capped or sealed during the period of enrollment. These requirements shall be in addition to those requirements made by the Kansas department of health and environment pursuant to the groundwater exploration and protection act, K.S.A. 82a-1201 et seq. and amendments thereto.

(3) A certificate determining the extent to which a water right has been perfected shall be issued by the chief engineer before enrolling the water right in the WRCP.

(4) Each year after authorized enrollment in the WRCP, the water use correspondent shall indicate on the water use report that no water was used because the water right was enrolled in the WRCP.

(e) Each diversion of water for beneficial use, other than domestic use, under authority of a water right while enrolled in the WRCP shall result in revocation of the enrollment order and the loss of due and sufficient cause for nonuse of water during the portion of the enrollment period occurring before the diversion.

(f) Each diversion of water for beneficial use, other than domestic use, during the enrollment period shall be considered a violation of the order enrolling the water right. Any such diversion of water may result in a civil penalty pursuant to K.S.A. 2013 Supp. 82a-737, and amendments thereto. (Authorized by and implementing K.S.A. 2013 Supp. 82a-741; effective April 18, 2014.)

5-7-5. Reduction of an existing water right. (a) In order to have an approval of application or water right reduced, the water right owner may file, at any time, a request to reduce any of the following:

(1) The authorized maximum annual quantity of water;

(2) the authorized maximum rate of diversion;

(3) the authorized place of use;

(4) the authorized points of diversion;

(5) the types of beneficial use; or

(6) any combination of paragraphs (a)(1) through (a)(5).

(b) The request to reduce a water right shall be filed on a form prescribed by the chief engineer.

(c) The request to reduce shall be submitted in proper form and shall include the following information:

(1) Except as set forth in subsection (d) below, notarized signatures of all water right owners that would be required by K.A.R. 5-5-1 to sign an application for change under K.S.A. 82a-708b and amendments thereto;

(2) a clear description of which portion or portions of the approval of application or water right are proposed to remain;

(3) a statement that all of the owners of the approval of application or water right are waiving any right they might have to a hearing concerning the dismissal or abandonment of any portion of the approval of application or water right that they are requesting to have removed; and

(4) any other information requested by the chief engineer.

(d) A request solely to reduce the authorized place of use that will not affect the approval of application or water right in any other way shall be only required to be signed only by all of the owners of the authorized place of use that is proposed to be deleted.

(e) A reasonable request to reduce an approval of application or water right that is submitted in proper form shall be approved by the chief engineer unless it will cause the impairment of existing water rights or prejudicially and unreasonably affect the public interest. If the request to reduce the water right or approval of application is to remove a point of diversion, the approval shall reduce only that maximum annual quantity of water and maximum rate of diversion associated with the authorized point of diversion that is removed.

(f) A request to reduce an existing water right shall not be considered to be an application for a change pursuant to K.S.A. 82a-708b and amendments thereto, so no application fee shall be required. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706 and 82a-721; effective Sept. 22, 2000.)

Article 8.—CERTIFICATION OF WATER RIGHTS

5-8-1. Certification of a water right. Prior to the issuance of a certificate of appropriation by the chief engineer pursuant to an application under which water has been applied to the land of

more than one owner, these landowners shall be allowed an opportunity to submit to the chief engineer an agreement signed by all landowners involved recommending how the water right should be divided among them. (Authorized by K.S.A. 82a-706a and 82a-714; effective May 1, 1980.)

5-8-2. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-712 and 82a-714; effective May 1, 1980; revoked May 1, 1981.)

5-8-3. Perfection; multiple water rights.

(a) The total maximum annual quantity of water that can be perfected by all water rights authorized to divert water to the same authorized place of use, shall be limited to the maximum quantity of water actually physically and legally diverted and applied to beneficial use on the common authorized place of use during any one calendar year during the perfection period for the water right being certified.

(b) The junior water right shall be limited by means of a limitation clause in the certificate so that the authorized annual quantity of water for the junior water right, when combined with all senior water rights authorized to apply water to beneficial use on the common authorized place of use, does not exceed either of the following standards:

(1) The annual quantity of water reasonable for the type of beneficial use made of the water; and

(2) the total annual quantity of water legally diverted by all water rights to the common authorized place of use during any one calendar year during the perfection period of the junior water right.

(c) The limitation clause on the junior water right being certified shall not restrict the total annual quantity authorized to be diverted to the authorized place of use to less than the total annual quantity of water authorized by the senior water right or water rights for beneficial use on the common authorized place of use.

(d) The owner whose water right is being certified shall be sent a draft certificate showing the maximum rate of diversion and maximum annual quantity of water that are being proposed for the certificate. The water right owner shall be given a reasonable time period of no fewer than 30 days to comment on the draft certificate and to provide any additional information concerning the water diverted and applied to beneficial use on the authorized place of use during the perfection period in accordance with the terms, conditions, and limitations of the approval of application, and all

other water rights and approvals of applications authorized to divert water to the common authorized place of use.

(e) In certifying a water right with a priority date before the effective date of this regulation, the provisions of subsection (a) shall be followed to the extent possible. If sufficient information is not available to make the determination described in subsection (a), the best information available shall be utilized by the chief engineer to determine the quantity of water applied to the authorized place of use during any one calendar year during the perfection period under the authority of the approval of application being certified and all other water rights. The standard set forth in paragraph (b)(1) shall be applied, even if sufficient information is not available to make the determination described in subsection (a). (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-707(e), K.S.A. 82a-713, and K.S.A. 1999 Supp. 82a-714(a); effective Sept. 22, 2000.)

5-8-4. Construction of diversion works.

(a) A reasonable period of time for construction of diversion works shall be not less than one full year following the approval of the application to appropriate water. If a person demonstrates that a reasonable long-term schedule for development of diversion works or other infrastructure is in the public interest, that information shall be taken into consideration by the chief engineer in determining a reasonable period of time for the construction of diversion works.

(b) For good cause shown by the applicant, a reasonable extension of time to construct the diversion works shall be allowed by the chief engineer, if the request for extension is filed pursuant to the requirements of K.A.R. 5-3-7 and is accompanied by the statutorily required filing fee.

(c) If the total time allowed to construct the diversion works has been more than 16 months and fewer than 24 months, an extension of time shall be granted by the chief engineer only if the applicant meets the following criteria:

- (1) Demonstrates good cause;
- (2) provides a copy of a contract with the well driller or other information substantiating the intent to proceed to complete the construction of the diversion works in an expeditious manner;
- (3) files the request for extension pursuant to the requirements of K.A.R. 5-3-7; and
- (4) submits the statutorily required filing fee.

(d) If the total time allowed to construct the diversion works equals or exceeds 24 months, an

extension of time may be granted only if the applicant demonstrates to the chief engineer that circumstances beyond the control of the applicant necessitate the extension of time.

(e)(1) The applicant shall file a notice of completion of diversion works and the statutorily required field inspection fee with the chief engineer no later than March 1 following the deadline to construct the diversion works. The notice of completion of diversion works shall be filed on a form prescribed by the chief engineer.

(2) If a water flowmeter has been required by the chief engineer as a condition of the permit, the applicant shall also file a notice of completion of installation of a water flowmeter on a form prescribed by the chief engineer. This form shall be due at the same time that the notice of completion of diversion works form is due.

(f)(1) The applicant shall be sent a notice by the chief engineer giving the applicant 30 days to show that the diversion works were completed within the time allowed in accordance with the terms, conditions, and limitations of the approval of application and to pay the field inspection fee, if it has not already been paid, under either of the following conditions:

(A) A notice of completion of diversion works has not been completely and timely filed with the chief engineer.

(B) Information on file in the office of the chief engineer indicates that the diversion works were not properly constructed within the time allowed to construct the diversion works, including any authorized extensions of time.

(2) The permit shall be dismissed and its priority forfeited if the applicant fails to perform the following:

(A) To demonstrate that the diversion works were completed within the time allowed by the approval of application; and

(B) to pay the statutorily required field inspection fee, if it has not already been paid. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-712, K.S.A. 82a-713, and K.S.A. 1999 Supp. 82a-714; effective Sept. 22, 2000.)

5-8-6. Perfection of a water right. (a) Except for municipal use, a reasonable period of time to perfect a water right shall be no fewer than four full calendar years following the deadline for construction of the diversion works. If the time to construct the diversion works is extended, the perfection period shall be extended to no few-

er than four full calendar years beyond the final deadline to construct the diversion works, unless the owner of the approval of application objects.

(b) A reasonable time to perfect a water right for municipal use shall be no fewer than 20 full calendar years plus the remainder of the calendar year in which the application was approved. Each holder of a permit for municipal use of water shall submit a progress report to the chief engineer 10 full calendar years after the permit was issued. The report shall be submitted on a form prescribed by the chief engineer. The report shall meet the following conditions:

(1) Compare the annual water use projected in the original application with the actual annual water use for the prior 10 years; and

(2) document compliance with an approved conservation plan, if one had been required. If the 10-year review by the chief engineer shows that actual annual water use is significantly less than originally projected, the holder shall revise the estimated annual water use for the next 10 years. If it is in the public interest, the total authorized annual quantity of water for the next 10 years shall be reduced by the chief engineer to a reasonable annual quantity based on the municipal user's revised estimates of annual water use for the next 10 years. If the 10-year review indicates that a required conservation plan was not being complied with or that the conservation plan does not meet the Kansas water office's conservation guidelines for municipal users, as in effect at the time of the review, an order requiring any of the following shall be issued by the chief engineer:

(A) That the conservation plan be amended to comply with current guidelines;

(B) that the user comply with the provisions of the approved conservation plan; or

(C) both of the requirements in paragraphs (b) (2) (A) and (B).

(c) If the applicant demonstrates to the chief engineer that a longer perfection period is necessary to justify purchase or construction of infrastructure related to the diversion, treatment, or distribution of water that actually is being built, the original time to perfect a water right for municipal use or other public entity, including a utility, may be extended for a period not to exceed a total time to perfect of 40 years.

(d) For good cause shown by the applicant, a reasonable extension of time to perfect a water right shall be allowed by the chief engineer if the request for extension is filed pursuant to the terms

of K.A.R. 5-3-7 and is accompanied by the statutorily required filing fee.

(e) If water use reports and other information on file in the office of the chief engineer indicate that no water was applied to the authorized beneficial use during the time allowed to perfect the water right, including any authorized extensions of time, the owner of the approval of application as shown in the records of the chief engineer shall be sent a notice by the chief engineer, giving the owner 30 days to show that water was put to beneficial use within the terms, conditions, and limitations of the permit during the perfection period. If the owner fails to demonstrate that water was so used, the permit shall be dismissed and its priority forfeited. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-707(e), K.S.A. 82a-712, K.S.A. 82a-713, and K.S.A. 1999 Supp. 82a-714; effective Sept. 22, 2000.)

5-8-7. Extensions of time to perfect a water right. (a) For all beneficial uses of water, except municipal use, the total time to perfect the water right, including extensions of time, shall not exceed 10 years after the calendar year in which the diversion works were required to be completed unless one or more of the following "extenuating circumstances" exist.

(b) "Extenuating circumstances" shall include the following:

(1) Circumstances beyond the control of the owner of the approval of application that have unduly restricted the owner's ability to perfect the water right;

(2) actions or omissions by the chief engineer that make it necessary to extend the time to perfect; and

(3) for applications with a priority before May 1, 1978, the unavailability or lack of credibility of records of water use, crops grown, and the number and location of acres actually irrigated, and other relevant information during the perfection period, but other records or information is available for a period after the perfection period and would reasonably represent the application of water to beneficial use in accordance with the terms, conditions, and limitations of the permit.

(c) The burden shall be on the owner of the approval of application to document the extenuating circumstances described in subsection (b) and justify to the chief engineer the need for the extension of time to perfect the water right.

(d)(1) Extensions of time to perfect for applications with a priority before May 1, 1978, may be

granted in any reasonable increment of years. The total amount of time allowed to perfect the water right shall be reasonable.

(2) Extensions of time to perfect a water right for nonmunicipal use, with a priority on or after May 1, 1978, may be granted in any increment of time until the total time to perfect equals 10 years. After the total time allowed to perfect the water right equals 10 years, extensions of time shall be granted in one-year increments only.

(e) Extensions of the time to perfect a water right for municipal use of water that can be justified shall be extended in five-year increments or less after the original 20-year time period to perfect the water right has elapsed. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-712 and 82a-713; effective Sept. 22, 2000.)

5-8-8. Owner required to allow chief engineer to conduct timely field inspection for certification. (a) In order to allow the chief engineer to conduct a timely field inspection to certify a water right, the owner of an approval of application shall perform the following:

(1) Operate the diversion works in the same manner that they were operated when water was applied to beneficial use during the perfection period, so that an accurate rate-of-diversion test can be conducted by the chief engineer;

(2) allow the chief engineer access to the diversion works and the authorized place of use for the purpose of making the field inspection; and

(3) allow, cooperate with, and assist the chief engineer in any other ways necessary for the chief engineer to conduct the field inspection.

(b) The owner of the approval of application shall allow the field inspection to be conducted within 365 days after the chief engineer has sent the owner of the approval of application a restricted letter requesting that the chief engineer be allowed to conduct a field inspection. If the owner does not cooperate with, assist, and allow the chief engineer to conduct a field inspection, without good cause, within one year after the restricted letter is sent by the chief engineer, an order shall be issued by the chief engineer requiring the owner of the approval of application to comply with the terms of the restricted letter. The order shall also be sent by restricted mail. If the owner fails to comply with the order of the chief engineer, an action shall be brought by the chief engineer to enforce the order of the chief engineer pursuant to the act for judicial review, and civil enforce-

ment of agency actions, K.S.A. 77-624 et seq. and amendments thereto. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 1999 Supp. 82a-714; effective Sept. 22, 2000.)

Article 9.—TEMPORARY PERMITS

5-9-1. Application for temporary permit acceptable for filing. To be acceptable for filing, an application for temporary permit to appropriate water for beneficial use shall meet the following requirements: (a) Be made on the form prescribed by the chief engineer;

(b) be signed by the applicant or an authorized representative of the applicant;

(c) be accompanied by the statutory application fee;

(d) contain all the information requested for the proposed use as set forth in the prescribed application form; and

(e) include any other information requested by the chief engineer that is necessary to understand the application. (Authorized by and implementing K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-727; effective May 1, 1979; amended Oct. 24, 2003.)

5-9-1a. Term permit application. Each application for a term permit shall meet the following requirements: (a) Be submitted on a form prescribed by the chief engineer; and

(b) be accompanied by the fee for any new application to appropriate water for beneficial use specified in K.S.A. 82a-708a(b), and amendments thereto. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706a, K.S.A. 2007 Supp. 82a-708a(b), and K.S.A. 82a-709; effective Oct. 31, 2008.)

5-9-1b. Approvals and extensions of term permits. (a) Except as specified in subsection (b), each approved term permit shall be valid for five years or less. A term permit shall not be extended for a total of more than five years, including the original approval.

(b) (1) Term permits for contamination remediation may be initially issued for not more than 20 years and may be extended in increments of not more than 10 years, for a total period not to exceed 40 years.

(2) Term permits for hydraulic dredging may be initially issued for not more than 10 years and may be extended in increments of not more than 10 years, for a total period not to exceed 30 years.

(3) Term permits for fire protection may be initially issued for not more than 20 years and may

be extended in increments of not more than 10 years, for a total period not to exceed 30 years.

(4) Term permits for the use of water containing more than 5,000 milligrams of chlorides per liter of water may be initially issued for not more than 10 years and may be extended in increments of not more than 10 years, for a total period not to exceed 20 years.

(c) An application for new term permit or a request to extend an existing term permit that does not meet the criteria specified in subsections (a) and (b) shall not be approved. If the applicant proposes to continue the water use, the applicant shall amend the new application or file a new application. Approval of the amended or new application by the chief engineer shall be received by the applicant before the proposed water use may continue. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706a and 82a-712; effective Oct. 31, 2008.)

5-9-1c. Request to extend a term permit.

Any term permit may be extended as provided in K.A.R 5-9-1b if the request to extend the term permit meets the following requirements: (a) Is received at least 30 days before the expiration of the term permit;

(b) is signed by the holder of the term permit or its authorized agent;

(c) meets one of the following conditions:

(1) Will extend the total term of the permit for five years or less; or

(2) will extend the total term of the permit in excess of five years, if the application meets the requirements of safe yield, allowable appropriation, and similar regulatory criteria; and

(d) includes all of the following:

(1) Good cause for extension of the term is provided;

(2) approval of the extension will not impair an existing water right or permit;

(3) extension of the term permit will not prejudicially and unreasonably affect the public interest;

(4) the applicant has complied with the terms, conditions, and limitations of the previous term permit; and

(5) the applicant has access to the proposed point of diversion and the proposed place of use. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706a and 82a-712; effective Oct. 31, 2008.)

5-9-1d. No water right perfected under term permit. No water right shall be perfected pursuant to a term permit. (Authorized by K.S.A.

82a-706a; implementing K.S.A. 82a-706a and 82a-712; effective Oct. 31, 2008.)

5-9-2. Priority. Upon receipt in the office of the chief engineer of an acceptable application for temporary permit to appropriate water, accompanied by the statutory application fee, a stamp showing the date and time of receipt shall be placed on the application form. The date and time of receipt of the application shall establish the priority to the use of the water. The priority shall terminate on the date when use of water will be discontinued as set forth in the application or any authorized extension of time thereof. (Authorized by K.S.A. 82a-727; effective May 1, 1979.)

5-9-3. Quantity. A temporary permit shall not be granted for a quantity of water in excess of 4,000,000 gallons, except for either of the following:

(a) Dewatering purposes; or

(b) water that is to be diverted from a source located on a construction site and used on the construction site in connection with a project that the chief engineer has approved pursuant to K.S.A. 82a-301 through 82a-305a or K.S.A. 24-126, and amendments thereto. (Authorized by and implementing K.S.A. 2011 Supp. 82a-727; effective May 1, 1979; amended Dec. 3, 1990; amended June 22, 2012.)

5-9-4. Place of use limitation. A temporary permit shall not be granted for more than one place of use. (Authorized by K.S.A. 82a-727; effective May 1, 1979.)

5-9-5. Point of diversion limitation. A temporary permit shall not be granted authorizing more than one point of diversion from any source of supply. (Authorized by K.S.A. 82a-727; effective May 1, 1979.)

5-9-6. Approval of application. The approval of an application for a temporary permit shall be by endorsement on the application by the chief engineer. The endorsement shall set forth the terms, limitations, and conditions necessary for the protection of the public interest. (Authorized by and implementing K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-727; effective May 1, 1979; amended Oct. 24, 2003.)

5-9-7. Extension of time. For good cause shown by the applicant the chief engineer may grant an extension of time to continue the use of water under a temporary permit beyond the date

authorized as shown in the approval of the application. The term of a temporary permit shall not exceed six (6) months including any authorized extension of time thereof. (Authorized by K.S.A. 82a-727; effective May 1, 1979.)

5-9-8. Ownership. A temporary permit for the appropriation of water shall not be transferable. (Authorized by K.S.A. 82a-727; effective May 1, 1979.)

5-9-10. Application fee for a temporary permit. The fee for an application for a temporary permit or extension of a temporary permit shall be twenty-five dollars (\$25.00). This regulation shall be effective on and after September 1, 1982. (Authorized by K.S.A. 82a-727; effective, T-83-25, Sept. 1, 1982; effective May 1, 1983.)

5-9-11. Documentation of access to source of water supply for temporary permit. Before approval of a temporary permit, the applicant shall show that permission for access to the source of water supply has been obtained from the landowner or landowners of the property where the proposed point of diversion will be located. If permission is granted in an oil and gas lease, it shall be sufficient for the applicant to indicate this on the application for a temporary permit to appropriate water. If the water is to be obtained from land not covered by the oil and gas lease, then the permission of the landowner or landowners shall be adequately documented. (Authorized by and implementing K.S.A. 82a-727; effective Sept. 22, 2000.)

Article 10.—WATER APPROPRIATION

5-10-1. (Authorized by K.S.A. 82a-706a, K.S.A. 1982 Supp. 82a-708a; implementing K.S.A. 1982 Supp. 82a-708a; effective, T-83-25, Sept. 1, 1982; effective May 1, 1983; revoked May 1, 1988.)

5-10-2. (Authorized by K.S.A. 82a-706a, K.S.A. 1982 Supp. 82a-708a; implementing K.S.A. 1982 Supp. 82a-708a; effective, T-83-25, Sept. 1, 1982; effective May 1, 1983; revoked May 1, 1988.)

5-10-3. (Authorized by K.S.A. 82a-706a, K.S.A. 1982 Supp. 82a-708b; implementing K.S.A. 1982 Supp. 82a-708b; effective, T-83-25, Sept. 1, 1982; effective May 1, 1983; revoked May 1, 1988.)

5-10-4. Waiver or exemptions. The chief engineer may grant an exemption or waiver from any regulation adopted by the chief engineer if it is shown that the granting of such exemption or waiver will not prejudicially nor unreasonably affect the public interest and that it will not impair an existing water right. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-711, 82a-712; effective May 1, 1983.)

5-10-5. Administration of water use among vested right holders. If, during the administration of water rights, each appropriation right and approved permit to appropriate water for beneficial use has been regulated in accordance with the provisions of K.S.A. 82a-706b, the division of water resources shall administer the water available from that source of supply among the holders who have active vested rights, including vested rights for domestic purposes, on a proportional basis and in a manner which will provide, if possible, sufficient flow in the stream for vested rights for domestic purposes. The proportionment may be accomplished by a pro rata reduction in the rate or quantity that each vested right shall be allowed to divert, by setting up a rotation system or by any other equitable method. Vested rights shall be administered in this manner unless they have been adjudicated by a court of competent jurisdiction as to priority or rotation and then the chief engineer shall administer them in accordance with the order of the court. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-704a and K.S.A. 82a-706; effective May 1, 1986.)

5-10-6. Procedure for determination of an active vested domestic water right. The existence of an active domestic vested water right shall be determined by the chief engineer as follows:

(a) Information shall be filed with the chief engineer on a form prescribed by the chief engineer concerning the dates beneficial use of water was made, and the nature and extent of the active domestic vested right.

(b) Affidavits from at least three competent disinterested persons shall be filed by the claimant on a form prescribed by the chief engineer or other reliable substantiating evidence shall be submitted to the chief engineer by the claimant documenting the dates beneficial use of water was made, and the nature and extent of the active domestic vested right.

(c) Within a reasonable time, the staff of the division of water resources shall investigate the information submitted.

(d) Notice.

(1) Written notice of the claim shall be sent by the chief engineer to all water right owners of record in the office of the chief engineer with an authorized point of diversion within one-half mile of the claimed point of diversion.

(2) In addition, one notice in a newspaper with general circulation in the county in which the point of diversion is located shall be published by the chief engineer. Such published notice shall contain:

(A) the name of the claimant;

(B) the location of the claimed point of diversion; and

(C) a declaration that it is a claim for a domestic vested right.

(3) All notices shall be given at least 14 days prior to the close of the record.

(e) A copy of the chief engineer's draft order determining the active domestic vested water right and any comments received in response to the notices shall be furnished to the claimant by the chief engineer or the chief engineer's authorized representative.

(f) The claimant shall be given thirty days from the date the chief engineer mails the draft to the claimant in which to submit additional information, request a hearing concerning the determination, or both.

(g) If a hearing is requested by the claimant in a timely manner, or the chief engineer deems it to be in the public interest to do so, a hearing shall be held by the chief engineer, or the chief engineer's authorized representative, within a reasonable time.

(h) The chief engineer shall issue the order determining whether the claimed active vested domestic right exists and, if so, determining the nature and extent of that right.

(i) The order determining the active vested domestic right shall be made a matter of record in the office of the chief engineer. In addition, a copy of the order shall be furnished to the claimant by the chief engineer, with instructions that it shall be filed with the register of deeds in the county in which the point of diversion is located.

(j) All vested domestic water rights shall be assumed to have a priority of June 28, 1945 until they have been adjudicated by a court of competent jurisdiction. Vested domestic rights shall be administered in accordance with K.A.R. 5-10-5. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-705a; effective Nov. 28, 1994.)

Article 11.—ASSURANCE DISTRICTS

5-11-1. Definitions. As used in these rules and regulations and the water assurance program act by the division of water resources in the administration of the water assurance program act, unless the context clearly requires otherwise, the following words and phrases shall have the meaning ascribed to them in this section.

(a) "Board" means the board of directors of a water assurance district.

(b) "Chief engineer" means the chief engineer of the division of water resources of the Kansas state board of agriculture. (Authorized by K.S.A. 82a-1345(e); implementing K.S.A. 82a-1334; effective May 31, 1994.)

5-11-2. Determination of benefits. (a) A water assurance district member may apply in writing to the board to be removed as a member of the district if that member is no longer receiving benefits from supplementing the stream by assurance reservoir releases because:

(1) the member no longer has a water right or permit; or

(2) the member's water right or permit has been reduced so that the member is no longer receiving benefits.

(b) The board shall forward the request to be removed as a member from the district to the chief engineer, who shall determine whether the member will be receiving benefits. The chief engineer shall forward the results of that determination to the board in writing within a reasonable time.

(1) If the chief engineer determines that the member will continue to receive benefits, the chief engineer shall notify the board and the member's application to be removed shall be dismissed by the board.

(2) If the chief engineer determines that the member will no longer be receiving benefits, the chief engineer shall notify the board and it shall be determined by the board whether the member will be removed from the district and the terms of removal. (Authorized by K.S.A. 82a-1345(e); implementing K.S.A. 82a-1334; effective May 31, 1994.)

Article 12.—AQUIFER STORAGE AND RECOVERY

5-12-1. Aquifer storage and recovery permitting. (a) An operator may store water in an aquifer storage and recovery system under a permit to appropriate water for artificial recharge

if the water appropriated is source water. The requirements of this article shall be in addition to any requirements of the Kansas department of health and environment concerning underground injection wells, including article 46 of the regulations adopted by the Kansas department of health and environment.

(b) Each application for a permit to appropriate water for artificial recharge shall describe the horizontal and vertical extent of the basin storage area in which the source water will be stored.

(1) The horizontal extent shall be determined by a closed boundary within which the recharge system used to store the water will be physically located. The recharge system may include recharge pits, recharge trenches, recharge wells, or other similar systems that cause source water to enter the storage volume of the basin storage area, either by gravity flow or by injection. The basin storage area may be subdivided into smaller areas representative of the areas that may be recharged by the individual recharge systems.

(2) The vertical extent shall be defined by a minimum index level and a maximum index level for the basin recharge storage area, or for each subdivided area within the basin storage area if the basin storage area is subdivided. The maximum index water level shall represent the maximum storage potential for the basin storage area.

(c) Each application for a permit to appropriate water for artificial recharge shall specify the maximum annual quantity and maximum rate of diversion of source water.

(d)(1) Each application for a permit to appropriate water for artificial recharge shall include a methodology for accounting for water stored in a basin storage area both on an annual basis and on a cumulative basis so that recharge credits can be calculated. If more than one application for a permit to appropriate water for artificial recharge relates to the same aquifer storage and recovery system, each application shall use the same methodology for accounting for water stored in the basin storage area. The accounting of the water balance of all water entering and leaving the basin storage area shall be determined by using sound engineering methods based on actual measurements, generally accepted engineering methodology, or a combination of both.

(2) Approval of any application for a permit to appropriate water for artificial recharge shall be contingent upon the chief engineer's approval of the method for accounting for the basin storage area.

(e) Each applicant for recovery of water stored by the holder of a permit to appropriate water for artificial recharge to store water in a basin storage area shall obtain a permit separate from the aquifer storage permit to appropriate water for beneficial use for each well used to recover the water stored. The maximum annual quantity of water that may be appropriated for this purpose shall be no more than the maximum cumulative recharge credits available to the operator of the aquifer storage and recovery system. These credits shall be determined by the accounting methodology approved under a permit to appropriate water for artificial recharge pertaining to the aquifer storage and recovery system. In determining whether diversion of the annual quantity impairs other water rights, the following data may be considered by the chief engineer:

(1) The maximum storage volume available in the basin storage area;

(2) the spatial distribution of recharge and withdrawal systems;

(3) the maximum rate of diversion at which the water will be withdrawn; and

(4) any other relevant information.

Recharge credits may be accumulated over more than one year, and any amount of recharge credits available may be withdrawn in accordance with the permit if the withdrawal does not impair other water rights.

(f) The approval of application, if the water to be diverted is the water artificially recharged into the basin storage area, shall be conditioned upon the following:

(1) Generally accepted engineering methodology;

(2) a maximum annual quantity that does not exceed the recharge credits; and

(3) an annual reporting that complies with K.A.R. 5-12-2. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 2015 Supp. 82a-711 and K.S.A. 82a-712; effective Sept. 22, 2000; amended April 29, 2016.)

5-12-2. Aquifer storage and recovery accounting. (a) In addition to annual water use reporting requirements pursuant to K.S.A. 82a-732, and amendments thereto, on June 1 of each year the permit holder of an aquifer storage or recovery system shall report an accounting of water in the basin storage area to the chief engineer and to any groundwater management district identified in subsection (c) of this regulation. The annual report for the preceding calendar

year shall account for all water entering and leaving the basin storage area and shall specifically compute the amount of recharge credits held in the basin storage area.

(b) The report shall be in the form prescribed by the chief engineer and shall address the items in the water balance for the basin storage area, which may include the following amounts:

- (1) Natural and artificial recharge;
- (2) groundwater inflow and outflow;
- (3) evaporation and transpiration;
- (4) groundwater water diversions from all non-domestic wells;
- (5) infiltration from streams;
- (6) groundwater discharge to streams;
- (7) the calculated recharge credits; and
- (8) any other information that in the opinion of the chief engineer is pertinent to the basin storage and surrounding areas.

The annual accounting shall specifically take into account the amounts of natural recharge, artificial recharge, groundwater inflow, groundwater outflow, evapotranspiration, and groundwater pumpage. Groundwater pumpage shall include recharge credits withdrawn as well as pumpage from all nondomestic wells in the basin storage area. The annual accounting shall include any additional items within a basin storage area that would be necessary to determine the amount of recharge credit available for recovery.

(c) If any part of the basin storage area is within the boundaries of a groundwater management district, the permit holder of any aquifer storage or recovery system shall furnish a copy of the annual report to the district board for comments by June 1 of each year.

(d) If a groundwater management district receives an annual report, the district may provide comments to the chief engineer if the comments are submitted to the chief engineer within 30 days of the district's receipt of the report identified in subsection (c) of this regulation.

(e) The permit holder may be required by the chief engineer to submit additional information pertinent to the system. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 1999 Supp. 82a-711 and K.S.A. 82a-712; effective Sept. 22, 2000.)

5-12-3. Hearings. (a) A hearing shall be held by the chief engineer in the general vicinity where an applicant proposes aquifer storage and recovery before approval of any such application for aquifer storage and recovery.

(b) If any part of a proposed basin storage area is within the boundaries of a groundwater management district, the hearing required by subsection (a) of this regulation shall be held within the groundwater management district. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 1999 Supp. 82a-711 and K.S.A. 82a-712; effective Sept. 22, 2000.)

5-12-4. Aquifer storage and recovery systems in a groundwater management district. A groundwater management district may recommend rules and regulations pertaining to monitoring and accounting requirements for that portion of the basin storage area that falls within the district's boundaries. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 1999 Supp. 82a-711, K.S.A. 82a-712, and K.S.A. 82a-1028(o); effective Sept. 22, 2000.)

Article 13.—SAND AND GRAVEL PIT OPERATIONS

5-13-1. Notice of intent to open or expand a sand and gravel pit operation. Each operator desiring to open or expand a sand and gravel pit operation shall file a notice of intent to open or expand a sand and gravel pit operation on a form prescribed by the chief engineer before opening or expanding the sand and gravel pit operation.

The following information shall be included on the form:

- (a) The legal description of the sand and gravel pit operation;
- (b) the date the project began or will begin;
- (c) the number of acres of the groundwater table that will be exposed by the project at the time active mining ceases;
- (d) a legal description and a map showing the location of the groundwater that will be exposed at the time active mining ceases;
- (e) the year the pit excavation is estimated to be completed;
- (f) measures that will be used to protect the area groundwater supply from pollution; and
- (g) any other pertinent information that may be required by the chief engineer to understand the nature of the proposed project and to ensure that the provisions of K.S.A. 82a-734, and amendments thereto, and any regulations promulgated thereunder, are being complied with. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-721 and K.S.A. 82a-734; effective Sept. 22, 2000.)

5-13-2. Determination of “substantially adverse impact on the area groundwater supply.”

(a) A sand and gravel operation shall be deemed to cause a “substantially adverse impact on the area groundwater supply,” as provided in K.S.A. 82a-734 (b) and amendments thereto, if the sand and gravel pit operation is opened or expanded after the effective date of this regulation in any township that has an average annual potential net evaporation greater than 18 inches per year as determined from K.A.R. 5-6-3.

(b) In any township that has an average annual potential net evaporation of 18 or fewer inches per year, as determined from K.A.R. 5-6-3, the opening or expansion of a sand and gravel pit operation, shall be deemed to not cause a “substantially adverse impact on the area groundwater supply,” as provided in K.S.A. 82a-734 and amendments thereto, unless the chief engineer can demonstrate that the project will cause one or more of the following:

(1) A direct impairment to a groundwater approval of application or water right;

(2) an unreasonable deterioration of the groundwater quality;

(3) an unreasonable raising or lowering of the static water level; or

(4) prevention of any waters of the state from moving to a person having a prior right to use these waters. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-721 and K.S.A. 82a-734; effective Sept. 22, 2000.)

5-13-3. Determination of when groundwater evaporation is a beneficial use.

On and after the effective date of this regulation, whenever the opening or expansion of a sand and gravel operation is considered to cause a substantially adverse impact on the area groundwater supply pursuant to K.A.R. 5-13-2, the evaporation caused shall be considered to be a beneficial use, and the operator shall be required to receive an approval of application, or approval of an application for change, pursuant to K.S.A. 82a-701 et seq. and amendments thereto, before exposing the groundwater table to evaporation. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 1999 Supp. 82a-711, K.S.A. 82a-721, and K.S.A. 82a-734; effective Sept. 22, 2000.)

5-13-4. Exemption. (a) To the extent that groundwater evaporation causes a substantially adverse impact to the area groundwater supply pursuant to K.A.R. 5-13-2, a new application to

appropriate the groundwater evaporation caused by the project shall be exempt from meeting the safe yield, allowable appropriation, or similar types of regulations adopted by the chief engineer. This exemption shall be granted if the operator meets all of the criteria in subsection (b) because exempting the quantity of water that has been, or will be, evaporated by exposing the groundwater table beneath the proven reserves will not prejudicially and unreasonably affect the public interest and will not impair any existing water right.

(b) Except as set forth in subsection (e), in order to qualify for this exemption, the operator shall show that on December 31, 1999, all of the following conditions were met:

(1) The operator had an active, existing sand and gravel mining operation.

(2) If required, the operator had a valid surface-mining license issued pursuant to the surface-mining land conservation and reclamation act, K.S.A. 49-601 et seq., and amendments thereto.

(3) If required, the operator had made a timely application for a hydraulic dredging permit or had received a hydraulic dredging permit issued pursuant to the Kansas water appropriation act.

(4) The operator had filed the water use reports required by, and paid any civil fines assessed by the chief engineer pursuant to K.S.A. 82a-732, and amendments thereto.

(5) The operator had paid the water protection fees required by K.S.A. 82a-954, and amendments thereto.

(6) To the extent necessary to physically operate, the operator had acquired all local permits and local zoning approvals.

(7) The operator had purchased, leased, or otherwise acquired legal control over proven sand and gravel reserves.

(8) The operator had filed an application to appropriate water or filed a notice of intent to open or expand a sand and gravel pit operation with the chief engineer when required by K.S.A. 82a-734(a), and amendments thereto.

(c) It shall be the burden of the operator to show that the operator meets the requirements of subsection (b) by filing the necessary information or documentation with the chief engineer on or before December 31, 2001. An extension of time may be granted by the chief engineer for good cause if the request for extension of time is filed by the operator with the chief engineer before December 31, 2001.

(d) To the extent that the operator meets the requirements of subsection (b) above, an application to appropriate water for evaporation of the groundwater caused by exposing the groundwater table shall be exempt from complying with safe yield, allowable appropriation, and similar types of regulations adopted by the chief engineer. This exemption shall apply to all the evaporation caused by exposing the groundwater table up to the areal extent of the proven reserves that existed on December 31, 1999.

(e) If, on the effective date of this regulation, an operator was in the process of establishing a replacement operation for an active, existing sand and gravel pit operation, an exemption shall be allowed by the chief engineer for the proposed replacement operation according to subsection (d) on terms, conditions and limitations that will neither cause impairment of existing water rights nor prejudicially and unreasonably affect the public interest if all of the following criteria are met:

(1) The proposed replacement sand and gravel operation is located outside the boundaries of all groundwater management districts and intensive groundwater use control areas.

(2) The geocenter of the proposed replacement operation is located within two miles of the geocenter of the existing, active operation.

(3) The proposed replacement operation met the provisions of paragraphs (b)(1) through (b)(6) of this regulation on December 31, 1999.

(4) The proposed replacement project meets the requirements of paragraphs (b) (7) and (8) on the effective date of this regulation. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-721, K.S.A. 1999 Supp. 82a-1904, and K.S.A. 82a-734; effective Sept. 22, 2000.)

5-13-5. Approval of pit operations that are opened or expanded after the effective date of this regulation. Except as set forth in K.A.R. 5-13-4, pit operations that are excavated or expanded after the effective date of this regulation and that have a substantial adverse impact on the area groundwater supply shall meet one of the following conditions:

(a) Receive prior approval of the chief engineer for a new permit to appropriate an annual quantity of water sufficient to offset the evaporation caused by exposing the groundwater table in a manner described in K.A.R. 5-13-7;

(b) acquire existing water rights and receive approval of the chief engineer to change the point of

diversion, place of use, and the use made of water to authorize the water rights to be used for the project in a manner described in K.A.R. 5-13-7;

(c) acquire and take out of production sufficient water rights in the manner described in K.A.R. 5-13-7 to offset the net average annual evaporation caused by exposing the groundwater table; or

(d) any combination of the above. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-721 and K.S.A. 82a-734; effective Sept. 22, 2000.)

5-13-6. Determination of the maximum rate of diversion and annual quantity of water.

The annual quantity of water, in acre-feet, required to be appropriated for evaporation caused by exposing the area groundwater table shall be determined by multiplying the exposed groundwater surface area of the project in acres by the potential net evaporation in inches, for Kansas, as found in K.A.R. 5-6-3, and dividing by 12. The rate of diversion shall be the natural rate of evaporation. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-721 and K.S.A. 82a-734; effective Sept. 22, 2000.)

5-13-7. Offsets for evaporation of groundwater.

The net average annual quantity of groundwater evaporation shall be authorized, accounted for, or offset in one or more of the following ways:

(a) An approval of application or water right currently authorizes the use of water at that pit location.

(b) A new approval of application authorizes the use of water at that pit location.

(c) Acceptable quality surface water that is legally and physically available for groundwater recharge is authorized to be diverted into the proposed project.

(d) Both of the following conditions are met:

(1) Water is made available by acquiring all, or a portion of, an existing water right to any of the following:

(A) Use surface water or groundwater, or both, that is hydraulically connected to a stream channel aquifer in which the project is located;

(B) use groundwater from an unconsolidated regional aquifer that is within a two-mile radius of the geocenter of the project that is the same unconsolidated regional aquifer in which the project is located, or a hydraulically connected aquifer; or

(C) use groundwater from an unconsolidated regional aquifer that is within a 3.5 mile radius of the geocenter of the project and is the same un-

consolidated regional aquifer in which the project is located, or a hydraulically connected aquifer, if the operator can demonstrate to the chief engineer that sufficient water rights to offset the evaporation caused by the project cannot be acquired within a two-mile radius of the geocenter of the project after making reasonable and prudent efforts to find both proven reserves and water rights.

(2) The applicant demonstrates to the chief engineer that the acquired water right, or portion of it, will no longer be exercised by any of the following:

(A) Placing it in the custodial care of the state;
 (B) placing it in a perpetual trust approved by the chief engineer; or

(C) restricting its future use in some other way that the chief engineer determines to be adequate to ensure that it will no longer be exercised.

(e) Diffused surface water is diverted into the project from inside a berm surrounding the project built to prevent unacceptable quality surface water from entering the groundwater table. The average annual amount of runoff shall be determined from a map titled “figure 12. — mean annual runoff in Kansas,” dated June 1982, published by the Kansas water office and hereby adopted by reference, unless the applicant demonstrates to the chief engineer, or the chief engineer has, better, more site-specific data.

(f) Any other water credit or offset that the chief engineer determines will adequately offset the groundwater evaporation caused by the pit operation. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-721 and K.S.A. 82a-734; effective Sept. 22, 2000.)

5-13-8. Offset calculations. All of the following requirements shall apply with respect to an offset water right described in K.A.R. 5-13-7(d):
 (a) No physical diversion of the offset water right shall be required or allowed.

(b) The project shall receive credit for 100 percent of the net consumptive use of the water right used as an offset.

(c) Credit for acquisition of an existing surface water right shall be given for an equivalent quantity of water that is legally and physically available within the terms, conditions, and limitations of the surface water right at the location of the groundwater pit. The quantity of water available at the groundwater pit from the acquired surface water right shall be calculated by taking into account the following:

(1) Stream gains;
 (2) stream losses;
 (3) transit losses;
 (4) water supplied from intervening tributaries;
 and

(5) water needed to satisfy senior surface water rights to the same source of supply.

(d) Credit for acquisition of a groundwater right with a point of diversion located in the same stream channel aquifer as the groundwater pit shall be given for either of the following:

(1) A groundwater right located within a two-mile radius of the groundwater pit; or

(2) a groundwater right in the same source of water supply with a point of diversion located more than two miles up gradient of the geocenter of the groundwater pit for the quantity of water legally and physically available under that groundwater right at its original point of diversion, minus the transit loss between the original groundwater point of diversion and the geocenter of the proposed pit. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-721 and K.S.A. 82a-734; effective Sept. 22, 2000.)

5-13-9. Easements and covenants. The applicant shall provide any easements or covenants, attached to or running with the land, that are necessary to document that the offset water acquired pursuant to K.A.R. 5-13-7 will continue to be legally available to offset the evaporation of groundwater. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-721 and K.S.A. 82a-734; effective Sept. 22, 2000.)

5-13-10. Time to construct the diversion works for a sand and gravel pit operation.

(a) As used in this regulation, “completion of diversion works” means that both of the following have occurred:

(1) All equipment necessary to begin to operate a sand and gravel operation, including the hydraulic dredge, has been installed.

(2) Sufficient overburden has been excavated to begin to expose the groundwater to evaporation.

(b) A reasonable time to construct the diversion works for a sand and gravel pit operation shall be not less than one full year following the approval of the application to appropriate water.

(c) For good cause shown by the applicant, a reasonable extension of time to construct the diversion works shall be allowed by the chief engineer if both of the following conditions are met:

(1) The request for extension is filed pursuant to the requirements of K.A.R. 5-3-7.

(2) The request for extension is accompanied by the statutorily required filing fee. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-712 and 82a-713; effective Sept. 22, 2000.)

5-13-11. Time to perfect a water right for evaporation of groundwater. (a) A reasonable time to perfect a water right for evaporation of groundwater caused by a sand and gravel pit operation shall be neither less than five calendar years plus the remainder of the calendar year in which the application was approved, nor more than 20 years plus the remainder of the calendar year in which the application was approved.

(b)(1) For good cause shown by the applicant, a reasonable extension of the time to perfect the water right shall be allowed by the chief engineer if both of the following conditions are met:

(A) The request is timely filed pursuant to the terms of K.A.R. 5-3-7.

(B) The request is accompanied by the statutorily required filing fee.

(2) The total time to perfect a water right shall not exceed 40 years. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-713; effective Sept. 22, 2000.)

Article 14.—ENFORCEMENT AND APPEALS

5-14-1. Enforcement. (a) Except as set forth in subsection (i), the procedure set forth below shall be followed whenever enforcement action is taken by the chief engineer after becoming aware that a person may be performing any of the following:

(1) Violating any provision of K.S.A. 82a-701 et seq., and amendments thereto;

(2) violating any provision of a regulation adopted pursuant to that act; or

(3) violating a term, condition, or limitation of an approval of application or water right.

(b) The alleged violation shall be investigated by the chief engineer.

(c) A written report of the investigation shall be prepared by the chief engineer. This report shall include any documents regarding the matter that were relied upon or prepared by the chief engineer. This report shall be made a part of the official record of the chief engineer. If an approval of application or a water right is involved, the report shall be made an official part of that file.

(d)(1) If the investigation shows that no violation has occurred or that enforcement action is not warranted, no further enforcement action shall be taken at that time.

(2) If the investigation determines that a violation has occurred, an order shall be issued by the chief engineer. The owner or owners of the approval of application or water right, as shown in the records of the chief engineer, shall be served by delivering a copy in person or sending a copy of the order by restricted mail. The order shall specify the following:

(A) What the violation is;

(B) what actions are necessary to correct the violation;

(C) what a reasonable time is in order to correct the violation. Extensions of time to correct a violation may be granted by the chief engineer if good cause is shown by the violator or owner;

(D) that the order will become effective immediately; and

(E) that a hearing may be requested within 15 days of the issuance of the order. The request for a hearing may include a request for a stay of the order. If the person shows good cause why a stay should be granted, a stay may be granted by the chief engineer.

(e) If the violation is corrected within the time specified by the chief engineer, the violator shall notify the chief engineer. An inspection shall be conducted by the chief engineer to determine if the violation has been corrected. If the violation has been corrected, the diversion of water may continue within the terms, conditions, and limitations of the approval of application or water right.

(f) If the violation is not corrected within the time specified by the chief engineer, an order requiring that unauthorized or illegal diversion of water cease until the violation is corrected shall be issued by the chief engineer.

(g) If the violator ceases diversion of water and then corrects the violation, the violator shall notify the chief engineer when the violation is corrected. The diversion works and the authorized place of use, as appropriate, shall be inspected by the chief engineer to determine if the violation has been corrected. If the chief engineer determines that the violation has been corrected, the order prohibiting diversion of water shall be rescinded by the chief engineer as soon as possible. When the owner or violator receives notice from the chief engineer that the order prohibiting the diversion of water has been rescinded, the diversion of water may recommence.

(h) (1) Any of the actions listed in paragraph (h) (2) may be taken by the chief engineer if the violator performs any of the following acts and fails to cease the diversion of water as ordered by the chief engineer:

(A) Violates any provision of K.S.A. 82a-701 et seq., and amendments thereto;

(B) violates any provision of a regulation adopted pursuant to that act; or

(C) violates a term, condition, or limitation of an approval of application or a water right.

(2) If the violator performs any act listed in paragraph (h)(1), any of the following actions may be taken by the chief engineer:

(A) Bring an action to enforce the orders of the chief engineer pursuant to the act for judicial review and civil enforcement of agency actions, K.S.A. 77-624 et seq., and amendments thereto;

(B) request the attorney general to bring an action in the name of the state of Kansas;

(C) request that criminal proceedings be brought pursuant to K.S.A. 82a-728, and amendments thereto;

(D) enter into a consent order with the violator specifying the remedial actions that shall be taken by the violator;

(E) take any other legally permissible enforcement action; or

(F) any combination of the above actions.

(i) The provisions of this regulation shall not apply to any actions taken by the chief engineer pursuant to K.S.A. 82a-706b, and amendments thereto, to enforce water right priorities and to prevent direct impairment by either of the following:

(1) Junior water rights; or

(2) illegal diversions of water.

(j) After the violator has been issued an order as specified in subsection (f), the violator may request an administrative hearing before the chief engineer in accordance with the provisions of K.A.R. 5-14-2. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706, 82a-706b, 82a-706d, and 82a-728; effective Sept. 22, 2000.)

5-14-2. Request for conference hearing.

(a) Each written request for a hearing of an order issued by the chief engineer according to K.A.R. 5-14-1 shall be served on the chief engineer within 15 days of the issuance of the order. The request for a hearing may include a request for a stay of the order. If the requester demonstrates good cause for a stay to the chief engineer, a stay of the order may be granted by the chief engineer.

(b) If a request for a hearing is not served on the chief engineer within 15 days after the order is issued by the chief engineer, the order shall become a final agency action as defined by K.S.A. 77-607, and amendments thereto.

(c) If a request for a hearing is filed with the chief engineer within 15 days of the issuance of an order, a conference adjudicative hearing shall be held by the chief engineer.

(d) A conference hearing shall be an informal proceeding conducted according to the following criteria:

(1) The hearing officer shall regulate the course of a conference proceeding.

(2) Only parties may testify and present written exhibits.

(3) Only parties may offer comments on the issues.

(4) The hearing officer may conduct all or part of the hearing by telephone, or other electronic means, if each participant in the hearing has the opportunity to participate in the entire proceeding while it is taking place.

(5) The hearing shall be recorded at the agency's expense.

(6) Any party, at the party's expense and subject to any reasonable conditions that the chief engineer may establish, may cause a person other than the chief engineer to prepare a transcript from the chief engineer's recording or cause additional recordings to be made during the hearing.

(e) After the conference adjudicative hearing, or completion of a full adjudicative hearing if the conference hearing was converted to a full hearing, a final agency action, as defined by K.S.A. 77-607, and amendments thereto, shall be issued by the chief engineer. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706 and K.S.A. 82a-706b; effective Sept. 22, 2000.)

5-14-3. Orders. (a) An order subject to review pursuant to K.S.A. 82a-1901, and amendments thereto, shall be issued by the chief engineer in each of the following matters:

(1) The approval or dismissal of an application to change the place of use, the point of diversion, the use made of water, or any combination of these, filed pursuant to K.S.A. 82a-708b and amendments thereto;

(2) the approval or dismissal of an application to appropriate water for beneficial use filed pursuant to K.S.A. 82a-711 and amendments thereto;

(3) the declaration of abandonment and termi-

nation of a water right pursuant to K.S.A. 82a-718 and amendments thereto; and

(4) the suspension of the use of water under a term permit, an approved application for a permit to appropriate water for beneficial use, an appropriation right, or a vested right, pursuant to K.S.A. 82a-770 and amendments thereto.

(b) Each order that is issued pursuant to K.S.A. 82a-737, and amendments thereto, and is subject to review pursuant to K.S.A. 82a-1901, and amendments thereto, shall be issued by the chief engineer, or the chief engineer's designee, in the assessment of civil penalty, the modification of a person's water right or permit to use water, the suspension of a person's water right or permit to use water, or any combination of these.

(c) Unless limited or prohibited by statute, any person to whom the order is directed or who has a property interest that could be adversely affected by the action or proposed action may request a review pursuant to K.S.A. 82a-1901, and amendments thereto, without filing a request for a hearing before the chief engineer.

(d) The chief engineer shall not be required to hold a hearing before issuing an order unless required by statute.

(e)(1) Any person to whom an order will be directed may request a hearing before the chief engineer before the issuance of an order by the chief engineer. The person shall then be notified by the chief engineer that, if the request is granted by the chief engineer, the person shall not be allowed to have a second hearing before the chief engineer after the issuance of the order. Within 15 days after the notice is sent, the person shall notify the chief engineer whether the requestor wants to proceed with a hearing before the chief engineer issues the order.

(2) If a hearing is held by the chief engineer before the issuance of the order by the chief engineer and the person to whom the order is directed still desires to have the order reviewed, the person shall seek review pursuant to K.S.A. 82a-1901, and amendments thereto, if that type of review is authorized by statute.

(f) If a person to whom an order was directed did not have a hearing before the issuance of an order, that person may request a hearing before the chief engineer after issuance of the order. The person shall submit a written request for hearing to the chief engineer within 15 days of service of the order pursuant to K.S.A. 77-531, and amendments thereto. If a hearing is not requested, the

person may seek review pursuant to K.S.A. 82a-1901, and amendments thereto, within 30 days of service of the order pursuant to K.S.A. 77-531 and amendments thereto, if that type of review is authorized by statute. Each request for a hearing shall meet the following requirements:

(1) Be filed in writing with the chief engineer within 15 days after the date of service of the order; and

(2) set forth the factual and legal basis for the hearing request. The factual basis may be stated generally and shall not be required to be specific if the written request clearly establishes the existence of disputed facts. The request for hearing may be denied if the request fails to clearly establish factual or legal issues.

(g) A request for intervention in a matter pending hearing from a person or persons other than those to whom the order is directed may be granted by the chief engineer if all of the following conditions are met:

(1) The chief engineer has issued a notice of hearing.

(2) The person requesting to intervene has filed a notice with the chief engineer that the order in the pending matter could adversely affect one or more of the following:

(A) The person's property interest in the pending matter;

(B) the person's water right or permit to appropriate water; or

(C) the person's statutory duty to act.

(3) The chief engineer has determined that the interests of justice and the orderly and prompt conduct of the proceedings will not be impaired by allowing the intervention. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706a, K.S.A. 2008 Supp. 82a-708b, 82a-711, 82a-718, 82a-737, 82a-770, and 82a-1901; effective Sept. 22, 2000; amended March 20, 2009.)

5-14-3a. Hearing procedure. The procedures specified in this regulation shall apply to any hearing held by the chief engineer pursuant to K.A.R. 5-14-3. Upon notice to all parties, these procedures may be applied by the chief engineer to any other hearings held under the Kansas water appropriation act. (a) Unless otherwise required by statute, the following persons and entities shall be allowed to be parties to a formal hearing before the chief engineer:

(1) The division of water resources, Kansas department of agriculture (DWR);

(2) the person or persons to whom the order is, or will be, directed;

(3) the applicant to change the place of use, the point of diversion, the use made of water, or any combination of these, under K.S.A. 82a-708b and amendments thereto, or the applicant to appropriate water for beneficial use under K.S.A. 82a-711, and amendments thereto;

(4) the owners of the proposed place of use and the owners of the place of use authorized under the application, water right, or permit to appropriate water; and

(5) any other person who has filed a timely petition for intervention in accordance with K.A.R. 5-14-3(e).

(b) The hearing shall be presided over by the chief engineer or the chief engineer's designee. Authority may be delegated by the chief engineer to the presiding officer to issue the order or to make written recommendations to the chief engineer after the hearing.

(c) Unless otherwise required by statute, the presiding officer shall issue a written notice of hearing to all parties and to any person who requests notice of a hearing.

(1) Notice of hearing shall be served on the parties as required by statute, but not later than 15 days before the hearing.

(2) The notice of hearing shall be served by mail, facsimile, electronic mail, or hand-delivery and shall be evidenced by a certificate of service. If due diligence fails to locate a person allowed to be a party, then notice by publication shall be made in the manner indicated in K.A.R. 5-14-3a (d) (2).

(3) The notice of hearing shall include the following:

(A) A case or other identification number and a descriptive title, which shall appear on all correspondence relating to the docket. If more than one matter has been consolidated for hearing, all numbers and descriptive titles shall appear on all correspondence;

(B) the names and mailing addresses of all parties;

(C) a statement of the time, place and nature of the hearing. If more than one matter has been consolidated for hearing, statement of the nature of the hearing shall include all matters to be heard;

(D) a statement that the presiding officer may complete the hearing without the participation of any party who fails to attend or participate in a prehearing conference, hearing, or other stage in the proceeding; and

(E) if nonparties are provided an opportunity to submit comments, the time and place where oral comments will be accepted and the deadline and mailing address for the submission of written comments.

(4) For abandonment hearings under K.S.A. 82a-718, and amendments thereto, the notice of hearing shall include a copy of the verified report of the chief engineer or the chief engineer's representative.

(d) Unless otherwise required by statute, if members of the public will be given an opportunity to submit oral and written comments, notice of the hearing shall be caused by the chief engineer to be distributed in the place or places where the action or proposed action will be effective.

(1) Notice of hearing shall be given as required by statute, but no later than 15 days before the hearing.

(2) The notice of hearing may be published in a newspaper of general circulation where the action or proposed action will be effective as required by statute, but shall be published at least 15 days before the hearing. The notice of hearing shall not be required to be in the form of a legal notice. The notice may also be given by any other means reasonably calculated to reach the residents of the area.

(e) Only the parties named in the notice of hearing or otherwise designated by the chief engineer may participate in the hearing.

(1) Any party may participate in person or, if the party is a corporation or other artificial person, by an authorized representative.

(2) Any party may be represented, at the party's own expense, by legal counsel or, if permitted by law, some other representative.

(3) The presiding officer may refuse to allow representation that would constitute the unauthorized practice of law.

(4) The presiding officer may give nonparties the opportunity to present oral or written statements to be included in the record of the proceedings.

(5) The presiding officer may consider only oral statements that are given under oath or affirmation and signed written statements.

(6) The presiding officer shall allow all parties a reasonable opportunity to challenge or rebut all oral and written statements received.

(f) The presiding officer may allow any party to participate in prehearing conferences, the hearing, or any other stage of the proceedings by telephone or videoconference.

(1) Unless otherwise authorized by the presiding officer, the party wishing to participate by telephone shall notify the presiding officer at least 48 hours in advance of the prehearing conference. The party wishing to participate by telephone may be granted a continuance if the presiding officer is not able to grant the request.

(2) The presiding officer may require the party wishing to participate by telephone to initiate the call.

(3) The presiding officer may refuse to allow any party to participate by telephone if the party has not notified the presiding officer in advance and made arrangements for that participation or if any party objects.

(g) The presiding officer may hold one or more prehearing conferences as necessary to address preliminary matters or to facilitate the hearing.

(1) Notice of all prehearing conferences shall be given by the presiding officer to all parties and to all persons who have requested that notice. Notice may also be given to other interested persons at least 15 days before the prehearing conference.

(2) The notice of prehearing conference shall include the following:

(A) The names and mailing addresses of all parties;

(B) a statement of the time, place, and nature of the prehearing conference; and

(C) a statement that the presiding officer may complete the hearing without the participation of any party who fails to attend or participate in a prehearing conference, hearing, or other stage in the proceeding.

(3) The presiding officer shall issue a prehearing order after each prehearing conference.

(h) Discovery shall be limited to matters that are clearly relevant to the proceeding.

(i) Each party shall have the opportunity to file pleadings, objections, and motions. At the presiding officer's discretion, any party may be given an opportunity to file briefs, proposed findings of fact and conclusions of law, and proposed orders.

(1) Each party shall serve a copy of any written filings on each of the other parties.

(A) Service may be made by mail, facsimile, electronic mail, or hand-delivery.

(B) Service shall be presumed if the person making service signs a written certificate of service.

(C) Service by mail shall be complete upon mailing.

(2) The presiding officer shall notify all parties of the deadlines for written filings and may extend the deadlines upon request of any party.

(A) Unless otherwise stated in the notice or order of the presiding officer, all deadlines to file documents within a specific number of days shall end at the close of business on the third working day after the deadline set in the notice or order mailed out by the presiding officer.

(B) In computing any deadline, the day of service shall not be included. Working days shall not include Saturdays, Sundays, state holidays, and federal holidays.

(3) The presiding officer shall not be required to consider any written filing that has not been filed on or before the deadline or that is not served on all parties.

(4) Service upon an attorney of record shall be deemed to be service upon the party represented by the attorney.

(j) After the presiding officer has issued a notice of hearing and before an order is issued, no party or its attorneys shall discuss the merits of the proceedings with the presiding officer or with any other person named in the prehearing order as assisting the presiding officer in the hearing, unless all parties have the opportunity to participate.

(1) If the presiding officer receives an ex parte communication, the presiding officer shall notify all parties that an ex parte communication has been received and place the notice in the record of the pending matter. The notice shall contain the following:

(A) A copy of any written ex parte communication received and any written response to the communication; and

(B) a memorandum stating the substance of any oral ex parte communication received, any oral response made, and the identity of each person from whom the oral ex parte communication was received.

(2) Any party may submit written rebuttal to an ex parte communication within 15 days after service of notice of the communication. If any party submits a written rebuttal to an ex parte communication, that party shall simultaneously serve a copy on all other parties and the presiding officer. All timely filed written rebuttals shall be placed in the record of the pending matter.

(3) A presiding officer who has received an ex parte communication shall withdraw from the pending matter if the presiding officer determines that the communication has rendered the presid-

ing officer no longer qualified to hear the pending matter because of bias, prejudice, or interest.

(4) Any party may petition for the disqualification of a presiding officer upon discovering facts establishing grounds for disqualification because of bias, prejudice, or interest.

(5) Each presiding officer whose disqualification is requested shall determine whether to grant the petition, stating facts and reasons for the determination. The facts and reasons for the presiding officer's decision shall be entered into the record.

(k) The presiding officer may consolidate any proceedings if there are common issues to be resolved or a common factual basis for the proceedings. The presiding officer may consolidate proceedings on the presiding officer's own motion or upon the request of the parties to all proceedings.

(l) The presiding officer may continue the hearing or any other proceeding on that person's own motion or at the request of a party.

(1) A party shall notify all other parties before requesting a continuance.

(2) The presiding officer shall not be required to continue the hearing if all other parties have not been consulted or if any party objects.

(3) Each party who requires a continuance because of an emergency shall notify the presiding officer and any other party as soon as the party reasonably determines that an emergency exists.

(m) Each party shall have a reasonable opportunity to be heard. Each party shall be given the opportunity to present evidence and argument, conduct cross-examination, and submit rebuttal evidence, except as may be restricted by a pre-hearing order or limited grant of intervention.

(1) Unless otherwise limited by this regulation or the presiding officer, each party and each intervenor shall be given an opportunity to make opening statements and closing arguments.

(2) Unless the parties have been required to exchange exhibits before the hearing, each party shall bring a copy of each document offered as evidence for each party and at least two copies for the presiding officer. If possible, the original document, or a certified copy of the document, shall be offered into evidence at the hearing.

(3) All hearings shall be open to the public.

(4) All testimony of parties and witnesses shall be made under oath or affirmation.

(5) The direct examination of each witness shall be followed by cross-examination of the witness. Cross-examination shall be limited in scope to the testimony upon direct examination.

Redirect examination shall be limited in scope to the testimony upon cross-examination. Recross-examination shall be limited in scope to the testimony upon redirect.

(6) No more than one attorney for each party shall examine or cross-examine a witness. The presiding officer may require that only one attorney be allowed to cross-examine a witness on behalf of all parties united in interest.

(7) All testimony shall be taken on the record unless the presiding officer grants a request to go off the record.

(8) At the time determined by the presiding officer, the presiding officer shall announce that the record of exhibits and testimony shall be closed and, if applicable, that the matter has been taken under advisement.

(9) The record shall not be reopened except upon order of the presiding officer or the chief engineer.

(n)(1) In any hearing concerning an application filed under K.S.A. 82a-708b or K.S.A. 82a-711 and amendments thereto, the applicant shall bear the burden of proving, by a preponderance of the evidence, that the application should be approved.

(2) If the DWR does not offer opinion testimony concerning whether and how the application complies or does not comply with the applicable regulations, its participation in the hearing shall be limited as follows:

(A) The DWR shall make a proffer of the records of the agency pertaining to the pending matter and may offer the testimony of fact witnesses to lay foundation for the proffer. These witnesses may be cross-examined, but cross-examination shall be limited to the scope of the direct questioning.

(B) If any member of the DWR's staff is called as a witness for or is cross-examined by another party, the DWR shall be allowed to conduct cross-examination of the witnesses offered by that party.

(3) The applicant shall be heard after the DWR's proffer, unless the presiding officer determines that another order of presentation will facilitate the conduct of the hearing.

(4) If the DWR offers opinion testimony concerning whether and how the application complies or does not comply with the applicable regulations, the DWR shall be heard after the applicant and the DWR may participate in the hearing to the same extent as the applicant, unless the presiding officer determines that a different order of presentation will facilitate the conduct of the hearing.

(5) The presiding officer shall determine the order in which other parties and interveners may be heard.

(o) In hearings concerning the assessment of a civil penalty, the modification of a water right, the suspension of a water right, or the suspension of the use of water under a water right, the following requirements shall be met:

(1) The DWR shall bear the burden of proving, by a preponderance of the evidence, that a violation under K.S.A. 82a-737 and amendments thereto or K.S.A. 82a-770 and amendments thereto, or both, has occurred.

(2) The DWR shall be heard first at the hearing, unless the presiding officer determines that a different order of presentation will facilitate the conduct of the hearing. The presiding officer shall determine the order in which other parties and interveners may be heard.

(p) In an abandonment hearing pursuant to K.S.A. 82a-718 and amendments thereto, the DWR shall first present the verified report specified in K.S.A. 82a-718, and amendments thereto.

(1) The verified report shall be a report of the DWR's investigation into the water use history and shall contain the following:

(A) Documentation that shows the use or nonuse of water authorized by the water right as established by the contents of the DWR water right file and as reported to the DWR, pursuant to K.S.A. 82a-732 and amendments thereto;

(B) the analysis of the documentation used in the verified report by the preparer of the verified report;

(C) a conclusion citing the specific successive years of nonuse to meet the criteria for abandonment found in K.S.A. 82a-718 and amendments thereto; and

(D) the years for which due and sufficient cause for nonuse pursuant to K.A.R. 5-7-1 was reported to the chief engineer pursuant to K.S.A. 82a-732, and amendments thereto, and verified by the DWR.

(2)(A) If the verified report specified by K.S.A. 82a-718(a), and amendments thereto, establishes that there has been no lawful, beneficial use of water for the period of time specified in K.S.A. 82a-718(a) and amendments thereto and that due and sufficient cause for the nonuse of water has not been reported to the DWR pursuant to K.S.A. 82a-732 and amendments thereto during this period, this shall be considered to be prima facie evidence that the water right has been abandoned.

(B) Upon a determination by the presiding officer that prima facie evidence of abandonment exists, the water right owner shall bear the burden of rebutting the prima facie evidence by a preponderance of the evidence establishing that there had been lawful, beneficial use of water during the time period in question or that due and sufficient cause existed for the nonuse of water during the period of time in question, or both, to avoid the application of K.S.A. 82a-718(a) and amendments thereto.

(3) The DWR may participate in the hearing to the same extent as the owner or owners of the water right.

(4) The DWR shall be heard first at the hearing, unless the presiding officer determines that another order of presentation will facilitate the conduct of the hearing.

(5) The presiding officer shall determine the order in which other parties and interveners may be heard.

(q) During the hearing, all of the following shall apply:

(1) The presiding officer shall not be bound by the technical rules of evidence.

(2) The presiding officer shall give the parties a reasonable opportunity to be heard and to present evidence.

(3) The presiding officer shall give effect to the privileges listed in K.S.A. 60-426 through 436, and amendment thereto, and any other privileges recognized by law.

(4) Evidence shall not be required to be excluded solely if the evidence is hearsay.

(5) All parties may note, in the record, their exceptions to any ruling or other action of the presiding officer.

(6) If the presiding officer sustains an objection to evidence or testimony, the party may make a proffer of the excluded evidence. The presiding officer may add other statements to clearly show the character of the evidence, the form in which the evidence was offered, and the objection and the ruling made. Upon request, the excluded testimony or evidence shall be marked and preserved for the record upon appeal.

(7) Without notice to the parties and without receiving a request from any party, the presiding officer may take administrative notice of the following:

(A) The Kansas water appropriation act and other Kansas statutes;

(B) regulations promulgated by the chief engineer;

(C) orders issued by or on behalf of the chief engineer; and

(D) specific facts and propositions of general knowledge that are so universally known or known within the profession that they cannot reasonably be the subject of dispute or that are capable of immediate and accurate determination by using easily accessible sources of indisputable accuracy.

(8) Upon reasonable notice to the parties and the opportunity to contest and offer rebuttal evidence, the presiding officer may also take administrative notice of any of the following:

(A) Scientific or technical matters within the DWR's specialized knowledge;

(B) the record of other proceedings before the DWR; and

(C) codes and standards that have been adopted by an agency of the United States, the state of Kansas, or any other state or by a nationally recognized organization or association.

(r) The hearing and all prehearing conferences shall be electronically recorded at the expense of the Kansas department of agriculture (KDA).

(1) Copies of electronic recordings may be obtained from the DWR. Written transcripts of the recording shall be available by request, and the requestor shall pay the cost of transcription.

(2) The DWR shall hire and pay for a court reporter if deemed necessary by the presiding officer for the presiding officer's use or for the preservation of testimony for later use in a court proceeding. Written transcripts shall be obtained directly from the court reporter at the requester's expense.

(s) If the chief engineer has not delegated authority to the presiding officer to issue an order, the presiding officer shall issue written recommendations to the chief engineer after the record of the hearing is closed.

(1) The recommendations shall be signed by the presiding officer and shall contain a statement of the recommended decision and the facts and conclusions of law upon which the recommended decision is based.

(2) The presiding officer shall serve the original, signed recommendations on the chief engineer and a copy of the recommendations on each party and on its counsel of record, if any, in the manner specified in this regulation.

(3) The recommendations shall state that the parties have at least 15 days after service in which to provide written comments to the chief engineer and shall contain a certificate of service. After the rec-

ord of the hearing is closed, no party may submit additional evidence unless specifically permitted to do so by the presiding officer in advance of the submission. In order to receive permission to submit additional evidence, the party shall file a written request with the presiding officer, in advance, with a copy to each other party. Each other party shall be given a reasonable chance to respond to the request to submit additional information. If additional evidence is allowed, each other party shall be allowed a reasonable opportunity to rebut the additional evidence submitted.

(4) All comments submitted within the specified time frame shall be considered by the chief engineer before issuing an order.

(5) The order shall state that it is subject to review by the secretary of agriculture pursuant to K.S.A. 82a-1901, and amendments thereto.

(t) An order shall be issued by the chief engineer or, if so authorized, the presiding officer after the record of the hearing is closed.

(1) The order shall be signed by the chief engineer or the presiding officer and shall contain a statement of the relevant law and the facts upon which the decision is based.

(2) The order shall be served on each party or its counsel of record in the manner specified in these regulations and shall contain a certificate of service.

(3) If the presiding officer made recommendations to the chief engineer, the order shall state which recommendations, if any, have been accepted by the chief engineer. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 2008 Supp. 82a-708b, 82a-711, 82a-718, 82a-737, 82a-770, 82a-1038, and 82a-1901; effective March 20, 2009.)

5-14-4. Appeal of the failure of the chief engineer to timely issue a certificate of appropriation. (a) The time period specified in K.S.A. 82a-714(c), and amendments thereto, shall begin when the time authorized to perfect the water right, including any authorized extensions of time, expires.

(b) If the chief engineer fails to issue a certificate of appropriation within the time limit specified by K.S.A. 82a-714(c) and amendments thereto, the water right owner may file a request for review with the secretary of agriculture pursuant to K.S.A. 82a-1901, and amendments thereto, within 15 days of the expiration of the time period specified in K.S.A. 82a-714(c) and amendments

thereto. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 1999 Supp. 82a-714 and K.S.A. 1999 Supp. 82a-1901; effective Sept. 22, 2000.)

5-14-5. Conditions of a request for a conference hearing. (a) Any request for a conference hearing before the chief engineer shall meet the following conditions:

(1) Be in writing and be served on the chief engineer within 15 days of the issuance of the summary order;

(2) clearly admit, deny, or explain each of the findings of facts and conclusions of law in the summary order;

(3) identify any facts and conclusions of law that the person disputes and intends to place at issue; and

(4) state any other defenses and the bases for those defenses.

(b) If the person states that the person has no knowledge of a particular factual allegation, that allegation shall be deemed denied in the request. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706 and K.S.A. 82a-706b; effective Sept. 22, 2000.)

5-14-6. Informal settlement. At any time during the proceedings conducted under K.A.R. 5-14-2, K.A.R. 5-14-3, or K.A.R. 5-14-4, the alleged violator may request a settlement conference. The request shall be in writing and shall be served on the chief engineer on behalf of the alleged violator. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 1999 Supp. 82a-1901; effective Sept. 22, 2000.)

5-14-7. Conversion of a conference hearing. (a) At any point during a conference hearing being conducted according to K.A.R. 5-14-2, the conference hearing may be converted by the chief engineer to a full adjudicative hearing to be heard by the chief engineer.

(b) The conversion of a conference hearing to a full adjudicative hearing may be effected only upon providing notice to all parties to the original proceedings.

(c) The record of the conference hearing may be used in the full adjudicative hearing.

(d) After a conference hearing is converted to a full adjudicative hearing, the hearing officer shall perform the following:

(1) Give any additional notice to parties or other persons necessary to satisfy the requirements of a full adjudicative hearing; and

(2) conduct any additional proceedings necessary to satisfy the requirements of a full adjudicative hearing.

(e) If the conference hearing is converted to a full adjudicative hearing, the full adjudicative hearing shall be conducted according to the following criteria:

(1) The hearing officer shall regulate the course of the proceedings.

(2) The parties may testify and present exhibits.

(3) The hearing officer may allow nonparties an opportunity to present oral or written statements and exhibits.

(4) All testimony shall be given under oath.

(5) To the extent necessary for full disclosure of all relevant facts and issues, the hearing officer shall afford to all parties the opportunity to respond, present evidence and arguments, conduct cross-examination, and submit rebuttal evidence.

(6) The hearing officer may conduct all or part of the hearing by telephone or other electronic means, if each party in the hearing has an opportunity to participate in the entire proceeding while it is taking place.

(7) The hearing shall be recorded at the agency's expense.

(8) Any party, at that party's expense and subject to any reasonable conditions that the state agency may establish, may cause a person other than the state agency to prepare a transcript from the state agency's recording or cause additional recordings to be made during the hearing. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706 and 82a-706b; effective Sept. 22, 2000.)

5-14-10. Civil penalties for violations other than exceeding the authorized quantity of water.

(a) Penalty order. In addition to any other authorized enforcement procedures, if the chief engineer finds that any of the violations specified in K.S.A. 82a-737, and amendments thereto, have occurred, a written order may be issued by the chief engineer pursuant to K.S.A. 82a-737(e), and amendments thereto.

(b) Civil penalties.

(1) Any civil penalty assessed in any order issued under this regulation may be no greater than the civil penalties specified in subsection (m) for each applicable violation. Any day on which the violation continues to occur may constitute a separate offense. If an order is issued, the chief engineer may include all known violations of this regulation or K.A.R. 5-14-12, or both, and all penalties

pertaining to a given water right in the order. The order may include violations of this regulation or K.A.R. 5-14-12, or both, applicable to multiple water rights. Separate penalties may be assessed for each violation cited in a single order.

(2) The monetary penalties and suspension terms specified in subsection (m) may be reduced due to one or more of the following factors:

(A) The absence of any prior penalty assessed under the Kansas water appropriation act, or implementing regulations, during the five calendar years preceding the calendar year in which the most recent violation occurred and if that calendar year is not determinable, then preceding the calendar year in which the order is issued for the most recent violation;

(B) the absence of intentional noncompliance or gross negligence; or

(C) prompt cessation or correction of the violation upon discovery or notification by the chief engineer or an authorized representative or by personnel from a groundwater management district.

(c) Lower-tier miscellaneous. Any of the following actions or inactions may constitute a lower-tier miscellaneous violation:

(1) Operating and maintaining a water flowmeter or other water-measuring device required by the chief engineer that is out of compliance as specified in K.A.R. 5-1-9, unless the violation is a meter manipulation;

(2) failure to properly implement a conservation plan required by the chief engineer;

(3) committing a waste of water; and

(4) violating an order of the chief engineer or a term, condition, or limitation of a water right, approval of application, term permit or temporary permit, or any regulation not otherwise specifically listed as a violation in this regulation.

(d) Failure to provide information. Any of the following actions or inactions may constitute a failure to provide information:

(1) Failure to file a required monthly report; and

(2) failure to provide complete and accurate water use or other data, information, or records requested by the chief engineer or authorized representative, except the annual water use reports required by K.S.A. 82a-732 and amendments thereto, within the following time frames:

(A) For information regarding water use during administration of a water right, within 24 hours of the chief engineer's or authorized representative's request; and

(B) for all other information, within 15 days of the request made by the chief engineer or authorized representative or within any other time frame prescribed by the chief engineer or authorized representative when the request is made.

(e) Unauthorized diversion or threat to divert. Any of the following actions may constitute an unauthorized diversion or threat to divert:

(1) A threat to divert water without authorization from the chief engineer;

(2) irrigating an unauthorized place of use;

(3) diverting water at a rate in excess of the authorized rate of diversion;

(4) diverting water from an unauthorized point of diversion of water; and

(5) applying water to an unauthorized type of beneficial use.

(f) Denial of access. It may be a violation for any person to deny access to authorized agents of the chief engineer as required by K.S.A. 82a-706b, and amendments thereto.

(g) Lack of water flowmeter. It may be a violation for any person to fail to timely install, or to remove and fail to replace, a required water flowmeter or other acceptable water-measuring device.

(h) Noncompliance with a substantial order. Any of the following actions may constitute a violation of a substantial order of the chief engineer:

(1) Violating a cease-and-desist order issued by the chief engineer;

(2) violating an order of the chief engineer issued pursuant to K.S.A. 82a-706b, and amendments thereto;

(3) violating any order of the chief engineer issued pursuant to K.S.A. 82a-1038, K.S.A. 82a-1041, or K.S.A. 82a-745, and amendments thereto, or any associated term permit, relating to an intensive groundwater use control area, local enhanced management area, or water conservation area; and

(4) violating a minimum desirable streamflow order issued by the chief engineer pursuant to K.A.R. 5-15-1 through 5-15-3.

(i) Meter manipulation.

(1) Any of the following actions may constitute meter manipulation:

(A) Causing a water flowmeter or other acceptable water-measuring device to show an incorrect or inaccurate reading by any method, including any of the following:

(i) Tampering with the meter in any way;

(ii) physically altering the meter reading or the propeller;

(iii) operating the water flowmeter in reverse orientation or running the water flowmeter in reverse by any means; or

(iv) altering a water flowmeter from its factory specifications in a manner that causes the meter to underreport actual water use; and

(B) removing a seal placed on a pump, diversion device, or water flowmeter without the written permission of the chief engineer or the chief engineer’s authorized representative.

(2) If a penalty is assessed for meter manipulation under this regulation and more than one water right is serviced by a single meter, then a single penalty may be assessed for all water rights serviced by that meter.

(j) Falsification. Any of the following actions may constitute falsification:

(1) Providing false water use data, including providing inaccurate information during a perfection period or after a water right has been certified, that underreports or overreports water use; and

(2) falsifying any other required data or information.

(k) Noncompliance with a special condition of change application approval.

(1) Any of the following actions may constitute a violation of a special condition of a change application approval:

(A) Violating any of the terms and conditions of a multiyear allocation; and

(B) violating a term or condition limiting the net acres that may be irrigated in any one calendar year pursuant to an approval to allow annual rotation of the authorized place of use for irrigation.

(2) The suspension specified in subsection (m) may apply to all or any portion of the annual water use authorized by the water right, any term permit, and any water right upon which a multiyear allocation or rotation was based. Additionally, a subsequent restriction of the authorized place of use to the base acreage at a location specified in the change approval may be applied. After any suspension has expired, the water right may revert to all conditions in effect on the water right before approval of the change application that authorized the multiyear allocation or rotation.

(l) Penalties for water rights in a term permit. If falsification or meter manipulation occurs during the term of a multiyear flex account term permit or other term permit during which the base water right is suspended, the chief engineer may revoke the term permit, and the base water right

may be suspended for what would have been the remainder of the term permit. In addition to the suspension, a penalty corresponding to the falsification or meter manipulation violation cited may be imposed. Any additional reduction or suspension may run consecutively with the suspension for what would have been the remainder of the term permit.

(m) Penalty table. The following table may specify the maximum civil penalty and the maximum suspension term that may be assessed by the chief engineer for each violation of this regulation:

Violation	Monetary penalty	Maximum number of days monetary penalty applied	Suspension of water use
Lower-tier miscellaneous	\$500 per day	20	One year
Failure to provide information	\$500 per day, for each day the violation exists	20	One year
Unauthorized diversion or threat to divert	\$500 per day	20	One year
Denial of access	\$1,000 per day	10	Three years
Lack of water flowmeter	\$1,000 per day	10	Three years
Noncompliance with a substantial order	\$1,000 per day	10	Five years
Meter manipulation	\$1,000 per day	10	Five years
Falsification	\$1,000 per instance of falsification	Not applicable	Five years
Noncompliance with a special condition of a change application approval	\$1,000 per day	10	Two years

(n) Owner liability and effect of penalty on water right. Any civil penalty and any temporary reduction or suspension of the quantity of water authorized to be diverted under a water right in Kansas may be enforced against the owner or owners of the water right and shall attach to and transfer with the water right to any subsequent heir, assignee, purchaser, or other subsequent holder of the water right.

(o) Appeal. Any person aggrieved by an order of the chief engineer may request a review pursuant to K.S.A. 82a-1901, and amendments thereto, and after exhaustion of administrative remedies, may

appeal to the district court in the manner provided by the act for judicial review and civil enforcement of agency actions. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706a, K.S.A. 2016 Supp. 82a-737, and K.S.A. 2016 Supp. 82a-1901; effective Oct. 24, 2003; amended Oct. 31, 2008; amended July 14, 2017.)

5-14-11. Civil fines; water use reporting.

(a) Any owner of a water right or approval of application may be assessed a civil penalty of \$1,000 per year for each water right or approval of application for which the owner does not perform the following:

(1) Timely submit an annual water use report pursuant to K.S.A. 82a-732, and amendments thereto; and

(2) submit a complete and accurate water use report pursuant to K.S.A. 82a-732, and amendments thereto.

(b) If the owner submits both the complete and accurate water use report and payment of the civil penalty after March 1 but before June 1, the civil penalty per water right or approval of application may be reduced to \$250 for each water right or approval of application.

If the owner submits the reduced civil penalty but not the water use report after March 1, the civil penalty may increase on June 1 to the maximum civil penalty of \$1,000 for each water right or approval of application. The initial reduced civil penalty received after March 1 but before June 1 shall be applied toward the maximum civil penalty owed. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706a, K.S.A. 2016 Supp. 82a-732, and K.S.A. 2016 Supp. 82a-737; effective Oct. 24, 2003; amended Sept. 22, 2017.)

5-14-12. Civil penalties for exceeding the authorized quantity of water.

(a) **Penalty order.** In addition to any other authorized enforcement procedures, if the chief engineer finds a diversion of water in excess of the authorized quantity, a written penalty order may be issued by the chief engineer pursuant to 82a-737(e), and amendments thereto.

(b) **Owner liability and effect of penalty on water right.** Any civil penalty and any temporary reduction or suspension of the quantity of water authorized to be diverted under a water right in this state may be enforced against the owner or owners of the water right and shall attach to and transfer with the water right to any subsequent

heir, assignee, purchaser, or other subsequent holder of the water right.

(c) **Penalty categories.** Any violation for diversion of water in excess of the authorized quantity may be subject to the penalties specified in one of the following categories, as listed in subsection (e): category 1, category 2, category 3, or category 4.

(1) A category 1 penalty may be assessed if no penalty for diversion of water in excess of the authorized quantity has been assessed against the water right for a violation that occurred during the five calendar years preceding the calendar year in which the most recent violation occurred.

(2) A category 2 penalty may be assessed if one prior penalty for diversion of water in excess of the authorized quantity has been assessed against the water right for a violation that occurred during the five calendar years preceding the calendar year in which the most recent violation occurred.

(3) A category 3 penalty may be assessed if two prior penalties for diversion of water in excess of the authorized quantity have been assessed against the water right for a violation that occurred during the five calendar years preceding the calendar year in which the most recent violation occurred.

(4) A category 4 penalty may be assessed if three or more prior penalties for diversion of water in excess of the authorized quantity have been assessed against the water right for a violation that occurred during the five calendar years preceding the calendar year in which the most recent violation occurred.

(d) **Severity level of violation.** Any violation may be assigned a severity level based upon the amount of water diverted in excess of the authorized quantity, according to the following:

(1) A water right that has exceeded its authorized quantity by less than an amount equal to the amount resulting from 24 hours of pumping at the maximum authorized rate may be assessed a maximum of a severity level A penalty.

(2) A water right that has exceeded its authorized quantity by an amount equal to at least the amount resulting from 24 hours of pumping but less than an amount equal to 72 hours of pumping at the maximum authorized rate may be assessed a maximum of a severity level B penalty.

(3) A water right that has exceeded its authorized quantity by an amount equal to at least the amount resulting from 72 hours of pumping at the maximum authorized rate may be assessed a maximum of a severity level C penalty.

(e) Penalty table. The following table may be used to determine the maximum civil penalty and the maximum reduction or modification of the water right that may apply to each violation, based on the penalty category and the severity level of the violation:

Penalty category	Severity level A	Severity level B	Severity level C
1	Written notice of noncompliance	\$1,000 per day and a reduction in quantity equal to two times the quantity overpumped, not to exceed the annual authorized quantity	\$1,000 per day and a reduction in quantity equal to three times the quantity overpumped, not to exceed the annual authorized quantity
2	\$1,000 per day and a reduction in quantity equal to two times the quantity overpumped, not to exceed the annual authorized quantity	\$1,000 per day and a one-year suspension	\$1,000 per day and three-year suspension
3	\$1,000 per day and a one-year suspension	\$1,000 per day and a three-year suspension	\$1,000 per day and a four-year suspension
4	\$1,000 per day and a three-year suspension	\$1,000 per day and a four-year suspension	\$1,000 per day and a five-year suspension

(f) Mitigating factors. The monetary penalties and suspension terms specified in subsection (e) may be reduced due to one or more of the following factors:

(1) The absence of any prior penalty assessed under the Kansas water appropriation act, or the implementing regulations, during the five calendar years preceding the calendar year in which the most recent violation occurred;

(2) the absence of intentional noncompliance or gross negligence; or

(3) prompt cessation or correction of the violation upon discovery or notification by the chief engineer or an authorized representative of the chief engineer or by personnel from a groundwater management district.

(g) Notice of noncompliance. Any notice of noncompliance issued under this regulation may

be considered a category 1 penalty for purposes of classifying any future violation.

(h) Multiple water rights.

(1) If multiple water rights or permits authorize the use of water from a single point of diversion and if the water used exceeds the total quantity of water authorized by the water rights and permits, all water rights and permits under which the water was lawfully diverted may be deemed to be violated unless sufficient evidence to the contrary is offered by one or more of the water right owners.

(2) Any monetary penalty assessed under this regulation may be applied jointly and separately to the water rights, any temporary quantity reduction may be applied proportionally to each water right based on the authorized quantities for the water rights, and any suspension may be applied to all the water rights, unless it can be determined that the quantity available under a given water right was not exceeded.

(i) Penalties for water rights in a term permit. For each instance of diversion of water in excess of the total authorized quantity under a multiyear flex account term permit or other term permit during which the base water right is suspended, the chief engineer may revoke the term permit. For each revocation, a suspension may be applied to the base water right for what would have been the remainder of the term of the permit, in addition to any penalty assessed according to subsection (e). Any additional reduction or suspension may run consecutively with the suspension for what would have been the remainder of the term of the term permit.

(j) Expiration of penalty.

(1) Any penalty assessed by the chief engineer for diversion of water in excess of the authorized quantity under this regulation may expire four calendar years after the end of the calendar year in which the penalty was assessed.

(2) Any penalty that has not expired may be counted as a prior penalty for purposes of determining the category level of any future penalty for diversion of water in excess of the authorized quantity.

(3) A penalty that has expired under paragraph (j)(1) shall not be considered in assessing a future penalty under this regulation or under K.A.R. 5-14-10.

(4) A penalty that has expired shall not be expunged from the record of a water right and, except as otherwise provided in this regulation,

may be considered by the chief engineer for any purposes pursuant to the Kansas water appropriation act, K.S.A. 82a-701 et seq. and amendments thereto, and the implementing regulations. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706a and K.S.A. 2016 Supp. 82a-737; effective July 14, 2017.)

Article 15.—MINIMUM DESIRABLE STREAMFLOWS

5-15-1. Administration of minimum desirable streamflow. (a) Except as specified in subsection (d), if the streamflow at a minimum desirable streamflow (MDS) gaging station falls below the streamflow established in K.S.A. 82a-703c, and amendments thereto, for a period of seven consecutive days, a determination of whether the following conditions have been met shall be made by the chief engineer:

(1) The actual daily average streamflow at the gage has been less than the streamflow trigger value set by K.A.R. 5-15-4.

(2) If an alluvial aquifer has a significant effect on streamflow, the static groundwater level in the alluvial aquifer above the gage is insufficient to maintain MDS in the stream.

(b) Whenever the chief engineer determines that MDS administration should occur according to subsection (d) or because the conditions specified in paragraphs (a)(1) and (2) have both been met, water rights and approvals of applications with a priority after April 12, 1984 shall be administered in order of priority as necessary to protect the appropriate minimum desirable streamflow specified in K.S.A. 82a-703c, and amendments thereto. Owners of record in the office of the chief engineer of water rights and approvals of applications that are being administered shall be notified by the chief engineer that water rights and approvals of applications are being administered to protect MDS. This notification shall be made by certified mail, personal notice, or other verifiable means.

(c) After administration to protect MDS has begun, no person that has received notice according to subsection (b) may divert water under the authority of a water right or approval of application with a priority after April 12, 1984, unless one of the following conditions is met:

(1) The owner of the water right or approval of application has entered into an annual MDS consent order with the chief engineer in accordance

with the provisions of K.A.R. 5-15-2 and is diverting water in accordance with the terms of that MDS consent order.

(2) The chief engineer has determined, in accordance with the provisions of K.A.R. 5-15-3, that administration of water rights and approvals of applications with a priority after April 12, 1984 is no longer necessary to protect MDS and has notified the owners by certified mail, personal notice, or other verifiable means that diversions may continue in accordance with the terms, conditions, and limitations of the water right or approval of application.

(d) If the streamflow at an MDS gaging station falls below the level established in K.S.A. 82a-703c, and amendments thereto, for a period of seven consecutive days and no streamflow trigger value has been set for an MDS gaging station in K.A.R. 5-15-4, a determination of whether and when MDS administration will begin and how it should occur shall be made by the chief engineer, based on the following factors:

(1) The general hydrologic conditions affecting streamflow in the stream reach;

(2) the magnitude and duration of recent streamflows;

(3) the extent to which groundwater contributes to streamflow;

(4) the effects of drought on streamflow;

(5) the existence and effect of relevant water management agreements;

(6) the magnitude of the effect that the administration of water rights with priorities junior to the MDS values would have on the streamflow; and

(7) the effect of reservoir operations.

This regulation shall be effective on and after August 27, 2002. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-703a, 82a-703b, and 82a-703c; effective, T-5-4-29-02, April 29, 2002; effective Aug. 27, 2002.)

5-15-2. Minimum desirable streamflow consent orders. (a) An annual minimum desirable streamflow (MDS) consent order according to K.A.R. 5-15-1(c)(1) may be entered into by the chief engineer and the owner of the water right or approval of application to divert surface water. This consent order shall contain the following provisions:

(1) Whenever the chief engineer has determined that the administration of water rights and approvals of applications to divert surface water

with a priority after April 12, 1984 is necessary to protect the minimum desirable streamflow set by K.S.A. 82a-703c, and amendments thereto, water shall not be diverted under the authority of these water rights or approval of applications unless the owner has been notified by the chief engineer by certified mail, personal notice, or other verifiable means that either of the following conditions has been met:

(A)(i) The chief engineer has determined that the average daily streamflow has been, or is likely to be, at or above the temporary surface water diversion threshold for a period of time specified in K.A.R. 5-15-4 or set by the chief engineer according to K.A.R. 5-15-1(d); and

(ii) the chief engineer has determined that water is available to be diverted during that time period under the priority of water rights or approval of applications with a priority after April 12, 1984 without impairing senior water rights or senior water reservation rights.

(B) The chief engineer has determined that it is no longer necessary to administer water rights and approval of applications to protect the minimum desirable streamflow set by K.S.A. 82a-703c, and amendments thereto.

(2) The owner of the water right or approval of application shall properly install and maintain a water flowmeter on all points of diversion authorized by the water rights or approval of applications in accordance with regulations adopted by the chief engineer.

(3) The water right owner agrees that failure to abide by either of the following will result in the suspension of the water right or approval of application pursuant to K.S.A. 82a-737, and amendments thereto, for the remainder of the calendar year, and any other enforcement actions that may be authorized by law:

(A) The terms of the MDS consent order; or

(B) the terms, conditions, and limitations of the water right or approval of application.

(4) The water right owner agrees to comply with any other provisions that the chief engineer determines are necessary to prevent impairment, protect MDS values, and protect the public interest.

(b) If the chief engineer determines that hydrologic conditions indicate that some groundwater will be available to be pumped in the basin during the next water-use season or year by water rights or approval of applications with a priority after April 12, 1984, the owner of the water right or

approval of application may enter into an annual MDS consent order pursuant to K.A.R. 5-15-1(c) (1) to divert groundwater, upon approval of the chief engineer. This consent order shall contain the following provisions:

(1) Whenever the chief engineer has determined that the administration of water rights and approval of applications to divert groundwater with a priority after April 12, 1984 is necessary to protect minimum desirable streamflows set by K.S.A. 82a-703c, and amendments thereto, groundwater shall not be diverted under the authority of the water right or approval of application unless the owner has been notified by the chief engineer by certified mail, personal notice, or other verifiable means that one of the following conditions has been met:

(A) During MDS administration during that calendar year, the owner is authorized to divert, pursuant to the owner's water right or approval of application, a quantity of water not to exceed that quantity of water set forth in K.A.R. 5-15-4 as the well pumping allowance.

(B) The chief engineer has determined that it is no longer necessary to administer water rights and approvals of applications to protect the minimum desirable streamflows set by K.S.A. 82a-703c, and amendments thereto.

(2) The owner of the water right or approval of application shall properly install and maintain a water flowmeter on all points of diversion authorized by the water right or approval of application in accordance with regulations adopted by the chief engineer.

(3) The total quantity of water authorized to be diverted under the water right or approval of application during a calendar year shall not exceed the annual quantity of water authorized.

(4) The water right owner agrees that failure to abide by either of the following will result in the suspension of the water right or approval of application for the remainder of the calendar year, and any other enforcement actions that may be authorized by law:

(A) The terms of the MDS consent order; or

(B) the terms, conditions, and limitations of the water right or approval of application.

(5) The water right owner agrees to comply with any other provisions that the chief engineer determines are necessary to prevent impairment, protect MDS values, and protect the public interest.

This regulation shall be effective on and after

August 27, 2002. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-703a, 82a-703b, and 82a-703c, and K.S.A. 2001 Supp. 82a-737; effective, T-5-4-29-02, April 29, 2002; effective Aug. 27, 2002.)

5-15-3. Cessation of minimum desirable streamflow administration. (a) Except as specified in subsection (c), whenever the chief engineer determines that both of the conditions specified in subsection (b) have been met, the administration of water rights and approvals of applications with a priority after April 12, 1984 to protect minimum desirable streamflows pursuant to K.S.A. 82a-703c, and amendments thereto, shall be declared by the chief engineer to be no longer necessary. The owners of those water rights and approvals of applications shall be notified by the chief engineer by certified mail, personal notice, or other verifiable means that the owners may recommence diverting water in accordance with the terms, conditions, and limitations of their water rights or approvals of applications.

(b)(1) The streamflows at the minimum desirable streamflow (MDS) gage have exceeded the streamflows established by K.S.A. 82a-703c, and amendments thereto, for a period of 14 consecutive days.

(2) If a significant alluvial aquifer exists, the average static water level in the alluvial aquifer has recovered sufficiently to maintain MDS in the stream.

(c) Whenever the chief engineer determines that hydrologic conditions indicate that MDS values have been met or exceeded and are likely to be maintained for the foreseeable future, MDS administration may be declared by the chief engineer to be no longer necessary even if both of the conditions of subsection (b) have not been met.

This regulation shall be effective on and after August 27, 2002. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-703a, 82a-703b, and 82a-703c; effective, T-5-4-29-02, April 29, 2002; effective Aug. 27, 2002.)

5-15-4. Standards for minimum desirable streamflow. The streamflow trigger values, temporary surface water diversion thresholds, and well pumping allowances set forth in the following table shall be used whenever appropriate in these regulations.

MDS gaging station	streamflow trigger value	temporary surface water diversion threshold	well pumping allowance
Republican River Concordia	150 percent of the daily average MDS value* for the 60 preceding days	115 percent of MDS value* for a period of at least five days	32 percent of the maximum annual quantity of water that has not been diverted under the authority of that water right or approval of application, at the time MDS administration begins
Republican River Clay Center	150 percent of the daily average MDS value* for the 60 preceding days	100 percent of MDS value* for a period of at least five days	32 percent of the maximum annual quantity of water that has not been diverted under the authority of that water right or approval of application, at the time MDS administration begins

* “MDS value” means the minimum desirable streamflow value established by K.S.A. 82a-703c, and amendments thereto.

This regulation shall be effective on and after August 27, 2002. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-703a, 82a-703b, and 82a-703c; effective, T-5-4-29-02, April 29, 2002; effective Aug. 27, 2002.)

Article 16.—FLEX ACCOUNT

5-16-1. Definitions. The terms and definitions in this regulation shall apply to this article and to K.S.A. 82a-736, and amendments thereto, unless the context clearly requires otherwise. (a) “Subdivision or subdivisions of the place of use for the base water right” means one or more portions of the authorized place of use under the base water right that are identifiable and completely circumscribed by the boundaries of place of use for the base water right.

(b) “Water conservation” means conservation by means of actual physical changes in a water distribution system or management practices that improve water use efficiency, which shall include one or more of the following:

- (1) Conversion from flood irrigation to center

pivot irrigation with a nozzle package designed to improve water use efficiency;

- (2) conversion to subsurface drip irrigation;
- (3) removal of an end gun, resulting in a significant reduction in the number of irrigated acres; or
- (4) enrollment of the base water right in the water right conservation program, the conservation reserve program, or any other multiyear water conservation program approved by the chief engineer. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 2012 Supp. 82a-736; effective Oct. 11, 2002; amended Jan. 6, 2006; amended, T-5-8-29-11, Aug. 29, 2011; amended Dec. 16, 2011; amended June 21, 2013.)

5-16-2. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 2001 Supp. 82a-708a(d), as amended by L. 2002, Ch. 181, § 21; effective Oct. 11, 2002; revoked June 21, 2013.)

5-16-3. Establishing a multiyear flex account. (a) A multiyear flex account shall be established by filing an application for a multiyear flex account and a term permit on a form prescribed by the chief engineer. Each application shall meet the following requirements:

(1) Except as specified in subsection (e), a separate application shall be filed for each water right and each point of diversion for which the owner desires to establish a multiyear flex account. Each application shall be accompanied by the appropriate filing fee;

(2) be date-stamped showing the date the application was filed with the chief engineer;

(3) indicate the five consecutive calendar years that are to be designated as the multiyear flex account period; and

(4) indicate whether the multiyear flex account period will commence with the year in which the application is made if filed before October 1, or with the next calendar year after the calendar year in which the application is filed.

(b) Before any application to establish a multiyear flex account and a term permit will be accepted for filing, the application shall be signed by at least one owner of the water right or an authorized agent of an owner of the water right.

(c) Before the multiyear flex account can be established or the term permit approved, all of the water rights owners, or an authorized agent of the owners, shall verify upon oath or affirmation that the statements contained in the application are true and complete.

(d) If one or more owners refuse to sign the application or if a written request is filed by one or more of the owners to withdraw their signatures from the application before the application is approved, the application shall be dismissed.

(e) A single application to establish a multiyear flex account and apply for a term permit shall be filed in the following situations:

(1) Multiple water rights authorize the diversion of water from a single point of diversion that diverts water to an identical place of use.

(2) Multiple points of diversion are authorized by the chief engineer to divert water through a single water flowmeter before going to an identical place of use.

(f) The multiyear flex account shall not be established and the term permit to exercise the multiyear flex account shall not be valid until both have been approved by the chief engineer. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 2012 Supp. 82a-736; effective Oct. 11, 2002; amended, T-5-8-29-11, Aug. 29, 2011; amended Dec. 16, 2011; amended June 21, 2013.)

5-16-4. Conditions on the term permit.

(a) The place of use authorized by a term permit shall be identical to the place or places of use authorized by the base water right or rights or a subdivision or subdivisions of the place of use for the base water right.

(b) The types of use authorized by a term permit shall be limited to the types of use authorized by the base water right or rights.

(c) The rate of diversion authorized by a term permit shall not exceed the maximum instantaneous rate of diversion authorized by the base water right or rights. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 2012 Supp. 82a-736; effective Oct. 11, 2002; amended June 21, 2013.)

5-16-5. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 2010 Supp. 82a-736, as amended by L. 2011, ch. 89, sec. 28; effective Oct. 11, 2002; amended Jan. 6, 2006; amended, T-5-8-29-11, Aug. 29, 2011; amended Dec. 16, 2011; revoked June 21, 2013.)

5-16-6. Multiyear flex accounts and term permits. (a) The duration of the multiyear flex account and term permit shall be five consecutive calendar years.

(b) If water use records for a base water right are inadequate to accurately determine actual water use during any calendar year in the period

used to determine the base average usage, then the actual water use for that calendar year shall be deemed to be zero.

(c) There shall be no carryover of unused quantities of water from one multiyear flex account or term permit to another multiyear flex account or term permit.

(d) No multiyear flex account shall be allowed if the multiyear flex account is inconsistent with the provisions of any intensive groundwater use control area created pursuant to K.S.A. 82a-1036 through K.S.A. 82a-1040, and amendments thereto, or any local enhanced management area created pursuant to K.S.A. 82a-1041, and amendments thereto.

(e) Water flowmeters shall be required under all multiyear flex account term permits and shall meet all of the following requirements:

(1) A water flowmeter meeting the requirements of the chief engineer shall be installed on each point of diversion authorized by the base water right.

(2) Each water flowmeter and the measuring chamber shall be sealed to the diversion works in a manner to ensure that the flowmeter and the measuring chamber can not be removed and reinstalled without breaking the seal.

(3) Each water flowmeter register shall be sealed in a manner to ensure that the register can not be manipulated without breaking the seal.

(4) Each replacement of a water flowmeter during the duration of a multiyear flex account shall be equipped with an anti-reverse-flow mechanism.

(f) Only an entire water right, or a portion of a water right that has been formally divided, may be deposited in a multiyear flex account. Nothing in this subsection shall prevent a multiyear flex account term permit from authorizing a subdivision of the place of use for the base water right as the place of use for the multiyear flex account.

(g) All water diverted pursuant to a term permit and the base water rights associated with the term permit shall be counted against the quantity of water deposited in the multiyear flex account. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 2012 Supp. 82a-736; effective Oct. 11, 2002; amended June 21, 2013.)

5-16-7. Conditions under which a base water right may be exercised. Each term permit approved by the chief engineer pursuant to K.S.A. 82a-736, and amendments thereto, shall in-

clude the condition that if the term permit can no longer be exercised because of an order issued by the chief engineer, including an intensive groundwater use control area order, a minimum desirable streamflow order, or an order to administer water rights to prevent impairment, then any base water right may be exercised to the extent that all of the following conditions are met: (a) The base water right is in priority, including priority with respect to any established minimum desirable streamflow.

(b) The annual quantity of water authorized by the base water right has not been diverted during that calendar year.

(c) The five-year quantity authorized by the term permit has not been completely used.

(d) The use of water under the base water right does not impair water rights senior to the base water right. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 2012 Supp. 82a-736; effective Oct. 11, 2002; amended June 21, 2013.)

Article 17.—WATER BANKING

5-17-1. Definitions for water banking. As used in these water banking regulations, in the Kansas water banking act, K.S.A. 82a-761 et seq. and amendments thereto, and by the chief engineer in the administration of this act, unless the context clearly requires otherwise, the following words and phrases shall have the meanings ascribed to them in this regulation:

(a) “Bankable water right” means a water right, or portion of a water right, that meets the requirements of the following:

- (1) K.S.A. 82a-764, and amendments thereto; and
- (2) the water bank charter.

In calculating the portion of a water right that is bankable, credit shall be given for any water conservation practices implemented according to this regulation. The bankable portion of linked water rights shall be determined on a case-by-case basis. For a surface water right that has water available from a water assurance district, the quantity of water available from the water assurance district may be considered when determining how much of the water right is bankable.

(b) “Good standing,” only for the purposes of the Kansas water banking act and regulations, means a water right, or portion of a water right, that meets all of the following criteria:

(1) Except as set forth in paragraph (b)(2), the water right, or portion of a water right, has been lawfully put to beneficial use within the past five years.

(2) For a water right that has been enrolled in the water right conservation program (WRCP) or a water right whose authorized place of use has been enrolled in the conservation reserve program (CRP), the water right has been put to lawful beneficial use within the five-calendar-year period before enrollment in the program. A water right that is currently enrolled in the WRCP shall not be deposited in a water bank. If the authorized place of use is currently enrolled in the CRP, the water right shall not be deposited in a water bank, unless the authorized place of use has been changed to a place of use that is not enrolled in the CRP and water has actually been applied to beneficial use on the newly authorized place of use for at least one calendar year.

(3) All of the following conditions regarding the water right are met:

(A) In the five calendar years before the water right is deposited or placed in a safe deposit account, there has not been a conviction associated with that water right pursuant to K.S.A. 82a-728, and amendments thereto.

(B) No civil penalty has been assessed pursuant to K.S.A. 82a-737, and amendments thereto, against anyone for violations relating to the water right.

(C) The water right has not been suspended pursuant to K.S.A. 82a-737, and amendments thereto.

(D) No order of the chief engineer relating to the water right has been disobeyed.

(E) The applicant who is applying to deposit the water right into, or lease water from, a water bank or to withdraw water from a safe deposit account has a history of compliance with contracts with the water bank and term permits used to withdraw water from a water bank or from a safe deposit account.

(c) "Long-term rolling average," only for the purposes of the Kansas water banking act, means a five-year running average of the net consumptive use of all the participating rights. This average shall be calculated by adding together the average net consumptive use for each participating right in a hydrologic unit.

The average shall first be computed after the water bank has been in operation for three years. For each year after the third year, another year's data shall be added until five years of data are available. After the water bank has been in operation for five years or more, the last five years of data shall be used to calculate the average. The resulting number shall then be compared against the average annual net consumptive use of partic-

ipating rights in that hydrologic unit for the representative past period.

(d) "Net consumptive use" means the gross diversion of water for beneficial use, minus the following:

(1) Waste of water, as defined in K.A.R. 5-1-1; and

(2) return flows to the source of water supply through surface water that is not waste and by deep percolation.

For irrigation use, only as used in the water banking act and regulations, net consumptive use shall be calculated as 85 percent of the actual legal gross diversions in any one calendar year or calculated using some other methodology approved by the chief engineer as complying with standard engineering practices. Net consumptive use for all other types of water use shall be calculated in accordance with a methodology approved by the chief engineer as complying with standard engineering practices.

The average annual net consumptive use for the representative past period shall be calculated by first calculating the average annual net consumptive use for each participating right for the representative past period and then adding those averages together. If a participating right did not legally divert water during any year in the representative past period or was not authorized to divert water, that year shall be counted as zero in computing the average annual consumptive use for that water right for the representative past period.

(e) "Participating rights" means all of the water rights in a hydrologic unit that are under contract to be deposited in a water bank or safe deposit account.

(f) "Representative past period" means a period of at least 10 consecutive years occurring entirely before the date on which the water bank is chartered and having a reasonable balance of years with above-normal and below-normal precipitation. For a water right not permitted during the entire representative past period, for the sole purpose of determining the portion of that water right that is bankable pursuant to K.S.A. 82a-765(b)(9) and amendments thereto, the water bank may select a different representative past period, but the bankable portion of each water right shall be the lesser of either of the following:

(1) The annual quantity of water perfected; or

(2) the average percentage of water rights determined to be bankable, for all water rights in that hydrologic unit that were permitted for the representative past period occurring entirely before the date on which the bank was chartered.

(g) “Severely depleted groundwater aquifer” means an aquifer that meets any of the following criteria:

(1) The chief engineer has declared the aquifer to be an aquifer in need of recovery pursuant to K.S.A. 2-1919, and amendments thereto.

(2) The average static water level decline in the hydrologic unit, based on a representative sample of wells distributed throughout the hydrologic unit, in the 20 calendar years immediately preceding the calendar year in which the water bank was chartered is substantially greater than the average annual variability in the static water level in the hydrologic unit.

(3) The average yield of the groundwater aquifer is not sufficient to meet the 50 percent chance net irrigation requirements (N.I.R.) for crops typically grown in the hydrologic unit using methods of irrigation typically used in that hydrologic unit.

(h) “Severely depleted stream course” means a stream reach that has been declared by the chief engineer to be a stream reach in need of stream recovery pursuant to K.S.A. 2-1919, and amendments thereto.

(i) “Water conservation practices” means actual physical changes in a water distribution system or management practices that were made to improve water use efficiency during the representative past period, including the following:

(1) Conversion from flood irrigation to center pivot irrigation with a nozzle package designed to improve water use efficiency;

(2) irrigation scheduling;

(3) conversion to subsurface drip irrigation; and

(4) removal of an end gun, resulting in a reduction in the number of irrigated acres.

The applicant shall have the burden of documenting the implementation of water conservation practices that could have altered the results of the calculation of the portion of the water right that is bankable, to the detriment of the applicant. (Authorized by and implementing K.S.A. 2003 Supp. 82a-769; effective Aug. 13, 2004.)

5-17-2. Application to deposit a water right into a water bank or withdraw a deposit.

(a) Each water right owner proposing to deposit all or a portion of a water right into a water bank shall complete an application on a form prescribed by the water bank and approved by the chief engineer. The application shall be filed with the water bank on or before April 1 of the year in which the deposit will be made. A water right, or a portion of a water

right, may be deposited only in increments of full calendar years. A water right shall not be eligible for deposit if water use occurred under the water right, or a portion of the water right, at any time from January 1 through March 31 of the year in which the deposit will be made. The application shall contain the following information concerning the water right, or portion of the water right, that is proposed to be deposited:

(1) The file number of the water right to be deposited;

(2) if the water right is a vested right or an appropriation right that has been certified by the chief engineer, specification of that status;

(3) the hydrologic unit from which the water right is authorized to withdraw water;

(4) the calendar years during which the water right will be on deposit. This period shall not exceed five years; and

(5) any CRP contracts that were in effect for any part of the representative past period.

(b) A water right may be withdrawn from deposit only if both of the following conditions are met:

(1) The water right has not been leased in whole or part.

(2) An application to withdraw the water right from deposit is made before July 1 of the calendar year for which the deposit has been made. Withdrawal of a water right during one calendar year also shall withdraw the water right from deposit in any subsequent years for which the water right may have been deposited. (Authorized by K.S.A. 2009 Supp. 82a-769; implementing K.S.A. 2009 Supp. 82a-763, K.S.A. 2009 Supp. 82a-764, and K.S.A. 2009 Supp. 82a-769; effective Aug. 13, 2004; amended May 21, 2010.)

5-17-3. Contract for deposit of a water right.

(a) Each water right owner that has an application approved for the deposit of all or a portion of a water right into a water bank and that desires to deposit all or a portion of the water right into the water bank shall enter into a contract with the water bank that includes the following provisions and information:

(1) The file number of the water right to be deposited;

(2) the hydrologic unit from which the water is authorized to be withdrawn;

(3) the calendar years during which the water right will be on deposit, which shall not exceed five years;

- (4) the quantity of water to be deposited;
- (5) the terms of payment for the deposit;
- (6) if a portion of a water right is deposited, an agreement that the quantity of water pumped under the portion of the water right that is not deposited shall not exceed the difference between the bankable portion of the water right and the amount deposited; and
- (7) an acknowledgment of the specific fines or suspension penalties that will be imposed for violation of the contract.

(b) The water bank shall notify the chief engineer of each water right deposit before the deposit is leased. This notice shall include a determination of the annual quantity of water that is bankable for each water right and the portion of the bankable quantity of the water right that has been deposited. If an entire water right is deposited, no water may be pumped under that water right, except under the authority of a lease from a water bank and a term permit issued by the chief engineer to exercise that lease. If a portion of a water right is deposited, the annual quantity of water pumped under the portion of the water right that is not deposited shall not exceed the difference between the bankable portion of the water right and the amount deposited. An order may be issued by the chief engineer after the deposit notifying the owner of the annual quantity of water, if any, that may be diverted under the original water right to prevent the net consumptive use of the water right from being increased. (Authorized by K.S.A. 2003 Supp. 82a-769; implementing K.S.A. 2003 Supp. 82a-763 and K.S.A. 2003 Supp. 82a-769; effective Aug. 13, 2004.)

5-17-4. Application to lease water. (a) Each person proposing to lease water from a water bank shall complete an application for a contract to lease water on a form prescribed by the water bank and approved by the chief engineer and an application for a term permit. The application for the contract shall be filed with the water bank. The application for a term permit shall be filed with the chief engineer. Each application shall include the following information concerning the water proposed to be leased:

- (1) The quantity of water to be leased;
- (2) the proposed maximum rate of diversion;
- (3) the calendar years during which water is proposed to be leased, which shall not exceed the length of the water bank charter plus three calendar years;

- (4) the location of the proposed point of diversion, including the hydrologic unit;
- (5) the proposed place of use;
- (6) the proposed use made of water;
- (7) the water flowmeter reading from the proposed point of diversion, if the water will be diverted from an existing point of diversion, at the time the application is filed;

(8) the file numbers of the other water rights and approvals of applications that authorize use of water from the proposed point of diversion; and

- (9) if the proposed use is for irrigation, the number of acres that will be irrigated and the number of acres of each type of crop that will be grown.

(b) Any water bank may enter into a lease extending beyond the length of the water bank charter only if both of the following conditions are met:

(1) The water bank charter has a procedure approved by the chief engineer that sets forth how the leases will be administered if the water bank is dissolved.

(2) The bank charter assigns the responsibility and cost of administering the leases after the water bank is dissolved to a responsible person or entity.

(c) Any applicant whose application meets all the criteria in subsections (a) and (b) may enter into a contract to lease water from the water bank if sufficient water rights have been deposited in the same hydrologic unit where the point of diversion and the place of use are proposed to be located to cover the lease. (Authorized by K.S.A. 2003 Supp. 82a-769; implementing K.S.A. 2003 Supp. 82a-763 and K.S.A. 2003 Supp. 82a-769; effective Aug. 13, 2004.)

5-17-5. Contract to lease water. Any person who has an application approved by the water bank for the lease of water from the water bank may enter into a contract with the water bank to lease water. The contract shall be entered into before a term permit can be issued by the chief engineer and shall include the following information and provisions:

- (a) The quantity of water to be leased;
- (b) the maximum rate of diversion at which the leased water will be diverted;
- (c) the calendar years during which water will be leased, which shall not exceed the length of the water bank charter plus three calendar years;
- (d) the location of the point of diversion where the leased water will be diverted, including the hydrologic unit;

- (e) the use made of the water to be leased;
- (f) the place of use of the water to be leased. The place of use shall be identical to a place of use authorized by an existing water right or approval of application, or shall be an entirely new place of use;
- (g) the terms of payment for the lease of water;
- (h) the penalties for breach of the lease, including those set forth in K.A.R. 5-17-13; and
- (i) a provision that if the term permit is not obtained by a certain date or the term permit is dismissed for any reason, the contract shall not be exercised. (Authorized by K.S.A. 2003 Supp. 82a-769; implementing K.S.A. 2003 Supp. 82a-763 and K.S.A. 2003 Supp. 82a-769; effective Aug. 13, 2004.)

5-17-6. Conditions on the term permit to exercise a contract to lease water. (a) A contract to lease water may be exercised only if the chief engineer approves an application for a term permit to divert the leased water.

(b) The following conditions shall be imposed by the chief engineer on the term permit authorizing the use of water leased from a water bank:

- (1) The maximum reasonable quantity of water that may be diverted per calendar year, as set forth in K.A.R. 5-17-17, and the maximum quantity of water that may be diverted during the term of the permit;
- (2) the maximum rate of diversion;
- (3) the term of the permit, which shall not exceed the length of the water bank charter plus three calendar years;
- (4) the authorized point of diversion;
- (5) the authorized place of use;
- (6) the authorized use made of the leased water;
- (7) a provision that the diversion shall not cause the impairment of any existing water rights;
- (8) a provision that the diversion shall not cause an increase in depletion to any severely depleted groundwater aquifer or severely depleted stream course;
- (9) a provision that the leased water shall be diverted from, and used within, the same hydrologic unit where the water rights were deposited; and
- (10) a provision that any violation of a term permit used to exercise a lease shall make the permittee subject to the penalty provisions of K.A.R. 5-17-13. (Authorized by K.S.A. 2003 Supp. 82a-769; implementing K.S.A. 2003 Supp. 82a-763 and K.S.A. 2003 Supp. 82a-769; effective Aug. 13, 2004.)

5-17-7. Contract to deposit water in a safe deposit account. (a) Each person proposing to deposit water into a safe deposit account shall enter into a contract with the water bank on a form prescribed by the water bank and approved by the chief engineer. The contract shall include the following information and provisions and any other provision needed to ensure that the deposit complies with the provisions of the Kansas water banking act and regulations:

- (1) The term of the contract, which shall be for a specific number of calendar years and shall not exceed the length of the water bank charter plus three years;
- (2) the proposed deposit of water, which shall be from a water right that is bankable;
- (3) the water right from which water is being deposited. The water right shall be in good standing and shall be vested or certified;
- (4) the hydrologic unit from which water is being deposited;
- (5) the terms of payment for the deposit and a provision that any fees paid are not refundable if the water user voids the contract, or causes it to be void, for any reason;
- (6) the location of the point of diversion authorized by the water right that is proposed to be deposited;
- (7) the water right file numbers of any linked water rights that are proposed to be deposited; and
- (8) a provision that the contract shall be entered into by December 31 of the year preceding the first year for which the owner desires to make a deposit in the safe deposit account.

(b) The amount of water that may be deposited in any year shall not exceed 25 percent of the quantity of unused water from the preceding year.

(c) At the end of the term of the contract to deposit water in a safe deposit account, including any extensions of time, all water in the account shall be forfeited.

(d) There shall not be multiple safe deposit accounts for any point of diversion.

(e) The term of a safe deposit account may be extended by the chief engineer upon request of the owner for a period not to exceed the length of the water bank charter plus three calendar years. Any water bank may extend a safe deposit account beyond the length of the water bank charter only if both of the following conditions are met:

- (1) The water bank charter has a procedure approved by the chief engineer that sets forth how the safe deposit accounts will be administered if the water bank is dissolved.

(2) The bank charter assigns the responsibility and costs of administering the accounts after the water bank is dissolved to a responsible person or entity. (Authorized by K.S.A. 2003 Supp. 82a-769; implementing K.S.A. 2003 Supp. 82a-763 and K.S.A. 2003 Supp. 82a-769; effective Aug. 13, 2004.)

5-17-8. Depositing water in a safe deposit account. (a) Each calendar year in which water is deposited, the depositor shall file a deposit slip, on a form prescribed by the water bank and approved by the chief engineer, with the water bank indicating the quantity of water that was unused and the quantity of water that the depositor proposes to deposit.

(b) Water shall be deposited in an existing safe deposit account no later than March 1 of the year following the calendar year in which the water was not used.

(c) When the deposit is made, the depositor shall furnish the water bank with the following information:

(1) The water flowmeter readings at the beginning and end of the calendar year in which the water was not used under the water right; and

(2) the quantity of water proposed to be deposited.

(d) The water bank shall accept for deposit the quantity of water that meets the provisions of the water bank charter and the Kansas water banking act and regulations. (Authorized by K.S.A. 2003 Supp. 82a-769; implementing K.S.A. 2003 Supp. 82a-763 and K.S.A. 2003 Supp. 82a-769; effective Aug. 13, 2004.)

5-17-9. Term permit to use water that was deposited in a safe deposit account. (a) Before approval of a term permit to use water deposited in a safe deposit account, the water bank shall certify to the chief engineer the quantity of water that is in the safe deposit account.

(b) Before any water that has been deposited into a safe deposit account may be used, the applicant shall apply for a term permit, submit the appropriate filing fee, and receive approval from the chief engineer. Each term permit shall contain the following conditions:

(1) The maximum rate of diversion of water;

(2) the maximum quantity of water that may be diverted the remainder of that calendar year, which shall not exceed the quantity of water certified by the water bank to be in the safe deposit account;

(3) the length of the term permit, which shall not exceed December 31 of the year in which the term permit was issued by the chief engineer. No extensions of time shall be granted for this type of term permit;

(4) a provision that the use of water under the term permit shall not impair any existing water rights;

(5) a provision that the use of water under the term permit shall not cause an increase in the depletion of a severely depleted groundwater aquifer or severely depleted stream course; and

(6) a provision that violation of any of the terms of the term permit shall subject the owner to the penalty provisions of K.A.R. 5-17-13. (Authorized by K.S.A. 2003 Supp. 82a-769; implementing K.S.A. 2003 Supp. 82a-763 and K.S.A. 2003 Supp. 82a-769; effective Aug. 13, 2004.)

5-17-10. Water bank charter proposal. (a) Each proposed water bank charter submitted to the chief engineer shall contain all of the following:

(1) Information showing that the proposed operations and policies of the water bank are consistent with the Kansas water banking act, the Kansas water appropriation act and regulations, the Kansas state water plan, the policies of any groundwater management district that is located within the boundaries of the proposed water bank, and the water assurance district operation agreements of any water assurance district located within the boundaries of the proposed water bank;

(2) information that demonstrates that there is sufficient participation to make the water bank's operations practical and feasible, including economically;

(3) a petition declaring an intent to establish a water bank that is signed by at least five percent of the water right owners within the water bank's proposed boundaries;

(4) the names of at least five members of the proposed governing body of the water bank, their addresses, and the public and private interests that each represents;

(5) the proposed boundaries of the water bank, including information showing that the boundaries of the proposed water bank do not overlap the boundaries of another water bank;

(6) for groundwater banks, an enumeration of all the hydrologic units and sources of water supply within the water bank boundaries, including alluviums, terrace deposits, and regional aquifers, both confined and unconfined, that have similar

aquifer properties. The aquifer properties shall include the saturated thickness and water level changes over the representative past period;

(7) for a water bank that includes surface water, a list of the streams and their tributaries that are to comprise the water bank and a methodology to limit the leasing of surface water so that it does not impair senior surface water rights and minimum desirable streamflow;

(8) the designation of a representative past period;

(9) a comprehensive method to account for the following:

(A) The amount of water deposited and the length of the contracts for deposit;

(B) the amount of water leased from the water bank and the length of the lease contracts; and

(C) the identification of the hydrologic units from which deposits and leases are being made;

(10) for a water bank that includes the use of groundwater, a proposed plan to ensure that the net amount of water consumed by the deposited water rights will be at least 10 percent less than the average net amount of water consumed by the deposited water rights for the representative past period. The proposed plan shall require the comparison of the average annual net consumption for the deposited water rights for the five-year period after a water bank is chartered or rechartered with the average net consumptive use for the deposited water rights for the representative past period;

(11) a list of any severely depleted groundwater aquifers or severely depleted stream courses;

(12) a plan to ensure that there will be no increase in the depletion of severely depleted groundwater aquifers or severely depleted stream courses;

(13) a method for determining the water rights that are bankable and the portion that is bankable;

(14) a procedure for dissolution of the water bank;

(15) for a bank using groundwater, a methodology for ensuring that the total quantity of groundwater leased each year does not exceed 90 percent of the average annual quantity collectively diverted pursuant to all deposited water rights or portions of water rights from each hydrologic unit for the representative past period;

(16) for a water bank that authorizes safe deposit accounts, a methodology to ensure that the users of safe deposit accounts will not increase the consumption of groundwater; and

(17) for a water bank that authorizes safe deposit accounts, a provision setting the maximum percentage of unused water from the previous year that may be deposited in a safe deposit account.

(b) After the body wishing to charter the water bank submits the proposed water bank charter to the chief engineer, it shall be circulated by the chief engineer to any groundwater management districts and water assurance districts located within the boundaries of the proposed water banks and to the Kansas water office for comments as to whether the proposed water bank charter complies with the provisions of K.S.A. 82a-765, and amendments thereto. Comments regarding the proposed water bank charter shall be due within 30 days after comments are requested by the chief engineer, unless an extension of time is requested within the time allowed and granted by the chief engineer for good cause shown. (Authorized by K.S.A. 2003 Supp. 82a-769; implementing K.S.A. 2003 Supp. 82a-765 and K.S.A. 2003 Supp. 82a-769; effective Aug. 13, 2004.)

5-17-11. Annual reports of water banks.

Each water bank shall file an accounting report with the chief engineer each calendar year containing the following information: (a) The file numbers of the water rights, or portion of the water rights, deposited in the water bank;

(b) the annual quantity of water authorized for diversion for each water right deposited and a determination of the bankable quantity of water associated with each deposited water right;

(c) the term of each deposit;

(d) the hydrologic unit from which each water right was deposited;

(e) the file number of each term permit authorizing a lease of water;

(f) the term of the lease;

(g) the annual quantity of water that has been leased from each hydrologic unit;

(h) the hydrologic units where the leased water was diverted;

(i) the net year-end balance of water deposited versus water leased in each hydrologic unit within the water bank's boundaries;

(j) the annual quantity of water deposited into safe deposit accounts;

(k) the annual quantity of water used from safe deposit accounts;

(l) the hydrologic unit in which water was deposited in a safe deposit account;

(m) the total year-end balance of water remaining in safe deposit accounts after the 10 percent year-end reduction for all individual accounts;

(n) the total quantity of water diverted during the last three calendar years, by type of use;

(o) the total number of acres irrigated and the number of acres of each crop grown during the last three calendar years;

(p) any contracts that were breached, the nature of the breaches, and the enforcement actions taken by the water bank; and

(q) the average annual quantity of water diverted during the representative past period of each water right that has been deposited in the water bank. (Authorized by K.S.A. 2003 Supp. 82a-769; implementing K.S.A. 2003 Supp. 82a-766 and K.S.A. 2003 Supp. 82a-769; effective Aug. 13, 2004.)

5-17-12. Water use reports. (a) Each owner of a water right authorized for irrigation use that deposits a water right in a water bank or deposits water in a safe deposit account, and each person that leases water for irrigation use and any linked water rights, shall file the water use report required by K.S.A. 82a-732, and amendments thereto, on or before December 1 of the year for which water use is being reported.

(b) Each owner of a water right authorized for non-irrigation use that deposits a water right in a water bank or deposits water in a safe deposit account, and each person that leases water for non-irrigation use and any linked water rights, shall file the water use report required by K.S.A. 82a-732, and amendments thereto, on or before January 10 of the year following the year for which water use is being reported.

(c) The failure of a water right owner to submit a complete and accurate water use report, including water flowmeter readings, as required by this regulation shall result in civil fines in the amounts set forth in K.A.R. 5-14-11.

(d) If a water use report is inadequate to accurately determine the actual water use during any calendar year, then that year shall be counted as having had no water use for the purpose of determining the extent to which a water right is bankable pursuant to K.S.A. 82a-764, and amendments thereto, unless the water use report is corrected as set forth in K.A.R. 5-3-5o. (Authorized by K.S.A. 2003 Supp. 82a-769; implementing K.S.A. 2003 Supp. 82a-766 and K.S.A. 2003 Supp. 82a-769; effective Aug. 13, 2004.)

5-17-13. Enforcement. If any person violates any of the following, enforcement action may be taken by the chief engineer as specified in K.A.R. 5-14-1 and K.A.R. 5-14-10:

(a) A term, condition, or limitation of a term permit issued to authorize the diversion of leased water;

(b) a term, condition, or limitation of a term permit issued to withdraw water from a safe deposit account;

(c) a term, condition, or limitation of a water right that has been deposited in the water bank or a safe deposit account;

(d) any order of the chief engineer concerning the deposit or lease of a water right; or

(e) any order or condition placed on the use of the remainder of a water right that was partially deposited in the water bank or a safe deposit account. (Authorized by K.S.A. 2003 Supp. 82a-769; implementing K.S.A. 2003 Supp. 82a-769 and K.S.A. 2003 Supp. 82a-770; effective Aug. 13, 2004.)

5-17-14. Water flowmeters. (a) The following points of diversion shall meet the requirements specified in subsection (b):

(1) Within a groundwater bank, all non-domestic, non-temporary wells within the boundaries of the water bank;

(2) within a surface water bank, all non-domestic, non-temporary surface water points of diversion within the boundaries of the water bank; and

(3) within a groundwater and surface water bank, all non-domestic, non-temporary points of diversion within boundaries of the water bank.

(b) While a water bank is operating, each of the points of diversion described in subsection (a) shall meet one of the following requirements:

(1) Be equipped with a water flowmeter meeting the requirements of K.A.R. 5-1-4 through K.A.R. 5-1-12;

(2) be sealed by the chief engineer; or

(3) be approved by the chief engineer as having another objectively verifiable means of determining that water has not been pumped, including capping the well, removal of the pump, or removal of a permanent power source.

(c) If a water flowmeter does not function properly whenever water is being diverted, it shall be assumed, for the purpose of determining compliance with the water right and the term permit issued to withdraw leased water or water deposited in a safe deposit account, that the diversion works have been operated continuously at the tested rate of diversion since the last time the waterflow meter was confirmed by the chief engineer or a groundwater management district to have been

operating properly. If the diversion works have not been tested by the chief engineer or a groundwater management district, it shall be assumed that the diversion works have been operated continuously at the authorized rate of diversion during the entire time the water flowmeter was out of compliance. Either of the assumptions specified in this subsection may be rebutted if the water right owner submits objective documentation of the actual quantity of water diverted while the water flowmeter was out of compliance. (Authorized by K.S.A. 2003 Supp. 82a-769; implementing K.S.A. 2003 Supp. 82a-766 and K.S.A. 2003 Supp. 82a-769; effective Aug. 13, 2004.)

5-17-15. Private sale or lease of water right facilitated by a water bank. If a water bank provides services to facilitate the sale or lease of water rights, the owner of the water rights that are bought, sold, or leased between private parties shall be required to comply with all applicable statutes and regulations, including any regulation of the chief engineer limiting the distance that a point of diversion may be moved. (Authorized by K.S.A. 2003 Supp. 82a-769; implementing K.S.A. 2003 Supp. 82a-763 and K.S.A. 2003 Supp. 82a-769; effective Aug. 13, 2004.)

5-17-16. Priority of use of water rights and permits. (a) If multiple water rights or permits authorize the use of water from a single point of diversion, the water shall be considered to be used in the order of priority with the earliest priority first.

(b) If the water used exceeds the total quantity of water authorized by the water rights and permits described in subsection (a) that authorize water use from that point of diversion, all water rights and permits under which the water was lawfully diverted shall be deemed to be violated unless this presumption is rebutted by one or more of the water right owners. (Authorized by K.S.A. 2003 Supp. 82a-769; implementing K.S.A. 2003 Supp. 82a-769 and K.S.A. 2003 Supp. 82a-770; effective Aug. 13, 2004.)

5-17-17. Waste of leased water and safe deposit account water. For using leased water or water withdrawn from a safe deposit account, the quantity not considered to be waste for irrigation use shall be 150 percent of the value specified in K.A.R. 5-3-24 for the county where the point of diversion is located. (Authorized by K.S.A. 2002 Supp. 82a-769; implementing K.S.A. 2002 Supp.

82a-763 and K.S.A. 2002 Supp. 82a-769; effective Aug. 13, 2004.)

5-17-18. Reimbursable and non-reimbursable costs. (a) The following costs incurred by the chief engineer for assistance and services to implement the Kansas water banking act shall be reimbursable by a water bank:

(1) The cost of reviewing and approving a proposed water bank charter;

(2) the cost of determining the extent to which a water right is bankable and in good standing;

(3) the cost of reviewing an annual report filed by a water bank and conducting the analysis necessary to determine if the water bank has complied with the terms of the Kansas water banking act;

(4) extra costs incurred to require water use reports to be filed earlier than March 1, the tracking of that information, and reporting that information to a water bank;

(5) increased costs incurred to provide other water use and water right information to water banks or water bank customers;

(6) the costs to monitor and enforce the provisions of the Kansas water banking act;

(7) the costs of meetings and other discussions with water bank officials and employees;

(8) the cost of enforcement of terms, conditions, and limitations of term permits issued to allow withdrawal of leased water and water from safe deposit accounts;

(9) if additional enforcement of water rights and permits is requested by a water bank, enforcement costs that would not have been incurred by the chief engineer in the ordinary course of business against all water rights diverting water from within the boundaries of the water bank to prevent overpumping; and

(10) the cost incurred if a water bank or a water bank customer requests the chief engineer to hold an abandonment hearing necessary to determine whether a water right is bankable that would not have been done in the ordinary course of business by the chief engineer at that time.

(b) The following costs incurred by the chief engineer for assistance and services to implement the Kansas water banking act shall not be reimbursable by a water bank:

(1) The cost of issuing a term permit to allow diversion of leased water;

(2) the cost of issuing a term permit to allow withdrawal of water from a safe deposit account;

(3) enforcement costs that the chief engineer would have incurred in the ordinary course of business to take action against all water rights diverting water from within the boundaries of the water bank to prevent overpumping; and

(4) the cost of adopting regulations to implement the act. (Authorized by K.S.A. 2002 Supp. 82a-769; implementing K.S.A. 2002 Supp. 82a-769 and K.S.A. 2002 Supp. 82a-771; effective Aug. 13, 2004.)

Article 19.—LOCAL ENHANCED MANAGEMENT AREAS

5-19-1. Definitions. Each of the following terms, as used in this article of the division's regulations, shall have the meaning specified in this regulation:

(a) "GMD" means a groundwater management district established pursuant to K.S.A. 82a-1020 et seq., and amendments thereto.

(b) "LEMA" means a local enhanced management area pursuant to K.S.A. 82a-1041, and amendments thereto.

(c) "LEMA plan" means the document adopted by a groundwater management district that specifies the basis for the designation and operation of a local enhanced management area.

(d) "Presiding officer" means either the chief engineer or a hearing officer appointed for the purpose of conducting public hearings regarding a local enhanced management area pursuant to K.S.A. 82a-1041, and amendments thereto. (Authorized by K.S.A. 82a-1041; implementing K.S.A. 74-510a and K.S.A. 82a-1041; effective Dec. 27, 2021.)

5-19-2. LEMA plans. (a) Before a GMD's board of directors recommends formal approval of a LEMA plan and submission to the chief engineer for review, the GMD's board of directors or staff may request the division to assist in the development of the LEMA plan or to informally review the LEMA plan.

(b) In addition to the requirements for LEMA plans specified in K.S.A. 82a-1041 and amendments thereto, each GMD that recommends approval of a LEMA plan and formally submits the LEMA plan to the chief engineer shall ensure that the LEMA plan includes the following:

(1) Each condition specified in K.S.A. 82a-1036(a) through (d), and amendments thereto, that the LEMA plan is intended to address;

(2) a statement of each goal that the LEMA plan is intended to achieve;

(3) documentation that quantifies how any corrective controls that establish allocations, cuts, or limitations to water use would affect each individual water right within the proposed boundaries;

(4) an appropriate appeals procedure for water right owners based on the corrective controls implemented;

(5) an executive summary of the proposed goals and corrective controls;

(6) documentation, evidence, or other information indicating that the proposed corrective controls will meet each stated goal of the proposed LEMA plan;

(7) a description of how the boundary of the proposed LEMA was determined;

(8) a description of how due consideration was given to water users who already have implemented reductions in water use resulting in voluntary conservation measures if the corrective controls result in any allocations, reductions, or limitations of water rights that are based on past use. If applicable, the description shall include the following:

(A) An explanation of the criteria or methods used to address voluntary water management or conservation that reduced water usage; and

(B) A requirement that any owner or holder of a water right provide documentation of any voluntary conservation that resulted in the use of less water;

(9) if applicable to the LEMA plan, specification of how past reductions in water use resulting in voluntary conservation will be considered in any appeal process provided; and

(10) if a stated goal of the LEMA plan is to address an impairment or there are known cases of direct impairment within the LEMA, an explanation of how each impairment is legally addressed.

(c) A separate memorandum containing a summary of the public outreach conducted by the GMD before recommending the LEMA plan for approval shall be submitted simultaneously with the LEMA plan and shall include a description of any changes made to the LEMA plan due to any public comments.

(d) If the stated goal of a LEMA plan is to improve water quality, the GMD's board of directors or staff may consult with the chief engineer before formal submission of the proposed LEMA plan to determine which requirements in subsections (b) and (c) are applicable and to determine any other information necessary in order for the chief engi-

neer to perform a review of the LEMA plan. (Authorized by and implementing K.S.A. 82a-1041; effective Dec. 27, 2021.)

5-19-3. Public hearings. (a) If the chief engineer initiates proceedings to designate a LEMA, the chief engineer may preside over any public hearings or may designate a presiding officer.

(b) If, following the initial hearing, the presiding officer determines that the proposed LEMA plan meets the initial requirements in K.S.A. 82a-1041 and amendments thereto, then a second hearing or hearings on the elements of the proposed LEMA plan shall be held. Each subsequent hearing shall include consideration of the LEMA plan's corrective controls, the likelihood that the LEMA plan will achieve the stated goals, and any other matters deemed necessary by the presiding officer.

(c) If a presiding officer is appointed to conduct a subsequent hearing as described in subsection (b), the presiding officer for the subsequent hearing shall be authorized only to make recommendations to the chief engineer and shall not have the authority to issue an order of decision or an order of designation.

(d)(1) Before any public hearing, the presiding officer shall hold a prehearing conference, with at least 15 days of notice, to select a date for the public hearing, specify the procedures to be followed at the public hearing, set any deadlines, and consider any other matters necessary for conducting the public hearing.

The presiding officer may establish any procedural rules that are deemed necessary or expedient for the conduct of the public hearing, including holding formal and informal phases of testimony, rules for discovery, and cross-examination of witnesses.

(2) Following the prehearing conference, the presiding officer shall issue a prehearing order that specifies the formal parties designated pursuant to paragraph (d)(1) if requested, all procedures to be followed during the public hearing, all deadlines, and any other matters necessary for conducting the public hearing.

(e) If formal and informal phases of testimony are held, the GMD that proposed the LEMA and the division shall be considered formal parties at the public hearing. Each other person or entity that wishes to be designated as a formal party shall file a timely request with the presiding officer. The presiding officer shall have discretion to

approve or deny any request based upon the effect that the proposed LEMA would have on that person or entity or the timeliness of the person's or entity's request.

(f) Each GMD proposing a LEMA plan shall be required to prove that the LEMA plan meets the requirements of K.S.A. 82a-1041, and amendments thereto, and that the corrective controls are sufficient to meet the stated goals. The GMD's representative shall call witnesses or testify first, followed by the division, and then by any other formal parties, unless the presiding officer determines that another order of testimony will better facilitate the proceedings. The division may proffer its record along with providing testimony or in lieu of providing testimony.

(g) In all hearings, the presiding officer shall make any rulings regarding procedure and evidence that are necessary to provide all interested persons and entities with a reasonable opportunity to be heard and present evidence into the record, whether the persons or entities are admitted as formal parties or not. The presiding officer shall not be bound by the formal rules of evidence or by any rules of civil procedure. In each case, all testimony received during the hearing or admitted as evidence during the hearing shall be taken under oath or affirmation, and a reasonable opportunity after the hearing shall be provided for the submission of written testimony and comments.

(h) During each hearing for the renewal of a LEMA plan that proposes adoption of a LEMA plan substantially similar to the LEMA plan that was previously adopted, the hearing schedule and requirements may be consolidated and simplified if notice of the consolidation or simplification is provided in the public notice required by K.S.A. 82a-1041 and amendments thereto, the proposing GMD does not object, and all parties are given a reasonable opportunity to be heard.

(i) The GMD and other parties shall not be required to pay any costs related to the presiding officer, hearing location, court reporter, and published notice or any other costs related to hosting a public hearing that may be approved by the chief engineer, except that the GMD may assist in organizing the hearing and may contribute funds to cover part or all of any costs incurred by the division.

(j) The presiding officer may conduct any public hearing by using a medium for interactive communication that meets the requirements of the Kansas open meetings act, K.S.A. 75-4317 et

seq. and amendments thereto, if requested or approved by the GMD. The presiding officer may hold any prehearing, scheduling, or other conference by using a medium for interactive communication at the presiding officer's sole discretion. (Authorized by K.S.A. 82a-706a and K.S.A. 82a-1041; implementing K.S.A. 74-510a and K.S.A. 82a-1041; effective Dec. 27, 2021.)

5-19-4. Due consideration for past voluntary water conservation. (a) Each past reduction in water use that has resulted in voluntary water conservation implemented during any period upon which a LEMA plan's corrective controls are based shall be given due consideration by the GMD's board of directors or staff in determining allocations or eligible acres under a LEMA plan if the allocations or eligible acres are based on past use.

(b) If the GMD's board of directors or staff determines that water use has already been voluntarily reduced through management or conservation practices, the allocation or eligible acres under the LEMA plan or the average used to determine individual allocations and eligible acres may be adjusted based on the amount of water conserved for each year that the conservation measure was in place.

(c) The GMD's board of directors or staff, in consultation with the chief engineer, may develop or apply any other criteria or methods to determine reductions in water use that resulted in voluntary conservation that are suitable to local conditions under the LEMA plan. (Authorized by and implementing K.S.A. 82a-1041; effective Dec. 27, 2021.)

5-19-5. Review and modification of a designated LEMA. (a) Once a LEMA has been designated by the chief engineer, the corrective controls in the LEMA plan shall remain in place until the LEMA expires pursuant to the terms of the LEMA plan or until the LEMA plan is changed.

(1) A GMD's board of directors or staff may request assistance in developing changes or informally reviewing any proposed changes to a LEMA plan before recommending adoption of the changes and submitting the changes to the chief engineer for consideration.

(2) In order to change an existing LEMA plan, each proposed change shall first be adopted by resolution of the GMD and then sent to the chief engineer for a public hearing.

(3) If the chief engineer determines that the proposed changes should be made part of the LEMA plan based on the findings at a public hearing, an order amending the LEMA plan shall be issued. However, no amendments may be retroactively applied in a way that requires greater reductions in water use than were required by the existing LEMA plan.

(b) If any proposed changes result from a formal review of the LEMA plan pursuant to K.S.A. 82a-1041 and amendments thereto or as required by the LEMA plan, the proposed changes with the chief engineer's findings shall be sent to the GMD's board of directors following the formal review hearing. The GMD's board of directors shall have 60 days to review the proposed changes and approve, reject, or amend the proposed changes.

(1) If the proposed changes are approved by resolution of the GMD, the chief engineer shall issue a LEMA review order containing the chief engineer's findings and implementing the changes and amending the LEMA plan.

(2) If the proposed changes are rejected by resolution of the GMD or the GMD fails to act within 60 days, the chief engineer shall issue a LEMA review order summarizing the chief engineer's findings and recommendations but without ordering any changes or amending the LEMA plan.

(3) If the proposed changes are amended by resolution of the GMD and sent back to the chief engineer, an additional public hearing to consider the amendments shall be held. The additional hearing shall allow for the submission of written comments and may be conducted by using a medium for interactive communication that meets the requirements of the Kansas open meetings act, K.S.A. 75-4317 et seq. and amendments thereto. The amendments to the proposed changes shall not be amended by the chief engineer but may only be adopted or rejected as received from the GMD. Following the public hearing on the amendment, the chief engineer shall issue an order with findings that either reject the changes or order the amendment of the LEMA plan.

(c) Each hearing to consider changes in a designated LEMA and each formal review hearing shall be conducted pursuant to the hearing requirements in K.A.R. 5-19-3, unless the existing LEMA plan prescribes different or additional procedural requirements for a formal review.

(d) In addition to any topics required by the LEMA plan to be reviewed, each LEMA plan formal review hearing shall, at a minimum, include

review and consideration of the effectiveness of the current corrective controls to meet the LEMA plan's stated goal. This subsection shall not serve as a limitation on topics that the presiding officer may hear or that the public may present during a formal review. (Authorized by K.S.A. 82a-706a and K.S.A. 82a-1041; implementing K.S.A. 82a-1041; effective Dec. 27, 2021.)

Article 20.—INTENSIVE GROUNDWATER USE CONTROL AREA

5-20-1. Intensive groundwater use control area; public hearings. (a) In any case in which the chief engineer initiates proceedings for the designation of an intensive groundwater use control area (IGUCA), an independent hearing officer shall be appointed by the chief engineer. The independent hearing officer shall meet the following requirements:

(1) Not have been an employee of the department of agriculture for at least five years before the appointment;

(2) be admitted to practice law in this state; and

(3) be knowledgeable by training and experience in water law and administrative procedure.

(b)(1) The independent hearing officer shall conduct one or more public hearings to determine whether both of the following conditions are met:

(A) One or more of the circumstances specified in K.S.A. 82a-1036, and amendments thereto, exist.

(B) The public interest requires that one or more corrective control provisions should be adopted.

(2) If both of the conditions in paragraph (b)(1) are met, the independent hearing officer shall recommend the boundaries of the IGUCA.

(c) At the public hearing specified in subsection (b), all of the following requirements shall be met:

(1) Documentary and oral evidence shall be taken, and a full and complete record of the public hearing shall be kept.

(2) The division of water resource's (DWR's) staff shall make a proffer of the records of the division pertaining to the proposed IGUCA and may present background, hydrologic, and other information and an analysis of that information, concerning the area in question.

(3) The DWR's proffer and any other DWR presentations shall be heard first, unless the hearing officer determines that a different order of presentation will facilitate the conduct of the hearing.

(4) If any part of the proposed IGUCA is within the boundaries of a groundwater management

district (GMD), a representative of that GMD shall be allowed to present the GMD's own data, analysis, comments, provisions of the GMD's revised management plan, regulations, and recommendations at any public hearing.

(5) Each person shall be allowed to give an oral statement under oath or affirmation or to present documentary evidence, including a signed written statement.

(6) At the end of the public hearing, a reasonable opportunity for any person to submit oral or written comments concerning the matters presented may be allowed by the hearing officer.

(7) The hearing shall be conducted according to the procedure specified in K.A.R. 5-14-3a. The hearing officer shall have the discretion to use a different procedure if it facilitates the conduct of the hearing.

(8) The independent hearing officer shall make the following findings of fact:

(A) Whether one or more of the circumstances specified in K.S.A. 82a-1036, and amendments thereto, exist; and

(B) whether the public interest requires that one or more corrective control provisions should be adopted.

(9) The independent hearing officer shall transmit the findings to the chief engineer.

(d) The proceeding shall be concluded if the independent hearing officer finds that at least one of the following conditions is met:

(1) None of the circumstances specified in K.S.A. 82a-1036, and amendments thereto, exist.

(2) The public interest does not require that any corrective control provisions should be adopted.

(e) The procedure specified in subsection (f) shall be followed by the chief engineer if the independent hearing officer meets all of the following conditions:

(1) Finds that one or more of the conditions specified in K.S.A. 82a-1036, and amendments thereto, exist;

(2) finds that public interest requires that any one or more corrective control provisions should be adopted; and

(3) recommends the boundaries of the proposed IGUCA.

(f) If the independent hearing officer makes the findings and recommendation specified in subsection (e), one or more public hearings shall be conducted by the chief engineer to determine the following:

(1) What the goals of the IGUCA should be;

(2) what corrective control provisions should be adopted; and

(3) what the final boundaries of the IGUCA should be. After the hearing, the order described in K.S.A. 82a-1038, and amendments thereto, shall be issued by the chief engineer. The chief engineer's order shall include the independent hearing officer's findings of fact.

(g) Notice of the public hearings held by the independent hearing officer shall be given by regular mail and by publication, as specified in K.S.A. 82a-1037 and amendments thereto. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 74-510a, K.S.A. 82a-1036, K.S.A. 82a-1037, and K.S.A. 2008 Supp. 82a-1038; effective Sept. 18, 2009.)

5-20-2. Formal review of intensive groundwater use control area orders.

(a) For each intensive groundwater use control area (IGUCA) designated by order of the chief engineer before July 1, 2008, pursuant to K.S.A. 82a-1038 and amendments thereto, a public hearing to review the designation shall be conducted by the chief engineer within seven years of the effective date of this regulation. A subsequent review of the designation shall occur within 10 years after the previous public review hearing or more frequently as determined by the chief engineer.

(b) For each IGUCA designated by order of the chief engineer on or after July 1, 2008, a public hearing to review the designation shall be conducted by the chief engineer within seven years after the order is final. A subsequent review of the designation shall occur within 10 years after the previous public review hearing or more frequently as determined by the chief engineer.

(c) Upon the request of a petition signed by at least five percent of the affected water users in an IGUCA designated by order of the chief engineer, a public review hearing to review the designation shall be conducted by the chief engineer. This requested public review hearing shall not be conducted more frequently than every four years.

(d) Written notice of a public review hearing shall be given to each person holding a water right in the affected area. Notice of the hearing shall be given by publication in a newspaper or newspapers of general circulation within the affected area at least 30 days before the date set for the hearing. The notice shall indicate the reason for the hearing and shall specify the time and place of the hearing. At the public review hearing, documentary and oral evidence

shall be taken, and a full and complete record of the public review hearing shall be kept.

(e) The following shall be considered by the chief engineer at the public review hearing:

(1) Whether one or more of the circumstances specified in K.S.A. 82a-1036, and amendments thereto, exist; and

(2) whether the public interest requires that the IGUCA designation be continued. The state shall have the burden of proving the need for continuance of the IGUCA designation.

(f) Based on the review specified in subsection (e), one of the following actions shall be taken by the chief engineer:

(1) Continue the IGUCA with its original or current corrective control provisions;

(2) reduce the restrictions imposed by one or more corrective control provisions within the scope and goals specified in the original IGUCA order;

(3) reduce the IGUCA boundaries;

(4) increase any allocations within the IGUCA;

(5) address any other issues that have been identified in the review; or

(6) revoke the IGUCA order and implement alternative measures, if necessary, to address the water issues in the affected areas.

(g) If, as a result of the review specified in subsection (e), the chief engineer determines that the restrictions imposed by current corrective control provisions may need to be increased or additional corrective control provisions may be needed, a hearing shall be conducted by the chief engineer according to K.A.R. 5-14-3a.

(h) If, as a result of the review specified in subsection (e), the chief engineer determines that the boundaries of the IGUCA may need to be increased, a new IGUCA proceeding shall be initiated by the chief engineer pursuant to K.A.R. 5-20-1. (Authorized by K.S.A. 82a-706a; implementing K.S.A. 82a-706 and K.S.A. 82a-1036; effective Sept. 18, 2009.)

**Article 21.—WESTERN KANSAS
GROUNDWATER MANAGEMENT
DISTRICT NO. 1**

5-21-1. Definitions. As used in these rules and regulations, the following words and phrases shall have the meaning ascribed to them in this section.

(a) "Aquifer" means a geologic water-bearing formation that will yield considerable quantities of water to wells and springs.

(b) “Board” means the board of directors constituting the governing body of the western Kansas groundwater management district no. 1.

(c) “Chief engineer” means the chief engineer of the division of water resources of the Kansas state board of agriculture.

(d) “District” means the western Kansas groundwater management district no. 1.

(e) “Authorized representative of the board” means an individual designated by the board to perform duties and functions on its behalf.

(f) “Groundwater” means water below the surface of the earth.

(g) “Substantially” means within 300 feet of the approved location, but in no case closer to other wells than the minimum spacing requirements allow.

(h) “Tailwater” means that portion of the irrigation water applied which appears as run-off from the authorized place of use.

(i) “Tailwater re-use system” means a facility to collect, store and transport irrigation tailwater for reapplication to the authorized place of use.

(j) “Unconsolidated aquifer” means unconsolidated deposits that will yield water in a sufficient quantity to supply pumping wells and springs.

(k) “Waste of water” means any act or omission which causes:

(1) groundwater to be diverted or withdrawn from a source of supply and not used, managed or reapplied to a beneficial use on or in connection with land authorized as the place of use by a vested right, an appropriation right or an approved application for permit to appropriate water for beneficial use;

(2) the unreasonable deterioration of the quality of water in any source of supply thereby causing impairment of a person’s right to the use of water;

(3) groundwater intended for irrigation use to escape and drain from the authorized place of use; or

(4) groundwater to be applied to an authorized beneficial use in excess of the needs for such use.

(l) “Well” means any excavation that is drilled, cored, bored, washed, driven, dug or otherwise constructed when the intended use of such excavation is for the acquisition, diversion, or artificial recharge of groundwater. (Authorized by K.S.A. 82a-1028(o); effective May 1, 1979; amended May 23, 1994.)

5-21-2. Tailwater control and waste. No water user shall allow water which is pumped or diverted from any aquifer to leave the land under

the water user’s direct supervision and control. If the water is re-used, the user shall apply the water consistent with the approved application to appropriate water for beneficial use, vested right, or appropriation right. All water users shall construct and operate the water distribution systems in a manner as to prevent waste of water, and shall do everything necessary and proper to preserve the quality of the groundwater resources within the district. (Authorized by K.S.A. 1978 Supp. 82a-1028(o); effective May 1, 1979.)

5-21-3. Well spacing requirements.

(a) Each well location described in an application for a permit to appropriate water for a beneficial use, other than domestic use, that proposes the diversion or withdrawal of water from the Ogallala aquifer shall be spaced at least 2,640 feet from all other non-domestic wells constructed into the Ogallala aquifer.

(b)(1) Each well location described in an application for a permit to appropriate water for a beneficial use, other than domestic use, that proposes the diversion or withdrawal of water from the Dakota aquifer shall be spaced at least four miles from all other non-domestic wells constructed into the Dakota aquifer.

(2) Each well in the Dakota aquifer shall be sealed off between the Dakota aquifer and any other aquifers in a manner that prevents migration of water to or from the Dakota aquifer and any other aquifers.

(c) Each well included in an application for a permit to appropriate water for a beneficial use, other than domestic use, that proposes the diversion or withdrawal of water shall be at least 1,320 feet away from each domestic well constructed into the same aquifer unless the applicant has received written permission from the neighboring well owner or the applicant owns each domestic well.

(d) The location of each well on an application for approval to change the point of diversion under an existing water right shall be no more than 1,320 feet from the originally authorized point of diversion and shall meet one of the following requirements:

(1) Not decrease the distance to any other wells or authorized well locations by more than 300 feet; or

(2) meet the minimum well spacing requirements in this regulation.

(e) Each new well shall be drilled in the location substantially as shown on the approved appli-

cation and the accompanying map, plat, or aerial photograph.

(f) Exceptions to this regulation may be granted on an individual basis by recommendation of the board in conjunction with the approval of the chief engineer. The applicant may be required by the board to submit information as it deems necessary in order to make the determination. (Authorized by and implementing K.S.A. 82a-706a and K.S.A. 2015 Supp. 82a-1028; effective May 1, 1979; amended May 23, 1994; amended March 17, 2017.)

5-21-4. Safe yield. (a) Except as specified in subsection (c), the district shall be closed to new appropriations of water in the portions of the unconsolidated aquifers commonly known as the Ogallala formation and the Niobrara formation that are located within the district.

(b) The approval of each application for a change in the point of diversion shall be subject to the following requirements, if the diversion works have not been completed under the original approved application:

(1) The proposed appropriation, when added to the vested rights, prior appropriation rights, and earlier priority applications, shall not exceed the allowable safe yield amount for the area included within a two-mile-radius circle, which is approximately 8,042 acres, of the proposed well.

(2) For the purpose of analysis, all vested rights, certificates, permits, and prior unapproved applications shall be considered to be fully exercised, and all limitation clauses listed on permits to appropriate water and certificates shall be considered to be in force.

(3) In the case of an application for change in the point of diversion referred to in subsection (b), each application and water right with a priority earlier than the priority established by the filing of the application for change shall be included in the analysis.

(4) The allowable annual safe yield amount shall be calculated using the following formula:

$$Q = \frac{ARt}{12}$$

Q = the allowable annual safe yield amount in acre-feet per year

A = area of consideration, within a two-mile-radius circle, approximately 8,042 acres

R = average annual recharge of 0.5 inches per year

(5) If part of the radial area is located outside the district boundary, that part shall be included

in the depletion analysis only if the chief engineer determines that hydraulically connected groundwater exists in that portion of the area outside the district. A part of the area of consideration lying outside the state of Kansas shall not be included in the analysis.

(6) If wells authorized under a vested right, a certified water right, or a permit to appropriate water are divided by the circumference of the radial area, the authorized quantity of water shall be assigned to each well. If specific quantities are not authorized for each well, a proportional amount shall be assigned to each well.

(c) This regulation shall not apply to the following:

(1) Domestic use;

(2) temporary permits and term permits; and

(3) a new application filed to appropriate groundwater in any area of the district not within an intensive groundwater use control area, meeting all of the following criteria:

(A) The sum of the annual quantity requested by the proposed appropriation and the total annual quantities authorized by prior permits allowed because of an exemption pursuant to this subsection does not exceed 15 acre-feet in a two-mile-radius circle surrounding the proposed point of diversion.

(B) Well spacing criteria in the area have been met.

(C) The approval of the application does not authorize an additional quantity of water out of an existing authorized well with a nondomestic permit or water right that would result in a total combined annual quantity of water authorized from that well in excess of 15 acre-feet.

(D) All other criteria for approving a new application to appropriate water at that location have been met.

(d) Exceptions to this regulation may be granted on an individual basis by recommendation by the board in conjunction with the approval of the chief engineer. The applicant may be required by the board to submit information necessary in order to make the determination. (Authorized by K.S.A. 82a-706a and K.S.A. 2009 Supp. 82a-1028; implementing K.S.A. 82a-706, K.S.A. 82a-708b, and K.S.A. 2009 Supp. 82a-1028; effective May 23, 1994; amended Sept. 22, 2000; amended April 15, 2011.)

5-21-5. Battery of wells. Within the boundaries of the district, an application for change of

point of diversion from one well to a battery of wells shall not be approved unless the application meets the following criteria:

(a) The proposed points of diversion constitute a “battery of wells” as defined in K.A.R. 5-1-1.

(b) If the application for change has been filed pursuant to an appropriation right, the certificate shall be issued before approval of the application for change.

(c) The maximum annual quantity and maximum instantaneous diversion rate approved shall not exceed the maximum annual quantity and the maximum instantaneous diversion rate actually used during any of the three consecutive full calendar years before the application.

(d) The application meets the criteria for the approval of a new application. However, the wells comprising the battery of wells shall not be required to meet the well spacing requirements of K.A.R. 5-21-3 in relationship to each other. (Authorized by K.S.A. 82a-706a and K.S.A. 82a-1028(o); implementing K.S.A. 82a-1028(n); effective Sept. 22, 2000.)

5-21-6. Water flowmeters. (a) Except as specified in subsection (b), each well authorized within the boundaries of the district shall be equipped with a totalizing water flowmeter that is installed and maintained in accordance with the specifications in K.A.R. 5-1-4 through 5-1-12. Each water right owner shall maintain the water flowmeter so that the flowmeter functions properly whenever the diversion of water can reasonably be expected to occur. If the water flowmeter fails to function properly, the owner shall promptly initiate action to repair or replace the meter or to correct any problems with the installation.

(b) The following types of water use shall be exempt from the requirements of this regulation:

(1) Domestic use; and

(2) use pursuant to a temporary permit to appropriate water. (Authorized by K.S.A. 82a-706a and K.S.A. 2015 Supp. 82a-1028; implementing K.S.A. 82a-706c and K.S.A. 2015 Supp. 82a-1028; effective Jan. 24, 2003; amended May 27, 2016.)

5-21-7. (Authorized by K.S.A. 82a-706a and K.S.A. 82a-1028, as amended by L. 2002, Ch. 137, § 5; implementing K.S.A. 82a-1028, as amended by L. 2002, Ch. 137, § 5 and K.S.A. 2001 Supp. 82a-1903, as amended by L. 2002, Ch. 137, § 7; effective Jan. 24, 2003; revoked Nov. 15, 2019.)

5-21-8. Percent change of saturated thickness. The map titled “percent change in saturated thickness of the High Plains aquifer, west central Kansas, 1950 to average 1997-1999” and designated as the Kansas geological survey open file report 2000-15B, dated July 25, 2000, is hereby adopted by reference. (Authorized by K.S.A. 82a-706a and K.S.A. 82a-1028(o); implementing K.S.A. 82a-1028(n); effective Sept. 22, 2000.)

5-21-9. Saturated thickness. The map titled “saturated thickness of unconsolidated aquifer, west central Kansas average 1997-1999” and designated as the Kansas geological survey open file report 2000-15A, dated July 25, 2000, is hereby adopted by reference. (Authorized by K.S.A. 82a-706a and K.S.A. 82a-1028(o); implementing K.S.A. 82a-1028(n); effective Sept. 22, 2000.)

Article 22.—EQUUS BEDS GROUNDWATER MANAGEMENT DISTRICT NO. 2

5-22-1. Definitions. As used in article 22 of these regulations, by the Equus Beds groundwater management district no. 2 in the implementation of the groundwater management district act and by the division of water resources in the administration of the Kansas water appropriation act, the following terms shall have the meanings ascribed to them in this regulation, unless the context clearly requires otherwise.

(a) “Above-baseflow stage” means streamflow that is in response to a significant runoff event during which period the water-level elevation of the stream is greater than the elevation of the adjacent water table.

(b) “Aquifer” means any geologic formation capable of yielding water in sufficient quantities that it can be diverted for beneficial use.

(c) “Aquifer storage” means the act of storing water in the unsaturated portion of an aquifer by artificial recharge for subsequent diversion and beneficial use.

(d) “Aquifer storage and recovery system” means a physical infrastructure that meets the following conditions:

(1) Is constructed and operated for artificial recharge, storage, and recovery of source water; and

(2) consists of apparatus for diversion, treatment, recharge, storage, extraction, and distribution.

(e) “Area of consideration” means the two-mile-radius circle whose center is the lo-

cation of the proposed point of diversion. The area of consideration equals 8,042 acres minus the area of the circle that meets the following conditions:

- (1) Is outside the district boundary;
 - (2) is inside an intensive groundwater use control area with a declining water table; and
 - (3) is in an area where the bedrock is not overlain by an aquifer.
- (f) “Artificial recharge” means the use of source water to artificially replenish the water supply in an aquifer.
- (g) “Bank storage” means water absorbed by and temporarily stored in the banks and bed of a stream during above-baseflow stage.
- (h) “Bank storage well” means a well used to divert or withdraw water from bank storage.
- (i) “Baseflow” means groundwater that seeps, flows, or is otherwise naturally discharged from an aquifer into a stream.
- (j) “Baseflow allocation” means the annual quantity of water assigned to a baseflow node expressed in acre-feet per calendar year. The natural discharge to the stream shall be assumed to be equivalent to the rate of flow in the stream that is equaled or exceeded 90 percent of the time.
- (k) “Baseflow node” means an artificial point located in the channel of a watercourse for the purpose of allocating a proportional amount of the baseflow.
- (l) “Basin storage area” means the portion of the aquifer’s unsaturated zone used for aquifer storage that has defined horizontal boundaries and is delimited by the highest and lowest index water levels.
- (m) “Basin storage loss” means that portion of artificial recharge naturally flowing or discharging from the basin storage area.
- (n) “Battery of wells” means either of the following:
- (1) A group of two or more wells that meets the following conditions:
 - (A) Withdraws water from the same local source of supply;
 - (B) is connected to a common pump by a manifold or piping; and
 - (C) supplies water to a common distribution system; or
 - (2) a group of not more than four wells that meets the following conditions:
 - (A) Withdraws water from the same local source of supply;
 - (B) is located within a 300-foot-radius circle of the geographic center of the battery of wells;

(C) supplies water to a common distribution system;

(D) does not exceed a combined capacity of 800 gallons per minute; and

(E) has an individual pump installed in each well with a maximum capacity of 400 gallons per minute.

A battery of wells shall be considered to be one point of diversion.

(o) “Board” means the board of directors constituting the governing body of the Equus Beds groundwater management district no. 2.

(p) “Completed substantially as shown on aerial photograph, topographic map, or plat” means within 300 feet of the location as shown on the aerial photograph, topographic map, or plat accompanying the application.

(q) “Confined aquifer” means either of the following:

(1) An aquifer overlain and underlain by impermeable layers; or

(2) an aquifer in which the groundwater is under pressure greater than atmospheric pressure and will rise in a well above the elevation at which groundwater is first encountered.

(r) “Conjunctive use” means the management of the aquifer to achieve safe yield and the operation of the aquifer in coordination with a surface water system to enhance the use of the total water supply availability, in accordance with the provisions of the Kansas water appropriation act.

(s) “Consumptive use” means gross diversion minus the following:

(1) Waste of water; and

(2) return flows to the source of water supply by at least one of the following:

(A) Through the surface water runoff that is not waste; and

(B) by deep percolation.

(t) “District” means the Equus Beds groundwater management district no. 2.

(u) “Free-water surface” means water that is exposed to the atmosphere, including lakes, ponds, and pits that intercept the water table.

(v) “Geographic center” means either of the following:

(1) The arithmetic mean of the northing and westing coordinates or measurements for each well in a battery of wells; or

(2) the apparent center of a groundwater pit.

(w) “Groundwater” means water below the surface of the earth.

(x) “Groundwater pit” means an excavation in the earth that meets all of the following criteria:

(1) Exposes the current or historic groundwater table;

(2) has caused, or will likely cause, annual evaporation of groundwater; and

(3) has a perimeter equal to or greater than the depth of the excavation.

(y) “Index water level” means water-level elevations established spatially throughout a basin storage area to be used to represent the maximum volume of a basin storage area and the volume of stored water available for recovery, based upon accounting methodology and the conditions of the permit.

(z) “Non-consumptive use” means the beneficial use of water in which essentially all of the water diverted from the source of supply is returned to the source of supply.

(aa) “Person” means a natural person, a partnership, an organization, a corporation, a municipality, and any agency of the state or federal government.

(bb) “Point of diversion” means the point at which water is diverted or withdrawn from a source of water supply.

(cc) “Primary well” means a well equipped with a flowmeter for which a standby well is available.

(dd) “Recharge” means the natural infiltration of surface water or rainfall into an aquifer from its catchment area.

(ee) “Recharge credit” means the quantity of water that is stored in a basin storage area and that is available for subsequent appropriation for beneficial use by the operator of the aquifer storage and recovery system.

(ff) “Safe yield” means the total quantity of groundwater meeting the following conditions:

(1) Can be artificially withdrawn from an aquifer; and

(2) naturally discharges to a stream without exceeding the aquifer recharge value for the area of consideration and without impairing the water rights diverting from the aquifer.

(gg) “Standby well” means a well that meets the following conditions:

(1) Is used to provide water for any of the following:

(A) Fire protection;

(B) emergency purposes; or

(C) any period during which the primary well has mechanical failure, maintenance, or power failure;

(2) is maintained in good operating condition;

(3) withdraws water from the same source of supply as the primary well;

(4) is located within 300 feet of the primary well;

(5) is limited to the same rate and quantity authorized by the primary well’s appropriation or vested right;

(6) is equipped with a flowmeter; and

(7) is operated only when water is temporarily unavailable from the primary well or wells, except when water is needed for fire protection or a similar type of emergency.

(hh) “Stream” means any watercourse that has a well-defined bed and well-defined banks, and that flows continuously during the calendar year, except during periods of drought.

(ii) “Surface water” means water in creeks, rivers, or other watercourses, and in reservoirs, lakes, and ponds. This term shall not include water in groundwater pits.

(jj) “Thermal exchange” means the use of water for climate control in a nondomestic building and in a manner that is essentially nonconsumptive to the source of supply.

(kk) “Unconfined aquifer” means an aquifer with a water table at atmospheric pressure.

(ll) “Waste of water” means any act or omission that causes any of the following:

(1) The diversion or withdrawal of water from a source of supply that is not used or reapplied to a beneficial use on or in connection with the place of use authorized by a vested right, an appropriation right, or an approval of application for a permit to appropriate water for beneficial use;

(2) the unreasonable deterioration of the quality of water in any source of supply, thereby causing impairment of a person’s right to the use of water;

(3) the escaping and draining of water intended for irrigation use from the authorized place of use; or

(4) the application of water to an authorized beneficial use in excess of the needs for this use.

(mm) “Water balance” means the method of determining the amount of water in storage in a basin storage area by accounting for inflow to, outflow from, and changes in storage in that basin storage area.

(nn) “Water table” means the top or surface of an unconfined or confined aquifer at which the pore water pressure is atmospheric.

(oo) “Well” means any excavation that is drilled, cored, bored, washed, driven, dug, or otherwise constructed if the intended use of the excavation is for the acquisition, diversion, or artificial recharge of groundwater. (Authorized by and implementing K.S.A. 82a-706a and K.S.A. 2003 Supp. 82a-1028; effective May 1, 1979; amended Oct. 15, 1990; amended March 7, 1994; amended Nov. 12, 2004.)

5-22-2. Well spacing requirements. (a) Except as specified in subsections (d) and (e), the minimum spacing of all nondomestic and nontemporary wells described in an application for permit to appropriate water for beneficial use, an application for a term permit, or application to change the point of diversion shall be the following:

(1) 1,320 feet from all nondomestic wells, groundwater pits, and baseflow nodes; and

(2) 660 feet from all domestic wells.

(b) The minimum spacing interval from the geographic center of a battery of wells to each nondomestic well, groundwater pit, and baseflow node shall be 1,620 feet. The minimum spacing interval from the geographic center of a battery of wells to each domestic well shall be 960 feet.

(c) The minimum spacing interval from the edge of a groundwater pit to each nondomestic well, the edge of any other groundwater pit, and baseflow node shall be 1,320 feet and 330 feet to a domestic well.

(d)(1) In the areas described in the following table, the requirements specified in paragraphs (2), (3), and (4) of this subsection shall apply:

Township	Range	Section	County
23 South	6 West	31, 32 and 33	Reno
23 South	7 West	31 through 36	Reno
24 South	6 West	4 through 9, and 13 through 36	Reno
24 South	7 West	1 through 36	Reno
25 South	5 West	30 and 31	Reno
25 South	6 West	1 through 36	Reno
25 South	7 West	1 through 36	Reno
26 South	5 West	6, 7, and 8; 17 through 21; and 27 through 35	Reno
26 South	6 West	1 through 36	Reno
26 South	7 West	1 through 36	Reno

(2) The minimum spacing of all nondomestic and nontemporary wells with an authorized rate of diversion of 401 gallons per minute or more, as described in an application for permit to appropriate water for beneficial use, term permit, or application to change the point of diversion, shall be the following:

(A) 2,640 feet from all other nondomestic wells, groundwater pits, and baseflow nodes; and

(B) 660 feet from all domestic wells.

(3) The minimum spacing of a battery of wells with a total authorized rate of diversion of 401 gallons per minute or more, as described in an application for permit to appropriate water for bene-

ficial use, term permit, or application to change the point of diversion shall be the following:

(A) 2,940 feet from all nondomestic wells, groundwater pits, and baseflow nodes; and

(B) 960 feet from all domestic wells.

(4) The minimum spacing interval from the edge of a groundwater pit to each nondomestic well, the edge of any other groundwater pit, and baseflow node shall be 1,320 feet. The minimum spacing interval from the edge of a groundwater pit to a domestic well shall be 330 feet.

(e) The following types of wells shall not be subject to this well-spacing regulation:

(1) A standby well;

(2) a bank storage well;

(3) a well authorized pursuant to the approval of an application to change the point of diversion that meets both of the following conditions:

(A) The number of wells comprising the point of diversion remains unchanged; and

(B) each point of diversion is proposed to be relocated 300 feet or less from the currently authorized location;

(4) the minimum spacing interval of nondomestic wells to domestic wells, if the domestic well owner has granted written permission to reduce the spacing interval; and

(5) the minimum spacing interval of groundwater pits to nondomestic, nontemporary, or domestic wells, if the well owner has granted written permission to reduce the spacing interval. (Authorized by and implementing K.S.A. 82a-1028, as amended by L. 2002, Ch. 137, § 5; effective May 1, 1979; amended Oct. 15, 1990; amended March 7, 1994; amended Jan. 10, 2003.)

5-22-3. Waste of water. It shall be a violation of these rules and regulations for any person, private corporation, public corporation, municipality, company, institution, township, county, state agency or federal agency to waste water as defined in these regulations. (Authorized by K.S.A. 1978 Supp. 82a-1028(o); effective May 1, 1979.)

5-22-4. Metering. (a) Each water flowmeter, gauge, or other measuring device required by the district shall meet the minimum specifications adopted by the chief engineer by regulation.

(b) The owner of the water right or approval of application shall perform the following:

(1) Ensure that the water flowmeter is properly installed in accordance with the specifications adopted by the chief engineer by regulation;

(2) maintain the water flowmeter in satisfactory working condition whenever the diversion works can reasonably be expected to operate; and

(3) ensure that the water flowmeter measures all of the discharge from the diversion works and does not measure any other discharge, including tailwater and sewage lagoon effluent. (Authorized by and implementing K.S.A. 82a-1028, as amended by L. 2002, Ch. 137, § 5; effective May 1, 1979; amended Oct. 15, 1990; amended Jan. 10, 2003.)

5-22-4a. Water flowmeter requirement.

Each nondomestic, nontemporary well meeting any of the following conditions shall be equipped with a water flowmeter that meets or exceeds the requirements of K.A.R. 5-22-4: (a) A well operated under the authority of an approval of application issued on or after September 1, 1987;

(b) a well operated under the approval of an application for change in the place of use, the point of diversion, or the use made of the water, or any combination of these, filed after September 1, 1987;

(c) a well that meets the standards for being a standby well as specified in K.A.R. 5-22-1;

(d) a well for which a certificate of appropriation was issued on or after July 1, 1995;

(e) a well not equipped with a water flowmeter before December 31, 2010. Each such well shall be equipped with a water flowmeter that meets or exceeds the requirements of K.A.R. 5-22-4, pursuant to the following schedule:

(1) On or before December 31, 2012, each well in the northeast quarter of every section located within the district boundaries;

(2) on or before December 31, 2013, each well in the southeast quarter of every section located within the district boundaries;

(3) on or before December 31, 2014, each well in the southwest quarter of every section located within the district boundaries; and

(4) on or before December 31, 2015, each well in the northwest quarter of every section located within the district boundaries; or

(f) a well for which the board determines it is necessary to have a water flowmeter to ensure any of the following:

(1) The accuracy of reported water use;

(2) compliance with the terms, conditions, and limitations of the water right, approval of application, or approval of change; or

(3) nonimpairment of other water rights. (Authorized by and implementing K.S.A. 2010 Supp.

82a-1028; effective Jan. 10, 2003; amended Aug. 5, 2011.)

5-22-4b. Water flowmeter maintenance.

(a) If a water flowmeter required by the district is ever out of compliance, the owner shall promptly repair or replace the water flowmeter, or correct any problems with the installation.

(b) A water flowmeter shall be considered to be out of compliance if any of the following conditions is met:

(1) The water flowmeter registers less than 94 percent or more than 106 percent of the actual volume of water passing the water flowmeter. If necessary, this determination may be made by a field test conducted or approved by the chief engineer.

(2) The seal placed on the totalizer by the manufacturer or the manufacturer's authorized representative has been broken, or the totalizer value has been reset or altered without the authorization of the manufacturer, an authorized representative of the manufacturer, or the chief engineer.

(3) A seal placed on the water flowmeter or totalizer by the chief engineer has been broken.

(4) The water flowmeter register is not clearly visible or is unreadable for any reason.

(5) There is not full pipe flow through the water flowmeter.

(6) The flow-straightening vanes have not been properly designed, manufactured, and installed.

(7) The water flowmeter is not calibrated for the nominal size of the pipe in which the flowmeter is installed.

(8) The water flowmeter is not installed in accordance with the manufacturer's installation specifications. However, five diameters of straight pipe above the water flowmeter sensor and two diameters below the water flowmeter sensor shall be deemed the minimum required spacing, regardless of the manufacturer's installation specifications.

(9) A water flowmeter is installed at a location where the flowmeter does not measure all of the water diverted from the source of supply. (Authorized by and implementing K.S.A. 82a-706a and K.S.A. 2003 Supp. 82a-1028; effective Nov. 12, 2004.)

5-22-4c. Water flowmeter testing by a non-district person. If a water right owner desires to have a water flowmeter flow rate test performed by a person other than district staff to comply with

any requirement of the district, that person may be approved by the board to perform a water flowmeter flow rate test if the person demonstrates to the district both of the following: (a) The person has the training, skills, and experience necessary to properly conduct the test.

(b) The person has the appropriate water flowmeter to perform the test, and the water flowmeter has been tested for accuracy with water flowmeter test equipment that has been found to be accurate using standards traceable to the national institute of standards and technology (NIST). The equipment shall have been tested and found to be accurate within 12 months of performing the water flowmeter test. (Authorized by and implementing K.S.A. 82a-706a and K.S.A. 2003 Supp. 82a-1028; effective Nov. 12, 2004.)

5-22-4d. Water flowmeter installation procedures. (a) If installation of a water flowmeter is required by the board, the owner of the approval of application or the water right shall be notified of the requirement in writing.

(b) A water flowmeter shall be installed on a new or replacement point of diversion within 30 days after the point of diversion is operational, or before the diversion of water, whichever occurs first.

(c) Unless otherwise specified by the board, a water flowmeter shall be installed on an existing point of diversion within 30 days of the issuance of the water flowmeter order by the district, or before the diversion of water, whichever occurs first.

(d) An extension of time to install the water flowmeter may be granted by the board, or the board's designee, if a request for an extension of time is filed with the district before the expiration of the time to install the water flowmeter and one of the following conditions is met:

(1) The water right owner has a contract with a vendor to install a water flowmeter, but the vendor cannot complete the installation within the time allowed.

(2) Weather, site conditions, or other conditions beyond the control of the owner prevent the water flowmeter from being installed within the time allowed.

(3) The owner demonstrates any other reason constituting good cause why the water flowmeter cannot be installed within the time allowed and that granting an extension of time will not be adverse to the public interest.

(e) The water right owner shall notify the district within 30 days after the required water

flowmeter is installed. The notification shall be submitted on a form prescribed by the board, or the board's designee.

(f) An inspection of the water flowmeter installation may be made by the board, or the board's designee, to determine if the water flowmeter has been properly installed in accordance with the requirements of K.A.R. 5-22-4, K.A.R. 5-22-4a, and K.A.R. 5-22-4b.

(g) If an inspection is made by the board or the board's designee, the owner shall be notified by the board, or the board's designee, of the results of the inspection in writing. (Authorized by and implementing K.S.A. 82a-706a and K.S.A. 2010 Supp. 82a-1028; effective Nov. 12, 2004; amended Aug. 5, 2011.)

5-22-5. (Authorized by K.S.A. 82a-1028(o); implementing K.S.A. 82a-1028(n); effective May 1, 1980; amended Oct. 15, 1990; revoked Jan. 10, 2003.)

5-22-6. Noncompliance; penalties; appeal procedures.

(a) Any person may file with the board a written or verbal complaint that someone is allegedly violating any regulation of the district, any provision of the Kansas water appropriation act, or a term, condition, or limitation of an approval of application or a water right.

(b) The alleged violation shall be investigated by the district staff.

(c) A written report of the investigation shall be prepared by the district staff.

(d) If the investigation determines that a violation of a regulation of the district has occurred, an order shall be issued by the board or its designee. The order shall specify the following:

(1) What the violation of the regulation is;

(2) what actions are necessary to correct the violation;

(3) what a reasonable time is for correcting the violation. Extensions of time to correct a violation may be granted by the board if good cause is shown by the violator or owner;

(4) that the order will become effective immediately; and

(5) that a hearing may be requested within 15 days of the issuance of the order. The request for a hearing may include a request for a stay of the order. If the person shows good cause why a stay should be granted, a stay may be granted by the board.

(e) The owner or owners of the approval of application or water right, as shown in the records

of the district, shall initially be notified of the violation verbally, in writing, or by other means. Regardless of the means of initial notification, a copy of the order shall also be served by delivering a copy of the order in person or by restricted mail.

(f) The record of the complaint, the investigation, and the notice of violation shall be made a part of the official records of the district.

(g) If the violation is corrected by the deadline specified by the board, the violator shall notify the district staff. An inspection shall be conducted by the district staff to determine if the violation has been corrected. If the violation has been corrected, the diversion of water may continue within the terms, conditions, and limitations of the approval of application or water right.

(h) If the violation is not corrected by the deadline specified by the board, an order requiring that unauthorized or illegal diversion of water cease until the violation is corrected shall be issued by the district.

(i) If the violator ceases diversion of water and then corrects the violation, the violator shall notify the district when the violation is corrected. The diversion works and the authorized place of use, as appropriate, shall be inspected by the district staff to determine whether the violation has been corrected. If the board determines that the violation has been corrected, the order prohibiting the diversion of water shall be rescinded by the board. When the owner or violator receives notice from the district that the order prohibiting the diversion of water has been rescinded, the diversion of water may recommence.

(j) If the violator performs any act described in subsection (a), any of the following actions may be taken by the board:

(1) If applicable, bring an injunctive action to enforce the order of the district;

(2) if applicable, request enforcement assistance from the chief engineer;

(3) if applicable, request that criminal proceedings be brought pursuant to K.S.A. 82a-728, and amendments thereto;

(4) if applicable, request that the county attorney or district attorney initiate injunctive remedies pursuant to K.S.A. 68-184, and amendments thereto, to prevent the occurrence of a nuisance;

(5) enter into a consent order with the violator specifying the remedial actions that shall be taken by the violator;

(6) require the installation of a water flowmeter;

(7) take any other legally permissible enforcement action; or

(8) any combination of the actions specified in paragraphs (j)(1) through (7).

(k) After the violator has been issued an order as specified in subsection (d), the violator, or anyone whose legal rights, duties, privileges, immunities, or other legal interests could be affected by the order, may appeal the order to the board. The appeal shall be filed within 15 days of the issuance of the order.

(l) The appeal petition shall state the basis for the appeal and shall be accompanied by documentation supporting the appeal.

(m) During the appeal, any relevant information or data may be considered by the board, including relevant data and information submitted by any person whose legal rights, duties, privileges, immunities, or other legal interests could be affected by the order.

(n) After consideration of the appeal, one of the following actions shall be taken by the board:

(1) Remand the matter to the district staff with instructions for additional investigation; or

(2) notify the violator and the chief engineer of the board's final decision. The violator and all other parties shall be notified of the board's decision by certified mail.

(o)(1) Within 15 days after the service of the board's decision on the violator and any other affected party, the violator or any other affected party may file with the board a written request for reconsideration, which shall state the specific grounds for the request for reconsideration. The petition for reconsideration shall be deemed denied if not acted on by the board within 30 days.

(2) If the request for reconsideration is granted by the board, an administrative hearing shall be held by the board within 30 days of the date on which the request is filed with the board. After the hearing, the board may affirm, reverse all or part of, or modify the order of the board. (Authorized by and implementing K.S.A. 82a-706a and K.S.A. 2003 Supp. 82a-1028; effective May 1, 1980; amended Dec. 10, 2004.)

5-22-7. Safe yield. (a) Except as specified in subsection (b), the approval of each application for a change in the point of diversion, term permit, and permit to appropriate water for beneficial use shall be subject to the following requirements:

(1) The sum of prior appropriations shall include all of the following:

- (A) The proposed application;
- (B) vested rights;
- (C) appropriation rights;
- (D) term permits;
- (E) earlier priority applications; and
- (F) baseflow nodes.

The sum of prior appropriations shall not exceed the allowable safe-yield amount for the area of consideration. The non-consumptive use of groundwater previously authorized by the chief engineer shall be excluded from the sum of prior appropriations.

(2) The quantity authorized on all prior permits, certificates, and vested rights, the quantity requested on prior applications, and the quantities allocated to baseflow nodes shall be used to calculate the sum of prior appropriations and baseflow allocations.

(3) All conditions and limitation clauses listed on all prior appropriations and applications in the area of consideration shall be considered in effect.

(4) The baseflow allocation for baseflow nodes shall be calculated using the formula $Q_a = T/N$ where:

(A) Q_a is the baseflow allocation per baseflow node in acre-feet per year;

(B) T is the total baseflow allocation for a reach of a stream in acre-feet per calendar year. T is the average of the 12 calendar months' daily flow values in cubic feet per second that were equaled or exceeded 90 percent of the time during a specifically designated hydrologically significant period of record, times a factor of 724; and

(C) N is the number of baseflow nodes established on a stream or reach of a stream. Nodes are located at the upstream end of the watercourse reach and thereafter at the intersection of the channel of a watercourse and an arc of a 1,320-foot-radius circle whose center is located on the previously established baseflow node.

(5) The allowable safe-yield amount shall be calculated using the formula $S = A \times K$ where:

(A) S is the allowable safe-yield amount in acre-feet per year;

(B) A is the area of consideration; and

(C) K is an aquifer recharge value in feet. Everywhere in the district, except in McPherson county and the well spacing areas specified in K.A.R. 5-22-2(d)(1), K is equal to 0.5 feet per year.

(i) In McPherson county, K is a constant equaling 0.25 feet per year.

(ii) In the well spacing areas specified in K.A.R. 5-22-2(d)(1) and located south of the centerline of

the North Fork Ninnescah river, K is equal to 0.25 feet per year. In the well spacing areas specified in K.A.R. 5-22-2(d)(1) and located north of the centerline of the North Fork Ninnescah river, K is equal to 0.1667 feet per year.

K is calculated by multiplying the recharge percentage times the average annual precipitation of 2.5 feet per year. The recharge percentage is 10 percent in McPherson county and the well spacing areas specified in K.A.R. 5-22-2(d)(1) and located south of the centerline of the North Fork Ninnescah river, 6.667 percent in the well spacing areas specified in K.A.R. 5-22-2(d)(1) and located north of the centerline of the North Fork Ninnescah river, and 20 percent for the rest of the district.

(6) When evaluating an application for a change in the point of diversion, each application with a priority earlier than the priority established by the filing of the application of change shall be included in the safe-yield analysis.

(7) If the perimeter of the area under consideration intersects a group of wells authorized under prior applications, permits, certificates, or vested rights, a reasonable quantity of water shall be assigned to each well based upon the best available information.

(b) The following shall not be subject to this regulation:

(1) An application to appropriate groundwater in an area not closed by regulation or intensive groundwater use control area order by the chief engineer to new non-domestic, non-temporary permits and term permits for five or fewer years, if all of the following conditions are met:

(A) The annual quantity of water requested in the application does not exceed 15 acre-feet;

(B) the sum of the annual quantity of water requested in the application and the total annual quantities of water authorized by prior approvals of applications allowed because of an exemption pursuant to this regulation does not exceed 45 acre-feet in a two-mile-radius circle surrounding the proposed point of diversion;

(C) the approval of the application does not authorize an additional quantity of water out of an existing authorized point of diversion with a non-domestic approval of application or water right that would then authorize a total combined annual quantity of water from that point of diversion in excess of 15 acre-feet;

(D) the approval of the application does not authorize an additional quantity of water to be used

on a currently authorized non-domestic place of use in excess of 15 acre-feet;

(E) the approval of the application does not authorize an additional quantity of water to be pumped through a common distribution system in excess of 15 acre-feet;

(F) the application meets the well spacing criteria in K.A.R. 5-22-2;

(G) the application meets the requirements of all other applicable regulations in effect when the application is filed; and

(H) the maximum authorized rate of diversion does not exceed 50 gallons per minute;

(2) an application for a non-consumptive use of groundwater;

(3) an application for change in point of diversion, if the following conditions are met:

(A) The diversion works were completed 300 feet or less from the originally authorized point of diversion and within 150 feet of the location approved by the chief engineer;

(B) a notice of completion was timely filed with the chief engineer under the original approval of application; and

(C) if located within the well spacing areas specified in K.A.R. 5-22-2(d)(1), both of the following conditions are met:

(i) The number of wells comprising the point of diversion is not proposed to be increased; and

(ii) each point of diversion is proposed to be relocated 300 feet or less from the currently authorized location, the currently authorized point of diversion and diversion works have been completed, and a notice of completion has been timely filed with the chief engineer before the effective date of this regulation;

(4) an application requesting only an additional rate of diversion on an existing well, if the approval of the application meets the following requirements:

(A) Is limited to the maximum annual quantity of water authorized by a prior certified, vested, or appropriation right; and

(B) contains both of the following requirements:

(i) The approved application for additional rate shall be dismissed if the prior certified, vested, or appropriation right is dismissed and terminated; and

(ii) the approved or certified maximum annual quantity of water shall be reduced in an amount equal to any subsequent reduction in the maximum annual quantity of water authorized by the prior certified, vested, or appropriation right;

(5) an application for a standby well;

(6) an application for a bank storage well only to the extent that the bank storage well is withdrawing bank storage water; and

(7) an application for an aquifer storage and recovery well. (Authorized by and implementing K.S.A. 82a-706a and K.S.A. 2015 Supp. 82a-1028; effective May 1, 1983; amended Oct. 15, 1990; amended March 7, 1994; amended Nov. 12, 2004; amended May 14, 2010; amended June 12, 2015; amended March 25, 2016.)

5-22-8. Change applications. (a) Except as set forth in subsection (d), the approval of each application for a change in point of diversion for a vested right, appropriation right, permit, term permit, or an application to appropriate groundwater shall be subject to the following requirements:

(1) The maximum distance a replacement well can be located from the originally authorized location shall be 2,640 feet.

(2) A replacement well located more than 300 feet from the currently authorized location shall comply with the provisions of K.A.R. 5-22-2.

(3) An application for a change in point of diversion shall be accompanied by either a completed abandoned-well or inactive-well agreement if the original well will no longer be authorized by any other vested right, appropriation right, approval of application, or term permit and the well has not been properly physically adapted for, and actually used for, domestic use. The completed agreement shall be submitted by the applicant with the application for a change in point of diversion on a form prescribed by the district.

(4) Each point of diversion described in the application shall be equipped with a water flowmeter that meets or exceeds the criteria of K.A.R. 5-22-4, K.A.R. 5-22-4a, K.A.R. 5-22-4b, and K.A.R. 5-22-4d.

(b) The approval of each application for a change in place of use or the use made of water for a vested right, appropriation right, approval of application, and term permit shall have a condition that a water flowmeter that meets or exceeds the requirements of K.A.R. 5-22-4, K.A.R. 5-22-4a, K.A.R. 5-22-4b, and K.A.R. 5-22-4d be installed on each point of diversion described in the application.

(c) Except as specified in subsection (d), each approval of application for a change in place of use for irrigation purposes shall be subject to the following requirements:

(1) If the time to perfect the water right has expired, the water right shall be certified before the change application may be approved.

(2) The approval of the application for change in place of use shall not authorize an increase in the size of the authorized place of use in excess of the limits specified in K.A.R. 5-5-11(b).

(d) An application for change in place of use for irrigation purposes filed only for the purpose of creating an identical place of use with another water right or rights shall not be subject to subsection (c) if all of the following conditions are met:

(1) There is not a net increase in the number of authorized acres.

(2) Each water right involved in the proposed identical overlap in place of use is certified by the chief engineer before processing the change application if approval of the change application would authorize an increase in base acreage as defined in K.A.R. 5-5-11(a).

(3) The total quantity authorized by all existing water rights and all permits involved is reasonable to irrigate the land authorized after the change in place of use is approved. (Authorized by and implementing K.S.A. 82a-706a and K.S.A. 2003 Supp. 82a-1028; effective Oct. 15, 1990; amended March 7, 1994; amended Nov. 12, 2004.)

5-22-9. Exceptions. Each recommendation timely submitted by the district concerning an exemption from, or waiver to, a regulation adopted by the chief engineer shall be considered by the chief engineer. An exception to these regulations may be granted by the chief engineer if the applicant demonstrates that the exception will neither impair a use under an existing right nor prejudicially affect the public interest. (Authorized by K.S.A. 82a-706a and K.S.A. 2003 Supp. 82a-1028; implementing K.S.A. 82a-706a and K.S.A. 2003 Supp. 82a-1028; effective Oct. 15, 1990; amended Nov. 12, 2004.)

5-22-10. Aquifer storage and recovery system: data reporting requirements. (a) Each person operating an aquifer storage and recovery system of which all or part of is within the boundaries of the district shall file an annual report with the district no later than June 1 for the previous calendar year. The report shall contain the water balance in the basin storage area and, in addition to the information required by K.A.R. 5-12-2, information about the following, as specified:

(1) Source water:

(A) The type;
 (B) the quantity of water available;
 (C) the quantity of water surface water and bank storage water diverted;
 (D) the basin storage loss; and
 (E) the chemical, physical, radiological, and biological quality for each type of source water diverted;

(2) aquifer storage:

(A) The artificial recharge techniques used;
 (B) the quantity of source water recharged by each technique used;

(C) the total quantity of source water stored in the basin storage area; and

(D) the chemical, physical, radiological, and biological quality for each type of water stored;

(3) recovery of stored water:

(A) A monthly and annual summary of recharge credits withdrawn from each recovery well; and

(B) the chemical, physical, radiological, and biological quality of the water recovered; and

(4) hydrologic conditions:

(A) The quarterly index water levels;

(B) the key groundwater quality parameters;

(C) the monthly and annual precipitation quantities;

(D) the annual groundwater withdrawals from all wells except domestic wells;

(E) the annual streamflow, including baseflows and above-baseflow stage;

(F) a summary of the conjunctive use amounts; and

(G) the water supply and demand forecast for the next three years.

(b) The operator of the aquifer storage and recovery system shall furnish the district with whatever analyses, data, and other supporting documentation are necessary to understand and verify the report.

(c) The board shall review the report and submit its findings and recommendations to the chief engineer regarding the report no later than September 1 of the calendar year in which the report is required to be filed. (Authorized by and implementing K.S.A. 82a-706a and K.S.A. 2003 Supp. 82a-1028; effective Dec. 10, 2004.)

5-22-12. Application processing requirements and procedures. (a) Except as provided in subsection (c), each application for any of the following shall be subject to the requirements and procedures in subsection (b):

(1) Appropriate water for beneficial use;

(2) change the point of diversion, the use made of water, the place of use, or any combination of these; or

(3) obtain a term permit.

(b)(1) Before final action is taken on an application, a copy of the application shall be submitted by the chief engineer to the district for review and recommendation.

(2) The district staff shall conduct a review of the proposed application. The district staff's recommendation to the chief engineer shall be consistent with the provisions of the Kansas water appropriation act, the groundwater management district act, and the regulations adopted by the chief engineer pursuant to those acts.

(3) Within 15 working days after the date the chief engineer submits the application to the district for review, or any extension of time approved by the chief engineer, the district staff shall submit to the chief engineer its findings and recommendation for approval, denial, or modification of the application and shall specify the basis for the recommendation. At the same time the district submits its recommendation to the chief engineer, the recommendation shall also be served on the applicant and any other parties to the proceedings.

(4) A district staff's findings and recommendation concerning an application may be appealed to the board by the applicant or anyone whose legal rights, duties, privileges, immunities, or other legal interests may be affected by approval, denial, or modification of the application.

(5) The petition for review by the board shall be filed by the party appealing the recommendation with the board within 30 days after the date of the letter sending the findings and recommendations by the staff of the district to the applicant or other party. The petition shall state the basis for the appeal and shall be accompanied by documentation supporting the appeal.

(6) During the appeal, any relevant information or data may be considered by the board, including relevant data and information submitted by a person whose legal rights, duties, privileges, immunities, or other legal interests may be affected by approval, denial, or modification of the application.

(7) After consideration of the appeal, one of the following actions shall be taken by the board:

(A) Remanding the matter to the district staff with instructions for additional investigation; or

(B) notifying the applicant and the chief engineer of the board's final recommendation. The

applicant and all other parties shall be notified of the board's decision by certified mail.

(8) Within 15 days after the service of the board's decision on the applicant and any other party, the applicant or any other party may file with the board a written request for reconsideration, which shall state the specific grounds for the request for reconsideration. The petition for reconsideration shall be deemed denied if not acted on by the board within 30 days.

(c) The following shall not be subject to this regulation:

(1) The domestic use of water;

(2) an application for a temporary permit; and

(3) an application to change the point of diversion if both of the following conditions are met:

(A) The point of diversion is proposed to be moved less than 300 feet; and

(B) the point of diversion is not a battery. (Authorized by and implementing K.S.A. 82a-1028, as amended by L. 2002, Ch. 137, § 5; effective Jan. 10, 2003.)

5-22-13. Potential net evaporation. (a)

The map titled "annual potential net evaporation in inches for Equus Beds groundwater management district no. 2 (annual average evaporation minus annual normal precipitation)," prepared by the district and dated June 11, 2002, is hereby adopted by reference for the purpose of determining potential net evaporation from a free-water surface within the district.

(b) The values on the map shall be used in all situations in which the determination of potential net evaporation from a free-water surface is necessary, including the following:

(1) Computing the annual amount of evaporation that will be caused by exposing the groundwater table;

(2) calculating the quantity of surface water that is reasonably expected to be replaced with groundwater pumped under an approval of application or water right;

(3) calculating the average annual evaporation from groundwater that will be used to determine annual water use; and

(4) determining the maximum annual quantity of water that is perfected pursuant to K.S.A. 82a-714, and amendments thereto.

(c) The values shown on the map shall be used unless the applicant provides, or the chief engineer or the district has available, better or more site-specific data concerning potential net evapo-

ration. (Authorized by and implementing K.S.A. 82a-706a and K.S.A. 2003 Supp. 82a-1028; effective Dec. 10, 2004.)

5-22-14. Maximum reasonable quantity for beneficial use. (a) The maximum annual quantity of water deemed reasonable for irrigation use shall be the following:

(1) 1.3 acre-feet per acre in Harvey, McPherson, and Sedgwick counties; and

(2) 1.4 acre-feet per acre in Reno county.

(b) The following quantities shall be used to determine the maximum annual quantity of water deemed reasonable for nondomestic livestock and poultry use:

Livestock or poultry	Drinking water (gallons per day)	Units
Cattle, beef	15	per head
Cattle, dairy	35	per head
Swine		per head
finishing	5	
nursery	1	
sow and litter	8	
gestating sow	6	
Sheep	2	per head
Horses	12	per head
Poultry		
chickens	9	100 layers
turkeys	30	100 turkeys
Calves (750 pounds or less)	10	per head
Goats	9	per head

(c) The maximum reasonable quantity of water that may be approved for nondomestic livestock and poultry use for applications approved on or after the effective date of this regulation shall be limited as specified in subsection (b), unless the applicant demonstrates with adequate supporting information that the quantity of water and rate of diversion requested meet the following conditions:

- (1) Are reasonable for the intended use;
- (2) are not wasteful; and
- (3) will not otherwise prejudicially and unreasonably affect the public interest.

(d) For all other types of nondomestic livestock, poultry, birds, and animals, the maximum quantity of water approved for beneficial use shall be reasonable. The applicant shall justify the quantity of water requested with information on peer water use, the historical measured usage, a professional recommendation, or any other relevant information.

(e) Each applicant who seeks to appropriate water for industrial use shall submit information to demonstrate that the annual quantity of water requested is reasonable for that particular type of industrial use. The information submitted shall include the quantity of water reasonable for that type of industrial use based on current industry standards and a use of technology that is economically and technically feasible for that industry at that location.

(f) Unless the applicant demonstrates a projected deviation from actual population trends, a reasonable annual quantity of water for municipal use shall not exceed the lesser of either of the following:

(1) 200 gallons per capita per day; or

(2) 110 percent of the last three years' average per capita per day usage, excluding industries that use over 200,000 gallons per year, times 365 days per year, times the projected population for the twentieth year after the application is filed, plus reasonable projected water use for industries that use over 200,000 gallons per year. Population projections shall be made using one of the following:

(A) Accepted statistical methods using historic population trends for the applicant; or

(B) data from the U.S. census bureau, Kansas water office population projections, or the Kansas census bureau. Projected deviations from historic population trends shall be justified by the applicant.

(g) The maximum annual quantity of water deemed reasonable to be provided from a well to a pond, lake, or reservoir that does not expose the current or historical water table shall be calculated using the formula $Q_c = [(E+S)/12] \times A_{sw} + F$ where:

(1) Q_c is the maximum quantity of water use in acre-feet;

(2) E is the potential net evaporation in inches per year;

(3) S is the seepage loss based on soil and subsoil in inches per year;

(4) A_{sw} is the surface area of the pond in acres as measured at the elevation of the lowest uncontrolled spillway; and

(5) F is the quantity of water in acre-feet necessary to fill the pond initially.

(h) The maximum annual quantity of water deemed reasonable to replace the evaporation from a groundwater pit shall be calculated using the formula $Q_c = (E/12) \times A_{wt}$ where:

(1) Q_c is the maximum annual quantity of evaporation of groundwater from the pit in acre-feet;

(2) E is the potential net evaporation in inches per year; and

(3) A_{wt} is the area of the water table exposed in the groundwater pit expressed in acres. (Authorized by and implementing K.S.A. 82a-706a and K.S.A. 2003 Supp. 82a-1028; effective Dec. 10, 2004.)

5-22-15. Limitations on the use of fresh groundwater. (a) Fresh groundwater shall not be used for any of the following purposes, unless the applicant demonstrates before approval of the application that the use of other waters is not technologically or economically feasible:

- (1) The enhanced recovery of oil or gas;
 - (2) solution mining;
 - (3) the construction of storage caverns in subsurface salt deposits;
 - (4) the displacement and extraction of hydrocarbons from subsurface storage;
 - (5) any use that is not a beneficial use, as defined in K.A.R. 5-1-1; and
 - (6) any use that is not in the public interest.
- (b) "Other waters" shall include the following:
- (1) Water having a chloride content of more than 500 milligrams per liter (mg/l);
 - (2) water that is otherwise contaminated so that it is not drinkable;
 - (3) renewable surface water; and
 - (4) water that is being reclaimed, recycled, or reused. (Authorized by K.S.A. 82a-706a and K.S.A. 2003 Supp. 82a-1028; implementing K.S.A. 82a-706a, K.S.A. 2003 Supp. 82a-711, and K.S.A. 2003 Supp. 82a-1028; effective Dec. 10, 2004.)

5-22-17. Bank storage wells. (a) Each applicant for one or more bank storage wells shall demonstrate all of the following:

- (1) The hydraulic connection from the streambed and banks to each bank storage well screen is sufficient to transmit bank storage water from the bed and banks of the stream to each bank storage well screen at a rate sufficient to sustain the authorized rate of diversion of the well or wells.
- (2) Within seven days after the pumping of all bank storage wells has ceased, the water level in each bank storage well, or a monitoring well located within 100 feet of that bank storage well, will recover to an elevation equal to or greater than the water level elevation immediately before the bank storage well began to pump, adjusted for any regional groundwater level changes not caused by the pumping of the bank storage well.

(3) The naturally occurring and artificially induced rate of infiltration from the bed and banks of the stream when bank storage is occurring will be sufficient to meet the following conditions:

- (A) Equal or exceed the authorized rate of diversion of all of the bank storage wells;
- (B) prevent impairment caused by all bank storage wells; and
- (C) prevent groundwater mining caused by all bank storage wells.

(b) If an application for a bank storage well is approved by the chief engineer, the applicant shall install one or more water-level measurement tubes at locations that will allow adequate monitoring of groundwater quality and groundwater levels within the area where the annual cone of depression of the bank storage well or wells could be greater than 0.5 feet. Each water-level measurement tube shall be constructed and maintained in accordance with K.A.R. 5-6-13. (Authorized by K.S.A. 82a-706a and K.S.A. 2003 Supp. 82a-1028; implementing K.S.A. 82a-706a and K.S.A. 2003 Supp. 82a-1028; effective Nov. 12, 2004.)

Article 23.—SOUTHWEST KANSAS GROUNDWATER MANAGEMENT DISTRICT NO. 3

5-23-1. Definitions. As used in these regulations, by the southwest Kansas groundwater management district in the implementation of the groundwater management district act, and by the division of water resources in the administration of the Kansas water appropriation act and the groundwater management district act, unless the context clearly requires otherwise, the following words and phrases shall have the meanings ascribed to them in this regulation. (a) "Confined aquifer" means an aquifer overlain and underlain by impermeable layers. Groundwater in a confined aquifer is normally under pressure greater than atmospheric pressure.

(b) "High plains aquifer" means the aquifer comprised of the undifferentiated Pleistocene-age deposits, Quaternary loess, alluvium, dune sand, the Ogallala formation, and deeper aquifers that are in vertical or horizontal hydraulic contact with the Ogallala formation.

(c) "Hydraulic contact" means the absence of an impermeable layer between aquifers.

(d) "Theis analysis" means the Theis non-equilibrium equation analysis described in pp. 108-113 in "ground water and wells: a reference book

for the water-well industry,” published in 1966 by Edward E. Johnson, Inc. The pages specified in this subsection are hereby adopted by reference.

(e) “Unconfined aquifer” means an aquifer in which the groundwater is exposed to the atmosphere through openings in the overlying materials. The upper surface of an unconfined aquifer is the water table.

(f) “Well” means any artificial excavation that is drilled, cored, bored, washed, driven, dug, or otherwise constructed when the intended use of the excavation is for the acquisition, diversion, or artificial recharge of groundwater. (Authorized by K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028(o); implementing K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; effective May 1, 1981; amended May 1, 1985; amended Sept. 22, 2000; amended Feb. 27, 2004.)

5-23-2. Tailwater control and waste. No water user shall allow waste of water. If the water is re-used, the user shall apply the water consistent with the approved application to appropriate water for beneficial use, vested right or appropriation right. All water users shall construct and operate the water distribution systems in a manner as to prevent the waste of water, and shall do everything necessary and proper to preserve the quality of the groundwater resources within the district. (Authorized by K.S.A. 1980 Supp. 82a-1028(o); implementing K.S.A. 1980 Supp. 82a-1028(n); effective May 1, 1981.)

5-23-3. Minimum well spacing requirements: high plains aquifer. (a) (1) The minimum horizontal distance between each proposed nontemporary, nondomestic well and all other senior nontemporary, nondomestic wells diverting water from the high plains aquifer shall be determined from the following schedule.

Quantity per well (acre-feet per year)	Minimum well spacing requirement
15 or less	660 feet
16–200.....	1,300 feet
201–300.....	1,600 feet
301–400.....	1,900 feet
401–500.....	2,100 feet
more than 500.....	2,300 feet

(2) The minimum well spacing requirement shall be based on the maximum annual quantity of water. The required well spacing shall be the greater of either of the following:

(A) The minimum spacing for the total authorized and requested quantity of water for the proposed well; or

(B) the total authorized and requested annual quantity of water for the nontemporary, nondomestic well against which the spacing is being measured that is senior to the date on which the application was filed. If the quantity of water applied for includes a fraction of an acre-foot, the quantity of water shall be rounded down to the next whole number of acre-feet for the purpose of applying the table in this subsection.

(b) The location of a well or wells on an application for approval to change the point of diversion under an existing water right shall be no more than 2,640 feet from the currently authorized and completed point of diversion.

(c) A well shall be exempt from the minimum well spacing requirements of this regulation if the well meets either of the following conditions:

(1) The well is being replaced within 300 feet of the currently authorized point of diversion.

(2) The proposed replacement well location improves the spacing to all other wells for which the spacing requirement was not met on the date on which the application for a change in point of diversion was filed and continues to meet requirements for spacing to all wells for which the spacing requirement was met at the time the application for change in point of diversion was filed.

(d) No application for approval to change the point of diversion under an approved application for which the original well has not been drilled shall be approved if the location of the proposed point of diversion decreases the distance from the approved location to any other existing wells to less than the spacing requirement for new applications.

(e) Each nondomestic, nontemporary well shall be located a minimum of 660 feet from all domestic wells with a priority earlier than the date on which the change application was filed, unless all of the following conditions are met:

(1) The domestic well is owned by the applicant.

(2) The applicant signs a written request to waive the requirements for spacing to the domestic well.

(3) The applicant submits information documenting the location and depth of the domestic well and any other information necessary for the chief engineer to determine whether the domestic well is likely to be impaired.

(4) A Theis analysis or other hydraulic analysis

shows that the domestic well is not likely to be impaired by the proposed well.

(f) In the case of a battery of wells, as defined in K.A.R. 5-1-1, the minimum horizontal distance shall be measured from the geographic center of the wells comprising the battery.

(g) The total annual quantity per well shall be the sum of all of the quantities authorized or requested by any water rights, permits, or applications requesting or authorizing that well as a point of diversion. (Authorized by K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; implementing K.S.A. 82a-706a, K.S.A. 2002 Supp. 82a-711, K.S.A. 2002 Supp. 82a-708b, and K.S.A. 82a-1028; effective May 1, 1981; amended May 1, 1985; amended Aug. 28, 1989; amended Sept. 30, 1991; amended Sept. 22, 2000; amended Feb. 27, 2004.)

5-23-3a. Minimum well spacing requirements: confined aquifers. (a)(1) The minimum horizontal distance between each proposed nontemporary, nondomestic well and all other senior nontemporary, nondomestic wells diverting water from a confined aquifer shall be determined from the following schedule.

Quantity per well (acre-feet per year)	Minimum well spacing requirement	Required distance from hydraulic contact point
15 or less	660 feet	2,640 feet
16 to 25	2,300 feet	1 mile
26 to 100	5,280 feet	2 miles
More than 100	10,560 feet	5 miles

(2) The minimum well spacing requirement shall be based on the authorized maximum annual quantity of water. The well spacing requirement shall be the greater of either of the following:

(A) The minimum spacing for the total authorized and requested annual quantity of water of the proposed well; or

(B) the total authorized and requested quantity of water for nontemporary, nondomestic well against which spacing is being measured that is senior to the date on which the application was filed.

The total annual quantity of water per well shall be the sum of all of the quantities authorized or requested by any water rights, approvals of applications, or applications requesting or authorizing that well as a point of diversion.

If the quantity of water applied for includes a fraction of an acre-foot, the quantity of water shall be rounded down to the next whole number of acre-feet for the purpose of applying the table in this subsection.

(b) In the case of a battery of wells, as defined in K.A.R. 5-1-1, the minimum horizontal distance shall be measured from the geographic center of the wells comprising the battery.

(c) A well penetrating both a confined and unconfined aquifer shall be constructed to prevent the vertical migration of water between the aquifers. A well diverting water from the Dakota aquifer system shall be constructed to prevent the vertical migration of water between the Dakota aquifer system and all other freshwater aquifers.

(d) The location of a well or wells on an application for approval to change the point of diversion under an existing water right shall be no more than 2,640 feet from the currently authorized and completed point of diversion.

(e) A well shall be exempt from the minimum well spacing requirements of this regulation if the well meets either of the following conditions:

(1) The well is being replaced within 300 feet of the currently authorized point of diversion.

(2) The proposed replacement well location improves the spacing to all other wells for which the spacing requirement was not met on the date on which the application for a change in point of diversion was filed and continues to meet requirements for spacing to all wells for which the spacing requirement was met at the time the application for change in point of diversion was filed.

(f) No application for approval to change the point of diversion under an approval of application for which the original well has not been drilled shall be approved if the location of the proposed point of diversion decreases the distance from the approved location to any other existing wells to less than the spacing requirements for a new application.

(g) Each nondomestic, nontemporary well shall be located a minimum of 1,320 feet from all domestic wells in the same or a hydraulically connected aquifer with a priority earlier than the date on which the change application was filed, unless all of the following conditions are met:

(1) The domestic well is owned by the applicant.

(2) The applicant signs a written request to waive the requirements for spacing to the domestic well.

(3) The applicant submits information documenting the location and depth of the domestic well and any other information necessary for the chief engineer to determine whether the domestic well is likely to be impaired.

(4) A Theis analysis or other hydraulic analysis shows that the domestic well is not likely to be impaired by the proposed well.

(h) The minimum horizontal distance between a nontemporary, nondomestic well withdrawing water from a confined aquifer and a well withdrawing water from an unconfined aquifer shall be 660 feet. (Authorized by K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; implementing K.S.A. 82a-706a, K.S.A. 2002 Supp. 82a-711, K.S.A. 2002 Supp. 82a-708b, and K.S.A. 2002 Supp. 82a-1028; effective Sept. 22, 2000; amended Feb. 27, 2004.)

5-23-4. High plains aquifer. (a) Except as specified in subsection (b), the district shall be closed to new appropriations of water in the high plains aquifer.

(b) This regulation shall not apply to the following:

- (1) Wells for domestic use;
- (2) wells authorized by temporary permits;
- (3) wells authorized by term permits of no more than five years;

(4) an application to appropriate 15 acre-feet of water or less if all of the following conditions are met:

(A) The area is closed to new appropriations, but the sum of the annual quantity requested by the proposed appropriation and the total quantities authorized by prior permits because of this exemption does not exceed 15 acre-feet in a circle with a radius of two miles surrounding the proposed point of diversion.

(B) Well spacing criteria have been met.

(C) Approval of the application will not authorize an additional quantity of water out of an existing well authorized by a nondomestic approval of application or water right, which would result in a total combined annual quantity of water authorized from that well in excess of 15 acre-feet.

(D) All other criteria for processing a new application have been met.

(c) Each application filed to request a well within the area described in subsection (e) shall include a driller's log, an electric log, and a laboratory analysis from a state-certified laboratory of the chloride concentrations in samples taken from whatever depths are necessary to determine the vertical location where the chloride concentrations exceed 250 milligrams per liter (mg/l). The samples shall be taken from a well located within a 300-foot radius of the proposed well. A state-certified laboratory analysis shall be used to determine the vertical location of the chloride concentrations exceeding 250 mg/l.

(d) Each well constructed in the area described in subsection (e) shall be constructed in a manner that prevents the movement of water containing 250 mg/l of chlorides beyond its naturally occurring condition.

(e) The level of chlorides may exceed 250 mg/l in the following areas:

(1) The west ½ of townships 33, 34, and 35 south, range 28 west in Meade County, Kansas;

(2) the east ½ of township 33 south, range 29 west in Meade County, Kansas;

(3) all of townships 34 and 35 south, ranges 29 and 30 west in Meade County, Kansas; and

(4) all of townships 34 and 35 south, ranges 31 and 32 west and the east ½ of townships 34 and 35 south, range 33 west in Seward County, Kansas. (Authorized by K.S.A. 82a-706a and K.S.A. 2015 Supp. 82a-1028; implementing K.S.A. 82a-706a, K.S.A. 2015 Supp. 82a-711, and K.S.A. 2015 Supp. 82a-1028; effective May 1, 1981; amended May 1, 1986; amended Aug. 28, 1989; amended Sept. 22, 2000; amended Nov. 21, 2003; amended May 13, 2016.)

5-23-4a. Criteria for closing townships to new appropriations. (a) Entire townships shall be closed to further appropriation of water for beneficial use from the high plains aquifer if at least one of the following conditions exists:

(1) The entire township is fully appropriated.

(A) A township shall be considered to be fully appropriated if the aquifer within the township would be depleted by 40 percent or more in 25 years if current vested rights and appropriations are fully exercised and all limitation clauses listed on permits to appropriate water and certificates are in force.

(B) Aquifer depletion shall be calculated using the allowable annual appropriation formula described in subsection (b) with the area of consideration equal to the number of acres within sections of land containing saturated thickness within the township.

(2) The average saturated thickness of the aquifer within the township is 50 feet or less, as set forth in K.A.R. 5-23-15.

(3) The aquifer has been depleted by 20 percent or more since 1950. Depletion since 1950 shall be determined from maps or data, or both, recommended by the board and adopted by the chief engineer by regulation.

(4) Groundwater pumping has lowered the water level of the high plains aquifer, which has diminished the baseflow from the aquifer to the

stream and impaired senior domestic surface water rights and other senior surface water rights.

(5) Groundwater pumping in an area has lowered the water level of the freshwater to the point that the issuance of additional approvals of applications will induce water in excess of 250 milligrams per liter chlorides to mix with overlying freshwater, causing contamination of the overlying freshwater.

(b) Except for the types of wells listed in subsection (c), the proposed appropriation, when added to the vested rights, prior appropriation rights, and earlier priority applications, shall not exceed, in 25 years, a calculated rate of depletion of 40 percent of the saturated thickness underlying the area of consideration. For the purpose of analysis, all vested rights, appropriation rights, approvals of applications, and prior unapproved applications shall be considered to be fully exercised, and all limitation clauses on approvals of application and certificates shall be considered to be in force. The allowable annual appropriation shall be calculated using the following formula:

$$\text{Allowable Aquifer Yield} = \frac{0.40AMS}{25} + \frac{AR}{12}$$

Allowable aquifer yield = the amount of water, measured in acre-feet, available annually for appropriation from a proposed point of diversion (well).

A = the "area of consideration" shall be equal to the number of acres within sections containing saturated thickness within the township and within the district.

M = the number of feet of average saturated thickness of the high plains aquifer within the township as set forth in K.A.R. 5-23-15.

S = the storage coefficient or a specific yield of 15 percent.

R = average annual recharge and return flow, which shall be one inch per year.

(c) The calculation specified in subsection (b) shall not include the following types of wells:

- (1) Wells for domestic use;
- (2) wells authorized by temporary permits; and
- (3) wells authorized by term permits of fewer than five years. (Authorized by K.S.A. 82a-706a and 82a-1028(o); implementing K.S.A. 82a-1028(n); effective Sept. 30, 1991; amended Sept. 22, 2000; amended Nov. 21, 2003.)

5-23-4b. (Authorized by K.S.A. 82a-706a and K.S.A. 82a-1028; implementing K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; effective Sept. 22, 2000; amended Nov. 21, 2003; revoked May 13, 2016.)

5-23-5. (Authorized by K.S.A. 1980 Supp. 82a-1028(o); implementing K.S.A. 1980 Supp. 82a-1028(n); effective May 1, 1981; revoked Nov. 21, 2003.)

5-23-6. Water-measuring devices. The diversion works for each nontemporary, nondomestic well located within the boundaries of the district shall be equipped with a water flowmeter that meets or exceeds the specifications in K.A.R. 5-1-4 through 5-1-12.

(a) The owner shall perform the following:

(1) Ensure that the water flowmeter is installed according to specifications in K.A.R. 5-1-4 through 5-1-12;

(2) maintain the water flowmeter in proper working condition whenever the diversion of water for nondomestic use can reasonably be expected to occur; and

(3) promptly initiate action to repair or replace any water flowmeter that is out of compliance, and correct any problems with the installation of a water flowmeter.

(b) The owner shall notify the district, on a form prescribed by the district, within 30 days after any of the following:

- (1) A new water flowmeter is installed.
- (2) A water flowmeter is repaired and reinstalled.
- (3) A water flowmeter is repaired without removing the water flowmeter.
- (4) An improper water flowmeter installation has been corrected.

(c) An extension of time to install a water flowmeter may be granted by the district for a reasonable period of time if just cause is shown to the district. Each appeal shall be filed with the board at least 10 days before a regularly scheduled board meeting. Just cause may include any of the following:

(1) A contract has been signed by the owner and the seller to sell or install the water flowmeter, but the seller cannot complete the sale or installation before diversion of water will take place.

(2) Weather conditions prevent the water flowmeter from being installed before the diversion of water.

(3) Legal proceedings prevent the owner from installing the water flowmeter.

(4) The supply of natural gas to power the well has been cut off by the seller of the natural gas for reasons beyond the control of the owner of the water right.

(d) A water flowmeter shall not be required to be installed if any of the following criteria is met:

(1) A well is authorized to divert 15 acre-feet or less per calendar year.

(2) Two or more wells are authorized by the same water right or approval of application with one authorized annual quantity of water for all the wells, and all of the water diverted by all of the wells is measured by a single water flowmeter prior to its application to beneficial use.

(3) The well is enrolled in a multiyear federal conservation program or the water rights conservation program pursuant to K.A.R. 5-7-4.

(4) The well is registered as inactive with the Kansas department of health and environment.

(5) An affidavit is filed by the owner with the district stating that the well is not, and will not be, operated until a water flowmeter meeting the specifications in K.A.R. 5-1-4 through 5-1-12 is properly installed. Thirty days before operating the well, the owner shall file a notice with the district indicating that a water flowmeter has been installed and indicate when the owner proposes to begin the diversion of water. (Authorized by and implementing K.S.A. 82a-1028, as amended by L. 2002, Ch. 137, § 5; effective May 1, 1981; amended May 1, 1985; amended Jan. 10, 2003.)

5-23-7 and 5-23-8. (Authorized by K.S.A. 1980 Supp. 82a-1028(o); implementing K.S.A. 1980 Supp. 82a-1028(n); effective May 1, 1981; revoked May 1, 1985.)

5-23-9. (Authorized by K.S.A. 1980 Supp. 82a-1028(o); implementing K.S.A. 1980 Supp. 82a-1028(n); effective May 1, 1981; revoked Aug. 28, 1989.)

5-23-11. Procedures for non-compliance with rules and regulations. The district, its board or manager, any eligible voter within the district, or any person residing within the district that is at least eighteen (18) years of age, may file a written complaint with the district alleging a violation of these rules and regulations, the management program, the groundwater management district act (K.S.A. 82a-1020 *et seq.*), or the water appropriation act (K.S.A. 82a-701 *et seq.*). The written complaint shall be filed at the district office.

Within thirty (30) days following the filing of the complaint, a representative of the district designated by the board shall investigate the complaint. If the representative of the district finds that a violation has existed or presently exists, the represen-

tative shall issue a written directive to the violator stating the nature of the violation and directing the violator to come into compliance with these rules and regulations.

If the violator fails to comply with the directive, the district may: (1) Seek to enjoin the violator's use of water by suitable action in district court until such time as the violator complies; or

(2) Seek the assistance of the chief engineer and the attorney general of the state of Kansas to enjoin the violator's use of water until such time as the violator complies. (Authorized by K.S.A. 1980 Supp. 82a-1028(o); implementing K.S.A. 1980 Supp. 82a-1028(n); effective May 1, 1981.)

5-23-14. Dakota aquifer system. All evaluations in the southwest Kansas groundwater management district no. 3 involving a determination of the extent of the confined and unconfined Dakota aquifer system shall use the information shown in the Kansas geological survey open file report number 98-37, released August 1998, which is hereby adopted by reference, unless the applicant or the district provides, or the chief engineer has available, better or more site-specific data concerning the extent of the confined and unconfined Dakota aquifer system. (Authorized by K.S.A. 82a-706a and K.S.A. 82a-1028(o); implementing K.S.A. 82a-709, K.S.A. 1999 Supp. 82a-711, and K.S.A. 82a-1028(n); effective Sept. 22, 2000.)

5-23-15. Saturated thickness of the high plains aquifer. All evaluations in the southwest Kansas groundwater management district no. 3 involving a determination of the saturated thickness of the high plains aquifer shall use the information shown in the Kansas geological survey open file report number 98-52, plate B, released February 1999, which is hereby adopted by reference, unless the applicant or the district provides, or the chief engineer has available, better or more site-specific data concerning the saturated thickness of the high plains aquifer. (Authorized by K.S.A. 82a-706a and K.S.A. 82a-1028(o); implementing K.S.A. 1999 Supp. 82a-711 and K.S.A. 82a-1028(n); effective Sept. 22, 2000.)

Article 24.—NORTHWEST KANSAS GROUNDWATER MANAGEMENT DISTRICT NO. 4

5-24-1. Definitions. As used in these regulations for the northwest Kansas groundwater management district no. 4, the following words

and phrases shall have the following meanings. (a) "Area of consideration" means the two-mile-radius circle whose center is the location of the proposed point of diversion. The area of consideration equals 8,042 acres minus any area of the circle that is outside the state of Kansas.

(b) "Base acreage" has the meaning specified in K.A.R. 5-5-11(a).

(c) "Battery of wells" has the meaning specified in K.A.R. 5-1-1.

(d) "Board" means the board of directors constituting the governing body of the northwest Kansas groundwater management district no. 4.

(e) "District" means the northwest Kansas groundwater management district no. 4.

(f) "Tailwater" means that portion of the applied irrigation water that becomes runoff from the authorized place of use.

(g) "Theis analysis" means the Theis non-equilibrium equation analysis described in pp. 108-113 in "ground water and wells: a reference book for the water-well industry," published by Edward E. Johnson, Inc., Saint Paul, Minnesota, in 1966. The pages specified in this subsection are hereby adopted by reference.

(h) "Usable water" means water containing not more than 10,000 milligrams per liter of total dissolved solids.

(i) "Waste of water" has the meaning specified in K.A.R. 5-1-1.

(j) "Well" means any excavation that is drilled, cored, bored, washed, driven, dug, or otherwise constructed if the intended use of the excavation is for the acquisition, diversion, or artificial recharge of groundwater. (Authorized by K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; implementing K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; effective May 1, 1983; amended May 1, 1985; amended Jan. 30, 2004.)

5-24-2. Allowable withdrawals. (a) Except as specified in subsection (b) the district shall be closed to any new appropriation of water that partially or wholly requests a source of supply that includes the Ogallala formation.

(b) The following types of applications shall not be subject to the closure of the district under this regulation:

(1) A nondomestic application for an approval of application if the proposed point of diversion meets the following criteria:

(A) Is to be located in an alluvial aquifer not closed to new appropriations, except for domestic

use, temporary permits, and term permits for five or fewer years;

(B) meets the well spacing requirements of K.A.R. 5-24-3; and

(C) meets the safe yield requirements of K.A.R. 5-3-9, K.A.R. 5-3-10, and K.A.R. 5-3-11;

(2) a nondomestic application to appropriate water from the Cretaceous system if the proposed point of diversion meets the well spacing criteria of K.A.R. 5-24-3;

(3) an application for a permit to appropriate water for domestic use;

(4) an application for a term permit for five years or less;

(5) an application for a temporary permit;

(6) an application for an approval of application filed on an existing well currently authorized by a vested right, appropriation right, or approval of application that requests a quantity of water equal to or less than the currently available quantity of water that will be conjunctively reduced from a well authorized by either a vested right or certified appropriation right meeting either of the criteria specified in paragraph (c)(1);

(7) an application for an approval of application that meets the criteria of K.A.R. 5-24-10; and

(8) an application for an additional rate of diversion only that meets the requirements of K.A.R. 5-4-5.

(c)(1) To be exempt from this regulation, each application for an approval of application filed on an existing well currently authorized by a vested right, appropriation right, or approval of application that requests a quantity of water equal to or less than the currently available quantity of water that will be conjunctively reduced from a well authorized by either a vested right or certified appropriation right shall meet either of the following criteria:

(A) Be located within 2,640 feet of the existing well that will have its authorized quantity reduced; or

(B) be located within a distance from the currently authorized well for which a Theis analysis shows a .5 foot or greater drawdown, using the following assumptions:

(i) The certified rate of diversion of the currently authorized well;

(ii) the certified annual quantity of water for the currently authorized well;

(iii) the pumping time equal to the time it takes to pump the certified annual quantity at the certified rate of diversion;

(iv) the drawdown computed at the time equal to the pumping time; and

(v) the transmissivity and storage coefficient derived either from a time drawdown aquifer pump test of the currently authorized well or from use of the well log from the currently authorized well or a well log from a test hole or well located within 300 feet of the currently authorized well, using the table on page 26 and the calculation described in the second paragraph on page 27 of the United States geological survey's water-resources investigations report 85-4198, published in 1985. The portions of this document specified in this paragraph are hereby adopted by reference.

(2)(A) For water rights authorized for irrigation use, the currently available quantity of water shall be calculated as follows:

(i) Determine the maximum number of acres actually irrigated during the perfection period. For vested rights, use the maximum number of acres irrigated in any one calendar year before June 29, 1945; and

(ii) use the 80 percent chance rainfall net irrigation requirements (NIR) for corn as specified in K.A.R. 5-5-12 to determine the NIR for each acre, and then divide that value by .85 to adjust for efficiency.

(B) For non-irrigation water rights, the currently available quantity of water shall not exceed the actual consumptive use during the perfection period.

(3) Each well that has a reduced or new water right pursuant to this subsection shall be equipped with a water flowmeter meeting the requirements of article one of the chief engineer's regulations.

(4) The maximum distance that a well shall be relocated under paragraph (c)(1)(B) shall be the distance computed as described in paragraph (c)(1)(B), or 3,960 feet, whichever is less.

(5) The historic consumptive use of a well meeting the requirements of paragraph (b)(6) that is accounted for in the Republican river compact, K.S.A. 82a-518 and amendments thereto, accounting as a stream depletion reaching the Republican river downstream of Trenton dam shall not be transferred to a well that would cause a depletion reaching the Republican river upstream of Trenton dam.

(6) The total net acreage authorized by the following shall not exceed the current net total authorized acreage for both wells:

- (A) The approval of application;
- (B) the water right being reduced; and

(C) the water right currently authorizing the well for which the new water right is sought. (Authorized by and implementing K.S.A. 82a-706a and K.S.A. 2015 Supp. 82a-1028; effective May 1, 1983; amended May 1, 1985; amended May 1, 1987; amended Aug. 19, 1991; amended Jan. 30, 2004; amended May 13, 2016.)

5-24-3. Well spacing. (a) Except as specified in subsection (b), the spacing between each proposed well and all other wells authorized to withdraw water from the same source of water supply shall be as follows:

(1) In the Ogallala aquifer and in alluvial aquifers not closed to new appropriations, the required minimum spacing for nondomestic, nontemporary wells shall be as follows:

(A) 0 to 175 acre-feet requested: a minimum spacing of 1,400 feet;

(B) 176 to 350 acre-feet requested: a minimum spacing of 2,000 feet;

(C) 351 to 575 acre-feet requested: a minimum spacing of 2,400 feet; and

(D) more than 575 acre-feet requested: a minimum spacing of 2,800 feet.

(2) If the quantity of water authorized or applied for includes a fraction of an acre-foot, the quantity of water shall be rounded off to the nearest acre-foot of water for the purpose of applying this regulation.

(3) Each nondomestic well shall be spaced a minimum of 800 feet from each domestic well constructed in the same aquifer unless the chief engineer determines that one of the following criteria is met:

(A)(i) The domestic well is owned by the applicant;

(ii) the applicant signs a written request to waive the spacing requirement to the domestic well;

(iii) the applicant submits information documenting the location and depth of the domestic well, and any other information necessary to determine whether the domestic well is likely to be impaired; and

(iv) a Theis analysis or other hydraulic analysis done by the chief engineer shows that the domestic well is not likely to be impaired by the proposed well; or

(B)(i) The owner of the domestic well signs a written request to waive the spacing requirement to the domestic well;

(ii) the applicant submits information documenting the location and depth of the domestic

well, and any other information necessary to determine whether the domestic well is likely to be impaired; and

(iii) a Theis analysis or other hydraulic analysis done by the chief engineer shows that the domestic well is not likely to be impaired by the proposed well.

(4) Each nondomestic application for additional water from an existing well already authorized by one or more water rights shall meet the minimum spacing requirements in paragraph (a)(1) for the cumulative total of all existing water rights, earlier appropriations, and the proposed appropriation for that well.

(5) For a battery of wells, the well spacing shall meet the minimum spacing in paragraph (a)(1) based on the total amount of water applied for by the battery of wells. The minimum spacing distance shall be measured from the geocenter of the proposed battery of wells.

(6) Nondomestic wells withdrawing water from a cretaceous aquifer shall be spaced a minimum of four miles from all other wells withdrawing water from a hydraulically connected cretaceous aquifer. The spacing between a nondomestic well withdrawing water from a cretaceous aquifer and a domestic well withdrawing water from the same aquifer shall be a minimum of 2,640 feet unless one of the following criteria is met:

(A)(i) The domestic well is owned by the applicant;

(ii) the applicant signs a written request to waive the spacing requirement to the domestic well;

(iii) the applicant submits information documenting the location and depth of the domestic well, and any other information necessary to determine whether the domestic well is likely to be impaired; and

(iv) a Theis analysis or other hydraulic analysis by the chief engineer shows that the domestic well is not likely to be impaired by the proposed well; or

(B)(i) The owner of the domestic well signs a written request to reduce the spacing requirement to the domestic well;

(ii) the applicant submits information documenting the location and depth of the domestic well, and any other information necessary to determine whether the domestic well is likely to be impaired; and

(iii) a Theis analysis or other hydraulic analysis done by the chief engineer shows that the domestic well is not likely to be impaired by the proposed well.

(b) The well spacing requirements of subsection (a) shall not apply to the following:

(1) Spacing to a standby well;

(2) spacing to another well if either of the following conditions is met:

(A)(i) The other well is owned by the applicant;

(ii) the owner of the other well signs a written request to reduce the spacing requirement to the other well;

(iii) the applicant submits information documenting the location and depth of the other well, and any other information necessary to determine whether the other well is likely to be impaired by the proposed well; and

(iv) a Theis analysis or other hydraulic analysis done by the chief engineer shows that the proposed well is not likely to impair the other well; or

(B)(i) The owner of the other well files a written request to waive the spacing requirement to the proposed well;

(ii) the applicant submits information documenting the location and depth of the other well, and any other information necessary to determine whether the other well is likely to be impaired by the proposed well; and

(iii) a Theis analysis or other hydraulic analysis done by the chief engineer shows that the proposed well is not likely to impair the other well;

(3) a replacement well that meets one of the following criteria:

(A) The well is being replaced within 300 feet of the currently authorized location; or

(B) both of the following conditions are met:

(i) The proposed replacement well location increases the spacing to all other wells for which the spacing requirement was not met on the date the application for a change in point of diversion was filed; and

(ii) the proposed replacement well location continues to meet the requirements for spacing to all wells for which the well spacing requirement was met at the time the application for change in point of diversion was filed; and

(4) an additional well if the original well and the additional well are owned by the same owner or owners. (Authorized by K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; implementing K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; effective May 1, 1983; amended Jan. 30, 2004.)

5-24-4. Tailwater control and waste. No person shall commit or allow a waste of water as defined in K.A.R. 5-1-1. Runoff from precipitation shall not be considered a waste of water.

(Authorized by K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; implementing K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; effective May 1, 1983; amended Jan. 30, 2004.)

5-24-5. Allowable appropriation—reasonable use. (a) The maximum reasonable annual quantity of water for irrigation use shall not exceed the standards adopted in K.A.R. 5-3-19, K.A.R. 5-3-20, K.A.R. 5-3-21, K.A.R. 5-3-23, and K.A.R. 5-3-24.

(b) The annual quantity of water deemed reasonable on an application for municipal use shall be determined using the following criteria:

(1) The annual quantity of water needed for residential use shall be based on a population projection for the ensuing 20 years. The projected population shall be determined by extending present population for 20 years at one and one-half percent per year increase.

(2) The total quantity of water reasonable for the residential population shall then be determined by the following:

(A) Multiplying the projected population by the current per capita use; and

(B) adding a reasonable quantity of water for the present and projected industrial use for the ensuing 20-year-period.

(3) Municipalities may purchase, condemn, or otherwise acquire existing water rights in excess of the quantities set forth in paragraphs (b) (1) and (2) and apply to the chief engineer to change a reasonable quantity of the acquired water rights for municipal use, which shall not exceed 200 percent of the quantity considered reasonable pursuant to paragraphs (b)(1) and (2).

(c) The quantities of water deemed to be reasonable for livestock and poultry shall be determined pursuant to K.A.R. 5-3-22.

(d) All applications for any other type of beneficial use shall be reviewed to determine if the annual quantity of water and rate of diversion requested are reasonable for the intended use based on the best information available. (Authorized by K.S.A. 82a-1028, as amended by L. 2002, Ch. 137, § 5, and K.S.A. 82a-706a; implementing K.S.A. 82a-1028, as amended by L. 2002, Ch. 137, § 5; effective May 1, 1983; amended Aug. 19, 1991; amended Jan. 10, 2003.)

5-24-6. Changes in points of diversion. (a) Each replacement well shall meet all of the criteria in either of the following paragraphs:

(1)(A) Be located within 2,640 feet of the currently approved well location; and

(B) meet the well spacing criteria of K.A.R. 5-24-3; or

(2)(A) Be located within a distance from the currently authorized well for which a Theis analysis shows a .5 foot or greater drawdown, using the following assumptions:

(i) The certified rate of diversion of the currently authorized well;

(ii) the certified annual quantity of water for the currently authorized well;

(iii) the pumping time equal to the time it takes to pump the certified annual quantity at the certified rate of diversion;

(iv) the drawdown computed at the time equal to the pumping time;

(v) the transmissivity and storage coefficient derived either from a time drawdown aquifer pump test of the currently authorized well or from use of the well log from the currently authorized well or a well log from a test hole or well located within 300 feet of the currently authorized well, using the procedure specified in K.A.R. 5-24-2(c)(1)(B)(v); and

(B) meet the well spacing criteria of K.A.R. 5-24-3.

(b) The maximum distance that a well may be relocated under paragraph (a)(2) shall be the distance computed as specified in paragraph (a) (2), or 3,960 feet, whichever is less. If the historic consumptive use of the well being replaced is accounted for in the Republican river compact, K.S.A. 82a-518 and amendments thereto, accounting as a stream depletion reaching the Republican river downstream of Trenton dam, that consumptive use shall not be transferred to a well that would cause a depletion reaching the Republican river upstream of Trenton dam.

(c) No change in a point of diversion application that proposes to change the authorized point of diversion from one well to a battery of wells shall be approved unless at least one of the following conditions has been met:

(1) Water is available for appropriation pursuant to K.A.R. 5-24-2 at the geocenter of the proposed battery of wells or would be available if the current water right were dismissed.

(2) The proposed battery of wells meets the requirements of K.A.R. 5-2-3. (Authorized by K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; implementing K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; effective May 1, 1983; amended May 1, 1987; amended Jan. 30, 2004.)

5-24-7. Well construction criteria. (a) Each nondomestic well that is not subject to regulation under the Kansas chemigation safety law, K.S.A. 2-3301 et seq., and amendments thereto, and that is completed after May 1, 1983 shall include the installation of a check valve that meets or exceeds specifications adopted by the chief engineer which were in effect at the time the well was completed.

(b) All wells, including domestic wells, to be completed in a cretaceous aquifer shall be constructed in a manner that prevents the cretaceous aquifer from mixing with all quaternary, tertiary, and any other cretaceous water-bearing strata that have no natural hydraulic connection between the formation or formations in which the well will be screened. (Authorized by and implementing K.S.A. 82a-1028; effective May 1, 1983; amended Jan. 10, 2003.)

5-24-8. Resource development plans. (a) A resource development plan may be required by the district to be submitted for any of the following:

(1) A new application to appropriate water for irrigation use;

(2) a nonemergency application to change the place of use or the use made of water from irrigation to another type of use that involves an actual physical change in operation; or

(3) a new application to appropriate water for nonirrigation purposes if one of the following criteria is met:

(A) The quantity of water requested is likely to be unreasonable.

(B) The proposed beneficial use is likely to be inefficient.

(C) The proposed operation is likely to result in a waste of water.

(D) The owner or operator has a recent, documented history of noncompliance with the provisions of the Kansas water appropriation act or regulations adopted pursuant to the act.

(b) Each resource development plan shall include a description of the proposed operation, including the diversion works, the distribution system, and all other matters necessary to determine whether the proposed annual quantity of water is likely to be reasonable and not wasteful.

(c)(1) The applicant shall be notified by the district whenever an applicant is required to submit a resource development plan. This notification shall include the deadline for submitting the

plan. The district shall then review the plan and submit it to the chief engineer with one of the following recommendations:

(A) The application should be approved because the proposed plan meets the regulatory requirements, and those portions of the plan consistent with the conservation plan guidelines adopted by the Kansas water office should be required as a conservation plan as a condition of the approval of application.

(B) The application should be approved if certain changes are made to the plan, and the amended plan should be required as a condition of the approval of application insofar as it is consistent with the water conservation planning guidelines adopted by the Kansas water office.

(C) The plan does not meet the regulatory requirements, and the application should not be approved.

(2) Each water conservation plan required by the chief engineer shall be made a condition of the approval of application. The required water conservation plan shall be fully implemented before diversion of water occurs pursuant to that approval of application. After the plan is implemented, the owner shall maintain the plan in a satisfactory manner.

(d) In addition to meeting the requirements specified in subsection (b), for irrigation use, the resource development plan shall meet the following requirements:

(1) Include irrigation system design, tailwater control methods, well yield, and cropping patterns; and

(2) comply with design criteria meeting the following requirements:

(A) Are set forth in the national engineering handbook (NEH), part 652, irrigation guide, dated November 13, 1997, as amended through the Kansas state supplement dated May 8, 2003, which is hereby adopted by reference; and

(B) are consistent with the "irrigation water conservation program for the state of Kansas," published by the Kansas water office in November 1993 and hereby adopted by reference.

(e) For municipal use, the plan shall comply with the "Kansas 1990 municipal water conservation plan guidelines," second edition, which is published by the Kansas water office and hereby adopted by reference.

(f) In addition to meeting the requirements specified in subsection (b), for all other types of beneficial use, the resource development plan

shall include a description of the proposed use of water in sufficient detail to determine if the proposed use is reasonable and not wasteful. (Authorized by K.S.A. 2002 Supp. 82a-1028 and K.S.A. 82a-706a; implementing K.S.A. 2002 Supp. 82a-1028; effective Jan. 10, 2003; amended Jan. 30, 2004.)

5-24-9. Water flowmeters. (a) Each of the following types of wells shall be equipped with a water flowmeter meeting the water flowmeter and installation specifications in K.A.R. 5-1-4 through K.A.R. 5-1-12 at the time the well is permitted:

(1) Any nondomestic, nontemporary well permitted or drilled after May 1, 1980;

(2) any nondomestic, nontemporary well actually drilled after May 1, 1980 pursuant to an approval of an application for a change in point of diversion; and

(3) any well reduced in annual quantity of water authorized in order to allow approval of another application pursuant to K.A.R. 5-24-2.

(b) In addition to meeting the requirements of this regulation, each owner shall meet the requirements specified in K.A.R. 5-3-5e. (Authorized by K.S.A. 82a-1028, as amended by L. 2002, Ch. 137, § 5, and K.S.A. 82a-706a; implementing K.S.A. 82a-1028, as amended by L. 2002, Ch. 137, § 5, and K.S.A. 2001 Supp. 82a-1903, as amended by L. 2002, Ch. 137, § 7; effective Jan. 10, 2003.)

5-24-10. Exemptions for up to 15 acre-feet of groundwater. (a) In any area of the district that is subject to safe yield criteria and is not closed by specific regulation or intensive groundwater use control area order by the chief engineer to new nondomestic, nontemporary permits and term permits for five or fewer years, each application to appropriate groundwater shall be exempt from meeting the safe yield criteria if all the following conditions are met:

(1) The maximum annual quantity of water proposed in the application is 15 acre-feet or less.

(2) The well spacing criteria of K.A.R. 5-24-3 have been met.

(3) An existing water right from the same source of water supply that has a point of diversion located within two miles of the proposed point of diversion has its authorized annual quantity reduced as described in subsection (b).

(4) All issues relating to the possible abandonment of the offsetting water right are resolved by the chief engineer before determining the annual

quantity of offset water that is available from the existing water right.

(5) The approval of the application does not authorize an additional quantity of water out of an existing authorized well with a nondomestic permit or water right that would result in a total combined annual quantity of water authorized from that well in excess of 15 acre-feet.

(6) The approval of the application does not authorize an additional quantity of water to be used on a currently authorized nondomestic place of use.

(b) If the water right to be used as the offset for the new appropriation is a water right authorized for irrigation use, the authorized quantity of water needed to offset the new appropriation of not more than 15 acre-feet of water shall be calculated as follows:

(1) Step one.

(A) Multiply the net irrigation requirement for the 50 percent chance rainfall for the county of origin, as specified in K.A.R. 5-5-12, times the maximum number of acres legally irrigated in any one calendar year during the perfection period. For vested rights, the acreage used shall be the maximum acreage legally irrigated in any one calendar year before June 28, 1945.

(B) The calculation made in paragraph (b)(1)(A) shall result in the maximum annual quantity of water that could be changed to another type of beneficial use if the entire water right were changed pursuant to K.A.R. 5-5-9(a)(1).

(2) Step two.

(A) Divide the annual quantity of water desired to be changed to the new beneficial use by the maximum annual quantity of water that could be changed if the entire water right were changed to the new use.

(B) The calculation made in paragraph (b)(2)(A) shall result in the percentage of the entire reduced water right that will be changed to the new use. The remaining percentage of the current water right may be retained by the irrigation water right owner.

(3) Step three.

(A) Multiply the remaining percentage calculated in paragraph (b)(2)(B) times the total currently authorized quantity. The resulting product shall be the annual quantity of water that can be retained by the irrigation water right owner.

(B) The portion of the authorized annual quantity of water not retained by the irrigator as described in paragraph (b)(3)(A) shall be perma-

nently reduced from the authorized annual quantity of the offsetting water right and used to offset the new appropriation.

(c) If the water right to be used as the offset for the new appropriation is an existing water right authorized for nonirrigation use, the total net consumptive use of the offsetting water right after the change and the new appropriation shall not exceed the net consumptive use of the offsetting water right before the change.

(d) The place of use authorized by the offsetting water right shall be reduced in proportion to the reduction in the maximum annual quantity of water as determined in paragraph (b)(1)(B). If the owner of the irrigation water right desires to retain more authorized acres, the directions specified in K.A.R. 5-5-11(b)(2)(B)(ii) shall be followed to determine whether the irrigator may retain more acres in the authorized place of use.

(e) After the use of not more than 15 acre-feet has been approved pursuant to this regulation, no application for change for that water right shall be approved for any quantity of water that would authorize the water to be diverted from a currently authorized point of diversion or to be used on a currently authorized place of use. (Authorized by K.S.A. 82a-706a and K.S.A. 2005 Supp. 82a-1028; implementing K.S.A. 2005 Supp. 82a-1028; effective Jan. 10, 2003; amended Dec. 8, 2006.)

5-24-11. Investigation and enforcement.

The procedure set forth in this regulation shall be followed whenever enforcement action is taken by the district after it becomes aware that a person could be violating any of the regulations adopted by the chief engineer that relate to conservation and management of groundwater within the district.

(a) If a violation is discovered by the district's staff, the enforcement procedure shall begin with the step specified in subsection (c). In all other cases, a complaint may be filed with the district either verbally or in writing. The complaint shall describe and specify the following:

- (1) The nature of the alleged violation;
- (2) the location of the alleged violation;
- (3) the name of the complainant;
- (4) the mailing address of the complainant; and
- (5) any other information necessary for the staff to understand the alleged violation and assist the staff in investigating the complaint.

(b) Before the staff makes any field investigation of the complaint, the staff shall make at least

one attempt to contact an owner, operator, or other responsible representative of the water right or approval of application to notify the individual that a field investigation will be made.

(c) The district's staff shall make an investigation under either of the following circumstances:

(1) A complaint has been filed with the district, and the requirement specified in subsection (b) has been met.

(2) The district's staff discovers a violation of any regulation adopted by the chief engineer relating to conservation and management of groundwater within the district.

(d) A written report of the investigation shall be prepared by the staff. This report shall include any documents relied on or prepared by the staff in investigating the complaint or internally discovered violation. The report shall become a part of the official district record concerning the investigation. If a water right or an approval of application is involved, the report shall be made a part of that file.

(e) If the investigation shows that no violation has occurred or that enforcement action is not warranted, a copy of the report shall be sent to the complainant, if the investigation was prompted by a complaint, and the water right owner. A copy shall be retained in the district office. No further enforcement action shall be taken by the district at that time.

(f)(1) If the investigation determines or confirms that a violation has occurred, the report shall contain an order issued by the district staff, which shall be sent by restricted mail to the water right owner as shown in the district records and to any other person who is known by the district to have been committing the violation. The order shall specify and include the following:

(A) A description of the violation, including the specific regulations that are being violated;

(B) the actions necessary to correct the violation;

(C) a reasonable time frame to correct the violation;

(D) a statement that extensions of time to correct any violation may be granted by the staff if good cause is shown by the water right owner or other responsible party;

(E) a statement that the order is effective immediately;

(F) a statement that if the violation is corrected within the time specified by the order, the violator is required to notify the district, and an inspection will be conducted by the staff to determine if the violation has ceased;

(G) a statement that if any party desires to appeal an order issued by the staff, an appeal to the board is required to be requested within 15 days of the issuance of the order by a water right owner or violator;

(H) a statement that the request for an appeal may also request a stay of the order. If the request or demonstrates good cause for a stay, a stay of the order may be granted by the staff or the board; and

(I) a statement that any subsequent violations of the same nature will be handled as a continuation of the current violation, not a new violation.

(2) A copy of the report shall be sent to the complainant.

(g) If the violation is corrected within the time frame specified by the order, the violator shall notify the district, and an inspection shall be conducted by the staff to determine if the violation has ceased. If the staff investigation determines that the violation has been corrected within the time frame specified by the order and in accordance with the district order, the enforcement activity by the district shall cease.

(h) If the violation has not been corrected within the time frame specified in the order and in the manner specified in the order, one or more of the following actions may be taken by the board:

(1) Seeking an injunction to stop the violation;

(2) requesting enforcement assistance from the chief engineer; or

(3) requesting enforcement assistance from the attorney general. (Authorized by K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; implementing K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; effective Jan. 30, 2004.)

Article 25.—BIG BEND GROUNDWATER MANAGEMENT DISTRICT NO. 5

5-25-1. Definitions. As used in these regulations for the Big Bend groundwater management district no. 5, unless the context clearly requires otherwise, the following words and phrases shall have the meaning ascribed to them in this regulation:

(a) “Aquifer” means a geologic formation capable of yielding water in a quantity sufficient to supply water to a spring or pumping well.

(b) “Baseflow” means groundwater that seeps, flows, or is otherwise naturally discharged from an aquifer into a stream.

(c) “Baseflow node” means an artificial point located in the channel of a stream for the purpose of allocating a proportional amount of the baseflow

to be considered when evaluating a new application to appropriate water from a proposed point of diversion located within two miles of the node.

(d) “Baseflow node allocation” means the annual quantity of water assigned to a baseflow node expressed in acre-feet per year. The baseflow node allocation shall be based on the natural discharge to a stream, which shall be the rate of flow in the stream that is equaled or exceeded 90 percent of the time.

(e) “Bedrock aquifer” means any consolidated material and unconsolidated material that is older than the Dakota formation of the Dakota aquifer system, as defined in K.A.R. 5-1-1, and that will yield water in a quantity sufficient to supply a spring or a pumping well.

(f) “Board” means the board of directors constituting the governing body of the Big Bend groundwater management district no. 5.

(g) “Dakota aquifer” means that portion of the Cretaceous Dakota formation that is capable of yielding water in a quantity sufficient to supply water to a spring or pumping well.

(h) “District” means the Big Bend groundwater management district no. 5.

(i) “Neat cement” means one 94-pound bag of Portland cement mixed with five to six gallons of clean water.

(j) “Portland cement” means class A, type I cement.

(k) “Stream” means any watercourse, or part of a watercourse, with a well-defined bed and banks that flows continuously during the calendar year, except during a drought.

(l) “Sustainable yield” means the long-term yield of the source of supply, including hydraulically connected surface water or groundwater, allowing for the reasonable raising and lowering of the water table.

(m) “Well” means any excavation that is drilled, cored, bored, washed, driven, dug, or otherwise constructed, either by nature or by man, when the proposed use of the excavation is for the acquisition, diversion, or artificial recharge of groundwater. (Authorized by K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; implementing K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; effective May 1, 1980; amended May 1, 1987; amended April 19, 1996; amended Oct. 31, 2003.)

5-25-2. Well spacing. (a) With the exception of those wells described in subsection (b), the minimum spacing of all wells described in an ap-

plication to appropriate water for beneficial use, other than those wells for domestic use, shall be 1,320 feet from the following:

(1) All other non-domestic wells and proposed non-domestic wells that carry an earlier priority; and

(2) baseflow nodes.

Non-domestic wells shall be 660 feet from all existing domestic wells, except those domestic wells owned by the applicant.

(b)(1) Each replacement well drilled within 300 feet of the originally authorized point of diversion shall be exempt from the well spacing requirement of subsection (a).

(2) Each non-domestic well that proposes the withdrawal of groundwater from the Dakota aquifer or any bedrock aquifer shall be one mile from all other wells withdrawing groundwater from the same formation, including domestic wells, except those domestic wells owned by the applicant.

(3) Each new well that enables the establishment of augmentation in the Rattlesnake creek subbasin pursuant to K.S.A. 82a-706b, and amendments thereto, in relation to other wells that enable or provide augmentation shall be exempt from the well spacing requirement of subsection (a). (Authorized by K.S.A. 82a-706a and K.S.A. 2018 Supp. 82a-1028; implementing K.S.A. 82a-706a and K.S.A. 2018 Supp. 82a-1028; effective May 1, 1980; amended April 19, 1996; amended Oct. 31, 2003; amended Nov. 15, 2019.)

5-25-2a. Change in point of diversion.

(a) The location of a well requested in an application to change a point of diversion shall be no more than 2,640 feet from the point of diversion currently authorized by a vested right, appropriation right, or an application to appropriate water for beneficial use. This well shall also meet the minimum spacing requirement established in K.A.R. 5-25-2. If the point of diversion was not completed at the currently authorized point of diversion, the location of a well requested in an application to change the point of diversion shall be no more than 2,640 feet from the last authorized point of diversion for which the diversion works were completed.

(b) If the current authorization for a well requires one or more observation wells to be installed in accordance with K.A.R. 5-25-10, then the approval of an application for a change in the point of diversion shall also require the installation of one or more new observation wells in

accordance with K.A.R. 5-25-10 if either of the following conditions exists:

(1) The well is proposed to be located 300 feet or more from the currently authorized well location.

(2) The well is proposed to be located more than 50 feet and less than 300 feet from the currently authorized well location, and the water quality analysis required pursuant to K.A.R. 5-25-10 shows that the chloride concentration exceeds 500 milligrams per liter (mg/l) at the currently authorized well location.

(c) The number and location of test holes or observation wells required for the approval of an application to change the point of diversion from a single well to a battery pursuant to subsection (b) shall be based on the locations and the number of wells in the proposed battery. Hydrologic factors, including groundwater flow direction, lithology, and chlorides at the location, shall be considered.

(d) An approval of an application to change the point of diversion shall not authorize the proposed well to be completed in an aquifer other than the aquifer or aquifers in which the currently authorized well was authorized to be completed. (Authorized by K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; implementing K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; effective Oct. 31, 2003.)

5-25-3. Reasonable appropriation.

(a) An application for a permit to appropriate water for irrigation use shall not be recommended by the board for approval for a quantity in excess of those quantities specified in K.A.R. 5-3-19.

(b) For livestock and poultry, the maximum annual quantity of water shall be limited to those quantities specified in K.A.R. 5-3-22.

(c) For all uses of water, the quantity of water requested shall be reasonable for the proposed beneficial use, and the approval shall neither impair an existing right nor prejudicially and unreasonably affect the public interest. (Authorized by K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; implementing K.S.A. 82a-706, K.S.A. 82a-706a, K.S.A. 2002 Supp. 82a-711, and K.S.A. 2002 Supp. 82a-1028; effective May 1, 1980; amended April 19, 1996; amended Oct. 31, 2003.)

5-25-4. Sustainable yield.

(a) Except as specified in subsections (b) and (c), the entire district shall be closed to further new surface water and groundwater appropriations.

(b) The following types of applications shall be exempt from the closure of the district to new appropriations of water described in subsection (a):

- (1) Domestic use;
- (2) temporary permits;
- (3) applications for a change in the point of diversion for which the diversion works have been completed under the original approved application;
- (4) standby wells used for emergency purposes only;
- (5) permits to appropriate 15 acre-feet of water or less per year that are exempt pursuant to K.A.R. 5-25-15;
- (6) term permit applications of one year or less and those term applications meeting the requirements of K.A.R. 5-25-13;
- (7) permits to appropriate water from a bedrock aquifer;
- (8) permits to appropriate water from the Dakota aquifer if the applicant can show either of the following:
 - (A) No Pleistocene aquifer exists within 5,280 feet of the proposed well location; or
 - (B) there is a significant difference in hydraulic head between the Pleistocene aquifer and the Dakota aquifer;
- (9) an application that proposes to use water in a manner so that there is no significant consumptive use of the local source of supply either in quantity or availability of water for use by other appropriators;
- (10) any application that will enable or provide augmentation in the Rattlesnake creek subbasin pursuant to K.S.A. 82a-706b and amendments thereto, except that no application shall be approved if the application would impair an existing use. The proposed well location shall meet the spacing requirements of K.A.R. 5-25-2; and
- (11) any application filed pursuant to K.A.R. 5-25-22.

(c)(1) For each application for a change in the point of diversion, if the diversion works have not been completed, the application shall be exempt from the closure to new appropriations specified in subsection (a). However, the proposed appropriation, when added to the vested rights, prior appropriation rights, earlier priority applications, term permits for more than a year, and all baseflow node allocations within a two-mile-radius circle whose center is the location of the proposed well, shall not exceed 1,500 acre-feet. It shall be assumed for purposes of analysis that all prior applications, permits, certificates, and

vested rights are being fully exercised and that all limitation clauses listed on permits and certificates are in force.

(2) If part of the area within the two-mile-radius circle around the proposed well location is outside the district boundaries, the 1,500 acre-feet quantity of water specified in paragraph (c)(1) shall be reduced proportionately by the percentage of the circle lying outside of the district boundaries. Only the baseflow node allocations, vested rights, prior appropriations, earlier priority applications, and term permits for more than one year assigned to wells within the portion of the circle within the district shall be considered.

(3) If all of the wells authorized under a vested right or an application are not included inside the circumference of the circle, then a reasonable quantity shall be allocated to each well based upon the best available information.

(4) Each analysis for an application for a change in the point of diversion specified in subsection (c) shall include all applications with a priority earlier than the priority established by the filing of the application for change. (Authorized by K.S.A. 82a-706a and K.S.A. 2018 Supp. 82a-1028; implementing K.S.A. 82a-706, K.S.A. 82a-706a, K.S.A. 2018 Supp. 82a-708b, and K.S.A. 2018 Supp. 82a-1028; effective May 1, 1980; amended May 1, 1981; amended, T-86-4, March 22, 1985; amended May 1, 1986; amended May 1, 1987; amended May 1, 1988; amended April 19, 1996; amended March 16, 2001; amended Oct. 31, 2003; amended Nov. 15, 2019.)

5-25-5. Water flowmeter requirements.

Each non-domestic well, except any well authorized by a temporary permit, shall be equipped with a water flowmeter. Each water flowmeter required by the board shall meet or exceed the specifications in K.A.R. 5-1-4 through 5-1-12. (Authorized by and implementing K.S.A. 82a-706a and K.S.A. 2009 Supp. 82a-1028; effective May 1, 1980; amended May 1, 1985; amended April 19, 1996; amended Oct. 31, 2003; amended Nov. 19, 2010.)

5-25-6. Reporting water use. Each water right owner shall report to the board the readings of water meters, gauges and other measuring devices at such times as may be required by the board. (Authorized by K.S.A. 82a-706a and K.S.A. 82a-1028(o); implementing K.S.A. 82a-1028(l); effective May 1, 1980; amended April 19, 1996.)

5-25-7. Water quality tests. Each water right owner shall take water samples from the owner's wells and have water quality analyses made on those samples at the owner's expense at times specified by the board. A laboratory licensed by the Kansas department of health and environment shall conduct the water quality analyses. The type of water quality analyses conducted shall be specified by the board. The owner shall submit the results of the water quality analyses to the board. (Authorized by K.S.A. 82a-706a and K.S.A. 82a-1028(o); implementing K.S.A. 82a-1028(k); effective May 1, 1980; amended April 19, 1996.)

5-25-8. Waste of water. A person shall not commit or allow a waste of water as defined in K.A.R. 5-1-1. (Authorized by K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; implementing K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; effective May 1, 1980; amended April 19, 1996; amended Oct. 31, 2003.)

5-25-9. Procedures for non-compliance with rules and regulations. (a) The district's board or manager, any eligible voter or any person 18 years or older residing within the district may file a written complaint with the district alleging a violation of these rules and regulations, the management program, the groundwater management district act or the Kansas water appropriation act, as amended. The written complaint shall be filed at the district office.

(b) Within 30 days following the filing of the complaint, a representative of the district designated by the board shall investigate the complaint. If the representative of the district finds that a violation exists or did exist, the representative shall issue a written directive to the violator to come into compliance with the applicable rules and regulations, management program and laws, within a reasonable period of time.

(c) If the violator fails to comply with the directive of the representative within a reasonable period of time as determined by the board, the district may:

(1) seek to enjoin the violator's use of water by suitable action in district court until such time as the violator complies;

(2) seek the assistance of the chief engineer and attorney general of the state of Kansas to enjoin the violator's use of water until such time as the violator complies; or

(3) pursue other courses of action in the public interest. (Authorized by K.S.A. 82a-706a and K.S.A. 82a-1028(o); implementing K.S.A. 82a-1028(n); effective May 1, 1980; amended May 1, 1981; amended April 19, 1996.)

5-25-10. Test holes and water quality analyses. (a) Except for those types of applications described in K.A.R. 5-25-4(b), each applicant proposing to divert groundwater for non-domestic use within the district shall drill a test hole that shall meet the following requirements:

(1) Be drilled within 20 feet of the proposed well to the bottom of the aquifer;

(2) be completed as an observation well according to the following specifications:

(A) A casing made of schedule 80 PVC with a minimum outside diameter of three inches shall be used;

(B) five feet of well screen shall be installed at the base of the usable aquifer;

(C) the annular space shall be grouted with neat cement from the top of the well screen to the land surface; and

(D) centralizers shall be placed on the casing at intervals of not greater than 40 feet starting at the bottom of the casing; and

(3) be drilled under the supervision of the district.

(b) Each applicant shall have a water sample taken from within five feet of the bottom of the aquifer and shall have the water sample analyzed for chloride content by a laboratory certified by the Kansas department of health and environment. The applicant shall furnish the results of the water quality analysis and a copy of the test hole log to the district.

(c) If the analysis of the water sample taken within five feet of the bottom of the aquifer indicates that the chloride content exceeds 500 milligrams per liter (mg/l), the application to appropriate water shall be recommended for denial by the district unless both of the following conditions are met:

(1) The applicant shows that approval of the application will not cause an unreasonable deterioration of the water quality nor prejudicially and unreasonably affect the public interest.

(2) The applicant desires to proceed and is willing, at the applicant's expense, to drill and complete at least two additional observation wells at locations to be determined by the district based on the lithology and the construction of the proposed well. Both of these two additional observation

wells shall be constructed according to specifications adopted by the district and in the presence of a representative of the district. The two additional observation wells shall be constructed and screened above the saltwater and freshwater interface at a depth specified by the district. If the proposed point of diversion is to be a well battery, the number and location of the test holes and observation wells required shall be determined by the district based on the best hydrogeologic information available, including groundwater flow direction, lithology, and chloride levels.

(d) If at any time the chloride concentration in either of the latter two observation wells exceeds 500 mg/l, the owner shall reduce the instantaneous rate of pumping or the annual quantity pumped, or both, as necessary to reduce the chloride concentration in both observation wells to below 500 mg/l.

(e) The permit shall be dismissed and the owner shall properly plug the well at the owner's expense if either of the following occurs:

(1) Within one year after the chloride concentrations exceed 500 mg/l in either of the two observation wells, the chloride concentrations are not reduced below 500 mg/l.

(2) Operation of the well causes impairment of any other water right, including a domestic water right. (Authorized by K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; implementing K.S.A. 82a-706a, and K.S.A. 2002 Supp. 82a-1028; effective May 1, 1983; amended April 19, 1996; amended Oct. 31, 2003.)

5-25-11. Determination of well locations.

If a question arises as to where a well is located, the burden of proof shall remain upon the applicant to show the actual location of the well in question. (Authorized by K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; implementing K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; effective May 1, 1983; amended Oct. 31, 2003.)

5-25-12. Approval of application for additional rate only. Each application for a permit to appropriate water for beneficial use that requests only an increase in the authorized rate of diversion, and no net increase in maximum annual quantity, from a specific point of diversion already authorized by another water right or approval of application shall be exempt from meeting the requirements of K.A.R. 5-25-4 if the application meets the requirements of K.A.R. 5-4-5.

(Authorized by K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; implementing K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; effective Oct. 31, 2003.)

5-25-13. Term permits. The approval of an application, or an extension of a term permit, for more than one year may be granted only if one of the following conditions is met:

(a) The term permit authorizes the use of contaminated water. For the purpose of this regulation, water containing chlorides in excess of 1,000 milligrams per liter (mg/l) shall be considered to be contaminated. For other types of contamination, the level of contamination at which an application may be approved in accordance with this regulation shall be based on the best information available.

(b) The term permit authorizes the use of water for aquifer remediation.

(c) The term permit authorizes hydraulic dredging.

(d) The applicant demonstrates that approval of an extension of the expiration date of a term permit for more than one year will neither impair a use under an existing water right or approval of application nor prejudicially and unreasonably affect the public interest. (Authorized by K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; implementing K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; effective Oct. 31, 2003.)

5-25-14. Battery of wells. (a) An application for a change in point of diversion to convert one well to a battery of wells, as defined in K.A.R. 5-1-1, shall not be considered for approval unless all of the criteria in paragraph (a)(1), (2), or (3) below are met:

(1)(A) The proposed battery of wells meets the definition of a battery of wells as defined in K.A.R. 5-1-1.

(B) The time to construct the diversion works has not expired.

(C) The proposed rate of diversion does not exceed the currently authorized rate of diversion.

(2)(A) The proposed battery of wells meets the definition of a battery of wells as defined in K.A.R. 5-1-1.

(B) Water is available for appropriation at the geocenter of the proposed well battery based on the criteria set forth in K.A.R. 5-25-4(c).

(C) The proposed rate of diversion does not exceed the currently authorized rate of diversion.

(3)(A) The proposed battery of wells meets the definition of a battery of wells as defined in K.A.R. 5-1-1.

(B) A certificate of appropriation has been issued pursuant to K.S.A. 82a-714 and amendments thereto.

(C) The maximum instantaneous rate of diversion approved shall be either of the following:

(i) The maximum instantaneous rate of diversion under normal operating conditions actually used during any of the three consecutive calendar years before the date of the application for change; or

(ii) the tested rate of diversion achieved under actual operating conditions made by a tester approved by the chief engineer. The test of the rate of diversion shall be made within six months either before or after the change application is filed.

(D) The proposed rate of diversion does not exceed the currently authorized rate of diversion.

(b) In addition to meeting the requirements specified in subsection (a), the applicant shall also demonstrate that approval of the battery of wells will not impair existing water rights or approvals of applications and will not prejudicially and unreasonably affect the public interest.

(c) Each permit shall also be conditioned by the chief engineer so that the permit is subject to K.A.R. 5-25-2a (b) and (c). (Authorized by K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; implementing K.S.A. 82a-706, K.S.A. 82a-706a, K.S.A. 2002 Supp. 82a-706b, and K.S.A. 2002 Supp. 82a-1028; effective Oct. 31, 2003.)

5-25-15. Exemptions for up to 15 acre-feet of groundwater. Except as specified in subsections (b) and (c), an application to appropriate groundwater for up to 15 acre-feet of water shall be approved if all of the conditions in subsection (a) are met.

(a) (1) The sum of the annual quantity of water requested by the new application and the total annual quantities authorized by prior approvals of applications because of an exemption pursuant to this regulation does not exceed 15 acre-feet in a one-mile-radius circle surrounding the proposed point of diversion.

(2) The application meets the spacing criteria set forth in K.A.R. 5-25-2.

(3) The approval of an application will not authorize an additional quantity of water from an existing non-domestic vested right, permit, or water right that would result in a total combined annual

quantity of water authorized from the point of diversion in excess of 15 acre-feet.

(4) The applicant demonstrates that approval of up to 15 acre-feet of water will not impair existing water rights or permits to appropriate water for beneficial use and will not prejudicially and unreasonably affect the public interest.

(5) All requirements of K.S.A. 82a-709 and K.S.A. 82a-711, and amendments thereto, and K.A.R. 5-3-1 and K.A.R. 5-3-1b for processing a new application to appropriate water have been met.

(b) Exemptions to approve a new application to appropriate water in accordance with this regulation shall not be approved if the exemption would conflict with any provisions of an intensive groundwater use control area order issued by the chief engineer pursuant to K.S.A. 82a-1036 through K.S.A. 82a-1040, and amendments thereto.

(c) In addition to meeting the conditions in subsection (a), each application to appropriate groundwater for beneficial use shall meet the requirements of subsection (d) if the application includes a proposed point of diversion located within the boundaries of any of the following drainage basins as defined in K.A.R. 5-6-15:

- (1) Rattlesnake Creek basin;
- (2) Arkansas River basin;
- (3) Walnut Creek basin;
- (4) Pawnee River basin; and
- (5) Buckner Creek basin.

(d) The following requirements shall apply to the applications described in subsection (c):

(1) The maximum annual quantity of water proposed in the application shall be 15 acre-feet or less.

(2) The proposed point of diversion shall meet the spacing criteria provided in K.A.R. 5-25-2.

(3) The authorized quantity of an existing water right shall be reduced, as provided in paragraph (d)(7), to offset the annual quantity requested in paragraph (d)(1), and the existing water right shall divert water from the same source of water supply that has a point of diversion located according to either of the following:

(A) Within 3.5 miles of the proposed point of diversion; or

(B) within a one-mile corridor of the major stream segment designated for stream restoration in the same basin of the proposed point of diversion.

(4) The point of diversion proposed through an offset shall not be closer to a stream than the point of diversion reduced pursuant to paragraph (a)(3) if the authorized well is within three miles of a stream.

(5) All issues relating to the possible abandonment of the offsetting water right shall be resolved by the chief engineer before determining the annual quantity of offset water that is available from the existing water right.

(6) The approval of the application shall not authorize an additional quantity of water to be used on a currently authorized nondomestic place of use.

(7) If the water right to be used as the offset for the new appropriation is a water right authorized for irrigation use, the authorized quantity of water needed to offset the new appropriation of not more than 15 acre-feet of water shall be calculated as follows:

(A) Step one.

(i) Multiply the net irrigation requirement for the 50 percent chance rainfall for the county of origin, as specified in K.A.R. 5-5-12, times the maximum number of acres legally irrigated in any one calendar year during the perfection period. For vested rights, the acreage used shall be the maximum acreage legally irrigated in any one calendar year before June 28, 1945.

(ii) The calculation made in paragraph (d)(7)(A)(i) shall result in the maximum annual quantity of water that could be changed to another type of beneficial use if the entire water right were changed pursuant to K.A.R. 5-5-9(a)(1).

(B) Step two.

(i) Divide the annual quantity of water desired to be changed to the new beneficial use by the maximum annual quantity of water that could be changed if the entire water right were changed to the new use.

(ii) The calculation made in paragraph (d)(7)(B)(i) shall result in the percentage of the entire reduced water right that will be changed to the new use. The remaining percentage of the offsetting water right may be retained by the owner of the irrigation water right.

(C) Step three.

(i) Multiply the remaining percentage calculated in paragraph (d)(7)(B)(ii) times the total currently authorized quantity. The resulting product shall be the annual quantity of water that may be retained by the owner of the irrigation water right.

(ii) The portion of the authorized annual quantity of water not retained by the irrigator as described in paragraph (d)(7)(C)(i) shall be permanently reduced from the authorized annual quantity of the offsetting water right and used to offset the new appropriation.

(8) If the water right to be used as the offset for the new appropriation is an existing water right authorized for non-irrigation use, the total net consumptive use of the offsetting water right after the change and the new appropriation shall not exceed the net consumptive use of the offsetting water right before the change.

(9) The place of use authorized by the offsetting water right for irrigation shall be reduced in proportion to the reduction in the maximum annual quantity of water as determined in paragraph (d)(7)(A)(ii). The directions specified in K.A.R. 5-5-11(b)(2)(B)(ii) shall be followed to determine the number of acres that may be retained.

(e) After the application has been approved pursuant to this regulation, no application to change that water right shall be approved if that approval would authorize the water use to be diverted from any other point of diversion authorized when the application is filed or to be used on any other place of use authorized when the application for change is filed.

(f) An application approved as an exemption under this regulation shall not be leased or placed in a water bank so that the approved water use can be diverted at another location. (Authorized by K.S.A. 82a-706a and K.S.A. 2009 Supp. 82a-1028; implementing K.S.A. 82a-706, K.S.A. 82a-706a, K.S.A. 2009 Supp. 82a-711, and K.S.A. 2009 Supp. 82a-1028; effective Oct. 31, 2003; amended May 21, 2010.)

5-25-16. Water quality analyses and observation wells in the Rattlesnake creek subbasin. Groundwater rights that have points of diversion located in the Rattlesnake creek subbasin east and north of federal highways US-281 and US-50 shall be subject to the following requirements: (a) The water right owner, or the authorized representative, shall test water samples to determine, as needed, whether the water being pumped contains more than 300 milligrams of chlorides per liter. The district may require the tests to be made at a frequency not to exceed once in 365 days.

All water quality samples shall be taken in the presence of an authorized representative of the district, and one-half of the sample shall be given to the authorized representative of the district when the sample is taken. The owner shall have the water sample analyzed for chloride content by a laboratory certified by the Kansas department of health and environment. The applicant shall fur-

nish the results of the water quality analysis to the district within 60 days after the date the sample was taken.

(b) If the analysis of the water sample taken indicates that the chloride content exceeds 300 milligrams of chlorides per liter, the owner shall be required, before any approval of a change in point of diversion, to drill an observation well to bedrock in the manner specified in K.A.R. 5-25-10(a). (Authorized by K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; implementing K.S.A. 82a-706, K.S.A. 82a-706a, K.S.A. 2002 Supp. 82a-708b, and K.S.A. 2002 Supp. 82a-1028; effective Oct. 31, 2003.)

5-25-17. Voluntary reductions of water rights in the Rattlesnake creek subbasin.

Each water right owner in the Rattlesnake creek subbasin that agrees to meet, and does meet, all of the conditions specified in subsections (a) through (e) no later than March 31, 2004 on a water right for a center pivot irrigation system with a priority date on or before April 12, 1984 shall receive a credit toward any reduction required by alternative management actions implemented in accordance with the Rattlesnake creek basin management program accepted by the chief engineer on July 11, 2000. The amount of the credit shall be calculated by multiplying by 1.5 the total number of years that the water right has been voluntarily reduced in accordance with the terms of this regulation before any alternative actions are taken under this program times the quantity of water that was voluntarily reduced. Water right owners who have taken a reduction in their water right under this regulation shall have any further reduction through the Rattlesnake creek basin management program based on the authorized amount before a voluntary reduction is made under this regulation.

(a) The owner permanently reduces the maximum number of acres actually irrigated in any one calendar year during the period 1987 through 1996 by the number of acres previously watered by the end gun and provides documentation to the chief engineer of the number and location of the acres irrigated by the end gun during the period 1987 through 1996.

(b) The owner removes the end gun from the center pivot and certifies to the chief engineer what type of end gun has been removed.

(c) The owner installs pressure regulators on the center pivot to prevent the same rate of diversion from being pumped after the end gun is

removed as was pumped before the end gun was removed and certifies to the chief engineer what pressure regulators have been installed.

(d) The chief engineer permanently reduces the authorized place of use of that water right by the maximum number of acres actually irrigated in any one calendar year by the end gun during the period 1987 through 1996.

(e) The chief engineer permanently reduces the maximum annual quantity authorized by that water right by the quantity of water that is calculated by multiplying the number of acres previously watered by the end gun times the net irrigation requirements (NIR) for the 50 percent chance rainfall for the county in which the point of diversion is located, as set forth in K.A.R. 5-5-12. (Authorized by K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; implementing K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; effective Oct. 31, 2003.)

5-25-18. Changes of well locations within the Rattlesnake creek basin.

(a) Each application to change the location of a well within the Rattlesnake creek basin by more than 2,640 feet may be approved by the chief engineer if all of the following conditions are met:

(1) The source of water supply for the currently authorized well and the proposed well is the Rattlesnake creek basin as defined in K.A.R. 5-6-15.

(2) The currently authorized well is located within the corridor or the number two priority decline area as defined in figure two of the Rattlesnake creek management plan accepted by the chief engineer on July 11, 2000.

(3) The well will be moved to a location outside the corridor or the number two priority decline area as defined in figure two of the Rattlesnake creek management plan accepted by the chief engineer on July 11, 2000.

(4) The average saturated thickness in the two-mile-radius circle in which the proposed well will be located is greater than 40 feet as shown on the saturated thickness map adopted by reference in K.A.R. 5-25-19.

(5) The water level within the two-mile-radius circle surrounding the proposed well location has not declined in excess of 20 feet of the predevelopment water level as shown in Kansas geological survey bulletins numbered 65, 80, and 88.

(6) The change proposes the relocation of all the water right or a divided water right.

(7) No other well has previously been authorized by the chief engineer to be relocated within

a one-mile radius of the proposed well location under the provisions of this regulation, or the applicant demonstrates that the proposed well will not impair existing water rights.

(8) The water right that is proposed to be changed is vested or certified.

(9) All other statutory and regulatory requirements for approval of a change in point of diversion that do not conflict with this regulation are met.

(b) The approval of the change in point of diversion shall be subject to the conditions specified in this subsection:

The approval of the application to change the point of diversion shall be subject to review by the chief engineer 10 years after the approval of the change application. If the water level at the new well location has declined in excess of 10 feet from the date the new well was drilled, for the sole purpose of administering wells concerning direct impairment, the new well shall be considered to have the priority of the date of the application to change the point of diversion. The owner of the well shall have the option of applying for another change in point of diversion.

(c) The quantity of water that can be approved for a change in point of diversion meeting the requirements of subsection (a) above shall be determined based on the following tables.

Points			
point value for each column at right	saturated thickness at proposed well site, in feet	quantity of water authorized in two-mile-radius circle around proposed well, in acre-feet	feet of decline in two-mile-radius circle around proposed well since pre-development
1	146+	0-1,500	0-4
2	111-145	1,501-3,000	5-8
3	91-110	3,001-4,500	9-12
4	66-90	4,501-6,000	13-16
5	41-65	6,001+	17-20

Percent of a water right that can be moved to a new location

number of points scored by proposed well	percent of water right that can be moved to new well location
3-6	100
7-9	90
10-12	80
13-15	70

(Authorized by K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; implementing K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; effective Oct. 31, 2003.)

5-25-19. Saturated thickness map. (a) The following electronic data files, all dated July 10, 2002 and prepared by the district using data developed by the Kansas geological survey and the district, are hereby adopted by reference by the chief engineer:

- (1) Rattlesnake basin.dbf;
- (2) Rattlesnake basin.sbn;
- (3) Rattlesnake basin.sbx;
- (4) Rattlesnake basin.shp;
- (5) Rattlesnake basin.shx; and
- (6) Wln.dbf.

(b) Except as set forth in subsection (c), the electronic data files described in subsection (a) shall be used in all situations in which determination of the saturated thickness of the aquifer within the boundaries of the district is necessary.

(c) The saturated thickness shown in the electronic data files shall be used unless the applicant provides, or the chief engineer has available, better or more site-specific data concerning the actual saturated thickness of the two-mile-radius circle surrounding the well in question. (Authorized by K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; implementing K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; effective Oct. 31, 2003.)

5-25-20. Recommendations by the board.

(a) The following types of applications shall be submitted by the chief engineer to the district for review and recommendation:

- (1) All applications to appropriate water for beneficial use, except for temporary use and domestic use; and
- (2) all applications to change the point of diversion, place of use, the use made of the water, or any combination thereof, except applications to move the point of diversion less than 300 feet.

(b) The district shall conduct a review of the proposed application. Except as set forth in subsection (d), the district's recommendation to the chief engineer shall be consistent with the provisions of the Kansas water appropriation act, the groundwater management district act, and the regulations adopted by the chief engineer pursuant to those acts.

(c) Within 15 working days after the date the chief engineer submits the application to the district for review, or within any extension of time authorized by the chief engineer, the district shall submit its findings and recommendation for approval, denial, or modification of the application and shall specify the basis for the recommendation.

(d) The district may submit to the chief engineer a written recommendation of an exemption from or a waiver of a regulation. If the district submits such a recommendation, the district shall demonstrate to the chief engineer that the granting of the proposed waiver or exemption will not prejudicially and unreasonably affect the public interest and will not cause impairment of any existing water right. (Authorized by K.S.A. 82a-706a and K.S.A. 2002 Supp. 82a-1028; implementing K.S.A. 82a-706, K.S.A. 82a-706a, and K.S.A. 2002 Supp. 82a-711; effective Oct. 31, 2003.)

5-25-21. Alternative method for calculating the amount of water deposited in a multiyear flex account. Each water right owner within the boundaries of the district who is otherwise eligible to establish a multiyear flex account under K.S.A. 82a-736, and amendments thereto, and the implementing regulations and who meets all of the requirements in subsection (b) shall be eligible to use the alternative calculation method in subsection (a) pursuant to K.S.A. 82a-736(c)(1)(D)(iii), and amendments thereto, to determine the amount of water deposited in the multiyear flex account.

(a) The alternative calculation method for the district shall be to compute 450 percent of the base water right's certified appropriation. However, the amount of water deposited in the multiyear flex account shall not exceed the greatest of the quantities derived using the calculation methods specified in K.S.A. 82a-736(c)(1)(D), and amendments thereto.

(b) To be eligible to use the alternative calculation method specified in subsection (a), the following requirements shall be met and shall remain met throughout the term of the period covered by the multiyear flex account permit:

(1) The owner shall meet all requirements and conditions for eligibility and participation specified in K.S.A. 82a-736, and amendments thereto, and the implementing regulations, except as modified by this regulation.

(2) The owner's base water right shall be for a center pivot irrigation system with a functional end gun.

(3) The owner shall remove the end gun from the center pivot and cap the end.

(4) Before diverting any water under the multiyear flex account, the owner shall certify to the chief engineer, on forms supplied by the chief engineer, the following information:

(A) The location of the tract of land to be covered by the multiyear flex account term permit;

(B) the length of each center pivot system covered by the multiyear flex account term permit;

(C) the type of end gun removed and any other information sufficient to enable the chief engineer to determine the number of acres irrigated by the end gun; and

(D) the date of removal of the end gun.

(5) The owner shall maintain the center pivot without an end gun for the duration of the period covered by the multiyear flex account term permit.

(6) The authorized place of use shall not be increased during the term of the multiyear flex account permit.

(7) The authorized place of use shall be located wholly within the boundaries of the district.

(c) If the owner qualifies for a multiyear flex account term permit and is eligible under this regulation to use the alternative calculation method, the chief engineer shall enter an order that reduces the authorized place of use of the owner's base water right during the multiyear flex account permit term. The reduced authorized place of use shall be equal to the maximum number of acres legally irrigated by the center pivot system for the previous five calendar years minus the number of acres irrigated by the center pivot system's end gun. (Authorized by K.S.A. 82a-706a and K.S.A. 2015 Supp. 82a-1028; implementing K.S.A. 2015 Supp. 82a-736; effective March 25, 2016.)

5-25-22. Movement of water rights affecting streamflow at Rattlesnake creek. (a)

To improve streamflow at the zenith gage on Rattlesnake creek, otherwise known as United States geological survey gage #07142575, each vested or certified water right located within zone D of the division of water resources' map titled "Rattlesnake creek streamflow response regions," dated February 14, 2018, hereby adopted by reference, and subsequently referred to in this regulation as "response map," shall be eligible to offset new appropriations of water located within the district if all of the following conditions are met:

(1) The source of water supply for the currently authorized well is located within zone D of the response map.

(2) The rate and quantity of the existing water right are the maximum rate and quantity available for the new application. The rate and quantity of a new application for irrigation use shall be determined under K.A.R. 5-5-11. A new application

may change the use made of water. However, the new application shall not allow for an increase in the net consumptive use greater than the existing water right under K.A.R. 5-5-3.

(3) The water right has reported use between January 1, 2003 and December 31, 2012, and the reported use is equal to or greater than 50 percent of the authorized use in at least two years. Each water right enrolled in a state or federal conservation program during this period that required the voluntary cessation of water use shall be eligible for movement under this regulation if all other requirements are met and the applicant demonstrates the existing water right's ability to pump at least 50 percent of authorized use during any year.

(4) The new location will reduce the impact at the zenith gage by 30 percent or more compared to the current location of the well as determined by the response map. The new location is in an area with less than 40 percent impact at the zenith gage as determined by the response map.

(5) The average saturated thickness in the two-mile-radius circle in which the proposed well will be located is greater than 40 feet as shown on the saturated thickness map in K.A.R. 5-25-19. However, additional site-specific information, including data from more recently drilled wells or test holes, may be submitted to demonstrate that the average saturated thickness is greater than 40 feet.

(6) The water level within the two-mile-radius circle surrounding the proposed well location has not declined more than five percent from the pre-development water level as shown in the relevant Kansas geological survey bulletins, including bulletin numbers 65, 80, 88, 120, 205, and 206. Any applicant may submit additional site-specific information, including data from more recently drilled wells or test holes, to demonstrate that the area has not declined more than five percent from the pre-development water level.

(7) The new location will meet the safe-yield analysis based on a two-mile-radius circle with a recharge rate of 2.25 inches and 75 percent available for appropriation pursuant to K.A.R. 5-3-11 or a safe-yield analysis utilizing modeling as completed by the applicant or district.

(8) No other well has previously been authorized by the chief engineer to be relocated within a one-mile radius of the proposed well location under this regulation, or the applicant demonstrates that the proposed well will not impair existing water rights.

(9) All other statutory and regulatory requirements for approval of a new appropriation of water for a beneficial use that do not conflict with this regulation are met.

(b) Any new application may request the movement of the entire existing water right to a new location, the movement of an entire existing water right to multiple locations, or the movement of a partial amount of the existing water right to a new location.

(1) Upon approval of any application under this regulation and the completion of diversion works and the application of water to a beneficial use at each new location, the dismissal of the entire existing water right shall be required except for the portion, if any, remaining in the original location. If the location of a new application is determined to be unfeasible after filing an application, the applicant may submit a new application for another location if diversion works have not been completed and water has not been applied to a beneficial use at the previously proposed location.

(2) If any portion of the existing water right remains in the original location, then the water right owner shall file an application to divide the water right proportionally based on the quantity that will remain and the quantity that will be dismissed to offset each new appropriation before submitting a new application to appropriate water in the district.

(3) For any quantity of the existing water right that remains in the original location, the place of use shall be reduced to the number of acres that can reasonably be irrigated under K.A.R. 5-3-24. This reduction shall be calculated by dividing the remaining quantity of water by the county value according to K.A.R. 5-3-24 to establish the number of acres that can reasonably be irrigated.

(4) A separate application shall be required for each different location that a portion of the existing water right is proposed to offset.

(c) Upon the establishment of a new appropriation under this regulation, the quantity of water dismissed to offset the new appropriation shall not be available for reappropriation in the previous or original location of the water right. (Authorized by and implementing K.S.A. 82a-706a and K.S.A. 2018 Supp. 82a-1028; effective Nov. 15, 2019.)

Article 30.—DAMS

5-30-1. Approval of or permits for dams.

The chief engineer shall not approve or grant a permit for any dam subject to the jurisdiction of

the chief engineer under the authority of K.S.A. 1979 Supp. 82a-301 through 305a as amended, unless the applicant also receives prior approval of his or her application to appropriate water for beneficial use to be diverted by means of the dam for which the approval or permit is sought, unless the sole proposed use for the water is for domestic use. (Authorized by K.S.A. 82a-706a and 82a-709; effective May 1, 1980.)

Article 40.—DESIGN OF EARTH DAMS

5-40-1. Definitions. As used in K.S.A. 82a-301 through 82a-305a and amendments thereto, in the regulations adopted pursuant to these statutes, and by the chief engineer in administering K.S.A. 82a-301 through 82a-305a and amendments thereto, the following terms shall have the meanings ascribed to them in this regulation, unless the context clearly requires otherwise:

(a) “Application” means the formal document and any required supporting information that are submitted to the chief engineer and request a permit, pursuant to K.S.A. 82a-301 through 82a-305a, and amendments thereto.

(b) “Appurtenant works” means the primary spillway and other conduits through a dam, the valves, the auxiliary spillway, the service spillway, the stilling basin, any constructed outlet channel, all dikes and berms designed and constructed to protect the dam, the drains, and all other features constructed to protect or operate a dam.

(c) “As-built drawings” means the drawings showing a permitted project and all appurtenant works as the project and works were actually built. This term shall include the following:

(1) All deviations from the plans that were approved by the chief engineer;

(2) the location and design of any instruments and monitoring equipment that were installed at the site;

(3) the location and elevation of any benchmarks; and

(4) a certification that the permitted project was constructed as shown on the as-built drawings.

(d) “Authorized representative” means any employee of the chief engineer designated by the chief engineer to perform duties and functions on behalf of the chief engineer.

(e) “Auxiliary spillway” means an open channel that is constructed over or around an embankment for the purpose of conveying safely past the dam the flows that are greater than the primary

spillway design discharge and that can be stored in the detention storage. This term is also known as an emergency spillway.

(f) “Benchmark” means a reference point or object of known elevation and location that is not expected to move horizontally or vertically during the life of the project.

(g) “Borrow area” means land, usually located near the dam, from which earth used to construct the embankment will be excavated.

(h) “Breach analysis” means an engineering analysis to determine the areas that would be inundated if a dam failed.

(i) “Channel change” means any project that alters the course, current, or cross section of any stream.

(j) “Chief engineer” means the chief engineer, division of water resources of the Kansas department of agriculture.

(k) “Control section” means the immediate downstream end of the level section of an open-channel earthen spillway. The elevation of the control section is the elevation of the open-channel spillway crest.

(l) “Cutoff collar” means a projecting flange built or installed completely around the outside of a pipe to lengthen the path of seepage along the outer surface of the pipe.

(m) “Cutoff trench” means an excavation under a dam to be later filled with impervious material to prevent or reduce the seepage of water through the foundation of a dam.

(n) “Design discharge” means the maximum rate of flow, expressed in cubic feet per second, released from a dam’s spillways for the design storm.

(o) “Design storm” means the precipitation event specified in K.A.R. 5-40-22 that is the minimum precipitation event required to be used to design a particular dam.

(p) “Detention storage” means the volume in the reservoir between the lowest uncontrolled spillway, not including any low-flow augmentation works, and the crest of the auxiliary spillway.

(q) “Detention storm” means the storm described in K.A.R. 5-40-23.

(r) “Easily erodible soils” means soils with a high content of fine sand or silt and with little or no cohesion or plasticity, including fine sand, silt, sandy loam, and silty loam.

(s) “Effective height” means the difference in elevation between the crest of an auxiliary spillway or service spillway and the lowest point of the downstream toe of a dam. If the dam does not

have an auxiliary or service spillway, the effective height means the difference in elevation between the top of the dam and the lowest point of the downstream toe of the dam.

(t) “Effective storage” means the volume of storage space in a reservoir below the crest of the auxiliary spillway or service spillway and above the elevation of the downstream toe of the dam at its lowest point. Effective storage shall not be reduced by accounting for accumulated sediment.

(u) “Embankment” means the earthen-fill portion of the dam.

(v) “Emergency action plan” means a formal document that identifies potential emergency conditions at a dam and specifies preplanned actions to be followed to minimize property damage and loss of life if the dam fails.

(w) “Erosion-resistant soils” means cohesive soils with a high clay content and high plasticity, including silty clay, sandy clay, and clay.

(x) “Freeboard” means the vertical distance between the maximum water surface elevation attained during the design storm and the top of the dam.

(y) “General plan” means a plan adopted by a watershed district, drainage district, or similar entity required by statute to be approved by the chief engineer, including any of the plans formulated under K.S.A. 24-901 and K.S.A. 24-1213, and amendments thereto.

(z) “Hazard” means the property or people that could be damaged or endangered by the failure of a dam, including people or property that might be inundated. This term shall include a public or industrial water supply stored in the reservoir created by the dam that would be released if the dam failed.

(aa) “High-impact dams” means all of the following classes of dams:

- (1) Size class 4, hazard class A dams;
- (2) size classes 3 and 4, hazard class B dams; and
- (3) all hazard class C dams, using the definitions of hazard class and size class in K.A.R. 5-40-20 and K.A.R. 5-40-21.

(bb) “Hydraulically most distant point in the watershed” means the point in a watershed from which a raindrop falling at that point takes the longest time to reach the dam.

(cc) “Impervious material” means material that allows a relatively low rate of water movement through its cross section.

(dd) “Inspection year” means the period on and after May 1 of one year through April 30 of

the following year. The inspection year shall be named for the calendar year in which the inspection year ends.

(ee) “Inundation area” means the area below a dam that will be inundated with water as determined by conducting a breach analysis meeting the requirements specified in K.A.R. 5-40-24.

(ff) “Invert” means the lowest point on the inside of the outlet of a conduit.

(gg) “Low-flow augmentation works” means any uncontrolled conduit, orifice, or other appurtenant works that slowly release water from storage in a reservoir, or bypass low flow through a reservoir.

(hh) “Low-impact dams” means all of the following classes of dams:

- (1) Size classes 1, 2, and 3, hazard class A dams; and
- (2) size classes 1 and 2, hazard class B dams, using the definitions of hazard class and size class in K.A.R. 5-40-20 and K.A.R. 5-40-21.

(ii) “Maintenance” means the actions or upkeep performed on a dam or its appurtenances to compensate for wear and tear on the dam and appurtenances and to preserve the dam and appurtenances so that the dam and appurtenances function properly until they are removed, including woody vegetation control; grass seeding; burrowing animal control; repair of minor erosion, cracks, animal burrows, and minor settling; care of pipes, piezometers, drains, valves, gates, and other mechanical devices; replenishment of rip-rap; and removal of debris from spillways.

(jj) “Modification” means any change in a dam or its appurtenances that involves a change to or significant disturbance of the embankment, an alteration of the flow characteristics of a spillway, a change in the storage capacity or freeboard, or any other significant alteration in the functioning of the dam.

(kk) “Navigable stream” means any of the following:

- (1) The Arkansas river;
- (2) the Missouri river; or
- (3) the Kansas river.

(ll) “One percent-chance storm” means a rainfall event that has a one percent chance of being equaled or exceeded one or more times in a year.

(mm) “Owner of a dam” means the owner or owners of the land upon which a dam and appurtenant works are constructed unless an easement authorizes another person or entity to construct and maintain a dam on that easement. With such an easement, the holder of the easement shall be considered to be the owner of the dam.

(nn) “Perennial stream” means a stream, or part of a stream, that flows continuously during all of the calendar year, except during an extreme drought.

(oo) “Permanent pool” means the storage space in a reservoir below the elevation of the lowest uncontrolled spillway, not including any low-flow augmentation works. This term is also known as the “normal pool.”

(pp) “Permit” means the consent or other formal document issued by the chief engineer that authorizes the construction, repair, or modification of a dam, channel change, or stream obstruction, and its operation and maintenance.

(qq) “PMP” means the probable maximum precipitation that can occur in a precipitation event as prescribed by K.A.R. 5-40-31.

(rr) “Prejurisdictional dam” means any of the following:

(1) A dam constructed before May 28, 1929;

(2) a dam constructed by an agency or political subdivision of state government, other than a county, city, town, or township, before April 11, 1978; or

(3) a dam constructed before July 1, 2002 that is 25 or more feet in height and impounds less than 30 acre-feet of water at the top of the dam.

(ss) “Primary spillway” means the uncontrolled outlet device through a dam that provides the initial outlet for storm flows, usually consisting of either of the following:

(1) A riser structure in combination with an outlet conduit; or

(2) a canopy or hooded inlet structure in combination with an outlet conduit.

This term is also known as a “principal spillway.”

(tt) “Rainfall excess” means that part of the rain in a given storm that falls at intensities exceeding the infiltration capacity of the land and that is the volume of the rain available for direct runoff.

(uu) “Reservoir” means the area upstream from a dam that contains, or can contain, impounded water.

(vv) “Repair” means any action, other than maintenance, taken to restore a dam and its appurtenant works to their original permitted condition.

(ww) “Service spillway” means an open-channel spillway constructed over or around a dam embankment to convey safely past the dam all flows entering the reservoir that cannot be stored in the reservoir behind a dam that does not have a primary spillway.

(xx) “Size factor” means the effective height of the dam, expressed in feet, multiplied by the effective storage of the reservoir, expressed in acre-feet.

(yy) “Stilling basin” means an open structure or excavation at the outlet of a spillway that dissipates the energy of fast-moving water being discharged from the spillway to protect the streambed below a dam from erosion.

(zz) “Stream” means any watercourse that has a well-defined bed and well-defined banks and that has a watershed above the point marking the site of the project that exceeds the following number of acres in the zones specified:

(1) Zone three: 640 acres for all geographic points within any county west of a line formed by the adjoining eastern boundaries of Phillips, Rooks, Ellis, Rush, Pawnee, Edwards, Kiowa, and Comanche counties;

(2) zone two: 320 acres for all geographic points within any county located east of zone three and west of a line formed by the adjoining eastern boundaries of Republic, Cloud, Ottawa, Saline, McPherson, Reno, Kingman, and Harper counties; and

(3) zone one: 240 acres for all geographic points within any county located east of zone two.

The flow of a stream is not necessarily continuous and can occur only briefly after a rain in the watershed. If the site of the project has been altered so that a determination of whether the well-defined bed and banks did exist is not possible, it shall be presumed that the bed and banks did exist if the watershed acreage criteria specified in this subsection have been met, unless the owner of the project conclusively demonstrates that the well-defined bed and banks did not exist when the project site was in its natural state and had not been altered by human activity.

(aaa) “Stream obstruction” means any project or structure that is wholly or partially placed or constructed in a stream and that does not meet the definition of a dam in K.S.A. 82a-301 and amendments thereto.

(bbb) “Time of concentration” means the time required for runoff to flow from the hydraulically most distant point in the watershed to the watershed outlet once the soil has become saturated and minor depressions have been filled.

(ccc) “Trash rack” means a protective device installed on the inlet of a primary spillway to prevent trash and other debris from obstructing the primary spillway without obstructing the flow of water.

(ddd) "Watershed" means all of the area draining toward a selected point on a stream.

(eee) "Wing dike" means an earthen or rock structure below the toe of a dam that is constructed to protect the embankment from erosion.

(fff) "Zone," in an earthen dam, means a segment of earthen fill containing similar materials.

(ggg) "Zoned fill" means an embankment divided into two or more zones to make the best use of available materials. (Authorized by and implementing K.S.A. 2006 Supp. 82a-303a; effective May 1, 1983; amended May 1, 1987; amended, T-5-12-30-91 Dec. 30, 1991; amended Feb. 17, 1992; amended Sept. 22, 2000; amended May 18, 2007.)

5-40-2. Dams; plans and specifications.

The plans required by K.S.A. 82a-302, and amendments thereto, to construct, repair, or modify a dam shall include sufficient views to show all features in three dimensions and in sufficient detail to instruct a competent contractor to construct, repair, or modify the dam by viewing the plans and specifications. All plans with multiple pages shall include an index describing the location of required views within the plans. The views and maps specified in this regulation shall be shown. Specific details shall be listed under the view that is typically most appropriate, but they may be displayed on another view to improve the legibility of the plans if sufficient detail is provided in the plans to describe each feature in three dimensions. The required plans shall include the following:

(a) Plan views of the dam and dam site, which shall include both abutments of the dam, the area downstream to the point where the auxiliary spillway or service spillway flows enter the receiving channel, and the area upstream of the upstream toe of the dam to where the borrow area will be permitted. All elevations shown on plans shall be referenced to the same datum as the benchmarks described on the plans. The following details shall be shown, if applicable:

(1) The location of the axis of the dam, showing stationing and top width limits;

(2) the toe of the upstream and downstream slopes;

(3) the location of the centerline and the limits of each open-channel spillway;

(4) the location of the primary spillway and any stilling basin;

(5) the location of each berm;

(6) the location of slope protection;

(7) the location of borings, test holes, and test pits;

(8) the location of intakes, outlets, valves, and valve wells;

(9) the location, description, and elevation of each benchmark;

(10) the location, description, and details of all foundation drains;

(11) the location and limits of each borrow area; and

(12) the location and topography of the area where the auxiliary spillway discharge returns to the receiving stream;

(b) a map of the drainage pattern above and below the dam site drawn to an appropriate scale. The map shall show the following:

(1) The location of the watercourse across which the dam is to be built and the point where the centerline of the dam crosses the centerline of the stream specified in latitude and longitude, or in feet north and west of the southeast corner of the section;

(2) the location of the dam and the outline of the reservoir;

(3) the boundary of the watershed, shown by a line enclosing the entire area that will drain into the reservoir;

(4) section lines, with sections properly identified; and

(5) the size of the drainage area in acres or square miles;

(c) a topographic map of the dam site and reservoir area, which shall be shown to a scale that provides sufficient detail to clearly show the required features and to locate them in the field, but in no case is less than 1 to 3,600. The elevation of each contour shall be clearly noted on the map. The following details shall be shown:

(1) The location of the dam; and

(2) the following topography:

(A) The contours at two-foot intervals. For dams more than 20 feet in height, contours may be spaced at greater intervals, but the interval shall not exceed four feet;

(B) the contour equivalent to the elevation of the lowest uncontrolled spillway inlet, not including any low-flow augmentation works;

(C) the contour equivalent to the maximum water surface reached during the design storm;

(D) the contour equivalent to the elevation of the top of the dam;

(E) construction ingress and egress routes to the dam and reservoir;

(F) the name and address of each person owning any of the following:

(i) The land on which the dam and its appurtenances, including the auxiliary spillway or service spillway, down to the location where the spillway discharges back to the receiving stream, will be constructed;

(ii) ingress and egress routes to the dam and reservoir;

(iii) the reservoir site up to the top of the dam elevation; and

(iv) the borrow areas if they are located outside the reservoir site;

(G) if the reservoir area is divided between more than one landowner, the property lines, which shall be shown on the topographic map of the reservoir;

(H) roads, railroads, pipeline crossings, and any other prominent features in the vicinity;

(I) the boundary line for each easement; and

(J) the limits of each borrow area;

(d) the cross-section view of the valley at the dam site, which shall be shown along the centerline of the dam with the same stationing as that used on the plan view. The following shall be shown:

(1) The elevation to which the top of the dam is to be maintained and the elevation to which the dam is to be initially constructed in order to provide an adequate settlement allowance;

(2) the location and elevation of the auxiliary spillway or service spillway at the centerline of the dam;

(3) the original surface of the ground, including the streambed, up to the elevation of the top of the dam;

(4) the proposed elevations of the bottom of the cutoff trench; and

(5) the location of all test holes and the materials encountered in the test holes;

(e) a cross-section view perpendicular to the centerline of the dam at the lowest point on the downstream toe extending to the limits of the fill being placed. If the cross section is variable, a typical section shall be shown for each reach of similar cross section with a proper description of the reach by stationing. Additional typical cross sections along the centerline of the primary spillway and the centerline of any other outlets shall be shown. Cross sections of the dam shall include the following:

(1) The elevations of the shoulders and centerline of the dam and the width of the top of the dam;

(2) the elevation of the top of any berm, the elevation of the outside shoulder of any berm, and the top width of any berm;

(3) the slopes of upstream and downstream faces of the dam;

(4) the elevation, location, and type of slope protection;

(5) the zones of the embankment;

(6) the dimensions to which the dam is to be constructed to provide an adequate allowance for settlement;

(7) the elevation, location, and dimensions of the planned cutoff trench; and

(8) the elevation of the downstream toe of the dam at its lowest point;

(f) the following information concerning each open-channel spillway:

(1) A plan view showing the location and stationing along the centerline of the spillway, together with the location of the control section;

(2) cross sections showing side slopes and dimensions of the spillway, and the original surface of the ground up to the point where the spillway sides intersect the original ground surface;

(3) a profile along the centerline of the spillway, extending from the point upstream where the profile of the spillway intersects natural ground through the control section to the streambed below the dam. The stationing on the profile shall correspond to that on the plan view. The station and elevation of the breaks in the grade of the spillway shall be shown. This profile shall show the existing ground elevation, proposed grade of the bottom of the spillway, elevation of slope protection on the side slopes, and geologic logs of the borings required in the auxiliary spillway or service spillway by K.A.R. 5-40-40, superimposed on the profile through which the spillway is excavated; and

(4) the data necessary to stake out any curves;

(g) the following information concerning the primary spillway:

(1) The profile along the centerline of the spillway, extending from the intake to the outlet, showing the size, dimensions, and locations of seepage control features. This profile shall show existing ground elevations and the proposed grade of the spillway;

(2) the plan, profile, and cross-section views of the stilling basin, primary spillway supports, and other features;

(3) the geologic logs of the borings done in the vicinity of the primary spillway shall be superimposed on the profile;

(4) the location and type of all bedding materials;

(5) a table of pipe grades for all concrete pipes; and

(6) conduit joint details;

(h) the number of acres enclosed by each contour within the reservoir area and the total storage capacity of the reservoir in acre-feet at the elevation of each contour, which shall be determined and tabulated on the plan. The data shall be compiled for all contours in the reservoir up to the elevation of the top of the dam. Computations of capacity shall be based on the natural topography of the reservoir basin but may include the volume of any excavation in the reservoir made during construction of the dam;

(i) a curve or table showing the discharge capacities, in cubic feet per second, of all spillways through a range of surface water elevations from the lowest spillway inlet elevation to the top of the dam elevation, which shall be developed and shown on the plans or in the design report;

(j) the following information, which shall be shown on the plans in plan view, profile, and cross section:

(1) Drain details, including foundation drains;

(2) permanent erosion control protection, including riprap; and

(3) details of stilling basins, outlets, and other appurtenant structures; and

(k) the following information, which shall be shown on either the plans or the specifications:

(1) A table of gradation for each drain; and

(2) a table of gradation of the bedding of the riprap. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-302 and 82a-303a; effective May 1, 1983; amended May 1, 1985; amended May 1, 1987; amended May 18, 2007.)

5-40-2a. Benchmarks. (a) At least two permanent benchmarks shall be installed for future reference at each dam. Each benchmark shall be located according to the following criteria:

(1) In an area where the benchmark will not be disturbed, destroyed, or inundated after the dam is complete; and

(2) along the centerline of the dam on either end of the dam, if practical, and in undisturbed soil.

(b) On high-impact dams, each permanent benchmark shall also meet the following criteria:

(1) Be installed in a hole that meets the following criteria:

(A) Is 12 inches in diameter; and

(B) is at least 42 inches deep or is drilled to bedrock, whichever is less;

(2) be constructed of one or more steel reinforcing bars at least $\frac{3}{8}$ inch in diameter and 36 inches in length or the length of the depth of the hole, whichever is less. The reinforcing bar or bars shall be placed in the hole and the hole backfilled with concrete rounded off flush with the ground;

(3) be capped by a metal survey marker; and

(4) be either marked by a witness post or survey marker sign or tied to at least two objects in the vicinity by distance and bearing.

(c) On low-impact dams, each permanent benchmark shall also meet the following minimum requirements:

(1) Be constructed of a reinforcing bar that is 36 inches long, one-half inch in diameter, and driven flush with the surface of the ground;

(2) be installed at a location protected from grazing animals and vehicular traffic; and

(3) be either marked by a witness post or survey marker sign or tied to at least two objects in the vicinity by distance and bearing.

(d)(1) The elevation and horizontal location of each permanent benchmark shall be shown on the as-built drawings or the construction inspection report. The location of each permanent benchmark shall be described in reference to centerline stationing and offset from the centerline. The elevation of each permanent benchmark for all of the following classes of dams shall be referenced to the national geodetic vertical datum of 1988, or other acceptable national vertical datum, to a tolerance of plus or minus 0.5 foot:

(A) Class size two, hazard classes B and C;

(B) class size three dams; and

(C) class size four dams.

(2) The elevation of each benchmark for class sizes one and two, hazard class A dams may be referenced to an assumed datum.

(e) Horizontal control shall be referenced to the Kansas state plane coordinate system as set forth in K.S.A. 58-20a01 et seq., and amendments thereto. The location of each benchmark shall be shown on the as-built drawings or the notice of completion by using either of the following:

(1) The plane coordinate values consisting of a northing and an easting from the appropriate monumented point according to K.S.A. 58-20a03, and amendments thereto; or

(2) the feet distances north or south, and east or west, from the nearest or most convenient sec-

tion corner. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-302 and 82a-303a; effective May 18, 2007.)

5-40-2b. Design reports. (a) The application for each permit to construct, repair, or modify a dam shall be accompanied by a design report prepared by the engineer who designed the new dam or the repair or modification of an existing dam. The design report shall document every major design element of the dam, the conditions that must be addressed in the construction of the project, and the manner in which those conditions will be addressed. The design report shall document the design process, including references to each design method and computer program utilized in the design, and shall include the following:

(1) The design of any slope protection for the embankment and the auxiliary or service spillway. If no slope protection is provided, the report shall provide justification for not having slope protection;

(2) documentation of the determination of the hazard class;

(3) a report of the geotechnical investigation, including the results of the testing required in K.A.R. 5-40-40 through K.A.R. 5-40-42, and all boring logs not shown on the plans;

(4) documentation of the embankment design based upon the geotechnical investigation;

(5) documentation of the hydrological evaluation, including the determination of the composite curve number and drainage area;

(6) if a proposed dam is part of a general plan, the report shall evaluate whether the proposed dam conforms to the general plan;

(7) the design of the foundations, including the proposed depth of the cutoff trench;

(8) the design of the drains, including size, material gradation, interface with soil, and outlets;

(9) the design of the pipe bedding, including documentation that the loading and deflection conditions are met;

(10) the stilling basin design;

(11) documentation of the flood routing or routings;

(12) the gradation of the material in the diaphragm and the design of the diaphragm; and

(13) any other relevant information required by the chief engineer.

(b) In addition to those items required in subsection (a), the design report for each high-impact dam shall include the following:

(1) The auxiliary spillway or service spillway analysis required by K.A.R. 5-40-56(c), if applicable, or K.A.R. 5-40-57(a);

(2) a slope stability analysis; and

(3) an embankment settlement analysis. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-302 and 82a-303a; effective May 18, 2007.)

5-40-3. Specifications. (a) Each applicant shall submit specifications with the application for a permit to construct a dam. The specifications shall address every major element in the construction of the dam and the materials used to construct the dam. The specifications shall be clear, legible, and sufficiently detailed to ensure that the dam and appurtenant works will be properly constructed and shall meet the requirements of sound engineering principles and commonly accepted engineering practices. The specifications shall state the minimum quality of materials and workmanship that is acceptable and the required materials tests and testing frequency. The specifications shall cover the following:

(1) The excavation procedures;

(2) the placement and compaction of earthen fill;

(3) the dewatering process;

(4) concrete and reinforcing steel requirements and placement;

(5) the materials for and placement of all conduits;

(6) the materials for and placement of permanent erosion control measures;

(7) drains and seepage control, including aggregate requirements; and

(8) seeding and fencing.

The specifications shall also include an index. The specifications may be submitted electronically in a form and manner prescribed by the chief engineer.

(b) A copy of the plans and specifications that have been approved by the chief engineer shall be accessible at the construction site at all times during construction. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-302 and 82a-303a; effective May 1, 1983; amended May 1, 1987; amended May 18, 2007.)

5-40-4. Preparer of maps, plans, profiles, reports, and specifications. In addition to the requirements of the Kansas state board of technical professions, the requirements in this regulation shall apply. (a) Each map, plan, profile, report, and specification submitted to the chief

engineer for approval shall be prepared by, or under the supervision of, a person who is competent in the design and construction of channel changes or stream obstructions, as appropriate.

(b) Maps, plans, profiles, reports, and specifications for any dam shall be prepared by, or under the supervision of, a licensed professional engineer who is competent in the design and construction of dams.

(c) Maps, plans, profiles, reports, and specifications for any channel change or stream obstruction project on a navigable stream or a stream having a mean annual flow of 100 cubic feet per second or more at the proposed location of the project shall be prepared by a licensed professional engineer who is competent in the design of that type of project.

(d) No provision of this regulation, and no decision made by the chief engineer pursuant to this regulation, shall alter the responsibilities or duties of any licensee of the Kansas state board of technical professions to comply with that board's requirements. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-302 and 82a-303a; effective May 1, 1983; amended May 1, 1986; amended May 1, 1987; amended Sept. 22, 2000; amended May 18, 2007.)

5-40-5. Determining the capacity of a reservoir. (a) The capacity of each proposed reservoir shall be determined as specified in K.A.R. 5-40-2(h).

(b) The capacity of each existing reservoir shall be determined by using the procedure specified in K.A.R. 5-40-2(h) for contours above the water surface. The engineer determining the reservoir capacity shall demonstrate the validity of the method that the engineer selects to extrapolate the data for contours below the water surface. The capacity of an existing reservoir shall not be reduced by including the accumulated sediment. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-301 and 82a-303a; effective May 1, 1983; amended May 18, 2007.)

5-40-5a. Determining the height of a dam or barrier. To determine the height of a dam or barrier pursuant to K.S.A. 82a-301(b) and amendments thereto, that measurement shall be made as follows: (a) The height of a dam or barrier that extends across the natural bed of a stream or watercourse shall be the vertical distance mea-

sured from the bed of the stream or watercourse at the downstream toe of the dam or barrier to the lowest elevation on the top of the dam or barrier, excluding any open-channel spillway and any anomalous low points.

(b) The height of a dam or barrier that does not extend across the natural bed of a stream or watercourse shall be the vertical distance measured from the lowest elevation of the outside limit of the dam or barrier to the lowest elevation on the top of the dam or barrier, excluding any open-channel spillway and any anomalous low points.

(c) The height of a proposed barrier or dam shall be measured from the planned top of the dam, excluding any allowance for settlement. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-301 and 82a-303a; effective May 18, 2007.)

5-40-6. Waiver and stricter requirements.

(a) The chief engineer may waive any of the regulations adopted under articles 40, 41, 42 and 43 if it is shown to the satisfaction of the chief engineer that the waiver of the regulation will not pose a hazard to the public safety and that the waiver is in the public interest.

(b) The chief engineer may also invoke any jurisdiction granted by statute and impose stricter requirements than required by rules and regulations where such jurisdiction or additional requirements are necessary to protect the public interest, protect the public safety or prevent damage to property. (Authorized by K.S.A. 82a-303a; implementing K.S.A. 82a-303; effective May 1, 1983; amended May 1, 1987.)

5-40-7. Other maps, plans, profiles, data and specifications. The applicant shall also submit any other maps, plans, profiles and specifications of the dam, channel change or obstruction and any other data which the chief engineer may require. (Authorized by K.S.A. 82a-303a; implementing K.S.A. 82a-302; effective May 1, 1983; amended May 1, 1987.)

5-40-8. Acceptable application. (a) To be acceptable for filing, each application for a permit to construct, modify, or repair a dam, other stream obstruction, or channel change shall be accompanied by the statutorily required filing fee and shall contain all of the following:

(1) One copy of the completed application on a form prescribed by the chief engineer and signed by the applicant;

(2) two copies of the maps, plans, specifications, and profiles for a proposed or existing dam that meet the requirements of these regulations or one copy of the maps, plans, specifications, and profiles for any other stream obstruction or channel change that meet the requirements of these regulations; and

(3) for a proposed or existing dam, one copy of the design report that meets the requirements of these regulations.

(b) If the applicant fails to meet the requirements of subsection (a), the applicant shall be notified by the chief engineer of the deficiencies in writing and given 60 days from the time the notice is postmarked to submit the required items. If the required items are not submitted within 30 days after the chief engineer's notice is postmarked, a reminder letter shall be sent to applicant again requesting the required items.

(c) Any applicant may submit a request for an extension of time to provide a complete application. The applicant shall submit the request for extension of time before the deadline to submit the items. The request shall also include a justification for the extension of time and an estimate of the time needed to submit the required items.

(d) If the required items are not submitted within 60 days after the chief engineer's notification of deficiency, or within any authorized extension of time, the application shall be dismissed and the application fee forfeited.

(e) If the dismissed application was for the construction, repair, or modification of an existing illegal, unpermitted dam, the removal of the dam shall be ordered by the chief engineer.

(f) If an application is dismissed pursuant to this regulation, within 30 days of the date of dismissal the applicant may apply to have the application reinstated. The application may be reinstated by the chief engineer for good cause shown by the applicant. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-301, 82a-302, and 82a-303a and K.S.A. 82a-303c; effective May 1, 1983; amended May 18, 2007.)

5-40-9. (Authorized by K.S.A. 82a-303a; implementing K.S.A. 82a-302; effective May 1, 1983; amended May 1, 1985; amended May 1, 1986; revoked May 18, 2007.)

5-40-10. (Authorized by K.S.A. 82a-303a; implementing K.S.A. 82a-302; effective May 1, 1984; amended May 1, 1985; amended May 1, 1986; revoked May 18, 2007.)

5-40-11. (Authorized by K.S.A. 82a-303a; implementing K.S.A. 82a-302 and 82a-303; effective Sept. 22, 2000; revoked May 18, 2007.)

5-40-12. As-built drawings. (a) Each permit shall be conditioned by the chief engineer to require as-built drawings for each category listed in subsection (b) to be submitted within 90 days of the completion of the dam, repairs, or modifications, or any extension of time authorized by the chief engineer for good cause. The drawings shall be prepared by a person qualified to prepare the original plans and specifications pursuant to K.A.R. 5-40-4.

(b) As-built drawings shall be submitted for each of the following categories:

(1) All high-impact dams;

(2) any dam, if required by the chief engineer as a condition of the permit to build, repair, or modify the dam; and

(3) any dam, if required by the chief engineer as the result of an approval of a change in the approved plans requested by the applicant during construction.

(c) The as-built drawings shall show all the features of the structure included in the approved plans as those features were constructed. A legibly marked-up copy of the approved plans shall be acceptable as as-built drawings.

(d) A profile of the bottom of the cutoff trench as constructed shall be shown on the as-built drawings. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 82a-303 and 82a-303a; effective May 1, 1987; amended May 18, 2007.)

5-40-13. (Authorized by K.S.A. 82a-303a; implementing K.S.A. 82a-303; effective May 1, 1987; revoked May 18, 2007.)

5-40-14. Testing a principal spillway pipe installation in a dam; applicability. (a) For the purpose of testing the leakage rate of principal spillway pipe installation in a dam, an applicant shall conduct a static pressure test of each principal spillway installation constructed of corrugated metal pipe.

(b) A static pressure test shall be required only of a principal spillway installation made of corrugated metal pipe, unless the chief engineer determines that testing principal spillway pipe made of other materials or testing other pipes used in the construction of dams is necessary to protect public safety, life, or property. (Authorized by K.S.A. 82a-303a; implementing K.S.A. 82a-303b; effective Sept. 22, 2000.)

5-40-15. Testing a principal spillway pipe installation in a dam; general procedures.

The following general procedures shall apply to all static pressure tests required by K.A.R. 5-40-14: (a) The applicant shall conduct the test before backfilling around and over the principal spillway pipe and after laying the pipe on the grade line and connecting the pipe according to the approved plans and the manufacturer's requirements.

(b) The applicant, the applicant's representative, or the contracting officer shall make arrangements for the chief engineer, or a person designated by the chief engineer, to be present during the test.

(c) The applicant shall place a watertight plug in the downstream end of the pipe. The plug shall be sufficient to withstand a pressure of three pounds per square inch for the duration of the test. The plug shall be equipped with an acceptable means of draining the water out of the pipe after completion of the test.

(d) The applicant shall fill the pipe with water up to an elevation of 10 feet above the flow line at the pipe outlet, or up to the principal spillway inlet elevation, whichever is less, unless a different elevation is required by the test method described in K.A.R. 5-40-16(b).

(e) The applicant shall note the exact elevation of the water surface at the time the test begins. At the end of the prescribed test duration, the applicant shall measure the water surface elevation.

(f) The applicant shall use one of the test methods described in K.A.R. 5-40-16 to determine whether the water leakage rate is acceptable.

(g) If the leakage rate determined by either of the methods described in K.A.R. 5-40-16 is not acceptable, the applicant shall determine the source of the leakage and correct the leakage. After correction, the applicant shall perform another test in accordance with K.A.R. 5-40-15 and K.A.R. 5-40-16.

(h) If the leakage rate determined by either of the methods described in K.A.R. 5-40-16 is acceptable, the applicant shall drain and backfill the pipe in the manner prescribed by the approved plans and specifications. (Authorized by K.S.A. 82a-303a; implementing K.S.A. 82a-303b; effective Sept. 22, 2000.)

5-40-16. Testing a principal spillway pipe installation in a dam; allowable leakage rate, test methods. The allowable leakage rate for a principal spillway pipe installation in a dam shall not exceed 1,000 gallons per inch diameter

of pipe per mile of pipe per day. The applicant shall use one of the following test methods in determining whether the allowable leakage rate has been exceeded:

(a) The applicant shall use the following test method procedure for a drop inlet structure if the starting and ending elevation of the water is within the vertical drop structure and above the top of the barrel:

(1) Calculate the allowable leakage rate in gallons per minute for the pipe being tested based on the following formula:

The allowable leakage rate in gallons per minute = $0.000132 \times d \times l$ where:

d = diameter of the tested pipe in inches

l = length of the tested pipe in feet

If the allowable leakage rate in gallons per minute is determined to be less than one, then it shall be assumed for the purposes of the test that the allowable leakage rate in gallons per minute is one.

(2) Conduct the test for 15 minutes.

(3) If the allowable leakage rate is one gallon per minute, the applicant may use the following table to determine the allowable drop in the elevation of the water in the riser.

Nominal diameter of riser (inches)	Allowable drop (feet)
18	1.13
20	0.83
24	0.64
30	0.41
36	0.28

(4) If the measured drop in the riser exceeds the corresponding allowable drop in paragraph (a)(1) above, the allowable leakage rate has been exceeded, which shall not be acceptable. If the measured drop in the riser is less than or equal to the corresponding allowable drop in paragraph (a)(1) above, the allowable leakage rate has not been exceeded and shall be acceptable.

(b) The applicant shall use the following test method procedure for all other types of installations, including canopy inlets:

(1) If filling the pipe with water up to an elevation of 10 feet above the outlet puts water within the vertical riser below the top of the barrel, the elevation shall be reduced below the bottom of the vertical riser before the test begins.

(2) The allowable drop in elevation is a function of the allowable leakage rate, test duration, and

the diameter and slope of the pipe. The allowable drop in the pipe in feet shall be calculated by use of the following formula:

$$\frac{\text{allowable rate (gallons per minute)} \times \text{test duration (minutes)} \times \text{slope (\%)}}{[\text{diameter (inches)}]^2 \times 4.08}$$

(3) The minimum test duration shall be 15 minutes. If the above formula results in an allowable drop of less than 0.1 foot in 15 minutes, the test duration shall be extended so that the allowable drop is greater than 0.1 feet.

(4) The water surface elevation drop shall be measured by means of a clear plastic tube installed in the plug at the downstream end of the principal spillway pipe. Any other means of measuring the drop in elevation shall be approved by the chief engineer in advance of the test.

(5) If the measured drop is greater than the allowable drop as calculated in paragraph (b)(2), the allowable leakage rate has been exceeded, which shall not be acceptable. If the allowable drop is less than or equal to the allowable drop as calculated in paragraph (b)(2), the allowable leakage rate has not been exceeded, which shall be acceptable. (Authorized by K.S.A. 82a-303a; implementing K.S.A. 82a-303b; effective Sept. 22, 2000.)

5-40-20. Hazard classes of dams. (a) The hazard classes of dams shall be determined from the following based on the location of the dam, the hazards found within the inundation area, and the impact of a failure of a dam:

(1) A “hazard class A dam” shall mean a dam located in an area where failure could damage only farm or other uninhabited buildings, agricultural or undeveloped land including hiking trails, or traffic on low-volume roads that meet the requirements for hazard class A dams as specified in subsections (b) and (c).

(2) A “hazard class B dam” shall mean a dam located in an area where failure could endanger a few lives, damage an isolated home, damage traffic on moderate-volume roads that meet the requirements for hazard class B dams as specified in subsections (b) and (c), damage low-volume railroad tracks, interrupt the use or service of a utility serving a small number of customers, or inundate recreation facilities, including campground areas intermittently used for sleeping and serving a relatively small number of persons.

(3) A “hazard class C dam” shall mean a dam located in an area where failure could result in any of the following:

- (A) Extensive loss of life;
- (B) damage to more than one home;
- (C) damage to industrial or commercial facilities;
- (D) interruption of a public utility serving a large number of customers;
- (E) damage to traffic on high-volume roads that meet the requirements for hazard class C dams as specified in subsections (b) and (c) or a high-volume railroad line;
- (F) inundation of a frequently used recreation facility serving a relatively large number of persons; or
- (G) two or more individual hazards described in hazard class B.

(b) If there is a road across any part of the embankment or a spillway, including the auxiliary spillway or service spillway channel down to the receiving stream, the daily vehicular traffic shall be considered in determining the hazard classification, in addition to the criteria specified in subsection (a). The hazard classifications specified in this subsection shall be used if these classifications are more stringent than the hazard classifications required by subsection (a).

Hazard class	Vehicles per day
A	0 through 100
B	101 through 500
C	more than 500

(c) If any road in the inundation area does not meet the criteria of subsection (b), the daily vehicular traffic shall be considered in determining the hazard classification, in addition to the criteria specified in subsection (a). The hazard classifications specified in this subsection shall be used if these classifications are more stringent than the hazard classifications otherwise required by subsection (a).

Hazard class	Vehicles per day
A	0 through 500
B	501 through 1,500
C	more than 1,500

(Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-303a and 82a-303b; effective May 18, 2007.)

5-40-21. Class sizes of dams. (a) Each dam that the chief engineer has authority to regulate pursuant to K.S.A. 82a-301 et seq., and amendments thereto, with an effective height of less than 25 feet and an effective storage of less than 50 acre-feet shall be considered to be a class size

1 dam. The class size of all other dams shall be determined from the following table:

Class size	Size factor
2	less than 3,000
3	3,000 through 30,000
4	more than 30,000

(b) Each existing permitted dam and each dam for which an application was submitted before the effective date of this regulation shall continue to have the effective height measured from the flow line of the stream at the centerline of the dam. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-303a and 82a-303b; effective May 18, 2007.)

5-40-22. Design requirements for construction of a dam. Each dam constructed shall meet or exceed the design requirements specified in the table in this regulation. The minimum top of the dam elevation shall be the maximum water surface elevation determined by routing the design storm specified in the following table, using the methodology specified in K.A.R. 5-40-30 through K.A.R. 5-40-33, through the reservoir and the dam’s spillways, plus the minimum freeboard shown in the following table. The minimum floor width of the open-channel spillway shall be the minimum floor width shown in the following table.

Dam size class	Hazard class	Precipitation for design storm	Minimum freeboard in feet	Minimum floor width of open-channel spillway in feet
1	A	2% chance	1	20
	B	0.25 PMP	2	
	C	0.40 PMP	3	
2	A	1% chance	2	30
	B	0.25 PMP	2	
	C	0.40 PMP	3	
3	A	1% chance	3	40
	B	0.30 PMP	3	
	C	0.40 PMP	3	
4	A	0.25 PMP	3	40
	B	0.30 PMP	3	
	C	0.40 PMP	3	

(Authorized by and implementing K.S.A. 2006 Supp. 82a-303a; effective May 18, 2007.)

5-40-23. Detention storage. (a) To determine the minimum required detention storage, the applicant shall show that the computed runoff from the detention storm can be stored in the reservoir and discharged through the primary spillway without any flow being discharged through the auxiliary spillway. The elevation of the auxiliary spillway control section shall be set so that the computed runoff from the detention storm specified in the following table and determined from the procedures in K.A.R. 5-40-30 through K.A.R. 5-40-33 does not result in discharge through the auxiliary spillway.

Hazard class	Size	Purpose	Minimum detention storm
A	1, 2	Flood control	4% chance
A	3	Flood control	4% chance
A	4	Flood control	2% chance
Hazard class	Size	Purpose	Minimum detention storm
B	All	Flood control	2% chance
C	All	Flood control	2% chance
A	1, 2	All uses other than flood control	50% chance
A	3	All uses other than flood control	50% chance
A	4	All uses other than flood control	20% chance
B	All	All uses other than flood control	20% chance
C	All	All uses other than flood control	20% chance

Each dam that has flood control as a purpose shall meet the detention storm requirements for a flood control structure. A dam that is not constructed for flood control purposes and whose auxiliary spillway meets the requirements for a service spillway in K.A.R. 5-40-57 shall not be required to meet any minimum detention storm requirement in the table in this subsection.

(b) Each dam shall have a primary spillway and an auxiliary spillway, unless a service spillway meeting the requirements of K.A.R. 5-40-57 is provided. (Authorized by and implementing K.S.A. 2006 Supp. 82a-303a; effective May 18, 2007.)

5-40-24. Dam breach analysis. A dam breach analysis shall be conducted on each proposed dam as specified in this regulation. If a dam breach analysis is required for an existing dam, the analysis shall be conducted in the same manner as that specified in this regulation for a proposed dam. (a) To determine the appropriate water surface elevation in the reservoir when the breach begins, the breach analysis shall route the appropriate design duration one percent-chance storm determined by K.A.R. 5-40-31 through the

reservoir. The routing shall begin by assuming that the water surface elevation is at the elevation of the lowest uncontrolled spillway inlet, not including any low-flow augmentation works. The antecedent moisture condition (AMC) used to determine the runoff shall be determined according to K.A.R. 5-40-32. The minimum water surface elevation used to begin the breach analysis shall be the greater of the following:

(1) The water surface elevation determined by routing the required design duration one percent-chance storm through the reservoir; or

(2) the elevation of the crest of the auxiliary spillway.

Routing the storm through the reservoir may account for the discharge of the primary spillway and any open-channel spillways. If the dam does not have an open-channel spillway, the water surface elevation used shall be the elevation of the top of the dam or the elevation resulting from using PMP as the runoff event, whichever is lower.

(b) The breach discharge shall be determined by using the peak breach discharge criteria section on pages 1-1 through 1-2 in "earth dams and reservoirs," TR-60, dated July 2005, published by the conservation engineering division of the natural resources conservation service, and hereby adopted by reference, unless the applicant receives written approval of the chief engineer to use a model that is more appropriate for a particular dam. The breach discharge hydrograph shall be determined by methods in NRCS TR-66, third edition, "simplified dam-breach routing procedure," dated September 1985, which is hereby adopted by reference, including the appendices. If another model is used, the following breach modeling assumptions shall be used, unless the applicant demonstrates to the chief engineer that more appropriate assumptions should be used:

(1) The parameters shall support the assumption of a rapidly developing breach that is either an overtopping failure or a spillway failure caused by intense, localized erosion beginning at the downstream end of the auxiliary spillway or service spillway and working its way upstream.

(2) If the breach model has breach width as a variable, the minimum bottom width of the breach shall be twice the height of the dam. If there is a well-defined physical floodplain, the height of the dam may be measured from the top of the low bank of the stream to the top of the dam for the purpose of determining the minimum breach width.

(3) If the side slopes of the breach are a parameter of the model, vertical side slopes shall be used.

(4) If the breach model has breach time as a variable, the maximum breach time shall be one minute per foot of height of the dam.

(c) The breach discharge shall be routed downstream using a hydraulic flow model in accordance with sound engineering principles and commonly accepted engineering practices. An unsteady state hydraulic flow model shall be used if it is necessary to model existing hydraulic structures in the inundation area. In all other instances, a steady state hydraulic flow model may be used.

(d) The inundation area analyzed shall meet both of the following requirements:

(1) Be from the downstream toe of the dam and the control section of any open-channel section of any open-channel spillway, downstream to the point where the crest of the breach wave intersects the flood level of the peak discharge of the one percent-chance storm, assuming that the dam was not in place; and

(2) be analyzed to the point at which there are no more hazards downstream.

The peak discharge of the one percent-chance storm may be determined by any of the methods provided in K.A.R. 5-42-5 or the appropriate published flood insurance study for the stream receiving the discharge from the breach of the dam.

(e) If there is more than one dam on a stream, it shall be assumed that the most upstream dam is breached first and that the peak flow of that breach arrives at the next downstream dam at the same time the peak water surface elevation from the inflow of the one percent-chance storm from the uncontrolled portion of the lower dam's drainage area occurs. An appropriate model may be used to demonstrate when the peaks will occur for an entire system of dams, in which case the water surface elevation modeled shall be used.

(f) If there are dams on separate tributaries above the dam being analyzed, the modeling assumption specified in subsection (e) shall be applied only to the tributary that has the upstream dam whose breach results in the greatest computed breach discharge at the dam being analyzed.

(g) If digital elevation data is used in the analysis of the breach, the data used shall have a root mean square error of 2.5 meters or less.

(h) Cross sections for modeling purposes shall be taken at appropriate locations, but in no case shall the intervals be greater than 2,640 feet measured along the floodplain of the watercourse.

Cross sections shall be generally perpendicular to the direction of flow and the contour lines that the cross sections intersect. Cross sections may be broken into several connected segments as needed to meet the requirements of this subsection.

(i) Each bridge and any other hydraulic structure that has a significant hydraulic effect shall be included in the analysis.

(j)(1) The applicant shall submit a contour map of the valley with contour intervals of 10 feet or less and a scale of not less than 1:24,000, which shall show the following:

(A) The inundation area determined from the breach;

(B) the location of each existing hazard; and

(C) each cross section entered in the hydraulic flow model with a label identifying the cross section.

(2) The following items shall be shown on the contour map or on separate documentation:

(A) The elevation of each existing hazard;

(B) the water surface elevation at each existing hazard;

(C) the elevation of the streambed at the point nearest each existing hazard; and

(D) a tabular report including the following information for each cross section:

(i) The label identifying each cross section shown on the map;

(ii) the elevation of the maximum water surface attained during the breach;

(iii) the peak discharge; and

(iv) the computed width of the water surface.

(3) If there are more than 10 hazards in any 2,640-foot reach in the flood inundation area, the information required in paragraph (j)(2) may be noted only for the hazard in that reach that is closest to the maximum water surface elevation measured vertically and the hazard in that reach that is farthest from the maximum water surface elevation measured vertically.

(k) The applicant shall submit one copy of each data file used to perform each analysis in electronic form along with identification of the computer programs used to perform the analysis and any model documentation needed for the chief engineer to review the analysis. (Authorized by K.S.A. 2007 Supp. 82a-303a; implementing K.S.A. 2007 Supp. 82a-302 and 82a-303a; effective May 18, 2007; amended Oct. 3, 2008.)

5-40-26. Request to issue or reconsider hazard class determination. (a)(1) If an owner or applicant does not agree with the hazard classifi-

cation determined for a dam, the owner or applicant may file a request for reconsideration of the hazard class determination.

(2) Each request for reconsideration shall be submitted in writing and shall indicate the following:

(A) The owner's or applicant's proposed hazard classification;

(B) the basis of that proposal; and

(C) an explanation of why the owner or applicant believes that the determination of the hazard classification by the chief engineer is incorrect. The request shall also contain documentation and analysis that support the request.

(3) Each request for reconsideration shall be filed with the chief engineer within 15 days after the owner or applicant is served with written notice of the hazard classification by the office of the chief engineer or within any extension of time authorized by the chief engineer in writing.

(b) Each request for reconsideration shall be reviewed by the chief engineer, and a final written determination of the hazard classification shall be made by the chief engineer.

(c) If the chief engineer has not issued a written notice of the hazard classification, the owner or applicant may request a written notice after the owner or applicant has been informed verbally of the proposed hazard classification by the chief engineer. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-303a and 82a-303b; effective May 18, 2007.)

5-40-30. Time of concentration. (a) Except as specified in subsections (b) and (c), the time of concentration (T_c) shall be determined by using one of the methods specified in chapter 15, "travel time, time of concentration and lag," in the natural resources conservation service (NRCS) national engineering handbook, part 630, dated August 1972, which is hereby adopted by reference.

(b) For drainage areas of not more than three square miles, the time of concentration (T_c) may be determined by use of the Kirpich formula, which is as follows:

$$T_c = \left(\frac{11.9L^3}{H} \right)^{0.385}$$

Where

T_c = the time of concentration, in hours

L = the longest distance that water has to travel in the drainage basin, in miles

H = the maximum elevation difference in the drainage basin, in feet.

(c) In addition to the methods specified in subsections (a) and (b), the applicant may determine T_c based on sound engineering principles and commonly accepted engineering practices if the applicant obtains the prior written consent of the chief engineer. (Authorized by and implementing K.S.A. 2006 Supp. 82a-303a; effective May 18, 2007.)

5-40-31. Design duration rainfall depth.

(a) If the time of concentration is six hours or less, a duration of six hours shall be used for all design storms. The appropriate six-hour storm depth, in inches, shall be selected from the following table.

County	Probability of occurrence in any year						PMP
	50%	20%	4%	2%	1%		
Allen	2.7	3.5	4.8	5.4	6.1	28.0

(b) If the time of concentration of the watershed, or any subwatershed being used to develop the inflow hydrograph, is more than six hours, the ratio for the time equal to or greater than the computed time of concentration shall be selected from the following table. Linear interpolation shall be acceptable. That ratio shall be multiplied by the depth of the six-hour rainfall in the table in subsection (a). The resulting depth is the design duration rainfall depth.

Relative increase in rainfall amount for storm durations over six hours

Time (hours)	100-year ratio	PMP ration
6	1.000	1.000
6.5	1.019	1.013
7	1.035	1.025
7.5	1.051	1.037
8	1.066	1.048
8.5	1.081	1.058
9	1.094	1.068
9.5	1.108	1.078
10	1.120	1.087
10.5	1.132	1.096
11	1.144	1.104
11.5	1.155	1.112
12	1.166	1.120
13	1.187	1.134
14	1.207	1.148
15	1.225	1.161
16	1.243	1.173
17	1.259	1.185
18	1.275	1.196
20	1.305	1.217
22	1.333	1.236
24	1.359	1.254

(c) If the drainage area exceeds 10 square miles, the rainfall depth obtained from the table in sub-

section (a) may be reduced by the ratio shown in the table in this subsection. The ratio for the zone in which the dam is located and a drainage area less than or equal to the actual drainage area above the dam shall be selected. The use of linear interpolation shall be acceptable. That ratio shall be multiplied by the depth of rainfall from the table in subsection (a). The result is the design duration rainfall depth. The ratios in subsection (b) and this subsection may be used together, if subsections (b) and (c) both apply.

Drainage Area (sq. mi.)	Reduction Ratio		
	Zone 1	Zone 2	Zone 3
10	1.00	1.00	1.00
12	0.99	0.99	0.98
15	0.97	0.95	0.93
17	0.96	0.94	0.91
20	0.94	0.91	0.88
22	0.93	0.90	0.86
25	0.92	0.88	0.83
27	0.92	0.87	0.82
30	0.91	0.86	0.80
35	0.90	0.84	0.77
40	0.88	0.82	0.75
45	0.87	0.80	0.72
50	0.86	0.78	0.70
60	0.84	0.75	0.65
70	0.82	0.72	0.62
80	0.80	0.70	0.59
90	0.79	0.68	0.57
100	0.78	0.67	0.55

Zone 1, zone 2, and zone 3 shall have the meanings specified in K.A.R. 5-40-1 under the definition of a “stream.” (Authorized by and implementing K.S.A. 2006 Supp. 82a-303a; effective May 18, 2007.)

5-40-32. Determination of rainfall excess. (a) Rainfall excess shall be determined by using the natural resource conservation service (NRCS) runoff curve number method.

(b) The antecedent moisture condition (AMC) to be used when determining the curve number for the design storm shall be one of the following:

(1) For zone one, the curve number determined using AMC III;

(2) for zone two, the curve number determined by averaging the AMC II and AMC III curve numbers; or

(3) for zone three, the curve number determined using AMC II.

Zone one, zone two, and zone three shall have the meanings specified in K.A.R. 5-40-1 under the definition of a “stream.”

(c) If the drainage basin is in two zones, the curve number may be weighted based on the drainage area within each zone.

(d) AMC II shall be used in determining the rainfall-runoff relationship used to compute the required detention storage. (Authorized by and implementing K.S.A. 2006 Supp. 82a-303a; effective May 18, 2007.)

5-40-33. Hydrographs. The rainfall excess determined in K.A.R. 5-40-32 shall be used to determine the time-discharge relationship of inflow to the reservoir for the detention storm and design storm using the techniques described in chapter 16, "hydrographs," in the natural resource conservation service (NRCS) national engineering handbook, part 630, dated March 2007, which is hereby adopted by reference. (Authorized by and implementing K.S.A. 2006 Supp. 82a-303a; effective May 18, 2007.)

5-40-40. Geotechnical investigation of all dams. (a) Each applicant shall ensure that a sufficient geotechnical investigation is performed on the proposed site for each dam to design the dam in accordance with the regulations of the chief engineer and with sound engineering principles and commonly accepted engineering practices. The materials under the proposed dam, open-channel spillway, and borrow area shall be investigated before design and submission of the application for a permit to construct a dam. If unusual or unexpected foundation conditions are encountered in the investigations required in this regulation, additional geotechnical investigation and soil mechanics testing shall be performed as necessary to design and construct the dam in accordance with the regulations of the chief engineer and with sound engineering principles and commonly accepted engineering practices.

(b) The geotechnical investigation specified in these regulations shall be designed by a licensed professional competent in geotechnical investigation and analysis for dams.

(c) The geotechnical information specified in these regulations shall be included in the engineering design report and submitted with the proposed construction plans. The report shall contain a general description of the geotechnical investigation, including the method used for sampling.

(d) The soils sampled in all of the geotechnical investigations shall be classified by using field

classification methods and the uniform soil classification system.

(e) The dam design shall make appropriate accommodations for the geology discovered in the investigation.

(f)(1) The foundation of the dam shall be investigated to a depth of not less than one-half the height of the dam at the location of the test hole plus five feet.

(2) If unweathered bedrock is encountered before reaching the sampling depth required in paragraph (f)(1), the sampling shall be done to the unweathered bedrock.

(g) The static water level in each test hole shall be recorded.

(h) A sufficient number of test holes shall be made in each open-channel spillway to determine the stability of the spillway crest and the outlet channel down to the streambed elevation.

(i) A sufficient number of test holes in the borrow area shall be made to determine the amount of suitable material available and to classify the soil to be used in the embankment. (Authorized by and implementing K.S.A. 2006 Supp. 82a-303a; effective May 18, 2007.)

5-40-41. Geotechnical investigation of a low-impact dam. (a) In addition to meeting the requirements of K.A.R. 5-40-40, each low-impact dam shall have a sufficient number of properly placed test holes to be representative of the geology under the proposed dam embankment, with an average of at least one test hole each 200 feet along the centerline of the dam and at least three test holes.

(b) Except as specified in subsection (d) and K.A.R. 5-40-74, each existing unpermitted, illegal dam shall have the same level of geotechnical investigation as that required for a proposed new dam, except that testing the borrow area shall not be required, before a permit will be issued. In addition, the condition of the following shall be determined:

(1) All conduits passing through the embankment;

(2) the embankment in the vicinity of the conduits; and

(3) the rest of the embankment, including any slides, seeps, saturated areas, sloughs, and other visible anomalies in the embankment.

(c) If there are any signs of instability in the embankment, the stability of the slope of the existing embankment shall be analyzed according to the requirements of K.A.R. 5-40-46(c).

(d) An existing unpermitted, illegal low-hazard dam that is class size 1, 2, or 3, for which a qualified professional has conducted an inspection and submitted to the chief engineer a report of that investigation demonstrating that a geotechnical investigation is not necessary to protect the public safety and property, shall not be required to have the geotechnical investigation required by subsection (b). (Authorized by and implementing K.S.A. 2006 Supp. 82a-303a; effective May 18, 2007.)

5-40-42. Geotechnical investigation of a high-impact dam. (a) In addition to meeting the requirements of K.A.R. 5-40-40, each proposed high-impact dam shall have at least the following number of geotechnical test holes:

(1) A sufficient number of properly placed test holes to be representative of the geology under the proposed dam embankment, with an average of at least one test hole every 100 feet along and as close to the centerline of the dam as practical and a minimum of three test holes; and

(2) a test hole as close as practical to the anticipated location of the following:

(A) The base of the drop inlet; and

(B) the support of the outlet pipe.

(b) At least one representative sample of undisturbed soil shall be tested to determine shear strength parameters, permeability, and compressibility.

(c) The geotechnical investigation shall determine the following for at least one representative sample:

(1) Atterberg limits;

(2) the settlement characteristics of the proposed embankment materials and the foundation of the dam;

(3) the Proctor compaction curves of soils;

(4) gradation tests of foundation materials, especially where drain systems could be located; and

(5) any other properties necessary to design a dam to meet the requirements of the regulations of the chief engineer, sound engineering principles, and commonly accepted engineering practices.

(d) Each existing unpermitted, illegal dam shall have the same level of geotechnical investigation as that required for a proposed dam, except that testing the borrow area shall not be required, before a permit may be issued. In addition, the following properties shall be determined:

(1) The condition of all conduits passing

through the embankment and the condition of the embankment in the vicinity of the conduits;

(2) the in situ density of the existing embankment and its foundation;

(3) the condition of the embankment, including any slides, seeps, saturated areas, sloughs, and other visible anomalies in the embankment; and

(4) a slope stability analysis of the existing embankment, which shall be performed according to the requirements of K.A.R. 5-40-46. (Authorized by and implementing K.S.A. 2006 Supp. 82a-303a; effective May 18, 2007.)

5-40-43. Cutoff trench. (a) Each dam shall have a cutoff trench. The cutoff trench shall meet all of the following requirements:

(1) Have side slopes no steeper than one horizontal unit to one vertical unit;

(2) have a bottom width of 10 or more feet as necessary to meet the compaction requirements of K.A.R. 5-40-44;

(3) be constructed to the depth justified in the design report based on the findings in the geotechnical report, unless observations by the inspecting engineer during construction justify a different depth;

(4) be backfilled with the most impervious material available at the site. If no impervious material is available at the site, then this material shall be procured off-site;

(5) be backfilled with material that is contiguous to and homogeneous with the most impervious zone within the dam, if the dam is designed as a zoned fill;

(6) be constructed in lifts that shall not exceed nine inches for each lift; and

(7) be constructed of a material that has been brought to acceptable moisture content.

(b) The material placed in the cutoff trench shall be placed according to the same specifications as those required for the embankment in K.A.R. 5-40-44. (Authorized by and implementing K.S.A. 2006 Supp. 82a-303a; effective May 18, 2007.)

5-40-44. Embankment. (a) The minimum top width of an embankment shall be determined from the following table:

Height of dam (in feet)	Minimum top width (in feet)
less than 20	10
20 through 24.9	12

Height of dam (in feet)	Minimum top width (in feet)
25 through 39.9	14
40 or greater	15

(b) The top of the dam shall be sloped toward the reservoir, unless special measures are taken to adequately control erosion on the downstream side of the dam.

(c) The height of each lift in the embankment and cutoff trench shall be no more than nine inches, unless the dam is designed as a zoned fill. If the dam is designed as a zoned fill, the lifts outside the cutoff trench and most impermeable zone may be larger if geotechnical data is provided that shows that adequate compaction can be achieved using lifts in excess of nine inches.

(d) The material in each low-impact embankment and cutoff trench shall be brought to a moisture content that can be compacted in accordance with this subsection. Each application for a low-impact dam shall contain specifications requiring adequate compaction. The minimum compaction required shall be achieved by one of the following:

- (1) Using a sheepsfoot roller until the feet cease to push into the fill material and start to walk across the compacted surface;
- (2) using the controlled movement of rubber-tired earth-moving equipment so that every point on the surface of each lift is traversed by not less than one tread track of the equipment; or
- (3) using another method that achieves the compaction required by this subsection.

(e) Each high-impact dam shall include the following in its specifications for earth placement in the embankment and cutoff trench:

- (1) The minimum and maximum allowable levels of soil moisture;
- (2) the compaction standards;
- (3) a provision for testing the soils placed during construction; and
- (4) a means to ensure that the compaction standards approved by the chief engineer are met during construction.

(f) In addition to the requirements of subsections (d) and (e), the specifications for hand-compacted fill around each conduit in the embankment shall meet the following requirements:

- (1) Set a maximum lift of one-third the diameter of the outside of the conduit. However, no lift shall exceed four inches; and
- (2) specify a minimum distance around the conduit for hand compaction. (Authorized by and im-

plementing K.S.A. 2006 Supp. 82a-303a; effective May 18, 2007.)

5-40-45. Allowance for settlement of an earthen dam. (a) A detailed soil mechanics investigation report shall be submitted as part of the design report for each high-impact dam. An appropriate allowance for settlement shall be made based on the results in the soil mechanics report.

(b) If a detailed soil mechanics investigation report is not submitted for a low-impact dam, at least five percent of the height of the dam shall be allowed for settlement of the embankment.

(c) An allowance for settlement on each dam may be made by steepening the side slopes during construction and adding to the height of the embankment as needed to increase the height of the dam. (Authorized by and implementing K.S.A. 2006 Supp. 82a-303a; effective May 18, 2007.)

5-40-46. Side slopes of an earthen dam.

(a) The side slopes of each earthen dam shall be designed and constructed to be stable and easily maintained.

(b) A slope stability analysis shall be required on each high-impact dam.

(c) If a slope stability analysis is required, the minimum factor of safety shall be based on the steady-state seepage load condition with the water level at the elevation of the lowest open-channel spillway or other uncontrolled spillway with a trash rack that meets the requirements of K.A.R. 5-40-51, as shown in the following table:

Class size	Hazard class	Factor of safety
4	A	1.4
3, 4	B	1.5
1, 2, 3, 4	C	1.5

(d) Each dam whose face is subject to prevailing winds shall be given additional protection from erosion caused by wave action, which may include a flatter side slope, the use of riprap, or the use of grass or vegetation adapted to fluctuating water levels. The design of any slope protection for the embankment and the auxiliary spillway or service spillway shall be shown on the plans. If no slope protection is provided, regardless of the orientation of the dam, the design report shall provide justification for not having slope protection.

(e) The steepest allowable design side slope shall be three horizontal units to one vertical unit on the upstream side of the dam, and two and

one-half horizontal units to one vertical unit on the downstream slope of the dam. (Authorized by and implementing K.S.A. 2006 Supp. 82a-303a; effective May 18, 2007.)

5-40-50. Pipes. (a) Each pipe under or through an embankment shall meet the following requirements:

(1) Be capable of withstanding the external load without buckling, cracking, being damaged, or being deformed. The minimum internal diameter of the pipe shall not be reduced by more than the pipe manufacturer’s stated allowable, long-term pipe deflection limit and in no case by more than five percent;

(2) be designed to adequately resist flotation;

(3) be impervious to water, with watertight joints and seams;

(4) except for drawdown pipes, be installed with sufficient slope to provide adequate drainage, with a minimum average slope of one percent after settlement. No pipe shall have an adverse grade through any section of pipe;

(5) if the pipe is installed in conjunction with a riser on a high-impact dam, be placed to insure that the requirements of paragraph (a)(4) are met and that all pipe sections are properly aligned after settlement of the foundation and consolidation of the embankment;

(6) have the discharge end extended a sufficient distance beyond the downstream toe of the dam to avoid erosion to the dam;

(7) be adequately supported at the discharge end to prevent deflection when the pipe is flowing full; and

(8) if the pipe is a primary spillway, be sized to evacuate 95 percent of the detention storage in 14 or fewer days.

(b) Steel cylinder-reinforced concrete pipe shall be acceptable for use in any dam if the design computations, plans, and specifications related to the placement of the pipe meet the minimum requirements of the manufacturer.

(c) In applying the provisions of subsections (c), (e), and (f), the depth of fill over the top of each pipe shall be measured from the top of the embankment after settlement has occurred. Reinforced concrete pipe shall be acceptable for use in a low-impact dam if less than 30 feet of fill will be placed over the pipe and if the design computations, plans, and specifications related to the placement of the pipe meet the minimum requirements of the manufacturer.

(d) Each metal pipe shall be coated with a protective coating adequate to prevent corrosion for the planned life of the dam, or the design report shall include an estimate of the expected life of the pipe, the expected life of the dam, and a plan for replacement of the pipe when it no longer functions as designed.

(e) Corrugated metal pipe shall be acceptable for use in any hazard class A or B dam if no more than 25 feet of fill is placed over the pipe.

(f)(1) Polyvinyl chloride pipe shall be acceptable for use in any dam if the maximum fill over the pipe does not exceed the depth specified in the following table:

Standard dimension ratio (SDR)	Maximum fill over top of pipe (feet)
SDR 17 and thicker	35
SDR 18	31
SDR 21	23
SDR 25	18
SDR 26	16
SDR 28	14

A pipe with walls thinner than SDR 28 shall not be used.

(2) Polyvinyl chloride pipe shall not be placed in high-plasticity soils.

(3) Each portion of polyvinyl chloride pipe that will be exposed to sunlight shall be protected as recommended by the manufacturer of the pipe or shall be encased in a protective material.

(g) Pipe materials other than those described in subsections (b) through (f) may be used if the applicant demonstrates that all of the following criteria are met:

(1) The pipe material, accounting for any protective measures that will be taken, has a minimum expected life of 25 years if exposed to sunlight or buried in soil with the same characteristics of the soil to be used to construct the dam.

(2) All of the pipe manufacturer’s design recommendations are met by the plans and specifications for the dam and are documented in the design report.

(3) All of the pipe manufacturer’s recommendations for bedding, supporting, and installing the pipe are included in the specifications for construction of the dam, except those specifications that are demonstrated in the design report to be inapplicable in the construction of the proposed dam.

(4) The design report includes an estimate of the life of the pipe, the life of the dam, and a plan to replace the pipe when it no longer functions as designed if the design life of the pipe is less than that of the dam.

(5) The design report demonstrates that the proposed placement and use of the pipe will meet the requirements of sound engineering principles and commonly accepted engineering practices.

(h) If the estimated life of a pipe is less than the estimated life of the dam, the permit shall contain the condition that the pipe shall be replaced when the pipe no longer functions properly. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-302 and 82a-303a; effective May 18, 2007.)

5-40-51. Acceptable trash racks for primary spillways. (a) Except as specified in subsection (c), each new or modified primary spillway permitted on or after the effective date of this regulation shall be equipped with an acceptable trash rack, as specified in subsection (b).

(b) “Acceptable trash rack” shall mean a trash rack designed and constructed to prevent debris from clogging the inlet of the primary spillway or the primary spillway conduit. Each acceptable trash rack shall be constructed of material of sufficient strength to withstand the impact of the material that could strike the inlet.

(c)(1) Each primary spillway in a dam permitted before the effective date of this regulation shall be equipped with the acceptable trash rack required by the permit and approval of design. If no trash rack was required by the permit and approval of design, no trash rack shall be required unless the primary spillway fails to function properly.

(2) If the applicant demonstrates that there is not sufficient woody vegetation or other debris in the drainage area to justify the installation of an acceptable trash rack, the requirement to have an acceptable trash rack may be waived.

(d) If a fish screen is installed, the screen shall not impair the functioning of the primary spillway. If a fish screen is proposed, the design report shall demonstrate that the screen is designed in accordance with the standards of subsection (b) and will not impair the functioning of the primary spillway. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-302 and 82a-303a; effective May 18, 2007.)

5-40-52. Stilling basins. (a) For each new dam, for each primary spillway conduit replacement, and for each existing dam for which the chief engineer determines that it is necessary to protect the integrity of the embankment, each primary spillway conduit with a cross-sectional area in excess of 1.75 square feet shall discharge into one of the following:

(1) A constructed stilling basin below the downstream toe of the dam; or

(2) any other constructed works designed to dissipate energy and prevent erosion.

(b) If a stilling basin is required or constructed, the stilling basin shall be designed to dissipate the energy of the water exiting the conduit so that the stilling basin discharges water to the receiving channel without causing excessive erosion and the stilling basin itself is not damaged by full conduit flow.

(c) The invert of the outlet conduit that discharges into a stilling basin shall be located at least one foot above the tailwater elevation in the stilling basin when water is flowing through the primary spillway at the maximum rate of discharge during the design storm. (Authorized by and implementing K.S.A. 2006 Supp. 82a-303a; effective May 18, 2007.)

5-40-53. Drawdown pipes. (a) Except as specified in subsection (b), each dam shall be equipped with a drawdown pipe that meets the requirements for a pipe as specified in K.A.R. 5-40-50. A valve or gate shall be installed in the pipe so that the controls are accessible and damage from freezing is prevented. Drawdown pipes may be incorporated into the primary spillway.

(b) The installation of a drawdown pipe shall not be required for a low-impact dam if the chief engineer determines that both of the following criteria are met:

(1) The failure to install a drawdown pipe will not prejudicially and unreasonably affect the public interest and the public safety.

(2) The drawdown pipe is not necessary to administer water rights.

(c) Each drawdown pipe shall have the capacity to evacuate 90 percent of the volume of the permanent pool in 14 or fewer days assuming no inflow into the reservoir, but in no case shall the drawdown pipe have an internal diameter of less than four inches. The inlet of the drawdown pipe shall be constructed to reduce the likelihood of plugging. (Authorized by and implementing K.S.A. 2006 Supp. 82a-303a; effective May 18, 2007.)

5-40-54. Control of seepage along a conduit. (a) Each conduit through any portion of a dam below the elevation of the permanent pool shall be constructed to protect the dam from seepage along the conduit by means of cutoff collars or a drainage diaphragm. Cutoff collars may be used only on hazard class A dams that are class sizes one and two.

(b) Each drainage diaphragm shall meet all of the following design criteria:

(1) Be installed so that the largest face is perpendicular to the conduit;

(2) be sized as follows:

(A) If the conduit is circular, the diaphragm shall extend a minimum of two feet or three times the outside diameter of the conduit, whichever is greater, from the outside surface of the conduit horizontally and vertically upward. The diaphragm shall extend vertically downward a minimum of two feet from the outside surface of the conduit;

(B) if the conduit is rectangular, the diaphragm shall extend minimum of two feet or three times the vertical dimension of the conduit, whichever is greater, from the outside surface of the conduit horizontally and vertically upward. The diaphragm shall extend vertically downward a minimum of two feet from the outside surface of the conduit;

(C) a drainage diaphragm shall not be required to penetrate unweathered bedrock; and

(D) the diaphragm shall not be required to extend vertically upward to an elevation higher than the crest of the auxiliary spillway;

(3) have a dimension parallel to the conduit that is at least three feet thick;

(4) except as specified in subsection (d), be located downstream of the centerline of the dam, downstream of the cutoff trench, and far enough upstream of the toe so that there is a minimum of two feet of fill, measured perpendicular to the surface of the embankment, over the top of the diaphragm after settlement of the embankment; and

(5) have an outlet that provides positive drainage of the diaphragm to the stilling basin or other point below the downstream toe of the dam. The flow line of the outlet shall be no lower than one-half foot above the elevation of the outlet of the stilling basin.

(c) Except as specified in subsection (d), each cutoff collar shall meet all of the following design criteria:

(1) Be constructed of the same or similar material as that of the conduit;

(2) be attached to the conduit with a watertight seal;

(3) be of sufficient size and number to increase the length of the seepage path by at least 15 percent;

(4) be spaced at intervals of at least twice the vertical dimension of the largest collar being used;

(5) be located along the conduit in that portion of the dam that will be saturated;

(6) project a minimum of two feet beyond the outside wall of the conduit; and

(7) be located no closer than two feet from any conduit joint.

(d) If cutoff collars or a drainage diaphragm is located in a zoned fill, the location shall be justified in the design report and established in accordance with sound engineering principles and commonly accepted engineering practices.

(e) If another drain included in the design meets the requirements for a diaphragm in subsection (b), that other drain may be considered to be the diaphragm required by subsection (a).

(f) If the applicant desires to use any other type of seepage control, the applicant shall demonstrate to the chief engineer that the proposed type of seepage control protects the dam from seepage along the conduit and meets the requirements of sound engineering principles and commonly accepted engineering practices. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-302 and 82a-303a; effective May 18, 2007.)

5-40-55. Earthen auxiliary spillways.

Each earthen auxiliary spillway shall meet all of the following requirements: (a) If the design discharge from the auxiliary spillway is directed so that the discharge impinges on the downstream toe of the dam, a wing dike shall be designed and constructed to direct spillway flows away from the downstream toe of the dam.

(b) If the auxiliary spillway is located on the embankment of the dam, adequate armor protection, including articulated blocks, concrete paving, gabion baskets underlain with properly designed bedding, or engineered riprap, shall be placed on the portion of the dam where the auxiliary spillway is located.

(c) The side slopes shall be no steeper than three horizontal units to one vertical unit, unless the spillway is constructed through competent sandstone or limestone.

(d) There shall be at least a 30-foot level section immediately upstream of the control sec-

tion. Immediately downstream of the control section, the slope of the spillway outlet shall be sufficient to ensure that flows at and above 50 percent of the design storm discharge will flow at a supercritical velocity.

(e) The auxiliary spillway shall be a minimum of three feet deep, as measured from the elevation of the control section to the design top of the dam.

(f) The entrance channel from the reservoir to the level section shall provide a smooth transition that prevents turbulent flow.

(g) The outlet channel shall convey flow to the receiving stream channel with a minimum of erosion.

(h) If a fish screen is installed, the screen shall not impair the functioning of the auxiliary spillway. If a fish screen is proposed, the design report shall demonstrate that the screen will not impair the functioning of the auxiliary spillway. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-302 and 82a-303a; effective May 18, 2007.)

5-40-56. Maximum design velocity for an auxiliary spillway.

(a) The maximum velocity in feet per second during the design storm for water flowing in a vegetated earthen auxiliary spillway shall be determined from the following table:

Vegetation	Slope of the exit channel			
	Erosion-resistant soils		Easily erodible soils	
	0% to 5%	5% to 10%	0% to 5%	5% to 10%
Bermuda grass and Bahia grass	8	7	6	5
buffalo grass, Kentucky blue grass, smooth brome grass, tall fescue, and reed canary grass	7	6	5	4
sod-forming grass-legume mixtures	5	4	4	3
weeping love grass, yellow bluestem, and native grass mixtures	3.5	3.5	2.5	2.5

(b) The maximum design velocities specified in subsection (a) may be increased by not more than 10 percent if the design frequency of use of the auxiliary spillway is not more than two percent. The maximum design velocities may be increased

by not more than 25 percent if the design frequency of use of the auxiliary spillway is not more than one percent.

(c) For exit channel slopes greater than 10 percent, the applicant shall provide analyses showing both of the following:

(1) There is no more than 0.5 foot of erosion depth within 20 feet of the control section for the one-percent chance storm.

(2) The auxiliary spillway does not fail by breaching during the spillway stability design event indicated in the following table:

Hazard class	Size class	Spillway stability design event
A	1, 2, or 3	0.3 PMP
A	4	0.4 PMP
B	1, 2, 3, or 4	0.5 PMP
C	1, 2, 3, or 4	PMP

(d) The provisions of paragraphs (c)(1) and (2) may be used for slopes of 10 percent or less in lieu of the maximum values specified in the table in subsection (a).

(e) The maximum allowable design velocity for water flowing over the following types of materials shall be determined from the following table:

Material Maximum velocity allowed in feet per second

stratified rock	8.0
sound rock	13.0

(f) Channel lining materials not reliant on vegetation, including concrete, riprap, and grouted riprap, may be used if the applicant demonstrates that the lining will not fail during the spillway stability design event specified in paragraph (c) (2). (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-302 and 82a-303a; effective May 18, 2007.)

5-40-57. Service spillway design.

(a) If a dam will have a service spillway, the spillway shall be designed and constructed with a lining material that meets the following requirements:

(1) Covers the channel floor and walls up to the depth of flow required to bypass the flows of the storm specified as the detention requirement in K.A.R. 5-40-23(a), at a minimum; and

(2) will not fail during the spillway stability design event specified in K.A.R. 5-40-56(c)(2).

(b) Each design report required by K.A.R. 5-40-2b shall include all hydraulic, structural, and ge-

otechnical design information necessary to show that the criteria in subsection (a) are met.

(c) If a fish screen is installed, the screen shall not impair the functioning of the service spillway. If a fish screen is proposed, the design report shall demonstrate that the screen will not impair the functioning of the service spillway. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-302 and 82a-303a; effective May 18, 2007.)

5-40-70. Construction notification to the chief engineer. Each holder of a permit to construct, or an approval to repair or modify a dam, shall notify the chief engineer at least 48 hours before any of the following stages of construction and shall obtain the approval of the chief engineer before proceeding with each of these stages of construction: (a) Starting construction;

(b) placing backfill in the cutoff trench;

(c) placing backfill around the primary spillway conduit or any other conduit that extends through the dam embankment and exits the downstream slope; and

(d) starting any stage of construction not specified in this regulation for which the permit requires that the chief engineer shall be notified. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-301a and 82a-303a; effective May 18, 2007.)

5-40-71. Inspection during dam construction, repair, and modification. (a) Except as specified in subsection (d), each high-impact dam shall be inspected by an engineer competent in the design of dams, or that engineer's authorized representative, at all times during any construction activity.

(b) Each low-impact dam shall be inspected by an engineer qualified in the design of dams, or that engineer's authorized representative, whenever any of the following conditions is met:

(1) Backfill is being placed in the cutoff trench of a dam.

(2) Conduits and their appurtenances are being placed.

(3) Backfill is being placed around a conduit.

(4) Drain material and outlets are being installed.

(5) Concrete forms and reinforcing steel are being placed.

(6) Concrete is being placed.

(7) Any other stage of construction required by

the permit, approved plans, or approved specifications to be inspected occurs.

(c) Before the start of construction, the permit holder shall provide the chief engineer in writing with the name, address, and telephone number of the engineer responsible for the inspection.

(d) The inspecting engineer, or the engineer's authorized representative, shall not be required to be present during any of the following construction activities for a high-impact dam:

(1) The clearing and grubbing of the construction site;

(2) the removal of structures from the reservoir area other than the removal of a dam;

(3) the installation of pollution-control measures, unless required by other authorities;

(4) seeding;

(5) mulching; and

(6) the construction of a fence.

(e) If the inspecting engineer, or the engineer's authorized representative, observes construction activity that is not in compliance with the approved permit, plans, or specifications and the contractor fails to correct the item or items that are not in compliance with the approved permit, plans, or specifications after being notified by the inspector, the inspector shall notify the chief engineer of the noncompliant activity. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-301a and 82a-303a; effective May 18, 2007.)

5-40-72. Construction inspection reports. The engineer responsible for the inspection required by K.A.R. 5-40-71 shall, within 30 days of the completion of the construction, repair, or modification of the dam and its appurtenances, submit to the chief engineer an inspection report containing the following items: (a) A notice of completion showing the date on which construction, repair, or modification of the dam and its appurtenances was completed;

(b) a statement indicating one of the following:

(1) The dam and its appurtenances were constructed, repaired, or modified substantially in accordance with the permit and the approved plans and specifications; or

(2) the completed work varied from the permit and the approved plans and specifications. A description of each variation shall be provided;

(c) a final survey of the completed dam and its appurtenances, including the following:

(1) A profile of the top of the dam;

(2) a profile of the centerline of the auxiliary spillway or service spillway;

(3) a cross section at the control section of the auxiliary spillway or service spillway;

(4) a cross section of the dam at its deepest point;

(5) a cross section of the dam at the primary spillway if that section is not near the deepest section of the dam;

(6) the locations and elevations of the inlet and the outlet of the primary spillway;

(7) the location and elevation of each drain outlet; and

(8) the final elevation and coordinates of each permanent benchmark; and

(d) a summary or a copy of the daily inspection logs if required by the permit. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-301a and 82a-303a; effective May 18, 2007.)

5-40-73. Emergency action plan. (a) The owner of each hazard class B dam shall create an emergency action plan (EAP) on a form prescribed by the chief engineer. The owner shall keep the original EAP and submit a copy of the EAP to the chief engineer. The EAP shall address each of the following:

(1) A description of the dam, including the location of the dam and the access roads;

(2) the name, address, and telephone number of the person responsible for notifying local authorities of an emergency;

(3) a map or written description of the area that could be inundated by the type of breach described in K.A.R. 5-40-24;

(4) a list of persons who should be notified in case of an emergency, including the telephone numbers of those persons and their responsibilities; and

(5) the names, addresses, and telephone numbers of each owner of the dam and its appurtenances and those persons responsible for the operation and maintenance of the dam.

(b) Except as specified in subsection (d), the owner of a hazard class C dam shall create and maintain an emergency action plan that meets the recommendations of the “federal guidelines for dam safety: emergency action planning for dam owners,” prepared by the interagency committee on dam safety and published by the federal emergency management agency, dated October 1998 and reprinted January 2004, which is hereby adopted by reference. The owner shall submit a copy of the EAP to the chief engineer.

(c) The owner of any dam for which an EAP is required under these regulations shall annually review the EAP to determine if it is still accurate and applicable to the current condition of the dam and current downstream conditions, including the following:

(1) The contact names and related information;

(2) the breach inundation map or a description of the inundation area; and

(3) emergency procedures.

If any material changes are made when updating the EAP, a copy of the revised EAP shall be submitted to the chief engineer.

(d) Any owner of a hazard class C dam may request that the chief engineer allow the owner to submit an EAP that meets only the requirements of subsection (a) in lieu of meeting the requirements of subsection (b). To make this request, the owner shall submit written justification of why an EAP meeting the requirements of subsection (a) is sufficient to protect the public safety. If the chief engineer approves the request, the chief engineer shall reserve the right to later impose the requirements of subsection (b) if downstream conditions change, the condition of the dam deteriorates, or the EAP does not adequately protect the public safety.

(e) The owner of a hazard class B dam shall submit the required EAP within 180 days of written notification by the chief engineer of the requirement.

(f) The owner of a hazard class C dam shall submit the required EAP within 180 days of written notification by the chief engineer that an EAP is required and that an adequate EAP is not on file in the chief engineer's office. (Authorized by and implementing K.S.A. 2006 Supp. 82a-303a; effective May 18, 2007.)

5-40-73a. Discovery of an existing illegal, unpermitted dam. (a) Except when it is necessary to take additional actions to protect the public safety, when the chief engineer becomes aware of an existing illegal, unpermitted dam, the following actions shall be taken by the chief engineer:

(1) Determine the hazard classification and condition of the dam;

(2) notify the owner of the dam of the following, in writing:

(A) The fact that the dam is illegal and unpermitted;

(B) the hazard classification of the dam;

(C) the fact that if the owner desires to keep the dam in existence, the owner shall submit a com-

plete application for a permit for the dam pursuant to K.S.A. 82a-301 and K.S.A. 82a-302, and amendments thereto, within 120 days of the date of the chief engineer's notification;

(D) the condition that the application to obtain a permit for the dam shall meet the requirements of K.A.R. 5-40-8 and K.A.R. 5-40-74;

(E) the fact that failure to apply for a permit within 120 days shall result in the issuance of an order by the chief engineer requiring the owner to submit plans to breach or completely remove the dam; and

(F) the fact that the dam is subject to the provisions of this regulation.

(b)(1) If the owner submits an application for a permit within the time specified in paragraph (a)(2)(C), or within any extension of time authorized by the chief engineer in writing, the application shall meet the requirements of K.A.R. 5-40-8 and K.A.R. 5-40-74.

(2) If the owner fails to submit an application for a permit within the time specified in paragraph (a)(2)(C), or within any extension of time authorized by the chief engineer, an order requiring the owner to perform the following shall be issued by the chief engineer:

(A) Submit plans to breach or completely remove the dam; and

(B) bypass inflows and release water from storage so that no more than 15 acre-feet of water is kept in storage in the reservoir while the application for a permit to breach or completely remove the dam is being processed. The application for a permit shall contain all of the information required by K.A.R. 5-40-8 and any other information necessary to properly and safely design and complete the breach or removal. The application shall be submitted within 120 days of the date of the order, or within any extension of time authorized by the chief engineer. The owner shall be required to complete the breach or removal as permitted by the chief engineer within one year of the approval of a permit by the chief engineer, or any extension of time authorized by the chief engineer in writing.

(c) If the chief engineer dismisses an application for an existing illegal, unpermitted dam for any reason, the dismissal of the application shall be accompanied with an order requiring the dam to be breached or removed as provided in paragraph (b)(2).

(d) The order described in paragraph (b)(2) shall be filed by the chief engineer with the register of deeds for the county in which the dam is located.

(e) Each existing illegal, unpermitted dam of which the chief engineer becomes aware, either before or after the adoption of this regulation, shall be subject to this regulation. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-301, 82a-302, and 82a-303a; effective May 18, 2007.)

5-40-74. Design criteria for an existing illegal, unpermitted dam. (a) Except as specified in subsection (b), the design criteria specified in this subsection (a) shall be met to obtain a permit from the chief engineer pursuant to K.S.A. 82a-301 et seq., and amendments thereto, for an existing illegal, unpermitted hazard class A dam constructed before May 1, 1984 that has not been modified on or after May 1, 1984. The applicant shall have an engineer who is qualified in dam design and construction conduct an inspection of the dam and prepare a report that includes all of the following:

(1) The date of the inspection and a list of the members of the inspection team;

(2) color photographs documenting the condition of the dam's appurtenances and embankment and any observed deficiencies in the appurtenances and embankment;

(3) a plan view sketch of the dam and its immediate vicinity showing the location from which each photograph was taken and the direction in which it was taken;

(4) a description of the physical condition of the dam and its appurtenances, a list of the deficiencies that were observed, and a description of the severity of each observed deficiency. All deficiencies that may threaten the structural integrity of the dam shall be shown; and

(5) a survey of the dam, documented by a plan view of the dam and cross section drawings, including the following:

(A) Cross sections of the embankment every 200 feet, with each cross section starting from the upstream toe of the dam or the water surface on the upstream side to the toe of the dam on the downstream side of the dam;

(B) a profile of each open-channel spillway from the water surface on the upstream side of the dam to the point where spillway flows enter the receiving stream;

(C) a cross section of each open-channel spillway every 200 feet and at each control section, with a minimum of two cross sections;

(D) the elevation of each primary spillway inlet and outlet;

(E) the elevation of the flow line of the outlet channel; and

(F) the dimensions, locations, and descriptions of materials, workmanship, condition, apparent purpose for, and any other relevant information about all visible appurtenances in sufficient detail to represent the appurtenances in three dimensions;

(6) the dimensions and location of each deficiency noted as required in paragraph (a)(4);

(7) the estimated rate and color of discharge from drain outlets and any seeps;

(8) a determination of the hazard classification of the dam as specified in K.A.R. 5-40-24;

(9)(A) A description of the drawdown valve, if any;

(B) specification of whether the valve was operated during the inspection; and

(C) if the valve could not be operated, an explanation of why it could not be operated;

(10) the name, mailing address, and telephone number of the engineer who conducted the inspection;

(11) the name, mailing address, and telephone number of each current owner of the dam; and

(12) any other information relevant to the safety and integrity of the dam, including any items requested by the chief engineer before the inspection.

(b) If the applicant provides construction plans prepared before construction that show how the dam was to be constructed or modified and that reflect the actual dimensions of the dam as it exists, those plans may be substituted for the survey required in paragraph (a)(5).

(c) If the chief engineer determines from the inspection report that the dam does not pose a threat to public safety or public or private property and that the condition of the dam is sound, an after-the-fact permit may be issued by the chief engineer pursuant to K.S.A. 82a-301 et seq., and amendments thereto.

(d)(1) In order for an existing illegal, unpermitted hazard class A dam constructed or modified on or after May 1, 1984 or an existing illegal, unpermitted hazard class B or C dam to receive a permit from the chief engineer pursuant to K.S.A. 82a-301 et seq. and amendments thereto, the applicant shall demonstrate that the dam meets all of the applicable statutory and regulatory requirements in effect when the application for the permit is filed. The applicant shall provide a survey meeting the requirements of paragraph (a)(5) and a design report that meets the requirements

of K.A.R. 5-40-2b. If plans are available that show how the dam was constructed or modified and those plans reflect the actual dimensions of the dam as it exists when the application is filed, the plans may be substituted for the required survey. If a geologic investigation was conducted before construction of the dam and the results of that investigation are available, that investigation may be substituted for the investigation and report required by K.A.R. 5-40-40 through K.A.R. 5-40-42.

(2) If the applicant cannot determine that the chief engineer's requirements for the following design or actual construction properties were met without significantly disturbing the embankment but the applicant demonstrates that the dam was built in a manner appropriate to the standards in effect when the dam was constructed, then a permit may be issued if the chief engineer determines that the dam does not pose a hazard to public safety:

(A) The location, dimensions, and composition of the backfill materials to fill the cutoff trench;

(B) the location, dimensions, and construction of cutoff collars, drains, or other seepage control;

(C) the allowance for settlement of an earthen dam;

(D) specification of whether the primary spillway pipe was tested;

(E) the specifications used; and

(F) documentation of any construction inspections. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-301a, 82a-302, and 82a-303a; effective May 18, 2007.)

5-40-75. Maintenance of dams. Each owner of a dam that the chief engineer has authority to regulate pursuant to K.S.A. 82a-301 et seq., and amendments thereto, shall operate and maintain the dam in a manner that protects the public safety, complies with the terms of any permit of the chief engineer, and ensures the integrity of the dam. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-301a and 82a-303a; effective May 18, 2007.)

5-40-76. Repair or modification of a permitted or prejurisdictional dam. (a) The repair or modification of a permitted or prejurisdictional dam shall meet the requirements of both of the following:

(1) The statutes and the regulations in effect when the application for repair or modification is filed; and

(2) any additional criteria specified by the chief engineer that are necessary to ensure the integrity of the dam and its appurtenances.

(b) At the time of the repair or modification, the applicant shall bring the dam and all of its appurtenances into conformance with the requirements of the statutes and regulations in effect at the time of the application for repair or modification, unless both of the following conditions are met:

(1) The applicant demonstrates that bringing any feature of the dam and its appurtenances into compliance is not feasible or is unduly burdensome.

(2) The chief engineer determines that failing to bring any feature of the dam into compliance with one or more requirements applicable to that feature will not significantly affect the public safety.

(c) Each application to repair or modify a dam or its appurtenances shall include a design report on the repair or modification, including a section describing the condition of the dam at the time of the application. (Authorized by and implementing K.S.A. 2006 Supp. 82a-303a; effective May 18, 2007.)

5-40-77. Easements for dams. (a) Each applicant that applies for a permit to construct a dam, modify a dam in a manner that will raise the top of the dam, or modify the dam in any other way that will increase the backwater effect of the dam or the flow of water from the dam to the receiving stream shall demonstrate either of the following to the chief engineer:

(1) The applicant owns the site of the dam and appurtenant works, the land that will be inundated, and the land over which discharge from the dam's spillways will flow.

(2) The applicant has easements or other legal authority to perform the following for the design life of the dam:

(A) Construct and maintain the dam;

(B) inundate all of the land upstream from the dam to the top of the dam elevation; and

(C) discharge water from the spillways to a stream channel and the associated floodplain adequate to convey the discharge from the design storm.

(b) For permitted dams for which a modification is proposed, an easement or other legal authority shall be required only for the effects caused by the modification. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-302, K.S.A. 82a-303, and K.S.A. 2006 Supp. 82a-303a; effective May 18, 2007.)

5-40-90. Requirements for a dam safety inspection report. Each dam safety inspection report required by K.S.A. 82a-303b, and amendments thereto, shall document the observations made during the inspection and the engineer's opinion of the condition of the dam and shall include all of the following:

(a) An executive summary briefly describing the overall condition of the dam as found during the inspection;

(b) the date of the inspection and a list of the members of the inspection team;

(c) color photographs documenting the condition of the dam appurtenances and embankment and any observed deficiencies in the appurtenances and embankment;

(d) a plan view sketch of the dam and the vicinity, showing the location where each photograph was taken and the direction in which the photograph was taken;

(e) a description of the physical condition of the dam and its appurtenances, a list of any deficiencies that were observed, and a plan view sketch of the dam and its appurtenances showing the location of those deficiencies. The deficiencies that shall be shown shall include those that meet any of the following conditions:

(1) Violate the permit or approved plans or any approved modifications of the permit or approved plans;

(2) threaten the structural integrity of the dam; or

(3) threaten the safety of people or property above or below the dam;

(f) survey and other documenting data if the engineer observes any changes from previously documented conditions in the dam or its appurtenances that could jeopardize the integrity of the dam, including any changes in the profile or cross section of the dam, profile, or cross section of any open-channel spillway, and areas of settlement or erosion;

(g) a description of the severity of each observed deficiency and the engineer's opinion about the urgency of remedying each deficiency;

(h) a summary of the engineer's review of the adequacy of the emergency action plan, including a review of any updates since the last inspection;

(i) the estimated rate and color of discharge from drain outlets and any seeps;

(j) a statement indicating whether the engineer agrees or disagrees with the hazard classification of the dam, including the reasons why the engineer agrees or disagrees with that classification;

(k) a map drawn to a scale of 1:24,000 or larger showing the location of any hazards added, removed, or not previously shown downstream of the dam, in addition to those identified in previous reports, that would require a modification of the emergency action plan or might change the hazard classification of the dam;

(l) any significant changes in the capacity of the reservoir;

(m) any significant changes in the capacity of any spillway;

(n) a statement indicating whether there have been any significant changes in the watershed and an estimate of the impact of those changes on the design hydrology;

(o) the name, mailing address, and telephone number of the engineer;

(p) the name, mailing address, and telephone number of each current owner of the dam;

(q) observations or readings from all instrumentation required by the permit, the approved plans, the approved specifications, or the chief engineer;

(r)(1) A description of the drawdown valve, if any; and

(2) specification of whether the drawdown valve was operated during the inspection and, if the valve could not be operated, an explanation of why it could not be operated; and

(s) any other information relevant to the safety of the dam, including any items requested by the chief engineer before the inspection. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-303a and 82a-303b; effective May 18, 2007.)

5-40-91. Schedule for inspection of hazard class C dams. Each hazard class C dam shall be inspected every third inspection year after the inspection year in which the initial inspection was completed. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-303a and 82a-303b; effective May 18, 2007.)

5-40-92. Schedule for inspection of hazard class B dams. Each hazard class B dam shall be inspected every fifth inspection year after its initial inspection. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-303a and 82a-303b; effective May 18, 2007.)

5-40-93. Schedule for inspection of dams. The initial and follow-up dam safety inspections required by K.S.A. 82a-303b, and amendments thereto, for any dam completed on or after July

1, 2002, shall be conducted and a report shall be filed with the chief engineer in accordance with the following schedule: (a) Each permitted hazard class C dam shall be inspected in the third inspection year after the inspection year in which the dam is completed and every third inspection year thereafter.

(b) Each permitted hazard class B dam shall be inspected in the fifth inspection year after the inspection year in which the dam is completed and every fifth inspection year thereafter.

(c) Each unpermitted class B or class C hazard dam completed on or after July 1, 2002, shall be inspected in accordance with a schedule approved by the chief engineer as necessary to protect the public safety.

(d) Each dam that had its hazard class increased by the chief engineer on or after July 1, 2002, shall initially be inspected by the chief engineer in the inspection year in which the hazard class is increased.

(e) If the dam was reclassified as a hazard class B dam, the dam shall be inspected every fifth inspection year after the inspection year in which the hazard class was changed.

(f) If the dam was reclassified as a hazard C dam, the dam shall be inspected every third inspection year after the inspection year in which the hazard class was changed. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-303a and 82a-303b; effective May 18, 2007.)

5-40-94. Revision of schedule of inspections. For good cause shown, including a change in hazard class or repair or modification of a dam, the dam safety inspection schedule may be revised by the chief engineer and a new inspection cycle may be started. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-303a and 82a-303b; effective May 18, 2007.)

5-40-100. Request to be included on the list of independent engineers qualified to review applications. (a) Each licensed professional engineer who desires to be placed on the list of licensed professional engineers approved to review applications for the permit required by K.S.A. 82a-301 et seq., and amendments thereto, shall submit a request to the chief engineer on a form prescribed by the chief engineer.

(b) Any engineer may request approval in one or more of the following areas:

(1) Dam design;

(2) channel design; and

(3) the design of stream obstructions other than dams.

(c) A team of persons may be qualified to be a reviewer for a project. The qualifications of each team member shall be submitted, and one person shall be designated as the supervising reviewer. The supervising reviewer shall meet the minimum requirements for an individual reviewer. The other members of the review team shall not be required to meet the minimum requirements for an individual reviewer. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-302 and 82a-303a; effective May 18, 2007.)

5-40-101. Information to be submitted with a request to be a reviewer. (a) Each engineer who wants to be included on the list of licensed professional engineers approved to review applications under the obstructions in streams act, as authorized by K.S.A. 82a-302, and amendments thereto, shall submit that request on a form prescribed by the chief engineer and shall designate each area of review for which the engineer or a team of engineers desires to be approved.

(b) All of the following information shall be included on each request for each area in which the engineer seeks to be approved:

(1) The type and license number of each current license from the Kansas state board of technical professions;

(2) relevant education, including graduate and postgraduate schools attended, degrees received, and professional development work; and

(3) work experience in the requested area of expertise, including the following:

(A) The number of years of experience as an engineering intern;

(B) the number of years of experience as an engineer; and

(C) the approximate number of projects for which the engineer met the following criteria:

(i) Was responsible for the project;

(ii) performed substantive design tasks;

(iii) had quality assurance, quality control, or project review responsibilities; and

(iv) performed construction supervision or inspection; and

(D) the project name, the location, a brief description of the project, and a brief description of the engineer's responsibilities for one or two projects for which the engineer met the following criteria:

(i) Had responsible charge or performed significant portions of the design; or

(ii) provided quality control, quality assurance, project review, construction supervision, or construction inspection duties. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-302 and 82a-303a; effective May 18, 2007.)

5-40-102. Minimum requirements to be an individual reviewer. To be an individual reviewer, each person shall meet both of the following qualifications: (a) Have a current professional engineer's license from the Kansas state board of technical professions; and

(b) have a minimum of five years of relevant work experience in the area for which approval is sought. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-302 and 82a-303a; effective May 18, 2007.)

5-40-103. Conflict of interest. A reviewer shall not be eligible to review any of the following:

(a) Any project in which the reviewer has participated in the project's design in any way;

(b) any project designed by any other employee of the reviewer's current employer; or

(c) any other project for which the reviewer has a conflict of interest with the owner of the dam, the designer of the dam, or the state of Kansas. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-302 and 82a-303a; effective May 18, 2007.)

5-40-104. Notification of approval or disapproval to be a reviewer. Within 60 days of the receipt in the office of the chief engineer of a completed request pursuant to K.A.R. 5-40-101, the requester shall be notified by the chief engineer of whether that individual has been approved in each requested area. If the chief engineer has not approved the request for each area of review requested, the requester shall be notified by the chief engineer of the reason or reasons that each request has been denied. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-302 and 82a-303a; effective May 18, 2007.)

5-40-105. Procedure for independent review of an application to construct a dam or other water obstruction. (a) When an applicant provides a copy of that individual's application to an approved reviewer pursuant to K.S.A. 82a-302

and amendments thereto, the applicant shall also submit the following to the chief engineer:

- (1) The original application;
- (2) all documentation required for an acceptable application as specified in K.A.R. 5-40-8;
- (3) the statutorily required filing fee; and
- (4) the name, address, and telephone number of the reviewer.

(b) The review required by the water projects environmental coordination act, K.S.A. 82a-325 et seq. and amendments thereto, shall be initiated by the chief engineer after the chief engineer receives the application.

(c) Within 37 days after the review specified in subsection (b) is initiated by the chief engineer, any comments received from the environmental review agencies shall be sent by the chief engineer to the reviewer. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-302 and 82a-303a; effective May 18, 2007.)

5-40-106. Report of findings of independent reviewer. (a) When a reviewer completes the review of an application pursuant to K.S.A. 82a-302 and amendments thereto, the reviewer shall submit a report of that review to the chief engineer. The report shall be properly sealed by the reviewing engineer as directed by the Kansas state board of technical professions.

(b) Each complete report shall include the following:

(1) An opinion as to whether the application meets the requirements of K.S.A. 82a-301 et seq., and amendments thereto, the regulations that implement these statutes, sound engineering principles, and commonly accepted engineering practices;

(2) the basis for that opinion, including any analyses that were performed, and the supporting data;

(3) an evaluation of the comments from the environmental review agencies that were furnished to the reviewer by the chief engineer and a recommendation about how to address all adverse comments;

(4) a recommendation about whether any request by the applicant to waive one or more regulations should be approved and the basis for approving or denying the waiver; and

(5) a recommendation about whether the chief engineer should approve or deny the permit and any conditions that the chief engineer should impose on the permit.

(c) The recommendations shall not be binding on the chief engineer. The chief engineer shall maintain the final authority to approve or deny all applications. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-302 and 82a-303a; effective May 18, 2007.)

Article 41.—DESIGN OF CHANNEL CHANGES

5-41-1. Channel changes; plans and specifications. Plans for a channel change shall include the following: (a) A general location map or aerial photograph, showing the present alignment of the stream, location of the proposed channel change, section lines, property lines with names and addresses of adjoining landowners, drainage area, a north arrow, a bar scale, and any other prominent features;

(b) a detailed plan view of the project with stationing shown, including as many other views as necessary to fully describe the project;

(c) a profile drawing along the centerline of the proposed new channel. This profile shall extend five times the channel width upstream and an equivalent distance downstream from each end of the new channel. The stationing shown on the plan view shall correspond to stationing on the profile drawing. This drawing shall show the present ground surface, the present stream bed, and the grade line of the proposed new channel;

(d) cross sections of the existing stream at locations immediately above and below the proposed channel change. The location of these cross sections shall be described and shown on the plans. The elevations of the top of the existing banks and bottom of the channel shall be shown;

(e) at least one permanent bench mark conveniently located for use after construction, except for grassed waterways constructed for the purpose of conveying runoff without causing erosion or flooding. The location, description, and elevation of the permanent bench mark, to which all elevations are referred, shall be shown on the plans. The designer shall reference the project bench mark to the current national geodetic vertical datum, to a tolerance of plus or minus ½ foot on all channel changes involving perennial streams and where detailed floodplain data are available. Project datum shall be acceptable on all other channel changes; and

(f) a cross-sectional drawing of the proposed new channel, including dimensions. (Authorized

by K.S.A. 82a-303a; implementing K.S.A. 82a-302; effective May 1, 1987; amended Sept. 22, 2000.)

5-41-2. Channel changes; water velocity. The new channel shall have a conveyance capacity equal to or greater than the old channel. The water velocity after the completion of the proposed channel change or stream obstruction shall not exceed a permissive velocity. (Authorized by K.S.A. 82a-303a; implementing K.S.A. 82a-303; effective May 1, 1987.)

5-41-3. Channel changes; side slopes. The side slopes of the proposed new channel shall not be steeper than one foot vertical to two feet horizontal unless the applicant submits data and analysis to show that a steeper slope will be stable. (Authorized by K.S.A. 82a-303a; implementing K.S.A. 82a-303; effective May 1, 1987.)

5-41-4. Channel changes; construction by erosion. New channels shall not be constructed by erosion. (Authorized by K.S.A. 82a-303a; implementing K.S.A. 82a-303; effective May 1, 1987.)

5-41-5. Channel changes; disposal of excavated material. (a) Material removed from the newly excavated channel shall be deposited at a location and in a form acceptable to the chief engineer. If the material is to be deposited so that it will have the effect of a levee, a separate prior written approval of the chief engineer is required pursuant to K.S.A. 24-126.

(b) Filling or plugging the original channel shall receive the prior written approval of the chief engineer. (Authorized by K.S.A. 82a-303a; implementing K.S.A. 82a-303; effective May 1, 1987.)

5-41-6. Channel changes; vegetative strips on new channels. On each new channel project, except a grassed waterway constructed for the purpose of conveying runoff without causing erosion or flooding, a vegetative strip shall be established and maintained for a width of 50 feet immediately adjoining the channel on each side of the stream if site conditions permit, unless an acceptable engineering design shows that a greater or lesser width of vegetative strip is preferable. The general type of vegetation shall be approved by the chief engineer. (Authorized by K.S.A. 82a-303a; implementing K.S.A. 82a-303; effective May 1, 1987; amended Sept. 22, 2000.)

Article 42.—DESIGN OF STREAM OBSTRUCTIONS

5-42-1. Stream obstructions; plans and specifications. (a) The plans required for a permit for a stream obstruction pursuant to K.S.A. 82a-301, and amendments thereto, shall include the following:

(1) A general location map or aerial photograph showing the stream, location of the proposed obstruction, sufficient detail to locate the proposed construction site, section lines, a bar scale, a north arrow, property lines with the names and addresses of adjoining landowners and any other landowners whose land may be hydraulically affected by the proposed stream obstruction, drainage area, and any other prominent features;

(2) a detailed plan view fully describing the obstruction and the site;

(3) the following topographical information, which shall be provided from streambed elevation to the limits specified in subsection (b):

(A) A profile of the streambed and both banks;

(B) A contour map with a contour interval of no more than two feet; or

(C) cross sections perpendicular to the stream and at intervals of no more than five times the width of the channel;

(4) an elevation view showing the obstruction on a cross section of the stream and the valley up to the post project design flood elevation at the site;

(5) at least one permanent benchmark shall be conveniently located for use after construction. The location, description, and elevation of the permanent benchmark to which all elevations are referred shall be shown on the plans. Reference to the national geodetic vertical datum of 1988, or other acceptable national vertical datum, to a tolerance of plus or minus one-half foot shall be required for all stream obstructions on perennial streams and all other streams where base flood elevations have been determined and are shown on flood insurance rate maps. An assumed project datum shall be acceptable on all other stream obstruction projects;

(6) details of the manner in which the obstruction is to be tied into the bed and banks of the streams;

(7) the land for which easements or rights-of-way are to be acquired if the proposed obstruction affects land other than that owned by the applicant; and

(8) unless it is clear that the impact of the proposed project will be contained within the channel or limited to property under the control of the applicant, a hydraulic analysis determining the preproject and postproject water surface elevations for the 50 percent-chance flood and the one percent-chance flood shall be prepared and submitted to the chief engineer.

(b)(1) If it is clear that the impact of the proposed stream obstruction will be contained within the channel or limited to property under the control of the applicant, the topographical information upstream of the stream obstruction required in paragraph (a)(3) shall be required to either of the following, whichever is lower:

(A) The elevation of the highest point on the proposed obstruction; or

(B) the elevation of the one percent-chance flood water surface.

The applicant shall not be required to show topographical information for any property not under the control of the applicant.

(2) If it is not clear that the impact of the proposed project will be contained within the channel or limited to property under the control of the applicant, the topographical information upstream of the stream obstruction required in paragraph (a)(3) shall be provided from streambed elevation up to the elevation of the one percent-chance flood water surface upstream of the stream obstruction.

(3) The topographical information required in paragraph (a)(3) and subsection (b) shall be provided downstream of each proposed stream obstruction for a distance equal to five times the width of the channel at the proposed site of the stream obstruction or 50 feet downstream from the toe of the stream obstruction, whichever is greater.

(c) Each application for a permit to construct a stream obstruction shall include the following specifications:

(1) Each major element in the construction of the obstruction;

(2) the minimum quality of workmanship that is acceptable to construct the obstruction;

(3) the minimum quality of materials that is acceptable to construct the obstruction; and

(4) the materials proposed to be used to construct the obstruction.

(d) The specifications shall meet the following requirements:

(1) Be clear, legible, and shown in sufficient de-

tail to assure that the work can be properly constructed; and

(2) be shown on the plans, in the design report, or on a separate document.

(e) If the Kansas department of transportation (KDOT) standard construction specifications meet all of the requirements of this regulation and are to be enforced during construction, referencing those specifications on the plans shall be sufficient to comply with this regulation.

(f) If the standard construction specifications of a city or county in Kansas meet the following requirements, then referencing those specifications on the plans shall be sufficient to comply with this regulation:

(1) Meet all the requirements of this regulation;

(2) are to be enforced during construction; and

(3)(A) Have been provided to the chief engineer; or

(B) are readily available at no cost from the city or county that utilizes the specifications. (Authorized by K.S.A. 2006 Supp. 82a-303a; implementing K.S.A. 2006 Supp. 82a-301, 82a-302, and 82a-303a; effective May 1, 1987; amended, T-5-12-30-91, Dec. 30, 1991; amended April 27, 1992; amended May 18, 2007.)

5-42-2. Stream obstruction; minor. If a proposed stream obstruction will not decrease the cross sectional area of a stream channel at the location of the obstruction by more than 15 percent, the plans required by the chief engineer shall be equivalent to the type submitted to the United States corps of engineers with applications for a department of the army permit. Such obstructions shall include weirs, causeways, low-water crossings, low-head dams, intake structures, boat launching ramps, pipeline crossings, outfall structures, marinas, boat docks, jetties and revetments. (Authorized by K.S.A. 82a-303a; implementing K.S.A. 82a-303; effective May 1, 1987.)

5-42-3. (Authorized by K.S.A. 82a-303a; implementing K.S.A. 82a-303; effective May 1, 1987; amended April 27, 1992; revoked Sept. 22, 2000.)

5-42-4. Stream obstruction; temporary structure. A temporary structure shall not require a stream obstruction permit from the chief engineer pursuant to K.S.A. 82a-301 et seq. and amendments thereto if it meets all of the following criteria:

(a) The structure is temporary in nature.
