The permit contains monitoring for pH. This NPDES discharging lagoon wastewater treatment facility has been reviewed for eligibility for the MDV for ammonia and has been determined to be eligible. Eligibility was determined through analysis of the facility's highest attainable criteria (HAC) for ammonia and an Economic Eligibility Determination (EED) that assessed the impact of the cost of a new mechanical facility to the community's rate payers. The ammonia effluent limit was determined on 2/26/2025 by calculating the 99th percentile ammonia value from the facility's discharge monitoring reports resulting in an ammonia limit of 14.9 mg/L for this facility.

Table 1: Background and Scope of Project

Project Number	Background and Scope of Project
106-KA-7372-01	<p>In September of 2009, the US-24 Corridor Management Plan was established. The plan was created by Pottawatomie County through a partnership with the City of Manhattan, City of Wamego, City of St. George, and the Kansas Department of Transportation. The study aimed to address future regional growth and overlapping jurisdictional boundaries of the communities by providing planned transportation solutions to meet future needs. The existing plan covers 16 miles of US-24, from Tuttle Creek Boulevard in Manhattan to Airport Road, just east of Wamego.</p> <p>The region has continued to grow and expand, resulting in a need to reconsider the current corridor management plan to align it with the existing growth patterns, community plans, and MPO plans.</p> <p>An extension of the plan through Manhattan and Riley County is proposed, setting the new eastern termini to the junction of US-77/US-24, essentially doubling the length of US-24 covered by the plan to 32 miles.</p> <p>The successful consultant will review the body of planning documents and set forth an overall land-use and access management strategy and identify various transportation improvements to keep traffic moving safely and efficiently as development occurs. This study is intended to assist in making informed decisions over the next 20 years.</p>

- Market analysis of trends and opportunities for growth and future demand.
- Existing and future land-use and traffic projections.
- Corridor mobility analysis (multimodal, O/D, etc.)
