Water Pollution Control Permits

In accordance with state regulations 28-16-57 through 28-16-63 and the authority vested with the state by the administrator of the U.S. Environmental Protection Agency, tentative permits have been prepared for discharges to the waters of the United States and the state of Kansas for the applicants described below. The tentative determinations for permit content are based on preliminary limitations of the state of Kansas and the EPA, and when issued will result in a state water pollution control permit and national pollutant discharge elimination system authorization to discharge subject to certain effluent limitations and special conditions.

Name and Address of Applicant	Waterway	Type of Discharge
City of Hays P.O. Box 490 Hays, KS 67601	Outfall 001-Big Creek via Chetolah Creek, Outfall 002-Big Creek, Smoky Hill River Basin, Outfall 003 discharges to a rapid infiltration basin located over the Big Creek alluvium	Secondary wastewater treatment facility

Ellis County, Kansas

Kansas Permit No. M-SH16-0002 Fed. Permit No. KS-0036634

Description of Facility: This facility is designed for the treatment of domestic sewage. This is an existing facility. Proposed effluent limitations are pursuant to Kansas Surface Water Quality Standards, K.A.R. 28-16-28(b-f), and are water quality limited. **PROPOSED:** The proposed action consists of revision and reissuance of the city of Hays wastewater treatment facility discharge permit. This facility receives domestic and industrial wastes. Monitoring of the effluent from this existing facility as well as instream monitoring has indicated upgrade of the plant will be necessary to achieve compliance with current surface water quality standards. The reissued permit will contain a compliance schedule for upgrade of the wastewater treatment plant to achieve reduction in effluent ammonia levels and provide disinfection of the effluent.

The city of Hays is located in a relatively arid portion of the state and experiences water shortage. The city presently irrigates a golf course and softball diamonds with effluent, and plans to also irrigate a second privately owned golf course and the Larks Park Ball Field with effluent.

In conjunction with the wastewater treatment plant upgrade, additional facilities will be constructed to divert a portion of the wastewater to an area upstream of the city on Big Creek where this effluent will be discharged to Big Creek to improve recharge of the alluvial aquifer, and also discharged to a rapid infiltration basin with proposed public water supply wells downgradient of the basin, thus, facilitating indirect recycle of wastewater for potable water supply. Due to the water reuse plan, the city plans also to provide activated sludge treatment for nitrification and denitrification of the wastewater, and rapid mixed media filtration of effluent. In addition to the effluent limitations for ammonia and fecal coliform, the permit will also include monitoring for lead and copper within the effluent. A battery recycle facility is one of the industries within Hays, thus, effluent monitoring for these two heavy metals is deemed appropriate.

Because the proposed project includes a new discharge point which will allow incidental groundwater recharge and a rapid infiltration basin which will directly recharge the alluvial aquifer with wastewater effluent by design, the potential exists for violation of the Kansas Surface Water Quality Standards. A variance request by the city of Hays has been received and the Kansas Department of Health and Environment has indicated a variance will be processed. This variance would allow the numerical criteria for groundwater recharge to be exceeded within the local area of the recharge basin, but groundwater use for public water supply will not be reduced. Although the numeric criteria may exceed the groundwater quality standards, no adverse public health impact is anticipated or will be allowed. Groundwater monitoring will be required and effluent limitations will be established to minimize impacts on groundwater quality and provide public health protection.

KDHE conducts routine effluent toxicity testing of the Hays plant effluent, and to date no tests have shown acute toxicity in the effluent. Following the upgrade of the wastewater treatment process, KDHE will continue toxicity testing. If an effluent toxicity problem develops at that time, KDHE will consider adding toxicity testing to the permit. For the present, this is not required.

DESCRIPTION: The present plant consists of a raw wastewater screen, an aerated grit chamber followed by two primary sedimentation tanks, four trickling filter units, two final clarifiers, two anaerobic sludge digestors, sludge drying beds and liquid sludge land application facilities. Additionally, some of the effluent is chlorinated and utilized for a golf course and ball diamond irrigation. The plant design flow is 2.8 MGD.

The proposed wastewater treatment facility will consist of a raw wastewater screen, an aerated grit chamber, two primary sedimentation basins, two trickling filters, activated sludge basin, two final clarifiers, chlorine contact chamber, two rapid mixed media filtration unit, effluent storage basins, effluent pumping station to irrigation and effluent outfalls located upstream of the wastewater treatment plant, dechlorination facilities, reaeration, anaerobic sludge digestors, sludge drying beds and liquid sludge land application facilities. The revised, reissued permit will maintain the present effluent limitations with the inclusion of lead and copper monitoring until July 1, 1993. The final effluent limitations will become effective July 1, 1993, and shall include seasonal water quality based limits for BOD and ammonia, as well as total nitrogen, and fecal coliform limitations. Monitoring for lead and copper will be retained in the final permit. The plant design flow rate will remain 2.8 MGD.

RECEIVING STREAM: Hays Wastewater Treatment Plant presently discharges to Big Creek via Chetolah Creek within the Smoky Hill River Basin. Big Creek is listed in the Kansas Surface Water Standards within K.A.R. 28-16-28d. Big Creek includes the following designated uses: noncontact recreation, consumptive recreation, expected aquatic life, domestic water supply, agricultural irrigation, agricultural livestock, industrial water supply, and groundwater recharge. The reissued permit will allow up to 2.8 MGD of effluent discharge to Chetolah Creek at the present wastewater treatment site (001 outfall). Additionally, the permit will allow the discharge of up to 1.2 MGD of effluent at a point upstream of Hays on Big Creek (002 outfall, NW/4, SW/4, Sec. 24, T13S, E19W, Ellis County). The 003 outfall will be located in the SW/4, NE/4, Sec. 30, T13S, R18W, Ellis County, and will discharge to a rapid infiltration basis.

PROPOSED LIMITATIONS: The reissued permit will maintain the present effluent limitations as interim limitations until July 1, 1993. Additionally, monitoring requirements for lead and copper will be imposed. The present effluent limitations include seasonal limits for Biochemical Oxidation Demand (BOD) consisting of weekly average 45 mg/l, monthly average 30 mg/l for September through May and weekly average 30 mg/l, monthly average 20 mg/l for June through August. Total suspended solids limitations are weekly average 45 mg/l and monthly average 30 mg/l the year around. The pH limitation is 6 to 9 standard units.

The final effluent limitations which will become effective July 1, 1993 include seasonal limitations for BOD which range from a weekly average 30 mg/l, monthly average 20 mg/l in July and August, to a weekly average 45 mg/l, monthly average 30 mg/l in November through April. September, October, May and June have limitations of weekly average 40 mg/l, monthly average 25 mg/l.

The final effluent limitations for ammonia are established on a seasonal basis also. Ammonia limits for June, July, August and September will be weekly average 3.0 mg/l, monthly average 2.0 mg/l. May and October limits will be weekly average 4.5 mg/l, monthly average 3.0 mg/l. March, April and November limits will be weekly average 7.5 mg/l, monthly average 5.0 mg/l. Limits for December, January and February will be weekly average 12 mg/l, monthly average 8 mg/l.

Fecal coliform limitations for the 001 outfall are based on a non-contact recreation standard and have been established at 4000 colonies per 100 ml weekly average and 2000 colonies per 100 ml monthly average. The fecal coliform limitations for the 002 and 003 outfalls have been established at 40 colonies per 100 ml weekly average and 20 colonies per 100 ml monthly average based on proposed irrigation reuse site uses and discharge to the rapid infiltration basins. A total nitrogen limitation has been applied at the 003 outfall, the total nitrogen limitation, i.e. the sum of total kjeldahl nitrogen (TKN) plus nitrate (NO₃) plus nitrite (NO₂), has been established at 10 mg/l monthly average.

Due to the chlorination dechlorination process, a total residual chlorine measurement will be required weekly based upon the amperometric titration method or DPD-FAS method and the results of this analyses must be undetectable chlorine residual. Additionally, a dissolved oxygen limitation will be imposed requiring a minimum of 5 mg/l in the effluent.

PROPOSED INDIRECT REUSE OF EFFLUENT FOR POTABLE WATER SUPPLY: In conjunction with the proposed upgrade of the Hays Wastewater Treatment Plant, the city of Hays plans to utilize a portion of the wastewater for groundwater recharge. This will increase the city's water resources as the reclaimed wastewater which will recharge the aquifer will mix with existing groundwater. The city plans to locate public water supply wells in the recharge area and utilize this groundwater for a public water supply. The city presently has a lime softening water supply treatment plant. The Kansas Department of Health and Environment will review the plans for installation of these additional public water supply wells and establish requirements for the location of the wells, additional monitoring requirements for this reclaimed water, and additional treatment requirements if deemed necessary.

Notice of Meeting and
Hearing on Proposed
Administrative Regulations

A public hearing will be conducted at 7 p.m. Friday, August 16, in the Kanza Room of the Memorial Union, Emporia State University, Emporia, to consider the adoption and revocation of several permanent department regulations. If necessary, the hearing will continue at 9 a.m. Saturday, August 17, at the same location. Regular duck and goose seasons for 1991 and 1992 based on federal frameworks will also be established. A workshop meeting on upcoming business and future regulations will begin at 1:30 p.m. Friday, August 16, at the above location. If necessary, the workshop will continue following the conclusion of the public hearing. The public is also invited to attend the workshop.

This 30-day notice period prior to the hearing constitutes a public comment period for the purpose of receiving written public comments on the regulations. All interested parties may submit written comments prior to the hearing to the chairman of the commission, Kansas Department of Wildlife and Parks, Suite 502, Landon State Office Building, 900 S.W. Jackson, Topeka 66612. All interested parties will be given a reasonable opportunity at the hearing to express their views orally in regard to the adoption of the proposed regulations and the proposed revocations. During the hearing, all written and oral comments submitted by interested parties will be considered by the commission as a basis for approving, amending or rejecting the proposed regulations and revocations.

The following is a brief summary of the regulations proposed for adoption and the regulations proposed for revocation:

K.A.R. 115-14-1. Falconry; federal regulations. This proposed permanent regulation replaces K.A.R. 23-21-1, which is proposed for revocation. The only change is an updated 50 C.F.R. reference.

Economic Impact Summary: No economic impact will occur.

K.A.R. 115-14-2. Falconry permits. This proposed permanent regulation includes provisions of K.A.R. 23-21-2, 23-21-3 and 23-21-14, which are proposed for revocation. The only change requires a nonresident holding a falconry permit from another state to apply for a similar Kansas permit upon establishment of residency in Kansas. Thus, the individual would have 60 days to secure a resident permit as opposed to the previous 20 day requirement of K.A.R. 23-21-14.

Economic Impact Summary: No economic impact will occur.

K.A.R. 115-14-3. Falconry permit classes and requirements. This proposed permanent regulation includes provisions of K.A.R. 23-21-4, which is proposed for revocation. Apprentice class falconers would be allowed to possess a red-shouldered hawk. This change would bring the species authorized for possession by an apprentice class falconer into conformity with federal falconry regulations.

Economic Impact Summary: No economic impact will occur.

K.A.R. 115-14-4. Examination. This proposed permanent regulation includes provisions of K.A.R. 23-21-6, which is proposed for revocation. Under this regulation, an individual holding a falconry permit from another state would not be required to take a Kansas test to secure a similar Kansas falconry permit.

Economic Impact Summary: A no testing provision to secure a similar permit upon establishment of residence in Kansas will result in a small savings to those obtaining a permit and a small savings to the department by not having to administer the test.

K.A.R. 115-14-5. Facilities and inspection. This proposed permanent regulation includes provisions of K.A.R. 23-21-7 and 23-21-10, which are proposed for revocation. No changes are included in the proposed regulation.

Economic Impact Summary: No economic impact will occur.

K.A.R. 115-14-6. Equipment. This proposed permanent regulation includes provisions of K.A.R. 23-21-11, which is proposed for revocation. No changes are included in the proposed regulation.

Economic Impact Summary: No economic impact will occur.

K.A.R. 115-14-7. Permit expiration and renewal. This proposed permanent regulation includes provisions of K.A.R. 23-21-8, which is proposed for revocation. Federal regulations now provide for a three year permit. The Kansas permit would be for a three year period, but ending on December 31 of the third year. Under K.A.R. 23-21-8, the permit period is one year.

Economic Impact Summary: The length of permit change will mean a cost savings to falconers and a loss of permit revenue to the department. However, there are currently only four permittees, thus the loss to the department will be insignificant. In effect, it represents a lowering of fees which may result in the issuance of a few more permits.

K.A.R. 115-14-8. Reports. This proposed permanent regulation includes provisions of K.A.R. 23-21-9, which is proposed for revocation. The regulation would discontinue the separate Kansas reporting requirement, but falconers would be required to submit to the department a copy of all federally required reports. The reports would be submitted on the same deadlines as required by the service. A requirement to provide information to the department on hunting and permit activities would continue.

Economic Impact Summary: No significant impact would occur; however, reporting would be simpler for permittees and the department would avoid some administrative expense.

K.A.R. 115-14-9. Acquisition of raptors. This proposed permanent regulation includes provisions of K.A.R. 23-21-13 and 23-21-14, which are proposed for revocation. The red-shouldered hawk and great horned owl are added to the list of species which may be taken from the wild during certain stages. General and master falconers would be authorized to take any species in the passage stage if taking of that species is

authorized by the service and if the species is not on the Kansas threatened or endangered species list. General and master falconers would be authorized to purchase, receive, sell, barter or transfer raptors only if authorized by service regulations.

Economic Impact Summary: No significant impact would occur; however, falconers may benefit slightly with a few more raptors species available for use and expanded ability to secure raptors through purchase, barter or transfer. The department would avoid some administrative expenses.

K.A.R. 115-14-10. Other provisions. This proposed permanent regulation includes provisions of K.A.R. 23-21-12 and 23-21-14, which are proposed for revocation. Marking of released raptors would not be required. A prohibition against carrying of firearms while hawking is discontinued. The necropsy requirement for deceased raptors is discontinued. The incidental take of hen pheasants by falconers is authorized, but is limited to two per day and only four per season.

Economic Impact Summary: No significant impact would occur; however, falconers may benefit from a relaxation of certain standards. The department would avoid some administrative expenses.

K.A.R. 115-25-17. Migratory birds; federal regulations. This proposed exempt regulation provides that seasons, bag limits, and other provisions of taking migratory birds shall correspond with federal regulations as published in the "Federal Register." It also requires that migratory birds be shot only while the bird is in flight. This regulation combines K.A.R. 23-1-2 and 23-1-3, which are proposed for revocation.

Economic Impact Summary: No economic impact will occur.

The following regulations are proposed for revocation:

K.A.R. 23-1-2. Migratory waterfowl—open season and bag limits. This permanent regulation exists under the discontinued agency 23 number. The provisions of this regulation are included in proposed regulation K.A.R. 115-25-17.

Constitution of the State of Kansas—Legislative—Uniform Operation of Laws of a General Nature; 1991 House Bill No. 2194.

Constitution of the State of Kansas—Finance and Taxation—System of Taxation; Classification; Exemption; 1991 House Bill No. 2194. Tom R. Smith, Seward County Counselor, Liberal, June 28, 1991.

Since the exemption meets the public purpose test and since there is no prohibition against special legislation, it is our opinion that 1991 House Bill No. 2194, section 2(d) is not violative of the uniform and equal provision in article 11, section 1 or article 2, section 17 of the Kansas Constitution. Intoxicating Liquors and Beverages—Licensing and Related Provisions; City Option—Retailer's License; Rights of Licensee; "Service or Thing of Value" Defined. Robert A. Engler, Director, Alcoholic Beverage Control Division, Kansas Department of Revenue, July 2, 1991.

Under current statutes and administrative regulations, the only services licensed retailers can provide are the sale of lottery tickets and delivery to a club, drinking establishment, or caterer. No other service whatsoever is allowed. Retailers are also prohibited from selling or giving away things of value. The terms "service" and "things of value" are subject to reasonable regulatory definition as outlined herein. State Departments; Public Officers and Employees—Public Officers and Employees; Open Public Meetings—Meeting Defined; Quorum; Impact of Abstention on Quorum; Disqualified Member. David C. VanParys, Leavenworth County Counselor, Leavenworth, July 9, 1991.

It is our opinion that unless a specific law alters common law, the presence of five of a nine member board constitutes a quorum of that body and a majority vote of those five members (three) is sufficient to bind the body. If one of the members abstains from the vote, he is deemed to have voted with the majority unless he has an interest or bias in the matter and is therefore disqualified. Where the required majority exists without the vote or presence of the disqualified member, his vote or presence will not invalidate the result. Members disqualified from voting may not be counted when determining whether a quorum is present. Cited herein: K.S.A. 75-4317a. TMN

Civil Procedure—Protection From Abuse Act—Defi-

inition of "Abuse." Paul J. Morrison, District Attorney, 10th Judicial District, Olathe, July 9, 1991.

The word "access" as used in the Kansas protection from abuse act does not connote "legal access" to the residence. If at any time in the past persons resided together the act is applicable. Cited herein: K.S.A. 1990 Supp. 60-3101; 60-3102. CN

Corporations—Cemetery Corporations—Funding By Counties.

Counties and County Officers—County Commissioners; Powers and Duties—Control of Expenditures; Public Purpose. John B. Klenda, McPherson County Counselor, McPherson, July 9, 1991.

The Board of McPherson County Commissioners may fund a cemetery owned by a corporation based on the fact that the cemetery is organized for a public purpose. However, the funds for such an expenditure must come from an appropriate fund. Cited herein: K.S.A. 17-1312f; K.S.A. 1990 Supp. 19-101a; K.S.A. 19-212; 19-229; 79-2929a; 79-2934. MJS

Courts—Retirement System for Justices and Judges—Election to Continue to Participate in Retirement System by Certain Judges; Constitutionality.

State Boards, Commissions and Authorities—Public Employees Retirement System; Kansas Public Employees Retirement System—Retirement Fund; Payments From Fund, Procedures; Overpayments. Marshall Crowther, Executive Secretary, Kansas Public Employees Retirement System, Topeka, July 9, 1991.

Under the provisions of K.S.A. 1990 Supp. 20-2619, a judge may elect to continue to participate in the retirement system for justices and judges after leaving service as a judge in certain circumstances. Because the classification created in the statute fails to advance an objective of the retirement system, the classification fails to meet the minimum rationality or reasonable basis test. Also, the benefits conferred pursuant to K.S.A. 1990 Supp. 20-2619 constitute payment of public funds to a private individual in violation of the public purpose doctrine. As such, the statute is unconstitutional. Contributions remitted pursuant to K.S.A. 1990 Supp. 20-2619 and K.S.A. 1990 Supp. 74-4911e are overpayments to the Kansas public employees retirement fund and may be reimbursed pursuant to K.S.A. 1990 Supp. 74-4921.
