### Board of Agriculture Division of Water Resources

### Notice of Hearing on Proposed Administrative Regulations

Four public hearings will be conducted at the dates, times and places set forth below to consider the adoption of proposed change in one existing rule and regulation of the Division of Water Resources and the adoption of 14 new regulations:

- Monday, August 22, 5 p.m., Ramada Inn, 1400 N. Lorraine, Hutchinson
- Tuesday, August 23, 5 p.m., Garden City Community College, Science Lecture Hall, 801 Campus Drive, Garden City
- Wednesday, August 24, 5 p.m., Colby Community College, Rooms 108 and 109, 1255 S. Range, Colby
- Friday, August 26, 1 p.m., Kansas State Historical Society Auditorium, 120 W. 10th, Topeka

This 30-day notice of the public hearing shall constitute a public comment period for the purpose of receiving written public comments on the proposed rules and regulations. All interested parties may submit written comments prior to the hearing to the Chief Engineer, Division of Water Resources, Kansas State Board of Agriculture, 901 S. Kansas Ave., 2nd Floor, Topeka 66612-1283. All interested parties will be given a reasonable opportunity to present their views orally on the adoption of the proposed regulations during the hearing. In order to give all parties an opportunity to present their views, it may be necessary to request each participant to limit any oral presentation to five minutes.

These new and amended regulations are proposed for adoption on a permanent basis. A summary of proposed regulations and their economic impact follows:

Proposed regulations 5-3-9 through 5-3-16 generally adopt the division's current safe yield standard for processing new applications. Proposed regulations 5-5-8 through 5-5-12 generally adopt the division's current policy concerning processing certain change applications. It is anticipated these standards will speed processing time, but will result in more applications being denied or subject to additional conditions. The fiscal impact to those applicants whose applications are denied or conditioned is unknown, but could be significant to some applicants.

5-3-6a. Sealing or padlocking diversion works. This amended regulation requires that whenever the chief engineer issues a cease and desist order, the diversion works shall be physically sealed or padlocked and a written notice to that effect placed on the diversion works and sent by restricted mail to the water right owner of record. This should result in a significant reduction of staff time currently used to monitor diversion works that are under cease and desist orders and provide strong evidence as to whether such diversion works have, or have not, been illegally operated. The division has been unable to quantify the costs saved from reduced monitoring. No other significant fiscal impact to

governmental entities is expected to result from this regulation.

5-3-9. Public interest. This new regulation sets forth additional factors which the chief engineer shall take into consideration in determining the public interest when approving new applications to appropriate water, including the amount of water necessary to satisfy senior domestic water rights from a stream and the amount of water available in hydraulically connected sources of water supply. This regulation generally implements existing policy and is not expected to result in a significant fiscal impact to governmental entities or to water users.

5-3-10. Availability of water for appropriation - safe yield. This new regulation adopts the existing general policy that all new applications to appropriate water outside groundwater management districts and intensive groundwater use control areas shall be processed on a safe yield basis. It further allows a procedure for the chief engineer to set a limit of the amount of water available for appropriation for any stream, stream reach, aquifer or other hydrologic unit. This regulation is not expected to result in a significant fiscal impact to governmental entities or to water users.

5-3-11. Availability of water for appropriation from unconfined groundwater aquifers. This new regulation sets forth a procedure for determining safe yield when considering any application to appropriate water from an unconfined aquifer. Generally speaking, the amount of water available for appropriation within a two-mile radius circle is equal to the average annual calculated recharge from precipitation in that same circle. Use of this formula should reduce processing time and provide the public with better information as to which applications can be approved. The reduced cost of processing applications is not known.

5-3-12. Availability of water for appropriation - safe yield; confined groundwater aquifers. This new regulation specifies that each application to appropriate water from a confined aquifer shall be processed on a case by case basis so that the safe yield of the source of supply is not exceeded. This regulation, which generally implements existing policy, is not expected to result in a significant fiscal impact to governmental entities or to water users.

5-3-13. Availability of water for appropriation - safe yield; surface water. This new regulation adopts existing policy that an application to directly divert the natural flow of the Kansas River, Missouri River, Big Blue River and Spring River and their tributaries shall be processed on a safe yield basis with certain limitations. Applications to divert the surface flow of any other stream in the state of Kansas shall be limited to the period October 1 through June 30, unless either off-stream storage facilities are provided, or the applicant has no need for water during the period July 1 through September 30. This regulation is not expected to result in a significant fiscal impact to governmental entities or to water users.

5-3-14. Safe yield exemptions. This new regulation exempts applications to appropriate up to 15 acre feet of groundwater meeting safe yield criteria under certain circumstances in areas located outside groundwater management districts and in areas not closed by a reg-

ulation of the chief engineer or intensive groundwater use control area order issued by the chief engineer. This regulation will allow some additional applications to be filed and approved, but no significant fiscal impact is expected to governmental entities or to water users.

5-3-15. Safe yield; miscellaneous exemptions. This new regulation exempts certain applications to appropriate water in areas outside groundwater management districts and intensive groundwater use control areas from meeting safe yield criteria if the use has occurred continuously since prior to the effective date of the regulation and could have reasonably been classified by the Division of Water Resources as a domestic use at the time use began. This regulation will apply only to relatively small users of water and is not expected to result in a significant fiscal impact to governmental entities or to water users.

5-3-16. Applicants' opportunity to submit additional information. This new regulation sets forth a procedure that an applicant will be notified by the chief engineer prior to dismissal of an application that safe yield requirements have not been met and give the applicant at least 15 days to request time in which to submit additional information. Staff time to set notices and respond to additional information will be significant but necessary to better process applications. No dollar estimate is available as to additional division staff time necessary. This regulation is not expected to result in any other significant fiscal impact to governmental entities or to water users.

5-5-8. Standards for approval of an application for a change in the place of use and a change in the use made of water. This new regulation adopts the basic principle that approval of an application for change cannot materially injure or adversely affect water rights or permits with priorities senior to the date the change application is filed. The regulation defines consumptive use as used in K.A.R. 5-5-3. This regulation is not expected to result in a significant fiscal impact to governmental entities or to water users.

5-5-9. Criteria for approval of a change application from irrigation to any other type of beneficial use. This new regulation essentially implements existing policy and limits the amount of water which may be changed to the new type of use to net irrigation requirements for a 50 percent chance rainfall for the county of origin multiplied by the maximum acreage legally irrigated under the authority of that water right in any one calendar year either prior to December 31, 1994, or during the perfection period, depending on when the application is filed. There are provisions for flexibility and exemptions. This regulation is not expected to result in a significant fiscal impact to governmental entities or to water users.

5-5-10. Partial changes in the use made of water from irrigation to another type of beneficial use. This new regulation adopts existing policy concerning the procedure for transferring a portion of a water right from irrigation to another type of beneficial use. This regulation is not expected to result in a significant fiscal impact to governmental entities or to water users.

5-5-11. Applications for change in place of use for irrigation purposes. This new regulation limits the num-

ber of acres which can be changed from the current irrigation use to another irrigation use to "base acreage." If the perfection period expired on or before December 31, 1994, or the water right is a vested right, the base acreage is the maximum number of acres actually legally irrigated in any one calendar year on or before December 31, 1994. If the perfection period expires after December 31, 1994, but the perfection period has not expired at the time the change application has been filed, the "base acreage" shall be the number of acres authorized by the permit. If the perfection period expires after December 31, 1994, and the perfection period has expired at the time the change application is filed, the "base acreage" shall be maximum acreage legally irrigated in any one calendar year during the perfection period. There are also provisions for expanding the "base acreage" in order to accommodate more efficient irrigation systems or create identical places of use. This generally implements existing policy, but is somewhat less restrictive. This regulation is not expected to result in a significant fiscal impact to governmental entities or to water users.

5-5-12. Net irrigation requirements. This new regulation sets forth the net irrigation requirements in each county for the 50 percent chance rainfall and the 80 percent chance rainfall. This regulation is not expected to result in a significant fiscal impact to governmental entities or to water users.

5-10-6. Procedure for determination of an active vested domestic water right. This new regulation sets forth the procedure for determining an active vested domestic water right. It is not known how many active vested domestic water rights will be determined each year. This will allow the division to document and better protect these real property rights for the benefit of their owners. The additional administrative costs to the division are not known. This regulation is not expected to result in a significant fiscal impact to other governmental entities or water users.

The formal hearings on these rules and regulations also will be accompanied by informational seminars conducted by Division of Water Resources personnel with more in-depth discussion concerning the proposed regulations and Kansas water law in general. Watch for publicity concerning the seminar in your area or contact the address or telephone number shown below for additional information.

Copies of these regulations and their economic impact statements may be obtained from the Division of Water Resources, (913) 296-4623.

### Article 18.—SIMULCASTING LICENSES

- 112-18-9. Duties of receiving facility. (a) A simulcasting licensee that conducts parimutuel wagering on a simulcast race or program shall act as a receiving facility on those dates. Each receiving facility shall provide:
- (1) communication facilities, which include all wire, radio, optical, satellite or other electromagnetic systems used to receive audio and visual transmissions between the sending racetrack, host facility and the receiving facility; and

(2) two voice communication systems between the receiving facility and the sending racetrack or host facility providing timely voice contact between the stewards, racing judges or simulcast official and the mutuel de-

partments at each racetrack or facility.

- (b) Before the beginning of the transmission of the first simulcast race or program of each day, each receiving facility shall initiate a test program of its receiver, decoder and data communication to ensure proper operation of the system. If a test program run under this subsection is unsuccessful or indicates a malfunction of any component of the receiving system, the licensee shall not conduct parimutuel wagering on a simulcast race or program until a successful test program is completed.
- (c) After each simulcast race or program, each receiving facility shall provide the reports of its parimutuel operations as required by K.A.R. 112-9-8 for both simulcast and live races. - 112-18-11. Emergency procedures. (a) A simulcasting licensee shall not accept wagers on a simulcast race until the simulcasting licensee is receiving the video signal from the sending racetrack. If the audio signal is not received, the simulcasting licensee shall establish a telephone linkup with the sending racetrack's stewards, racing judges or simulcast official and shall announce to the patrons all pertinent information.
- (b) If the simulcasting licensee loses the audio or video signal from the sending racetrack, the simulcasting

licensee shall immediately notify the sending racetrack

of the lost signal.

(c) If the audio or video signal is lost, after wagering has commenced, the simulcasting licensee shall establish a telephone linkup between the sending racetrack's stewards, racing judges or simulcast official and shall announce to the patrons all pertinent information. The licensee may continue to accept wagers with the telephone linkup while attempting to reestablish the audio or video signal, or may elect to refund all wagers prior to post time for the simulcast race.

(d) If the audio or video signals are lost and the telephone linkup cannot be established, the simulcasting licensee shall cease accepting wagers and immediately order a refund of all monies wagered into the pools prior

to post time for the simulcast race.

- 112-18-17. Manual merge. (a) If the guest facility's computer system fails to adequately transmit wagering data to the host facility, and a manual merge will not endanger the pools at the host facility, the host facility may manually merge the pools.

(1) To merge the pools manually, each guest facility's parimutuel representative shall notify the host facility

via telecopy or facsimile machine of:

(A) the total amount in the pool;

(B) the total dollars on winning wagers;

(C) the total dollars on the losing wagers in the pool. (2) For purposes of declaring the race official, the following individuals shall be notified when the procedure is complete:

(1) As soon as failure to merge is acknowledged, a parimutuel representative at the guest facility shall no-

tify the simulcast coordinator.

(2) The simulcast coordinator shall immediately make an announcement to the patrons via intercom or TV monitors, explaining the circumstances.

(b) Each simulcast licensee shall be required to advise patrons of its failure to merge policy by prominently displaying notice in the wagering areas, other special patron areas, and in the official racing program.

(c) Each contract for combined wagering pools entered into by a simulcasting licensee shall contain a provision stating that the simulcasting licensee shall not be liable for any measures taken which may result in a guest facility's wagers not being accepted into a combined wagering pool formed by the licensee if for any

(1) it becomes impossible to successfully merge the wagers placed in another state in the combined wagering pool formed by the simulcasting licensee; or

(2) the commission's or simulcasting licensee's representative determines that attempting to transfer pool

data from the guest facility will endanger the simulcasting licensee's wagering pool. (Authorized by K.S.A. 1993 Supp. 74-8804; implementing K.S.A. 74-8836, as amended by 1994 HB 3097, Sec. 4; effective, T-112-4-27-92, April 27, 1992; effective, T-112-9-10-92, Sept. 10, 1992; effective Nov. 23, 1992; amended Sept. 6, 1994.)
