## Kansas Racing Commission

Notice of Hearing on Proposed  
Administrative Regulations

A public hearing will be conducted at 9 a.m. Friday, January 12, in the Kansas Racing Commission's conference room, 3400 Van Buren, Topeka, to consider the adoption of proposed permanent regulations of the Kansas Racing Commission. This 60-day notice constitutes a public comment period for the purpose of receiving written public comments on the proposed regulations.

Any individual with a disability may request accommodation in order to participate in the public hearing and may request the proposed regulations and economic impact statements in an accessible format. Requests for accommodation to participate should be made at least five working days in advance of the hearing by contacting the secretary at the Kansas Racing Commission, (913) 296-5800.

A copy of the full text of the regulations and the economic impact statement may be reviewed or obtained at the commission office. The following is a summary of the proposed regulations:

**K.A.R. 112-3-17, Submission of information:** The proposed amendments to this regulation clarify the commission's authority to request information from any organization, facility owner or facility manager licensee or license applicant in a timely fashion, and to levy fines for failure to provide information requested by the commission after notice and hearing.

**Economic Impact:** Applicants, licensees and developers currently bear the expense of preparing and providing the information requested by the commission. The information requested can be extensive, and the costs and expenses incurred are unknown. No new or additional costs are imposed by this regulation.

**K.A.R. 112-4-4a, Crossover employment prohibited, exceptions:** This is a new regulation that defines "crossover employment" as being a situation in which an occupation licensee is concurrently employed by the facility owner or facility manager licensee and the organization licensee at the same racing facility. The regulation further identifies those situations in which crossover employment is permitted and prohibited. The racing judges and stewards have the authority to determine which situations constitute a licensing conflict.

**Economic Impact:** The commission will incur its normal administrative processing costs for issuing licenses. The number of additional licenses is estimated to be less than 100. The only other cost would be to the licensee for obtaining an additional license, if necessary, in order to work in an additional occupational category. No additional fingerprint fee would be necessary to secure a second license.

## Public Notice

The Kansas Department of Transportation has completed both the Kansas Long-Range Transportation Plan and the Kansas Bicycle and Pedestrian Transportation Plan.

The Kansas Long-Range Transportation Plan has been developed to guide future transportation program development in Kansas and to meet the requirements of the Intermodal Surface Transportation Efficiency Act (ISTEA). The plan is a broad-based policy document that identifies important transportation-related trends and issues and provides direction for future programs and actions.

The document points to some broad conclusions, which are reflected in the last chapter of the plan in the form of recommendations. During public involvement outreach efforts over the last two years, many individuals expressed the view that the current transportation network is sound and is serving the needs of the state well. The principal concern is with maintaining the existing infrastructure as the number one priority balanced against the need to always modernize and react to emerging needs for enhancements.

The Kansas Bicycle and Pedestrian Transportation Plan is considered to be an element of the long-range plan and will serve as a broad-based policy document for KDOT's bicycle and pedestrian transportation planning process.

These plans represent a significant effort to shape the future of transportation in Kansas. A copy of either plan can be obtained by contacting the KDOT Division of Planning and Development, 8th Floor, Docking State Office Building, 915 S.W. Harrison, Topeka, 66612, (913) 296-2252. For hearing assistance, call (913) 296-3585 (Voice/TTY).

**Request for Variance from  
Hazardous Waste Regulations**

The Kansas Department of Health and Environment is providing public notice that on September 28, 1995, Kansas Plating, Inc., 1110 N. Mosley, Wichita, submitted a request for a variance from specific hazardous waste regulations. The request for a variance was submitted in accordance with K.A.R. 28-31-13(a).

The variance is requested from K.A.R. 28-31-4(j), which allows a Kansas or EPA generator to accumulate as much as 55 gallons of each type of hazardous waste in not more than one container at or near any point of generation where waste initially accumulates, and which is under the control of the operator of the process generating the waste.

Kansas Plating, Inc. generates used 30" x 30" waste paint screens. The screens are currently being cut up into small pieces to fit into 55-gallon drums. Kansas Plating, Inc. proposes to use one cubic yard satellite containers for the accumulation of the waste paint screens. This will eliminate the generation of hazardous paint dust from the cutting procedure. The proposed containers are 33" x 33" x 33," have a plastic liner, and permit the handling of the waste paint screens safely. KDHE has reviewed the variance request and concluded that the variance is justified. In accordance with K.A.R. 28-31-13(b), public notice is being provided of the tentative decision to grant the variance.

Copies of the variance request will be available for public review through December 3 from 8 a.m. to 4:30 p.m. weekdays at the KDHE, Building 740, Forbes Field, Topeka, and at the KDHE district office, 130 S. Market, sixth floor, Wichita.

Comments concerning this variance request may be directed to Candy Williamson, Hazardous Waste Section, KDHE, Building 740, Topeka, 66620. Comments must be submitted in writing prior to November 21. Requests for additional information may be made by contacting KDHE at (913) 296-1600.

Upon written request of any interested person, a public meeting may be held to consider comments on this tentative decision. The person requesting a meeting shall state the issues to be raised and shall explain why written comments would not suffice to communicate the person's views. If a decision is made to conduct a public meeting, a separate public notice detailing the date and place of a public meeting will be issued.

After evaluating all public comments, a final decision shall be made by the secretary and a notice of the final decision shall be published in the Kansas Register. If approved, any conditions or time limitations needed to comply with all applicable state or federal laws or to protect human health or safety or the environment shall be specified by the secretary. A date upon which the variance will no longer be valid shall be prescribed in the final decision.

**Notice of Hearing on Proposed  
Administrative Regulations**

A public hearing will be conducted at 1 p.m. Thursday, January 11, at the Forbes Field Air Passenger Terminal conference room, Topeka, to consider the adoption of proposed changes in existing rules and regulations that are proposed for adoption on a permanent basis. A short summary of the contents follows. The proposed text of K.A.R. 28-33-12 and K.A.R. 28-34-11 can be obtained in two formats: one format contains only the new text, and the other format contains both the old and new text.

K.A.R. 28-33-1 is revoked in its entirety. The 1994 Legislature removed the authority of KDHE to regulate tests for syphilis because that authority is duplicated in 43 CFR Part 493, as in effect on October 1, 1994.

K.A.R. 28-33-11 is revoked in its entirety. The 1994 Legislature removed the authority of KDHE to regulate tests for immunodeficiency viruses because that authority is duplicated in 43 CFR Part 493.

K.A.R. 28-33-12 prescribes the minimum standards for laboratories in the state of Kansas to perform drugs of abuse testing. This simplifies and aligns state regulations to those of 43 CFR Part 493.

K.A.R. 28-34-11 modifies, clarifies and aligns personnel qualifications and proficiency testing in the state hospital regulations with those of federal regulations 43 CFR Part 493. Such an alignment simplifies operations and reduces regulatory cost for hospitals and their laboratories in Kansas.

There is no measurable increased economic impact on any agency, state, county or local unit of government by these regulations. The regulations might decrease costs due by the elimination of duplicative requirements between state and federal requirements included in the regulations. These regulations simplify the regulation of laboratory testing in the state.

This 60-day notice of the public hearing shall constitute a public comment period for the purpose of considering adoption of proposed changes in existing rules and regulations. All interested parties may submit written comments to Stanley P. Sutton, Chief Laboratory Improvement Program, Kansas Health and Environment Laboratory, Building 740, Forbes Field, Topeka, 66620-0001.

All parties will be given a reasonable opportunity to present their views orally on the adoption of the revised regulations during the hearing. It may be necessary to request each participant to limit any oral presentation to five minutes.

Any individual with a disability may request accommodation in order to participate in the hearing and may request the proposed regulations and fiscal impact statements in an accessible format. Requests for accommodation should be made at least five working days in advance of the hearing by contacting Stanley Sutton at (913) 296-1640.

## State of Kansas

Department of Health  
and EnvironmentNotice of Hearing on Proposed  
Administrative Regulations

The Kansas Department of Health and Environment will conduct a public hearing at 10 a.m. Wednesday, January 3, in the third floor auditorium of the Wyandotte County Health Department, 619 Anne Ave., Kansas City, Kansas, to consider adoption of new permanent air quality regulations K.A.R. 28-19-800, general conformity, and K.A.R. 28-19-801, transportation conformity, and the Kansas Transportation Conformity Plan. The proposed new regulations and the Transportation Conformity Plan will apply only in Wyandotte and Johnson counties.

**K.A.R. 28-19-800, general conformity,** adopts by reference, with minor revisions, the requirements of the federal general conformity rule. It requires that before undertaking certain activities that may generate specified threshold levels of air emissions, the federal agency proposing or supporting the activity must determine that the activity is consistent with the Kansas State Implementation Plan (SIP).

It is expected that federal projects proposed for Wyandotte and Johnson counties with emissions that meet the 100 tons per year threshold of the general conformity regulation will be rare. In those instances where a project does fall within the scope of the regulation, the costs of complying with the regulation will be incurred by the federal agency that must make the conformity determination.

If a federal agency determines that a project will require a conformity determination, KDHE may participate in the analysis of the anticipated emissions from the proposed project. The costs of this participation would be minimal.

**Environmental Benefit**

The environmental benefit that may result from the implementation of this regulation is difficult to assess without analyzing a specific federal action or project that is subject to its requirements. The state has not been advised of any impending federal project or action in the Kansas City maintenance area that will result in emissions that trigger the rule.

Environmental benefit may result if a proposed federal project that will create significant new emissions in the maintenance area is, as a result of the conformity regulations, required to mitigate adverse impacts on air quality.

No other state or local agencies, municipalities or other persons are expected to incur any costs as a result of adoption of the proposed regulation. It is not expected to have any direct fiscal impact on the general public.

**K.A.R. 28-19-801, transportation conformity,** establishes the criteria for making transportation conformity determinations. The purpose of the rule is to make certain that transportation plans and projects in Wyandotte and Johnson counties that are supported by the federal government do not conflict with the air quality plan for the Kansas City ozone maintenance area. It requires that cer-

tain Kansas state and local air and transportation agencies consult on matters related to transportation plans and projects in the Kansas City ozone maintenance area.

The Transportation Conformity Plan contains procedures for federal, state and local units of government to follow with regard to consultation on conformity issues.

**State Agencies**

Adoption of this regulation imposes obligations on KDHE and the Kansas Department of Transportation. Both agencies are designated as "Kansas consulting agencies," and therefore will be required to participate in the mandatory consultation process. This will involve attending Mid-America Regional Council meetings on conformity-related matters and review of documents circulated by other agencies. Two- to three-hour meetings related to conformity issues are expected to be conducted not more than six times per year.

Compliance with the rule is estimated to require an additional 1/5 FTE at each agency at a \$40,000 to \$45,000 annual pay rate. Taking into account fringe benefits and indirect costs, the annual cost to each agency is estimated at \$14,000, on a continuing basis.

**Counties and Municipalities**

The adoption of this regulation will impact the counties and municipalities in the Kansas City region in two different respects.

First, Wyandotte and Johnson counties will participate in the consultation process which the federal regulation requires. This will require attendance at meetings, but no other fiscal impact to Wyandotte and Johnson counties is anticipated.

Municipalities are not "consulting agencies" as that term is defined, and are not required to participate in the consultation process. However, municipalities in the Kansas City region are represented on two other MARC committees: the Total Transportation Policy Committee and the Air Quality Forum. Issues related to conformity will be considered by these two committees; however, this is not expected to create any costs for the municipalities that are represented on these committees.

Second, if a county or municipality sponsors a regionally significant project, the project must be included in MARC's analysis of the region's transportation plan for conformity purposes. Section 93.129 of the federal rule, which is incorporated by reference in the proposed Kansas regulation, states that a municipality which is a recipient of federal funds under title 23 U.S.C. or the Federal Transit Act shall not adopt or approve a regionally significant project unless the project comes from a conforming plan or TIP or is included in the regional emissions analysis supporting the currently conforming TIP. This provision imposes an obligation on counties and municipalities in the Kansas City metropolitan area to advise MARC or the Kansas Department of Transportation if they sponsor a regionally significant project, so that the project can be included in MARC's analysis.

This requirement will impose on local units of government an obligation to notify MARC of transportation projects that may be regionally significant. This is not expected to create any significant new costs for local

governments, which are already involved in the regional transportation planning process.

#### General Public

The transportation conformity rule will not impose any costs of complying with the regulation on the general public.

#### Environmental Benefit

The environmental benefit that may result from the implementation of this regulation is difficult to quantify. If modeling of the long range transportation plan or TIP reflects that emissions of VOCs, NO<sub>x</sub>, or both, would exceed the emissions budgets contained in the ozone maintenance plan for these pollutants, the long-range transportation plan or TIP would not conform. If this happened, the plan or TIP would be revised in order to decrease emissions to avoid a nonconforming result. The environmental benefit would consist of whatever reductions in emissions might be achieved as a result of the changes to the plan or TIP.

Any specific transportation project will conform as long as it has been included in the conforming long range transportation plan or TIP. If a regionally significant project has not been included in the long range transportation plan or TIP, it can conform only if a separate regional emissions analysis shows that the long range transportation plan and TIP would still conform if the project had been included. This will ensure that all regionally significant projects are included in the regional transportation planning analysis. However, it is merely a procedural requirement and will not have any direct environmental benefit.

Failure to promulgate these two Kansas regulations may result in the delay of certain transportation projects in Wyandotte and Johnson counties, the withholding of federal transportation funds for projects in these counties, or the imposition of EPA sanctions, which might include withholding of transportation funds for the entire state.

The time period between the publication of this notice and the scheduled hearing constitutes a public comment period for the purpose of receiving written public comments on the proposed regulations and Transportation Conformity Plan. All interested parties may submit written comments prior to the hearing to Gary Miller, Bureau of Air and Radiation, Building 283, Forbes Field, Topeka, 66620. All interested parties will be given a reasonable opportunity to present their views orally during the hearing. In order to give all parties an opportunity to present their views, it may be necessary to require each participant to limit any oral presentation to five minutes.

Copies of the proposed regulations and plan may be obtained by contacting Wendy Willoughby, Kansas Department of Health and Environment, Bureau of Air and Radiation, (913) 296-1550. A copy will be available for inspection at the Wyandotte County Health Department, Department of Air Quality. Questions pertaining to these matters should be directed to Gary Miller, (913) 296-1547.

Any individual with a disability may request accommodation in order to participate in the hearing and may request the proposed TIP revision in an accessible format. Requests for accommodation should be made at least five

working days in advance of the hearing by contacting Rob Bradford, (913) 296-1587.
