Request for Comments on Proposed
Special Local Need Registration

Notice is hereby given that Uniroyal Chemical Company, Inc. has requested a Special Local Need registration (SLN), Section 24 (c) FIFRA exemption, to allow for the use of Dimilin 2L (diflubenzuron), EPA Registration Number 400-461, to control grasshoppers and Mormon crickets on rangeland and noncropped areas in Kansas. Last year, 11 western states, including Nebraska, established a state registration for this use. The product is currently registered for use in Kansas for controlling certain insects in crops that include soybeans and cotton. In addition, the USDA Animal and Plant Health Inspection Service (APHIS) is preparing to use Dimilin 2L for grasshopper control on federal lands in 2000.

Currently, malathion and carbaryl are the only two registered insecticides used to control these pests. In contrast to these two products, diflubenzuron represents a new approach to rangeland grasshopper control. Diflubenzuron is an insect growth regulator (IGR). Its mode of action affects the formation and/or deposition of chitin in the insects exoskeleton. The larva/nymph is unable to successfully molt. If an adult female consumes diflubenzuron, the eggs she lays may not hatch. Diflubenzuron has been shown not to impact adult populations of various ground dwelling and flying nontarget arthropods in a rangeland ecosystem. In addition, diflubenzuron is a low-input chemical with rates not exceeding 0.014 pounds per acre.

In addition to the letter from the registrant requesting the SLN, a letter of support has been received from a Kansas State University extension specialist, whose specialty is insecticides and pesticidal safety. The use of the product for the intended SLN also is supported by an entomologist in the Plant Protection Program of the Kansas Department of Agriculture (KDA).

Based upon the application materials provided, the KDA proposes to establish a Section 24(c) registration. All food tolerances and supportive data needed to permit the requested use of these products have been issued. Information submitted by the applicant is on file with the KDA, and anyone wanting to present written comments,

data, or other evidence in support of or in opposition to the proposed registration may do so on or before February 14. Prepared documents or data should be addressed to John K. Stamer, Program Associate, Kansas Department of Agriculture, 109 S.W. 9th, 3rd Floor, Topeka, 66612-1281.
