**Notice of Hearing on Proposed
Administrative Regulations**

A public hearing will be conducted at 10:30 a.m. Thursday, September 7, at the SRS Learning Center, Room A, 300 S.W. Oakley, Topeka, to consider the adoption of amendments to an existing rule and regulation on a permanent basis effective 15-days after publication in the Kansas Register. Telephone conference will not be available.

This 60-day notice of the public hearing shall constitute a public comment period for the proposed regulation. All interested parties may submit written comments prior to or during the public hearing to Hope Burns, Office of the Secretary for SRS, Room 603-N, Docking State Office Building, 915 S.W. Harrison, Topeka, 66612. All interested parties will be given a reasonable opportunity to present their views, but it may be necessary to request each participant to limit any oral presentation to five minutes. The phrase Federal Mandate following an item indicates that the change is required by federal policy. Optional changes in regulations related to federal programs are subject to approval by the U.S. Department of Health and Human Services.

Copies of the regulation and the economic impact statement may be obtained by contacting Hope Burns at (785) 296-3969.

Any individual with a disability may request accommodation in order to participate in the public hearing and may request the proposed regulation and economic impact statement in an accessible format. Requests for accommodation should be made at least five working days in advance of the hearing by contacting Hope Burns or by calling the Kansas Relay Center at 1-800-766-3777.

The adoption of the regulation will take place at 9 a.m. Tuesday, September 12, in the SRS executive conference room, 603-N, Docking State Office Building. Telephone conference will not be available.

A summary of the proposed regulation and the economic impact follows:

**Article 5.—PROVIDER PARTICIPATION,
SCOPE OF SERVICES, AND REQUIREMENTS
FOR THE MEDICAID
(MEDICAL ASSISTANCE) PROGRAM**

K.A.R. 30-5-81 lists the scope of Medicaid-covered hospital services. This includes both inpatient and outpatient services.

This regulation change will eliminate heart, lung and heart/lung transplants from the scope of Medicaid-covered hospital services. Due to budgetary limitations, it is necessary to prioritize Medicaid services to ensure the most favorable health and welfare outcomes for the most Kansas Medicaid consumers. This has resulted in the elimination of heart, lung and heart/lung transplants from the list of covered Medicaid services. This regulation is not required by federal law.

Economic Impact: The proposed change is expected to save SRS approximately \$60,000 in state general funds annually.

Bearers of Cost: This proposed change is expected to save the federal government \$90,000 annually. The proposed change could cost medical providers \$150,000 annually.

Other Methods: No other method was appropriate for the desired outcome.

Department of Human Resources

Notice of Review of Administrative Regulations

As directed by Executive Order 00-03, the Kansas Department of Human Resources is conducting a comprehensive review of all the agency's regulations. The purpose of the review is to identify all regulations that are outdated, redundant, over-broad, ineffective or otherwise undesirable, and to revoke or modify those so identified. Each regulation will be evaluated according to the following criteria:

Need. Is the rule necessary to comply with the statutes that authorize it? Is the rule obsolete, duplicative or ambiguous to a degree that warrants repeal or revision? Is the rule broader than necessary to accomplish its purpose or objective?

Clarity. Is the rule written and organized in a clear and concise manner so it can be readily understood by those to whom it applies?

Cost. Have the benefits of the rule been considered in relation to costs? Do the benefits of the rule exceed the costs of the rule?

Fairness. Does the rule result in equitable treatment of those required to comply with it and those affected by the rule in other ways?

Effectiveness. Has the rule been effective in achieving the purpose for which it was established?

The regulations to be reviewed are in the *Kansas Administrative Regulations*, chapters 48 through 51, and in the 1999 supplement to the *Kansas Administrative Regulations*. Request for Comments

The Kansas Department of Health and Environment and the U.S. Environmental Protection Agency, Region VII, have received a Resource Conservation and Recovery Act (RCRA) hazardous waste Part B permit application from Ashland, Inc., the owner, and Ashland Distribution Company, the operator, for a facility located at 5420 Speaker Road, Kansas City, Kansas. The KDHE and the EPA are providing notice of their intent to issue a joint hazardous waste storage permit to the operator and owner of the facility.

The facility obtained interim status as a hazardous waste treatment and storage facility in May 1983 and was assigned the following EPA identification number: KSD057889313. The facility was originally permitted to store hazardous wastes effective January 20, 1988. This application is for the renewal of the permit to continue operating the hazardous waste storage facility and for corrective action.

In October 1985, the State of Kansas received final authorization from the EPA to implement its own hazardous waste management program in lieu of the federal program, except for the portions covered by the 1984 Hazardous and Solid Waste Amendments (HSWA). The KDHE portion of the permit (Part I) will be issued under the authority of K.S.A. 65-3431(i) and 65-3431(s), and the EPA portion of the permit (Part II) will be issued under the authority of Sections 3002(b), 3004(u) and (v), and 3005 of the RCRA.

Part I of the permit will authorize the operator and/or owner to store hazardous waste in approved containers in the hazardous waste storage area. A maximum of 9,240 gallons of solid and liquid hazardous waste in containers may be stored in this area. The facility may accept hazardous wastes generated from on-site sources and other off-site facilities. These container management units have secondary containment and comply with 40 CFR 264 Subpart I. The materials managed at the facility will include ignitable, corrosive, reactive, toxic and listed liquid or solid hazardous waste destined for off-site management. The EPA portion (Part II) of the joint permit will address the corrective action requirements of HSWA.

A copy of the administrative record, which includes the draft permit, Part B permit application, and all information pertaining to this permit action, will be available for public review through August 24, during normal business hours, at the following locations:

Anyone wishing to comment on the draft permit should submit written comments postmarked not later than August 22 to Mostafa Kamal (KDHE) or Harry Gabbert (EPA) at the above addresses.

A public hearing has not been scheduled; however, if requests are received that indicate a significant degree of public interest in the draft permit, a public hearing will be scheduled. An availability session was conducted February 2, 2000, in the Kansas City, Kansas Public Library. There was no public attendance or participation, and no comments were received during the session.

After consideration of all comments received, the KDHE secretary and the EPA regional administrator will make a final permit decision. Notice will be given to the applicant, to all persons who submitted written comments, to those who commented at the public hearing, and to those who requested notice of the final permit decision. If none of the comments received during the public comment period result in revision(s) to the draft permit, the permit will become effective immediately upon its issuance. If comments received during the public comment period result in revision(s), the permit will become effective 30 days after service of notice of the final decision or at a later date, if a review is requested under 40 CFR 124.19.

Notice of Hearing

The Kansas Department of Health and Environment has prepared a draft Kansas Underground Injection Control Permit, No. KS-01-173-010, for a proposed new Class I hazardous waste disposal well for Vulcan Materials, Inc. at its Wichita facility. The Vulcan Materials facility is located in Section 27, T28S, R1W, Sedgwick County. The facility mailing address is identified as P.O. Box 12283, Wichita, KS 67277. The draft permit was placed on public notice in the Kansas Register (Public Notice No. KS-EG-00-007) dated July 6, 2000 through August 6, 2000. A public hearing also has been scheduled. Persons wishing to comment on the draft permit must submit written statements to the KDHE address listed below by August 6 or provide oral and/or written statements at the hearing.

The public hearing on KDHE's intention to issue the draft permit has been scheduled for 7 p.m. Thursday, August 17, in the Meadowlark Room of the Sedgwick County Extension Education Center, 7001 W. 21st St. North, Wichita. The public hearing is being conducted for the purpose of receiving comments from the public and will continue until all comments are received and the hearing is closed by the hearing officer. Comments may be provided in oral and/or written form. All interested parties will be given a reasonable opportunity to present their views orally during the hearing. In order to give all parties an opportunity to present their views, it may be necessary to limit oral presentations to five minutes. It is recommended that parties provide the hearing officer with copies of written comments to ensure that all parties are able to provide KDHE with all their issues, concerns and recommendations in the event the time for oral presentations is limited due to the number of individuals desiring to make a presentation.

Vulcan Chemicals is a chloroalkali and chlorosolvent manufacturing facility. Stormwater runoff, contaminated groundwater and process wastewater originating from this facility and the adjacent Autochem North America facility will be injected. The wastewater consists primarily of sodium, calcium, and magnesium chloride brines. The acidic wastes consist primarily of hydrochloric acid with some sulfuric acid and the basic wastes are primarily sodium hydroxide. The average chloride concentration of these brines is approximately 20,000 ppm. Trace organic compounds and chlorinated phenol compounds also are present in the wastestream. The wastes are at times considered hazardous by definition of the RCRA and K.S.A. 65-3430 *et seq.* and regulations adopted thereunder.

The draft permit initially authorizes only the injection of nonhazardous waste and does not authorize the injection of hazardous waste until Vulcan Materials receives a granted petition for exemption to the prohibition of the injection of hazardous waste from the U.S. Environmental Protection Agency. Permitting of the proposed disposal well for nonhazardous wastes will enable the construction and environmental sampling required to complete the petition to EPA. The permit as it is proposed to be

issued will allow the injection of hazardous waste only if Vulcan receives a granted petition from the EPA. Use of the well for injection of hazardous waste is authorized upon granting of the petition by the EPA. The current injection volume limit for the facility of 2,520,000 gallons per day will remain unchanged. The purpose of this additional well includes allowing for efficient management of the wastes and handling wastes from the other injection wells at this facility when these wells are taken out of service for required periodic testing and to conduct workovers when necessary.

The secretary of KDHE will make a final permit decision after consideration of all comments received during the public notice period and at the public hearing and considering all requirements of statutes and regulations.

Additional information can be obtained by contacting the permit clerk at the Kansas Department of Health and Environment, Bureau of Water-TSS, Forbes Field, Building 283, Topeka, 66620, (785) 296-5519 or fax (785) 296-5509.

Any individual with a disability may request accommodation in order to participate in the public hearing and may request the draft permit in an accessible format. Requests for accommodation should be made at least five working days in advance of the hearing by contacting the permit clerk.
