Board of Education

Notice of Hearing on Proposed Administrative Regulations

The State Board of Education will conduct a public hearing at 1:30 p.m. Tuesday, June 14, in the board room of the State Education Building, 120 S.E. 10th Ave., Topeka, to consider proposed amendments to a teacher licensure regulation, 91-1-203, and new regulations 91-1-220 and 91-1-221, which replace 91-1-213 that is being revoked. A summary of the proposed regulations and their economic impact follows:

K.A.R. 91-1-203. Licensure requirements. The changes to 91-1-203 appear only in subsection (b) of the regulation, which concerns professional licenses. The added language will allow conditionally-licensed persons to complete the required performance assessment while employed in either a state board-accredited school or in a school that is accredited by a national or regional accrediting agency recognized by the state board. If this revision is not adopted, conditionally-licensed persons who are employed in schools that are not state board-accredited, although nationally or regionally accredited, will not be able to complete the performance assessment and will never qualify for a professional license. There will be no financial impact upon the State Board of Education, other governmental entities, private businesses or individuals.

New regulations 91-1-220 and 91-1-221 will replace current regulation 91-1-213. These regulations concern issuance of technical education certificates. These certificates are issued to persons who have knowledge, skills and experience in a technical or vocational area, but who do not have college degrees as teachers. Regulation 91-1-213, which was adopted along with the other licensure redesign regulations, provided the requirements for this certificate.

It has become apparent that different qualifications for this certificate are needed depending upon whether the certificate holder will be providing instruction primarily to regular education children or to children with disabilities. In the latter case, the certificate holder must possess additional knowledge and skills to work appropriately with special needs children.

Therefore, 91-1-220 is proposed to specify the requirements for a "standard" technical education certificate, and 91-1-221 sets forth the requirements for a technical education special certificate. Regulation 91-1-213 will be revoked. There will be no financial impact upon the State Board of Education, other governmental entities, private businesses or individuals.

All interested persons will be given a reasonable opportunity at the hearing to present their views, either orally or in writing, in regard to the proposed regulations. In addition, the period of public notice hereby provided constitutes a public comment period for the purpose of receiving written public comments on the proposed regulations. Such written comments may be submitted to the secretary of the State Board of Education at the address above. The hearing shall be conducted in compliance with the public hearing procedures of the State Board of Education.

Any individual with a disability may request accommodation in order to participate in the public hearing and may request the proposed regulations and economic impact statements in an accessible format. Requests for accommodation should be made at least five working days in advance of the hearing by contacting Lanny Gaston at (785) 296-3906 or TDD (785) 296-8172.

K.A.R. 60-17-111. Requirements for advanced registered nurse practitioner refresher course. The proposed change adds language that would allow a registered nurse who completed the education required to be certified as an advanced registered nurse practitioner and was never certified to be eligible to take a refresher course.

K.A.R. 60-15-101. Definitions and functions. The proposed language change adds staff to the list of those a nurse can teach or counsel. It also adds a qualifier that an "investigational drug" means a drug under study by the United States Food and Drug Administration.

K.A.R. 60-15-104. Medication administration in a school setting. The proposed language states that a registered nurse may delegate the procedure of medication administration in a school setting in accordance with this regulation. Current language stated that a registered nurse may delegate the procedure of medication administration in a school setting to unlicensed persons if the initial dose of a medication has been previously administered to the student unless the medication is ordered for an anticipated health crisis.

K.A.R. 60-16-103. Course approval procedure. The proposed language will add the requirement that a copy of the final written competency examination and the final clinical competency examination for an intravenous (IV) fluid therapy course to be submitted with their proposal to the board. The number of hours of continuing education that must be awarded for this course was decreased from 42 to at least 32 for the LPN that complete the

course. Other changes made in the regulation are clarifying language only.

K.A.R. 60-16-104. Standards for course; competency examination; recordkeeping. Proposed changes to this regulation for intravenous fluid therapy course will decrease the classroom hours from 40 to 30 hours and require a minimum of eight hours of supervised clinical practice that shall include at least one successful peripheral venous access procedure and the initiation of an intravenous infusion treatment modality on an individual. Proposed changes also name the only board-approved intravenous fluid therapy curriculum shall be the "venous access and intravenous infusion treatment modalities," 2003 revision, published by the Instructional Materials Laboratory, University of Missouri-Columbia, which is hereby adopted by reference with several modifications. The final competency examination shall be constructed from the board-approved pool of test questions that consist of a minimum of 50 questions.

There is no economic impact for the State Board of Nursing, other governmental entities, private business or individuals.
