Hydrocarbon contaminated groundwater is treated in an air stripper. The treated wastewater then flows into a series of ponds (ponds #1 and #3) prior to discharging into Brush Creek. Pond #2 is a nondischarging pond that contains the rinse water after the air stripper is acid washed. The proposed permit contains limits for benzene and pH. Kansas Permit No. M-BB25-OO04 Federal Permit No. KS0079243 Legal: NE1/4, NE1/4, NW1/4, S12, T8S, R6E, Riley County

Facility Description: The proposed action is to modify an existing permit for operation of an existing wastewater treatment facility treating primarily domestic wastewater. The proposed modification consists of changing the total residual chlorine limits to target values. The current facility is a mechanical plant serving a small working community resulting in large fluctuations in influent flow. KDHE encourages these types of operations to use chlorine tablets for disinfection because of the large flow fluctuations. Mechanical dechlorination is not required as the discharge is minuscule compared to the receiving volume of Tuttle Creek Reservoir and takes place via natural dissipation and contact with chlorine consuming debris in the receiving lake. All other terms and conditions of the permit shall remain in full force and effect.
