Notice of Commencement of
Negotiations for Engineering Services

Notice is hereby given of the commencement of negotiations for engineering services for a Wichita State University deferred maintenance project for the replacement of the HVAC system at Duerksen Fine Arts Center, built in 1956 with 97,494 gsf. Currently, three separately located mechanical equipment rooms using campus steam and chilled water serve the building. Humidity levels will need to be controlled more closely, noise is a critical factor, asbestos-containing material (primarily thermal systems insulation) does exist, and many of the ceilings needing removal are hard surfaced. The project will be phased and has a total construction budget of \$7,000,000. A program is available.

For more information concerning the scope of services, contact John Gist, (316) 978-5826.

To be considered, five (5) bound proposals and one (1) PDF file on a CD of the following should be provided: a letter of interest, an SF330 Part I, information regarding similar projects, and an SF330 Part II for each firm and consultant. Proposals should be concise and follow the 2007 State Building Advisory Commission guidelines, available to firms at <http://da.ks.gov/fp/>. If copies of the guidelines are needed, contact Phyllis Fast, Division of Facilities Management, Suite 102, Landon State Office Building, 900 S.W. Jackson, Topeka, 66612, (785) 296-5796, Phyllis.Fast@da.ks.gov. Submittals should be received by Phyllis Fast before noon December 21.

 Kansas Development Finance Authority
 Notice of Hearing

A public hearing will be conducted at 9 a.m. Thursday, December 20, in the offices of the Kansas Development Finance Authority, 555 S. Kansas Ave., Suite 202, Topeka, on the proposal for the KDFA to issue its Agricultural Development Revenue Bond for the projects numbered below in the respective maximum principal amount. The bond will be issued to assist the borrower named below (who will be the owner and operator of the project) to finance the cost in the amount of the bond, which is then typically purchased by a lender bank who then, through the KDFA, loans the bond proceeds to the borrower for the purposes of acquiring the project. The projects shall be located as shown:

Project No. 000702—Maximum Principal Amount: \$183,600. Owner/Operator: Greg and Michelle Strube. Description: Acquisition of 180 acres of agricultural land and related improvements and equipment to be used by the owner/operator for farming purposes. The project is being financed by the lender for Greg and Michelle Strube and is located at Section 18, Township 4, Range 17, Brown County, Kansas, approximately 3 miles north of Horton on U.S. 73 then 2 miles west on 140th Street.

Project No. 000707—Maximum Principal Amount: \$72,000. Owner/Operator: Loren M. Koch. Description: Acquisition of 120 acres of agricultural land and related improvements and equipment to be used by the owner/operator for farming purposes. The project is being financed by the lender for Loren M. Koch and is located at the East Half of the Northwest Quarter and the Northwest Quarter of the Northwest Quarter of Section 22, Township 5, Range 11, Nemaha County, Kansas, approximately 8 miles south of Centralia and 2.5 miles west on 24th Road.

The bond, when issued, will be a limited obligation of the KDFA and will not constitute a general obligation or indebtedness of the state of Kansas or any political subdivision thereof, including the KDFA, nor will it be an indebtedness for which the faith and credit and taxing powers of the state of Kansas are pledged. The bond will be payable solely from amounts received from the respective borrower, the obligation of which will be sufficient to pay the principal of, interest and redemption premium, if any, on the bond when it becomes due.

All individuals who appear at the hearing will be given an opportunity to express their views, and all written comments previously filed with the KDFA at its offices at 555 S. Kansas Ave., Suite 202, Topeka, 66603, will be considered. Additional information regarding the project may be obtained by contacting the KDFA.

Ethanex Northeast Kansas, LLC, has applied for an air quality construction permit in accordance with the provisions of K.A.R. 28-19-300 to construct an ethanol manufacturing plant. Emissions of particulate matter (PM), PM equal to or less than 10 microns in diameter (PM₁₀), volatile organic compounds (VOCs), oxides of nitrogen (NO_x), sulfur oxides (SO_x), carbon monoxide (CO) and hazardous air pollutants (HAPs) were evaluated during the permit review process.

Ethanex Northeast Kansas, LLC, proposes to own and operate a stationary source located in Pottawatomie County (north of St. Marys adjacent to the Jeffrey Energy Center), at which a 140-million-gallon per year fuel grade ethanol plant is to be constructed and operated.

A public comment period has been established until noon January 7 to allow citizens the opportunity to express any concerns they may have about this proposed permitting action. All comments should be submitted in writing to Terry T. Tavener, KDHE, Bureau of Air and Radiation, 1000 S.W. Jackson, Suite 310, Topeka, 66612-1366. Comments also may be presented at the public hearing.

Any member of the public may request a public hearing be conducted to provide comments on the proposed issuance of the draft air quality construction permit. Written requests to hold a public hearing should be sent to the attention of Sherry Walker at the address listed above or by fax to (785) 291-3953 and must be received by noon January 7. If a request is received, a public hearing is tentatively scheduled by KDHE at 7 p.m. January 10 at St. Marys High School, Commons Area, 601 E. Lasley, St. Marys. If no requests to hold the public hearing are received by this date and time, the public hearing will be cancelled.

A copy of the proposed permit, permit application, all supporting documentation and all information relied upon during the permit application review process is available for public review for a period of 30 days from the date of publication during normal business hours, 8 a.m. to 5 p.m., at the KDHE, Bureau of Air and Radiation, 1000 S.W. Jackson, Suite 310, Topeka; and a copy of the proposed permit can be reviewed at the KDHE Northeast District Office, 800 W. 24th, Lawrence. To obtain or review the proposed permit and supporting documentation, contact Terry Tavener, (785) 296-1581, at the KDHE central office; and to review the proposed permit only, contact the air quality district representative, (785) 842-4600, in the KDHE Northeast District Office. Request for Comments

The Kansas Department of Health and Environment is soliciting comments regarding a proposed air quality operating permit. Southern Star Central Gas Pipeline has applied for a Class I operating permit renewal in accordance with the provisions of K.A.R. 28-19-510 et seq. The purpose of a Class I permit is to identify the sources and types of regulated air pollutants emitted from the facility; the emission limitations, standards and requirements applicable to each source; and the monitoring, record keeping and reporting requirements applicable to each source as of the effective date of permit issuance.

Southern Star Central Gas Pipeline, Owensboro, Kentucky, owns and operates Hoxie Compressor Station located at Section 18, T9S, R28W, Sheridan County, Kansas.

A copy of the proposed permit, permit application, all supporting documentation and all information relied upon during the permit application review process is available for a 30-day public review during normal business hours at the KDHE, Bureau of Air and Radiation, 1000 S.W. Jackson, Suite 310, Topeka; and a copy of the proposed permit can be reviewed at the KDHE Northwest District Office, 2301 E. 13th, Hays. To obtain or review the proposed permit and supporting documentation, contact Michael J. Parhomek, (785) 296-1580, at the KDHE central office; and to review the proposed permit only, contact Rick Robinson, (785) 625-5663, at the KDHE Northwest District Office. The standard departmental cost will be assessed for any copies requested.

Direct written comments or questions regarding the proposed permit to Michael J. Parhomek, KDHE, Bureau of Air and Radiation, 1000 S.W. Jackson, Suite 310, Topeka, 66612-1366. In order to be considered in formulating a final permit decision, written comments must be received before the close of business January 7.

A person may request a public hearing be held on the proposed permit. The request for a public hearing shall be in writing and set forth the basis for the request. The written request must be submitted to Sherry Walker, Bureau of Air and Radiation, not later than the close of business January 7 in order for the Secretary of Health and Environment to consider the request.

The U.S. Environmental Protection Agency has a 45-day review period, which will start concurrently with the 30-day public comment period, within which to object to the proposed permit. If the EPA has not objected in writing to the issuance of the permit within the 45-day review period, any person may petition the administrator of the EPA to review the permit. The 60-day public petition period will directly follow the EPA's 45-day review period. Interested parties may contact KDHE to determine if the EPA's 45-day review period has been waived.

Any such petition shall be based only on objections to the permit that were raised with reasonable specificity during the public comment period provided for in this notice, unless the petitioner demonstrates that it was impracticable to raise such objections within such period, or

unless the grounds for such objection arose after such period. Contact Jon Knodel, U.S. EPA, Region VII, Air Permitting and Compliance Branch, 901 N. 5th St., Kansas City, KS 66101, (913) 551-7622, to determine when the 45-day EPA review period ends and the 60-day petition period commences.

Legal Description: NE¼, NW¼, SW¼, S21, T32S, R4W, Sumner County
Facility Description: The proposed permit was placed on public notice November 22, 2007. Changes to the schedule of compliance requirements have caused this permit to be resubmitted for review and

comment. The proposed action is to reissue an existing permit for an existing wastewater treatment plant treating primarily domestic wastewater. The proposed permit contains limits for biochemical oxygen demand and total suspended solids. Monitoring for ammonia, fecal coliform/E. coli, total recoverable copper, pH and recording of the water level of the final cell also will be required. Contained in the permit is a schedule of compliance allowing the permittee to increase sampling to monthly in an attempt to consistently comply with the permit requirements. If the permittee can consistently meet permit limits, no additional action is required. If, after one year, the permittee is unsuccessful at bringing this facility into consistent compliance, the permittee will submit a facility plan and proposed schedule as to necessary upgrade/replace of the existing facility. The permit requirements are pursuant to the Kansas Surface Water Quality Standards, K.A.R. 28-16-28(b-f), and Federal Surface Water Criteria, and are technology based.

Facility Name: The Coleman Company, Inc. - Northeast Plant

Facility Address: 3600 N. Hydraulic, Wichita, KS 67219

Facility Description: The proposed action is to reissue an existing permit for discharge of noncontact cooling water and stormwater runoff. This facility manufactures outdoor camping equipment, lanterns, camp stoves, jugs and ice chest coolers. City water used for noncontact cooling of 11 rotovac plastic molding machines, the swamp coolers on the roof, roof drains and some stormwater runoff from the surrounding ground is directed to an earthen retention pond (Industrial Lake). As needed, city water used for one pass noncontact cooling of air compressors may be directed to the retention pond. No cooling water additives are utilized. Total discharge from this facility, excluding stormwater runoff, is about 18,000 gallons per day. Noncontact cooling water from air compressors, sheet extruders, blowmolds, brazing ovens and resistant welding is directed to the cooling towers. Cooling tower blowdown and domestic wastewater is discharged to the sanitary sewer. In case of an emergency when the cooling towers are inoperable, chemicals in the closed cooling tower loop are first flushed (with city water) into the sanitary sewer and then the one-pass noncontact cooling water from the cooling towers system (maximum 2000 gpm for 4 hours) is directed to the retention pond. The permit requirements are pursuant to the Kansas Surface Water Quality Standards, K.A.R. 28-16-28(b-f), and Federal Surface Water Criteria, and are water-quality based.

Facility Description: The proposed action is to issue a new permit for operation of a new nonoverflowing lagoon wastewater treatment facility. Included in this permit is a schedule of compliance requiring the permittee to obtain the services of a KDHE-certified wastewater treatment plant operator to achieve compliance with this permit. The permittee also is required to submit an acceptable "no exposure" or a "not applicable" certification for exclusion from NPDES stormwater permitting. A variance from the lagoon liner requirements is hereby public noticed for comment. The variance was proposed to allow a compacted earthen liner rather than a double synthetic liner because the wastewater is similar to domestic waste rather than the industrial type wastewater anticipated by the regulations. Discharge of wastewater from this treatment facility to surface waters of the State of Kansas is prohibited by this permit.

 Facility Name: Parsons Precision Products, Inc.
 Facility Address: 3333 Main, Parsons, KS 67357
 Facility Description: The proposed action is to reissue an existing pretreatment permit for this facility. This facility processes titanium metal into various parts for the aerospace industry. The titanium is heat treated and a portion of the parts are cut to size using a water jet process. The wastes from the water jet process discharge to a sump, or drain G (Outfall 002). The metal parts are then processed in a series of conversion coating tanks, consisting of chemical etching and milling and a passivating operation, to remove oxides from the metal. Wastes from an air scrubber system also are generated and combined with the conversion coating wastes. These wastes are then neutralized in a treatment tank to adjust the pH of all wastes before discharging to the city sanitary sewer (Outfall 001). The proposed permit includes limits for total toxic organics, cadmium, chromium, copper, lead, nickel, silver, zinc, total cyanide and pH, as well as monitoring of effluent flow. The permit limits are pursuant to state and federal pretreatment requirements.

Persons wishing to comment on the draft documents and/or permit applications must submit their comments in writing to the Kansas Department of Health and Environment if they wish to have the comments considered in the decision-making process. Comments should be submitted to the attention of the Livestock Waste Management Section for agricultural-related draft documents or applications, or to the Technical Services Section for all other permits, at the Kansas Department of Health and Environment, Division of Environment, Bureau of Water, 1000 S.W. Jackson, Suite 420, Topeka, 66612-1367.

After review of any comments received during the public notice period, the Secretary of Health and Environment will issue a determination regarding final agency action on each draft document/application. Notice of Hearing on Proposed
 Administrative Regulations

A public hearing will be conducted at 1:30 p.m. Tuesday, February 5, in the Azure Conference Room, fourth floor, Curtis State Office Building, 1000 S.W. Jackson, Topeka, to consider the adoption of new breath alcohol testing regulations and the revocation of existing breath alcohol testing regulations. The proposed new regulations apply primarily to evidential breath alcohol testing devices and certification procedures, but also include preliminary breath screening devices. The Kansas Department of Health and Environment proposes to revoke the existing breath alcohol testing regulations and to adopt new breath alcohol testing regulations that better correlate to the technological changes in breath testing that have occurred in the 20 years since the existing regulations were first adopted. The proposed new regulations also will improve the clarity and organization of the regulations.

One of the key changes to the regulatory scheme is the elimination of the operator proficiency-testing requirements found in K.A.R. 28-32-2, which is proposed for revocation. Proficiency testing involves the shipment of standards to law enforcement agencies four times per year at an annual cost to KDHE of about \$5,000. Because breath-testing instrument technology has changed and the operation of the breath-testing instrument has been simplified over the years, it is believed the requirement of continuing education is a more effective way of maintaining operator proficiency with the instrument. Another regulatory change shifts the operator certificate from a one-year certificate to a two-year certificate, thus reducing the staff time required to issue certifications.

A summary of changes to the regulations follows. The new regulations will not result in any increased cost to the regulated community.

K.A.R. 28-32-8. Definitions. The current breath alcohol testing regulations do not include definitions. Many of the terms contained in this proposed new regulation have been in use as defined through KDHE operator training manuals. Key terms defined in this regulation include "agency," "agency custodian," "alcohol" (from K.S.A. 2006 Supp. 8-2,128), "alcohol concentration" (from K.S.A. 2006 Supp. 8-1013), "certified agency," "certified operator," "device custodian," "evidential breath alcohol test," "evidential breath alcohol test device," "preliminary breath-screening device" and "quality control."

K.A.R. 28-32-9. Agency certification. K.A.R. 28-32-9 establishes the program elements required for a law enforcement agency to maintain an evidential breath alcohol-testing program and provides for the agency certificate's term, renewal, and suspension or revocation. This proposed new regulation replaces K.A.R. 28-32-4, which is proposed for revocation in this rulemaking.

K.A.R. 28-32-10. Operator certification. To become certified, K.A.R. 28-32-10 requires an operator to complete a

(continued)

course of instruction and a written examination and sets the parameters for the operator certificate's term, renewal (including a requirement for continuing evidential breath alcohol testing education), and suspension or revocation. K.A.R. 28-32-10 also makes new provision for military service or official leave of absence and the effect on an operator's certification status. This proposed new regulation replaces K.A.R. 28-32-5, which is proposed for revocation in this rulemaking.

K.A.R. 28-32-11. EBAT device certification. In addition to the test device certification requirements, K.A.R. 28-32-11 includes device maintenance, repair and modification provisions. This proposed new regulation replaces K.A.R. 28-32-1, which is proposed for revocation in this rulemaking.

K.A.R. 28-32-12. Certified operator instruction and continuing education requirements. This regulation places the operator training requirements currently in K.A.R. 28-32-1 in a new regulation devoted entirely to training. The only "new" provisions are the addition of "a law enforcement training center" to the list of training entities and to make continuing evidential breath alcohol testing education course requirements and the course instructor subject to the secretary's approval.

K.A.R. 28-32-13. Records and reports. This proposed new regulation establishes certified agency recordkeeping and reporting requirements for certified operators and evidential breath alcohol testing devices assigned to the agency and subjects the records to annual inspection by the secretary. These requirements are not new to the breath alcohol program; they have been relocated from other regulations to a single regulation for ease of reference.

K.A.R. 28-32-14. Preliminary breath-screening test devices. K.A.R. 28-32-14 combines and restructures the provisions for preliminary breath screening devices that are currently found in K.A.R. 28-32-6 and 28-32-7, which are proposed for revocation in this rulemaking. The most significant change to the regulation is the expansion of the list of approved devices in the regulation.

The time period between publication of this notice and the scheduled hearing serves as the required public comment period of at least 60 days for the purpose of receiving written public comments on the proposed regulations. All interested parties may submit written comments prior to 5 p.m. on the day of the hearing to Shari Albrecht, Kansas Department of Health and Environment, 1000 S.W. Jackson, Suite 400, Topeka, 66612-1367, by fax to (785) 291-3266, or by e-mail to sfeistal@kdhe.state.ks.us. All interested parties will be given a reasonable opportunity to present their views orally on the adoption of the proposed regulations during the hearing. In order to give all parties an opportunity to present their views, it may be necessary to request that each participant limit any oral presentation to five minutes.

Any individual with a disability may request accommodation in order to participate in the public hearing and may request the proposed regulations and regulatory impact statement in an accessible format. Requests for accommodation should be made at least five working days in advance of the hearing by contacting Shari Albrecht at (785) 296-1607 or sfeistal@kdhe.state.ks.us.

Complete copies of the proposed regulations and the corresponding regulatory impact statement may be obtained on the Kansas Health and Environmental Laboratories Web site at www.kdheks.gov/labs/ or by contacting Kay White at (785) 296-1535 or kwhite@kdhe.state.ks.us. Questions pertaining to these proposed regulations should be directed to Shari Albrecht.
