The consultant will provide value engineering (VE), the systematic application of recognized techniques by a multi-disciplined team to identify the function, the worth, the alternatives through the use of creative thinking, and the necessary functions to accomplish the original purpose of the project. The results are reliability and lowest life-cycle cost without sacrificing safety, quality and environmental attributes of the project.

The FHWA requires VE (see Part 627 of Title 23 of the Code of Federal Regulations) on qualifying design-build projects, all federal-aid highway funded projects on the NHS with an estimated total cost of \$25 million or more, a bridge project with an estimated total cost of \$20 million or more, or any project designated by the Secretary of Transportation.

Firms not prequalified with KDOT must submit seven copies of KDOT Form 1050 to become prequalified. The form is available at www.ksdot.org/divengdes/prequal.

From the firms expressing interest, the Consultant Selection Committee will select a list of the most highly qualified (not less than three and not more than five) and invite them to attend an individual interview conference. At this time, the consulting firms can more thoroughly discuss their experience related to the type of project at hand and will be expected to discuss, in some detail, their approach to these types of projects and the personnel to be assigned to the project. Firms not selected to be shortlisted will be notified by letter.

The Consultant Negotiating Committee, appointed by the Secretary of Transportation, will conduct the discussions with the firms invited to the individual interview conferences. The committee will select the firm to perform the professional services required for completing the advertised project. After the selection of this firm, the remaining firms will be notified by letter of the outcome.

It is KDOT's policy to use the following criteria as the basis for selection of the consulting engineering firms:

- 1. Size and professional qualifications;
- 2. experience of staff;
- 3. location of firm with respect to proposed project;
- 4. work load of firm; and
- 5. firm's performance record.

The firm's accounting systems must have the following capabilities before the firm may be awarded a contract:

• Valid, reliable and current costs must be available within the system to support cost and pricing data;

- capability to provide a means of measuring the reasonableness of incurred costs;
- capability to identify and accumulate allowable costs by contract or project records that will reconcile with the general ledger; and
- ability to provide supporting documentation of actual expenditures for each billing, based on costs.

All interested parties will be given a reasonable opportunity at the hearing to present their views orally or in writing in regard to the adoption of the proposed regulation. All written or oral comments submitted by interested parties on or before January 6 will be considered by the commission as a basis for making changes to the proposed permanent regulation.

The following is a brief summary of the proposed regulation and economic impact statement:

K.A.R. 82-3-1117. This regulation requires an application and approval by the Conservation Division for a post closure determination of the CO_2 storage facility. The regulation specifies the content of the application for a post closure determination. Upon approval of post closure status, the operator must plug any remaining monitor wells; the CO_2 storage facility permit will then be revoked. The CO_2 storage facility operator will remain responsible for any future remediation or monitoring activities that become necessary.

Economic Impact Statement: The amendment shifts post closure responsibility for any remediation or monitoring of the CO_2 storage facility from the state to the operator. The cost to the operator could be significant if any post closure remediation was required, but those costs are so variable they cannot be accurately projected.
