Notice of Proposed EPA and KDHE Approval of Revisions to the Coffeyville Industrial Pretreatment Program

The City of Coffeyville (City) has proposed changes to its industrial pretreatment program, which regulates and controls wastewater contributions from industrial and other non-domestic wastewater sources, to the city sanitary sewer. The proposed changes would adopt technically-based local limits, previously approved by the U.S. Environmental Protection Agency (EPA) and the Kansas Department of Health and Environment (KDHE), specifically for the City Wastewater Treatment Plant.

The City has requested EPA and KDHE approval of the proposed changes. The proposed changes have been prepared in a manner that the City believes will remain fully protective of the environment. You may obtain a copy of the proposed program changes by contacting the City of Coffeyville, using the contact information below.

The City and Region 7 EPA will accept comments and views on the proposed industrial pretreatment program changes for a period of 30 days following the date of this publication. All written comments and views will be considered by EPA and KDHE in determining whether it will issue final approval of the proposed changes. If no substantive comments are received, EPA and KDHE will approve the Pretreatment program changes, as proposed.

You may also request within the 30-day period that Region 7 EPA hold a public hearing on the proposed revisions. Any request for public hearing should be directed to Region 7 EPA and should indicate the interest of the person filing such request and the reasons why a hearing is warranted.

Comments and any public hearing requests should be provided by mail, email or other written form to the following:

Notice of Hearing

A public hearing will be conducted at 9:00 a.m. Thursday, June 28, 2018, in the offices of the Kansas Development Finance Authority (KDFA), 534 S. Kansas Ave., Suite 800, Topeka, on the proposal for the KDFA to issue its Agricultural Development Revenue Bond for the project numbered below in the respective maximum principal amount. The bond will be issued to assist the borrower named below (who will be the owner and operator of the project) to finance the cost in the amount of the bond, which is then typically purchased by a lender bank who then, through the KDFA, loans the bond proceeds to the borrower for the purposes of acquiring the project. The project shall be located as shown:

Project No. 001012 Maximum Principal Amount: \$56,200. Owner/Operator: Cole M. and Chelsea Unruh; Description: Acquisition of 36.3 acres of agricultural land and related improvements and equipment to be used by the owner/operator for farming purposes (the "Project"). The Project is being financed by the Lender for Cole M. and Chelsea Unruh (the "Beginning Farmer") and is located at the North Half of the North Half of the Southeast Quarter on Section 4, Township 20, Range 1 West, McPherson County, Kansas, approximately 2.5 miles south of Canton, Kansas on 27th Avenue.

The bond will be payable solely from amounts received from the respective borrower, the obligation of which will be sufficient to pay the principal of, interest and redemption premium, if any, on the bond when it becomes due.

All individuals who appear at the hearing will be given an opportunity to express their views concerning the proposal to issue the bond to finance the project, and all written comments previously filed with the KDFA at its offices at 534 S. Request for Proposals

Introduction

The Kansas Department of Transportation (KDOT) in cooperation with Kansas counties is interested in contracting with a consulting firm pre-qualified in categories 212-Highway Design-Minor Facility and/or 231-Traffic Control Analysis and Design to provide services to develop a Local Road Safety Plan (LRSP) for each county in Kansas that desires to participate in the LRSP program within the next 5 years. (We have developed

LRSPs for 4 counties that participated in the pilot LRSP project. With 101 counties remaining, LRSPs will need to be developed for approximately 20 counties per year for the next 5 years.)

Project Background

Kansas' Strategic Highway Safety Plan (SHSP) has found that in the five-year period between 2009-2013, 48 percent of fatalities and 55 percent of disabling injuries occurred on roads owned by local public authorities. The SHSP goal is to halve fatalities and serious injuries on all public roads in the state over a 20-year period ending in 2029. With limited funds, a county needs a plan to effectively make an impact on their crash statistics. The intent of this Request for Proposal (RFP) is to develop a Local Road Safety Plan (LRSP) for each county. KDOT has completed a pilot project for four counties and has developed the template to use for all future LRSPs for all Kansas counties.

The Local Road Safety Plan concept is designed to build on the foundation established by the SHSP. These plans will provide the basis for systemic implementation of safety measures across the entire jurisdiction. Development of an LRSP will be advantageous for the county in securing future safety funds since the systemic identification of crash problems, identified roadway risk factors, and potential countermeasures will be a focus of Kansas' local safety programs in the future. Local jurisdictions will also be able to use the information to meet their road safety planning needs. The Local Road Safety Plan should be a document that identifies several proactive measures, based on current crash trends, which will increase the overall safety for roadway users. The consultant will develop, for each county, a prioritized list of proposed safety improvements.

Key reference documents include the following documents:

- FHWA, Developing Safety Plans: A Manual for Local Rural Road Owners
- FHWA, Systemic Safety Project Selection Tool
- FHWA, Improving Safety on Rural Local and Tribal Roads
- The LRSPs developed for Barton, Butler, McPherson, and Stafford Counties

Schedule/Deadline

A pdf of the interest response must be emailed to KDOT.LPePlans@ks.gov by 3:00 p.m. (CST) June 21, 2018. Evaluation and shortlisting to three (3) firms will occur on or about June 29, 2018 after which time all firms that submitted will be notified of the shortlisting. Requests for Proposals, from the shortlisted firms, will be requested July 2, 2018 to be due July 27, 2018. Ranking and selection should occur by August 3, 2018. Negotiations with the most highly ranked firm to commence on or about August 6, 2018. An agreement should be in place September 7, 2018.

Project Scope

The LRSPs will include all major collectors and all other paved roads under the county's jurisdiction except subdivisions with speed limits lower than 35 mph. The plan will include recommendations for safety improvement projects based on risk factors and high accident lo-

cations, if any. Low-cost systemic safety measures will be emphasized in the recommendations. More extensive improvements should be recommended only where systemic measures would not adequately address the risk. The final product will provide a prioritized list of safety improvements with a rough estimate of costs. The prioritization will be based on crash history and risk factors.

Tasks:

1. Project Management

Perform day to day project management of this contract, including submission of monthly invoices/progress reports. Attend a monthly conference call to discuss project status. Attendees for each call are anticipated to be KDOT, the project representative for each county and any sub consultant(s) on the project. A total of ten (10) conference calls are anticipated per year. Coordinate and provide guidance to sub consultants on tasks to be performed by sub consultants.

2. Crash Analysis

Crash records (accident reports) for LRSP routes in the county will be furnished by the county for the most recent five years. Review the circumstances of the crashes to aid in the identification of potential countermeasures and any high accident locations.

3. Data Collection/Analysis

Collect attribute data that can be used to identify risk factor rankings for intersections, segments, and curves. Data collection will be conducted to determine if an approved risk factor identified in Task I is present, and initially, this will be limited to prescreening the LRSP routes using readily available data sources (e.g., existing KDOT and county mapping or GIS records, existing aerial photography, Google, Bing, etc.). Each LRSP study route will then be driven once to collect additional limited field data that can be used to determine the presence of an approved risk factor. Video data may be collected as part of this effort. More detailed data for roadway and shoulder characteristics (e.g., width, slope, superelevation, etc.) may need to be collected later for the 10 recommended safety projects for each county to prepare preliminary improvement scopes and cost estimates. It is anticipated that a separate conference call with KDOT and each county will be held to discuss risk factors and finalize data collection methods.

The following information is relevant to support the systemic technical analyses:

- Intersections
 - Geometry on major and minor legs (turn lanes, radii, etc.)
 - Traffic control devices (signal, stop control including sign size, etc.)
 - Distance to the previous STOP sign
 - Skewed approaches
 - Proximity to horizontal or vertical curve
 - ADT
 - Rural/urban

- At-grade railroad crossing
- Presence of development
- Presence of a severe crash
- Segments (usually between major intersections)
 - Terminal points
 - Paved or gravel
 - Width of roadway
 - Shoulder material and width
 - Edge condition
 - Existing signing and pavement marking
 - Curve density
 - Adjacent land use and entrances
 - Proximity of fixed objects
 - ADT
 - Rural/urban
 - Presence of a severe crash
- Curves
 - Curve radius
 - Presence of an intersection (in curve)
 - Presence of a visual trap (e.g., road, trees, or utility poles on tangent extended)
 - Advance warning signs (including Chevron)
 - Proximity of fixed objects
 - ADT
 - Rural/urban
 - Presence of a severe crash

The initial prescreening will include estimating ADT information using the best information available rather than collecting count data. Aerial photography will be used for intersection approach angle, and entrance locations, and to verify relevant segment and curve data (e.g., pavement and shoulder width, proximity of fixed objects). General assessments will be made for assessing the presence and proximity of fixed objects (e.g., little to none, moderate, prevalent, etc.), shoulder characteristics, curve superelevation, and if possible, edge condition. The limited field data collection drive through will be used to supplement the readily available data sources. It is anticipated this will be required for intersection sight distance (cursory assessments only, such as adequate or limited), and to verify or obtain pertinent intersection, segment or curve information (e.g., edge condition, pavement width, shoulder width and slope, curve superelevation, existing signing). Data collected as part of previous studies on the LRSP routes, such as a Practical Road Safety Assessment or a Traffic Engineering Assistance Program study, will be supplied by KDOT or the county and may also be used as part of this task. The attribute data will be stored in a database to facilitate viewing and processing.

4. List of Safety Strategies/Countermeasures
- a. Utilize the KDOT Bureau of Local Projects (BLP) list of safety strategies and countermeasures for each of the risk factors. Primary references for countermeasures include NCHRP 500 series reports, NHTSA’s Countermeasures That Work, FHWA’s Towards Zero Deaths (human factors strategies), FHWA’s Proven Safety Countermeasures

(continued)

- asures, and FHWA's Crash Modification Factors (CMF) Clearinghouse. Other references may be used in coordination with KDOT and/or county approval.
- b. KDOT BLP will provide a table with a brief description, an opinion of the probable cost to implement, and the expected effectiveness (CMF if available) for each of the safety strategies and countermeasures identified.
5. Safety Workshops
 - a. Develop, promote, and lead one safety workshop in each county. Local participants will be determined by the project representative for each county (e.g., county road and bridge supervisor, public works director, etc.) in coordination with the KDOT project manager. It is anticipated that participants will include county commissioners and key stakeholders from the county's engineering, education, enforcement, and emergency services communities. The purpose of the workshop is to educate stakeholders on the magnitude of the issues and the effectiveness of possible solutions, present the results of the crash and roadway data analysis, and obtain feedback on specific locations of concern as well as potential strategies/countermeasures.
 - b. Prepare workshop invite and agenda in advance of the meeting. These materials will focus on communicating the intent of the workshop. Submit to KDOT and the counties for review and approval prior to submitting it to participants. The project representative for each county will be responsible for booking a meeting room and sending out the invite/agenda to participants.
 - c. Prepare and distribute notes/minutes from the workshop. Final documentation will be distributed after comments from attendees have been received. A follow-up meeting will be conducted with each county's project representative, as well as other core decision makers or stakeholders, to review and discuss engineering projects developed for their county. It is anticipated that the meeting will occur in conjunction with Task 6 services.
 6. Identify Short List of Critical Strategies/Countermeasures
 - a. Prepare a list of priority safety strategies and countermeasures that are recommended for implementation on the LRSP intersections, segments, and curves. Safety strategies and countermeasures provided by KDOT BLP as part of the Task 3 services will be used as a starting point and refined to include those that have been demonstrated to effectively reduce the identified priority crash types. Low-cost systemic improvements will be emphasized, along with proven, practical, and easily implementable solutions. These may be tailored to each county depending on findings from the crash and roadway data analysis.
 - b. Submit list of priority safety strategies and countermeasures developed in Task 5a to KDOT and each county for review and approval. One conference call will be held with each county to discuss review comments.
 7. Identify Safety Projects

Safety projects will be identified for a total of 10 locations in each county.

 - a. Prepare risk factor ranking criteria for intersections, segments, and curves.
 - b. Calculate risk factor scores for intersections, segments, and curves.
 - c. Provide list of the results of the risk factor ranking summary for intersections, segments, and curves to KDOT and the project representative for each county for their future use.
 - d. Develop project selection decision trees for use in the development of recommendations for intersections, segments, and curves that have the highest risk factor rankings. Priority strategies and countermeasures developed as part of the Task 5 services will be used as part of this task.
 - e. Develop a prioritized list of safety improvement locations for no more than the top ten intersection, segment, and curve projects (for a total of 10 projects in each county). Locations with the same risk factor scores in a particular category (intersection, segment, or curve) will be reviewed with the project representative for each county to determine the ten locations to be used.
 - f. Submit list of safety improvement locations developed in Task 6e to KDOT and each county for review and approval. It is anticipated that the follow-up meeting identified in Task 4c will take place as part of this task to discuss review comments. Final approval of prioritized projects will come from KDOT and each county.
 - g. Develop unique project sheets for the approved safety improvement locations which depict project type, location, proposed improvements, and an opinion of probable project cost. It is anticipated that these project sheets will provide sufficient information for the counties to apply for High Risk Rural Roads Program (HRRR) or Highway Safety Improvement Program (HSIP) funding but will not include costs for Rights of Way and Utility Adjustments, if applicable.
 8. Local Road Safety Plan Document
 - a. Develop a Local Road Safety Plan document for each county. The document is anticipated to include the following items:
 - i. Executive summary which includes the prioritized list of safety improvement projects for the top ten intersection, segment, and curve projects.
 - ii. Documentation and technical appendices supporting the selection of risk factors (outcome of Task 1), priority strategies (outcome of Task 5) and priority locations (outcome of Task 6).
 - iii. Project sheets for the 10 approved safety improvement projects which depict project type, location, proposed improvements, and an opinion of probable cost.

- b. Submit draft LRSP document to KDOT and each county for review and approval. It is anticipated that a separate conference call with each county will be held to discuss review comments.
- c. Revise draft LRSP document and submit final to KDOT and each county.
- d. Prepare a summary memorandum for KDOT which lists our suggestions for completing future LRSP documents.

Deliverables

The following deliverables are anticipated to be submitted as part of this scope of services:

- 1. Pdf version of the final LRSP document for KDOT and each county.
- 2. Two (2) bound copies of the final LRSP document for each county. It is anticipated that there will be approximately 200 sheets maximum in each final report.

Imaged around each of the five letters in the "BONUS WORD" there will be a four-sided box composed of solid lines. A player will remove the latex from the "YOUR LETTERS" and "BONUS" play areas one letter at a time, and then for each matching letter in the crossword puzzle grid and the "BONUS WORD" play area scratch off the transparent latex. Each letter revealed in the "YOUR LETTERS" and "BONUS" play areas may be used an unlimited number of times in the crossword puzzle grid. If a player reveals at least three complete words in the crossword puzzle grid, the player wins the corresponding prize in

Article 19. — SPECIFIC PLAYER LOYALTY CLUB RULES

111-19-44. Powerball Power Cruise 2 Collect 'N Win promotion. (a) The Kansas lottery may conduct three second-chance drawings entitled "Powerball Power Cruise 2 Collect 'N Win Promotion." The Promotion will begin on April 14, 2018 at 5:00 a.m. Tickets may be registered beginning at 5:00 a.m. April 15, 2018. The first drawing will close for entries at 11:59 p.m. on May 10, 2018. Winners for the first drawing will be announced on May 15, 2018. The second drawing will close for entries

at 11:59 p.m. on May 31, 2018 and winners will be announced on June 5, 2018. The third drawing will close for entries at 11:59 p.m. on June 12, 2018 and winners will be announced on June 19, 2018.

(b) The specific ticket eligible for entry into the drawing shall be any winning or non-winning Kansas lottery Powerball ticket purchased between April 14, 2018 and at the close of business on June 10, 2018 (which actually occurs at 1:59 a.m. on June 11, 2018). The entry ticket may include single plays, multiple plays, power-play or multi-draws on a single ticket.

(c) Any entry into the drawing(s) which is not selected as a winner in the first or second drawings shall remain eligible to win a prize in subsequent drawings. Players who are selected as alternates in a drawing also remain eligible for future drawings.

(continued)

(d) A player shall enter the webcode from qualifying tickets through the Kansas lottery PlayOn program at www.kslottery.com. The player shall follow the hyperlink specifically developed for the purpose of accessing the "Powerball Power Cruise 2 Collect 'N Win Promotion." The player may enter the required data from the webcode on the online ticket manually for entry into the drawing. If the player does not enter the webcode ticket data manually, the player may scan, if available, the webcode to enter data to be used for entry into the drawing using a mobile device and a downloaded app. After the webcode ticket data is entered either manually or scanned using an app, a random number of symbols ranging from 2 symbols, 4 symbols, 6 symbols, 8 symbols, or 10 symbols will be generated on a player's electronic card. There will be six different symbols available to be collected: a symbol of a red Powerball (which is a free symbol); a symbol of a passport and Cococay, Bahamas; a symbol of "Live!" Music; a symbol of a passport and Nassau, Bahamas; a symbol of a cruise ship; and a symbol of a stack of money. Once the player collects all six different symbols on his or her electronic card, the player will be entered automatically into the drawing. If a symbol is generated that already appears on the player's electronic card, that symbol shall be moved automatically to another electronic card which shall be eligible to collect the remaining symbols. A player may have up to three electronic game cards active at one time. If a symbol is in place in three active game cards, the symbol will be removed from the rotation of symbols available to that player until that player's game card is completed and entered into the drawing.

(e) For the first drawing described in subsection (a), 15 winners will be selected. The first, second, third, fourth and fifth entries selected in the first drawing shall each be awarded a Caribbean cruise prize package. Of those five entries, the first, second and third winners drawn will receive ocean view staterooms on the cruise; the fourth and fifth winners drawn will receive an interior stateroom on the cruise. Entry numbers 6, 7, 8, 9, 10, 11, 12, 13, 14 and 15 selected shall be used as alternate winners, if necessary, in the order drawn.

For the second drawing described in subsection (a), 15 winners will be selected. The first, second, third, fourth and fifth entries selected in the second drawing shall each be awarded a Caribbean cruise prize package. Of those five entries, the first winner drawn will receive a balcony stateroom on the cruise; the second and third winners drawn will receive ocean view staterooms on the cruise; the fourth and fifth winners drawn will receive an interior stateroom on the cruise. 111-401-244. Shuffling and cutting cards. (a) Shuffling procedures.

(1) A shuffle machine may be used. When a shuffle machine is used, the dealer may be required to mix the cards prior to placing them into the shuffle machine.

(2) In the event a shuffle machine is not used, the dealer will place the cards in the dealer's work area and separate the deck into two stacks. The dealer will mix the two stacks.

(b) No card cutting procedures are used in the game of Three Card Poker with Six Card Bonus when using a shuffle machine. After a manual shuffle, the dealer sets the whole deck flat on the layout in front of the chip area to cut the deck. The dealer will take approximately one-half of the cards from the deck and place them on top of the cut card. The dealer will then place the remaining portion of the deck on top of the other cards.

(c) Dealing and taking of cards:

(1) Hands will be dealt to players as follows:

(A) The hands will be dealt face down from left to right.

(B) In the event a shuffle machine is used, each player will receive all three cards at once.

(C) In the event a manual shuffle is used, cards will be dealt beginning with the leftmost player clockwise to all players and the dealer face down and one at a time. Players may, but are not required to, view their cards. If a player views his or her cards, the player shall place the cards back in his or her betting area on the table before the dealer's cards are exposed.

(D) After all cards for the game are dealt, the remaining cards will be removed from play. (Authorized by K.S.A. 2017 Supp. 74-8710 and 74-8748; implementing K.S.A. 2017 Supp. 74-8710; effective, T-111-5-18-18, April 11, 2018.)

111-401-245. Collection and payout of bets. (a) Prior to the dealer exposing any cards, cards will be collected from players who forfeit.

(b) After the dealer exposes the dealer's hand, the dealer will expose the hand of each player starting with the rightmost player, one at a time. The dealer will pay each winning wager, collect each losing wager, or indicate a push for each wager placed by the player and collect the player's cards. (Authorized by K.S.A. 2017 Supp. 74-8710 and 74-8748; implementing K.S.A. 2017 Supp. 74-8710; effective, T-111-5-18-18, April 11, 2018.)

111-401-246. Irregularities of the game. (a) An exposed card does not necessarily constitute a misdeal. The dealer, upon direction from the table games supervisor or higher ranking casino official, may turn the card over and continue dealing as if the card were not exposed.

(b) A table games supervisor or higher ranking casino official will be notified of any incorrect number of cards being dealt. Depending on the situation, the table games supervisor or higher ranking casino will determine how to proceed. Players receiving an incorrect number of cards will have a dead (void) hand. If the dealer has an incorrect number of cards, the round is a misdeal and the cards are dealt again.

(c) If the sensors start flashing during a round because the shuffle machine signaled an incorrect card count, the table games supervisor or higher ranking casino official will verify the correct number of cards is in play. If all players and the dealer have the correct number of cards, the remaining cards in the deck will be counted down. If the card count is correct (52 cards), the table games supervisor or higher ranking casino official may direct the dealer to resume play. If the card count is incorrect (any number of cards other than 52), that round is void, all players' wagers shall be returned, and the deck of cards shall be replaced with a new deck of cards.

(d) It will be a misdeal if the dealer presses the start button to unload the remaining cards in the shuffle machine prior to delivering the dealer's hand. (Authorized by K.S.A. 2017 Supp. 74-8710 and 74-8748; implementing K.S.A. 2017 Supp. 74-8710; effective, T-111-5-18-18, April 11, 2018.)

Article 501.—SOUTH CENTRAL GAMING ZONE

111-501-143. Play. (a) The game of High Card Flush is played with a standard 52-card deck of playing cards.

(b) All ante wagers, flush bonus wagers and straight flush bonus wagers shall be placed prior to the first card being dealt in a round of play.

(c) A shuffling machine may be used in the game of High Card Flush. When a shuffling machine is used, the machine will deal seven (7) cards at a time. Beginning with the first player to the left of the dealer and continuing clockwise in order around the table, the dealer shall deal each player and the dealer seven (7) cards one stack at a time face down. In the event a shuffling machine is not used and the dealer manually shuffles the cards, beginning with the first player to the left of the dealer who has placed an ante wager and continuing clockwise in order around the table, the dealer shall deal each player who has placed an ante wager and the dealer seven (7) cards face down. Each player shall be dealt all seven (7) cards before the next player or dealer is dealt his or her seven (7) cards.

(d) After all cards have been dealt, each player may examine his or her cards. Each player who places a wager shall be responsible for his or her own hand and no person other than the dealer and the player to whom the cards were dealt may touch the cards of that player.

(e) After examination of his or her cards, each player who has placed an ante wager shall have the option to either forfeit the ante wager and end his or her participation against the dealer's hand or make a raise wager. A raise wager must be equal to the amount of the player's ante wager unless the player's hand consists of five (5) or more cards of the same suit. If the player's hand consists of five (5) cards of the same suit, the player may make a raise wager up to two (2) times the amount of the player's ante wager. If the player's hand consists of six (6) or seven (7) cards of the same suit, the player may make a raise wager up to three (3) times the amount of the player's ante wager. If a player has placed an ante wager along with a flush bonus wager and/or straight flush bonus wager but does not make a raise wager, the player shall forfeit the ante wager.

(f) After each player has either placed a raise wager on the designated area of the table or forfeited his or her wager and hand, the dealer shall collect all forfeited wagers and associated cards, placing them in the discard rack or automatic shuffling machine. The dealer shall then reveal the dealer's cards and place the cards so as to form the highest possible ranking hand available for the dealer's cards.

(g) The dealer shall then settle the wagers remaining on the table by performing the procedure in subsection (h) below. All cards collected during the procedure shall be placed in the discard rack or automatic shuffling machine.

(h) Starting with the player farthest to the dealer's right and continuing counterclockwise around the table the dealer shall:

(1) Reveal the cards of each remaining player, one player at a time;

(2) Determine the highest ranking hand of each remaining player;

(3) Collect all losing wagers;

(4) Pay each winning wager in accordance with the payout odds listed below; and,

(5) Collect all player cards and place them in the discard rack or automatic shuffling machine.

(i) All cards collected by the dealer shall be picked up in order and placed in the discard rack or automatic shuffling machine in such a way that they can be readily arranged to reconstruct each hand in the event of a question or dispute.

(j) There are three winning payout types, as follows:

(1) A player in competition against the dealer shall be paid at odds of one to one on both the ante wager and the raise wager if the player's hand is ranked higher than the dealer's hand, except that to win both wagers the dealer's hand must contain at least a three card flush containing a 9 or higher ranking card and the player's hand must be ranked higher than the dealer's hand. If the dealer does not hold a hand with at least a three card flush containing a 9 or higher ranking card, the player's ante wager

(continued)

shall automatically be paid at odds of one to one and the player's raise wager shall be returned to the player as a draw (tie).

(2) A player placing a flush bonus wager shall be paid at the following odds:

Four card flush	1 to 1
Five card flush	10 to 1
Six card flush	100 to 1
Seven card flush	300 to 1

(3) A player placing a straight flush bonus wager shall be paid at the following odds:

Three card straight flush	7 to 1
Four card straight flush	60 to 1
Five card straight flush	100 to 1
Six card straight flush	1000 to 1
Seven card straight flush	8000 to 1
